GEOPETRO RESOURCES COMPANY

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION AND USE OF ESTIMATES

The interim consolidated financial statements of GeoPetro Resources Company ("we," "us," "our," "GeoPetro" or the "Company") are unaudited and contain all adjustments (consisting primarily of normal recurring accruals) necessary for a fair statement of the results for the interim periods presented. Results for interim periods are not necessarily indicative of results to be expected for a full year or for previously reported periods due in part, but not limited to, the volatility in crude oil and natural gas commodity prices, interest rates, estimates of reserves, drilling risks, geological risks, transportation restrictions, the timing of acquisitions, product demand, market competition, interruption in production and our ability to obtain additional capital. You should read these consolidated interim financial statements in conjunction with the audited consolidated financial statements and notes thereto included in GeoPetro's Annual Report on Form 10-K for the year ended December 31, 2011.

The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include the accounts of GeoPetro and its wholly-owned subsidiaries. Intercompany accounts and transactions are eliminated. In preparing the accompanying financial statements, management has made certain estimates and assumptions that affect reported amounts in the financial statements. Actual results may differ from those estimates. Significant assumptions are required in the valuation of proved oil and natural gas reserves, which may affect the amount at which oil and natural gas properties are recorded. The computation of share-based compensation expense requires assumptions such as volatility, expected life and the risk-free interest rate. It is at least reasonably possible these estimates could be revised in the near term, and these revisions could be material.

2. LIQUIDITY

As of September 30, 2012, we had a working capital deficit of \$2,760,890, and for the nine months ended September 30, 2012, our cash used in operating activities amounted to \$1,665,222. If capital is available, we estimate that our investment needs during the remainder of fiscal year 2012 and 2013 will amount to \$10,676,000 related to our natural gas properties within the Madisonville field, our California properties and our Canadian properties. Our results of operations have resulted in an accumulated deficit of \$49,072,092 from inception through the nine months ended September 30, 2012.

We hold working interests and overriding royalty interests in undeveloped leases, seismic options, lease options and foreign concessions and we have participated in seismic surveys and the drilling of test wells on undeveloped properties. We plan further leasehold acquisitions for the remainder of fiscal year 2012 and future periods. Exploratory and developmental drilling is scheduled during the remainder of fiscal 2012 and future periods on our undeveloped properties. We will need additional financing to continue development. If additional financing is not available, we will be compelled to reduce the scope of our business activities. If we are unable to fund our operating cash flow needs and planned capital investments, it may be necessary to farm-out our interest in proposed wells, sell a portion of our interest in prospects, sell a portion of our interest in our producing oil and gas properties, reduce general and administrative expenses, or a combination of all of these factors. Further, we have maturing debt obligations, debt service, lease obligations and dividend requirements that will require cash payments.

In April 2012, the Company's wholly-owned subsidiary, Redwood Energy Production, L.P., elected to temporarily shut-in its natural gas production at the Madisonville Field, Madison County, Texas in light of depressed natural gas prices. The Company will monitor market conditions and bring its natural gas production back on stream as market

conditions warrant. For the nine months ended September 30, 2012, 100% of the Company's revenue was derived from the natural gas production in the Madisonville Field.

As of September 30, 2012, Stuart J. Doshi, President and CEO, has advanced to the Company nine loans totaling \$475,000. The notes bear interest at 10% per annum and are payable on demand (Note 5).

As a result of the Company's liquidity issues, it may be required to sell certain assets, including reserves and/or raise capital with terms that may not be as favorable as might otherwise be available.

3. INCOME (LOSS) PER COMMON SHARE

Basic net income (loss) per common share is computed by dividing the net income (loss) attributable to common shareholders by the weighted average number of shares of common stock outstanding during the period.

Diluted net income (loss) per common share is computed in the same manner, but also considers the effect of common stock shares underlying the following:

	September 30, 2012	As of September 30, 2011
Stock options	3,445,000	2,770,000
Warrants	5,399,265	5,546,044
Convertible Preferred Stock, Series B	5,423,000	7,423,000

All of the common shares underlying the stock options, warrants and convertible preferred stock, Series B above were excluded from diluted weighted average shares outstanding for the three and nine months ended September 30, 2012 and September 30, 2011 respectively because their effects were considered antidilutive.

4. OIL AND GAS PROPERTIES

There were no material changes to oil and gas properties from those disclosed in the audited annual consolidated financial statements for the year ended December 31, 2011 other than those discussed below.

In April 2012, the Company's wholly-owned subsidiary, Redwood Energy Production, L.P., elected to temporarily shut-in its natural gas production at the Madisonville Field, Madison County, Texas in light of depressed natural gas prices. The Company will monitor market conditions and bring its natural gas production back on stream as market conditions warrant.

In June 2012, the Company's wholly owned subsidiary, GeoPetro Canada Ltd., acquired the remaining two-thirds (2/3) working interest in the Swan Hills Project, Central Alberta, Canada in exchange for an overriding royalty interest. Following the acquisition, the Company now owns 100% of the working interest in the Project.

In August 2012, the Company sold certain oil and gas properties for approximately \$500,000, of which approximately \$100,000 has been recorded as accounts receivable-other in the financial statements.

The Company has been notified that the operator of the Bengara II Production Sharing Contract ("PSC") has terminated negotiations with the Indonesian government for an extension of the PSC's terms. The PSC shall now be relinquished and allowed to expire in accordance with its terms. As a result, the Company has recorded an impairment charge of \$587,040 to its oil and gas properties. In addition, the Company has recorded an impairment charge of \$33,616 to its Canadian oil and gas properties.

The Company has proved undeveloped reserves included in the carrying value of its proved properties. While the Company is confident capital will be raised to further develop these reserves; if not the Company may be required to impair the Proved property asset in the future.

5. DEBT

As of September 30, 2012 and December 31, 2011 debt consisted of the following:

	September 30, 2012	December 31, 2011
Current		
Promissory notes (b)	\$ 255,000	\$ 1,225,000
Related party notes (a)	475,000	—
Less discount on promissory notes	(22,441)	(27,615)
Net current notes payable	707,559	1,197,385
Long Term		
Promissory notes (b)	2,460,000	1,490,000
Less discount on promissory notes	(38,585)	(66,293)
Net long term notes payable	2,421,415	1,423,707
Total	\$ 3,128,974	\$ 2,621,092

(a) In March 2012, Stuart J. Doshi, President and CEO, advanced to the Company a loan in the amount of \$100,000. The note bears interest at 10% per annum and is payable on demand. In connection with this note, the Company agreed to issue 20,000 warrants to purchase our common stock at \$0.50 per share for a period of three years. The fair value of the warrants issued was \$1,609 (Note 9). Interest expense accrued on this note for the nine months ended September 30, 2012 was \$5,301.

In May 2012, Stuart J. Doshi, President and CEO, advanced to the Company two loans totaling \$75,000. The notes bear interest at 10% per annum and are payable on demand. In connection with these notes, the Company agreed to issue 15,000 warrants to purchase our common stock at \$0.50 per share for a period of three years. The fair value of the warrants issued was \$561 (Note 9). Interest expense accrued on these notes for the nine months ended September 30, 2012 was \$2,527.

In June 2012, Stuart J. Doshi, President and CEO, advanced to the Company four loans totaling \$225,000. The notes bear interest at 10% per annum and are payable on demand. In connection with these notes, the Company agreed to issue 45,000 warrants to purchase our common stock at \$0.50 per share for a period of three years. The fair value of the warrants issued was \$1,481 (Note 9). Interest expense accrued on these notes for the nine months ended September 30, 2012 was \$6,131.

In July 2012, Stuart J. Doshi, President and CEO, advanced to the Company two loans totaling \$75,000. The notes bear interest at 10% per annum and are payable on demand. In connection with these notes, the Company agreed to issue 15,000 warrants to purchase our common stock at \$0.50 per share for a period of three years. The fair value of the warrants issued was \$315 (Note 9). Interest expense accrued on these notes for the nine months ended September 30, 2012 was \$1,261.

(b) In May 2012, the Company extended the maturities of five promissory notes totaling \$1,150,000 to January 2014 and two promissory notes totaling \$365,000 to May 2014. In connection with these extensions, the Company extended 151,500 warrants to purchase our common stock associated with the notes for an additional year and reduced the exercise price to purchase the common shares from \$1.00 to \$0.50 per share. The fair value of the extension of the warrants was \$3,575 (Note 9).

6. INCOME TAXES

The effective income tax rates for the nine month period ending September 30, 2012 were negligible, primarily due to adjustments to the valuation allowance on deferred tax assets.

7. STOCKHOLDERS' EQUITY

In March 2012, we completed a unit sale through a private placement transaction to an individual accredited investor. Units were priced at \$0.25 per unit, and each unit consisted of one share of no par value common stock, and a one-half common share purchase warrant. Each one whole warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years. The total aggregate purchase price for the units sold was \$250,000, and represented the sale of 1,000,000 common shares and 500,000 warrants (Note 9). We agreed to grant "piggyback" registration rights to the investor with respect to the shares of common stock and common stock issuable upon exercise of the warrants which the investor acquired in the transaction.

In August 2012, we agreed to issue 225,000 shares of common stock to our independent directors. The shares were valued at the closing price of \$0.14 per share and have been recorded as share-based compensation in the financial statements. The aggregate value of the shares issued was \$31,500. We agreed to grant "piggyback" registration rights to the directors with respect to the shares of common stock.

8. COMMON STOCK OPTIONS

In August 2012, we granted 675,000 stock options at an exercise price of \$0.16 per share. These options will vest ratably over five years pursuant to the terms of the 2004 Stock Option and Appreciation Rights Plan. The grant date fair value of the options was \$70,831, as calculated using the Black-Scholes pricing model. Key assumptions used in valuing the options included: an estimated dividend yield of 0%, volatility of 105.56% based upon the Company's historic volatility of its publicly traded shares, an estimated risk-free interest rate based on the U.S. Treasury yield curve at the date of grant of 0.59% and an expected life based on the expiration date of the options of five years.

9. COMMON STOCK WARRANTS

In March 2012, we agreed to issue 20,000 warrants to purchase our common shares at \$0.50 per share in connection with the issuance of a note payable to Stuart J. Doshi, President and CEO, for \$100,000 (Note 5). The warrants expire in March 2015. The total fair value of the warrants as calculated using the Black-Scholes pricing model was \$1,609. Key assumptions used in valuing the warrants included: an estimated dividend yield of 0%, volatility of 91.97% based upon the Company's historic volatility of its publicly traded shares, an estimated risk-free interest rate based on the U.S. Treasury yield curve at the date of grant of 0.62% and an expected life based on the expiration date of the warrants of three years.

In March 2012, we agreed to issue 500,000 warrants to purchase our common shares at \$0.50 per share in conjunction with a private placement of our common stock (Note 7). The warrants expire in March 2015. The total fair value of the warrants as calculated using the Black-Scholes pricing model was \$40,070. Key assumptions used in valuing the warrants included: an estimated dividend yield of 0%, volatility of 90.87% based upon the Company's historic volatility of its publicly traded shares, an estimated risk-free interest rate based on the U.S. Treasury yield curve at the date of grant of 0.58% and an expected life based on the expiration date of the warrants of three years.

In May 2012, we agreed to extend 151,500 warrants to purchase our common shares for an additional year and reduced the exercise price to purchase the common shares from \$1.00 to \$0.50 per share in connection with the extension of seven notes payable totaling \$1,515,000 (Note 5). The extended warrants expire in December 2013, May 2014 and June 2014. The total fair value of the extension of the warrants as calculated using the Black-Scholes pricing model was \$3,575. Key assumptions used in valuing the extension of the warrants included: an estimated dividend yield of 0%, volatility of 80.57% based upon the Company's historic volatility of its publicly traded shares, an estimated risk-free interest rate based on the U.S. Treasury yield curve at the date of grant of 0.27% and an expected life based on the extension of the expiration date of the warrants of between 1.6 and 2.1 years.

In May 2012, we agreed to issue 15,000 warrants to purchase our common shares at \$0.50 per share in connection with the issuance of two notes payable to Stuart J. Doshi, President and CEO, totaling \$75,000 (Note 5). The warrants expire in May 2015. The total fair value of the warrants as calculated using the Black-Scholes pricing model was \$561. Key assumptions used in valuing the warrants included: an estimated dividend yield of 0%, volatility of 82.35% based upon the Company's historic volatility of its publicly traded shares, an estimated risk-free interest rate based on the U.S. Treasury yield curve at the date of grant between 0.38% and 0.42% and an expected life based on the expiration date of the warrants of three years.

In June 2012, we agreed to issue 45,000 warrants to purchase our common shares at \$0.50 per share in connection with the issuance of four notes payable to Stuart J. Doshi, President and CEO, totaling \$225,000 (Note 5). The warrants expire in June 2015. The total fair value of the warrants as calculated using the Black-Scholes pricing model was \$1,481. Key assumptions used in valuing the warrants included: an estimated dividend yield of 0%, volatility between 81.20% and 88.85% based upon the Company's historic volatility of its publicly traded shares, an estimated risk-free interest rate based on the U.S. Treasury yield curve at the date of grant between 0.35% and 0.41% and an expected life based on the expiration date of the warrants of three years.

In July 2012, we agreed to issue 15,000 warrants to purchase our common shares at \$0.50 per share in connection with the issuance of two notes payable to Stuart J. Doshi, President and CEO, totaling \$75,000 (Note 5). The warrants expire in July 2015. The total fair value of the warrants as calculated using the Black-Scholes pricing model was \$315. Key assumptions used in valuing the warrants included: an estimated dividend yield of 0%, volatility between 87.58% and 87.79% based upon the Company's historic volatility of its publicly traded shares, an estimated risk-free interest rate based on the U.S. Treasury yield curve at the date of grant between 0.30% and 0.34% and an expected life based on the expiration date of the warrants of three years.

In August 2012, we agreed to issue 45,000 warrants to purchase our common shares at \$0.50 per share in exchange for certain consulting services. The warrants expire in August 2016. The total fair value of the warrants as calculated using the Black-Scholes pricing model was \$2,986. Key assumptions used in valuing the warrants included: an estimated dividend yield of 0%, volatility of 101.08% based upon the Company's historic volatility of its publicly traded shares, an estimated risk-free interest rate based on the U.S. Treasury yield curve at the date of grant of 0.80% and an expected life based on the expiration date of the warrants of four years.

As of September 30, 2012 we have reserved 5,399,265 shares of common stock for the exercise of our stock purchase warrants.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with accompanying financial statements and related notes included elsewhere in this report. It contains forward looking statements that reflect our future plans, estimates, beliefs and expected performance. The forward looking statements are dependent upon events, risks and uncertainties that may be outside our control. Our actual results could differ materially from those discussed in these forward looking statements.

Factors that could cause or contribute to such differences include, but are not limited to, market prices for natural gas and oil, economic and competitive conditions, regulatory changes, estimates of proved reserves, geological, geophysical, and engineering risks and uncertainties, potential failure to achieve production from development drilling projects, capital expenditures and other uncertainties, as well as those factors discussed below and elsewhere in this report, particularly in "Risk Factors", all of which are difficult to predict and which expressly qualify all subsequent oral and written forward-looking statements attributable to us or persons acting on our behalf. In light of these risks, uncertainties and assumptions, the forward looking events discussed may not occur. We do not have any intention or obligation to update forward-looking statements included in this report after the date of this report, except as required by law.

Overview

We are an oil and gas company in the business of exploring and developing oil and natural gas reserves on a worldwide basis. Since inception, we have conducted leasehold acquisition, exploration and drilling activities on our North American and international prospects. These projects currently encompass approximately 9,030 gross (9,030 net) acres, consisting of mineral leases and exploration permits that give us the right to explore for, develop and produce oil and natural gas. Most of these properties are in the exploration, appraisal or development drilling phase and have not begun to produce revenue from the sale of oil and natural gas. Excluding minor interest and dividend income, our only significant cash inflows until 2003 were the recovery of capital invested in projects through sale or other divestiture of interests in oil and gas prospects to industry partners.

Since 2003, substantially all of our revenue has been generated from natural gas sales derived from the Magness #1, the Fannin #1, and the Mitchell #1 wells in the Madisonville Field in East Texas under spot gas purchase contracts at market prices. Natural gas sales from the Madisonville Field are expected to account for all of our revenues for 2012. We expect the majority of our capital expenditures for the remainder of 2012 will be for the Madisonville Project. Considering our liquidity issues, we may have to raise capital or sell assets on less favorable terms than may otherwise be available in order to accomplish our goals.

Results of Operations

The financial information with respect to the three and nine months ended September 30, 2012 and 2011 as discussed below is unaudited. In the opinion of management, such information contains all adjustments (consisting primarily of normal recurring accruals) necessary for a fair presentation of the results for such periods. The results of operations for interim periods are not necessarily indicative of the results of operations for the full fiscal years.

Revenue and Operating Trends

For the three and nine months ended September 30, 2012, we did not generate sufficient revenues to cover the plant operating expenses and lease operating expenses in our Madisonville Project. This was due to low production volumes, high shrinkage rates in the gas plant and low natural gas prices.

In April 2012, the Company's wholly-owned subsidiary, Redwood Energy Production, L.P., elected to temporarily shut-in its natural gas production at the Madisonville Field, Madison County, Texas in light of currently depressed natural gas prices caused by the oversupply of natural gas and the abnormally warm winter weather which has reduced the demand for natural gas. The Company plans to resume its natural gas production from the Madisonville Field when natural gas prices recover from the recently depressed levels, thus providing a better economic return. The Company will monitor market conditions and bring its natural gas production back on stream as market conditions warrant.

Subject to capital availability, we plan to workover the Mitchell #1 well and to frac and connect via gathering line the Wilson #1 well during the remainder of fiscal 2012 and 2013. Once the above production enhancements are completed, the Company expects the combined Rodessa formation production to increase from current rates. The Company hopes to continue to realize both intermediate and long term cost and operating efficiencies generated by consolidating the upstream and midstream portions of Madisonville under common ownership. We will continue to explore other longer term cost savings and efficiency measures at the natural gas treatment plant. Future plans are to expand the plant capacity from the current design capacity of 18 MMcf/d to 30 MMcf/d.

Industry Overview for the three and nine months ended September 30, 2012

Natural gas prices have been volatile due to concerns surrounding the recent global financial crisis and a resultant decline in demand for natural gas, an increase in production from shale gas, and last year's relatively mild winter. Fluctuations in the price for natural gas are closely associated with customer demand relative to the volumes produced and the level of inventory in underground storage. These factors led to natural gas prices falling to 10-year lows earlier this year.

Company Overview for the three and nine months ended September 30, 2012

Our net loss applicable to common shareholders for the three and nine months ended September 30, 2012 was \$1,414,149 and \$3,603,161, respectively. From our inception through mid-2003, we only received nominal revenues from our oil and natural gas activities, while incurring substantial acquisition and exploration costs and overhead expenses which have resulted in an accumulated deficit through September 30, 2012 of \$49,072,092. All of our natural gas sales for three and nine months ended September 30, 2012 were derived from our Madisonville Project, from three producing wells, the Magness #1 well, the Fannin #1 well and the Mitchell #1 well.

Comparison of Results of Operations for the three months ended September 30, 2012 and 2011

We had no natural gas revenues for the three months ended September 30, 2012 and 2011, respectively.

Plant operating expenses for the three months ended September 30, 2012 were \$95,638 as compared to \$581,370 for the three months ended September 30, 2011. The decrease in plant operating expenses of \$485,732 or 84% was primarily attributable to the suspension of plant operations as a result of the temporary shut-in of the Madisonville Field. Since the Company planned for an extended shut down, it was able to significantly reduce expenses. When operations resume at the plant, expenses will increase from current levels.

Lease operating expenses for the three months ended September 30, 2012 were \$24,177 as compared to \$19,407 for the three months ended September 30, 2011. The increase in total lifting cost of \$4,770 or 25% was primarily attributable to ad valorem taxes.

General and administrative expenses ("G&A") for the three months ended September 30, 2012 were \$443,427 as compared to \$510,854 for the three months ended September 30, 2011. The decrease in G&A of \$67,427 or 13% was primarily attributable to a decrease in salaries due to a reduction in the number of employees.

Depreciation, depletion and amortization expense ("DD&A") for the three months ended September 30, 2012 was \$82,051 as compared to \$61,324 for the three months ended September 30, 2011. The 34% increase was primarily attributable to higher depreciation for the Madisonville treatment plant as a result of improvements made in 2011.

The loss from operations for the three months ended September 30, 2012 was \$1,265,949 as compared to \$1,923,088 for the three months ended September 30, 2011. The decrease in the comparable loss from operations was primarily attributable to lower plant operating expenses as a result of the temporary shut-in of the Madisonville Field and lower G&A costs.

Interest expense for the three months ended September 30, 2012 was \$77,658 as compared to \$153,725 for the three months ended September 30, 2011. The decrease in interest expense was primarily attributable to the retirement of the Bank of Oklahoma debt in September 2011.

Comparison of Results of Operations for the nine months ended September 30, 2012 and 2011

Gross natural gas revenues for the nine months ended September 30, 2012 were \$351,082. During this 2012 period, the sales of natural gas from our wells amounted to 161,377 Mcf and our average natural gas price realized was \$2.18 per Mcf. Gross natural gas revenues for the nine months ended September 30, 2011 were \$607,939. During this 2011 period, the sales of natural gas from our wells amounted to 159,201 Mcf and our average natural gas price realized was \$3.82 per Mcf. Revenues decreased for the nine months ended September 30, 2012 as compared to the prior year period, despite a 1% increase in production volumes, due to a 43% decrease in natural gas prices.

Plant operating expenses for the nine months ended September 30, 2012 were \$967,187 as compared to \$1,903,206 for the nine months ended September 30, 2011. The decrease in plant operating expenses of \$936,019 or 49% was primarily attributable to the suspension of plant operations as a result of the temporary shut-in of the Madisonville Field. Since the Company planned for an extended shut down, it was able to significantly reduce expenses. When operations resume at the plant, expenses will increase from current levels.

Lease operating expenses for the nine months ended September 30, 2012 were \$165,402. Our net average lifting cost for this 2012 period was \$1.02 per Mcf. Lease operating expenses for the nine months ended September 30, 2011 were \$157,872. Our net average lifting cost for this 2011 period was \$0.99 per Mcf. The average lifting cost per Mcf in 2012 was slightly higher due to the payment of shut-in royalties in 2012, despite other reductions in our lease operating expenses.

General and administrative expenses ("G&A") for the nine months ended September 30, 2012 were \$1,405,590 as compared to \$1,607,473 for the nine months ended September 30, 2011. The decrease in G&A of \$201,883 or 13% was primarily attributable to reduced expenses for investor relations, professional fees and salaries due to a reduction in the number of employees.

Depreciation, depletion and amortization expense ("DD&A") for the nine months ended September 30, 2012 was \$349,029 as compared to \$283,124 for the nine months ended September 30, 2011. These amounts primarily represent amortization of the oil and gas properties. The 23% increase was primarily attributable to higher depreciation for the Madisonville treatment plant as a result of improvements made in 2011.

The loss from operations was \$3,156,782 for the nine months ended September 30, 2012 as compared to \$4,093,869 for the nine months ended September 30, 2011. The decrease in the comparable loss from operations was primarily attributable to lower plant operating expenses as a result of the temporary shut-in of the Madisonville Field and lower G&A costs.

Interest expense for the nine months ended September 30, 2012 was \$217,616 as compared to \$553,136 for the nine months ended September 30, 2011. The decrease in interest expense was primarily attributable to the retirement of the Bank of Oklahoma debt in September 2011.

Recent Developments

In March 2012, Stuart J. Doshi, President and CEO, advanced to the Company a loan in the amount of \$100,000. The note bears interest at 10% per annum and is payable on demand. In connection with the note, the Company agreed to issue 20,000 warrants to purchase our common stock. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years.

In March 2012, we completed a unit sale through a private placement transaction to an individual accredited investor. Units were priced at \$0.25 per unit, and each unit consisted of one share of no par value common stock, and a one-half common share purchase warrant. Each one whole warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years. The total aggregate purchase price for the units sold was \$250,000, and represented the sale of 1,000,000 common shares and 500,000 warrants. We agreed to grant "piggyback" registration rights to the investor with respect to the shares of common stock and common stock issuable upon exercise of the warrants which the investor acquired in the transaction.

In April 2012, the Company's wholly-owned subsidiary, Redwood Energy Production, L.P., elected to temporarily shut-in its natural gas production at the Madisonville Field, Madison County, Texas in light of currently depressed natural gas prices caused by the oversupply of natural gas and the abnormally warm winter weather which has reduced the demand for natural gas. We plan to resume our natural gas production from the Madisonville Field when natural gas prices recover from the recently depressed levels, thus providing a better economic return. We will monitor market conditions and bring our natural gas production back on stream as market conditions warrant.

In April 2012, Nick DeMare indicated that he will not stand for reelection at this year's Annual Meeting. Mr. DeMare did not reference any disagreement with the Company on any matter. Mr. DeMare indicated that he needed to resign in order to devote all of his attention to managing his own company and his other business interests.

In April 2012, in accordance with the provisions of the Company's Bylaws, the Board of Directors unanimously adopted a resolution to reduce the size of the Board of Directors from 6 to 5 directors, effective upon the expiration of the current directors' term of office.

In May 2012, the Company extended the maturities of five promissory notes totaling \$1,150,000 to January 2014 and two promissory notes totaling \$365,000 to May 2014. In connection with these extensions, the Company extended 151,500 warrants to purchase our common stock associated with the notes for an additional year and reduced the exercise price to purchase the common shares from \$1.00 to \$0.50 per share.

In May 2012, Stuart J. Doshi, President and CEO, advanced to the Company two loans totaling \$75,000. The notes bear interest at 10% per annum and are payable on demand. In connection with these notes, the Company agreed to issue 15,000 warrants to purchase our common stock. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years.

In June 2012, Stuart J. Doshi, President and CEO, advanced to the Company four loans totaling \$225,000. The notes bear interest at 10% per annum and are payable on demand. In connection with these notes, the Company agreed to issue 45,000 warrants to purchase our common stock. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years.

In June 2012, the Company's wholly owned subsidiary, GeoPetro Canada Ltd., acquired the remaining two-thirds (2/3) working interest in the Swan Hills Project, Central Alberta, Canada in exchange for an overriding royalty interest. Following the acquisition, the Company now owns 100% of the working interest in the Project.

On June 28, 2012, the Company received notice from NYSE MKT LLC (the "Exchange") indicating that the Company is not in compliance with one of the Exchange's continued listing standards. Specifically, the Exchange has notified the Company that it is not in compliance with Section 1003(a)(iv) of the Exchange's Company Guide in that the Exchange believes that the Company has sustained losses which are so substantial in relation to its overall operations or its existing financial resources, or its financial condition has become so impaired that it appears questionable, in the opinion of the Exchange, as to whether the Company will be able to continue operations and/or meet its obligations as they mature. In order to maintain the listing of the Company's common stock on the Exchange, the Company was required to submit a plan to the Exchange by July 30, 2012, addressing how the Company intended to regain compliance with Section 1003(a)(iv) by September 28, 2012 (the "Plan Period"). On July 30, 2012, the Company filed a plan with the Exchange as required. On August 27, 2012, the Exchange notified the Company that it had accepted the Company's plan of compliance and granted the Company an extension, until September 28, 2012, to regain compliance with the continued listing standards. On October 9, 2012, the Exchange notified the Company that the Exchange had determined that, in accordance with Section 1009 of the Company Guide, the Company had made a reasonable demonstration of its ability to regain compliance with Section 1003(a)(iv) of the Company Guide by the end of the revised plan period, which is now determined by the Exchange to be December 31, 2012. As a result, the Exchange is

continuing the Company's listing pursuant to this extension. The Company will be subject to periodic reviews by the Exchange during the extension period covered by the plan. Failure to make progress consistent with the plan or to regain compliance with continued listing standards by the end of the extension period could result in the Company being delisted from the Exchange.

In July 2012, Stuart J. Doshi, President and CEO, advanced to the Company two loans totaling \$75,000. The notes bear interest at 10% per annum and are payable on demand. In connection with these notes, the Company agreed to issue 15,000 warrants to purchase our common stock. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years.

In August 2012, the Company agreed to issue 45,000 warrants to purchase our common stock in exchange for certain consulting services, valued at \$2,986. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of four years.

In August 2012, the Company agreed to issue 225,000 shares of common stock to our independent directors. The shares were valued at \$0.14 per share and the aggregate value of the shares issued was \$31,500. We agreed to grant "piggyback" registration rights to the directors with respect to the shares of common stock.

In August 2012, the Company granted 675,000 stock options at an exercise price of \$0.16 per share. These options will vest ratably over five years pursuant to the terms of the 2004 Stock Option and Appreciation Rights Plan.

The Company has been notified that the operator of the Bengara II Production Sharing Contract ("PSC") has terminated negotiations with the Indonesian government for an extension of the PSC's terms. The PSC shall now be relinquished and allowed to expire in accordance with its terms. As a result, the Company has recorded an impairment charge of \$587,040 to its oil and gas properties.

Liquidity and Capital Resources

We had a working capital deficit of \$2,760,890 at September 30, 2012 versus \$2,059,100 at December 31, 2011. Our working capital deficit increased during nine months ended September 30, 2012 due primarily to losses incurred in connection with natural gas operations. Due to the current natural gas commodity price environment and the temporary shut-in of the Madisonville Field, the results of our natural gas operations amounted to a loss of \$3,156,782 for the nine months ended September 30, 2012.

Our cash balance at September 30, 2012 was \$242,455 as compared to \$916,741 at December 31, 2011. The change in our cash balance is summarized as follows:

Cash balance at December 31, 2011	\$916,741
Sources of cash:	
Cash provided by investing activities	265,936
Cash provided by financing activities	725,000
Total sources of cash including cash on hand	1,907,677
Uses of cash:	
Cash used in operating activities	(1,665,222)
Total uses of cash	(1,665,222)
Cash balance at September 30, 2012	\$ 242,455

Net cash used in operating activities of \$1,665,222 and \$3,289,049 for the nine months ended September 30, 2012 and 2011 respectively are attributable to our net income adjusted for non-cash charges as presented in the consolidated statements of cash flows and changes in working capital as discussed above.

We have historically financed our business activities principally through issuances of common shares, preferred shares, promissory notes and common share purchase warrants issued in private placements. These financings are summarized as follows:

	Nine Months Ended	
	September 30, 2012	September 30, 2011
Proceeds from sale of common shares	\$250,000	\$1,479,208
Proceeds from promissory notes	—	1,000,000
Repayments of promissory notes	—	(5,697,847)
Proceeds from related party notes	475,000	125,000
Repayments of related party notes	—	(125,000)

Net cash provided by (used in) financing activities	\$725,000	\$(3,218,639)
---	-----------	----------------

The net proceeds of our equity and note financings have been primarily used to satisfy working capital requirements and invest in oil and natural gas properties and the gas treatment plant. These investments totaled \$138,863 and \$1,167,854 for the nine months ended September 30, 2012 and 2011, respectively.

Our current cash and cash equivalents and anticipated cash flow from operations will not be sufficient to meet our working capital, and capital expenditure requirements for the foreseeable future. Additional financing is required to carry out our business plan. See "Outlook for 2012/2013 Capital" for a description of our expected capital expenditures for the remainder of 2012 and for 2013. If we are unable to generate revenues necessary to finance our operations over the long-term, we may have to seek additional capital through the sale of our equity or borrowing. We periodically borrow funds through the issuance of short and long term promissory notes to finance our activities.

We hold working interests and overriding royalty interests in undeveloped leases, seismic options, lease options and foreign concessions and we have participated in seismic surveys and the drilling of test wells on undeveloped properties. We plan further leasehold acquisitions for the remainder of 2012 and future periods. Exploratory and developmental drilling is scheduled during 2012 and future periods on our undeveloped properties. We are attempting to raise additional cash through the sale or farm out of certain of our unproved properties. We may also need to raise additional equity or enter into new borrowing arrangements to finance our operating deficit and our continued participation in planned activities. If additional financing is not available, we will be compelled to reduce the scope of our business activities. If we are unable to fund our operating cash flow needs and planned capital investments, it will be necessary to farm-out our interest in proposed wells, sell a portion of our interest in prospects, sell a portion of our interest in our producing oil and gas properties, sell all or a portion of our gas plant, reduce general and administrative expenses, or a combination of all of these factors. Further, we have debt service and lease obligations that will require cash payments.

As discussed in the "Outlook for 2012/2013 Capital", we are forecasting capital expenditures of \$10.7 million during the remainder of 2012 and in 2013. We will need to obtain adequate sources of cash to fund these anticipated capital expenditures, to fund ongoing operations and to follow through with our plans for continued investments in oil and gas properties. Our success, in part, depends on our ability to generate additional financing and/or farmout certain of our projects. Additionally, as a result of the current economic downturn, the Company may have difficulty raising sufficient funds to meet our projected funding requirements.

As a result of the Company's liquidity issues, it may be required to sell certain assets or raise capital with terms that may not be as favorable as might otherwise be available.

Contractual Obligations

We have assumed various contractual obligations and commitments in the normal course of our operations and financing activities. We have described these obligations and commitments in our "Management's Discussion and Analysis of Financial Condition and Results of Operations" section in our Annual Report on Form 10-K for the year ended December 31, 2011. There were no material changes to our contractual obligations since December 31, 2011 except items described in "Recent Developments".

Off Balance Sheet Arrangements

None.

Financial Instruments

We currently have no natural gas price financial instruments or hedges in place. Our natural gas marketing contracts use "spot" market prices. Given the uncertainty of the timing and volumes of our natural gas production this year, we do not currently plan to enter into any long term fixed-price natural gas contracts, swap or hedge positions, or other gas financial instruments in 2012.

Outlook for 2012/2013 Capital

Depending on capital availability, we are forecasting capital spending of up to approximately \$10,676,000 during the remainder of fiscal 2012 and 2013, allocated as follows:

1. Madisonville Project, Madison County, Texas - Approximately \$10,326,000 may be expended in the Madisonville Field area as follows: \$650,000 for the Mitchell well workover, \$1,445,000 towards the fracture stimulation and hook up costs of the Wilson well, \$4,000,000 for the expansion of the gas treatment plant and \$4,231,000 to drill and complete a new well.
2. California - Approximately \$200,000 to be utilized for land and permitting costs.
3. Canada - Approximately \$150,000 to be utilized for permitting costs.

We may, in our discretion, decide to allocate resources towards other projects in addition to or in lieu of, those listed above should other opportunities arise and as circumstances warrant. We currently do not have sufficient working capital to fund all of the capital expenditures listed above. We may, in our discretion, fund the foregoing planned expenditures from operating cash flows, asset sales, potential debt and equity issuances and/or a combination of all four. The Madisonville Project forecasted capital expenditures will play an important part in the Company achieving its 2012 and 2013 cash flow projections. See "Liquidity and Capital Resources."

We expect commodity prices to be volatile, reflecting the current supply and demand fundamentals for North American natural gas and world crude oil. Political and economic events around the world, which are difficult to predict, will continue to influence both oil and gas prices. Significant price changes for oil and gas often lead to changes in the levels of drilling activity which in turn lead to changes in costs to explore, develop and acquire oil and gas reserves. Significant change in costs could affect the returns on our capital expenditures.

Impact of Inflation & Changing Prices

We are highly dependent upon natural gas pricing. A material decrease in current and projected natural gas prices could impair our ability to raise additional capital on acceptable terms. Likewise, a material decrease in current and projected natural gas prices could also impact our revenues and cash flows. This could impact our ability to fund future activities.

Changing prices have had a significant impact on costs of drilling and completing wells, particularly in the Madisonville Field area where we are currently the most active. The estimated cost of drilling and completing a Rodessa formation well at approximately 12,300 feet of depth has increased from \$3.0 million in 2001 to \$4.2 million in 2012 due to higher costs associated with tubular goods, well equipment, and day rates for drilling contracts, among other factors. These higher costs have impacted and will continue to impact our income from operations in the form of higher depletion expense.

Critical Accounting Estimates

Our consolidated financial statements have been prepared by management in accordance with U.S. GAAP. We refer you to the corresponding section in Part II, Item 7 and the notes to the consolidated financial statements of our Annual Report on Form 10-K for the year ended December 31, 2011 for the description of critical accounting policies and estimates.

Risks and Uncertainties

There are a number of risks that face participants in the U.S., Canadian and international oil and natural gas industry, including a number of risks that face us in particular. Accordingly, there are risks involved in an ownership of our securities. See "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2011 for a description of the principal risks faced by us.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risks arising from fluctuating prices of crude oil, natural gas and interest rates as discussed below.

Commodity Risk. Our major commodity price risk exposure is to the prices received for our natural gas production. Realized commodity prices received for our production are the spot prices applicable to natural gas in the East Texas region. Prices received for natural gas are volatile and unpredictable and are beyond our control.

Currency Translation Risk. Because our revenues and expenses are primarily in U.S. dollars, we have little exposure to currency translation risk, and, therefore, we have no plans in the foreseeable future to implement hedges or financial instruments to manage international currency changes.

Interest Rate Risk. Interest rates on future debt offerings could be higher than current levels, causing our financing costs to increase accordingly. We do not currently utilize hedging contracts to protect against interest rate risk.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our President, Chief Executive Officer and Chairman and our Principal Accounting Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of September 30, 2012. Based on this evaluation, we have concluded that, as of September 30, 2012, our disclosure controls and procedures were effective, in that they ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is (1) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) accumulated and communicated to our management, including our President and Chief Executive Officer and Principal Accounting Officer, as appropriate to allow timely decisions regarding required disclosure.

During the most recent fiscal quarter, there have been no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we are party to litigation or other legal and administrative proceedings that we consider to be a part of the ordinary course of our business. Currently, we are not involved in any legal proceedings nor are we party to any pending or threatened claims that could, individually or in the aggregate, reasonably be expected to have a material adverse effect on our financial condition, cash flow or results of operations.

Item 1A. Risk Factors

As of the date of this filing, there have been no material changes from the risk factors previously disclosed in our "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2011, referred to as our 2011 Annual Report. An investment in our securities involves various risks. When considering an investment in our company, you should consider carefully all of the risk factors described in our 2011 Annual Report. These risks and uncertainties are not the only ones facing us and there may be additional matters that we are unaware of or that we currently consider immaterial.

Item 2. Unregistered Sales of Securities and Use of Proceeds

Unregistered Sales of Securities

In March 2012, Stuart J. Doshi, President and CEO, advanced to the Company a loan in the amount of \$100,000. In connection with the note, the Company agreed to issue 20,000 warrants to purchase our common stock. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years.

In March 2012, we completed a unit sale through a private placement transaction to an individual accredited investor. Units were priced at \$0.25 per unit, and each unit consisted of one share of no par value common stock, and a one-half common share purchase warrant. Each one whole warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years. The total aggregate purchase price for the units sold was \$250,000, and represented the sale of 1,000,000 common shares and 500,000 warrants. We agreed to grant "piggyback" registration rights to the investor with respect to the shares of common stock and common stock issuable upon exercise of the warrants which the investor acquired in the transaction.

In May 2012, Stuart J. Doshi, President and CEO, advanced to the Company two loans totaling \$75,000. In connection with these notes, the Company agreed to issue 15,000 warrants to purchase our common stock. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years.

In June 2012, Stuart J. Doshi, President and CEO, advanced to the Company four loans totaling \$225,000. In connection with these notes, the Company agreed to issue 45,000 warrants to purchase our common stock. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years.

In July 2012, Stuart J. Doshi, President and CEO, advanced to the Company two loans totaling \$75,000. In connection with these notes, the Company agreed to issue 15,000 warrants to purchase our common stock. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of three years.

In August 2012, the Company agreed to issue 45,000 warrants to purchase our common stock. Each warrant entitles the holder to acquire one common share at a price of \$0.50 for a period of four years.

In August 2012, the Company agreed to issue 225,000 shares of common stock to our independent directors. The shares were valued at \$0.14 per share and the aggregate value of the shares issued was \$31,500. We agreed to grant "piggyback" registration rights to the directors with respect to the shares of common stock.

In August 2012, the Company granted 675,000 stock options at an exercise price of \$0.16 per share. These options will vest ratably over five years pursuant to the terms of the 2004 Stock Option and Appreciation Rights Plan.

GeoPetro issued the aforementioned common shares and warrants in reliance on the exemption from registration provided for under Section 4(2) of the Securities Act of 1933, as amended (the "Securities Act"), and Rule 506 of Regulation D thereunder. GeoPetro relied on the exemption from registration provided for under Section 4(2) of the Securities Act based in part on the representations made by the purchasers, including the representations with respect to each purchaser's status as an accredited investor, as such term is defined in Rule 501(a) of the Securities Act, and each purchaser's investment intent with respect to the securities purchased. In addition, the Securities, which were taken for investment purposes and not for resale, were subject to restrictions on transfer. We did not engage in any public advertising or general solicitation in connection with this transaction, and we provided the investors with disclosure of all material aspects of our business, including providing the investor with our reports filed with the Securities and Exchange Commission and other financial, business and corporate information. Based on our investigation, we believed that the accredited investors obtained all information regarding the Company that they requested, received answers to all questions posed and otherwise understood the risks of accepting our Securities for investment purposes.

Use of Proceeds

Proceeds realized will be spent in the following order of priority by the Company:

- 1) Debt Service
- 2) General Working Capital
- 3) Madisonville Project, Madison County
- 4) California Project

We do not know if, or how many, of the warrants or options will be exercised. This is our best estimate of our use of proceeds generated from the possible exercise of warrants or options based on the current state of our business operations, our current plans and current economic and industry conditions. Any changes in the projected use of proceeds will be made at the sole discretion of our board of directors.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

Not applicable

Item 6. Exhibits

EXHIBIT INDEX

Exhibit
Number

- 31.1 (1) Rule 13a-14(a)/15d-14(a) Certification of Chief Executive Officer.
- 31.2 (1) Rule 13a-14(a)/15d-14(a) Certification of Principal Accounting Officer.
- 32.1 (1) Certification of Chief Executive Officer and Principal Accounting Officer of GeoPetro Resources Company pursuant to 18 U.S.C. § 1350.
- 101 (1) The following materials from the GeoPetro Resources Company Form 10-Q for the quarter ended September 30, 2012 formatted in Extensible Business Reporting Language (XBRL): (i) the Condensed Consolidated Statements of Operations, (ii) the Condensed Consolidated Balance Sheets, (iii) Condensed Consolidated Statements of Cash Flows and (iv) related notes, tagged as blocks of text.
- (1) Furnished herewith
