ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the fiscal year ended December 31, 2014

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____

Commission file number 1-12386

LEXINGTON REALTY TRUST

(Exact name of registrant as specified in its charter)

Maryland

13-3717318

(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

One Penn Plaza, Suite 4015

New York, NY

10119-4015

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code: (212) 692-7200

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
---------------------	---

Shares of beneficial interest, par value \$0.0001 per share, classified as Common Stock	New York Stock Exchange
---	-------------------------

6.50% Series C Cumulative Convertible Preferred Stock, par value \$0.0001 per share	New York Stock Exchange
---	-------------------------

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No .

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K .

Edgar Filing: LEXINGTON REALTY TRUST - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of “large accelerated filer”, “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer (Do not check if a smaller reporting company)
Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No .

The aggregate market value of the shares of beneficial interest, par value \$0.0001 per share, classified as common stock (“common shares”) of the registrant held by non-affiliates as of June 30, 2014, which was the last business day of the registrant's most recently completed second fiscal quarter, was \$2,488,377,620 based on the closing price of the common shares on the New York Stock Exchange as of that date, which was \$11.01 per share.

Number of common shares outstanding as of February 23, 2015 was 234,819,421.

DOCUMENTS INCORPORATED BY REFERENCE

Certain information contained in the Definitive Proxy Statement for registrant's Annual Meeting of Shareholders, to be held on May 19, 2015, is incorporated by reference in this Annual Report on Form 10-K in response to Part III, Items 10, 11, 12, 13 and 14, which will be filed with the Securities and Exchange Commission not later than 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K.

PART I.

Introduction

When we use the terms “Lexington,” the “Company,” “we,” “us” and “our,” we mean Lexington Realty Trust and all entities owned by us, including non-consolidated entities, except where it is clear that the term means only the parent company or only the parent company and consolidated entities. All interests in properties are held through special purpose entities, which we refer to as property owner subsidiaries or lender subsidiaries, which are separate and distinct legal entities, but in some instances are consolidated for financial statement purposes and/or disregarded for income tax purposes. Assets and credit of a property owner subsidiary or lender subsidiary are not available to satisfy the debt and other obligations of any other person, including any other property owner subsidiary or lender subsidiary or any other affiliate.

References herein to this Annual Report are to this Annual Report on Form 10-K for the fiscal year ended December 31, 2014. When we use the term “REIT” we mean real estate investment trust. All references to 2014, 2013 and 2012 refer to our fiscal years ended, or the dates, as the context requires, December 31, 2014, December 31, 2013 and December 31, 2012, respectively.

Management of our interests in properties is generally conducted through Lexington Realty Advisors, Inc., a taxable REIT subsidiary, which we refer to as LRA, or through a property management joint venture subsidiary.

When we use the term “GAAP” we mean United States generally accepted accounting principles.

Cautionary Statements Concerning Forward-Looking Statements

This Annual Report, together with other statements and information publicly disseminated by us contain certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and include this statement for purposes of complying with these safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe our future plans, strategies and expectations, are generally identifiable by use of the words “believes,” “expects,” “intends,” “anticipates,” “estimates,” “projects,” “may,” “plans,” “predicts,” “will,” “will likely result” or similar expressions. Readers should not rely on forward-looking statements since they involve known and unknown risks, uncertainties and other factors which are, in some cases, beyond our control and which could materially affect actual results, performances or achievements. In particular, among the factors that could cause actual results, performances or achievements to differ materially from current expectations, strategies or plans include, among others, those risks discussed below under “Risk Factors” in Part I, Item 1A of this Annual Report and “Management's Discussion and Analysis of Financial Condition and Results of Operations” in Part II, Item 7 of this Annual Report. Except as required by law, we undertake no obligation to publicly release the results of any revisions to these forward-looking statements which may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Accordingly, there is no assurance that our expectations will be realized.

Item 1. Business

General

We are a Maryland REIT that owns a diversified portfolio of equity and debt investments in single-tenant properties and land. A majority of these properties and all land interests are subject to net or similar leases, where the tenant bears all or substantially all of the costs, including cost increases, for real estate taxes, utilities, insurance and ordinary repairs. We also provide investment advisory and asset management services to investors in the single-tenant area. As of December 31, 2014, we had equity ownership interests in approximately 215 consolidated real estate properties, located in 40 states and containing an aggregate of approximately 39.9 million square feet of space, approximately 96.4% of which was leased. In 2014, 2013 and 2012, no tenant/guarantor represented greater than 10% of our annual

base rental revenue.

In addition to our shares of beneficial interest, par value \$0.0001 per share, classified as common stock, which we refer to as common shares, as of December 31, 2014, we had one outstanding class of beneficial interest classified as preferred stock, or preferred shares, our 6.50% Series C Cumulative Convertible Preferred Stock, par value \$0.0001 per share, or our Series C Preferred Shares. Our common shares and Series C Preferred Shares are traded on the New York Stock Exchange, or NYSE, under the symbols "LXP" and "LXPPRC", respectively.

We elected to be taxed as a REIT under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended, which we refer to as the Code, commencing with our taxable year ended December 31, 1993. We intend to continue to qualify as a REIT. If we qualify for taxation as a REIT, we generally will not be subject to federal corporate income taxes on our net taxable income that is currently distributed to our common shareholders.

Table of Contents

History

Our predecessor, Lexington Corporate Properties, Inc., was organized in the state of Delaware in October 1993 upon the combination of two investment programs, Lepercq Corporate Income Fund L.P., which we refer to as LCIF, and Lepercq Corporate Income Fund II L.P., which we refer to as LCIF II, which were formed to acquire net-lease real estate assets providing current income. Our predecessor was merged into Lexington Corporate Properties Trust, a Maryland statutory REIT, on December 31, 1997. On December 31, 2006, Lexington Corporate Properties Trust changed its name to Lexington Realty Trust and was the successor in a merger with Newkirk Realty Trust, or Newkirk, which we refer to as the Newkirk Merger. All of Newkirk's operations were conducted, and all of its assets were held, through its master limited partnership, subsequently named The Lexington Master Limited Partnership, which we refer to as the MLP. As of December 31, 2008, the MLP was merged with and into us.

We are structured as an umbrella partnership REIT, or UPREIT, as a portion of our business has been conducted through our operating partnership subsidiaries: (1) LCIF and (2) LCIF II. We refer to these subsidiaries as our operating partnerships and to limited partner interests in these operating partnerships as OP units. On December 30, 2013, LCIF II was merged with and into LCIF, with LCIF as the surviving entity. We are party to a funding agreement with LCIF under which we may be required to fund distributions made on account of OP units. The UPREIT structure enables us to acquire properties through an operating partnership by issuing OP units to a seller of property, as a form of consideration in exchange for the property. The outstanding OP units not held by us are generally redeemable for our common shares on a one OP unit for approximately 1.13 common shares basis, or, at our election in certain instances, cash. We believe that this structure facilitates our ability to raise capital and to acquire portfolio and individual properties by enabling us to structure transactions which may defer taxable gains for a contributor of property. As of December 31, 2014, there were approximately 3.4 million OP units outstanding, other than OP units held by us, which were convertible into approximately 3.9 million common shares, assuming we satisfied redemptions entirely with common shares.

Investment and Strategy

General. Our current business strategy is focused on enhancing our cash flow growth and stability, growing our portfolio with attractive long-term leased investments, reducing lease rollover risk and maintaining a strong and flexible balance sheet to allow us to act on opportunities as they arise. Our core assets consist of general purpose, single-tenant net-leased office and industrial assets and land investments subject to long-term leases, in well-located and growing markets or which are critical to the tenant's business, but may also include other asset types subject to long-term net-leases, such as retail facilities, schools and medical facilities. We attempt to manage residual value risk associated with such other asset types by acquiring such assets primarily through joint ventures or disposing of such assets when there is sufficient remaining lease term to generate favorable sale prices or by making loan investments secured by such assets at a loan-to-value ratio where we would be comfortable holding an equity interest. We believe our strategy of investing in core assets will provide shareholders with dividend growth and capital appreciation. We implement our strategy by (1) recycling capital in compliance with regulatory and contractual requirements, (2) refinancing or repurchasing outstanding indebtedness when advisable, including refinancing secured debt with unsecured debt, (3) effecting strategic transactions, portfolio and individual property acquisitions and dispositions, (4) expanding existing properties, (5) executing new leases with tenants, (6) extending lease maturities in advance of or at expiration and (7) exploring new business lines and operating platforms. Additionally, we may continue to enter into joint ventures and co-investment programs with third-party investors as a means of mitigating risk, creating additional growth and expanding the revenue realized from advisory and asset management activities as situations warrant.

Portfolio diversification is central to our investment strategy as we seek to create and maintain an asset base that provides steady, predictable and growing cash flows while being insulated against rising property operating expenses, regional recessions, industry-specific downturns and fluctuations in property values and market rent levels. Regardless of capital market and economic conditions, we intend to stay focused on (1) enhancing operating results, (2) improving portfolio quality and reducing risks associated with lease rollover, (3) mitigating risks relating to interest rates and real estate cycles and (4) implementing strategies where our management skills and real estate expertise can

add value. We attempt to maintain a portfolio of properties that provide for income and capital appreciation. The proportion of total return generated from rental income versus capital appreciation will vary by asset type, lease term, contractual rental escalations and market location. We believe that our business strategy will continue to improve our liquidity and strengthen our overall balance sheet while creating meaningful shareholder value.

We intend to maintain a strong balance sheet primarily by (1) financing property acquisitions with non-recourse mortgage debt or unsecured corporate level borrowings at what we believe are favorable rates, (2) issuing equity when market conditions are favorable, (3) selling non-core and underperforming assets and (4) extending debt maturities and refinancing debt at lower rates.

Table of Contents

Investments. When opportunities arise, we intend to continue to make investments in single-tenant assets that we believe will generate favorable returns. We seek to grow our portfolio primarily by (1) engaging in, or providing funds to developers who are engaged in, build-to-suit projects for single-tenant corporate users, (2) providing capital to corporations by buying properties and leasing them back to the sellers under net or similar leases, (3) acquiring properties already subject to net or similar leases and (4) making mortgage and mezzanine loans generally secured by single-tenant properties subject to net or similar leases.

Our management has established a broad network of contacts to source investments, including major corporate tenants, developers and brokers. We believe that our geographical diversification and acquisition experience will allow us to continue to compete effectively for such investments.

Prior to effecting any investment, our underwriting includes analyzing the (1) property's design, construction quality, efficiency, functionality and location with respect to the immediate sub-market, city and region, (2) lease integrity with respect to term, rental rate increases, corporate guarantees and property maintenance provisions, (3) present and anticipated conditions in the local real estate market and (4) prospects for selling or re-leasing the property on favorable terms in the event of a vacancy. To the extent of information publicly available or made available to us, we also evaluate each potential tenant's financial strength, growth prospects, competitive position within its respective industry and a property's strategic location and function within a tenant's operations or distribution systems. We believe that our comprehensive underwriting process is critical to the assessment of long-term profitability of any investment by us.

Strategic Transactions with Other Real Estate Investment Companies. We seek to capitalize on the unique investment experience of our management team as well as their network of relationships in the industry to achieve appropriate risk-adjusted yields through strategic transactions. Accordingly, we occasionally pursue the (1) acquisition of portfolios of assets and equity interests in companies with a significant number of single-tenant assets, including through mergers and acquisitions activity, and (2) participation in strategic partnerships, co-investment programs and joint ventures.

We believe that entering into co-investment programs and joint ventures with institutional investors and other real estate investment companies may mitigate our risk in certain assets and increase our return on equity to the extent we earn management or other fees. However, investments in co-investment programs and joint ventures limit our ability to make unilateral investment decisions relating to the assets and limit our ability to deploy capital.

Competition

There are numerous commercial developers, real estate companies, financial institutions, such as banks and insurance companies, and other investors with greater financial or other resources that compete with us in seeking properties for acquisition and tenants who will lease space in these properties. Our competitors include other REITs, pension funds, banks, private companies and individuals.

Internal Growth and Effectively Managing Assets

Tenant Relations and Lease Compliance. We endeavor to maintain close contact with the tenants in the properties in which we have an interest in order to understand their financial strength and future real estate needs. We monitor the financial, property maintenance and other lease obligations of the tenants in properties in which we have an interest, through a variety of means, including periodic reviews of financial statements that we have access to and physical inspections of the properties.

Extending Lease Maturities. Our property owner subsidiaries seek to extend tenant leases in advance of the lease expiration in order for us to maintain a balanced lease rollover schedule and high occupancy levels.

Revenue Enhancing Property Expansions. Our property owner subsidiaries undertake expansions of properties based on lease requirements, tenant requirements or marketing opportunities. We believe that selective property expansions can provide attractive rates of return.

Capital Recycling. Subject to regulatory and contractual requirements, we generally sell our interests in properties when we believe that the return realized from selling a property will exceed the expected return from continuing to hold such property and/or there is a better use of the capital to be received upon sale. We also focus our disposition efforts on non-core assets such as vacant, multi-tenant, retail and short-term leased assets.

Occasionally, we provide seller financing as a means of efficiently disposing of an asset. As a result, if a buyer defaults under the seller financing, we will once again be the owner of the underlying asset.

Conversion to Multi-Tenant. If one of our property owner subsidiaries is unable to renew a single-tenant lease or if it is unable to find a replacement single tenant, we either attempt to sell our interest in the property or the property owner subsidiary may seek to market the property for multi-tenant use. When appropriate, we seek to sell our interests in these multi-tenant properties.

Table of Contents

Property Management. From time to time, our property owner subsidiaries use property managers to manage certain properties. Our property management joint venture with an unaffiliated third party manages substantially all of these properties. We believe this joint venture provides us with (1) better management of our assets, (2) better tenant relationships, (3) revenue-enhancing opportunities and (4) cost efficiencies.

Financing Strategy

General. Since becoming a public company, our principal sources of financing have been the public and private equity and debt markets, property specific debt, revolving loans, corporate level term loans, issuance of OP units and undistributed cash flows.

Property Specific Debt. Our property owner subsidiaries seek non-recourse secured debt on a limited basis including when credit tenant lease financing is available. Credit tenant lease financing allows us to significantly or fully leverage the rental stream from an investment at, what we believe are, attractive rates.

Corporate Level Borrowings. We also use corporate level borrowings, such as revolving loans, term loans, and debt offerings. We expect to finance more of our operations with such corporate level borrowings as (1) non-recourse secured debt matures and (2) such corporate level borrowings are available on favorable terms.

Balance Sheet Management. In recent years, we have reduced our weighted-average interest rate through the retirement of higher rate non-recourse mortgage debt with proceeds from recourse corporate level borrowings. Our objective is to continually strengthen our balance sheet to provide financial flexibility.

Common Share Issuances

From time to time, we raise capital by issuing common shares through (1) our At-The-Market, or ATM, offering program, initiated in 2013, (2) underwritten public offerings, (3) block trades and (4) our direct share purchase plan. The proceeds from our common share offerings are generally used for working capital, including to fund investments and to retire indebtedness.

Preferred Share Repurchases

We have made, and may continue to make, repurchases of our preferred shares in individual transactions when we believe the discount to the liquidation preference is attractive.

Advisory Contracts

Certain members of our management have been in the business of investing in single-tenant net-lease properties since 1973. This experience has enabled us to provide advisory services to various net-lease investors, including institutional investors and high net-worth individuals. With the termination of certain of our co-investment programs in 2007 and our acquisition of Net Lease Strategic Assets Fund L.P., or NLS, in 2012, advisory fees have declined in recent years. If and when we increase our co-investment joint venture activity, we expect advisory fees to increase. In 2012, LRA entered into an agreement to arrange for up to \$100.0 million of investments on behalf of a third-party investor. Under the agreement, we will be a co-investor with a target to contribute 15% to each venture. We granted the third-party investor an exclusivity, until May 2015 and subject to certain conditions, on investment opportunities for (1) properties with a lease due to expire in less than 10 years, and (2) properties that are dedicated to non-office and non-warehouse/distribution uses, including properties with tenants in the medical, hospital and health care industries.

Environmental Matters

Under various federal, state and local environmental laws, statutes, ordinances, rules and regulations, an owner of real property may be liable for the costs of removal or remediation of certain hazardous or toxic substances at, on, in or under such property as well as certain other potential costs relating to hazardous or toxic substances. These liabilities may include government fines and penalties and damages for injuries to persons and adjacent property. Such laws often impose liability without regard to whether the owner knew of, or was responsible for, the presence or disposal of such substances. Although generally the tenants of the properties in which we have an interest are primarily responsible for any environmental damage and claims related to the leased premises, in the event of the bankruptcy or inability of a tenant of such premises to satisfy any obligations with respect to such environmental liability, a property owner subsidiary may be required to satisfy such obligations. In addition, as the owner of such properties, a property

owner subsidiary may be held directly liable for any such damages or claims irrespective of the provisions of any lease.

6

Table of Contents

From time to time, in connection with the conduct of our business and generally upon acquisition of a property and prior to surrender by a tenant, the property owner subsidiary authorizes the preparation of a Phase I and, when recommended, a Phase II environmental report with respect to its properties. Based upon such environmental reports and our ongoing review of the properties in which we have an interest, as of the date of this Annual Report, we are not aware of any environmental condition with respect to any of the properties in which we have an interest which we believe would be reasonably likely to have a material adverse effect on our financial condition and/or results of operations. There can be no assurance, however, that (1) the discovery of environmental conditions, the existence or severity of which were previously unknown, (2) changes in law, (3) the conduct of tenants or (4) activities relating to properties in the vicinity of the properties in which we have an interest, will not expose us to material liability in the future. Changes in laws increasing the potential liability for environmental conditions existing on properties or increasing the restrictions on discharges or other conditions may result in significant unanticipated expenditures or may otherwise adversely affect the operations of the tenants of properties in which we have an interest, which would adversely affect our financial condition and/or results of operations.

Summary of 2014 Transactions and Recent Developments

The following summarizes certain of our transactions during 2014, including transactions disclosed elsewhere and in our other periodic reports.

Acquisitions/Investments. With respect to acquisitions/investments, we:

purchased six properties for an aggregate cost of \$122.3 million;

completed three build-to-suit transactions for an aggregate capitalized cost of \$90.0 million;

formed a joint venture, in which we currently hold a 25% interest, which is constructing a private school in Houston, Texas for a maximum commitment of \$86.5 million, which, upon completion, will be subject to a 20-year net lease;

continue to fund four ongoing build-to-suit transactions not yet completed at December 31, 2014 with an aggregate estimated cost of \$309.2 million of which \$109.4 million was invested as of December 31, 2014; and

entered into forward commitments to acquire a build-to-suit industrial property in Richland, Washington for an estimated cost of \$155.0 million and a build-to-suit office property in Auburn Hills, Michigan for \$40.0 million, which will be subject to 20-year and 14-year net leases, respectively.

Capital Recycling. With respect to capital recycling activity, we:

disposed of our interests in properties to unaffiliated third parties for an aggregate gross disposition price of \$272.4 million;

conveyed in foreclosure a property for full satisfaction of the related \$9.9 million non-recourse mortgage; and received an aggregate \$43.1 million for the payoff of the Homestead, Florida and Norwalk, Connecticut loan investments.

Leasing. Our property owner subsidiaries entered into 59 new leases and lease extensions encompassing an aggregate 5.1 million square feet, ending the year with our overall portfolio leased at 96.4% as of December 31, 2014.

Financing. With respect to financing activities, we:

issued \$250.0 million aggregate principal amount of 4.40% Senior Notes due 2024, or 4.40% Senior Notes, which are unsecured;

converted \$12.8 million aggregate original principal amount of 6.00% Convertible Guaranteed Notes due 2030, or 6.00% Convertible Notes, for approximately 1.9 million common shares and aggregate cash payments of \$0.2 million plus accrued and unpaid interest;

borrowed \$99.0 million under our term loan maturing in 2018 and entered into an interest rate swap agreement fixing the LIBOR component of the borrowing at 1.155%;

retired \$242.3 million in property non-recourse mortgage debt with a weighted-average interest rate of 5.4%;

Table of Contents

obtained \$27.8 million in non-recourse mortgage financing with a fixed interest rate of 2.21%; and repaid all borrowings under our line of credit.

Subsequent to December 31, 2014, we:

acquired a 360 acre golf course in Venice, Florida for \$16.9 million, which is net leased for a 40-year term;

entered into a forward commitment to acquire a build-to-suit industrial property in Detroit, Michigan for approximately \$29.7 million, which will be subject to a 20-year net lease; and

obtained a 10-year, 4.1% interest-only \$29.2 million non-recourse mortgage secured by a land parcel owned in New York, New York.

Other

Employees. As of December 31, 2014, we had 48 full-time employees. Lexington Realty Trust is a master employer and employee costs are allocated to subsidiaries as applicable.

Industry Segments. We primarily operate in one industry segment, single-tenant real estate assets.

Web Site. Our Internet address is www.lxp.com. We make available, free of charge, on or through the Investors section of our web site or by contacting our Investor Relations Department, our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as well as proxy statements, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission, or SEC. Also posted on our web site, and available in print upon request of any shareholder to our Investor Relations Department, are our declaration of trust and amended and restated by-laws, charters for the Audit Committee, Compensation Committee and Nominating and Corporate Governance Committee of our Board of Trustees, our Corporate Governance Guidelines, and our Code of Business Conduct and Ethics governing our trustees, officers and employees (which contains our whistle blower procedures). Within the time period required by the SEC and the NYSE, we will post on our web site any amendment to the Code of Business Conduct and Ethics and any waiver applicable to any of our trustees or executive officers. In addition, our web site includes information concerning purchases and sales of our equity securities by our executive officers and trustees as well as disclosure relating to certain non-GAAP financial measures (as defined in the SEC's Regulation G) that we may make public orally, telephonically, by webcast, by broadcast or by similar means from time to time. Information contained on our web site or the web site of any other person is not incorporated by reference into this Annual Report or any of our other filings or furnishings with the SEC.

Our Investor Relations Department can be contacted at Lexington Realty Trust, One Penn Plaza, Suite 4015, New York, New York 10119-4015, Attn: Investor Relations, by telephone: (212) 692-7200, or by e-mail: ir@lxp.com.

Principal Executive Offices. Our principal executive offices are located at One Penn Plaza, Suite 4015, New York, New York 10119-4015; our telephone number is (212) 692-7200.

NYSE CEO Certification. Our Chief Executive Officer made an unqualified certification to the NYSE with respect to our compliance with the NYSE corporate governance listing standards in 2014.

Table of Contents

Item 1A. Risk Factors

Set forth below are material factors that may adversely affect our business and operations.

Risks Related to Our Business

We are subject to risks involved in single-tenant leases.

We focus our acquisition activities on real estate properties that are net leased to single tenants. Therefore, the financial failure of, or other default by, a single tenant under its lease is likely to cause a significant or complete reduction in the operating cash flow generated by the property leased to that tenant and might decrease the value of that property and result in a non-cash impairment charge. In addition, our property owner subsidiary will be responsible for 100% of the operating costs following a vacancy at a single-tenant building.

We rely on revenues derived from major tenants.

Revenues from several tenants and/or their guarantors constitute a significant percentage of our base rental revenues. The default, financial distress or bankruptcy of any of the tenants and/or guarantors of these properties could cause interruptions in the receipt of lease revenues and/or result in vacancies, which would reduce the property owner subsidiary's revenues and increase operating costs until the affected property is re-let, and could decrease the ultimate sale value of that property. Upon the expiration or other termination of the leases that are currently in place with respect to these properties, the property owner subsidiary may not be able to re-lease the vacant property at a comparable lease rate, at all, or without incurring additional expenditures in connection with the re-leasing. Under current bankruptcy law, a tenant can generally assume or reject a lease within a certain number of days of filing its bankruptcy petition. If a tenant rejects the lease, a landlord's damages, subject to availability of funds from the bankruptcy estate, are generally limited to the greater of (1) one year's rent and (2) the rent for 15% of the remaining term of the lease not to exceed three years rent.

You should not rely on the credit ratings of our tenants.

Some of our tenants, guarantors and/or their parent entities are rated by certain rating agencies. Any such credit ratings are subject to ongoing evaluation by these credit rating agencies and we cannot assure you that any such ratings will not be changed or withdrawn by these rating agencies in the future if, in their judgment, circumstances warrant. If these rating agencies assign a lower-than-expected rating or reduce or withdraw, or indicate that they may reduce or withdraw the credit rating of a tenant, guarantor or its parent entity, the value of our investment in any properties leased by such tenant could significantly decline.

Our assets may be subject to impairment charges.

We periodically evaluate our real estate investments and other assets for impairment indicators. The judgment regarding the existence of impairment indicators is based on GAAP, which include a variety of factors such as market conditions, the status of significant leases, the financial condition of major tenants and other factors that could affect the cash flow or value of an investment. During 2014, 2013 and 2012, we incurred \$48.6 million, \$34.6 million and \$10.0 million, respectively, of non-cash impairment charges, excluding loan losses recorded on loans receivable. We may continue to take similar non-cash impairment charges, which could affect the implementation of our current business strategy. These impairments could have a material adverse effect on our financial condition and results of operations.

Furthermore, we may take an impairment charge on a property subject to a non-recourse secured mortgage which reduces the book value of such property to its fair value, which may be below the balance of the mortgage on our balance sheet. Upon foreclosure or other disposition, we may be required to recognize a gain on debt satisfaction equal to the difference between the fair value of the property and the balance of the mortgage.

If a sale-leaseback transaction is re-characterized in a tenant's bankruptcy proceeding, our financial condition could be adversely affected.

We have entered and may continue to enter into sale-leaseback transactions, whereby we would purchase a property and then lease the same property back to the person from whom we purchased it. In the event of the bankruptcy of a tenant, a transaction structured as a sale-leaseback may be re-characterized as either a financing or a joint venture, either of which outcomes could adversely affect our financial condition, cash flow and the amount available for distributions to our shareholders.

Table of Contents

If the sale-leaseback were re-characterized as a financing, we might not be considered the owner of the property, and as a result would have the status of a creditor in relation to the tenant. In that event, we would no longer have the right to sell or encumber our ownership interest in the property. Instead, we would have a claim against the tenant for the amounts owed under the lease, with the claim arguably secured by the property. The tenant/debtor might have the ability to propose a plan restructuring the term, interest rate and amortization schedule of its outstanding balance. If confirmed by the bankruptcy court, we could be bound by the new terms and prevented from foreclosing our lien on the property. If the sale-leaseback were re-characterized as a joint venture, our tenant and we could be treated as co-venturers with regard to the property. As a result, we could be held liable, under some circumstances, for debts incurred by the tenant relating to the property.

Certain of our leases may not result in fair market lease rates over time, which could negatively impact our income and reduce the amount of funds available to make distributions to shareholders.

A significant portion of our rental income comes from long-term net leases, which generally provide the tenant greater discretion in using the leased property than ordinary property leases, such as the right to freely sublease the property, to make alterations in the leased premises and to terminate the lease prior to its expiration under specified circumstances. Furthermore, net leases typically have longer lease terms and, thus, there is an increased risk that contractual rental increases in future years will fail to result in fair market rental rates during those years. If we do not accurately judge the potential for increases in market rental rates when negotiating these long-term leases, significant increases in future property operating costs, to the extent not covered under the net leases could result in us receiving less than fair value from these leases. As a result, our income and distributions to our shareholders could be lower than they would otherwise be if we did not engage in long-term net leases.

Our interests in loans receivable are subject to delinquency, foreclosure and loss.

Our interests in loans receivable are generally non-recourse and secured by real estate properties owned by borrowers that were unable to obtain similar financing from a commercial bank. These loans are subject to many risks including delinquency. The ability of a borrower to repay a loan secured by a real estate property is typically and primarily dependent upon the successful operation of such property rather than upon the existence of independent income or assets of the borrower. If a borrower were to default on a loan, it is possible that we would not recover the full value of the loan as the collateral may be non-performing.

In 2014, we initiated foreclosure proceedings against the borrowers of a loan secured by an office property in Westmont, Illinois. We sold this property in 2007 but issued a purchase mortgage to the buyer. Effective November 2013, the tenant of the property terminated its lease. In 2013, we reduced our carrying value to an estimated fair value of \$12.6 million and recorded a loan loss of \$13.9 million. In 2014, we recorded a \$2.5 million loan loss on a loan secured by an office property in Southfield, Michigan, reducing our carrying value to \$3.3 million, as the borrower has indicated that it will not satisfy the loan at maturity.

In 2013, we foreclosed on one of our loans receivable, which was secured by an office property in Schaumburg, Illinois. The loan had an outstanding balance of \$21.6 million (not including default interest and other penalties), which we believe was less than the then estimated fair value of the property.

We face uncertainties relating to lease renewals and re-letting of space.

Upon the expiration of current leases for space located in properties in which we have an interest, our property owner subsidiaries may not be able to re-let all or a portion of such space, or the terms of re-letting (including the cost of concessions to tenants and leasing commissions) may be less favorable than current lease terms or market rates. If our property owner subsidiaries are unable to promptly re-let all or a substantial portion of the space located in their respective properties, or if the rental rates a property owner subsidiary receives upon re-letting are significantly lower than current rates, our earnings and ability to satisfy our debt service obligations and to make expected distributions to our shareholders may be adversely affected due to the resulting reduction in rent receipts and increase in property operating costs. There can be no assurance that our property owner subsidiaries will be able to retain tenants in any of our properties upon the expiration of leases.

Table of Contents

We may not be able to generate sufficient cash flow to meet our debt service obligations and to pay distributions on our common shares.

Our ability to make payments on and to refinance our indebtedness, to make distributions on our common shares and to fund our operations, working capital and capital expenditures, depends on our ability to generate cash in the future. To a certain extent, our cash flow is subject to general economic, industry, financial, competitive, operating, legislative, regulatory and other factors, many of which are beyond our control. We cannot assure you that our business will generate sufficient cash flow from operations or that future sources of cash will be available to us in an amount sufficient to enable us to pay amounts due on our indebtedness or to make distributions on our common shares and fund our other liquidity needs. Additionally, if we incur additional indebtedness in connection with future acquisitions or development projects or for any other purpose, our debt service obligations could increase.

We may need to refinance all or a portion of our indebtedness on or before maturity. Our ability to refinance our indebtedness or obtain additional financing will depend on, among other things:

- our financial condition and market conditions at the time; and
- restrictions in the agreements governing our indebtedness.

As a result, we may not be able to refinance any of our indebtedness on commercially reasonable terms, or at all. If we do not generate sufficient cash flow from operations, and additional borrowings or refinancings or proceeds of asset sales or other sources of cash are not available to us, we may not have sufficient cash to enable us to meet all of our obligations. Accordingly, if we cannot service our indebtedness, we may have to take actions such as seeking additional equity, or delaying strategic acquisitions and alliances or capital expenditures, any of which could have a material adverse effect on our operations. We cannot assure you that we will be able to effect any of these actions on commercially reasonable terms, or at all.

Our inability to carry out our growth strategy could adversely affect our financial condition and results of operations. Our growth strategy is based on the acquisition and development of additional properties and related assets. In the context of our business plan, “development” generally means an expansion or renovation of an existing property or the financing and/or acquisition of a newly constructed build-to-suit property. For newly constructed build-to-suit properties, we may (1) provide a developer with either a combination of financing for construction of a build-to-suit property or a commitment to acquire a property upon completion of construction of a build-to-suit property and commencement of rent from the tenant or (2) acquire a property subject to a lease and engage a developer to complete construction of a build-to-suit property as required by the lease.

Our plan to grow through the acquisition and development of new properties could be adversely affected by trends in the real estate and financing businesses. The consummation of any future acquisitions will be subject to satisfactory completion of an extensive valuation analysis and due diligence review and to the negotiation of definitive documentation. Our ability to implement our strategy may be impeded because we may have difficulty finding new properties and investments at attractive prices that meet our investment criteria, negotiating with new or existing tenants or securing acceptable financing. If we are unable to carry out our strategy, our financial condition and results of operations could be adversely affected. Acquisitions of additional properties entail the risk that investments will fail to perform in accordance with expectations, including operating and leasing expectations.

Redevelopment and new project development are subject to numerous risks, including risks of construction delays, cost overruns or force majeure events that may increase project costs, new project commencement risks such as the receipt of zoning, occupancy and other required governmental approvals and permits, and the incurrence of development costs in connection with projects that are not pursued to completion.

Some of our acquisitions and developments may be financed using the proceeds of periodic equity or debt offerings, lines of credit or other forms of secured or unsecured financing that may result in a risk that permanent financing for newly acquired projects might not be available or would be available only on disadvantageous terms. If permanent debt or equity financing is not available on acceptable terms to refinance acquisitions undertaken without permanent financing, further acquisitions may be curtailed, or cash available to satisfy our debt service obligations and distributions to shareholders may be adversely affected.

Table of Contents

Acquisition activities may not produce expected results and may be affected by outside factors.

Acquisitions of commercial properties entail certain risks, such as (1) underwriting assumptions, including occupancy, rental rates and expenses, may differ from estimates, (2) the properties may become subject to environmental liabilities that we were unaware of at the time we acquired the property despite any environmental testing, (3) we may have difficulty obtaining financing on acceptable terms or paying the operating expenses and debt service associated with acquired properties prior to sufficient occupancy and (4) projected exit strategies may not come to fruition due to a variety of factors such as market conditions at time of dispositions.

We may not be successful in identifying suitable real estate properties or other assets that meet our acquisition criteria. We may also fail to complete acquisitions or investments on satisfactory terms. Failure to identify or complete acquisitions could slow our growth, which could, in turn, have a material adverse effect on our financial condition and results of operations.

We face certain risks associated with our build-to-suit activities.

From time to time, we engage in, or provide capital to developers who are engaged in, build-to-suit activities. We face uncertainties, associated with a developer's performance and timely completion of a project, including the performance or timely completion by contractors and subcontractors. A developer's performance may be affected or delayed by their own actions or conditions beyond the developer's control. If a developer, contractor or subcontractor fails to perform, we may resort to legal action to compel performance, remove the developer or rescind the purchase or construction contract. Legal action may cause further delays and our costs may not be reimbursed.

We may incur additional risks when we make periodic progress payments or other advances to developers before completion of construction. These and other factors can result in increased costs of a project or loss of our investment. We also rely on third-party construction managers and/or engineers to monitor the construction activities.

We rely on rental income and expense projections and estimates of the fair market value of a property upon completion of construction when agreeing upon a purchase price at the time we acquire the property, which may be up to two years prior to the estimated date of completion. If our projections are inaccurate or markets change, we may pay more than the fair value of a property.

Our multi-tenant properties expose us to additional risks.

Our multi-tenant properties involve risks not typically encountered in real estate properties which are operated by a single tenant. The ownership of multi-tenant properties could expose us to the risk that a sufficient number of suitable tenants may not be found to enable the property to operate profitably and provide a return to us. This risk may be compounded by the failure of existing tenants to satisfy their obligations due to various factors. These risks, in turn, could cause a material adverse impact to our results of operations and business.

Multi-tenant properties are also subject to tenant turnover and fluctuation in occupancy rates, which could affect our operating results. Furthermore, multi-tenant properties expose us to the risk of potential "CAM slippage," which may occur when the actual cost of taxes, insurance and maintenance at the property exceeds the operating expenses paid by tenants and/or the amounts budgeted.

We face possible liability relating to environmental matters.

Under various federal, state and local environmental laws, statutes, ordinances, rules and regulations, as an owner of real property, our property owner subsidiaries may be liable for the costs of removal or remediation of certain hazardous or toxic substances at, on, in or under the properties in which we have an interest as well as certain other potential costs relating to hazardous or toxic substances. These liabilities may include government fines and penalties and damages for injuries to persons and adjacent property. These laws may impose liability without regard to whether we knew of, or were responsible for, the presence or disposal of those substances. This liability may be imposed on our property owner subsidiaries in connection with the activities of an operator of, or tenant at, the property. The cost of any required remediation, removal, fines or personal or property damages, and our liability therefore, could be significant and could exceed the value of the property and/or our aggregate assets. In addition, the presence of those substances, or the failure to properly dispose of or remove those substances, may adversely affect a property owner subsidiary's ability to sell or rent that property or to borrow using that property as collateral, which, in turn, would reduce our revenues and ability to satisfy our debt service obligations and to make distributions.

Table of Contents

A property can also be adversely affected either through physical contamination or by virtue of an adverse effect upon value attributable to the migration of hazardous or toxic substances, or other contaminants that have or may have emanated from other properties. Although the tenants of the properties in which we have an interest are primarily responsible for any environmental damages and claims related to the leased premises, in the event of the bankruptcy or inability of any of the tenants of the properties in which we have an interest to satisfy any obligations with respect to the property leased to that tenant, our property owner subsidiary may be required to satisfy such obligations. In addition, we may be held directly liable for any such damages or claims irrespective of the provisions of any lease. From time to time, in connection with the conduct of our business, our property owner subsidiaries authorize the preparation of Phase I environmental reports and, when recommended, Phase II environmental reports, with respect to their properties. There can be no assurance that these environmental reports will reveal all environmental conditions at the properties in which we have an interest or that the following will not expose us to material liability in the future:

- the discovery of previously unknown environmental conditions;
- changes in law;
- activities of tenants; or
- activities relating to properties in the vicinity of the properties in which we have an interest.

Changes in laws increasing the potential liability for environmental conditions existing on properties or increasing the restrictions on discharges or other conditions may result in significant unanticipated expenditures or may otherwise adversely affect the operations of the tenants of the properties in which we have an interest, which could adversely affect our financial condition or results of operations.

From time to time we are involved in legal proceedings arising in the ordinary course of our business.

Legal proceedings arising in the ordinary course of our business require time and effort. The outcomes of legal proceedings are subject to significant uncertainty. In the event that we are unsuccessful defending or prosecuting these proceedings, as applicable, we may incur a judgment or fail to realize an award of damages that could have an adverse effect on our financial condition.

Uninsured losses or a loss in excess of insured limits could adversely affect our financial condition.

We carry comprehensive liability, fire, extended coverage and rent loss insurance on certain of the properties in which we have an interest, with policy specifications and insured limits that we believe are customary for similar properties. However, with respect to those properties where the leases do not provide for abatement of rent under any circumstances, we generally do not maintain rent loss insurance. In addition, certain of our leases require the tenant to maintain all insurance on the property, and the failure of the tenant to maintain the proper insurance could adversely impact our investment in a property in the event of a loss. Furthermore, there are certain types of losses, such as losses resulting from wars, terrorism or certain acts of God, that generally are not insured because they are either uninsurable or not economically insurable. Should an uninsured loss or a loss in excess of insured limits occur, we could lose capital invested in a property as well as the anticipated future revenues from a property, while remaining obligated for any mortgage indebtedness or other financial obligations related to the property. Any loss of these types could adversely affect our financial condition and results of operations.

Future terrorist attacks, military conflicts and unrest in the Middle East could have a material adverse effect on general economic conditions, consumer confidence and market liquidity.

The types of terrorist attacks since 2001, ongoing and future military conflicts and the continued unrest in the Middle East may affect commodity prices and interest rates, among other things. An increase in interest rates may increase our costs of borrowing, leading to a reduction in our earnings. Instability in the price of oil will also cause fluctuations in our operating costs, which may not be reimbursed by our tenants. Also, terrorist acts could result in significant damages to, or loss of, our properties or the value thereof.

Table of Contents

We and the tenants of the properties in which we have an interest may be unable to obtain adequate insurance coverage on acceptable economic terms for losses resulting from acts of terrorism. Our lenders may require that we carry terrorism insurance even if we do not believe this insurance is necessary or cost effective. We may also be prohibited under the applicable lease from passing all or a portion of the cost of such insurance through to the tenant. Should an act of terrorism result in an uninsured loss or a loss in excess of insured limits, we could lose capital invested in a property as well as the anticipated future revenues from a property, while remaining obligated for any mortgage indebtedness or other financial obligations related to the property. Any loss of these types could adversely affect our financial condition.

Cybersecurity risks and cyber incidents may adversely affect our business by causing a disruption to our operations, a compromise or corruption of our confidential information, and/or damage to our business relationships, all of which could negatively impact our financial results.

A cyber incident is considered to be any adverse event that threatens the confidentiality, integrity or availability of our information resources. These incidents may be an intentional attack or an unintentional event and could involve gaining unauthorized access to our information systems for purposes of misappropriating assets, stealing confidential information, corrupting data or causing operational disruption. The result of these incidents may include disrupted operations, misstated or unreliable financial data, liability for stolen assets or information, increased cybersecurity protection and insurance costs, litigation and damage to our tenant and investor relationships. As our reliance on technology has increased, so have the risks posed to our information systems, both internal and those we have outsourced. Any processes, procedures and internal controls that we implement, as well as our increased awareness of the nature and extent of a risk of a cyber incident, do not guarantee that our financial results, operations, business relationships or confidential information will not be negatively impacted by such an incident.

Competition may adversely affect our ability to purchase properties.

There are numerous commercial developers, real estate companies, financial institutions, such as banks and insurance companies, and other investors, such as pension funds, private companies and individuals, with greater financial and other resources than we have that compete with us in seeking investments and tenants. Due to our focus on single-tenant properties located throughout the United States, and because most competitors are often locally and/or regionally focused, we do not always encounter the same competitors in each market. Our competitors include other REITs, financial institutions, insurance companies, pension funds, private companies and individuals. This competition may result in a higher cost for properties and lower returns and impact our ability to grow.

Our failure to maintain effective internal control over financial reporting could have a material adverse effect on our business, operating results and share price.

Section 404 of the Sarbanes-Oxley Act of 2002 requires annual management assessments of the effectiveness of our internal control over financial reporting. If we fail to maintain the adequacy of our internal control over financial reporting, as such standards may be modified, supplemented or amended from time to time, we will be required to disclose such failure and our financial reporting may not be relied on by most investors. Moreover, effective internal control, particularly related to revenue recognition, is necessary for us to produce reliable financial reports and to maintain our qualification as a REIT and is important in helping prevent financial fraud. If we cannot provide reliable financial reports or prevent fraud, our business and operating results could be harmed, our REIT qualification could be jeopardized, investors could lose confidence in our reported financial information and the trading price of our debt and equity securities could drop significantly.

We may have limited control over our joint venture investments.

Our joint venture investments involve risks not otherwise present for investments made solely by us, including the possibility that our partner might, at any time, become bankrupt, have different interests or goals than we do, or take action contrary to our expectations, its previous instructions or our instructions, requests, policies or objectives, including our policy with respect to maintaining our qualification as a REIT. Other risks of joint venture investments include impasses on decisions, such as a sale, because neither we nor our partner has full control over the joint venture. Also, there is no limitation under our organizational documents as to the amount of funds that may be invested in joint ventures.

Our ability to change our portfolio is limited because real estate investments are illiquid. Investments in real estate are relatively illiquid and, therefore, our ability to change our portfolio promptly in response to changed conditions is limited. Our Board of Trustees may establish investment criteria or limitations as it deems appropriate, but currently does not limit the number or type of properties in which we may seek to invest or on the concentration of investments in any one geographic region.

Table of Contents

Our reported financial results may be adversely affected by changes in accounting principles applicable to us and the tenants of properties in which we have an interest.

GAAP is subject to interpretation by various bodies formed to promulgate and interpret appropriate accounting principles such as the Financial Accounting Standards Board. A change in these principles or interpretations could have a significant effect on our reported financial results, could affect the reporting of transactions completed before the announcement of a change and could affect the business practices and decisions of the tenants of properties in which we have an interest.

We have engaged and may engage in hedging transactions that may limit gains or result in losses.

We have used derivatives to hedge certain of our liabilities and we currently have interest rate swap agreements in place. As of December 31, 2014, we have aggregate interest rate swap agreements on \$505.0 million of borrowings. The counterparties of these arrangements are major financial institutions; however, we are exposed to credit risk in the event of non-performance by the counterparties. This has certain risks, including losses on a hedge position, which may reduce the return on our investments. Such losses may exceed the amount invested in such instruments. In addition, counterparties to a hedging arrangement could default on their obligations. We may have to pay certain costs, such as transaction fees or breakage costs, related to hedging transactions.

Our Board of Trustees may change our investment policy without shareholders' approval.

Subject to our fundamental investment policy to maintain our qualification as a REIT and invest in core assets, our Board of Trustees will determine our investment and financing policies, growth strategy and our debt, capitalization, distribution, acquisition, disposition and operating policies.

Our Board of Trustees may revise or amend these strategies and policies at any time without a vote by shareholders. Changes made by our Board of Trustees may not serve the interests of debt or equity security holders and could adversely affect our financial condition or results of operations, including our ability to satisfy our debt service obligations, distribute cash to shareholders and qualify as a REIT. Accordingly, shareholders' control over changes in our strategies and policies is limited to the election of trustees.

We are dependent upon our key personnel.

We are dependent upon key personnel whose continued service is not guaranteed. We are dependent on certain of our executive officers for business direction. We have employment agreements, which expire in January 2018, with each of T. Wilson Eglin, our Chief Executive Officer and President, E. Robert Roskind, our Chairman, Richard J. Rouse, our Vice Chairman and Chief Investment Officer, and Patrick Carroll, our Executive Vice President, Chief Financial Officer and Treasurer. However, an employment agreement does not itself prevent an employee from resigning. Our inability to retain the services of any of our key personnel or our loss of any of their services could adversely impact our operations. We do not have key man life insurance coverage on our executive officers.

There may be conflicts of interest between E. Robert Roskind and us.

E. Robert Roskind, our Chairman, beneficially owns a significant number of OP units, and as a result, may face different and more adverse tax consequences than our other shareholders will if we sell our interests in certain properties or reduce mortgage indebtedness on certain properties. Our Chairman may, therefore, have different objectives than us and our debt and equity security holders regarding the appropriate pricing and timing of any sale of such properties or reduction of mortgage debt. In the event of an appearance of a conflict of interest and in accordance with our policy regarding related party transactions, Mr. Roskind is required to recuse himself from any decision making or seek a waiver of our Code of Business Conduct and Ethics, which will be reviewed by the non-conflicted members of our Board of Trustees or the Audit Committee of the Board of Trustees.

In addition, Mr. Roskind's employment agreement with us permits Mr. Roskind to spend approximately one third of his business time on the affairs of The LCP Group L.P. and its affiliates. While Mr. Roskind is required to prioritize his business time to address our needs ahead of The LCP Group L.P., Mr. Roskind and The LCP Group L.P. may engage in a wide variety of activities in the real estate business which may result in conflicts of interest with respect to matters affecting us.

Table of Contents

Costs of complying with changes in governmental laws and regulations may adversely affect our results of operations. We cannot predict what laws or regulations may be enacted in the future, how future laws or regulations will be administered or interpreted, or how future laws or regulations will affect our properties. Compliance with new laws or regulations, or stricter interpretation of existing laws, may require us or our tenants to incur significant expenditures, impose significant liability, restrict or prohibit business activities and could cause a material adverse effect on our results of operations.

We disclose Funds From Operations (“FFO”) and Company Funds from Operations (“Company FFO”), which are non-GAAP financial measures, in documents filed with the SEC; however, neither FFO nor Company FFO is equivalent to our net income or loss as determined under GAAP, and you should consider GAAP measures to be more relevant to our operating performance.

We use and disclose to investors FFO and Company FFO, which are non-GAAP financial measures. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Funds from Operations” in Part II, Item 7 of this Annual Report. FFO and Company FFO are not equivalent to our net income or loss as determined in accordance with GAAP, and investors should consider GAAP measures to be more relevant to evaluating our operating performance. FFO and Company FFO and GAAP net income differ because FFO and Company FFO exclude many items that are factored into GAAP net income.

Because of the differences between FFO and Company FFO and GAAP net income or loss, FFO and Company FFO may not be accurate indicators of our operating performance, especially during periods in which we are acquiring properties. In addition, Company FFO is not necessarily indicative of cash flow available to fund cash needs and investors should not consider FFO and Company FFO as alternatives to cash flows from operations, as an indication of our liquidity or as indicative of funds available to fund our cash needs, including our ability to make distributions to our shareholders.

Neither the SEC nor any other regulatory body has passed judgment on the acceptability of the adjustments that we use to calculate FFO and Company FFO. Also, because not all companies calculate FFO and Company FFO the same way, comparisons with other companies may not be meaningful.

Risks Related to Our Indebtedness

Our substantial indebtedness could adversely affect our financial condition and our ability to fulfill our obligations under the documents governing our unsecured indebtedness and otherwise adversely impact our business and growth prospects.

We have a substantial amount of debt. We are more leveraged than certain of our competitors. We have incurred, and may continue to incur, direct and indirect indebtedness in furtherance of our activities. Neither our declaration of trust nor any policy statement formerly adopted by our Board of Trustees limits either the total amount of indebtedness that we may incur, and accordingly, we could become even more highly leveraged. As of December 31, 2014, our total consolidated indebtedness was approximately \$2.1 billion and we had approximately \$385.4 million available for us to borrow under our principal credit agreement, subject to covenant compliance.

Our substantial indebtedness could adversely affect our financial condition and results of operations and have important consequences to us and our debt and equity security holders. For example, it could:

- make it more difficult for us to satisfy our indebtedness and debt service obligations and adversely affect our ability to pay distributions;
- increase our vulnerability to adverse economic and industry conditions;
- require us to dedicate a substantial portion of our cash flow from operations to the payment of interest on and principal of our indebtedness, thereby reducing the availability of cash to fund working capital, capital expenditures and other general corporate purposes;
- limit our ability to borrow money or sell stock to fund our development projects, working capital, capital expenditures, general corporate purposes or acquisitions;
- restrict us from making strategic acquisitions or exploiting business opportunities;
- place us at a disadvantage compared to competitors that have less debt; and
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate.

Table of Contents

In addition, the agreements that govern our current indebtedness contain, and the agreements that may govern any future indebtedness that we may incur may contain, financial and other restrictive covenants that will limit our ability to engage in activities that may be in our long-term best interests. Our failure to comply with those covenants could result in an event of default that, if not cured or waived, could result in the acceleration of our debt.

Market interest rates could have an adverse effect on our borrowing costs, profitability and the value of our fixed rate debt securities.

We have exposure to market risks relating to increases in interest rates due to our variable-rate debt. An increase in interest rates may increase our costs of borrowing on existing variable-rate indebtedness, leading to a reduction in our earnings. As of December 31, 2014, we had no outstanding consolidated variable-rate indebtedness that was not subject to an interest rate swap agreement. The level of our variable-rate indebtedness, along with the interest rate associated with such variable-rate indebtedness, may change in the future and materially affect our interest costs and earnings. In addition, our interest costs on our fixed-rate indebtedness may increase if we are required to refinance our fixed-rate indebtedness upon maturity at higher interest rates. Also, fixed rate debt securities generally decline in value as market rates rise because the premium, if any, over market interest rates will decline.

Potential disruptions in the financial markets could affect our ability to obtain debt financing on reasonable terms and have other adverse effects on us.

Historically, the United States credit markets have experienced significant dislocations and liquidity disruptions which have caused the spreads on prospective debt financings to widen considerably. These circumstances may materially impacted liquidity in the debt markets, making financing terms for borrowers less attractive, and in certain cases may result in the unavailability of certain types of debt financing. Continued uncertainty in the credit markets may negatively impact our ability to access additional debt financing on reasonable terms, which may negatively affect our ability to make acquisitions. A prolonged downturn in the credit markets may cause us to seek alternative sources of potentially less attractive financing and may require us to adjust our business plan accordingly. In addition, these factors may make it more difficult for us to sell properties or may adversely affect the price we receive for properties that we do sell, as prospective buyers may experience increased costs of capital or difficulties in obtaining capital. These events in the credit markets may have an adverse effect on other financial markets in the United States, which may make it more difficult or costly for us to raise capital through the issuance of our common shares or preferred shares. These disruptions in the financial markets may have other adverse effects on us or the economy in general. Covenants in certain of the agreements governing our debt could adversely affect our financial condition and our investment activities.

Our unsecured revolving credit facility, unsecured term loans and indentures governing our 4.40% and 4.25% Senior Notes and 6.00% Convertible Notes contain certain cross-default and cross-acceleration provisions as well as customary restrictions, requirements and other limitations on our ability to incur indebtedness and consummate mergers, consolidations or sales of all or substantially all of our assets. Our ability to borrow under our unsecured revolving credit facility is also subject to compliance with certain other covenants. In addition, failure to comply with our covenants could cause a default under the applicable debt instrument and we may then be required to repay such debt with capital from other sources. Under those circumstances other sources of capital may not be available to us or be available only on unattractive terms. Additionally, our ability to satisfy current or prospective lenders' insurance requirements may be adversely affected if lenders generally insist upon greater insurance coverage against acts of terrorism than is available to us in the marketplace or on commercially reasonable terms.

We rely on debt financing, including borrowings under our unsecured revolving credit facility, unsecured term loan, debt securities, and debt secured by individual properties, for working capital, including to finance our investment activities. If we are unable to obtain financing from these or other sources, or to refinance existing indebtedness upon maturity, our financial condition and results of operations could be adversely affected.

Table of Contents

A downgrade in our credit ratings could materially adversely affect our business and financial condition. The credit ratings assigned to our debt could change based upon, among other things, our results of operations and financial condition or the real estate industry generally. These ratings are subject to ongoing evaluation by credit rating agencies, and we cannot assure you that any rating will not be changed or withdrawn by a rating agency in the future if, in its judgment, circumstances warrant. Moreover, these credit ratings do not apply to our common shares and are not recommendations to buy, sell or hold any other securities. Any downgrade of our debt could materially adversely affect the market price of our debt securities and our common shares. If any of the credit rating agencies that have rated our debt downgrades or lowers its credit rating, or if any credit rating agency indicates that it has placed any such rating on a so-called “watch list” for a possible downgrading or lowering or otherwise indicates that its outlook for that rating is negative, it could also have a material adverse effect on our costs and availability of capital, which could in turn have a material adverse effect on our financial condition, results of operations, cash flows and our ability to satisfy our debt service obligations and to make dividends and distributions on our common shares and preferred shares.

We face risks associated with refinancings.

A significant number of the properties in which we have an interest are subject to mortgage or other secured notes with balloon payments due at maturity. In addition, our corporate level borrowings require interest only payments with all principal due at maturity.

As of December 31, 2014, the consolidated scheduled balloon payments, for the next five calendar years, are as follows (\$ in millions):

Year	Property-Specific Balloon Payments ⁽¹⁾	Corporate Recourse Balloon Payments	
2015	\$142.6	\$0	
2016	\$129.9	\$0	
2017	\$68.7	\$16.2	(2)
2018	\$18.2	\$250.0	
2019	\$83.8	\$255.0	

(1) All payment obligations are non-recourse except a \$15.0 million payment obligation in 2016.

(2) Assumes 6.00% Convertible Notes due in January 2030 are put to us in 2017.

The ability to make the scheduled balloon payment on a non-recourse mortgage note will depend upon (1) in the event we determine to contribute capital, our cash balances and the amount available under our unsecured credit facility and (2) the property owner subsidiary's ability either to refinance the related mortgage debt or to sell the related property. If the property owner subsidiary is unable to refinance or sell the related property, the property may be conveyed to the lender through foreclosure or other means or the property owner subsidiary may declare bankruptcy.

We face risks associated with returning properties to lenders.

A significant number of the properties in which we have an interest are subject to non-recourse mortgages, which generally provide that a lender's only recourse upon an event of default is to foreclose on the property. During 2014, a property in which we had an interest, was sold in foreclosure. As a result, we lost all of our interest in this property and any future opportunities to re-tenant this property. The loss of a significant number of properties to foreclosure or bankruptcy could adversely affect our financial condition and results of operations, relationships with lenders and ability to obtain additional financing in the future.

In addition, a lender may attempt to trigger a carve out to the non-recourse nature of a mortgage loan. To the extent a lender is successful, the ability of our property owner subsidiary to return the property to the lender may be inhibited and we may be liable for all or a portion of such loan.

Certain of our properties are cross-collateralized, and certain of our indebtedness is subject to cross-default and cross-acceleration provisions.

As of December 31, 2014, the mortgages on certain of our properties were cross-collateralized. To the extent that any of the properties in which we have an interest are cross-collateralized, any default by the property owner subsidiary under the mortgage note relating to one property will result in a default under the financing arrangements relating to

any other property that also provides security for that mortgage note or is cross-collateralized with such mortgage note.

18

Table of Contents

In addition, substantially all of our corporate level borrowings contain cross-default and/or cross-acceleration provisions, which may be triggered if we default on certain indebtedness in excess of certain thresholds.

Risks Related to Our Outstanding Debt Securities

The effective subordination of our unsecured indebtedness and any related guaranty may reduce amounts available for payment on our unsecured indebtedness and any related guaranty.

The holders of our secured debt may foreclose on the assets securing such debt, reducing the cash flow from the foreclosed property available for payment of unsecured debt and any related guaranty. The holders of any of our secured debt also would have priority over unsecured creditors in the event of a bankruptcy, liquidation or similar proceeding.

Not all of our subsidiaries are guarantors of our unsecured debt, assets of non-guarantor subsidiaries may not be available to make payments on our unsecured indebtedness and any related guarantees may be released in the future if certain events occur.

As of December 31, 2014, only we and/or LCIF are borrowers or a guarantor of our unsecured indebtedness. In the event of a bankruptcy, liquidation or reorganization of any of our non-guarantor subsidiaries, holders of non-guarantor subsidiary debt, including trade creditors, will generally be entitled to payment of their claims from the assets of non-guarantor subsidiaries before any assets are made available for distribution to us or any of the subsidiary guarantors.

In addition, any subsidiary guarantor, including LCIF, will be deemed released if such subsidiary guarantor's obligations as a borrower or guarantor under our principal credit agreement terminates pursuant to the terms of our principal credit agreement or if our principal credit agreement is amended to remove certain or all of the subsidiary guarantors as borrowers or guarantors. To the extent any of our unsecured indebtedness is no longer guaranteed by any of our subsidiaries in the future, such debt will be our obligations exclusively. All of our assets are held through our operating partnership and our other subsidiaries. Consequently, our cash flow and our ability to meet our debt service obligations depends in large part upon the cash flow of our subsidiaries and the payment of funds by our subsidiaries to us in the form of distributions or otherwise.

Federal and state statutes allow courts, under specific circumstances, to void guarantees and require holders of certain of our unsecured indebtedness to return payments received from us or any related guarantor.

Under the federal bankruptcy law and comparable provisions of state fraudulent transfer laws, a guarantee could be voided, or claims in respect of a guarantee could be subordinated to all other debts of that guarantor if, among other things, the guarantor, at the time it incurred the debt evidenced by its guarantee:

- issued the guarantee to delay, hinder or defraud present or future creditors; or
- received less than reasonably equivalent value or fair consideration for the incurrence of such guarantee, and:
 - was insolvent or rendered insolvent by reason of such incurrence;
 - was engaged or about to engage in a business or transaction for which the guarantor's remaining unencumbered assets constituted unreasonably small capital to carry on its business; or
 - intended to incur, or believed that it would incur, debts beyond its ability to pay the debts as they mature.

In addition, any payment by that guarantor pursuant to its guarantee could be voided and required to be returned to the guarantor, or to a fund for the benefit of the creditors of the guarantor.

The measures of insolvency for purposes of these fraudulent transfer laws will vary depending upon the law applied in any proceeding to determine whether a fraudulent transfer has occurred. Generally, however, a guarantor would be considered insolvent if, at the time it incurred the debt:

- the sum of its debts, including contingent liabilities, was greater than the fair saleable value of all of its assets;
- the present fair saleable value of its assets was less than the amount that would be required to pay its probable liability on its existing debts, including contingent liabilities, as they become absolute and mature; or
- it could not pay its debts as they become due.

Table of Contents

We cannot be sure as to the standards that a court would use to determine whether or not any guarantor was solvent at the relevant time, or, regardless of the standard that the court uses, that the issuance of such guaranty would not be voided or any such guaranty would not be subordinated to that of such guarantor's other debt. If a case were to occur, any such guaranty could also be subject to the claim that, since the guaranty was incurred for our benefit, and only indirectly for the benefit of such guarantor, the obligations of such guarantor were incurred for less than fair consideration. A court could thus void the obligations under the guarantees or subordinate the guarantees to such guarantor's other debt or take other action detrimental to holders of our unsecured indebtedness.

Risks Related to Our REIT Status

There can be no assurance that we will remain qualified as a REIT for federal income tax purposes.

We believe that we have met the requirements for qualification as a REIT for federal income tax purposes beginning with our taxable year ended December 31, 1993, and we intend to continue to meet these requirements in the future. However, qualification as a REIT involves the application of highly technical and complex provisions of the Code, for which there are only limited judicial or administrative interpretations. The Code provisions and income tax regulations applicable to REITs are more complex than those applicable to corporations. The determination of various factual matters and circumstances not entirely within our control may affect our ability to continue to qualify as a REIT. No assurance can be given that we have qualified or will remain qualified as a REIT. In addition, no assurance can be given that legislation, regulations, administrative interpretations or court decisions will not significantly change the requirements for qualification as a REIT or the federal income tax consequences of such qualification. If we do not qualify as a REIT, we would not be allowed a deduction for distributions to shareholders in computing our net taxable income. In addition, our income would be subject to tax at the regular corporate rates. We also could be disqualified from treatment as a REIT for the four taxable years following the year during which qualification was lost. Cash available to satisfy our debt service obligations and distributions to our shareholders would be significantly reduced or suspended for each year in which we do not qualify as a REIT. In that event, we would not be required to continue to make distributions. Although we currently intend to continue to qualify as a REIT, it is possible that future economic, market, legal, tax or other considerations may cause us, without the consent of the shareholders, to revoke the REIT election or to otherwise take action that would result in disqualification.

We may be subject to the REIT prohibited transactions tax, which could result in significant U.S. federal income tax liability to us.

A REIT will incur a 100% tax on the net income from a prohibited transaction. Generally, a prohibited transaction includes a sale or disposition of property held primarily for sale to customers in the ordinary course of a trade or business. While we believe that the dispositions of our assets pursuant to our investment strategy should not be treated as prohibited transactions, whether a particular sale will be treated as a prohibited transaction depends on the underlying facts and circumstances. We have not sought and do not intend to seek a ruling from the Internal Revenue Service regarding any dispositions. Accordingly, there can be no assurance that our dispositions of such assets will not be subject to the prohibited transactions tax. If all or a significant portion of those dispositions were treated as prohibited transactions, we would incur a significant U.S. federal income tax liability, which could have a material adverse effect on our financial position, results of operations and cash flows.

Distribution requirements imposed by law limit our flexibility.

To maintain our status as a REIT for federal income tax purposes, we are generally required to distribute to our shareholders at least 90% of our taxable income for that calendar year. Our taxable income is determined without regard to any deduction for dividends paid and by excluding net capital gains. To the extent that we satisfy the distribution requirement but distribute less than 100% of our taxable income, we will be subject to federal corporate income tax on our undistributed income. In addition, we will incur a 4% nondeductible excise tax on the amount, if any, by which our distributions in any year are less than the sum of (i) 85% of our ordinary income for that year, (ii) 95% of our capital gain net income for that year and (iii) 100% of our undistributed taxable income from prior years. We intend to continue to make distributions to our shareholders to comply with the distribution requirements of the Code and to reduce exposure to federal income and nondeductible excise taxes. Differences in timing between the receipt of income and the payment of expenses in determining our taxable income and the effect of required debt

amortization payments could require us to borrow funds on a short-term basis in order to meet the distribution requirements that are necessary to achieve the tax benefits associated with qualifying as a REIT.

Table of Contents

Legislative or regulatory tax changes could have an adverse effect on us.

At any time, the federal income tax laws governing REITs or the administrative interpretations of those laws may be amended. Any of those new laws or interpretations may take effect retroactively and could adversely affect us or you as a debt and/or equity security holder. REIT dividends generally are not eligible for the reduced rates currently applicable to certain corporate dividends (unless attributable to dividends from taxable REIT subsidiaries and otherwise eligible for such rates). As a result, investment in non-REIT corporations may be relatively more attractive than investment in REITs. This could adversely affect the market price of our shares.

Risks Related to Our Shares

We may change the dividend policy for our common shares in the future.

The decision to declare and pay dividends on our common shares in the future, as well as the timing, amount and composition of any such future dividends, will be at the sole discretion of our Board of Trustees in light of conditions then existing, including our earnings, financial condition, capital requirements, debt maturities, the availability of debt and equity capital, applicable REIT and legal restrictions and the general overall economic conditions and other factors. The actual dividend payable will be determined by our Board of Trustees based upon the circumstances at the time of declaration and the actual dividend payable may vary from such expected amount. Any change in our dividend policy could have a material adverse effect on the market price of our common shares.

We may in the future choose to pay dividends in shares, in which case you may be required to pay income taxes in excess of the cash dividends you receive.

We may in the future distribute taxable dividends that are payable in shares. Taxable shareholders receiving such dividends will be required to include the full amount of the dividend as ordinary income to the extent of our current and accumulated earnings and profits for United States federal income tax purposes. As a result, a U.S. shareholder may be required to pay income taxes with respect to such dividends even though no cash dividends were received. If a U.S. shareholder sells the shares it receives as a dividend in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the dividend, depending on the market price of the shares at the time of the sale. Furthermore, with respect to non-U.S. shareholders, we may be required to withhold U.S. tax with respect to such dividends. In addition, if a significant number of our shareholders determine to sell such shares received in a dividend in order to pay taxes owed on such dividend, it may put downward pressure on the trading price of our common shares.

Securities eligible for future sale may have adverse effects on our share price.

We have an unallocated universal shelf registration statement, pursuant to which we maintain an ATM program, and we also maintain a direct share purchase plan, pursuant to which we may issue additional common shares. In addition, as of December 31, 2014, an aggregate of approximately 5.2 million of our common shares were issuable upon the exercise of employee share options and upon the exchange of OP units. There were also approximately 2.4 million common shares underlying our 6.00% Convertible Notes as of December 31, 2014, which is subject to increase upon certain events, including if we pay a quarterly common share dividend in excess of \$0.10 per common share.

Depending upon the number of such securities issued, exercised or exchanged at one time, an issuance, exercise or exchange of such securities could be dilutive to or otherwise adversely affect the interests of holders of our common shares.

There are certain limitations on a third party's ability to acquire us or effectuate a change in our control.

Limitations imposed to protect our REIT status. In order to protect against the loss of our REIT status, among other purposes, our declaration of trust limits any shareholder from owning more than 9.8% in value of our outstanding equity shares, defined as common shares or preferred shares, subject to certain exceptions. These ownership limits may have the effect of precluding acquisition of control of us. Our Board of Trustees has granted a limited waiver of the ownership limits to BlackRock, Inc.

Table of Contents

Severance payments under employment agreements. Substantial termination payments may be required to be paid under the provisions of employment agreements with certain of our executives upon a change of control and the subsequent termination of the executive. We have entered into employment agreements with four of our executive officers which provide that, upon the occurrence of a change in control of us (including a change in ownership of more than 50% of the total combined voting power of our outstanding securities, the sale of all or substantially all of our assets, dissolution, the acquisition, except from us, of 20% or more of our voting shares or a change in the majority of our Board of Trustees), if those executive officers are terminated without cause, as defined, those executive officers may be entitled to severance benefits based on their current annual base salaries and trailing average of recent annual cash bonuses as defined in the employment agreements and the acceleration of certain non-vested equity awards. Accordingly, these payments may discourage a third party from acquiring us.

Our ability to issue additional shares. Our declaration of trust authorizes 400,000,000 common shares, 100,000,000 preferred shares and 500,000,000 of beneficial interest, par value \$0.0001 per share, classified as excess stock, or excess shares. Our Board of Trustees is authorized to cause us to issue these shares without shareholder approval. Our Board of Trustees may establish the preferences and rights of any such class or series of additional shares, which could have the effect of delaying or preventing someone from taking control of us, even if a change in control were in shareholders' best interests. At December 31, 2014, in addition to common shares, we had outstanding 1,935,400 Series C Preferred Shares. Our Series C Preferred Shares include provisions, such as increases in dividend rates or adjustments to conversion rates, that may deter a change of control. The establishment and issuance of shares of our existing series of preferred shares or a future class or series of shares could make a change of control of us more difficult.

Maryland Business Combination Act. The Maryland General Corporation Law, as applicable to Maryland REITs, establishes special restrictions against "business combinations" between a Maryland REIT and "interested shareholders" or their affiliates unless an exemption is applicable. An interested shareholder includes a person who beneficially owns, and an affiliate or associate of the trust who, at any time within the two-year period prior to the date in question was the beneficial owner of, 10% or more of the voting power of our then-outstanding voting shares, but a person is not an interested shareholder if the Board of Trustees approved in advance the transaction by which he otherwise would have become an interested shareholder, which approval may be conditioned by the Board of Trustees. Among other things, Maryland law prohibits (for a period of five years) a merger and certain other transactions between a Maryland REIT and an interested shareholder, or an affiliate of an interested shareholder. The five-year period runs from the most recent date on which the interested shareholder became an interested shareholder. Thereafter, any such business combination must be recommended by the Board of Trustees and approved by two super-majority shareholder votes unless, among other conditions, the common shareholders receive a minimum price (as defined in the Maryland General Corporation Law) for their shares and the consideration is received in cash or in the same form as previously paid by the interested shareholder for its shares. The statute permits various exemptions from its provisions, including business combinations that are exempted by the Board of Trustees prior to the time that the interested shareholder becomes an interested shareholder. The business combination statute could have the effect of discouraging offers to acquire us and of increasing the difficulty of consummating any such offers, even if such acquisition would be in shareholders' best interests. In connection with the Newkirk Merger, Vornado Realty Trust, which we refer to as Vornado, was granted a limited exemption from the definition of "interested shareholder."

Maryland Control Share Acquisition Act. Maryland law provides that a holder of "control shares" of a Maryland REIT acquired in a "control share acquisition" has no voting rights with respect to such shares except to the extent approved by a vote of two-thirds of the votes entitled to be cast on the matter under the Maryland Control Share Acquisition Act. Shares owned by the acquirer, by our officers or by employees who are our trustees are excluded from shares entitled to vote on the matter. "Control Shares" are voting shares that, if aggregated with all other shares previously acquired by the acquirer or in respect of which the acquirer is able to exercise or direct the exercise of voting power (except solely by virtue of a revocable proxy), would entitle the acquirer to exercise voting power in electing trustees within one of the following ranges of voting power: one-tenth or more but less than one-third, one-third or more but less than a majority or a majority or more of all voting power. Control shares do not include shares the acquiring

person is then entitled to vote as a result of having previously obtained shareholder approval. A “control share acquisition” means the acquisition of issued and outstanding control shares, subject to certain exceptions. If voting rights of control shares acquired in a control share acquisition are not approved at a shareholders meeting or if the acquiring person does not deliver an acquiring person statement as required under the statute, then, subject to certain conditions and limitations, the issuer may redeem any or all of the control shares for fair value, except those for which voting rights have been previously approved. If voting rights of such control shares are approved at a shareholders meeting and the acquirer becomes entitled to vote a majority of the shares entitled to vote, all other shareholders may exercise appraisal rights. Any control shares acquired in a control share acquisition which are not exempt under our by-laws will be subject to the Maryland Control Share Acquisition Act. The Maryland Control Share Acquisition Act does not apply to shares acquired in a merger, consolidation or statutory share exchange if the Maryland REIT is a party to the transaction, or to acquisitions approved or exempted by the declaration of trust or by-laws of the Maryland REIT. Our amended and restated by-laws contain a provision exempting from the Maryland Control Share Acquisition Act any and all acquisitions by any person of our shares. We cannot assure you that this provision will not be amended or eliminated at any time in the future.

Table of Contents

Limits on ownership of our capital shares may have the effect of delaying, deferring or preventing someone from taking control of us.

For us to qualify as a REIT for federal income tax purposes, among other requirements, not more than 50% of the value of our outstanding capital shares may be owned, directly or indirectly, by five or fewer individuals (as defined for federal income tax purposes to include certain entities) during the last half of each taxable year, and these capital shares must be beneficially owned by 100 or more persons during at least 335 days of a taxable year of 12 months or during a proportionate part of a shorter taxable year (in each case, other than the first such year for which a REIT election is made). Our declaration of trust includes certain restrictions regarding transfers of our capital shares and ownership limits.

Actual or constructive ownership of our capital shares in violation of the restrictions or in excess of the share ownership limits contained in our declaration of trust would cause the violative transfer or ownership to be void or cause the shares to be transferred to a charitable trust and then sold to a person or entity who can own the shares without violating these limits. As a result, if a violative transfer were made, the recipient of the shares would not acquire any economic or voting rights attributable to the transferred shares. Additionally, the constructive ownership rules for these limits are complex, and groups of related individuals or entities may be deemed a single owner and consequently in violation of the share ownership limits.

However, these restrictions and limits may not be adequate in all cases to prevent the transfer of our capital shares in violation of the ownership limitations. The ownership limits discussed above may have the effect of delaying, deferring or preventing someone from taking control of us, even though a change of control could involve a premium price for the common shares or otherwise be in shareholders' best interests.

The trading price of our common shares has been, and may continue to be, subject to significant fluctuations. Since January 1, 2011, the closing sale price of our common shares on the NYSE (composite) has ranged from \$13.64 to \$5.96 per share. The market price of our common shares may fluctuate in response to company-specific and general market events and developments, including those described in this Annual Report. In addition, our leverage may impact investor demand for our common shares, which could have a material effect on the market price of our common shares.

Furthermore, the public valuation of our common shares is related primarily to the earnings that we derive from rental income with respect to the properties in which we have an interest and not from the underlying appraised value of the properties themselves. As a result, interest rate fluctuations and capital market conditions can affect the market value of our common shares. For instance, if interest rates rise, the market price of our common shares may decrease because potential investors seeking a higher yield than they would receive from our common shares may sell our common shares in favor of higher yielding securities.

Item 1B. Unresolved Staff Comments

There are no unresolved written comments that were received from the SEC staff relating to our periodic or current reports under the Securities Exchange Act of 1934.

Table of Contents

Item 2. Properties

Real Estate Portfolio

General. As of December 31, 2014, we had equity ownership interests in approximately 215 consolidated real estate properties containing approximately 39.9 million square feet of rentable space, which were approximately 96.4% leased based upon net rentable square feet. Generally, all properties in which we have an interest are held through at least one property owner subsidiary.

The properties in which we have an interest are generally subject to net or similar leases; however, in certain leases, the property owner subsidiaries are responsible for roof, structural and other repairs. In addition, certain of the properties in which we have an interest are subject to leases in which the landlord is responsible for a portion of the real estate taxes, utilities and general maintenance. Furthermore, the property owner subsidiaries are or will be responsible for all operating expenses of any vacant properties, and the property owner subsidiaries may be responsible for a significant amount of operating expenses of multi-tenant properties.

Ground Leases. Certain of the properties in which we have an interest are subject to long-term ground leases where either the tenant of the building on the property or a third party owns and leases the underlying land to the property owner subsidiary. Certain of these properties are economically owned through the holding of industrial revenue bonds primarily for real estate tax abatement purposes and as such, neither ground lease payments nor bond interest payments are made or received, respectively. For certain of the properties held under a ground lease, the ground lessee has a purchase option. At the end of these long-term ground leases, unless extended or the purchase option exercised, the land together with all improvements thereon reverts to the landowner.

Leverage. As of December 31, 2014, we had outstanding mortgages and notes payable of approximately \$0.9 billion with a weighted-average interest rate of approximately 5.2% and a weighted-average maturity of 5.9 years.

Property Charts. The following tables list our properties by type, their locations, the primary tenant/guarantor, the net rentable square feet, the expiration of the primary lease term and percent leased, as applicable, as of December 31, 2014.

Item 3. Legal Proceedings

From time to time we are directly and indirectly involved in legal proceedings arising in the ordinary course of our business. We believe, based on currently available information, and after consultation with legal counsel, that although the outcomes of those normal course proceedings are uncertain, the results of such proceedings, in the aggregate, will not have a material adverse effect on our business, financial condition and results of operations.

Item 4. Mine Safety Disclosures

Not applicable.

PART II.

Item 5. Market For Registrant's Common Equity, Related Stockholder Matters And Issuer Purchases of Equity Securities

Market Information. Our common shares are listed for trading on the NYSE under the symbol "LXP". The following table sets forth the high and low sales prices as reported by the NYSE (composite) for our common shares for each of the periods indicated below:

For the Quarters Ended:	High	Low
December 31, 2014	\$11.42	\$9.74
September 30, 2014	11.37	9.78
June 30, 2014	11.69	10.39
March 31, 2014	11.81	9.94
December 31, 2013	11.98	10.05
September 30, 2013	12.98	11.09
June 30, 2013	13.82	11.08
March 31, 2013	12.19	10.47

The per common share closing price on the NYSE (composite) was \$10.98 on February 23, 2015.

Holders. As of February 23, 2015, we had approximately 3,364 common shareholders of record.

Dividends. Since our predecessor's formation in 1993, we have made quarterly distributions without interruption.

The common share dividends paid in each quarter for the last five years are as follows:

Quarters Ended	2014	2013	2012	2011	2010
March 31,	\$0.165	\$0.15	\$0.125	\$0.115	\$0.10
June 30,	\$0.165	\$0.15	\$0.125	\$0.115	\$0.10
September 30,	\$0.170	\$0.15	\$0.125	\$0.115	\$0.10
December 31,	\$0.170	\$0.15	\$0.150	\$0.115	\$0.10

While we intend to continue paying regular quarterly dividends to holders of our common shares, the authorization of future dividend declarations will be at the discretion of our Board of Trustees and will depend on our actual cash flow, our financial condition, capital requirements, the annual distribution requirements under the REIT provisions of the Code and such other factors as our Board of Trustees deems relevant. The actual cash flow available to pay dividends will be affected by a number of factors, including, among others, the risks discussed under "Risk Factors" in Part I, Item 1A and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of this Annual Report.

We do not believe that the financial covenants contained in our debt instruments will have any adverse impact on our ability to pay dividends in the normal course of business to our common and preferred shareholders or to distribute amounts necessary to maintain our qualification as a REIT.

Direct Share Purchase Plan. We maintain a direct share purchase plan, which has two components, (i) a dividend reinvestment component and (ii) a direct share purchase component. Under the dividend reinvestment component, common shareholders and holders of OP units may elect to automatically reinvest their dividends and distributions to purchase our common shares free of commissions and other charges. We currently offer a 5.0% discount on the common shares reinvested under the dividend reinvestment component. Under the direct share purchase component, our current investors and new investors can make optional cash purchases of our common shares. The administrator of the plan, Computershare Trust Company, N.A., purchases common shares for the accounts of the participants under

the plan, at our discretion, either directly from us, on the open market or through a combination of those two options. In 2014, 2013 and 2012, we issued approximately 2.6 million, 1.5 million and 1.0 million common shares, respectively, under the plan, raising net proceeds of \$25.8 million, \$16.5 million and \$8.5 million, respectively.

Table of Contents

ATM Program. In January 2013, we implemented an ATM program, under which we may, from time to time, sell up to \$100.0 million in common shares over the term of the program. During 2013, we issued 3,409,927 common shares under this ATM program at a weighted-average issue price of \$10.82 per common share, generating gross proceeds of approximately \$36.9 million. We used the proceeds from the ATM program for general working capital, which included investments and to repay indebtedness. During 2014, we did not issue any common shares under the ATM program. As of December 31, 2014, we had approximately \$63.1 million in common shares available for issuance under the ATM program.

Equity Compensation Plan Information. The following table sets forth certain information, as of December 31, 2014, with respect to our 2011 Equity-Based Award Plan under which our equity securities are authorized for issuance as compensation.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(a)	(b)	(c)
Equity compensation plans approved by security holders	1,350,410	\$7.05	4,012,252
Equity compensation plans not approved by security holders	—	—	—
Total	1,350,410	\$7.05	4,012,252

Recent Sales of Unregistered Securities.

As previously disclosed, we issued an aggregate 1.9 million common shares upon conversion of \$12.8 million original principal amount of our 6.00% Convertible Notes at the then stated conversion rates during 2014.

Share Repurchase Program.

The following table summarizes common shares/OP units that were authorized to be repurchased during the fourth quarter of 2014 pursuant to publicly announced repurchase plans:

Period	Total number of shares/units purchased	Average price paid per share/unit (\$)	Total number of shares/units purchased as part of publicly announced plans or programs (1)	Maximum number of shares/units that may yet be purchased under the plans or programs (1)
October 1-31, 2014	—	\$—	—	1,056,731
November 1-30, 2014	—	—	—	1,056,731
December 1-31, 2014	—	—	—	1,056,731
Fourth Quarter 2014	—	\$—	—	1,056,731

(1) Share repurchase plan most recently announced on December 17, 2007, which plan has no expiration date.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

In this discussion, we have included statements that may constitute “forward-looking statements” within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are not historical facts but instead represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. These statements may relate to our future plans and objectives, among other things. By identifying these statements for you in this manner, we are alerting you to the possibility that our actual results may differ, possibly materially, from the anticipated results indicated in these forward-looking statements. Important factors that could cause our results to differ, possibly materially, from those indicated in the forward-looking statements include, among others, those discussed above in “Risk Factors” in Part I, Item 1A of this Annual Report and “Cautionary Statements Concerning Forward-Looking Statements” in Part I, of this Annual Report.

Overview

General. We are a Maryland REIT that owns a diversified portfolio of equity and debt investments in single-tenant properties and land. A majority of these properties and all land interests are subject to net or similar leases, where the tenant bears all or substantially all of the costs, including cost increases, for real estate taxes, utilities, insurance and ordinary repairs.

As of December 31, 2014, we had equity ownership interests in approximately 215 consolidated real estate properties, located in 40 states and encompassing approximately 39.9 million square feet, approximately 96.4% of which was leased.

Our revenues and cash flows are generated predominantly from property rent receipts. As a result, growth in revenues and cash flows is directly correlated to our ability to (1) acquire income producing real estate assets and (2) re-lease properties that are vacant, or may become vacant, at favorable rental rates.

In an effort to diversify our risk, we invest across the United States in properties leased to tenants in various industries, including service, technology, finance/insurance, transportation/logistics and automotive. However, industry declines, to the extent we have concentration, and general economic declines could negatively impact our results of operations and cash flows.

Portfolio Management. For leases in place at December 31, 2014, we generated approximately 41.2% of our 2014 rental revenue from leases ten years or longer, compared to approximately 30.1% of our 2013 rental revenue for leases in place at December 31, 2013. Our objective is to generate at least half of our rental revenue from leases ten years or longer, which we expect to achieve primarily through capital recycling of assets with shorter-term leases and acquiring new investments with leases longer than ten years.

At December 31, 2014, our rental revenue from single-tenant leases scheduled to expire through 2019 has been reduced to approximately 29.1% compared to approximately 38.5% at December 31, 2013. We believe we no longer have concentrated risk of lease rollover in any one year and we believe our cash flows are stable. In addition, we extended our weighted-average lease term on a cash basis to approximately 12.1 years at December 31, 2014 compared to approximately 11.2 years at December 31, 2013. This was primarily due to our acquisition volume in 2014 and 2013, including the addition of long-term land leases to our portfolio. However, certain of the long-term leases have tenant purchase options.

In recent years, demand for space in the suburban office market has not been as strong as demand for space in the industrial market. We believe this is due to a continuing trend of downsizing of corporate office employment. In addition, industrial assets generally require less capital to maintain and re-lease than office assets. As of December 31,

2014, the ratio of rental revenue from office assets to the rental revenue from industrial assets, each with lease terms shorter than ten years, was approximately 2.7:1. Our objective is to manage this ratio down to approximately 2:1 over the next several years, which we expect to accomplish partly through sales of office assets and growing our portfolio. We expect that our office portfolio will be concentrated in fewer, but larger, markets. Our capital recycling strategy may have a near-term dilutive impact on earnings due to sales of revenue producing properties, but we believe in the long-term this strategy will benefit shareholder value.

Table of Contents

Business Strategy. Our current business strategy is focused on enhancing our cash flow growth and stability, growing our portfolio with attractive long-term leased investments and maintaining a strong and flexible balance sheet to allow us to act on opportunities as they arise. See “Business” in Part I, Item 1 of this Annual Report for a detailed description of our current business strategy.

We believe a positive impact continues to result from our business strategy. In 2014, we generated gross disposition proceeds of approximately \$325.4 million as a result of our capital recycling efforts. These proceeds were primarily used to fund property investments subject to long-term leases and to reduce secured debt. In 2014, we completed real estate acquisitions/build-to-suit transactions for an aggregate capitalized cost of approximately \$212.3 million and reduced our weighted-average interest rate on outstanding consolidated indebtedness by approximately 200 basis points primarily by refinancing higher interest rate debt. Our secured debt decreased to approximately \$0.9 billion at December 31, 2014 compared to \$1.2 billion at December 31, 2013, which was 19.0% and 23.9% of total gross assets, respectively. We met our objective to lower our secured debt to 20% or less of total gross assets. We also now have fewer near-term debt maturities compared to recent years. We expect to continue to further reduce our secured debt as it matures and acquire new investments primarily without secured debt; however, we may procure credit tenant lease financing and other forms of long-term secured financing in certain situations. We believe our financing strategy will also allow us to further lower our financing costs and improve our cash flow, financial flexibility and certain credit metrics.

We expect our business strategy will enable us to continue to improve our liquidity and strengthen our overall balance sheet. We believe liquidity and a strong balance sheet will allow us to take advantage of attractive investment opportunities as they arise.

Investment Trends. Making investments in income producing single-tenant net-leased real estate assets is one of our primary focuses. The challenge we face is finding investments that will provide an attractive return without compromising our real estate underwriting criteria. We believe we have access to acquisition opportunities due to our relationships with developers, brokers, corporate users and sellers. However, competition for income producing single-tenant net-leased real estate assets is strong. When we acquire real estate assets, we look for commercial real estate assets or land interests subject to a long-term net-lease which have one or more of the following characteristics (1) a credit-worthy tenant, (2) adaptability to a variety of users, including multi-tenant use, (3) an attractive geographic location, and (4) the potential for capital appreciation.

We believe our 2015 investment pipeline is sizable compared to our 2014 investment pipeline and we expect our investment pipeline to grow considerably during 2015. Our acquisition volume consists primarily of purchases from third parties, sale-leaseback transactions, including leased land transactions, and build-to-suit transactions whereby we (1) provide capital to developers who are engaged in build-to-suit transactions and/or commit to purchase the property from developers upon completion or (2) acquire a property subject to a single-tenant net-lease and engage a developer to complete construction of a build-to-suit property as required by the lease. We believe these arrangements offer developers and/or tenants access to capital while simultaneously providing us with attractive risk-adjusted projected yields.

During 2014, we saw continued cap rate compression in the acquisition market as a whole, although we believe that yields for investment opportunities are attractive when compared to our financing costs. We believe that build-to-suit transactions continue to have stabilized yields above those in the purchase market. Build-to-suit transactions, as compared with immediate deliverable acquisitions, result in a delay in the receipt of cash flow and the recognition of funds from operations during the construction period, but provide us with modern buildings subject to long-term leases.

We generally mitigate our cost exposure by requiring purchase agreements, development agreements and/or loan agreements to specify a maximum price and/or loan commitment amount prior to our investment. Cost overruns are generally the responsibility of the developer or, in some cases, the prospective tenant. To further mitigate risk, we believe we perform stringent underwriting procedures such as, among other items, (1) requiring payment and performance bonds and/or completion guarantees from developers and/or contractors; (2) engaging third-party construction consultants and/or engineers to monitor construction progress and quality; (3) only hiring developers

with a proven history of performance; (4) requiring developers to provide financial statements and in some cases personal guarantees from principals; (5) obtaining and reviewing detailed plans and construction budgets; (6) requiring a long-term tenant lease to be executed prior to funding; and (7) securing liens on the property to the extent of construction funding.

We believe that the long-term leases with escalating rents we have been adding to our portfolio are strengthening our future cash flows by extending our weighted-average lease term, balancing our lease expiration schedule, reducing the average age of our portfolio and supporting our dividend growth objectives.

Table of Contents

The following is a summary of our property acquisitions and build-to-suit transactions for the year ended December 31, 2014:

Property Acquisitions

Location	Property Type	Square Feet (000's)	Capitalized Cost (millions)	Approximate Lease Term (Years)	Date Acquired
Parachute, CO	Office	49	\$13.9	19	1Q 2014
Rock Hill, SC	Office	104	\$24.7	20	1Q 2014
Lewisburg, TN	Industrial	310	\$13.3	12	2Q 2014
New York, NY	Land	—	\$30.4	99	4Q 2014
Vineland, NJ	Rehab Hospital	39	\$19.1	28	4Q 2014
Anniston, AL	Industrial	267	\$20.9	15	4Q 2014
		769	\$122.3		

Completed Build-to-Suit Transactions

Location	Property Type	Square Feet (000's)	Capitalized Cost(millions)	Lease Term (Years)	Date Acquired	Capitalized Cost Per Square Foot
Rantoul, IL	Industrial	813	\$41.3	20	1Q 2014	\$50.76
North Las Vegas, NV	Industrial	180	\$28.3	20	2Q 2014	\$156.74
Bingen, WA	Industrial	125	\$20.4	10	2Q 2014	\$163.73
		1,118	\$90.0			

Ongoing Build-to-Suit Transactions

The following is a summary of our ongoing build-to-suit transactions as of December 31, 2014:

Location	Property Type	Square Feet (000's)	Expected Maximum Commitment/Estimated Completion Cost (millions)	Estimated Completion Date	GAAP Investment Balance as of 12/31/14 (millions)
Oak Creek, WI	Industrial	164	\$ 22.6	2Q 2015	\$11.9
Thomson, GA	Industrial	208	\$ 10.2	2Q 2015	\$3.4
Richmond, VA	Office	330	\$ 110.1	3Q 2015	\$62.2
Lake Jackson, TX	Office/R&D	664	\$ 166.2	4Q 2016	\$28.2
		1,366	\$ 309.1		\$105.7

In addition, we have committed to acquire upon their completion the following properties:

Location	Property Type	Estimated Acquisition Cost (millions)	Estimated Acquisition Date	Lease Term (Years)
Auburn Hills, MI	Office	\$40.0	1Q 15	14
Richland, WA	Industrial	\$155.0	4Q 15	20
		\$195.0		

In addition, as of December 31, 2014, a joint venture in which we currently have a 25% interest has an ongoing build-to-suit transaction as follows:

Location	Property Type	Square Feet (000's)	Expected Maximum Commitment/Estimated Completion Cost (millions)	Estimated Completion Date	GAAP Investment Balance as of 12/31/14 (millions)
----------	---------------	------------------------	---	---------------------------------	--

Houston, TX	Private School	274	\$ 86.5	3Q 2016	\$11.8
-------------	----------------	-----	---------	---------	--------

We may also provide up to \$56.7 million in construction financing to the joint venture.

We can provide no assurance with respect to the completion, acquisition, cost or timing of these ongoing build-to-suit and forward purchase transactions.

Table of Contents

The following is a summary of our property acquisitions and completed build-to-suit transactions for the year ended December 31, 2013:

Property Acquisitions

Location	Property Type	Square Feet (000's)	Capitalized Cost (millions)	Lease Term (Years)	Date Acquired
Houston, TX ⁽¹⁾	Industrial	132	\$81.4	25	1Q 2013
New York, NY ⁽²⁾	Land	—	\$302.0	99	4Q 2013
Danville, VA	Land	—	\$4.7	15	4Q 2013
Various ⁽³⁾	Office	40	\$13.1	20	4Q 2013
Omaha, NE	Office	128	\$39.1	20	4Q 2013
		300	\$440.3		

(1) Asset consists of a deep-water intermodal industrial terminal and existing structures on approximately 90 acres.

(2) Includes three properties.

(3) Includes four properties.

Completed Build-to-Suit Transactions

Location	Property Type	Square Feet (000's)	Capitalized Cost(millions)	Lease Term (Years)	Date Acquired	Capitalized Cost Per Square Foot
Long Island City, NY	Industrial	140	\$42.1	15	1Q 2013	\$300.18
Denver, CO ⁽¹⁾	Office	167	\$38.4	15	2Q 2013	\$229.89
Tuscaloosa, AL ⁽²⁾	Retail	42	\$8.7	15	2Q 2013	\$206.10
Albany, GA ⁽³⁾	Retail	45	\$7.4	15	4Q 2013	\$164.48
		394	\$96.6			

(1) Includes \$3.8 million of tenant related costs.

(2) Includes leasing costs of \$0.3 million. Property was sold in September 2013.

(3) Includes leasing costs of \$0.3 million.

Loan Investments. We invest in loan assets secured by single-tenant real estate assets, which (1) we feel comfortable owning for our investment should the borrower default for reasons other than an underlying tenant default or (2) are necessary for an efficient disposition of our equity interest in the property. The following is a summary of our outstanding loan investments at December 31, 2014 and 2013:

Loan	Loan carrying value ⁽¹⁾ (millions)		Interest Rate	Maturity Date
	12/31/2014	12/31/2013		
Norwalk, CT ⁽²⁾	\$—	\$28.2	7.50%	11/2014
Homestead, FL ⁽²⁾	\$—	\$10.2	7.50%	08/2014
Westmont, IL	\$12.2	\$12.6	6.45%	10/2015
Southfield, MI	\$3.3	\$6.6	4.55%	02/2015
Austin, TX	\$2.8	\$2.4	16.00%	10/2018
Kennewick, WA	\$85.3	\$37.0	9.00%	05/2022
Other	\$2.0	\$2.4	8.00%	2021-2022
	\$105.6	\$99.4		

(1) Loan carrying value includes accrued interest and is net of origination costs and loan losses.

(2) Loan satisfied during 2014.

In 2014, we initiated foreclosure proceedings against the borrowers of a loan secured by a property in Westmont, Illinois. We sold this property in 2007 and issued a purchase mortgage to the buyer. Effective November 2013, the tenant of the property terminated its lease and as a result we recognized a loan loss of \$13.9 million in 2013 on the

outstanding loan receivable. In 2014, we recognized a \$2.5 million loan loss on a loan secured by an office property in Southfield, Michigan as the borrower has indicated that it will not satisfy the loan at maturity.

In 2013, we foreclosed on our loan receivable that was secured by an office property in Schaumburg, Illinois. The loan had an outstanding balance of \$21.6 million (not including default interest and other penalties), which we believe was less than the then estimated fair value of the property.

Table of Contents

Leasing Trends. Re-leasing properties that are currently vacant or as leases expire at favorable effective rates is one of our primary asset management focuses. The primary risks associated with re-tenanting properties are (1) the period of time required to find a new tenant, (2) whether rental rates will be lower than previously received, (3) the significance of leasing costs such as commissions and tenant improvement allowances and (4) the payment of capital expenditures and operating costs such as real estate taxes, insurance and maintenance with no offsetting revenue.

Our property owner subsidiaries seek to mitigate these risks by (1) staying in close contact with our tenants during the lease term in order to assess the tenant's current and future occupancy needs, (2) maintaining relationships with local brokers to determine the depth of the rental market and (3) retaining local expertise to assist in the re-tenanting of a property. However, no assurance can be given that once a property becomes vacant it will subsequently be re-let. Generally, a tenant in a single-tenant office property commences lease extension discussions well in advance of lease expiration. If the lease has a year or less remaining until expiration, there is a high likelihood that the tenant will not extend the lease for the entire property.

If a property cannot be re-let to a single user and the property can be adapted to multi-tenant use, we determine whether the costs of adapting the property to multi-tenant use outweigh the benefit of funding operating costs while searching for a single-tenant.

Certain of the long-term leases on properties in which we have an ownership interest contain provisions that may mitigate the adverse impact of inflation on our operating results. Such provisions include clauses entitling us to receive (1) scheduled fixed base rent increases and (2) base rent increases based upon the consumer price index. In addition, a majority of the leases on the single-tenant properties in which we have an ownership interest require tenants to pay operating expenses, including maintenance, real estate taxes, insurance and utilities, thereby reducing our exposure to increases in costs and operating expenses. In addition, the leases on single-tenant properties in which we have an ownership interest are generally structured in a way that minimizes our responsibility for capital improvements. However, certain of our leases provide for some level of landlord responsibility for capital repairs and replacements, the cost of which is generally factored into the rental rate.

Our motivation to release vacant space requires us to meet market demands with respect to rental rates, tenant concessions and landlord responsibilities. As a result, the obligations of our property owner subsidiaries on new leases and newly renewed or extended leases generally increase to include, among other items, some form of responsibility for capital repairs and replacements.

During 2014, we entered into 59 new leases and lease extensions encompassing approximately 5.1 million square feet. The average GAAP base rent on these extended leases was approximately \$4.39 per square foot compared to the average GAAP base rent on these leases before extension of \$4.72 per square foot. The weighted-average cost of tenant improvements and lease commissions during 2014 was approximately \$36.67 per square foot for new leases and \$1.57 per square foot for extended leases. Due to the nature of the expected lease rollovers in coming years, we expect renewal rents to be lower than expiring rents and aggregate tenant improvement allowances and leasing costs to decrease from their current levels in such years. However, following 2015, we expect the impact of such lower renewal rent to be mitigated by our capital recycling strategy and our long-term leases with annual or periodic rent increases.

We continue to monitor the credit of tenants of properties in which we have an interest by (1) subscribing to rating agency information, so that we can monitor changes in the ratings of our rated tenants, (2) reviewing financial statements that are publicly available or that are required to be delivered to us under the applicable lease, (3) monitoring news reports regarding our tenants and their respective businesses and (4) monitoring the timeliness of rent collections.

During 2014, 2013 and 2012, we conveyed in foreclosure or via a deed-in-lieu of foreclosure certain properties in which we had an interest as we deemed the non-recourse mortgages encumbering the properties were in excess of the value of the property collateral. Our property owner subsidiaries may convey properties to lenders or the property owner subsidiary may declare bankruptcy in the future if there is no or limited recourse to us and a property owner subsidiary is unable to refinance, re-let or sell its vacated property or if a tenant renews at a lower rent or a new tenant pays a lower rent that does not justify a value of the property in excess of the mortgage balance.

Impairment charges. During 2014, 2013 and 2012, we incurred impairment charges on our assets, excluding loan receivables, of \$48.6 million, \$34.6 million and \$10.0 million, respectively, including amounts classified in discontinued operations, due primarily to the assets being sold below their carrying value and a deterioration in economic conditions since the acquisition of such assets. These real estate assets were primarily non-core assets including retail properties, under performing and multi-tenant properties. In addition, in 2014 and 2013, we recognized loan losses of \$2.5 million and \$13.9 million, respectively, relating to loans receivable secured by vacant or soon-to-be vacant suburban office properties. We cannot estimate if we will incur, or the amount of, future impairment charges on our assets. See Part I, Item 1A “Risk Factors”, of this Annual Report.

Table of Contents

Critical Accounting Policies. Our accompanying consolidated financial statements have been prepared in accordance with GAAP, which require our management to make estimates that affect the amounts of revenues, expenses, assets and liabilities reported and related disclosures of contingent assets and liabilities. A summary of our significant accounting policies which are important to the portrayal of our financial condition and results of operations is set forth in note 2 to the Consolidated Financial Statements, which are included in “Financial Statements and Supplementary Data” in Part II, Item 8 of this Annual Report.

The following is a summary of our critical accounting policies, which require some of management's most difficult, subjective and complex judgments.

Basis of Presentation and Consolidation. Our consolidated financial statements are prepared on the accrual basis of accounting. The financial statements reflect our accounts and the accounts of our consolidated subsidiaries. We consolidate our wholly-owned subsidiaries, partnerships and joint ventures which we control through (1) voting rights or similar rights or (2) by means other than voting rights if we are the primary beneficiary of a variable interest entity, which we refer to as a VIE. Entities which we do not control and entities which are VIEs in which we are not the primary beneficiary are generally accounted for by the equity method. Significant judgments and assumptions are made by us to determine whether an entity is a VIE such as those regarding an entity's equity at risk, the entity's equity holders' obligations to absorb anticipated losses and other factors. In addition, the determination of the primary beneficiary of a VIE requires judgment to determine the party that has (1) power over the significant activities of the VIE and (2) an obligation to absorb losses or the right to receive benefits that could be potentially significant to the VIE.

Judgments and Estimates. Our management has made a number of estimates and assumptions relating to the reporting of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses to prepare our consolidated financial statements in conformity with GAAP. These estimates and assumptions are based on our management's best estimates and judgment. Our management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment. The current economic environment has increased the degree of uncertainty inherent in these estimates and assumptions. Our management adjusts such estimates when facts and circumstances dictate. The most significant estimates made include the recoverability of accounts receivable, allocation of property purchase price to tangible and intangible assets acquired and liabilities assumed, the determination of VIEs and entities that should be consolidated, the determination of impairment of long-lived assets, loans receivable and equity method investments, valuation and impairment of assets held by equity method investees, valuation of derivative financial instruments and the useful lives of long-lived assets.

Purchase Accounting and Acquisition of Real Estate. The fair value of the real estate acquired, which includes the impact of fair value adjustments for assumed mortgage debt related to property acquisitions, is allocated to the acquired tangible assets, consisting of land, building and improvements and identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, other value of in-place leases and value of tenant relationships, based in each case on their fair values.

The fair value of the tangible assets of an acquired property (which includes land, building and improvements and fixtures and equipment) is determined by valuing the property as if it were vacant. The “as-if-vacant” value is then allocated to land and building and improvements based on our management's determination of relative fair values of these assets. Factors considered by our management in performing these analyses include an estimate of carrying costs during the expected lease-up periods considering current market conditions and costs to execute similar leases. In estimating carrying costs, our management includes real estate taxes, insurance and other operating expenses and estimates of lost rental revenue during the expected lease-up periods based on current market demand. Our management also estimates costs to execute similar leases including leasing commissions.

In allocating the fair value of the identified intangible assets and liabilities of an acquired property, above-market and below-market lease values are recorded based on the difference between the current in-place lease rent and management's estimate of current market rents. Below-market lease intangibles are recorded as part of deferred

revenue and amortized into rental revenue over the non-cancelable periods and bargain renewal periods of the respective leases. Above-market leases are recorded as part of intangible assets and amortized as a direct charge against rental revenue over the non-cancelable portion of the respective leases.

The aggregate value of other acquired intangible assets, consisting of in-place leases and tenant relationship values, is measured by the excess of (1) the purchase price paid for a property over (2) the estimated fair value of the property as if vacant, determined as set forth above. This aggregate value is allocated between in-place lease values and tenant relationship values based on management's evaluation of the specific characteristics of each tenant's lease. The value of in-place leases is amortized to expense over the remaining non-cancelable periods and any bargain renewal periods of the respective leases. The value of tenant relationships is amortized to expense over the applicable lease term plus expected renewal periods.

Table of Contents

Revenue Recognition. We recognize lease revenue on a straight-line basis over the term of the lease unless another systematic and rational basis is more representative of the time pattern in which the use benefit is derived from the leased property. Revenue is recognized on a contractual basis for leases with escalations tied to a consumer price index with no floor. Renewal options in leases with rental terms that are lower than those in the primary term are excluded from the calculation of straight line rent if the renewals are not reasonably assured. In those instances in which we fund tenant improvements and the improvements are deemed to be owned by us, revenue recognition will commence when the improvements are substantially completed and possession or control of the space is turned over to the tenant. When we determine that the tenant allowances are lease incentives, we commence revenue recognition when possession or control of the space is turned over to the tenant for tenant work to begin. The lease incentive is recorded as a deferred expense and amortized as a reduction of revenue on a straight-line basis over the respective lease term. Determining if a tenant allowance is a lease incentive requires significant judgment. We recognize lease termination payments as a component of rental revenue in the period received, provided that there are no further obligations under the lease; otherwise the lease termination payment is amortized on a straight-line basis over the remaining obligation period. All above-market lease assets, below-market lease liabilities and deferred rent assets or liabilities for terminated leases are charged against or credited to rental revenue in the period the lease is terminated. All other capitalized lease costs and lease intangibles are accelerated via amortization expense to the date of termination.

Gains on sales of real estate are recognized based on the specific timing of the sale as measured against various criteria related to the terms of the transactions and any continuing involvement associated with the properties. If the sales criteria are not met, the gain is deferred and the finance, installment or cost recovery method, as appropriate, is applied until the sales criteria are met. To the extent we sell a property and retain a partial ownership interest in the property, we recognize gain to the extent of the third-party ownership interest.

Accounts Receivable. We continuously monitor collections from our tenants and will make a provision for estimated losses based upon historical experience and any specific tenant collection issues that we have identified.

Impairment of Real Estate. We evaluate the carrying value of all tangible and intangible real estate assets for possible impairment when an event or change in circumstance has occurred that indicates its carrying value may not be recoverable. The evaluation includes estimating and reviewing anticipated future undiscounted cash flows to be derived from the asset. If such cash flows are less than the asset's carrying value, an impairment charge is recognized to the extent by which the asset's carrying value exceeds the estimated fair value. Estimating future cash flows is highly subjective and such estimates could differ materially from actual results.

Impairment of Equity Method Investments. We assess whether there are indicators that the value of our equity method investments may be impaired. An investment's value is impaired if we determine that a decline in the value of the investment below its carrying value is other-than-temporary. The assessment of impairment is highly subjective and involves the application of significant assumptions and judgments about our intent and ability to recover our investment given the nature and operations of the underlying investment, including the level of our involvement therein, among other factors. To the extent impairment has occurred, the loss is measured as the excess of the carrying amount of the investment over the estimated value of the investment.

Loans Receivable. We evaluate the collectability of both interest and principal of each of our loans, if circumstances warrant, to determine whether the loan is impaired. A loan is considered to be impaired, when based on current information and events, it is probable that we will be unable to collect all amounts due according to the existing contractual terms. Significant judgments are required in determining whether impairment has occurred. When a loan is considered to be impaired, the amount of the loss accrual is calculated by comparing the recorded investment to the value determined by discounting the expected future cash flows at the loan's effective interest rate, the loan's observable current market price or the fair value of the underlying collateral. Interest on impaired loans is recognized on a cash basis.

Acquisition, Development and Construction Arrangements. We evaluate loans receivable where we participate in residual profits through loan provisions or other contracts to ascertain whether we have the same risks and rewards as an owner or a joint venture partner. Where we conclude that such arrangements are more appropriately treated as an

investment in real estate, we reflect such loan receivable as an equity investment in real estate under construction in the Consolidated Balance Sheets. In these cases, no interest income is recorded on the loan receivable and we record capitalized interest during the construction period. In arrangements where we engage a developer to construct a property or provide funds to a tenant to develop a property, we will capitalize the funds provided to the developer/tenant and internal costs of interest and real estate taxes, if applicable, during the construction period. The accounting for these critical accounting policies and implementation of accounting guidance issued in the future involves the making of estimates based on current facts, circumstances and assumptions which could change in a manner that would materially affect management's future estimates with respect to such matters. Accordingly, future reported financial conditions and results could differ materially from financial conditions and results reported based on management's current estimates.

Table of Contents

Liquidity

General. Since becoming a public company, our principal sources of liquidity have been (1) undistributed cash flows generated from our investments, (2) the public and private equity and debt markets, including issuances of OP units, (3) property specific debt, (4) corporate level borrowings, (5) commitments from co-investment partners and (6) proceeds from the sales of our investments.

Our ability to incur additional debt to fund acquisitions is dependent upon our existing leverage, the value of the assets we are attempting to leverage and general economic and credit market conditions, which may be outside of management's control or influence.

Cash Flows. We believe that cash flows from operations will continue to provide adequate capital to fund our operating and administrative expenses, regular debt service obligations and all dividend payments in accordance with REIT requirements in both the short-term and long-term. In addition, we anticipate that cash on hand, corporate level borrowings, capital recycling proceeds, issuances of equity and debt, mortgage proceeds and our other principal sources of liquidity, will be available to provide the necessary capital required to fund our operations and allow us to grow.

Cash flows from operations as reported in the Consolidated Statements of Cash Flows totaled \$214.7 million for 2014, \$206.3 million for 2013 and \$163.8 million for 2012. Cash flows from operations increased in 2014 and 2013 primarily due to an increase in acquisitions, offset by yield maintenance payments made on debt satisfactions. The underlying drivers that impact working capital and therefore cash flows from operations are the timing of (1) the collection of rents and tenant reimbursements, loan interest payments from borrowers, and advisory fees, and (2) the payment of interest on mortgage debt and operating and general and administrative costs. We believe the net-lease structure of the leases encumbering a majority of the properties in which we have an interest mitigates the risks of the timing of cash flows from operations since the payment and timing of operating costs related to the properties are generally borne directly by the tenant. Collection and timing of tenant rents is closely monitored by management as part of our cash management program.

Net cash used in investing activities totaled \$43.1 million in 2014, \$597.6 million in 2013 and \$134.1 million in 2012. Cash provided by investing activities related primarily to proceeds from the sale of properties and marketable equity securities, collection of loans receivable, distributions from non-consolidated entities in excess of accumulated earnings, proceeds from the sale of interests in non-consolidated entities and changes in deposits and restricted cash. Cash used in investing activities related primarily to investments in real estate properties, co-investment programs, marketable equity securities and loans receivable and an increase in deferred leasing costs, deposits and restricted cash. Therefore, the fluctuation in investing activities relates primarily to the timing of investments and dispositions.

Net cash provided by (used in) financing activities totaled \$(57.8) million in 2014, \$434.5 million in 2013 and \$(59.4) million in 2012. Cash provided by financing activities was primarily attributable to net proceeds from the issuance of common shares, contributions from noncontrolling interests and non-recourse mortgage and corporate borrowings. Cash used in financing activities related primarily to dividend and distribution payments, repurchases or redemptions of preferred shares and noncontrolling interests, purchase of a noncontrolling interest, an increase in deferred financing costs and debt payments and repurchases.

Public and Private Equity and Debt Markets. We access the public and private equity and debt markets when we (1) believe conditions are favorable and (2) have a compelling use of proceeds. During 2014, 2013 and 2012, we raised net proceeds of approximately \$23.6 million, \$434.9 million and \$162.7 million, respectively, through the issuance of common shares, including option exercises. During 2014 and 2013, we raised net proceeds of approximately \$249.7 million and \$247.6 million, respectively, through the issuance of investment-grade rated 4.40% and 4.25% Senior Notes. We primarily used these proceeds to fund investments and retire indebtedness.

During 2007, we issued an aggregate \$450.0 million of 5.45% Exchangeable Guaranteed Notes due in 2027. From 2008 through 2012, we repurchased and retired all notes for \$358.1 million in cash and 1.6 million common shares having a value at issuance of \$23.5 million (or \$14.50 per share).

Table of Contents

During 2010, we issued \$115.0 million aggregate principal amount of 6.00% Convertible Notes. The notes pay interest semi-annually in arrears and mature in January 2030. The holders of the notes may require us to repurchase their notes in January 2017, January 2020 and January 2025 for cash equal to 100% of the principal of the notes to be repurchased, plus any accrued and unpaid interest. We may not redeem any notes prior to January 2017, except to preserve our REIT status. Thereafter, we may redeem the notes for cash equal to 100% of the principal of the notes to be redeemed, plus any accrued and unpaid interest. As of the date of filing this Annual Report, the notes have a conversion rate of 151.5965 common shares per \$1,000 principal amount of the notes, representing a conversion price of approximately \$6.60 per common share. The conversion rate is subject to adjustment under certain circumstances, including increases in our dividend rate above a certain threshold and the issuance of stock dividends. The notes are convertible by the holders under certain circumstances for cash, common shares or a combination of cash and common shares at our election. During 2014, 2013 and 2012, holders of the notes converted an aggregate of \$12.8 million, \$54.9 million and \$31.1 million, respectively, of notes for 1.9 million, 7.9 million and 4.5 million common shares, respectively, and an aggregate cash payment by us of \$0.2 million, \$3.3 million and \$2.4 million, respectively, plus accrued and unpaid interest. As of December 31, 2014, \$16.2 million in aggregate principal amount of these notes were outstanding.

During 2013 and 2012, we repurchased and retired the remaining outstanding 8.05% Series B Cumulative Redeemable Preferred Stock, par value \$0.0001 per share, which we refer to as Series B Preferred Shares, (approximately 2.7 million) and Series D Preferred Shares (approximately 6.2 million) and approximately 35 thousand Series C Preferred Shares for an aggregate purchase price, including accrued and unpaid dividends, of \$226.5 million, which was at a \$256 thousand discount to the liquidation preferences of the preferred shares.

We may access these markets and other markets in the future to implement our business strategy and to fund future growth. However, the continued general economic uncertainty and the volatility in these markets makes accessing these markets challenging.

UPREIT Structure. Our UPREIT structure permits us to effect acquisitions by issuing OP units to a property owner as a form of consideration in exchange for the property. Substantially all outstanding OP units are redeemable by the holder at certain times on a one OP unit for approximately 1.13 common shares basis or, at our election, with respect to certain OP units, cash. Substantially all outstanding OP units require us to pay quarterly distributions to the holders of such OP units equal to the dividends paid to our common shareholders on an as redeemed basis and the remaining OP units have stated distributions in accordance with their applicable partnership agreement. To the extent that our dividend per share is less than a stated distribution per unit per the applicable partnership agreement, the stated distributions per unit are reduced by the percentage reduction in our dividend. We are party to a funding agreement with our operating partnership under which we may be required to fund distributions made on account of OP units. No OP units have a liquidation preference. The number of common shares that will be outstanding in the future should be expected to increase, and income (loss) attributable to noncontrolling interests should be expected to decrease (increase), as such OP units are redeemed for our common shares.

As of December 31, 2014, there were 3.4 million OP units outstanding which were convertible into 3.9 million common shares assuming we satisfied redemptions entirely with common shares. In recent years, few sellers of real estate have been seeking OP units as a form of consideration.

Property Specific Debt. As of December 31, 2014, our consolidated property owner subsidiaries have related balloon payments of \$142.6 million and \$129.9 million maturing in 2015 and 2016, respectively. With respect to mortgages encumbering properties where the expected lease rental revenues are sufficient to provide an estimated property value in excess of the mortgage balance, we believe our property owner subsidiaries have sufficient sources of liquidity to meet these obligations through future cash flows from operations, the credit markets and, if determined appropriate by

us, a capital contribution from us from either cash on hand (\$191.1 million at December 31, 2014) or borrowing capacity on our primary credit facility (\$385.4 million as of December 31, 2014, subject to covenant compliance).

In the event that the estimated property value is less than the mortgage balance, the mortgages encumbering the properties in which we have an interest are generally non-recourse to us and the property owner subsidiaries, such that a property owner subsidiary may, if appropriate, satisfy a mortgage obligation by transferring title of the property to the lender or permitting a lender to foreclose. There are significant risks associated with conveying properties to lenders through foreclosure which are described in "Risk Factors" in Part I, Item 1A of this Annual Report.

We expect to primarily use corporate level borrowings to finance our acquisitions and debt maturities. Our objective is to continue to lower our secured debt by retiring mortgages as they mature and unencumber assets so that approximately 65% to 70% of our assets will be unencumbered. We also expect to continue to use property specific, non-recourse mortgages in certain situations as we believe that by properly matching a debt obligation, including the balloon maturity risk, with the terms of a lease, our cash-on-cash returns increase and the exposure to residual valuation risk is reduced.

Table of Contents

In 2014 and 2013, we obtained, through consolidated property owner subsidiaries, \$27.8 million and \$253.5 million, respectively, in non-recourse mortgage loans with interest rates ranging from 2.2% to 4.7% and maturity dates ranging from 2019 to 2027.

Corporate Borrowings. The following Senior Notes were outstanding as of December 31, 2014:

Issue Date	Face Amount (millions)	Interest Rate	Maturity Date	Issue Price	
May 2014	\$250.0	4.40	% June 2024	99.883	%
June 2013	250.0	4.25	% June 2023	99.026	%
	\$500.0				

The Senior Notes are unsecured and pay interest semi-annually in arrears. We may redeem the Senior Notes at our option at any time prior to maturity in whole or in part by paying the principal amount of the Senior Notes being redeemed plus a premium.

We have a \$400.0 million unsecured revolving credit facility with KeyBank National Association, or KeyBank, as agent. The unsecured revolving credit facility matures in February 2017 but can be extended until February 2018 at our option. The unsecured revolving credit facility bears interest at LIBOR plus 0.95% to 1.725% (1.15% as of December 31, 2014). At December 31, 2014, the unsecured revolving credit facility had no amounts outstanding, outstanding letters of credit of \$14.6 million and availability of \$385.4 million, subject to covenant compliance. We also have a five-year \$250.0 million unsecured term loan facility from KeyBank, as agent. The unsecured term loan matures in February 2018 and requires regular payments of interest only at interest rates ranging from LIBOR plus 1.10% to 2.10% (1.35% as of December 31, 2014). As of December 31, 2014, we have entered into aggregate interest rate swap agreements to fix the LIBOR component at a weighted-average rate of 1.09% on the \$250.0 million outstanding through February 2018.

In addition, we have a \$255.0 million unsecured term loan from Wells Fargo Bank, National Association, as agent. The term loan matures in January 2019 and requires regular payments of interest only at interest rates ranging from LIBOR plus 1.50% to 2.25% (1.75% as of December 31, 2014). We may prepay outstanding borrowings under the term loan at a premium through January 12, 2016 and at par thereafter. We entered into interest rate swap agreements to fix the LIBOR component at a weighted-average rate of 1.42% on the \$255.0 million of term loan LIBOR-based debt through January 2019.

As of December 31, 2014, we were in compliance with the financial covenants contained in our corporate level debt agreements.

In March 2008, we obtained \$25.0 million and \$45.0 million original principal amount secured term loans from KeyBank. The loans were fully satisfied in January 2012 with proceeds from the secured term loan and our credit facility. Also in January 2012, we fully satisfied the remaining \$62.2 million original principal amount outstanding of our 5.45% Exchangeable Guaranteed Notes due in 2027 obtained in 2007.

During 2007, we issued \$200.0 million in Trust Preferred Securities, which bear interest at a fixed rate of 6.804% through April 2017 and thereafter at a variable rate of three month LIBOR plus 170 basis points through maturity. These securities are (1) classified as debt, (2) due in 2037 and (3) currently redeemable by us. As of December 31, 2014 and 2013, there were \$129.1 million of these securities outstanding.

While property specific mortgages with favorable terms have become harder to obtain on certain properties, corporate level borrowings have generally been available and we expect this to continue to be the case in the near future.

Co-investment Programs and Joint Ventures. We believe that entering into co-investment programs and joint ventures with institutional investors and other real estate companies is a good way to access private capital while mitigating our risk in certain assets and increasing our return on equity to the extent we earn management or other fees. However,

investments in co-investment programs and joint ventures limit our ability to make investment decisions unilaterally relating to the assets and limit our ability to deploy capital. If we continue to grow, we expect to enter into co-investment programs and joint ventures primarily with respect to assets that we ordinarily would not have invested in such as non-core assets. We believe this mitigates our exposure to the risks inherent in non-core assets. In 2014, we entered into a joint venture to construct a private school in Houston, Texas, which will be net leased for a 20-year term upon completion.

Table of Contents

Capital Recycling. Part of our strategy to effectively manage our balance sheet involves pursuing and executing well on property dispositions and recycling of capital. During 2014, we disposed of our interests in certain properties for a gross price of \$272.4 million. These proceeds were used to retire indebtedness encumbering properties in which we have an interest and make investments. In addition, in 2014 we disposed of our interest in a property via foreclosure in full satisfaction of \$9.9 million of related non-recourse mortgage.

As asset values have continued to rise, we have continued to look at opportunities to recycle capital with a focus on capturing the value of our multi-tenant and retail properties and reducing our exposure to the suburban office sector. We will continue to look at capital recycling opportunities as part of the ongoing effort to further transform our portfolio, with a greater emphasis on suburban office dispositions and non-core asset dispositions, in individual or portfolio transactions. We believe capital recycling (1) provides cost effective and timely capital support for our investment activities and (2) allows us to maintain line capacity and cash in advance of what we expect to be a growing investment pipeline.

Liquidity Needs. Our principal liquidity needs are the contractual obligations set forth under the heading “Contractual Obligations,” below, and the payment of dividends to our shareholders and distributions to the holders of OP units.

As of December 31, 2014, we had approximately \$2.1 billion of indebtedness, consisting of mortgages and notes payable outstanding, term loans, 4.40% and 4.25% Senior Notes, 6.00% Convertible Notes and Trust Preferred Securities, with a weighted-average interest rate of approximately 4.5%. The ability of a property owner subsidiary to make debt service payments depends upon the rental revenues of its property and its ability to refinance the mortgage related thereto, sell the related property, or access capital from us or other sources. A property owner subsidiary's ability to accomplish such goals will be affected by numerous economic factors affecting the real estate industry, including the risks described under "Risk Factors" in Part I, Item 1A of this Annual Report.

If we are unable to satisfy our contractual obligations and other operating costs with our cash flow from operations, we intend to use borrowings and proceeds from issuances of equity or debt securities. If a property owner subsidiary is unable to satisfy its contractual obligations and other operating costs, it may default on its obligations and lose its assets in foreclosure or through bankruptcy proceedings.

We elected to be taxed as a REIT under Sections 856 through 860 of the Code, commencing with our taxable year ended December 31, 1993. If we qualify for taxation as a REIT, we generally will not be subject to federal corporate income taxes on our net taxable income that is currently distributed to shareholders.

In connection with our intention to continue to qualify as a REIT for federal income tax purposes, we expect to continue paying regular dividends to our shareholders. These dividends are expected to be paid from operating cash flows and/or from other sources. Since cash used to pay dividends reduces amounts available for capital investments, we generally intend to maintain a conservative dividend payout ratio, reserving such amounts as we consider necessary for the maintenance or expansion of properties in our portfolio, debt reduction, the acquisition of interests in new properties as suitable opportunities arise, and such other factors as our Board of Trustees considers appropriate.

We paid approximately \$159.5 million in cash dividends to our common and preferred shareholders in 2014. Although our property owner subsidiaries receive the majority of our base rental payments on a monthly basis, we intend to continue paying dividends quarterly. Amounts accumulated in advance of each quarterly distribution are invested by us in short-term money market or other suitable instruments.

Capital Resources

General. Due to the net-lease structure of a majority of our investments, our property owner subsidiaries historically have not incurred significant expenditures in the ordinary course of business to maintain the properties in which we have an interest. As leases expire, we expect our property owner subsidiaries to incur costs in extending the existing tenant leases, re-tenanting the properties with a single-tenant, or converting the property to multi-tenant use. The amounts of these expenditures can vary significantly depending on tenant negotiations, market conditions and rental rates.

Single-Tenant Properties. We do not anticipate significant capital expenditures at the single-tenant properties in which we have an interest that are subject to net or similar leases since the tenants at these properties generally bear all or substantially all of the cost of property operations, maintenance and repairs. However, at certain properties subject to net leases, our property owner subsidiaries are responsible for replacement and/or repair of certain capital items, which may or may not be reimbursed. In addition, at certain single-tenant properties that are not subject to a net lease, our property owner subsidiaries have a level of property operating expense responsibility, which may or may not be reimbursed.

Table of Contents

Multi-Tenant Properties. Primarily as a result of non-renewals at single-tenant net-lease properties, we have interests in multi-tenant properties in our consolidated portfolio. While tenants are generally responsible for increases over base year expenses, our property owner subsidiaries are generally responsible for the base-year expenses and capital expenditures, and are responsible for all expenses related to vacant space at these properties.

Vacant Properties. To the extent there is a vacancy in a property, our property owner subsidiary would be obligated for all operating expenses, including real estate taxes and insurance. If a property is vacant for an extended period of time, our property owner subsidiary may incur substantial capital expenditure costs to re-tenant the property.

Property Expansions. Under certain leases, tenants have the right to expand the facility located on a property in which we have an interest. In the past, our property owner subsidiary has generally funded, and in the future our property owner subsidiary may fund, these property expansions with either additional secured borrowings, the repayment of which was, and will be, funded out of rental increases under the leases covering the expanded properties or capital contributions from us.

Ground Leases. The tenants of properties in which we have an interest generally pay the rental obligations on ground leases either directly to the fee holder or to our property owner subsidiary as increased rent. However, our property owner subsidiaries are responsible for these payments under certain leases without reimbursement and at vacant properties.

Environmental Matters. Based upon management's ongoing review of the properties in which we have an interest, management is not aware of any environmental condition with respect to any of these properties, which would be reasonably likely to have a material adverse effect on us. There can be no assurance, however, that (1) the discovery of environmental conditions, which were previously unknown, (2) changes in law, (3) the conduct of tenants or (4) activities relating to properties in the vicinity of the properties in which we have an interest, will not expose us to material liability in the future. Changes in laws increasing the potential liability for environmental conditions existing on properties or increasing the restrictions on discharges or other conditions may result in significant unanticipated expenditures or may otherwise adversely affect the operations of the tenants of properties in which we have an interest.

Results of Operations

Year ended December 31, 2014 compared with December 31, 2013. The increase in total gross revenues in 2014 of \$62.5 million was primarily attributable to an increase in rental revenue of \$56.8 million and an increase in tenant reimbursements of \$6.0 million, due to property acquisitions, offset in part by a decrease in advisory and incentive fees of \$0.3 million due to our entering into fewer joint ventures.

New property acquisition revenue of \$59.5 million was offset in part by the net impact of lease extensions entered into at rents below previous rental amounts, new leases entered into at rates lower than under previous leases and the increase in vacancy at certain properties.

Depreciation and amortization decreased \$3.1 million primarily due to certain assets becoming fully amortized, offset by the acquisition of real estate properties in 2014 and 2013.

The increase in property operating expense of \$8.9 million was primarily due to an increase in occupancy and use at certain multi-tenant properties, the acquisition of properties with operating expense obligations, the net impact of management of certain properties being transferred between the tenant and our property owner subsidiary and an increase in acquisition and pursuit costs.

Non-operating income increased \$5.6 million primarily due to interest earned on new loans receivable investments.

The increase in interest and amortization expense of \$11.4 million was primarily due to greater debt outstanding, offset by a reduction in the weighted-average interest rate on outstanding indebtedness.

The gains on sales of financial assets, net of \$0.9 million in 2014 was primarily due to the gain recognized on the sale of an office property classified as a capital lease.

The decrease in debt satisfaction charges, net, of \$15.9 million was primarily due to the timing of conversions of our 6.00% Convertible Notes and the timing of mortgage payoffs and related yield maintenance charges.

Table of Contents

Impairment charges and loan losses increased by \$1.8 million due to an increase of \$13.2 million in impairment charges on properties due to the timing of triggering events on properties held and used in operations, principally offset by a decrease in loan losses of \$11.4 million. We recognized a loan loss of \$2.5 million in 2014 on our loan receivable collateralized by an office property in Southfield, Michigan and a \$13.9 million loan loss in 2013 on our loan receivable collateralized by an office building in Westmont, Illinois.

The decrease in the provision for income taxes of \$2.1 million primarily relates to the tax incurred on the internal transfer of an industrial property from our taxable REIT subsidiary to the REIT in 2013.

The increase in equity in earnings (losses) of non-consolidated entities of \$0.8 million was primarily due to an increase in earnings from various joint ventures.

Discontinued operations represent properties sold or held for sale. The increase in net income from discontinued operations of \$24.7 million was primarily due to an increase in gains on sales of properties of \$33.0 million and a \$1.8 million decrease in provision for income taxes, offset in part by an increase in impairment charges of \$0.8 million and an increase in debt satisfaction charges, net of \$9.2 million.

The increase in net income attributable to noncontrolling interests of \$2.1 million was primarily due to an increase in earnings of consolidated, non-wholly owned entities.

The increase in net income attributable to common shareholders of \$100.4 million was primarily due to the items discussed above and a reduction in preferred dividends of \$8.8 million due to the repurchase of preferred shares in 2013.

The increase in net income or decrease in net loss in future periods will be closely tied to the level of acquisitions made by us. Without acquisitions, the sources of growth in net income are limited to fixed rent adjustments and index adjusted rents (such as the consumer price index), reduced interest expense on amortizing mortgages and variable rate indebtedness and by controlling other variable overhead costs. However, there are many factors beyond management's control that could offset these items including, without limitation, increased interest rates and tenant monetary defaults and the other risks described in this Annual Report.

Year ended December 31, 2013 compared with December 31, 2012. The increase in total gross revenues in 2013 of \$64.9 million was primarily attributable to an increase in rental revenue of \$63.4 million and an increase in tenant reimbursements of \$2.5 million, offset in part by a decrease in advisory and incentive fees of \$1.0 million.

The increase in rental revenue was primarily due to (1) 2013 and 2012 property acquisition revenue of \$59.8 million, including \$25.0 million from NLS properties acquired on September 1, 2012, (2) increased occupancy revenue from the Transmerica Tower in Baltimore, Maryland of \$0.7 million and (3) \$1.9 million of revenue recognized on our office property in Orlando, Florida due to the commencement of a new lease.

Depreciation and amortization increased \$23.0 million primarily due to the acquisition of real estate properties in 2013 and 2012.

The increase in property operating expense of \$6.0 million was primarily due to an increase in occupancy at certain multi-tenant properties which had an increase in costs and the acquisition of properties with operating expense obligations.

The increase in general and administrative expense of \$4.7 million was primarily due to a \$4.5 million increase in personnel costs.

Non-operating income increased \$1.6 million primarily due to the investment in new loans receivable in 2013, offset by reduced interest income earned on a loan receivable secured by an office property in Schaumburg, Illinois, which we foreclosed on in 2013.

The increase in interest and amortization expense of \$1.6 million was primarily due to greater debt outstanding, offset by (1) a reduction in the weighted-average interest rate on outstanding indebtedness and (2) retirement of debt which had corresponding debt discount amortization.

The increase in debt satisfaction charges, net, of \$15.9 million was primarily due to the conversion of \$54.9 million of 6.00% Convertible Notes in 2013 and the timing of mortgage payoffs and related yield maintenance charges.

The gain on acquisition of \$167.9 million primarily represents the gain recognized in 2012 due to the increase in fair value of our investment in NLS at the date of acquisition of the remaining interest in NLS.

Table of Contents

The litigation reserve of \$2.8 million in 2012 relates to a litigation that has been settled with a payment by us of \$2.8 million.

Impairment charges and loan losses increased by \$31.3 million due to the timing of triggering events on properties held and used in operations and a \$13.9 million loan loss recognized in 2013 on our loan receivable collateralized by an office property in Westmont, Illinois.

The increase in the provision for income taxes of \$2.3 million primarily relates to the tax incurred on the internal transfer of an industrial property from our taxable REIT subsidiary to the REIT.

The decrease in equity in earnings (losses) of non-consolidated entities of \$21.7 million was primarily due to (1) a \$13.3 million decrease in earnings from NLS primarily due to the consolidation of NLS on September 1, 2012, (2) a \$7.9 million reduction due to the sale of our interests in Concord Debt Holding LLC and CDH CDO LLC in 2012 and (3) a \$0.9 million impairment charge recognized in 2013 on an investment in a non-consolidated entity, offset in part by an increase in earnings from various joint ventures of \$0.4 million.

Discontinued operations represent properties sold or held for sale. The increase in net income from discontinued operations of \$24.4 million was primarily due to an increase in gains on sales of properties of \$11.2 million, an increase in debt satisfaction gains, net of \$9.1 million and a \$12.9 million decrease in loss from discontinued operations, offset in part by an increase in impairment charges of \$7.2 million and a \$1.6 million increase in provision for income taxes.

The decrease in net income attributable to noncontrolling interests of \$2.1 million was primarily due to a decrease in earnings of consolidated, non-wholly owned entities.

The decrease in net income attributable to common shareholders of \$170.9 million was primarily due to the items discussed above and a reduction in preferred dividends of \$7.3 million due to the repurchase of preferred shares.

Same-Store Results

Same-store results include all consolidated properties except properties acquired and sold in 2014 and 2013. Our historical same-store occupancy was 96.2% at December 31, 2014 compared to 98.1% at December 31, 2013. The following presents our consolidated same-store net operating income, or NOI, for the years ended December 31, 2014 and 2013 (\$000):

	2014	2013
Total base rent	\$304,155	\$301,273
Tenant reimbursements and other	25,908	24,566
Property operating expenses	(54,822) (52,105
Same-store NOI - Cash basis	\$275,241	\$273,734

The change in our same-store NOI from 2013 to 2014 was an increase of 0.6%. This was primarily due to an increase in base rent and tenant reimbursements, offset by an increase in property operating expenses due to the timing of new tenant leases and the establishment of base years for certain tenants.

Table of Contents

Funds From Operations

We believe that Funds from Operations, or FFO, which is a non-GAAP measure, is a widely recognized and appropriate measure of the performance of an equity REIT. We believe FFO is frequently used by securities analysts, investors and other interested parties in the evaluation of REITs, many of which present FFO when reporting their results. FFO is intended to exclude GAAP historical cost depreciation and amortization of real estate and related assets, which assumes that the value of real estate diminishes ratably over time. Historically, however, real estate values have risen or fallen with market conditions. As a result, FFO provides a performance measure that, when compared year over year, reflects the impact to operations from trends in occupancy rates, rental rates, operating costs, development activities, interest costs and other matters without the inclusion of depreciation and amortization, providing perspective that may not necessarily be apparent from net income.

The National Association of Real Estate Investment Trusts, or NAREIT, defines FFO as “net income (or loss) computed in accordance with GAAP, excluding gains (or losses) from sales of property, plus real estate depreciation and amortization and after adjustments for unconsolidated partnerships and joint ventures.” NAREIT clarified its computation of FFO to exclude impairment charges on depreciable real estate owned directly or indirectly. FFO does not represent cash generated from operating activities in accordance with GAAP and is not indicative of cash available to fund cash needs.

We present FFO available to common shareholders and unitholders - basic. We also present FFO available to common shareholders and unitholders - diluted on a company-wide basis as if all securities that are convertible, at the holder's option, into our common shares, are converted. We also present Company FFO, which adjusts FFO available to common shareholders and unitholders - diluted for certain items which we believe are not indicative of the operating results of our real estate portfolio. We believe this is an appropriate presentation as it is frequently requested by security analysts, investors and other interested parties. Since others do not calculate funds from operations in a similar fashion, FFO available to common shareholders and unitholders - diluted and Company FFO may not be comparable to similarly titled measures as reported by others. FFO available to common shareholders and unitholders - diluted and Company FFO should not be considered as an alternative to net income as an indicator of our operating performance or as an alternative to cash flow as a measure of liquidity.

Table of Contents

The following presents a reconciliation of net income (loss) attributable to common shareholders to FFO available to common shareholders and unitholders and Company FFO for each of the years in the three year period ended December 31, 2014 (unaudited and dollars in thousands, except per share amounts):

	2014	2013	2012
FUNDS FROM OPERATIONS:			
Basic and Diluted:			
Net income (loss) attributable to common shareholders	\$86,324	\$(14,089) \$156,811
Adjustments:

Diluted	241,967,017	225,444,512	184,616,613

(1) Includes OP Units.

Table of Contents

Off-Balance Sheet Arrangements

As of December 31, 2014, we had investments in various real estate entities with varying structures. The real estate investments owned by these entities are generally financed with non-recourse debt. Non-recourse debt is generally defined as debt whereby the lenders' sole recourse with respect to borrower defaults is limited to the value of the assets collateralized by the debt. The lender generally does not have recourse against any other assets owned by the borrower or any of the members or partners of the borrower, except for certain specified exceptions listed in the particular loan documents. These exceptions generally relate to "bad boy" acts, including fraud and breaches of material representations. We have guaranteed such obligations for certain of our joint ventures.

Contractual Obligations

The following summarizes our principal contractual obligations as of December 31, 2014 (\$000's):⁽¹⁾

	2015	2016	2017	2018	2019	2020 and Thereafter	Total
Mortgages and notes payable ⁽²⁾	\$ 173,218	\$ 154,337	\$ 93,469	\$ 42,297	\$ 103,835	\$ 380,838	\$ 947,994
Term loans payable	—	—	—	250,000	255,000	—	505,000
Senior notes payable ⁽³⁾	—	—	—	—	—	500,000	500,000
Convertible notes payable ⁽⁴⁾	—	—	16,228	—	—	—	16,228
Trust preferred securities	—	—	—	—	—	129,120	129,120
Interest payable - fixed rate ⁽⁵⁾	88,866	80,529	67,129	55,363	42,878	174,230	508,995

1. Excludes \$14.6 million in outstanding letters of credit.

2. Includes balloon payments and mortgages secured by held for sale properties. \$15.0 million due in 2016 is recourse to us.

3. Amounts exclude aggregate debt discounts of \$2.3 million.

4. Matures in 2030, however holders have the right to redeem the notes on 01/15/17, 01/15/20 and 01/15/25. Amounts exclude debt discount of \$0.6 million.

5. Includes variable-rate debt subject to interest rate swap agreements.

6. Includes ground lease payments and office rents. Amounts disclosed do not include rents that adjust to fair market value. In addition, certain ground lease payments due under bond leases allow for a right of offset between the lease obligation and the debt service and accordingly are not included.

In addition, we guarantee certain tenant improvement allowances and lease commissions on behalf of certain property owner subsidiaries when required by the related tenant or lender. However, we do not believe these guarantees are material to us as the obligations under and risks associated with such guarantees are priced into the rent under the lease or the value of the property.

Table of Contents

Item 7A. Quantitative and Qualitative Disclosure about Market Risk

Our exposure to market risk relates primarily to our variable rate debt and fixed rate debt. As of December 31, 2014, we had no consolidated variable rate indebtedness not subject to an outstanding interest rate swap agreement. As of December 31, 2013, we had \$48.0 million consolidated variable rate indebtedness not subject to an interest rate swap agreement outstanding. During 2014 and 2013, our variable rate indebtedness had a weighted-average interest rate of 1.4% and 2.0%, respectively. Had the weighted-average interest rate been 100 basis points higher, our interest expense for 2014 and 2013 would have been increased by approximately \$154 thousand and \$1.1 million, respectively. As of December 31, 2014 and 2013, our consolidated fixed rate debt was approximately \$2.1 billion and \$2.0 billion, respectively, which represented 100.0% and 97.7%, respectively, of total long-term indebtedness in each year.

For certain of our financial instruments, fair values are not readily available since there are no active trading markets as characterized by current exchanges between willing parties. Accordingly, we derive or estimate fair values using various valuation techniques, such as computing the present value of estimated future cash flows using discount rates commensurate with the risks involved. However, the determination of estimated cash flows may be subjective and imprecise. Changes in assumptions or estimation methodologies can have a material effect on these estimated fair values. The following fair values were determined using the interest rates that we believe our outstanding fixed rate debt would warrant as of December 31, 2014 and are indicative of the interest rate environment as of December 31, 2014, and do not take into consideration the effects of subsequent interest rate fluctuations. Accordingly, we estimate that the fair value of our fixed rate debt is \$2.1 billion as of December 31, 2014.

Our interest rate risk objectives are to limit the impact of interest rate fluctuations on earnings and cash flows and to lower our overall borrowing costs. To achieve these objectives, we manage our exposure to fluctuations in market interest rates through the use of fixed rate debt instruments to the extent that reasonably favorable rates are obtainable with such arrangements. We generally enter into derivative financial instruments such as interest rate swaps or caps to mitigate our interest rate risk on a related financial instrument or to effectively lock the interest rate on a portion of our variable rate debt. As of December 31, 2014, we have ten interest rate swap agreements in our consolidated portfolio.

The Trustees and Shareholders

Lexington Realty Trust:

We have audited the accompanying consolidated balance sheets of Lexington Realty Trust and subsidiaries (the “Company”) as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive income (loss), changes in equity, and cash flows for each of the years in the three-year period ended December 31, 2014. In connection with our audits of the consolidated financial statements, we also have audited the accompanying financial statement schedule III. These consolidated financial statements and financial statement schedule are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Lexington Realty Trust and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Lexington Realty Trust’s internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 26, 2015 expressed an unqualified opinion on the effectiveness of the Company’s internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Trustees and Shareholders

Lexington Realty Trust:

We have audited Lexington Realty Trust's (the "Company's") internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and trustees of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Lexington Realty Trust and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of operations, comprehensive income (loss), changes in equity, and cash flows for each of the years in the three-year period ended December 31, 2014, and the related financial statement schedule III, and our report dated February 26, 2015 expressed an unqualified opinion on those consolidated financial statements and financial statement schedule.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

(1) The Company

Lexington Realty Trust (together with its consolidated subsidiaries, except when the context only applies to the parent entity, the "Company") is a self-managed and self-administered Maryland statutory real estate investment trust ("REIT") that owns a diversified portfolio of equity and debt investments in single-tenant properties and land. A majority of the real properties in which the Company has an interest and all land interests are generally subject to net leases or similar leases where the tenant pays all or substantially all of the cost, including cost increases, for real estate taxes, insurance, utilities and ordinary maintenance of the property. However, certain leases provide that the landlord is responsible for certain operating expenses. The Company also provides investment advisory and asset management services to investors in the single-tenant area.

As of December 31, 2014, the Company had equity ownership interests in approximately 215 consolidated properties located in 40 states. The properties in which the Company has an interest are leased to tenants in various industries including service, technology, finance/insurance, transportation/logistics and automotive.

The Company believes it has qualified as a REIT under the Internal Revenue Code of 1986, as amended (the "Code"). Accordingly, the Company will not be subject to federal income tax, provided that distributions to its shareholders equal at least the amount of its REIT taxable income as defined under the Code. The Company is permitted to participate in certain activities from which it was previously precluded in order to maintain its qualification as a REIT, so long as these activities are conducted in entities which elect to be treated as taxable REIT subsidiaries ("TRS") under the Code. As such, the TRS are subject to federal income taxes on the income from these activities.

The Company conducts its operations either directly or indirectly through (1) property owner subsidiaries and lender subsidiaries, which are single purpose entities, (2) an operating partnership, Lepercq Corporate Income Fund L.P. ("LCIF"), in which the Company is the sole unit holder of the general partner and the sole unit holder of the limited partner that holds a majority of the limited partner interests, (3) Lexington Realty Advisors, Inc. ("LRA"), a wholly-owned TRS, and (4) investments in joint ventures. On December 30, 2013, another operating partnership, Lepercq Corporate Income Fund II L.P. ("LCIF II"), was merged with and into LCIF, with LCIF as the surviving entity. References to "OP Units" refer to units of limited partner interests in LCIF or LCIF II, as applicable. Property owner subsidiaries are landlords under leases for properties in which the Company has an interest and/or borrowers under loan agreements secured by properties in which the Company has an interest and lender subsidiaries are lenders under loan agreements where the Company made an investment in a loan asset, but in all cases are separate and distinct legal entities.

The assets and credit of a property owner subsidiary or a lender subsidiary are not available to satisfy the debt and other obligations of any other person, including any other property owner subsidiary or lender subsidiary or any other affiliate.

(2) Summary of Significant Accounting Policies

Basis of Presentation and Consolidation. The Company's consolidated financial statements are prepared on the accrual basis of accounting in accordance with U.S. generally accepted accounting principles ("GAAP"). The financial statements reflect the accounts of the Company and its consolidated subsidiaries. The Company consolidates its wholly-owned subsidiaries, partnerships and joint ventures which it controls (i) through voting rights or similar rights or (ii) by means other than voting rights if the Company is the primary beneficiary of a variable interest entity ("VIE"). Entities which the Company does not control and entities which are VIEs in which the Company is not the primary beneficiary are accounted for under appropriate GAAP.

If an investment is determined to be a VIE, the Company performs an analysis to determine if the Company is the primary beneficiary of the VIE. GAAP requires a VIE to be consolidated by its primary beneficiary. The primary beneficiary is the party that has a controlling financial interest in an entity. In order for a party to have a controlling

financial interest in an entity, it must have (1) the power to direct the activities of a VIE that most significantly impact the entity's economic performance and (2) the obligation to absorb losses or the right to receive benefits of an entity that could potentially be significant to the VIE.

At December 31, 2014 and 2013, the Company held variable interests in certain non-consolidated VIEs; however, the Company was not the primary beneficiary of these VIEs as the Company does not have a controlling financial interest in the entities. The Company has certain acquisition commitments and/ or acquisition, development and construction arrangements with VIEs. The Company is obligated to fund certain amounts as discussed in note 4.

Table of Contents

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

Earnings Per Share. Basic net income (loss) per share is computed by dividing net income (loss) reduced by preferred dividends and amounts allocated to certain non-vested share-based payment awards, if applicable, by the weighted-average number of common shares outstanding during the period. Diluted net income (loss) per share amounts are similarly computed but include the effect, when dilutive, of in-the-money common share options, OP units and put options of certain convertible securities.

Use of Estimates. Management has made a number of significant estimates and assumptions relating to the reporting of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses to prepare these consolidated financial statements in conformity with GAAP. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment. The current economic environment has increased the degree of uncertainty inherent in these estimates and assumptions. Management adjusts such estimates when facts and circumstances dictate. The most significant estimates made include the recoverability of accounts receivable, allocation of property purchase price to tangible and intangible assets acquired and liabilities assumed, the determination of VIEs and which entities should be consolidated, the determination of impairment of long-lived assets, loans receivable and equity method investments, valuation of derivative financial instruments and the useful lives of long-lived assets. Actual results could differ materially from those estimates.

Fair Value Measurements. The Company follows the guidance in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 820, Fair Value Measurements and Disclosures ("Topic 820"), to determine the fair value of financial and non-financial instruments. Topic 820 defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. Topic 820 establishes a fair value hierarchy that prioritizes observable and unobservable inputs used to measure fair value into three levels: Level 1 - quoted prices (unadjusted) in active markets that are accessible at the measurement date for assets or liabilities; Level 2 - observable prices that are based on inputs not quoted in active markets, but corroborated by market data; and Level 3 - unobservable inputs, which are used when little or no market data is available. The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. In determining fair value, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible, as well as considering counterparty credit risk. The Company has formally elected to apply the portfolio exception within Topic 820 with respect to measuring counterparty risk for all of its derivative transactions subject to master netting arrangements.

Revenue Recognition. The Company recognizes lease revenue on a straight-line basis over the term of the lease unless another systematic and rational basis is more representative of the time pattern in which the use benefit is derived from the leased property. Revenue is recognized on a contractual basis for leases with escalations tied to a consumer price index with no floor. Renewal options in leases with rental terms that are lower than those in the primary term are excluded from the calculation of straight-line rent if the renewals are not reasonably assured. If the Company funds tenant improvements and the improvements are deemed to be owned by the Company, revenue recognition will commence when the improvements are substantially completed and possession or control of the space is turned over to the tenant. If the Company determines that the tenant allowances are lease incentives, the Company commences revenue recognition when possession or control of the space is turned over to the tenant for tenant work to begin. The lease incentive is recorded as a deferred expense and amortized as a reduction of revenue on a straight-line basis over the respective lease term. The Company recognizes lease termination fees as rental revenue in the period received and writes off unamortized lease-related intangible and other lease-related account balances, provided there are no further Company obligations under the lease. Otherwise, such fees and balances are recognized on a straight-line basis over the remaining obligation period with the termination payments being recorded as a component of rent receivable-deferred or deferred revenue on the Consolidated Balance Sheets.

Gains on sales of real estate are recognized based upon the specific timing of the sale as measured against various criteria related to the terms of the transactions and any continuing involvement associated with the properties. If the sales criteria are not met, the gain is deferred and the finance, installment or cost recovery method, as appropriate, is applied until the sales criteria are met. To the extent the Company sells a property and retains a partial ownership interest in the property, the Company recognizes gain to the extent of the third-party ownership interest.

Accounts Receivable. The Company continuously monitors collections from tenants and makes a provision for estimated losses based upon historical experience and any specific tenant collection issues that the Company has identified. As of December 31, 2014 and 2013, the Company's allowance for doubtful accounts was not significant.

Table of Contents

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

Purchase Accounting and Acquisition of Real Estate. The fair value of the real estate acquired, which includes the impact of fair value adjustments for assumed mortgage debt related to property acquisitions, is allocated to the acquired tangible assets, consisting of land, building and improvements and identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, other value of in-place leases and value of tenant relationships, based in each case on their fair values. Acquisition costs are expensed as incurred and are included in property operating expense in the accompanying Consolidated Statement of Operations.

The fair value of the tangible assets of an acquired property (which includes land, building and improvements and fixtures and equipment) is determined by valuing the property as if it were vacant. The "as-if-vacant" value is then allocated to land and building and improvements based on management's determination of relative fair values of these assets. Factors considered by management in performing these analyses include an estimate of carrying costs during the expected lease-up periods considering current market conditions and costs to execute similar leases. In estimating carrying costs, management includes real estate taxes, insurance and other operating expenses and estimates of lost rental revenue during the expected lease-up periods based on current market demand. Management also estimates costs to execute similar leases including leasing commissions.

In allocating the fair value of the identified intangible assets and liabilities of an acquired property, above-market and below-market lease values are recorded based on the difference between the current in-place lease rent and management's estimate of current market rents. Below-market lease intangibles are recorded as part of deferred revenue and amortized into rental revenue over the non-cancelable periods and bargain renewal periods of the respective leases. Above-market leases are recorded as part of intangible assets and amortized as a direct charge against rental revenue over the non-cancelable portion of the respective leases.

The aggregate value of other acquired intangible assets, consisting of in-place leases and tenant relationship values, is measured by the excess of (1) the purchase price paid for a property over (2) the estimated fair value of the property as if vacant, determined as set forth above. This aggregate value is allocated between in-place lease values and tenant relationship values based on management's evaluation of the specific characteristics of each tenant's lease. The value of in-place leases is amortized to expense over the remaining non-cancelable periods and any bargain renewal periods of the respective leases. The value of tenant relationships is amortized to expense over the applicable lease term plus expected renewal periods.

Depreciation is determined by the straight-line method over the remaining estimated economic useful lives of the properties. The Company generally depreciates its real estate assets over periods ranging up to 40 years.

Impairment of Real Estate. The Company evaluates the carrying value of all tangible and intangible real estate assets held for investment for possible impairment when an event or change in circumstance has occurred that indicates its carrying value may not be recoverable. The evaluation includes estimating and reviewing anticipated future undiscounted cash flows to be derived from the asset. If such cash flows are less than the asset's carrying value, an impairment charge is recognized to the extent by which the asset's carrying value exceeds its estimated fair value, which may be below the balance of any non-recourse financing. Estimating future cash flows and fair values is highly subjective and such estimates could differ materially from actual results.

Investments in Non-Consolidated Entities. The Company accounts for its investments in 50% or less owned entities under the equity method, unless consolidation is required. If the Company's investment in the entity is insignificant and the Company has no influence over the control of the entity then the entity is accounted for under the cost method.

Impairment of Equity Method Investments. The Company assesses whether there are indicators that the value of its equity method investments may be impaired. An impairment charge is recognized only if the Company determines that a decline in the value of the investment below its carrying value is other-than-temporary. The assessment of impairment is highly subjective and involves the application of significant assumptions and judgments about the Company's intent and ability to recover its investment given the nature and operations of the underlying investment, including the level of the Company's involvement therein, among other factors. To the extent an impairment is deemed to be other-than-temporary, the loss is measured as the excess of the carrying amount of the investment over

the estimated fair value of the investment.

Loans Receivable. Loans held for investment are intended to be held to maturity and, accordingly, are carried at cost, net of unamortized loan origination costs and fees, loan purchase discounts, and net of an allowance for loan losses when such loan is deemed to be impaired. Loan origination costs and fees and loan purchase discounts are amortized over the term of the loan. The Company considers a loan impaired when, based upon current information and events, it is probable that it will be unable to collect all amounts due for both principal and interest according to the contractual terms of the loan

Table of Contents

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

agreement. Significant judgments are required in determining whether impairment has occurred. The Company performs an impairment analysis by comparing either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable current market price or the fair value of the underlying collateral to the net carrying value of the loan, which may result in an allowance and corresponding loan loss charge. Interest income is recorded on a cash basis for impaired loans.

Acquisition, Development and Construction Arrangements. The Company evaluates loans receivable where the Company participates in residual profits through loan provisions or other contracts to ascertain whether the Company has the same risks and rewards as an owner or a joint venture partner. Where the Company concludes that such arrangements are more appropriately treated as an investment in real estate, the Company reflects such loan receivable as an equity investment in real estate under construction in the Consolidated Balance Sheets. In these cases, no interest income is recorded on the loan receivable and the Company records capitalized interest during the construction period. In arrangements where the Company engages a developer to construct a property or provide funds to a tenant to develop a property, the Company will capitalize the funds provided to the developer/tenant and internal costs of interest and real estate taxes, if applicable, during the construction period.

Properties Held For Sale. Assets and liabilities of properties that meet various held for sale criteria, including whether it is probable that a sale will occur within 12 months, are presented separately in the Consolidated Balance Sheets. The operating results of these properties are reflected as discontinued operations in the Consolidated Statements of Operations. Properties classified as held for sale are carried at the lower of net carrying value or estimated fair value less costs to sell and depreciation and amortization are no longer recognized. Properties that do not meet the held for sale criteria are accounted for as operating properties.

Deferred Expenses. Deferred expenses consist primarily of debt and leasing costs. Debt costs are amortized using the straight-line method, which approximates the interest method, over the terms of the debt instruments and leasing costs are amortized over the term of the related lease.

Derivative Financial Instruments. The Company accounts for its interest rate swap agreements in accordance with FASB ASC Topic 815, Derivatives and Hedging ("Topic 815"). In accordance with Topic 815, these agreements are carried on the balance sheet at their respective fair values, as an asset if fair value is positive, or as a liability if fair value is negative. If the interest rate swap is designated as a cash flow hedge, the effective portion of the interest rate swap's change in fair value is reported as a component of other comprehensive income (loss); the ineffective portion, if any, is recognized in earnings as an increase or decrease to interest expense.

Upon entering into hedging transactions, the Company documents the relationship between the interest rate swap agreement and the hedged item. The Company also documents its risk-management policies, including objectives and strategies, as they relate to its hedging activities. The Company assesses, both at inception of a hedge and on an ongoing basis, whether or not the hedge is highly effective. The Company will discontinue hedge accounting on a prospective basis with changes in the estimated fair value reflected in earnings when (1) it is determined that the derivative is no longer effective in offsetting cash flows of a hedged item (including forecasted transactions), (2) it is no longer probable that the forecasted transaction will occur or (3) it is determined that designating the derivative as an interest rate swap is no longer appropriate. The Company does and may continue to utilize interest rate swap and cap agreements to manage interest rate risk, but does not anticipate entering into derivative transactions for speculative trading purposes.

Stock Compensation. The Company maintains an equity participation plan. Non-vested share grants generally vest either based upon (1) time, (2) performance and/or (3) market conditions. Options granted under the plan in 2010 vest

over a five-year period and expire ten years from the date of grant. Options granted under the plan in 2008 vested upon attainment of certain market performance measures and expire ten years from the date of grant. All share-based payments to employees, including grants of employee stock options, are recognized in the Consolidated Statements of Operations based on their fair values.

Tax Status. The Company has made an election to qualify, and believes it is operating so as to qualify, as a REIT for federal income tax purposes. Accordingly, the Company generally will not be subject to federal income tax, provided that distributions to its shareholders equal at least the amount of its REIT taxable income as defined under Sections 856 through 860 of the Code.

Table of Contents

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

The Company is permitted to participate in certain activities from which it was previously precluded in order to maintain its qualification as a REIT, so long as these activities are conducted in entities which elect to be treated as taxable REIT subsidiaries under the Code. As such, the Company is subject to federal and state income taxes on the income from these activities.

Income taxes, primarily related to the Company's taxable REIT subsidiaries, are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss and tax credit carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled.

Cash and Cash Equivalents. The Company considers all highly liquid instruments with maturities of three months or less from the date of purchase to be cash equivalents.

Restricted Cash. Restricted cash is comprised primarily of cash balances held in escrow with lenders.

Environmental Matters. Under various federal, state and local environmental laws, statutes, ordinances, rules and regulations, an owner of real property may be liable for the costs of removal or remediation of certain hazardous or toxic substances at, on, in or under such property as well as certain other potential costs relating to hazardous or toxic substances. These liabilities may include government fines, penalties and damages for injuries to persons and adjacent property. Such laws often impose liability without regard to whether the owner knew of, or was responsible for, the presence or disposal of such substances. Although most of the tenants of properties in which the Company has an interest are primarily responsible for any environmental damage and claims related to the leased premises, in the event of the bankruptcy or inability of the tenant of such premises to satisfy any obligations with respect to such environmental liability, or if the tenant is not responsible, the Company's property owner subsidiary may be required to satisfy any such obligations, should they exist. In addition, the property owner subsidiary, as the owner of such a property, may be held directly liable for any such damages or claims irrespective of the provisions of any lease. As of December 31, 2014, the Company was not aware of any environmental matter relating to any of its investments that would have a material impact on the consolidated financial statements.

Segment Reporting. The Company operates generally in one industry segment, single-tenant real estate assets.

Reclassifications. Certain amounts included in prior years' financial statements have been reclassified to conform to the current year presentation, including certain statement of operations captions including activities for properties sold during 2014, which are presented as discontinued operations.

Recently Issued Accounting Guidance. In April 2014, the FASB issued Accounting Standards Update No. 2014-08, Presentation of Financial Statements (Topic 205) and Property, Plant and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity, which changes the criteria for reporting discontinued operations and improves financial statement disclosures. Under this guidance, only disposals representing a strategic shift in operations that have a major effect on an organization's operations and financial results should be presented as discontinued operations. The new guidance is effective in the first quarter of 2015. It is anticipated that the implementation of this guidance will reduce the number of future property dispositions the Company makes, if any, that will be classified as discontinued operations in the Company's consolidated financial statements.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, Revenue from Contracts with Customers (Topic 606), which amends the guidance for revenue recognition to eliminate the industry-specific revenue recognition guidance and replace it with a principle based approach for determining revenue recognition. The new guidance is effective for reporting periods beginning after December 15, 2016. The Company is currently evaluating the impact of the adoption of the new guidance on its consolidated financial statements.

In February 2015, the FASB issued Accounting Standards Update 2015-02, "Consolidation (Topic 810) - Amendments to the Consolidation Analysis," which provides guidance on the consolidation evaluation for reporting organizations that are required to evaluate whether they should consolidate certain legal entities. In accordance with the guidance, all legal entities are subject to reevaluation under the revised consolidation model. The guidance is effective in the first quarter of 2016 and early adoption is allowed. The Company is currently evaluating the impact of the adoption of this new guidance on its consolidated financial statements.

(3) Earnings Per Share

A significant portion of the Company's non-vested share-based payment awards are considered participating securities and as such, the Company is required to use the two-class method for the computation of basic and diluted earnings per share. Under the two-class computation method, net losses are not allocated to participating securities unless the holder of the security has a contractual obligation to share in the losses. The non-vested share-based payment awards are not allocated losses as the awards do not have a contractual obligation to share in losses of the Company.

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per share computations for each of the years in the three-year period ended December 31, 2014:

	2014	2013	2012
BASIC			
Income (loss) from continuing operations attributable to common shareholders	\$37,652	\$(38,506)) \$157,974
Income (loss) from discontinued operations attributable to common shareholders	48,672	24,417	(1,163)
Net income (loss) attributable to common shareholders	\$86,324	\$(14,089)) \$156,811
Weighted-average number of common shares outstanding	228,966,253	209,797,238	159,109,424
Income (loss) per common share:			
Income (loss) from continuing operations	\$0.17	\$(0.18)) \$0.99

Accumulated depreciation and amortization ⁽¹⁾	(1,196,114) (1,223,381
Real estate, net	\$3,287,250	\$3,425,420

Includes accumulated amortization of real estate intangible assets of \$400,628 and \$447,764 in 2014 and 2013, (1) respectively. The estimated amortization of the above real estate intangible assets for the next five years is \$35,894 in 2015, \$30,221 in 2016, \$26,905 in 2017, \$23,179 in 2018 and \$18,014 in 2019.

The Company had below-market leases, net of accumulated accretion, which are included in deferred revenue, of \$54,414 and \$59,781, respectively as of December 31, 2014 and 2013. The estimated accretion for the next five years is \$4,383 in 2015, \$3,312 in 2016, \$2,918 in 2017, \$2,911 in 2018 and \$2,603 in 2019.

The Company completed the following acquisitions and build-to-suit transactions during 2014 and 2013:

2014:

Property Type	Location	Acquisition/Completion Date	Initial Cost Basis	Lease Expiration	Land and Land Estate	Building and Improvements	Real Estate Intangible Lease in-place Value

(1) The Company incurred additional tenant related costs of \$3,825.

(2) The Company incurred leasing costs of \$323. The property was sold in September 2013.

(3) Includes three properties.

(4) The Company incurred leasing costs of \$338.

(5) Includes four properties. One property was under construction at December 31, 2013, \$1,969 of construction in progress costs are included in building and improvements above.

The Company recognized aggregate acquisition and pursuit expenses of \$1,901 and \$1,349 in 2014 and 2013, respectively, which are included in property operating expenses within the Company's Consolidated Statements of Operations.

The Company is engaged in various forms of build-to-suit development activities. The Company may enter into the following acquisition, development and construction arrangements: (1) lend funds to construct build-to-suit projects subject to a single-tenant lease and agree to purchase the properties upon completion of construction and commencement of a single-tenant lease, (2) hire developers to construct built-to-suit projects on owned properties leased to single tenants, (3) fund the construction of build-to-suit projects on owned properties pursuant to the terms in single-tenant lease agreements or (4) enter into purchase and sale agreements with developers to acquire single-tenant build-to-suit properties upon completion.

As of December 31, 2014, the Company had the following development arrangements outstanding:

Location	Property Type	Square Feet	Expected Maximum Commitment/Contribution	Lease Term (Years)	Estimated Completion Date
Oak Creek, WI	Industrial	164,000	\$ 22,609	20	2Q 15
Thomson, GA	Industrial	208,000	\$ 10,245	15	2Q 15
Richmond, VA	Office	330,000	\$ 110,137	15	3Q 15
Lake Jackson, TX	Office/R&D	664,000	\$ 166,164	20	4Q 16

1,366,000 \$ 309,155

The Company has variable interests in certain developer entities constructing the facilities but is not the primary beneficiary of the entities as the Company does not have a controlling financial interest. As of December 31, 2014 and 2013, the Company's aggregate investment in development arrangements was \$106,238 and \$74,350, respectively, which includes \$2,828 and \$1,472 of interest capitalized, respectively, and is presented as investments in real estate under construction in the accompanying Consolidated Balance Sheets.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

On September 1, 2012, the Company, together with an operating partnership subsidiary, acquired the remaining common equity interest in Net Lease Strategic Assets Fund L.P. (“NLS”) from Inland American (Net Lease) Sub, LLC that the Company did not already own for a cash payment of \$9,438 and the assumption of all outstanding liabilities. The Company recognized a gain on the transaction in the Consolidated Statement of Operations of \$167,864 primarily related to the revaluation of the Company's equity interest in NLS for the difference between its carrying value in NLS and the fair value of its ownership interest at acquisition.

(5) Sales of Real Estate and Discontinued Operations

For the years ended December 31, 2014, 2013 and 2012, the Company disposed of its interests in certain properties (excluding Greenville, South Carolina in 2014, see note 7, and Pemlex LLC in 2012, see note 9) generating aggregate net proceeds of \$226,375, \$75,519 and \$142,022, respectively, which resulted in gains on sales of \$57,507, \$24,472 and \$13,291, respectively. For the years ended December 31, 2014, 2013 and 2012, the Company recognized net debt satisfaction gains (charges) relating to these properties of \$(312), \$8,905 and \$(206), respectively. These gains (charges) are included in discontinued operations.

At December 31, 2014, the Company had one property classified as held for sale and no properties were classified as held for sale at December 31, 2013.

The following presents the operating results for the properties sold and held for sale during the years ended December 31, 2014, 2013 and 2012:

	Year Ending December 31,		
	2014	2013	2012
Total gross revenues	\$20,250	\$44,108	\$55,763
Pre-tax net income, including gains on sales	\$49,680	\$26,701	\$702

(6) Impairment of Real Estate Investments

The Company assesses on a regular basis whether there are any indicators that the carrying value of real estate assets may be impaired. Potential indicators may include an increase in vacancy at a property, tenant reduction in utilization of a property, tenant financial instability and the potential sale of the property in the near future. An asset is determined to be impaired if the asset's carrying value is in excess of its estimated fair value.

During 2014, 2013 and 2012, the Company recognized aggregate impairment charges of \$34,833, \$21,640 and \$4,262, respectively, on real estate assets classified in continuing operations. The Company has explored the possible disposition of some non-core properties, including retail, underperforming and multi-tenant properties and determined that the expected undiscounted cash flows based upon revised estimated holding periods of certain of these properties were below the current carrying values. Accordingly, the Company reduced the carrying value of these properties to their estimated fair values. Properties impaired during 2014 and 2013 have an aggregate carrying value of \$37,750 and are encumbered by an aggregate \$61,763 of non-recourse mortgage debt as of December 31, 2014.

During 2014, 2013 and 2012, the Company recognized \$13,767, \$12,920 and \$5,707, respectively, of impairment charges in discontinued operations, relating to real estate assets that were ultimately disposed of below their carrying value.

(\$000, except share/unit data)

(7)Loans Receivable

As of December 31, 2014 and 2013, the Company's loans receivable, including accrued interest and net of origination fees and loan loss reserves are comprised primarily of first and second mortgage loans and mezzanine loans on real estate.

The following is a summary of our loans receivable as of December 31, 2014 and 2013:

Loan	Loan carrying value ⁽¹⁾		Interest Rate	Maturity Date
	12/31/2014	12/31/2013		
Norwalk, CT ⁽²⁾	\$—	\$28,186	7.50	% 11/2014
Homestead, FL ⁽²⁾	—	10,239	7.50	% 08/2014
Westmont, IL ⁽³⁾	12,152	12,610	6.45	% 10/2015
Southfield, MI ⁽⁴⁾	3,296	6,610	4.55	% 02/2015
Austin, TX	2,800	2,389	16.00	% 10/2018
Kennewick, WA	85,254	37,030	9.00	% 05/2022
Other	2,133	2,379	8.00	% 2021-2022
	\$105,635	\$99,443		

(1) Loan carrying value includes accrued interest and is net of origination costs and loan losses.

(2) Loan satisfied during 2014.

Borrowers are in default and the Company commenced foreclosure proceedings. Tenant at office property collateral terminated its lease. The Company recognized a loan loss of \$13,939 during 2013. During 2014 and

(3) 2013, the Company recognized \$1,284 and \$1,737, respectively, of interest income relating to the impaired loan and the loan had an average recorded investment value of \$12,812 and \$25,562 during 2014 and 2013, respectively. At December 31, 2014, the impaired loan receivable had a contractual unpaid balance of \$26,786.

The Company recorded a \$2,500 loan loss in 2014 as the Company determined it was probable that it would not collect the amount owed at maturity. During 2014, the Company recognized \$468 of interest income relating to the
(4) impaired loan and the loan had an average recorded investment of \$6,001 during 2014. At December 31, 2014, the impaired loan receivable had a contractual unpaid balance of \$5,810.

The Company had a loan secured by a property in Schaumburg, Illinois. The borrower defaulted on the loan. The Company did not record interest of \$2,939 and \$2,647 in 2013 and 2012, respectively, representing the interest earned since default. In 2013, the Company foreclosed on the borrower and acquired the office property collateral, which is net leased through December 2022.

The Company had two types of financing receivables: loans receivable and a capitalized financing lease. The Company determined that its financing receivables operated within one portfolio segment as they were both within the same industry and use the same impairment methodology. The Company's loans receivable are secured by commercial real estate assets and the capitalized financing lease, for a commercial office property located in Greenville, South Carolina, was sold in December 2014 for net proceeds of \$11,491. In addition, the Company assesses all financing receivables for impairment, when warranted, based on an individual analysis of each receivable.

The Company's financing receivables operate within one class of financing receivables as these assets are collateralized by commercial real estate and similar metrics are used to monitor the risk and performance of these assets. The Company's management uses credit quality indicators to monitor financing receivables such as quality of collateral, the underlying tenant's credit rating and collection experience. As of December 31, 2014, the financing receivables were performing as anticipated other than as discussed above and there were no other significant delinquent amounts outstanding.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

(8) Fair Value Measurements

The following tables present the Company's assets and liabilities from continuing operations measured at fair value on a recurring basis as of December 31, 2014 and 2013 and non-recurring basis during the year ended December 31, 2014 and 2013, aggregated by the level in the fair value hierarchy within which those measurements fall:

Description	2014	Fair Value Measurements Using		
		(Level 1)	(Level 2)	(Level 3)
Interest rate swap assets	\$1,153	\$—	\$1,153	\$—
Impaired real estate assets*	\$25,679	\$—	\$—	\$25,679
Impaired loan receivable*	\$3,296	\$—	\$—	\$3,296
Interest rate swap liabilities	\$(749)) \$—	\$(749)) \$—

*Represents a non-recurring fair value measurement.

Description	2013	Fair Value Measurements Using		
		(Level 1)	(Level 2)	(Level 3)
Interest rate swap assets	\$4,439	\$—	\$4,439	\$—
Impaired real estate assets*	\$12,549	\$—	\$—	\$12,549
Impaired loan receivable*	\$12,610	\$—	\$—	\$12,610
Impaired investments in and advances to non-consolidated entities*	\$683	\$—	\$—	\$683

*Represents a non-recurring fair value measurement.

The table below sets forth the carrying amounts and estimated fair values of the Company's financial instruments as of December 31, 2014 and 2013:

	As of December 31, 2014		As of December 31, 2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets				
Loans Receivable (Level 3)	\$105,635	\$105,061	\$99,443	\$95,734
Liabilities				
Debt (Level 3)	\$2,092,675	\$2,091,364	\$2,055,807	\$2,028,558

The majority of the inputs used to value the Company's interest rate swap asset (liability) fall within Level 2 of the fair value hierarchy, such as observable market interest rate curves; however, the credit valuation associated with the interest rate swap liability utilizes Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by the Company and its counterparties. As of December 31, 2014 and 2013, the Company determined that the credit valuation adjustment relative to the overall interest rate swap asset (liability) is not significant. As a result, the entire interest rate swap asset (liability) has been classified in Level 2 of the fair value hierarchy.

Table of Contents

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

The Company estimates the fair value of its real estate assets, including non-consolidated real estate assets, by using income and market valuation techniques. The Company may estimate fair values using market information such as broker opinions of value, recent sales data for similar assets or discounted cash flow models, which primarily rely on Level 3 inputs. The cash flow models include estimated cash inflows and outflows over a specified holding period. These cash flows may include contractual rental revenues, projected future rental revenues and expenses and forecasted tenant improvements and lease commissions based upon market conditions determined through discussion with local real estate professionals, experience the Company has with its other owned properties in such markets and expectations for growth. Capitalization rates and discount rates utilized in these models are estimated by management based upon rates that management believes to be within a reasonable range of current market rates for the respective properties based upon an analysis of factors such as property and tenant quality, geographical location and local supply and demand observations. To the extent the Company under estimates forecasted cash outflows (tenant improvements, lease commissions and operating costs) or over estimates forecasted cash inflows (rental revenue rates), the estimated fair value of its real estate assets could be overstated.

The Company estimates the fair values of its loans receivable by using an estimated discounted cash flow analysis consisting of scheduled cash flows and discount rate estimates to approximate those that a willing buyer and seller might use and/or the estimated value of the underlying collateral. The fair value of the Company's debt is estimated by using a discounted cash flow analysis, based upon estimates of market interest rates.

Fair values cannot be determined with precision, may not be substantiated by comparison to quoted prices in active markets and may not be realized upon sale. Additionally, there are inherent uncertainties in any fair value measurement technique, and changes in the underlying assumptions used, including discount rates, liquidity risks and estimates of future cash flows, could significantly affect the fair value measurement amounts.

Cash Equivalents, Restricted Cash, Accounts Receivable and Accounts Payable. The Company estimates that the fair value of cash equivalents, restricted cash, accounts receivable and accounts payable approximates carrying value due to the relatively short maturity of the instruments.

(9) Investment in and Advances to Non-Consolidated Entities

In November 2014, the Company formed a joint venture to construct a private school in Houston, Texas. The Company currently has a 25% interest in the joint venture. The anticipated total construction cost is \$86,491. The Company may provide construction financing up to \$56,686. Upon completion, the property will be net leased for a 20-year term.

In October 2013, the Company formed a joint venture, in which the Company has a 15.0% interest, that acquired a portfolio of veterinary hospitals for \$39,456, which are net leased for a 20-year term. The acquisition was partially funded by a \$18,791 non-recourse mortgage loan with a fixed interest rate of 4.01% and maturity of November 2018.

In August 2013, the Company invested \$5,000 in a joint venture, which acquired the fee interest and the related office building improvements of a property in Baltimore, Maryland. Beginning in October 2015, the Company has the right to require the redemption of its interest in the joint venture in exchange for a distribution to the Company of the fee interest, which is currently leased for a 99-year term to the joint venture.

During 2012, the Company formed two joint ventures in which it has a minority interest. One joint venture acquired a retail property in Palm Beach Gardens, Florida for \$29,750 which was net leased for an approximate 15-year term. The Company had a 36% interest in the venture and provided a \$12,000 non-recourse mortgage loan to the venture

which was repaid in full in February 2013. The Company received a distribution of \$2,557 in March 2013, a portion of which represented a return of capital reducing the Company's ownership interest to 25%.

The second joint venture, in which the Company has a 15% interest, acquired a 100% economic interest in an inpatient rehabilitation hospital in Humble, Texas for \$27,750, which was net leased for an approximate 17-year term. The acquisition was partially funded by a non-recourse mortgage with an original principal amount of \$15,260, which bears interest at a fixed rate of 4.7% and matures in May 2017.

In July 2012, the Company sold its interest in Pemlex LLC, a consolidated subsidiary, for \$13,218 in connection with its restructuring. No gain or loss was recognized in the transaction as the investment was sold at its cost basis.

Table of Contents

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

The Company's investments in Concord Debt Holding LLC and CDH CDO LLC were valued at zero and the Company recognized income on the cash basis. During 2012, the Company sold all of its interest in Concord Debt Holding LLC and CDH CDO LLC for \$7,000 in cash.

Other. During 2014 and 2013, the Company recognized other-than-temporary impairment charges on a non-consolidated joint venture due to changes in the Company's estimate of net proceeds to be received upon liquidation of the joint venture. Accordingly, the Company recognized \$930 and \$925, respectively, in impairment charges in equity in earnings (losses) of non-consolidated entities. The underlying property was sold in October 2014 and the Company recognized a gain of \$87 in equity in earnings (losses) of non-consolidated entities.

The Company's remaining equity method investments consist of interests in five partnerships with ownership percentages ranging between 27% and 40%, which own primarily net-leased properties. All profits, losses and cash flows are distributed in accordance with the respective partnership agreements. One partnership is encumbered by \$13,757 in mortgage debt (the Company's proportionate share is \$5,503) with an interest rate of 5.2% and a maturity date of May 2015.

LRA earns advisory fees from certain of these non-consolidated entities for services related to acquisitions, asset management and debt placement. Advisory fees earned from these non-consolidated investments, including NLS, were \$417, \$512 and \$875 for the years ended December 31, 2014, 2013 and 2012, respectively.

(10) Mortgages and Notes Payable

The Company had outstanding mortgages and notes payable of \$945,216 and \$1,197,489 as of December 31, 2014 and 2013, respectively. Interest rates, including imputed rates on mortgages and notes payable, ranged from 2.2% to 8.5% at December 31, 2014 and the mortgages and notes payable mature between 2014 and 2027. Interest rates, including imputed rates, ranged from 3.6% to 8.5% at December 31, 2013. The weighted-average interest rate at December 31, 2014 and 2013 was approximately 5.2% and 5.3%, respectively.

The Company has a \$400,000 unsecured revolving credit facility with KeyBank National Association ("KeyBank"), as agent. The unsecured revolving credit facility matures in February 2017 but can be extended until February 2018 at the Company's option. The unsecured revolving credit facility bears interest at LIBOR plus 0.95% to 1.725% (1.15% as of December 31, 2014). At December 31, 2014, the unsecured revolving credit facility had no amounts outstanding, outstanding letters of credit of \$14,644 and availability of \$385,356, subject to covenant compliance.

The Company also has a five-year \$250,000 unsecured term loan facility from KeyBank, as agent. The unsecured term loan matures in February 2018, requires regular payments of interest only at interest rates ranging from LIBOR plus 1.10% to 2.10% (1.35% as of December 31, 2014). The Company entered into interest rate swap agreements to fix the LIBOR component at a weighted-average rate of 1.09% through February 2018 on the \$250,000 of outstanding LIBOR-based borrowings.

In addition, the Company also has a \$255,000 unsecured term loan from Wells Fargo Bank, National Association ("Wells Fargo"), as agent. The term loan matures in January 2019. The term loan requires regular payments of interest only at interest rates ranging from LIBOR plus 1.50% to 2.25% (1.75% as of December 31, 2014). The Company may prepay any outstanding borrowings under the term loan facility at a premium through January 12, 2016 and at par thereafter. The Company entered into interest rate swap agreements to fix the LIBOR component at a weighted-average rate of 1.42% through January 2019 on the \$255,000 of outstanding LIBOR-based borrowings. The unsecured revolving credit facility and the unsecured term loans are subject to financial covenants, which the Company was in compliance with at December 31, 2014.

The Company had \$25,000 and \$35,551 secured term loans with KeyBank, which were satisfied in January 2012 and the Company recognized debt satisfaction charges of \$1,578 as a result of the satisfaction.

Included in the Consolidated Statements of Operations, the Company recognized debt satisfaction gains (charges), net, excluding discontinued operations, of \$(7,016), \$(11,811) and \$12 for the years ended December 31, 2014, 2013 and 2012, respectively, due to the satisfaction of mortgages and notes payable other than those disclosed elsewhere in these financial statements. In addition, the Company capitalized \$3,441, \$2,397 and \$3,062 in interest, including discontinued operations, for the years ended 2014, 2013 and 2012, respectively.

80
