GLOBALSTAR, INC.

NOTES TO UNAUDITED INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The Company has prepared the accompanying unaudited interim condensed consolidated financial statements in accordance with generally accepted accounting principles in the United States of America ("GAAP") for interim financial information. Certain information and footnote disclosures normally in financial statements have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission; however, management believes the disclosures made are adequate to make the information presented not misleading. These financial statements and notes should be read in conjunction with the consolidated financial statements and notes thereto included in Globalstar, Inc.'s Annual Report on Form 10-K for the year ended December 31, 2013 and Management's Discussion and Analysis of Financial Condition and Results of Operations herein.

The preparation of condensed consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company evaluates estimates on an ongoing basis. Significant estimates include the value of derivative instruments, the allowance for doubtful accounts, the net realizable value of inventory, the useful life and value of property and equipment, the value of stock-based compensation, the reserve for product warranties, and income taxes. Actual results could differ from these estimates.

All significant intercompany transactions and balances have been eliminated in the consolidation. In the opinion of management, the information included herein includes all adjustments, consisting of normal recurring adjustments, that are necessary for a fair presentation of the Company's condensed consolidated statements of operations, condensed consolidated balance sheets, and condensed consolidated statements of cash flows for the periods presented. These unaudited interim condensed consolidated financial statements include the accounts of Globalstar and its majority owned or otherwise controlled subsidiaries. The results of operations for the three and nine months ended September 30, 2014 are not necessarily indicative of the results that may be expected for the full year or any future period.

The Company evaluates events that occur after the balance sheet date but before the financial statements are issued for potential recognition or disclosure. Based on the evaluation, the Company determined that there were no material subsequent events for recognition or disclosure other than those disclosed herein.

Recently Issued Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2014-09, Revenue from Contracts with Customers. ASU 2014-09 outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers. This standard requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. ASU 2014-09 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2016. Early adoption is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is currently evaluating the impact this standard will have on its condensed consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing reporting.

## 2. PROPERTY AND EQUIPMENT

Property and equipment consists of the following (in thousands):

	September 30, 2014	December 31, 2013
Globalstar System:		
Space component		
Second-generation satellites in service	\$1,212,040	\$1,212,099
Prepaid long-lead items	17,040	17,040
Second-generation satellite, on-ground spare	32,459	32,365
Ground component	48,126	48,378
Construction in progress:		
Space component	11	—
Ground component	129,489	116,377
Other	1,811	1,115
Total Globalstar System	1,440,976	1,427,374
Internally developed and purchased software	15,794	14,931
Equipment	12,670	12,385
Land and buildings	3,719	3,768
Leasehold improvements	1,662	1,644
Total property and equipment	1,474,821	1,460,102
Accumulated depreciation	(354,665	) (290,317
Total property and equipment, net	\$1,120,156	\$1,169,785

Amounts in the above table consist primarily of costs incurred related to the construction of the Company's second-generation constellation and ground upgrades. Amounts included in the Company's second-generation satellite, on-ground spare balance as of September 30, 2014 consist of costs related to a spare second-generation satellite that is capable of being included in a future launch of satellites. As of September 30, 2014, this satellite and the prepaid long-lead items have not been placed into service, and therefore the Company has not yet recorded depreciation expense for these items.

## Capitalized Interest and Depreciation Expense

The following tables summarize capitalized interest for the periods indicated below (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
Interest cost eligible to be capitalized	\$10,508	\$13,119	\$34,123	\$38,851
Interest cost recorded in interest expense, net	(8,557	) (10,151	) (28,365	) (24,302
Net interest capitalized	\$1,951	\$2,968	\$5,758	\$14,549

The following table summarizes depreciation expense for the periods indicated below (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
Depreciation Expense	\$20,653	\$23,931	\$65,040	\$65,622

## 3. LONG-TERM DEBT AND OTHER FINANCING ARRANGEMENTS

Long-term debt consists of the following (in thousands):

	September 30, 2014		December 31, 2013	
	Principal Amount	Carrying Value	Principal Amount	Carrying Value
Facility Agreement	\$586,342	\$586,342	\$586,342	\$586,342
Thermo Loan Agreement	66,106	30,307	60,383	22,854
8.00% Convertible Senior Notes Issued in 2013	23,032	14,392	46,971	26,291
8.00% Convertible Senior Unsecured Notes Issued in 2009	—	—	51,652	33,795
Total Debt	675,480	631,041	745,348	669,282
Less: Current Portion	7,271	7,271	4,046	4,046
Long-Term Debt	\$668,209	\$623,770	\$741,302	\$665,236

The above table presents the principal amount and carrying value of long-term debt at September 30, 2014 and December 31, 2013. The principal amounts shown above include payment of in-kind interest as of the date paid-in-kind notes, if any, are issued. The carrying value is net of any discounts to the loan amounts at issuance, including accretion, as further described below. The amount included in the table above as the current portion of long-term debt includes the next scheduled principal repayments under the Facility Agreement, which are due in December 2014 and June 2015.

## Facility Agreement

The Company's senior secured credit facility agreement ("Facility Agreement") was amended and restated in August 2013 and is scheduled to mature in December 2022. Semi-annual principal repayments are scheduled to begin in December 2014. The facility bears interest at a floating rate of LIBOR plus 2.75% through June 2017, increasing by an additional 0.5% each year thereafter to a maximum rate of LIBOR plus 5.75%. Ninety-five percent of the Company's obligations under the Facility Agreement are guaranteed by COFACE, the French export credit agency. The Company's obligations under the Facility Agreement are guaranteed on a senior secured basis by all of its domestic subsidiaries and are secured by a first priority lien on substantially all of the assets of the Company and its domestic subsidiaries (other than their FCC licenses), including patents and trademarks, 100% of the equity of the Company's domestic subsidiaries and 65% of the equity of certain foreign subsidiaries.

The Facility Agreement contains customary events of default and requires that the Company satisfy various financial and nonfinancial covenants. Pursuant to the terms of the Facility Agreement, the Company has the ability to cure noncompliance with financial covenants with equity contributions through June 2017. If the Company violates any of these financial and nonfinancial covenants and is unable to obtain waivers or avoid an event of default through an equity cure contribution, the Company would be in default under the agreement, and payment of the indebtedness could be accelerated. The acceleration of the Company's indebtedness under one agreement may permit acceleration of indebtedness under other agreements that contain cross-acceleration provisions. The Company was in compliance with all covenants in the Facility Agreement as of September 30, 2014.

The Facility Agreement requires the Company to maintain a total of \$37.9 million in a debt service reserve account. The use of the funds in this account is restricted to making principal and interest payments under the Facility Agreement. As of September 30, 2014, the balance in the debt service reserve account was \$37.9 million and classified as restricted cash.

## Thermo Loan Agreement

The Company has an Amended and Restated Loan Agreement (the “Loan Agreement”) with Thermo whereby Thermo agreed to lend the Company \$25.0 million for the purpose of funding the debt service reserve account required under the Facility Agreement. In 2011, this loan was increased to \$37.5 million. This loan is subordinated to, and the debt service reserve account is pledged to secure, all of the Company’s obligations under the Facility Agreement. Amounts deposited in the debt service reserve account are restricted to payments due under the Facility Agreement, unless otherwise authorized by the lenders.

The loan accrues interest at 12% per annum, which is capitalized and added to the outstanding principal in lieu of cash payments. The Company will make payments to Thermo only when permitted under the Facility Agreement. The loan becomes due and payable 6 months after the obligations under the Facility Agreement have been paid in full, or earlier if the Company has a change in control or any acceleration of the maturity of the loans under the Facility Agreement occurs. As of September 30,

2014, \$28.6 million of interest was accrued; this amount is included in long-term debt on the Company's condensed consolidated balance sheet.

The Company evaluated the various embedded derivatives within the Loan Agreement. The Company determined that the conversion option and the contingent put feature upon a fundamental change required bifurcation from the Loan Agreement. The conversion option and the contingent put feature were not deemed clearly and closely related to the Loan Agreement and were separately accounted for as a standalone derivative. The Company recorded this compound embedded derivative liability as a non-current liability on its condensed consolidated balance sheet with a corresponding debt discount which is netted against the face value of the Loan Agreement.

The Company is accreting the debt discount associated with the compound embedded derivative liability to interest expense through the maturity of the Loan Agreement using an effective interest rate method. The fair value of the compound embedded derivative liability is marked-to-market at the end of each reporting period, with any changes in value reported in the condensed consolidated statements of operations. The Company determined the fair value of the compound embedded derivative using a blend of a Monte Carlo simulation model and market prices.

#### 8.00% Convertible Senior Notes Issued in 2013

On May 20, 2013, the Company entered into an Exchange Agreement with the beneficial owners and investment managers for beneficial owners (the "Exchanging Note Holders") of approximately 91.5% of its outstanding 5.75% Convertible Senior Notes ("5.75% Notes") and completed the transactions contemplated by the Exchange Agreement. Pursuant to the Exchange Agreement, the Company issued \$54.6 million aggregate principal amount of 8.00% Convertible Senior Notes (the "8.00% Notes Issued in 2013") to the Exchanging Note Holders. The 8.00% Notes Issued in 2013 are convertible into shares of common stock at an initial conversion price of \$0.80 per share of common stock, or 1,250 shares of the Company's common stock per \$1,000 principal amount of the 8.00% Notes Issued in 2013, subject to adjustment as provided in the Fourth Supplemental Indenture between the Company and U.S. Bank National Association, as Trustee (the "New Indenture"). As a result of the exchange and redemption, the Company recognized a loss on extinguishment of debt of approximately \$47.2 million in the second quarter of 2013, representing the difference between the old 5.75% Notes and the fair value of the consideration given in the exchange. The conversion price of the 8.00% Notes Issued in 2013 will be adjusted in the event of certain stock splits or extraordinary share distributions, or as a reset of the base conversion and exercise price pursuant to the terms of the New Indenture. Due to common stock issuances by the Company since May 20, 2013 at prices below the then effective conversion rate, the base conversion rate had been reduced to \$0.73 per share of common stock as of September 30, 2014.

The 8.00% Notes Issued in 2013 are senior unsecured debt obligations of the Company, with no sinking fund. The 8.00% Notes Issued in 2013 will mature on April 1, 2028, subject to various call and put features, and bear interest at a rate of 8.00% per annum. Interest on the 8.00% Notes Issued in 2013 is payable semi-annually in arrears on April 1 and October 1 of each year. Interest is paid in cash at a rate of 5.75% per annum and additional notes at a rate of 2.25% per annum. The New Indenture provides for customary events of default. As of September 30, 2014, the Company was not in default under the New Indenture with respect to the 8.00% Notes Issued in 2013.

Subject to certain conditions set forth in the New Indenture, the Company may redeem the 8.00% Notes Issued in 2013, with the prior approval of the Majority Lenders, in whole or in part, at any time on or after April 1, 2018, at a price equal to the principal amount of the 8.00% Notes Issued in 2013 to be redeemed plus all accrued and unpaid interest thereon.

A holder of 8.00% Notes Issued in 2013 has the right, at the Holder's option, to require the Company to purchase some or all of the 8.00% Notes Issued in 2013 held by it on each of April 1, 2018 and April 1, 2023 at a price equal to the

principal amount of the 8.00% Notes Issued in 2013 to be purchased plus accrued and unpaid interest.

Subject to the procedures for conversion and other terms and conditions of the New Indenture, a holder may convert its 8.00% Notes Issued in 2013 at its option at any time prior to the close of business on the business day immediately preceding April 1, 2028, into shares of common stock (or, at the option of the Company, cash in lieu of all or a portion thereof, provided that, under the Facility Agreement, the Company may pay cash only with the consent of the Majority Lenders).

A holder was permitted to elect to convert up to 15% of its 8.00% Notes Issued in 2013 on each of July 19, 2013 and March 20, 2014. If a holder had elected to convert on either of those dates, it would have received, at the Company's option, either cash equal to the par value of the 8.00% Notes Issued in 2013 plus accrued interest (provided that, under the Facility Agreement, the Company could pay cash only with the consent of the Majority Lenders) or shares of the Company's common stock equal to the principal amount of the 8.00% Notes Issued in 2013 to be converted plus accrued interest divided by the lower of the average price of the common stock in a specified period and \$0.50. On July 19, 2013, \$7.0 million principal amount (approximately 12.9%

of the outstanding principal amount) of 8.00% Notes Issued in 2013 were converted, resulting in the issuance of 14.3 million shares of common stock. On March 20, 2014, \$7.0 million principal amount (approximately 15.0% of the outstanding principal amount) of 8.00% Notes Issued in 2013 were converted, resulting in the issuance of an additional 14.6 million shares. Through September 30, 2014, a total of \$32.4 million principal amount of 8.00% Notes Issued in 2013 had been converted, resulting in the issuance of approximately 59.5 million shares of voting common stock relating to the special conversions discussed above as well as normal conversions pursuant to the terms of the New Indenture. The Company recorded a loss on extinguishment of debt of approximately \$43.8 million during the nine months ended September 30, 2014 related to these conversions. Pursuant to the terms in the New Indenture for the 8.00% Notes Issued in 2013 for normal conversions, holders receive conversion shares over a 40-consecutive trading day settlement period. As a result of this feature, the portion of converted debt is extinguished on an incremental basis over the 40-day settlement period, reducing the Company's debt balance outstanding. As of September 30, 2014, there were no conversions that had been initiated, but not yet fully settled.

The Company evaluated the various embedded derivatives within the New Indenture. The Company determined that the conversion option and the contingent put feature within the New Indenture required bifurcation from the 8.00% Notes Issued in 2013. The conversion option and the contingent put feature were not deemed clearly and closely related to the 8.00% Notes Issued in 2013 and were separately accounted for as a standalone derivative. The Company recorded this compound embedded derivative liability as a non-current liability on its condensed consolidated balance sheet with a corresponding debt discount which is netted against the face value of the 8.00% Notes Issued in 2013.

The Company is accreting the debt discount associated with the compound embedded derivative liability to interest expense through the first put date of the 8.00% Notes Issued in 2013 (April 1, 2018) using an effective interest rate method. The fair value of the compound embedded derivative liability is being marked-to-market at the end of each reporting period, with any changes in value reported in the condensed consolidated statements of operations. The Company determined the fair value of the compound embedded derivative using a blend of a Monte Carlo simulation model and market prices.

#### 8.00% Convertible Senior Notes Issued in 2009

In June 2009, the Company sold \$55.0 million in aggregate principal amount of 8.00% Notes Issued in 2009 and Warrants (the "8.00% Warrants") to purchase 15.3 million shares of the Company's common stock. The 8.00% Notes Issued in 2009 were subordinated to all of the Company's obligations under the Facility Agreement. The 8.00% Notes Issued in 2009 were the Company's senior unsecured debt obligations and, except as described in the preceding sentence, ranked pari passu with its existing unsecured, unsubordinated obligations, including its 8.00% Notes Issued in 2013. The 8.00% Notes Issued in 2009 were scheduled to mature at the later of the tenth anniversary of closing (June 19, 2019) or six months following the maturity date of the Facility Agreement and bore interest at a rate of 8.00% per annum. Interest on the 8.00% Notes Issued in 2009 was payable in the form of additional notes or, subject to certain restrictions, in common stock at the option of the holder. Interest was payable semi-annually in arrears on June 15 and December 15 of each year.

The 8.00% Warrants contained full ratchet anti-dilution protection, and the exercise price of the Warrants was subject to adjustment under certain circumstances. In the event of certain transactions that involve a change of control, the holders of the 8.00% Warrants maintained the right to make the Company purchase the warrants for cash, subject to certain conditions. The exercise period for the 8.00% Warrants began on December 19, 2009 and ended on June 19, 2014. As a result of the expiration of this period on June 19, 2014, all outstanding 8.00% Warrants were exercised during the second quarter of 2014, resulting in the issuance of 38.2 million shares of Globalstar common stock.

Holders of the 8.00% Warrants had the right to exercise on either a cash or cashless basis. The Company received approximately \$7.5 million in cash as a result of these exercises.

Pursuant to the terms of the indenture governing the 8.00% Notes Issued in 2009, if at any time the closing price of the common stock were to exceed 200% of the conversion price of the 8.00% Notes Issued in 2009 for 30 consecutive trading days, all of the outstanding 8.00% Notes Issued in 2009 would be automatically converted into common stock. The condition for the automatic conversion was met on April 15, 2014, and all outstanding 8.00% Notes Issued in 2009 (approximately \$37.8 million principal amount at that time) converted on that date into approximately 34.5 million shares of the Company's voting common stock.

Prior to expiration of the 8.00% Warrants and the automatic conversion of the 8.00% Notes Issued in 2009, the exercise price of the 8.00% Warrants was \$0.32, and the base conversion price of the 8.00% Notes Issued in 2009 was \$1.14.

The Company initially accreted the debt discount associated with the compound embedded derivative liability to interest expense over the outstanding term of the 8.00% Notes Issued in 2009 using an effective interest rate method. Upon the automatic conversion

of the 8.00% Notes Issued in 2009, the remaining debt discount was written off through extinguishment gain (loss). The Company recorded a gain on extinguishment of debt of approximately \$4.3 million during the nine months ended September 30, 2014 related to these conversions.

#### Warrants Outstanding

As a result of the Company's financing arrangements described above, as of September 30, 2014 and December 31, 2013, warrants were outstanding to purchase 45.1 million and 93.5 million shares, respectively, of the Company's common stock as shown in the table below:

	Outstanding Warrants		Strike Price	
	September 30, 2014	December 31, 2013	September 30, 2014	December 31, 2013
Contingent Equity Agreement (1)	37,088,418	41,467,980	\$0.01	\$0.01
Thermo Loan Agreement (2)	—	4,205,608	—	0.01
5.0% Notes (3)	8,000,000	8,000,000	0.32	0.32
8.00% Notes Issued in 2009 (4)	—	39,842,813	—	0.32
	45,088,418	93,516,401		

(1) Pursuant to the terms of the Contingent Equity Agreement, the Company has issued to Thermo warrants to purchase shares of common stock pursuant to the annual availability fee and subsequent reset provisions in the Contingent Equity Agreement. These warrants have a five-year exercise period from issuance. These warrants were issued between June 2009 and June 2012, and the exercise periods expire between June 2014 and June 2017. As of September 30, 2014, Thermo had exercised warrants to purchase approximately 4.4 million of these shares prior to the expiration of the associated warrants.

(2) As consideration for the Loan Agreement with Thermo, the Company issued Thermo warrants to purchase shares of common stock. The exercise period of the warrants issued in connection with the Thermo Loan Agreement was five years from issuance, which expired in June 2014. Thermo exercised all of these warrants in the second quarter of 2014.

(3) The 5.0% Warrants are exercisable until June 2016, which is five years after their issuance.

(4) The exercise period for the 8.00% Warrants began on December 19, 2009 and ended on June 14, 2014. All 8.00% Warrants were exercised in the second quarter of 2014.

#### Consent Agreement and Common Stock Purchase (and Option) Agreement

As discussed above, on May 20, 2013, the Company exchanged its 5.75% Notes for the 8.00% Notes Issued in 2013. In connection with this exchange, the Company and Thermo entered into various financial arrangements as described below.

#### The Consent Agreement

On May 20, 2013, the Company entered into the Equity Commitment, Restructuring Support and Consent Agreement dated as of May 20, 2013 among Globalstar, Thermo, BNP Paribas, as agent, and the lenders under the Facility Agreement (the "Consent Agreement") and the Global Deed of Amendment and Restatement (the "GARA") with Thermo. To obtain the lenders' consent to the transactions contemplated by the Exchange Agreement, pursuant to the Consent Agreement, Thermo agreed that it would make, or arrange for third parties to make, cash contributions to the Company in exchange for equity, subordinated convertible debt or other equity-linked securities as follows:

At the closing of the exchange transaction and thereafter each week until no later than July 31, 2013, an amount sufficient to enable the Company to maintain a consolidated unrestricted cash balance of at least \$4.0 million;  
At the closing of the exchange transaction, \$25.0 million to satisfy all cash requirements associated with the exchange transaction, including agreed principal and interest payments to the holders of the 5.75% Notes as contemplated by the Exchange Agreement, with any remaining portion being retained by the Company for working capital and general corporate purposes;  
Contemporaneously with, and as a condition to the closing of, any restructuring of the Facility Agreement, \$20.0 million (less any amount contributed pursuant to the commitment described above with respect to the Company's minimum cash balance);  
Subject to the prior closing of the Facility Agreement restructuring, on or prior to December 26, 2013, \$20.0 million;  
and

Subject to the prior closing of the Facility Agreement restructuring, on or prior to December 31, 2014, \$20.0 million, less the amount by which the aggregate amount of cash received by the Company under the first, third and fourth commitments described above exceeds \$40 million.

In accordance with the terms of the Common Stock Purchase Agreement and Common Stock Purchase and Option Agreement, discussed below, as of September 30, 2014, Thermo had contributed a total of \$65.0 million to the Company in exchange for 171.9 million shares of the Company's nonvoting common stock. As of September 30, 2014, Thermo had fulfilled its obligations under the agreements.

#### The Common Stock Purchase Agreement

On May 20, 2013, the Company and Thermo entered into a Common Stock Purchase Agreement pursuant to which Thermo purchased 78,125,000 shares of the Company's common stock for \$25.0 million (\$0.32 per share). Thermo also agreed to purchase additional shares of common stock at \$0.32 per share as and when required to fulfill its equity commitment described above to maintain the Company's consolidated unrestricted cash balance at not less than \$4.0 million until the earlier of July 31, 2013 and the closing of a restructuring of the Facility Agreement. In furtherance thereof, at the closing of the transactions contemplated by the Exchange Agreement, Thermo purchased an additional 15,625,000 shares of common stock for an aggregate purchase price of \$5.0 million. In June 2013, Thermo purchased an additional 28,125,000 shares of common stock for an aggregate purchase price of \$9.0 million pursuant to the Common Stock Purchase Agreement. Pursuant to its commitment, Thermo invested \$6.0 million in July 2013 and \$6.5 million in August 2013 on terms determined by a special committee of the Company's board of directors consisting solely of unaffiliated directors as described below.

During 2013, Thermo purchased in total approximately 121.9 million shares of the Company's common stock pursuant to the Common Stock Purchase Agreement for an aggregate \$39.0 million, as discussed in the previous paragraph. As a result of these transactions, during the second quarter of 2013, the Company recognized a loss on the sale of these shares of approximately \$14.0 million (included in other income/expense on the condensed consolidated statement of operations), representing the difference between the purchase price and the fair value of the Company's common stock (measured as the closing stock price on the date of each sale). Pursuant to the Common Stock Purchase Agreement, the shares of common stock are intended to be shares of non-voting common stock. As of May 20, 2013, the Company's certificate of incorporation did not provide for any authorized but unissued shares of non-voting common stock. On July 8, 2013, the Company filed an amendment to its certificate of incorporation increasing the number of authorized shares of non-voting common stock, and the Company subsequently delivered Thermo shares of non-voting common stock for the payments previously made.

The terms of the Common Stock Purchase Agreement were approved by a special committee of the Company's board of directors consisting solely of the Company's unaffiliated directors. The committee, which was represented by independent legal counsel, determined that the terms of the Common Stock Purchase Agreement were fair and in the best interests of the Company and its shareholders.

#### The Common Stock Purchase and Option Agreement

On October 14, 2013, the Company and Thermo entered into a Common Stock Purchase and Option Agreement pursuant to which Thermo agreed to purchase 11,538,461 shares of the Company's nonvoting common stock at a purchase price of \$0.52 per share in exchange for \$6.0 million invested in July and an additional \$20 million, or 38,461,538 shares, of which \$6.5 million was invested in August 2013 and the remaining \$13.5 million was invested under the First Option, described below. The Common Stock Purchase and Option Agreement also granted the Company a First Option and a Second Option, as defined in the agreement, to sell to Thermo up to \$13.5 million and \$11.5 million, respectively, of nonvoting common stock, as and when exercised by the special committee, through

November 28, 2013 and December 31, 2013, respectively. The First Option to sell up to \$13.5 million in shares to Thermo was at a purchase price of \$0.52 per share. The Second Option to sell up to \$11.5 million in shares to Thermo was at a price equal to 85% of the average closing price of the voting common stock during the ten trading days immediately preceding the date of the special committee's exercise of the option. In November 2013, the Company and the special committee amended the Common Stock Purchase and Option Agreement to defer the expiration date of the Second Option to March 31, 2014. The Second Option under the Common Stock Purchase and Option Agreement was not exercised and therefore has expired.

During 2013, Thermo purchased approximately 24.0 million shares of the Company's common stock pursuant to the terms of the Common Stock Purchase and Option Agreement for an aggregate purchase price of \$12.5 million. As a result of these transactions, during the third quarter of 2013, the Company recognized a loss on the sale of these shares of approximately \$2.4 million (included in other income/expense on the condensed consolidated statement of operations), representing the difference between the purchase price and the fair value of the Company's common stock (measured as the closing stock price on the date of each sale).

In November 2013, the Company exercised the First Option, and on December 27, 2013 Thermo purchased 26.0 million shares of common stock at a purchase price of \$0.52 per share for a total additional investment of \$13.5 million.

The terms of the Common Stock Purchase and Option Agreement were approved by a special committee of the Company's board of directors consisting solely of the Company's unaffiliated directors. The committee, which was represented by independent legal counsel, determined that the terms of the Common Stock Purchase and Option Agreement were fair and in the best interests of the Company and its shareholders.

#### Terrapin Opportunity, L.P. Common Stock Purchase Agreement

On December 28, 2012 the Company entered into a Common Stock Purchase Agreement with Terrapin pursuant to which the Company may, subject to certain conditions, require Terrapin to purchase up to \$30.0 million of shares of voting common stock over the 24-month term following the effectiveness of a resale registration statement, which became effective on August 2, 2013. This type of arrangement is sometimes referred to as a committed equity line financing facility. From time to time over the 24-month term following the effectiveness of the registration statement, and in the Company's sole discretion, the Company may present Terrapin with up to 36 draw down notices requiring Terrapin to purchase a specified dollar amount of shares of voting common stock, based on the price per share per day over ten consecutive trading days (a "Draw Down Period"). The per share purchase price for these shares will equal the daily volume weighted average price of common stock on each date during the Draw Down Period on which shares are purchased, less a discount ranging from 3.5% to 8% based on a minimum price that the Company specifies. In addition, in the Company's sole discretion, but subject to certain limitations, the Company may require Terrapin to purchase a percentage of the daily trading volume of its common stock for each trading day during the Draw Down Period. The Company has agreed not to sell to Terrapin a number of shares of voting common stock which, when aggregated with all other shares of voting common stock then beneficially owned by Terrapin and its affiliates, would result in the beneficial ownership by Terrapin or any of its affiliates of more than 9.9% of the then issued and outstanding shares of voting common stock.

When the Company makes a draw under the Terrapin equity line agreement, it will issue Terrapin shares of common stock calculated using a price per share as specified in the agreement. As of September 30, 2014, Terrapin had purchased a total of 6.1 million shares of voting common stock at a purchase price of \$6.0 million pursuant to the terms of the agreement. As of September 30, 2014, \$24.0 million remains available under this agreement.

#### 4. DERIVATIVES

In connection with certain borrowings disclosed in Note 3, the Company was required to record derivative instruments on its condensed consolidated balance sheets. None of these derivative instruments are designated as a hedge. The following tables disclose the fair values and classification of the derivative instruments on the Company's condensed consolidated balance sheets (in thousands):

	September 30, 2014	December 31, 2013
Intangible and other assets:		
Interest rate cap	\$72	\$185
Total intangible and other assets	\$72	\$185
Derivative liabilities, current:		
Warrants issued with 8.00% Notes Issued in 2009	\$—	\$(57,048 )
Derivative liabilities, non-current:		

Edgar Filing: Globalstar, Inc. - Form 10-Q

Compound embedded derivative with 8.00% Notes Issued in 2009	\$—	\$ (66,022 )
Compound embedded derivative with 8.00% Notes Issued in 2013	(109,896	) (109,794 )
Compound embedded derivative with the Amended and Restated Thermo Loan Agreement	(465,907	) (229,662 )
Total derivative liabilities, non-current:	(575,803	) (405,478 )
Total derivative liabilities, current and non-current	\$(575,803	) \$(462,526 )

The following table discloses the changes in value during the three and nine months ended September 30, 2014 and 2013 recorded as derivative gain (loss) on the Company's condensed consolidated statement of operations (in thousands):

	Three Months Ended	
	September 30, 2014	September 30, 2013
Interest rate cap	\$(7	) \$(30
Warrants issued with 8.00% Notes Issued in 2009	—	(6,323
Compound embedded derivative with 8.00% Notes Issued in 2009	—	(29,986
Contingent put feature embedded in the 5.0% Convertible Senior Notes	—	848
Compound embedded derivative with 8.00% Notes Issued in 2013	43,050	(25,590
Compound embedded derivative with the Amended and Restated Thermo Loan Agreement	123,946	(36,453
Total derivative gain (loss)	\$166,989	\$(97,534
	Nine Months Ended	
	September 30, 2014	September 30, 2013
Interest rate cap	\$(113	) \$86
Warrants issued with 8.00% Notes Issued in 2009	(67,523	) (28,949
Compound embedded derivative with 8.00% Notes Issued in 2009	(16,406	) (37,233
Contingent put feature embedded in the 5.0% Convertible Senior Notes	—	2,133
Compound embedded derivative with 8.00% Notes Issued in 2013	(98,376	) (26,495
Compound embedded derivative with the Amended and Restated Thermo Loan Agreement	(236,245	) (36,453
Total derivative loss	\$(418,663	) \$(126,911

#### Intangible and Other Assets

#### Interest Rate Cap

In June 2009, in connection with entering into the Facility Agreement, which provides for interest at a variable rate, the Company entered into five ten-year interest rate cap agreements. The interest rate cap agreements reflect a variable notional amount ranging from \$586.3 million to \$14.8 million at interest rates that provide coverage to the Company for exposure resulting from escalating interest rates over the term of the Facility Agreement. The interest rate cap provides limits on the six-month Libor rate ("Base Rate") used to calculate the coupon interest on outstanding amounts on the Facility Agreement and is capped at 5.50% should the Base Rate not exceed 6.5%. Should the Base Rate exceed 6.5%, the Company's Base Rate will be 1% less than the then six-month Libor rate. The Company paid an approximately \$12.4 million upfront fee for the interest rate cap agreements. The interest rate cap did not qualify for hedge accounting treatment, and changes in the fair value of the agreements are included in the condensed consolidated statements of operations.

#### Derivative Liabilities

The Company has identified various embedded derivatives resulting from certain features in the Company's debt instruments. These embedded derivatives required bifurcation from the debt host instrument. All embedded derivatives that required bifurcation are recorded as a derivative liability on the Company's condensed consolidated balance sheet with a corresponding debt discount netted against the principal amount of the related debt instrument.

The Company accretes the debt discount associated with each derivative liability to interest expense over the term of the related debt instrument using an effective interest rate method. The fair value of each embedded derivative liability is marked-to-market at the end of each reporting period with any changes in value reported in its condensed consolidated statements of operations. See below for further discussion for each liability and the features embedded in the debt instrument which required the Company to account for the instrument as a derivative.

#### Warrants Issued with 8.00% Notes Issued in 2009

Due to the reset features in the 8.00% Warrants issued with the 8.00% Notes Issued in 2009, the Company recorded the 8.00% Warrants as an embedded derivative liability on its condensed consolidated balance sheet with a corresponding debt discount which was netted against the principal amount of the 8.00% Notes Issued in 2009. The Company determined the fair value of the warrant derivative using a Monte Carlo simulation model. The exercise period for the 8.00% Warrants expired in June 2014; accordingly, the derivative liability for the 8.00% Warrants is no longer outstanding.

#### Compound Embedded Derivative with 8.00% Notes Issued in 2009

As a result of the conversion rights and features and the contingent put feature embedded within the 8.00% Notes Issued in 2009, the Company recorded a compound embedded derivative liability on its condensed consolidated balance sheet with a corresponding debt discount which was netted against the principal amount of the 8.00% Notes Issued in 2009. The Company determined the fair value of the compound embedded derivative using a Monte Carlo simulation model. On April 15, 2014, the remaining principal amount of 8.00% Notes Issued in 2009 was converted into common stock; accordingly, the derivative liability embedded in the 8.00% Notes Issued in 2009 is no longer outstanding.

#### Contingent Put Feature Embedded in the 5.0% Convertible Senior Notes

As a result of the contingent put feature within the 5.0% Convertible Senior Notes ("5.0% Notes"), the Company recorded a derivative liability on its condensed consolidated balance sheet with a corresponding debt discount which was netted against the principal amount of the 5.0% Notes. The Company determined the fair value of the contingent put feature derivative using a Monte Carlo simulation model. On November 7, 2013, the remaining principal amount of the 5.0% Notes was converted into common stock; accordingly, the derivative liability embedded in the 5.0% Notes is no longer outstanding.

#### Compound Embedded Derivative with 8.00% Notes Issued in 2013

As a result of the conversion option and the contingent put feature within the 8.00% Notes Issued in 2013, the Company recorded a compound embedded derivative liability on its condensed consolidated balance sheet with a corresponding debt discount which is netted against the face value of the 8.00% Notes Issued in 2013. The Company determined the fair value of the compound embedded derivative liability using a blend of a Monte Carlo simulation model and market prices.

#### Compound Embedded Derivative with the Amended and Restated Thermo Loan Agreement

As a result of the conversion option and the contingent put feature within the Loan Agreement with Thermo entered into in July 2013, the Company recorded a compound embedded derivative liability on its condensed consolidated balance sheet with a corresponding debt discount which is netted against the face value of the Amended and Restated Loan Agreement. The Company determined the fair value of the compound embedded derivative liability using a blend of a Monte Carlo simulation model and market prices.

## 5. FAIR VALUE MEASUREMENTS

The Company follows the authoritative guidance for fair value measurements relating to financial and non-financial assets and liabilities, including presentation of required disclosures herein. This guidance establishes a fair value framework requiring the categorization of assets and liabilities into three levels based upon the assumptions (inputs)

used to price the assets and liabilities. Level 1 provides the most reliable measure of fair value, whereas Level 3 generally requires significant management judgment. The three levels are defined as follows:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical assets or liabilities.

Level 2: Quoted prices in markets that are not active or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

## Recurring Fair Value Measurements

The following table provides a summary of the financial assets and liabilities measured at fair value on a recurring basis as of September 30, 2014 and December 31, 2013 (in thousands):

	Fair Value Measurements at September 30, 2014:			
	(Level 1)	(Level 2)	(Level 3)	Total Balance
Assets:				
Interest rate cap	\$—	\$72	\$—	\$72
Total assets measured at fair value	\$—	\$72	\$—	\$72
Liabilities:				
Derivative Liabilities:				
Compound embedded derivative with 8.00% Notes Issued in 2013	\$—	\$—	(109,896 )	\$(109,896 )
Compound embedded derivative with the Amended and Restated Thermo Loan Agreement	—	—	(465,907 )	(465,907 )
Total Derivative Liabilities	—	—	(575,803 )	(575,803 )
Current Liabilities:				
Liability for contingent consideration	—	—	(1,149 )	(1,149 )
Total liabilities measured at fair value	\$—	\$—	\$(576,952 )	\$(576,952 )
Fair Value Measurements at December 31, 2013:				
	(Level 1)	(Level 2)	(Level 3)	Total Balance
Assets:				
Interest rate cap	\$—	\$185	\$—	\$185
Total assets measured at fair value	\$—	\$185	\$—	\$185
Liabilities:				
Derivative Liabilities:

## Assets

## Interest Rate Cap

The fair value of the interest rate cap is determined using observable pricing inputs including benchmark yields, reported trades, and broker/dealer quotes at the reporting date. See Note 4 for further discussion.

## Liabilities

The Company has various derivative liabilities in Level 3. The Company marks-to-market these liabilities at each reporting date with the changes in fair value recognized in the Company's condensed consolidated statements of operations. See Note 4 for further discussion.

14

---

The significant quantitative Level 3 inputs utilized in the valuation models as of September 30, 2014 and December 31, 2013 are shown in the tables below:

	Level 3 Inputs at September 30, 2014:				
	Stock Price Volatility	Risk-Free Interest Rate	Note Conversion Price	Warrant Exercise Price	Market Price of Common Stock
Compound embedded derivative with 8.00% Notes Issued in 2013	65% - 95%	1.3	% \$0.73	N/A	\$3.66
Compound embedded derivative with the Amended and Restated Thermo Loan Agreement	50% - 90%	2.4	% \$0.73	N/A	\$3.66

  

	Level 3 Inputs at December 31, 2013:				
	Stock Price Volatility	Risk-Free Interest Rate	Note Conversion Price	Warrant Exercise Price	Market Price of Common Stock
Compound embedded derivative with 8.00% Notes Issued in 2009	65% - 100%	1.5	% \$1.14	N/A	\$1.75
Warrants issued with 8.00% Notes Issued in 2009	100	% 0.1	% N/A	\$0.32	\$1.75
Compound embedded derivative with 8.00% Notes Issued in 2013	65% - 100%	1.5	% \$0.73	N/A	\$1.75
Compound embedded derivative with the Amended and Restated Thermo Loan Agreement	65% - 100%	3.0	% \$0.73	N/A	\$1.75

Fluctuations in the Company's stock price are a primary driver for the changes in the derivative valuations during each reporting period. As the stock price increases above the current conversion price for each of the related derivative instruments, the value to the holder of the instrument generally increases, thereby increasing the liability on the Company's condensed consolidated balance sheet. As previously discussed, the Company uses a blend of a Monte Carlo simulation model and market prices to determine the fair value of the derivative valuations. These valuations are sensitive to the weighting applied to each of the simulated values. Additionally, stock price volatility is one of the significant unobservable inputs used in the fair value measurement of each of the Company's derivative instruments. The simulated fair value of these liabilities is sensitive to changes in the expected volatility of the Company's stock price. Decreases in expected volatility would generally result in a lower fair value measurement.

Probability of a change of control is another significant unobservable input used in the fair value measurement of the Company's derivative instruments. Subject to certain restrictions in each indenture, the Company's debt instruments contain certain provisions whereby holders may require the Company to purchase all or any portion of the convertible debt instrument upon a change of control. A change of control will occur upon certain changes in the ownership of the Company or certain events relating to the trading of the Company's common stock. The simulated fair value of the derivative liabilities above is sensitive to changes in the assumed probabilities of a change of control. Decreases in the assumed probability of a change of control would generally result in a lower fair value measurement.

In addition to the Level 3 inputs described above, the indentures governing the related debt instrument for each of the derivative liabilities included in the Company's Level 3 fair value measurements have specific features that impact the valuation of each liability at reporting periods. These features are further described below for each of the Company's

derivative liabilities.

Compound Embedded Derivative with 8.00% Notes Issued in 2009

In addition to the inputs described above, the valuation model used to calculate the fair value measurement of the compound embedded derivative within the 8.00% Notes Issued in 2009 included payment in kind interest payments, make whole premiums and automatic conversions. Pursuant to the terms of the 8.00% Notes Issued in 2009, the base conversion rate could not reset to lower than \$1.00; therefore if the Company made future equity issuances at prices below the then current conversion price, this conversion price would have been adjusted downward to as low as \$1.00. As discussed in Note 3, pursuant to the terms of the indenture governing the 8.00% Notes Issued in 2009, if at any time the closing price of the common stock had exceeded 200% of

15

---

the conversion price of the 8.00% Notes Issued in 2009 then in effect for 30 consecutive trading days, all of the outstanding 8.00% Notes Issued in 2009 automatically would have been converted into common stock. This condition for the automatic conversion was met on April 15, 2014, and all outstanding 8.00% Notes Issued in 2009 converted into shares of the Company's common stock; accordingly, this derivative liability is no longer outstanding.

#### Warrants Issued with 8.00% Notes Issued in 2009

In addition to the inputs described above, the valuation model used to calculate the fair value measurement of the 8.00% Warrants issued with the 8.00% Notes Issued in 2009 included certain reset features. Pursuant to the terms of the 8.00% Warrants, there was no floor within the reset feature for the exercise price of the 8.00% Warrants; therefore if the Company had made future equity issuances at prices below the current exercise price, this exercise price would have been adjusted downward. If the stock price on the issuance date had been less than the then current exercise price of the outstanding 8.00% Warrants, additional warrants would have been issued, which would have increased the fair value of the warrant liability. The exercise period for the 8.00% Warrants expired in June 2014; accordingly, this derivative liability is no longer outstanding.

#### Compound Embedded Derivative with 8.00% Notes Issued in 2013

In addition to the inputs described above, the valuation model used to calculate the fair value measurement of the compound embedded derivative within the Company's 8.00% Notes Issued in 2013 includes payment in kind interest payments, make whole premiums, a 40-day stock issuance settlement period upon conversion and automatic conversions. Pursuant to the terms of the 8.00% Notes Issued in 2013 Indenture, there are also special distributions and certain put and call features within the notes which impact the valuation model. The trading activity in the market provides the Company with additional valuation support. In 2014, the Company implemented a weight factor to the fair value of the embedded derivative to align the fair value produced from the valuation model to the fair value of the notes traded in the market.

As previously described, fluctuations in the Company's stock price are a primary driver for the changes in the derivative valuations during each reporting period. Given the stock price decline subsequent to September 30, 2014 and through the date of this report, there may be a material decrease in the compound embedded derivative within the Company's 8.00% Notes Issued in 2013 on the condensed consolidated balance sheet, and a material derivative gain on the condensed consolidated statement of operations, if the stock price does not recover prior to the next reporting date of December 31, 2014.

#### Compound Embedded Derivative with Amended and Restated Thermo Loan Agreement

In addition to the inputs described above, the valuation model used to calculate the fair value measurement of the compound embedded derivative within the Amended and Restated Loan Agreement with Thermo includes payment in kind interest payments, make whole premiums, a 40-day stock issuance settlement period upon conversion and automatic conversions. The compound embedded derivative in the Amended and Restated Loan Agreement with Thermo contains similar features to the 8.00% Notes Issued in 2013. As stated in the previous section, in 2014, the Company implemented a weight factor to the fair value of the embedded derivative in the 8.00% Notes Issued in 2013 to align the fair value produced from the valuation model to the fair value of the notes traded in the market. Due to the similarities in the debt instruments, a similar weight factor was applied to the embedded derivative in the Amended and Restated Loan Agreement with Thermo.

As previously described, fluctuations in the Company's stock price are a primary driver for the changes in the derivative valuations during each reporting period. Given the decline in the Company's stock price subsequent to September 30, 2014, which has continued through the date of this report, there may be a material decrease in the

compound embedded derivative within the Amended and Restated Loan Agreement with Thermo on the condensed consolidated balance sheet, and a material derivative gain on the condensed consolidated statement of operations, for the fourth quarter of 2014, to the extent that the stock price does not recover prior to December 31, 2014.

#### Other Liabilities

##### Liability for Contingent Consideration

In connection with the acquisition of Axonn LLC (“Axonn”) in December 2009, the Company is obligated to pay up to an additional \$10.8 million in contingent consideration for earnouts based on sales of existing and new products over a five-year earnout period beginning January 1, 2010. The Company will make earnout payments in stock not to exceed 26,684,807 shares of common stock (10% of the Company’s pre-transaction outstanding shares of common stock), but at its option may make payments in cash after 13.0 million shares have been issued. The Company’s initial estimate of the total earnout expected to be paid was \$10.8 million. Since the earnout period started, the Company has made revisions to this estimate, which was \$9.8 million

at September 30, 2014. Through September 30, 2014, the Company had made \$8.7 million in earnout payments by issuing 18.7 million shares of voting common stock. The liability of \$1.1 million recorded at September 30, 2014 represents the remaining projected earnout payments to be made under the agreement.

The fair value of the accrued contingent consideration was determined using a probability-weighted discounted cash flow approach at the acquisition date and reporting date. The approach is based on significant inputs that are not observable in the market, which are referred to as Level 3 inputs. The fair value is based on the Company's reaching specific performance metrics through the remaining earnout period. The change in fair value of the contingent consideration is recorded through accretion expense in the Company's condensed consolidated statements of operations.

The significant unobservable inputs used in the fair value measurement of the Company's liability for contingent consideration are projected future sales of existing and new products as well as earnout payments made each quarter determined by actual product sales. Decreases in forecasted sales would result in a lower fair value measurement.

The following table presents a rollforward for all liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three and nine months ended September 30, 2014 as follows (in thousands):

Balance at June 30, 2014	\$(775,361	)
Earnout payments made related to liability for contingent consideration	585	
Change in fair value of contingent consideration	(189	)
Derivative adjustment related to conversions and exercises	31,017	
Unrealized gain, included in derivative gain (loss)	166,996	
Balance at September 30, 2014	\$(576,952	)
Balance at December 31, 2013	\$(464,449	)
Earnout payments made related to liability for contingent consideration	1,583	
Change in fair value of contingent consideration	(809	)
Derivative adjustment related to conversions and exercises	305,274	
Unrealized loss, included in derivative gain (loss)	(418,551	)
Balance at September 30, 2014	\$(576,952	)

## 6. ACCRUED EXPENSES AND NON-CURRENT LIABILITIES

Accrued expenses consist of the following (in thousands):

	September 30, 2014	December 31, 2013
Accrued interest	\$5,750	\$1,200
Accrued compensation and benefits	2,552	3,927
Accrued property and other taxes	5,366	5,744
Accrued customer liabilities and deposits	2,822	2,663
Accrued professional and other service provider fees	1,826	705
Accrued liability for contingent consideration	1,149	1,922
Accrued commissions	974	1,316
Accrued telecommunications expenses	918	649
Accrued second-generation constellation costs	1,887	—
Other accrued expenses	2,622	4,574

Total accrued expenses	\$25,866	\$22,700
------------------------	----------	----------

Other accrued expenses include primarily outsourced logistics services, storage, accruals for inventory in transit, warranty reserve, maintenance and payments to IGOs.

17

---

Noncurrent liabilities consist of the following (in thousands):

	September 30, 2014	December 31, 2013
Long-term accrued interest	\$259	\$451
Asset retirement obligation	1,158	1,083
Deferred rent and capital lease obligations	433	456
Liabilities related to the Cooperative Endeavor Agreement with the State of Louisiana	1,594	1,575
Uncertain income tax positions	6,704	5,918
Foreign tax contingencies	3,839	4,213
Total noncurrent liabilities	\$13,987	\$13,696

## 7. COMMITMENTS

### Contractual Obligations

As of September 30, 2014, the Company had purchase commitments with Thales Alenia Space France (“Thales”), Arianespace, Ericsson Inc. (“Ericsson”) and Hughes Network Systems, LLC (“Hughes”) related to the procurement and deployment of the second-generation network.

### Second-Generation Satellites

As of September 30, 2014, the Company had a contract with Thales for the construction of the Company’s second-generation low-earth orbit satellites and related services. The Company has successfully launched all of these second-generation satellites, excluding one on-ground spare. The Company has also incurred additional costs for certain related services, of which a portion are still owed to Thales. Discussions between the Company and Thales are ongoing regarding the remaining amounts owed by both parties under the contract.

As of September 30, 2014, the Company had a contract with Arianespace for the launch of the Company’s second-generation satellites and certain pre and post-launch services under which Arianespace agreed to make four launches of satellites. The Company has successfully completed all of these launches. The Company has also incurred additional costs which are owed to Arianespace for launch delays.

### Next-Generation Gateways and Other Ground Facilities

As of September 30, 2014, the Company had a contract with Hughes under which Hughes will design, supply and implement the Radio Access Network (RAN) ground network equipment and software upgrades for installation at a number of the Company’s satellite gateway ground stations and satellite interface chips to be used in various next-generation Globalstar devices.

In May 2014, the Company entered into an agreement with Hughes to incorporate changes to the scope of work for the RAN and UTS being supplied to the Company. The additional work increased the total contract value by \$3.8 million. In May 2014, the Company and Hughes also entered into a letter agreement whereby Hughes was granted the option to accept the pre-payment of certain payment milestones in the form of Globalstar stock at a 7% discount from the market value in lieu of cash. These payment milestones totaled \$9.9 million. The stock was issued to Hughes on July 1, 2014. In valuing the shares, a loss of approximately \$0.7 million was recorded in the Company’s condensed consolidated statement of operations during the second quarter of 2014.

In October 2014, the Company and Hughes formally amended the contract to include the revised scope of work agreed to in the May letter agreement. The amendment also adjusted the schedule of the program and the remaining payment milestones and program milestones to incorporate the agreed upon changes. The additional \$3.8 million in work agreed to in May is now reflected in the contract through this amendment.

As of September 30, 2014, the Company had an agreement with Ericsson, which will work with the Company to develop, implement and maintain a ground interface, or core network system, that will be installed at a number of the Company's satellite gateway ground stations. In July 2014, the Company and Ericsson entered into an amended and restated agreement for the Company's core network system specifying the remaining contract value of \$25.4 million for the work and a new milestone schedule to reflect the new program timeline.

Since 2004, the Company has issued separate purchase orders for additional phone equipment and accessories under the terms of an executed commercial agreement with Qualcomm. This contract was canceled in March 2013 the parties thereafter sought to resolve the issues related to the contract termination. The Company and Qualcomm signed an agreement in July 2014 specifying terms for the sale of the remaining inventory to the Company. The Company previously recorded total advances to Qualcomm for inventory of \$9.2 million on its condensed consolidated balance sheet. The Company agreed to pay to Qualcomm \$0.1 million to take ownership of the finished goods and raw materials held by Qualcomm, as well as certain limited support services to be provided to the Company. This final payment was made in July 2014 and eliminated Globalstar's obligations to purchase additional equipment from Qualcomm. As a result of certain terms in the July 2014 agreement, the Company recorded a reduction in the value of inventory of \$7.3 million related to raw materials that are not likely to be used in the future production of inventory. With the final payment of \$0.1 million made in July, the Company assumed title to the inventory; therefore, the remaining balance of approximately \$2.0 million, representing primarily finished goods, is included in inventory on the Company's condensed consolidated balance sheet as of September 30, 2014.

## 8. CONTINGENCIES

### Arbitration

On June 3, 2011, Globalstar filed a demand for arbitration against Thales before the American Arbitration Association to enforce certain rights to order additional satellites under the Amended and Restated Contract for the construction of the Globalstar Satellite for the Second Generation Constellation dated and executed in June 2009 ("2009 Contract"). Globalstar did not include within its demand any claims that it had against Thales for work previously performed under the contract to design, manufacture and timely deliver the first 25 second-generation satellites. On May 10, 2012, the arbitration tribunal issued its award in which it determined that Globalstar materially breached the contract by failing to pay to Thales termination charges in the amount of €51,330,875.00 by October 9, 2011, and that absent further agreement between the parties, Thales has no further obligation to manufacture or deliver satellites under Phase 3 of the 2009 Contract. The award also required Globalstar to pay Thales approximately €53 million in termination charges and interest by June 9, 2012. On May 23, 2012, Thales commenced an action in the United States District Court for the Southern District of New York by filing a petition to confirm the arbitration award (the "New York Proceeding"). Thales and the Company entered into a Tolling Agreement as of June 13, 2013 under which Thales dismissed the New York Proceeding without prejudice. Thales may refile the petition at a later date and pursue the confirmation of the arbitration award, which Globalstar will oppose. Should Thales be successful in confirming the arbitration award, this would have a material adverse effect on the Company's financial condition and liquidity.

On June 24, 2012, the Company and Thales agreed to settle their prior commercial disputes, including those disputes that were the subject of the arbitration award. In order to effectuate this settlement, the Company and Thales entered into a Release Agreement, a Settlement Agreement and a Submission Agreement. Under the terms of the Release Agreement, Thales agreed unconditionally and irrevocably to release and forever discharge the Company from any obligation to pay €35,623,770 of the termination charges awarded in the arbitration together with all interest on the award amount effective upon the earlier of December 31, 2012 and the effective date of the financing for the purchase of any additional second-generation satellites. Under the terms of the Release Agreement, Globalstar agreed unconditionally and irrevocably to release and forever discharge Thales from any and all claims related to Thales'

work under the 2009 satellite construction contract, including any obligation to pay liquidated damages, effective upon the earlier of December 31, 2012 and the effective date of the financing for the purchase of any additional second-generation satellites. In connection with the Release Agreement, the Company recorded a contract termination charge of approximately €17.5 million which is recorded in the Company's condensed consolidated financial statements for the period ended September 30, 2014. The releases became effective on December 31, 2012.

Under the terms of the Settlement Agreement, Globalstar agreed to pay €17,530,000 to Thales, representing one-third of the termination charges awarded to Thales in the arbitration, subject to certain conditions, on the later of the effective date of the new contract for the purchase of any additional second-generation satellites and the effective date of the financing for the purchase of these satellites. Because the effective date of the new contract for the purchase of additional second-generation satellites did not occur on or prior to February 28, 2013, any party may terminate the Settlement Agreement. If any party terminates the Settlement Agreement, all parties' rights and obligations under the Settlement Agreement shall terminate. However, the Release Agreement

provides that it will survive a termination of the Settlement Agreement. As of September 30, 2014, no party had terminated the Settlement Agreement.

#### Litigation

Due to the nature of the Company's business, the Company is involved, from time to time, in various litigation matters or subject to disputes or routine claims regarding its business activities. Legal costs related to these matters are expensed as incurred. In management's opinion, there is no pending litigation, dispute or claim, other than the arbitration award discussed above, that may have a material adverse effect on the Company's financial condition, results of operations or liquidity.

#### 9. RELATED PARTY TRANSACTIONS

Payables to Thermo and other affiliates relate to normal purchase transactions and were \$0.4 million and \$0.2 million at September 30, 2014 and December 31, 2013, respectively.

#### Transactions with Thermo

Thermo incurs certain expenses on behalf of the Company. The table below summarizes the total expense for the periods indicated below (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2014	2013	2014	2013
General and administrative expenses	\$174	\$74	\$236	\$229
Non-cash expenses	137	137	411	411
Loss on equity issuance	—	2,404	—	16,373
Loss on extinguishment of debt related to amendment and restatement of Thermo Loan Agreement	—	66,088	—	\$66,088
Total	\$311	\$68,703	\$647	\$83,101

General and administrative expenses are related to expenses incurred by Thermo on the Company's behalf which are charged to the Company. Non-cash expenses are related to services provided by two executive officers of Thermo (who are also directors of the Company) who receive no cash compensation from the Company; these expenses are treated as a contribution to capital. The Thermo expenses are based on actual amounts (with no mark-up) incurred or upon allocated employee time.

Since June 2009, Thermo and its affiliates have also deposited \$60.0 million into a contingent equity account to fulfill a condition precedent for borrowing under the Facility Agreement, purchased \$20.0 million of the Company's 5.0% Notes, purchased \$11.4 million of the Company's 8.00% Notes Issued in 2009, provided a \$2.3 million short-term loan to the Company (which was subsequently converted into nonvoting common stock), and loaned \$37.5 million to the Company to fund the debt service reserve account.

On May 20, 2013, the Company issued 8.00% Notes Issued in 2013 and other consideration in exchange for its outstanding 5.75% Notes. In connection with this exchange, the Company entered into the Consent Agreement, the Common Stock Purchase Agreement and the Common Stock Purchase and Option Agreement (see Note 3 for further discussion). As a result of these transactions, during 2013 the Company recognized a loss on the sale of shares of approximately \$16.4 million (which is included in other income/expense on the condensed consolidated statement of operations), representing the difference between the purchase price and the fair value of the Company's common stock

(measured as the closing stock price on the date of each sale).

In August 2013, the Company drew the remaining \$1.1 million from the interest earned on the contingent equity account under the Facility Agreement and in October 2013 issued 2,133,656 shares of nonvoting common stock to Thermo. The value of the 20% discount on the shares issued to Thermo was recorded as a deferred financing cost on the Company's condensed consolidated balance sheet as of September 30, 2013.

In July 2013, the Company and Thermo entered into an Amended and Restated Loan Agreement. As a result of this transaction, the Company was required to record this Loan Agreement initially at fair value as the amendment and restatement of the Loan Agreement was considered to be an extinguishment of debt. As of the amendment and restatement date the fair value of the Loan

Agreement was \$120.1 million. The Company recorded a loss on extinguishment of debt of \$66.1 million in its condensed consolidated statement of operations for the third quarter of 2013. The Company computed this loss as the difference between the fair value of the debt, as amended and restated, and its carrying value just prior to amendment and restatement.

The terms of the Amended and Restated Loan Agreement with Thermo, the Common Stock Purchase and the Common Stock Purchase and Option Agreement were approved by a special committee of the Company's board of directors consisting solely of the Company's unaffiliated directors. The committee, which was represented by independent legal counsel, determined that the terms of these agreements were fair and in the best interests of the Company and its shareholders.

During the second quarter of 2014, Thermo exercised warrants that were scheduled to expire in June 2014. The warrants that were exercised in the second quarter of 2014 included warrants for 4.2 million shares issued as partial consideration for the Thermo Loan Agreement, resulting in the issuance of 4.2 million shares of Globalstar common stock; warrants for 4.4 million shares issued in connection with the annual availability fee for the Contingent Equity Agreement in 2009, resulting in the issuance of 4.4 million shares of Globalstar common stock; and 16.3 million 8.00% Warrants issued in 2009, resulting in the issuance of 14.7 million shares of Globalstar common stock. As of September 30, 2014, warrants to purchase approximately 37.1 million shares issued under the Contingent Equity Agreement and 8.0 million 5.0% Warrants remain outstanding, all of which are held by Thermo and are scheduled to expire between December 2014 and June 2017.

Thermo is required to maintain minimum ownership levels in the Company's common stock as defined in the Facility Agreement. As needed, Thermo may convert shares of nonvoting common stock into shares of voting common stock to ensure compliance with these ownership levels. During August 2014, Thermo converted 75 million shares of nonvoting common stock to voting common stock for this purpose.

See Note 3 for further discussion of the Company's debt and financing transactions with Thermo.

## 10. INCOME TAXES

The Company follows authoritative guidance surrounding accounting for uncertainty in income taxes. The Company's policy is to recognize interest and applicable penalties, if any, related to uncertain tax positions in income tax expense. For the periods ending September 30, 2014 and December 31, 2013, the net deferred tax assets were fully reserved.

In January 2012, the Company's Canadian subsidiary was notified that its income tax returns for the years ended October 31, 2008 and 2009 had been selected for audit. The Canada Revenue Agency is in the process of reviewing the information provided by the Canadian subsidiary.

In December 2013, the Company's Singapore subsidiary was notified that its income tax returns for the years ended 2009 to 2012 had been selected for audit. The Inland Revenue Authority reviewed the submitted information and had minimal adjustments to the Singapore subsidiary's total net operating loss carried forward schedule.

Except for the audits noted above, neither the Company nor any of its subsidiaries is currently under audit by the IRS, any state jurisdiction in the United States or any foreign jurisdiction. The Company's corporate U.S. tax returns for 2010 and subsequent years remain subject to examination by tax authorities. State income tax returns are generally subject to examination for a period of three to five years after filing of the respective return. The state impact of any federal changes remains subject to examination by various states for a period of up to one year after formal notification to the states.

The Company has not provided United States income taxes and foreign withholding taxes on approximately \$12.2 million of undistributed earnings from certain foreign subsidiaries indefinitely invested outside the United States. Should the Company decide to repatriate these foreign earnings, the Company would have to adjust the income tax provision in the period in which management believes the Company would repatriate the earnings.

On September 13, 2013, Treasury and the Internal Revenue Service issued final regulations regarding the deduction and capitalization of expenditures related to tangible property. The final regulations under Internal Revenue Code Sections 162, 167 and 263(a) apply to amounts paid to acquire, produce, or improve tangible property as well as dispositions of such property and are generally effective for tax years beginning on or after January 1, 2014. The Company has evaluated these regulations and determined they will not have a material impact on its consolidated results of operations, cash flows or financial position.

Through a prior foreign acquisition, the Company acquired a tax liability for which the Company has been indemnified by the previous owners. As of September 30, 2014 and December 31, 2013, the Company had recorded a tax liability of \$2.1 million and \$2.2 million, respectively, to the foreign tax authorities with an offsetting tax receivable from the previous owners.

## 11. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Accumulated other comprehensive income (loss) includes all changes in equity during a period from non-owner sources. The change in accumulated other comprehensive loss for all periods presented resulted from foreign currency translation adjustments.

The components of accumulated other comprehensive income (loss) were as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30, 2014	2013	September 30, 2014	2013
Accumulated other comprehensive income (loss), June 30, 2014 and 2013 and December 31, 2013 and 2012, respectively	\$493	\$(2,408 )	\$871	\$(1,758 )
Other comprehensive income (loss) :				
Foreign currency translation adjustments	(493 )	553	(871 )	(97 )
Accumulated other comprehensive income (loss), September 30, 2014 and 2013, respectively	\$—	\$(1,855 )	\$—	\$(1,855 )

No amounts were reclassified out of accumulated other comprehensive income (loss) for the periods shown above.

## 12. STOCK COMPENSATION

The Company's 2006 Equity Incentive Plan ("Equity Plan") provides long-term incentives to the Company's key employees, including officers, directors, consultants and advisers ("Eligible Participants") and to align stockholder and employee interests. Under the Equity Plan, the Company may grant incentive stock options, restricted stock awards, restricted stock units, and other stock based awards or any combination thereof to Eligible Participants. The Compensation Committee of the Company's board of directors establishes the terms and conditions of any awards granted under the plans.

For the three months ended September 30, 2014 and 2013, the Company recorded compensation expense related to these plans of \$1.1 million and \$1.0 million, respectively. For the nine months ended September 30, 2014 and 2013, the Company recorded compensation expense related to these plans of \$2.1 million and \$1.7 million, respectively. These expenses are reflected in marketing, general and administrative expenses. In the third quarter 2013, the Company's stock price traded for more than ten consecutive trading days at a price above \$0.80, triggering immediate vesting of nonstatutory stock options and restricted stock granted in October 2011. This vesting resulted in recognition of compensation expense of \$0.8 million, which is included in the amount of compensation expense above for the three and nine months ended September 30, 2013.

Grants to Eligible Participants of incentive stock options, restricted stock awards, and restricted stock units during the period are indicated in the table below (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Grants of restricted stock awards and restricted stock units	201	14	607	852
Grants of options to purchase common stock	134	1,224	595	1,829
Total	335	1,238	1,202	2,681

## Employee Stock Purchase Plan

The Company's Employee Stock Purchase Plan (the "Plan") provides eligible employees of the Company and its subsidiaries with an opportunity to acquire shares of its common stock at a discount. The Plan permits eligible employees to purchase shares of common stock during two semi-annual offering periods beginning on June 15 and December 15, unless adjusted by the Board or one of its designated committees (the "Offering Periods"). Eligible employees may purchase shares in an amount of up to 15% of their total compensation per pay period, but may purchase no more than the lesser of \$25,000 fair market value of common stock or 500,000 shares of common stock in any calendar year, as measured as of the first day of each applicable Offering Period.

The price an employee pays is 85% of the fair market value of the common stock. Fair market value is equal to the lesser of the closing price of a share of common stock on either the first or last day of the Offering Period.

For each of the three and nine months ended September 30, 2014 and 2013, the Company recorded expense for the fair value of the grant of \$0.1 million and \$0.2 million, respectively, which is reflected in marketing, general and administrative expenses. Through September 30, 2014, the Company had issued 2,486,902 shares of common stock pursuant to this Plan.

### 13. GEOGRAPHIC INFORMATION

The Company attributes equipment revenue to various countries based on the location equipment is sold. Service revenue is attributed to the various countries based on where the service is processed. Long-lived assets consist primarily of property and equipment and are attributed to various countries based on the physical location of the asset at a given fiscal year-end, except for the satellites which are included in the long-lived assets of the United States. The Company's information by geographic area is as follows (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Revenues:				
Service:				
United States	\$12,267	\$11,660	\$35,000	\$33,666

Others			924	1,177
Total long-lived assets			\$1,120,156	\$1,169,785

## 14. EARNINGS (LOSS) PER SHARE

The Company is required to present basic and diluted earnings per share. Basic earnings per share are computed based on the weighted average number of common shares outstanding during the period. Common stock equivalents are included in the calculation of diluted earnings per share only when the effect of their inclusion would be dilutive.

The following table reconciles basic weighted average common shares to diluted weighted average common shares outstanding for the three months ended September 30, 2014 (in thousands):

	Three Months Ended September 30, 2014
Weighted average common shares outstanding:	
Basic shares outstanding	987,668
Incremental shares from assumed exercises of:	
Stock options, restricted stock, restricted stock units and ESPP	7,340
8% Convertible Senior Notes Issued in 2013	39,625
Thermo Loan Agreement	109,469
Warrants	45,088
Diluted shares outstanding	1,189,190

For the three months ended September 30, 2014, net income was adjusted for interest expense (net of capitalized amounts) related to the 8% Convertible Senior Notes Issued in 2013 and the Thermo Loan Agreement for the computation of diluted earnings per share as these notes were assumed to be converted at the start of the period. There were no anti-dilutive stock options, restricted stock or restricted stock units excluded from diluted shares outstanding for the third quarter of 2014.

For the three months ended September 30, 2013 and nine months ended September 30, 2014 and 2013, diluted net loss per share of common stock was the same as basic net loss per share of common stock because the effects of potentially dilutive securities are anti-dilutive.

## 15. SUPPLEMENTAL CONDENSED CONSOLIDATING FINANCIAL INFORMATION

In connection with the Company's issuance of the 8.00% Notes issued in 2013, certain of the Company's 100% owned domestic subsidiaries (the "Guarantor Subsidiaries"), fully, unconditionally, jointly, and severally guaranteed the payment obligations under the 8.00% Notes Issued in 2013. The following supplemental financial information sets forth, on a consolidating basis, the balance sheets, statements of operations and statements of cash flows for Globalstar, Inc. ("Parent Company"), for the Guarantor Subsidiaries and for the Parent Company's other subsidiaries (the "Non-Guarantor Subsidiaries").

The supplemental condensed consolidating financial information has been prepared pursuant to the rules and regulations for condensed financial information and does not include disclosures included in annual financial statements. The principal eliminating entries eliminate investments in subsidiaries, intercompany balances and intercompany revenues and expenses.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Forward-Looking Statements

Certain statements contained in or incorporated by reference into this Report, other than purely historical information, including, but not limited to, estimates, projections, statements relating to our business plans, objectives and expected operating results, and the assumptions upon which those statements are based, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements generally are identified by the words "believe," "project," "expect," "anticipate," "estimate," "intend," "strategy," "plan," "may," "should," "will," "would," "will be," "will continue," "will likely result," and similar expressions, although not all forward-looking statements contain these identifying words. These forward-looking statements are based on current expectations and assumptions that are subject to risks and uncertainties which may cause actual results to differ materially from the forward-looking statements. Forward-looking statements, such as the statements regarding our ability to develop and expand our business, our anticipated capital spending, our ability to manage costs, our ability to exploit and respond to technological innovation, the effects of laws and regulations (including tax laws and regulations) and legal and regulatory changes, the opportunities for strategic business combinations and the effects of consolidation in our industry on us and our competitors, our anticipated future revenues, our anticipated financial resources, our expectations about the future operational performance of our satellites (including their projected operational lives), the expected strength of and growth prospects for our existing customers and the markets that we serve, commercial acceptance of new products, problems relating to the ground-based facilities operated by us or by independent gateway operators, worldwide economic, geopolitical and business conditions and risks associated with doing business on a global basis and other statements contained in this Report regarding matters that are not historical facts, involve predictions. Risks and uncertainties that could cause or contribute to such differences include, without limitation, those described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

New risk factors emerge from time to time, and it is not possible for us to predict all risk factors, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We undertake no obligation to update publicly or revise any forward-looking statements. You should not rely upon forward-looking statements as predictions of future events or performance. We cannot assure you that the events and circumstances reflected in the forward-looking statements will be achieved or occur. These cautionary statements qualify all forward-looking statements attributable to us or persons acting on our behalf.

This "Management's Discussion and Analysis of Financial Condition" should be read in conjunction with the "Management's Discussion and Analysis of Financial Condition" and information included in our Annual Report on Form 10-K for the year ended December 31, 2013.

### Overview

Globalstar, Inc. ("we," "us" or "the Company") provides Mobile Satellite Services ("MSS") including voice and data communications services globally via satellite. By providing wireless communications services in areas not served or underserved by terrestrial wireless and wireline networks and in circumstances where terrestrial networks are not operational due to natural or man-made disasters, we seek to meet our customers' increasing desire for connectivity. We offer voice and data communication services over our network of in-orbit satellites and our active ground stations (or "gateways"), which we refer to collectively as the Globalstar System.

In 2006 we began a process of designing, manufacturing and deploying a second-generation constellation of Low Earth Orbit ("LEO") satellites to replace our first-generation constellation. Our second-generation constellation is designed to last twice as long in space, have greater capacity and be built at a significantly lower cost compared to our first-generation satellites. We have integrated all of the new second-generation satellites with certain of our

first-generation satellites to form our second-generation constellation. The restoration of our constellation's Duplex capabilities was complete after the final second-generation satellite was placed into service in August 2013. The restoration of Duplex capabilities has resulted in a substantial increase in service levels, making our products and services more desirable to existing and potential customers. Existing subscribers continue to utilize our service more, measured by minutes of use on the Globalstar System year over year, a trend that we expect to continue. We are gaining new customers and winning back former customers, which continue to contribute to increases in Duplex revenue. We offer a range of price-competitive products to the industrial, governmental and consumer markets. Due to the unique design of the Globalstar System (and based on customer input), we believe that we offer the best voice quality among our peer group.

We define a successful level of service for our customers as measured by their ability to make uninterrupted calls of average duration for a system-wide average number of minutes per month. Our goal is to provide service levels and call success rates equal to or better than our MSS competitors so our products and services are attractive to potential customers. We define voice quality as the ability to easily hear, recognize and understand callers with imperceptible delay in the transmission. Due to the unique design of the Globalstar System, by this measure our system outperforms geostationary ("GEO") satellites used by some of our

competitors. Due to the difference in signal travel distance, GEO satellite signals must travel approximately 42,000 additional nautical miles, which introduces considerable delay and signal degradation to GEO calls. For our competitors using cross-linked satellite architectures, which require multiple inter-satellite connections to complete a call, signal degradation and delay can result in compromised call quality as compared to that experienced over the Globalstar System.

We compete aggressively on price. In 2004 we were the first MSS company to offer bundled pricing plans that we adapted from the terrestrial wireless industry. We expect to continue to innovate and retain our position as the low cost, high quality leader in the MSS industry.

Our satellite communications business, by providing critical mobile communications to our subscribers, serves principally the following markets: recreation and personal; government; public safety and disaster relief; oil and gas; maritime and fishing; natural resources, mining and forestry; construction; utilities; and transportation.

At September 30, 2014, we served approximately 620,000 subscribers. We increased our net subscribers 9% from September 30, 2013 to September 30, 2014. In 2014 we initiated a process to deactivate subscribers in our Duplex subscriber base who were either suspended or non-paying. We deactivated approximately 26,000 subscribers during the first quarter of 2014. Excluding these deactivated subscribers from our September 30, 2013 subscriber count, total subscribers would have increased 14% from September 30, 2013 to September 30, 2014. We count "subscribers" based on the number of devices that are subject to agreements which entitle them to use our voice or data communications services rather than the number of persons or entities who own or lease those devices.

We currently provide the following communications services via satellite that are available only with equipment designed to work on our network:

- two-way voice communication and data transmissions, which we call "Duplex," using mobile or fixed devices; and
- one-way data transmissions using a mobile or fixed device that transmits its location and other information to a central monitoring station, which includes certain SPOT and Simplex products.

We designed our second-generation constellation to support our current lineup of Duplex, SPOT and Simplex products. With the improvement in both coverage and service quality for our Duplex product offerings resulting from the deployment of our second-generation constellation, we anticipate further expansion of our subscriber base and increases in our average revenue per user, or "ARPU."

Our products and services are sold through a variety of independent agents, dealers and resellers, and independent gateway operators ("IGOs"). Our success in marketing these products and services is enhanced through diversification of our distribution channels, consumer and commercial markets, and product offerings.

#### Performance Indicators

Our management reviews and analyzes several key performance indicators in order to manage our business and assess the quality of and potential variability of our earnings and cash flows. These key performance indicators include:

- total revenue, which is an indicator of our overall business growth;
- subscriber growth and churn rate, which are both indicators of the satisfaction of our customers;
- average monthly revenue per user, or ARPU, which is an indicator of our pricing and ability to obtain effectively long-term, high-value customers. We calculate ARPU separately for each type of our Duplex, Simplex, SPOT and IGO revenue;
- operating income and adjusted EBITDA, which are both indicators of our financial performance; and

capital expenditures, which are an indicator of future revenue growth potential and cash requirements.

Comparison of the Results of Operations for the three and nine months ended September 30, 2014 and 2013

Revenue:

Three and Nine Months

Total revenue increased by \$0.9 million, or approximately 4%, to \$23.4 million for the three months ended September 30, 2014 from \$22.5 million for the three months ended September 30, 2013. This increase was due primarily to a \$1.5 million increase in service revenue which was partially offset by a \$0.6 million decrease in revenue from subscriber equipment sales. Total revenue increased by \$6.3 million, or approximately 10%, to \$68.0 million for the nine months ended September 30, 2014 from \$61.7

34

---

million for the nine months ended September 30, 2013. This increase was due primarily to a \$4.8 million increase in service revenue and, to a lesser extent, a \$1.5 million increase in revenue from subscriber equipment sales. The primary driver for the increase in service revenue for both the three and nine month periods was growth in Duplex service revenue as we continue to see increases in new subscriber activations corresponding to equipment sales over the past 12 months. Demand for our Duplex products and services has continued as we successfully completed the restoration of our second-generation constellation in August 2013 by placing our last second-generation satellite into commercial service. The decrease in revenue from equipment sales for the third quarter of 2014 was due primarily to declining sales of our Duplex and Simplex products. Higher volume Duplex sales during the third quarter of 2013 resulted from initial channel distribution following the release of the SPOT Global Phone in the second quarter of 2013. The decline in Simplex sales resulted from fluctuations in customer demand from the third quarter of 2013 to the third quarter of 2014. The increase in revenue from equipment sales for the first nine months of 2014 was due primarily to increased demand for our SPOT products, including the SPOT Gen3, and successful penetration of the SPOT Trace, a mass market device released in the fourth quarter of 2013. The success of our SPOT products continues to grow as evidenced in part by improving consumer velocity, which is measured by the number of subscriber activations.

The following table sets forth amounts and percentages of our revenue by type of service for the three and nine months ended September 30, 2014 and 2013 (dollars in thousands):

	Three months ended September 30, 2014		Three months ended September 30, 2013		Nine months ended September 30, 2014		Nine months ended September 30, 2013					
	Revenue	% of Total Revenue	Revenue	% of Total Revenue	Revenue	% of Total Revenue	Revenue	% of Total Revenue				
Service Revenue:												
Duplex	\$7,687	33	%	\$6,235	28	%	\$20,504	30	%	\$16,443	27	%
SPOT	7,491	32		6,969	31		21,566	32		20,908	34

Other	(160)	(1)	)	107	1		206	—		210	—	
Total	\$4,930	21	%	\$5,493	25	%	\$15,324	22	%	\$13,863	23	%

The following table sets forth our average number of subscribers, ARPU, and ending number of subscribers by type of revenue for the three and nine months ended September 30, 2014 and 2013. The following numbers are subject to immaterial rounding inherent to calculating averages.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2014	2013	2014	2013
Average number of subscribers for the period (three and nine months ended):				
Duplex (1)	63,774	84,821	74,904	84,775
SPOT (2)	232,658	218,416	228,816	230,722
Simplex	269,110	215,691	252,709	202,907
IGO	38,944	39,859	38,995	40,353
ARPU (monthly):				
Duplex (1)	\$40.18	\$24.50	\$30.42	\$21.55
SPOT (2)	10.73	10.64	10.47	10.07
Simplex	2.46	3.32	2.67	3.06
IGO	1.83	2.10	2.25	2.03
Number of subscribers (end of period):				
Duplex	65,645	85,219	65,645	85,219
SPOT	235,737	220,363	235,737	220,363
Simplex	274,065	217,655	274,065	217,655
IGO	38,639	39,560	38,639	39,560
Other	5,806	6,631	5,806	6,631
Total	619,892	569,428	619,892	569,428

In 2014 we initiated a process to deactivate certain subscribers in our Duplex subscriber base who were either suspended or non-paying. We deactivated approximately 26,000 subscribers during the first quarter of 2014. For the three and nine months ended September 30, 2013, excluding these 26,000 deactivated subscribers from prior (1) period metrics, average subscribers would have been 58,161 and 58,115, respectively, and ARPU would have been \$35.73 and \$31.44, respectively. For the nine months ended September 30, 2014, excluding these 26,000 deactivated subscribers from prior period metrics, average subscribers would have been 61,574 and ARPU would have been \$37.00.

In 2013 we initiated a process to deactivate certain suspended subscribers in our SPOT subscriber base. We deactivated approximately 36,000 subscribers during the first quarter of 2013. For the nine months ended (2) September 30, 2013, excluding these 36,000 deactivated subscribers from prior period metrics, average subscribers would have been 212,672 and ARPU would have been \$10.92.

Other service revenue includes revenue generated from engineering services and third party sources, which are not subscriber driven. Accordingly, we do not present average subscribers or ARPU for other revenue in the above charts.

## Service Revenue

### Three and Nine Months

Duplex service revenue increased approximately 23% and 25% for the three and nine months ended September 30, 2014, respectively, compared to the same periods in 2013. The increases in Duplex service revenue were due primarily to growth in our revenue-generating Duplex subscriber base and the continued transition of certain of our Duplex customers to higher rate plans commensurate with our improved service levels. As previously stated, we

deactivated approximately 26,000 Duplex subscribers from our network in the first quarter of 2014. Total reported Duplex subscribers decreased 23% from September 30, 2013 to September 30, 2014. Excluding these deactivated subscribers from our September 30, 2013 subscriber count, Duplex subscribers would have increased approximately 12% from September 30, 2013 to September 30, 2014. Duplex equipment units sold in the past 12 months have resulted in new subscribers activating units on our network; these new subscribers contribute to increases in both service revenue and ARPU. We also continue to convert our Duplex customers to higher rate plans, which has resulted in higher churn among lower rate paying subscribers.

SPOT service revenue increased 7% and 3% for the three and nine months ended September 30, 2014, respectively, compared to the same periods in 2013. End of period SPOT subscribers increased 7% from September 30, 2013 to September 30, 2014. The growth in our SPOT subscriber base is due to new subscriber activations resulting from equipment sales over the past 12 months.

Simplex service revenue decreased 7% and increased 9% for the three and nine month periods ended September 30, 2014 compared to the same periods in 2013. Our end of period Simplex subscribers increased 26% from September 30, 2013 to September 30, 2014. Revenue growth for our Simplex customers is not necessarily commensurate with subscriber growth due to the various competitive pricing plans we offer as well as variations in customer usage.

Other revenue decreased approximately 22% and 11% for the three and nine months ended September 30, 2014, respectively, compared to the same periods in 2013. The decrease in other revenue for the three months ended September 30, 2014 compared to the same period in 2013 is due primarily to a decrease in third party revenue as well as the amount of engineering service revenue recognized. While we were manufacturing and deploying our second-generation constellation, we purchased service from other satellite providers, which we re-sold to some of our subscribers. We recorded this revenue in other service revenue as third party revenue. As our coverage is now fully restored, we have begun to transition these subscribers to our network, which has contributed in part to the increase in our Duplex service revenue. As third party revenue decreases, other service revenue will also decrease and Duplex revenue will increase.

#### Equipment Revenue

##### Three Months

Revenue from Duplex equipment sales decreased by approximately 15% for the three months ended September 30, 2014 compared to the same period in 2013. We introduced SPOT Global Phone in the second quarter of 2013. The release of this product contributed to higher than usual Duplex sales in the third quarter of 2013 due to initial channel distribution.

Revenue from SPOT equipment sales increased 32% for the three months ended September 30, 2014 compared to the same period in 2013. Growth in sales of our SPOT products was due to increased demand for SPOT Gen3, which was released in the third quarter of 2013, and the launch of SPOT Trace during the fourth quarter of 2013.

Revenue from Simplex equipment sales decreased approximately 16% for the three months ended September 30, 2014 compared to the same period in 2013. We experienced higher demand for certain of our commercial applications for M2M asset monitoring and tracking devices during the third quarter of 2013.

##### Nine Months

Revenue from Duplex equipment sales decreased by approximately 6% for the nine months ended September 30, 2014 compared to the same period in 2013. Driving this decrease was greater demand for the SPOT Global Phone in 2013 following the product's launch in the second quarter of 2013.

Revenue from SPOT equipment sales increased 52% for the nine months ended September 30, 2014 compared to the same period in 2013. We introduced SPOT Gen3 in the third quarter of 2013 and SPOT Trace in the fourth quarter of 2013. Market demand for both of these products has contributed to the increase in SPOT equipment revenue during the first nine months of 2014.

Revenue from Simplex equipment sales increased approximately 2% for the nine months ended September 30, 2014 compared to the same period in 2013.

Operating Expenses:

Three and Nine Months

Total operating expenses decreased \$3.6 million, or approximately 8%, to \$41.5 million for the three months ended September 30, 2014 from \$45.1 million for the same period in 2013. This decrease is due primarily to lower depreciation expense in the third quarter of 2014 compared to the third quarter of 2013. Total operating expenses increased \$9.4 million, or approximately 8%, to \$131.7 million for the nine months ended September 30, 2014 from \$122.3 million for the same period in 2013. We attribute this increase primarily to a \$7.3 million non-cash reduction in the value of inventory related to our former contract with Qualcomm, that we recorded during the second quarter of 2014.

37

---

## Cost of Services

### Three and Nine Months

Cost of services decreased \$0.3 million, or approximately 4%, to \$7.9 million for the three months ended September 30, 2014 from \$8.2 million for the same period in 2013 and decreased \$1.0 million, or approximately 4%, to \$21.9 million for the nine months ended September 30, 2014 from \$22.9 million for the same period in 2013. Cost of services comprises primarily network operating costs, which are generally fixed in nature. As stated above, while we were manufacturing and deploying our second-generation constellation, we purchased service from other satellite providers, which we re-sold to some of our subscribers. We recorded the expense related to this service in cost of services. As we continue to transition these subscribers to our network, this cost will decrease. The decrease in cost of services for the nine months ended September 30, 2014 was due in large part to a reduction in this expense. Over the past 12 months, we have experienced cost savings as a result of our increased focus on monitoring telecommunication service expenses. These decreases were offset partially by increases in multiple expense categories as we expand and update our gateway infrastructure.

## Cost of Subscriber Equipment Sales

### Three and Nine Months

Cost of subscriber equipment sales decreased \$0.3 million, or approximately 8%, to \$3.8 million for the three months ended September 30, 2014 from \$4.1 million for the same period in 2013 and increased \$0.5 million, or approximately 5%, to \$11.2 million for the nine months ended September 30, 2014 from \$10.7 million for the same period in 2013. The fluctuations in cost of subscriber equipment sales are due primarily to the mix of products sold during the respective periods.

## Cost of Subscriber Equipment Sales - Reduction in the Value of Inventory

### Three and Nine Months

Cost of subscriber equipment sales - reduction in the value of inventory was \$7.3 million during the nine months ended September 30, 2014 due to an impairment charge recorded during the second quarter of 2014 following cancellation of our contract with Qualcomm related to finished goods and raw materials previously accounted for as advances for inventory on our condensed consolidated balance sheet. These charges did not occur during the nine months ended September 30, 2013 or during the three months ended September 30, 2014.

As previously disclosed, we had various commercial agreements with Qualcomm since 2004 for the purchase of phone equipment and accessories. This contract was canceled in March 2013, and we entered into an agreement with Qualcomm in July 2014 whereby we paid \$0.1 million to Qualcomm for all remaining finished goods and raw materials held at Qualcomm. Our future business plans contemplate using Hughes-based technology in future product development; therefore, many of the raw materials held by Qualcomm are not likely to be used in the future production of additional inventory. As a result, we recorded a reduction in the value of inventory of \$7.3 million during the second quarter of 2014.

## Marketing, General and Administrative

### Three and Nine Months

Marketing, general and administrative expenses decreased \$0.3 million, or approximately 3%, to \$8.8 million for the three months ended September 30, 2014 from \$9.1 million for the same period in 2013 and increased \$2.2 million, or approximately 10%, to \$24.8 million for the nine months ended September 30, 2014 from \$22.6 million for the same

period in 2013. The increase was due primarily to strategic investments in our business, including sales and marketing initiatives. Other items that contributed to the increase in expense included an increase in the fair value of stock compensation recognized for new stock options and stock awards granted in the previous 12 months.

#### Depreciation, Amortization and Accretion

##### Three and Nine Months

Depreciation, amortization, and accretion expense decreased \$2.7 million, or approximately 11%, to \$21.0 million for the three months ended September 30, 2014 from \$23.7 million for the same period in 2013 and increased \$0.3 million, less than 1%,

to \$66.4 million for the nine months ended September 30, 2014 from \$66.1 million for the same period in 2013. The decrease in depreciation expense from the third quarter of 2013 to the third quarter of 2014 relates primarily to our satellites launched during 2007 as these satellites are reaching the end of their estimated useful lives. The increase in depreciation expense during the nine months ended September 30, 2014 compared to the same period in 2013 relates primarily to additional depreciation expense for the second-generation satellites placed into service during the first eight months of 2013, with our last second-generation satellite placed into service in August 2013. This increase was offset partially by a decrease in depreciation expense related to our 2007 satellites as previously discussed.

Other Income (Expense):

Loss on Extinguishment of Debt

Three and Nine Months

For the three months and nine months ended September 30, 2014, we had loss on extinguishment of debt of \$12.9 million and \$39.6 million, respectively. For the three months and nine months ended September 30, 2013, we had loss on extinguishment of debt of \$63.6 million and \$110.8 million, respectively.

Loss on extinguishment of debt during the third quarter of 2014 of \$12.9 million was due to the conversion of 8.00% Notes Issued in 2013. Holders of approximately \$6.8 million principal amount of our 8.00% Notes Issued in 2013 converted these notes into 11.4 million shares of common stock during the third quarter of 2014, resulting in a non-cash loss on extinguishment of debt of \$12.9 million. The fair value of the shares issued to the holders exceeded the derivative liability and principal amount written off due to the conversions resulting in a loss on extinguishment of debt.

Loss on extinguishment of debt during the second quarter of 2014 of \$16.5 million was due to the conversion of our 8.00% Notes Issued in 2009 and a portion of our 8.00% Notes Issued in 2013. On April 15, 2014 we met the condition for automatic conversion of our 8.00% Notes Issued in 2009. As a result of this automatic conversion and other conversions prior to April 15, 2014, the remaining principal amount of 8.00% Notes Issued in 2009 converted into shares of common stock resulting in a non-cash gain on extinguishment of debt of \$3.9 million during the second quarter of 2014. The derivative liability and principal amount written off exceeded the fair value of shares issued to the holders upon conversion resulting in a gain on extinguishment of debt. Additionally, holders of approximately \$10.5 million principal amount of our 8.00% Notes Issued in 2013 converted them into 18.6 million shares of common stock during the second quarter of 2014, resulting in a non-cash loss on extinguishment of debt of \$20.4 million. The fair value of the shares issued to the holders exceeded the derivative liability and principal amount written off due to the conversions resulting in a loss on extinguishment of debt.

Loss on extinguishment of debt recorded during the first quarter of 2014 of \$10.2 million was due to the conversion during that quarter of certain of 8.00% Notes Issued in 2009 and 8.00% Notes Issued in 2013. Approximately \$8.8 million principal amount of our 8.00% Notes Issued in 2009 were converted in the first quarter of 2013, resulting in a non-cash gain on extinguishment of debt of \$0.4 million. The derivative liability and principal amount written off exceeded the fair value of shares issued to the holders upon conversion resulting in a gain on extinguishment of debt. Additionally, pursuant to the terms of the indenture for the 8.00% Notes Issued in 2013, approximately 15%, or \$7.0 million, of the principal amount of 8.00% Notes Issued in 2013 converted on March 20, 2014, resulting in a non-cash loss on extinguishment of debt of \$10.5 million. The fair value of the shares issued to the holders exceeded the derivative liability and principal amount written off due to the conversions resulting in a loss on extinguishment of debt.

Loss on extinguishment of debt during the third quarter of 2013 was due to the Amended and Restated Loan Agreement with Thermo executed in July 2013. As a result of the amendment and restatement, we recorded a loss on extinguishment of debt of \$66.1 million in the third quarter of 2013. The fair value of the shares issued to the holders exceeded the derivative liability and principal amount written off due to the conversions resulting in a loss on extinguishment of debt. Additionally, approximately 12.9% of the outstanding principal amount of 8.00% Notes Issued in 2013 was converted on July 19, 2013. As a result of this conversion, we recorded a gain on extinguishment of debt of approximately \$2.5 million in the third quarter of 2013. The derivative liability and principal amount written off exceeded the fair value of shares issued to the holders upon conversion resulting in a gain on extinguishment of debt.

Loss on extinguishment of debt during the second quarter of 2013 was due to the Exchange Agreement that we entered into in May 2013 with the holders of approximately 91.5% of our 5.75% Notes. The Exchanging Note Holders received a combination of cash, shares of our common stock and 8.00% Notes Issued in 2013. We redeemed the remaining 5.75% Notes for cash in an amount equal to their outstanding principal amount. As a result of the exchange and redemption, we recorded a loss on extinguishment of debt of approximately \$47.2 million in the second quarter of 2013, representing the difference between the net

carrying amount of the old 5.75% Notes and the fair value of consideration given in the exchange (including the new 8.00% Notes Issued in 2013, cash payments to both Exchanging and non-Exchanging Note Holders, equity issued to the Exchanging Note Holders and other fees incurred for the exchange).

#### Loss on Equity Issuance

##### Three and Nine Months

For the three months and nine months ended September 30, 2013, we had loss on equity issuances of \$2.7 million and \$16.7 million, respectively. Similar charges did not occur in 2014.

In May and October 2013, we entered into Common Stock Purchase Agreements with Thermo. As a result of issuing stock under these agreements during the three and nine months ended September 30, 2013, we recognized \$2.4 million and \$16.4 million, respectively, of non-cash losses on the sale of shares representing the difference between the sale price of our common stock sold to Thermo and its fair value on the date of each sale (measured as the closing stock price on the date of each sale).

In July 2013, a holder of our 5.0% Warrants exercised warrants in a net share exercise. The fair value of the common stock issued with respect to this exercise was recorded as a loss on shares issued of \$0.3 million, representing the fair value of the stock issued on the date the warrant was exercised.

#### Interest Income and Expense

##### Three and Nine Months

Interest income and expense, net, fluctuated by \$7.8 million to an expense of \$9.1 million for the three months ended September 30, 2014 from an expense of \$16.9 million for the same period in 2013 and fluctuated by \$6.0 million to an expense of \$33.9 million for the nine months ended September 30, 2014 from an expense of \$39.9 million for the same period in 2013.

During the three and nine months ended September 30, 2013, certain holders of our 5% Notes converted approximately \$7.9 million and \$16.5 million principal amount of Notes, respectively. These conversions resulted in the recognition of approximately \$6.0 million and \$12.5 million, respectively, in interest expense for the period. Similar charges did not occur in 2014.

Due to a decrease in the outstanding debt balance during the three and nine months ended September 30, 2014 compared to the same periods in 2013, which was driven primarily by conversions of our various convertible notes, interest expense has generally decreased related to certain debt instruments. As discussed in Note 3, this conversion activity has included the remaining 5% Notes in November 2013, the remaining 8.00% Notes Issued in 2009 in April 2014, and a portion of the 8.00% Notes Issued in 2013 at various dates throughout 2013 and 2014.

During the second quarter of 2014, holders of a portion of our 8.00% Notes Issued in 2013 converted them into common stock. Beginning on May 20, 2014, the first anniversary of the issuance of the 8.00% Notes Issued in 2013, the holders have a right to receive make-whole interest payments upon conversion. As a result of conversions in the second quarter of 2014, we recorded approximately \$3.0 million of additional interest expense due to make-whole interest payments made upon conversion.

Excluding these isolated items, a reduction in our capitalized interest due to the decline in our construction in progress balance has increased interest expense. As we placed satellites into service, our construction in progress balance

related to our second-generation satellites decreased, which reduced the amount of interest we can capitalize under GAAP.

Derivative Gain (Loss)

Three and Nine Months

Derivative gain (loss) fluctuated by \$264.5 million to a gain of \$167.0 million for the three months ended September 30, 2014 compared to a loss of \$97.5 million for the same period in 2013 and by \$291.8 million to a loss of \$418.7 million for the nine months ended September 30, 2014 compared to a loss of \$126.9 million for the same period in 2013.

We recognize gains or losses due to the change in the value of certain embedded features within our debt instruments that require standalone derivative accounting. During 2014, these gains and losses were due primarily to significant movements in our stock price as well as other inputs used in our valuation models. A fluctuation in our stock price is the most significant driver for

the change in value of these derivative instruments. See Note 5 to our condensed consolidated financial statements for further discussion of the impact of stock price on the fair value of derivatives.

#### Other

#### Three and Nine Months

Other income (expense) fluctuated by \$4.1 million to income of \$2.6 million for the three months ended September 30, 2014 from an expense of \$1.5 million for the same period in 2013 and fluctuated by \$3.3 million to income of \$2.2 million for the nine months ended September 30, 2014 from an expense of \$1.1 million for the same period in 2013. Changes in other income (expense) are due primarily to foreign currency gains and losses recognized during the respective periods. Furthermore, as previously discussed, in May 2014 Hughes exercised its right to receive the pre-payment of certain payment milestones in the form of our common stock at a 7% discount to market value in lieu of cash. In valuing the shares, we recorded a non-cash loss of approximately \$0.7 million in other expense in our condensed consolidated statement of operations during the second quarter of 2014.

#### Liquidity and Capital Resources

Our principal liquidity requirements include paying remaining amounts outstanding related to the deployment of our second-generation constellation, making improvements to our ground infrastructure, repaying our debt and funding our operating costs. Our principal sources of liquidity include cash on hand, cash flows from operations and funds available under the equity line agreement with Terrapin. See below for further discussion. Additionally, we have approximately \$37.9 million in restricted cash which must be maintained through the term of the Facility Agreement and may be used to pay the final principal and interest payments under the Facility Agreement.

#### Comparison of Cash Flows for the nine months ended September 30, 2014 and 2013

The following table shows our cash flows from operating, investing and financing activities for the nine months ended September 30, 2014 and 2013 (in thousands):

	Nine Months Ended	
	September 30, 2014	September 30, 2013
Net cash provided by operating activities	\$6,875	\$2,334
Net cash used in investing activities	(6,065	) (30,615
Net cash provided by financing activities	9,139	23,042
Effect of exchange rate changes on cash	(136	) 90
Net increase (decrease) in cash and cash equivalents	\$9,813	\$ (5,149)

#### Cash Flows Provided by Operating Activities

Net cash provided by operating activities during the nine months ended September 30, 2014 was \$6.9 million compared to \$2.3 million during the same period in 2013. We experienced favorable changes in operating assets and liabilities during the nine months ended September 30, 2014, which resulted in more cash provided by operating activities for the first nine months of 2014 than in the same period of 2013.

#### Cash Flows Used in Investing Activities

Cash used in investing activities was \$6.1 million for the nine months ended September 30, 2014 compared to \$30.6 million for the same period in 2013. The decrease in cash used in investing activities was due primarily to the decrease in payments related to our second-generation constellation. The decrease in cash used in the construction of our second-generation constellation was due to the satellites being deployed fully by August 2013. We expect to continue to incur capital expenditures throughout 2014 and in future years relating to capital expenditures to upgrade our gateways and other ground facilities. We also experienced a reduction in our restricted cash balance. During 2013, we drew \$8.8 million in total of excess funds held in our debt service reserve account to pay launch related expenses.

#### Cash Flows Provided by Financing Activities

Net cash provided by financing activities for the nine months ended September 30, 2014 was primarily due to cash received as a result of warrant and stock option exercises. We continue to see increased stock option and warrant exercises as our stock

price appreciates and these instruments are more valuable to the holders. The net cash provided by financing activities during the nine months ended September 30, 2013 was due primarily to transactions related to our debt instruments and equity commitments. In May 2013, we exchanged our 5.75% Notes for new 8.00% Notes Issued in 2013. In connection with this exchange, we paid \$20.0 million in cash as a reduction of principal outstanding and we received \$51.5 million from Thermo pursuant to the Consent Agreement (See Note 3 for further discussion). We also made payments in the third quarter of 2013 for financing costs related to the exchange of the 5.75% Notes and the amendment of our Facility Agreement, which occurred in August 2013.

#### Cash Position and Indebtedness

As of September 30, 2014, we held cash and cash equivalents of \$27.2 million, and \$24.0 million was available under the equity line agreement with Terrapin. Additionally, we have approximately \$37.9 million in restricted cash which must be maintained through the term of the Facility Agreement and may be used to pay the final principal and interest payments under the Facility Agreement.

As of December 31, 2013, we held cash and cash equivalents of \$17.4 million and \$24.0 million was available under the equity line agreement with Terrapin.

The carrying amount of the current portion of our long-term debt outstanding was \$7.3 million and \$4.0 million at September 30, 2014 and December 31, 2013, respectively. The current portion of our long-term debt outstanding at each of these periods represents scheduled principal payments under our Facility Agreement to occur in the next twelve months. See Note 3 to the condensed consolidated financial statements for further discussion.

#### Facility Agreement

We have a \$586.3 million senior secured credit facility agreement (the "Facility Agreement") that, as described below, was amended and restated effective in August 2013 and is scheduled to mature in December 2022. Semi-annual principal repayments are scheduled to begin in December 2014. The facility bears interest at a floating LIBOR rate plus 2.75% through June 2017, increasing by an additional 0.5% each year to a maximum rate of LIBOR plus 5.75%. Ninety-five percent of our obligations under the Facility Agreement are guaranteed by COFACE, the French export credit agency. Our obligations under the Facility Agreement are guaranteed on a senior secured basis by all of our domestic subsidiaries and are secured by a first priority lien on substantially all of the assets of us and our domestic subsidiaries (other than their FCC licenses), including patents and trademarks, 100% of the equity of our domestic subsidiaries and 65% of the equity of certain foreign subsidiaries. The Facility Agreement contains customary events of default and requires that we satisfy various financial and nonfinancial covenants. We were in compliance with all covenants as of September 30, 2014.

The Facility Agreement requires the Company to maintain a total of \$37.9 million in a debt service reserve account. The use of the funds in this account is restricted to making principal and interest payments under the Facility Agreement. As of September 30, 2014, the balance in the debt service reserve account was \$37.9 million and classified as restricted cash.

On July 31, 2013, we entered into the GARA with Thermo, our domestic subsidiaries (the "Subsidiary Guarantors"), the Lenders and BNP Paribas as the security agent and COFACE Agent, providing for the amendment and restatement of our Facility Agreement and certain related credit documents. The GARA became effective on August 22, 2013 and, among other things, waived all of our existing defaults under the Facility Agreement and restructured the financial covenants.

The Facility Agreement requires that:

We not exceed maximum capital expenditures of \$42.3 million for the full year 2014, \$18.8 million for the full year 2015, \$13.2 million for the full year 2016 and \$15.0 million for each year thereafter. Pursuant to the terms of the Facility Agreement, if, in any relevant period, the capital expenditures are less than the permitted amount for that relevant period, a permitted excess amount may be added to the maximum amount of capital expenditures in the next period;

• We maintain at all times a minimum liquidity balance of \$4.0 million;

• We achieve for each period the following minimum adjusted consolidated EBITDA (as defined in the Facility Agreement):

42

---

Period	Minimum Amount	
7/1/14-12/31/14	\$14.1	million
1/1/15-6/30/15	\$17.0	million
7/1/15-12/31/15	\$23.5	million

Beginning in July 2013, we maintain a minimum debt service coverage ratio of 1.00:1; and

We maintain a maximum net debt to adjusted consolidated EBITDA ratio of 62.00:1, gradually decreasing to 2.50:1 through 2022.

Pursuant to the terms of the Facility Agreement, we have the ability to cure noncompliance with financial covenants with equity contributions through June 2017.

See Note 3 to our condensed consolidated financial statements for further discussion of the Facility Agreement.

#### The Consent Agreement and the Common Stock Purchase (and Option) Agreement

##### The Consent Agreement

On May 20, 2013, we entered into the Consent Agreement with Thermo. Pursuant to the Consent Agreement, Thermo agreed that it would make, or arrange for third parties to make, cash contributions to us in exchange for equity, subordinated convertible debt or other equity-linked securities.

In accordance with the terms of the Common Stock Purchase Agreement and the Common Stock Purchase and Option Agreement discussed below, as of December 31, 2013, Thermo contributed a total of \$65.0 million to us in exchange for 171.9 million shares of our nonvoting common stock. As of September 30, 2014, Thermo had fulfilled its obligations under the agreements.

##### The Common Stock Purchase Agreement

On May 20, 2013, we entered into a Common Stock Purchase Agreement with Thermo to price certain equity purchases made by Thermo pursuant to the Consent Agreement. Pursuant to the Consent Agreement, Thermo purchased 78,125,000 shares of our common stock for \$25.0 million (\$0.32 per share). Thermo also agreed to purchase additional shares of our common stock at \$0.32 per share as and when required to fulfill its equity commitment described above to maintain our consolidated unrestricted cash balance at not less than \$4.0 million until the earlier of July 31, 2013 and the closing of a restructuring of the Facility Agreement. In furtherance thereof, in May 2013, Thermo purchased an additional 15,625,000 shares of our common stock for an aggregate purchase price of \$5.0 million. In June 2013, Thermo purchased an additional 28,125,000 shares of our common stock for an aggregate purchase price of \$9.0 million. Pursuant to their commitment, Thermo invested \$6.0 million in July 2013 and \$6.5 million in August 2013 on terms determined by a special committee of our board of directors consisting solely of unaffiliated directors as described below.

Pursuant to the Common Stock Purchase Agreement, the shares of common stock are intended to be shares of non-voting common stock. As of May 20, 2013, our certificate of incorporation did not provide for any authorized but unissued shares of non-voting common stock. On July 8, 2013, we filed an amendment to our certificate of incorporation increasing the number of authorized shares of non-voting common stock, and we subsequently delivered Thermo shares of our non-voting common stock.

The terms of the Common Stock Purchase Agreement were approved by a special committee of our board of directors consisting solely of our unaffiliated directors. The committee, which was represented by independent legal counsel, determined that the terms of the Common Stock Purchase Agreement were fair to and in the best interests of us and our shareholders.

#### The Common Stock Purchase and Option Agreement

On October 14, 2013, we entered into a Common Stock Purchase and Option Agreement with Thermo to price certain previously made and anticipated equity purchases made by Thermo pursuant to the Consent Agreement. Pursuant to the terms of the Common Stock Purchase and Option Agreement, Thermo agreed to purchase 11,538,461 shares of our non-voting common stock at a purchase price of \$0.52 per share in exchange for \$6.0 million invested in July 2013 and an additional 12,500,000 shares of our common stock in exchange for \$6.5 million funded in August 2013. During the third quarter of 2013, Thermo purchased

approximately 24.0 million shares of our common stock pursuant to the terms of the Common Stock Purchase and Option Agreement for an aggregate purchase price of \$12.5 million.

The Common Stock Purchase and Option Agreement also granted us a First Option and a Second Option, as defined in the agreement, whereby we could require Thermo to purchase an additional \$13.5 million of our common stock at a fixed price regardless of the underlying stock price when such stock was purchased and an additional \$11.5 million of nonvoting common stock, as and when requested to do so by the special committee through November 28, 2013 and December 31, 2013, respectively. The First Option provided we could sell up to \$13.5 million in shares to Thermo at a purchase price of \$0.52 per share. The Second Option provided we could sell up to \$11.5 million in shares to Thermo at a price equal to 85% of the average closing price of our voting common stock during the ten trading days immediately preceding the date of the special committee's notice of exercise of the option. In November 2013, the special committee and Thermo amended the Common Stock Purchase and Option Agreement to defer the expiration date of the Second Option to March 31, 2014. The Second Option under the Common Stock Purchase and Option Agreement was not exercised and therefore has expired. In November 2013, we exercised the First Option, pursuant to which on December 27, 2013 we sold Thermo 26.0 million shares of our common stock for a total purchase price of \$13.5 million.

The terms of the Common Stock Purchase and Option Agreement were approved by a special committee of our board of directors consisting solely of our unaffiliated directors. The Committee, which was represented by independent legal counsel, determined that the terms of the Common Stock Purchase and Option Agreement were fair to and in the best interests of us and our shareholders.

See Note 3 to our condensed consolidated financial statements for further discussion of the Consent Agreement and the Common Stock Purchase and Option Agreement.

#### Terrapin Common Stock Purchase Agreement

On December 28, 2012 we entered into a Common Stock Purchase Agreement with Terrapin pursuant to which we may, subject to certain conditions, require Terrapin to purchase up to \$30.0 million of shares of our voting common stock over the 24-month term following the effective date of a resale registration statement, which became effective on August 2, 2013. This type of arrangement is sometimes referred to as a committed equity line financing facility. From time to time over the 24-month term following the effectiveness of the registration statement, and in our sole discretion, we may present Terrapin with up to 36 draw down notices requiring Terrapin to purchase a specified dollar amount of shares of our voting common stock. We will not sell Terrapin a number of shares of voting common stock which, when aggregated with all other shares of voting common stock then beneficially owned by Terrapin and its affiliates, would result in the beneficial ownership by Terrapin or any of its affiliates of more than 9.9% of our then issued and outstanding shares of voting common stock.

Since entering into this agreement, Terrapin has purchased a total of 6.1 million shares of voting common stock at a purchase price of \$6.0 million.

See Note 3 to our condensed consolidated financial statements for further discussion of the Terrapin agreement.

#### Capital Expenditures

We have entered into various contractual agreements related to the procurement and deployment of our second-generation network, as summarized below. The discussion below is based on our current contractual obligations to these contractors.

## Second-Generation Satellites

We have a contract with Thales for the construction of the second-generation low-earth orbit satellites and related services. We successfully completed the launches of our second-generation satellites. We have also incurred additional costs for certain related services, a portion of which is still owed to Thales. Discussions between us and Thales are ongoing regarding the remaining amounts owed by both parties under the contracts. We included these amounts in “Other Capital Expenditures and Capitalized Labor” in the table below.

We have a contract with Arianespace for the launch of these second-generation satellites and certain pre and post-launch services. We have also incurred additional obligations to Arianespace for launch delays. We included these amounts in “Other Capital Expenditures and Capitalized Labor” in the table below.

The amount of capital expenditures as of September 30, 2014 and estimated future capital expenditures (excluding capitalized interest) related to the construction and deployment of the satellites for our second-generation constellation and the launch services contract is presented in the table below (in thousands):

Capital Expenditures	Payments through September 30, 2014	Estimated Future Payments Remaining 2014	Estimated Future Payments			Total
			2015	2016	Thereafter	
Thales Second-Generation Satellites	\$622,690	—	\$—	\$—	\$—	\$622,690
Arianespace Launch Services	216,000	—	—	—	—	216,000
Launch Insurance	39,903	—	—	—	—	39,903
Other Capital Expenditures and Capitalized Labor	54,631	5,851	—	—	—	60,482
Total	\$933,224	\$5,851	\$—	\$—	\$—	\$939,075

As of September 30, 2014, we had recorded \$5.9 million of these capital expenditures in accounts payable and accrued expenses.

#### Next-Generation Gateways and Other Ground Facilities

In May 2008, we entered into an agreement with Hughes to design, supply and implement (a) RAN ground network equipment and software upgrades for installation at a number of our satellite gateway ground stations and (b) satellite interface chips to be used in various next-generation Globalstar devices.

In May 2014, we entered into an agreement with Hughes to incorporate changes to the scope of work for the RAN and UTS being supplied to us. The additional work increases the total contract value by \$3.8 million. We also entered into a letter agreement with Hughes whereby Hughes was granted the option to accept the pre-payment of certain payment milestones in the form of our common stock at a 7% discount in lieu of cash. We issued the stock to Hughes on July 1, 2014. The payment milestones totaled \$9.9 million. In valuing the shares, we recorded a loss of approximately \$0.7 million in our condensed consolidated statement of operations during the second quarter of 2014.

In October 2014, the Company and Hughes formally amended the contract to include the revised scope of work agreed to in the May letter agreement. The amendment also adjusted the schedule of the program and the remaining payment milestones and program milestones to incorporate the agreed upon changes. The additional \$3.8 million in work agreed to in May is now reflected in the contract through this amendment.

In October 2008, we signed an agreement with Ericsson, a leading global provider of technology and services to telecom operators. Ericsson will work with us to develop, implement and maintain a ground interface, or core network, system that will be installed at a number of our satellite gateway ground stations. In July 2014, we entered into an amended and restated agreement with Ericsson for our core network system specifying the remaining contract value of \$25.4 million for the work and a new milestone schedule to reflect the new program timeline.

The following table presents the amount of actual and contractual capital expenditures (excluding capitalized interest) related to the construction of the ground component and related costs (in thousands) and includes both payments made in cash and stock:

Capital Expenditures	Payments through September 30, 2014	Estimated Future Payments Remaining 2014	Estimated Future Payments			Total
			2015	2016	Thereafter	
Hughes second-generation ground component (including research	\$93,090	\$1,569	\$9,744	\$1,610	\$—	\$106,013

Edgar Filing: Globalstar, Inc. - Form 10-Q

and development expense)						
Ericsson ground network	6,049	6,774	13,676	5,643	—	32,142
Other Capital Expenditures	1,583	—	—	—	—	1,583
Total	\$100,722	\$8,343	\$23,420	\$7,253	\$—	\$139,738

As of September 30, 2014, we recorded \$2.6 million of these capital expenditures in accounts payable.

## Liquidity

We have a plan to continue to improve operations, maintain our second-generation constellation, and upgrade our next-generation ground infrastructure. We must execute our business plan, which assumes the funding of the financial arrangements with Terrapin. Uncertainties remain related to the timing of this funding. Completion of the foregoing actions is not solely within our control and we may be unable to successfully complete one or all of these actions.

Satisfying our principal long-term liquidity needs depends upon maintaining service coverage levels and continuing to make improvements to our ground infrastructure, funding our working capital and cash operating needs, including any growth in our business, and funding repayment of our indebtedness, both principal and interest, when due. We expect sources of long-term liquidity to include debt and equity financings which have not yet been arranged. We cannot assure you that we can obtain sufficient additional financing on acceptable terms, if at all. We also expect cash flows from operations to be a source of long-term liquidity now that we have fully deployed our second-generation satellite constellation. Additionally, we have approximately \$37.9 million in restricted cash which must be maintained through the term of the Facility Agreement and can be used to pay the final principal and interest payments under the Facility Agreement.

## Contractual Obligations and Commitments

There have been no other significant changes to our contractual obligations and commitments since December 31, 2013 except those discussed above.

## Off-Balance Sheet Transactions

We have no material off-balance sheet transactions.

## Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our services and products are sold, distributed or available in over 120 countries. Our international sales are made primarily in U.S. dollars, Canadian dollars, Brazilian Reals and Euros. In some cases, insufficient supplies of U.S. currency may require us to accept payment in other foreign currencies. We reduce our currency exchange risk from revenues in currencies other than the U.S. dollar by requiring payment in U.S. dollars whenever possible and purchasing foreign currencies on the spot market when rates are favorable. We currently do not purchase hedging instruments to hedge foreign currencies. We are obligated to enter into currency hedges with the original lenders no later than 90 days after any fiscal quarter during which more than 25% of revenues is denominated in a single currency other than U.S. or Canadian dollars. Otherwise, we cannot enter into hedging agreements other than interest rate cap agreements or other hedges described above without the consent of the agent for the Facility Agreement, and with that consent the counterparties may only be the original lenders.

Our interest rate risk arises from our variable rate debt under our Facility Agreement, under which loans bear interest at a floating rate based on the LIBOR. In order to minimize the interest rate risk, we completed an arrangement with the lenders under the Facility Agreement to limit the interest to which we are exposed. The interest rate cap provides limits on the 6-month Libor rate (Base Rate) used to calculate the coupon interest on outstanding amounts on the Facility Agreement to be capped at 5.50% should the Base Rate not exceed 6.5%. Should the Base Rate exceed 6.5%, our Base Rate will be 1% less than the then 6-month Libor rate. Based on borrowings, the entire \$586.3 million under the Facility Agreement, a 1.0% change in interest rates would result in a change to interest expense of approximately \$5.9 million annually.

## Item 4. Controls and Procedures

(a) Evaluation of disclosure controls and procedures.

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 as of September 30, 2014, the end of the period covered by this Report. The evaluation included certain internal control areas in which we have made and are continuing to make changes to improve and enhance controls. This evaluation was based on the guidelines established in Internal Control - Integrated Framework issued in 1992 by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of September 30, 2014 our disclosure controls and procedures were effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

We believe that the condensed consolidated financial statements included in this Report fairly present, in all material respects, our condensed consolidated financial position and results of operations as of and for the quarter and nine months ended September 30, 2014.

(b) Changes in internal control over financial reporting.

As of September 30, 2014, our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated our internal control over financial reporting. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that no changes in our internal control over financial reporting occurred during the quarter ended September 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting, except as noted below with respect to a non-cash derivative valuation.

As discussed in Management's Annual Report on Internal Control over Financial Reporting included in our Annual Report on Form 10-K for the year ended December 31, 2013, management identified a material weakness in our internal control over financial reporting as it related to an outsourced control performed by an independent valuation firm engaged to calculate the valuation of our non-cash embedded derivative liabilities at each reporting period.

In order to remediate the material weakness described above, we implemented the following steps.

• Updates have been made to the valuation model to correct the identified error.

• Additional analysis and review procedures will be performed by the independent valuation firm and discussed with management.

• Management implemented additional review procedures over the outputs of the valuation model.

We will continue to evaluate the effectiveness of our internal controls and procedures on an ongoing basis and will take further action as appropriate.

## PART II: OTHER INFORMATION

### Item 1A. Risk Factors

You should carefully consider the risks described in this Report and all of the other reports that we file from time to time with the Securities and Exchange Commission ("SEC"), in evaluating and understanding us and our business. Additional risks not presently known or that we currently deem immaterial may also impact our business operations and the risks identified in this Report may adversely affect our business in ways we do not currently anticipate. Our financial condition or results of operations also could be materially adversely affected by any of these risks. There have been no material changes to the risk factors disclosed in Part I. Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2013, as filed with the SEC on March 10, 2014.

Item 6. Exhibits

Exhibit Number	Description
10.1†	Purchase Agreement by and between Globalstar, Inc. and Ericsson Inc. effective as of July 22, 2014
10.2†	Amendment No.12 to Contract between Globalstar, Inc. and Hughes Network Systems LLC dated as of October 16, 2014
31.1	Section 302 Certification of the Chief Executive Officer
31.2	Section 302 Certification of the Chief Financial Officer
32.1	Section 906 Certification of the Chief Executive Officer
32.2	Section 906 Certification of the Chief Financial Officer
101.INS	XBRL Instance Document
101.SCH	XBRL Taxonomy Extension Schema Document
101.CAL	XBRL Taxonomy Extension Calculation Linkbase Document
101.DEF	XBRL Taxonomy Extension Definition Linkbase Document
101.PRE	XBRL Taxonomy Extension Presentation Linkbase Document
101.LAB	XBRL Taxonomy Extension Label Linkbase Document

† Portions of the exhibits have been omitted pursuant to a request for confidential treatment filed with the Commission. The omitted portions have been filed with the Commission.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

GLOBALSTAR, INC.
