(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Name of each exchange on which registered

Class A ordinary shares, par value \$0.0000225 per share

New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

Class X ordinary shares, par value \$0.0000225 per share

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or

Edgar Filing: Accenture plc - Form 10-K

information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company   
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes  No

The aggregate market value of the common equity of the registrant held by non-affiliates of the registrant on February 28, 2013 was approximately \$48,317,496,293 based on the closing price of the registrant’s Class A ordinary shares, par value \$0.0000225 per share, reported on the New York Stock Exchange on such date of \$74.36 per share and on the par value of the registrant’s Class X ordinary shares, par value \$0.0000225 per share.

The number of shares of the registrant’s Class A ordinary shares, par value \$0.0000225 per share, outstanding as of October 15, 2013 was 773,411,718 (which number includes 137,679,446 issued shares held by the registrant). The number of shares of the registrant’s Class X ordinary shares, par value \$0.0000225 per share, outstanding as of October 15, 2013 was 30,282,564.

**DOCUMENTS INCORPORATED BY REFERENCE**

Portions of the definitive proxy statement to be filed with the Securities and Exchange Commission pursuant to Regulation 14A relating to the registrant’s Annual General Meeting of Shareholders, to be held on January 30, 2014, will be incorporated by reference in this Form 10-K in response to Items 10, 11, 12, 13 and 14 of Part III. The definitive proxy statement will be filed with the SEC not later than 120 days after the registrant’s fiscal year ended August 31, 2013.

PART I

Disclosure Regarding Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 (the “Exchange Act”) relating to our operations, results of operations and other matters that are based on our current expectations, estimates, assumptions and projections. Words such as “may,” “will,” “should,” “likely,” “anticipates,” “expects,” “intends,” “plans,” “projects,” “believes,” “estimates,” “positioned,” “outlook” and similar expressions are used to identify these forward-looking statements. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions that are difficult to predict. Forward-looking statements are based upon assumptions as to future events that may not prove to be accurate. Actual outcomes and results may differ materially from what is expressed or forecast in these forward-looking statements. Risks, uncertainties and other factors that might cause such differences, some of which could be material, include, but are not limited to, the factors discussed below under the section entitled “Risk Factors.” Our forward-looking statements speak only as of the date of this report or as of the date they are made, and we undertake no obligation to update them.

Available Information

Our website address is [www.accenture.com](http://www.accenture.com). We use our website as a channel of distribution for company information. We make available free of charge on the Investor Relations section of our website (<http://investor.accenture.com>) our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all amendments to those reports as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (the “SEC”) pursuant to Section 13(a) or 15(d) of the Exchange Act. We also make available through our website other reports filed with or furnished to the SEC under the Exchange Act, including our proxy statements and reports filed by officers and directors under Section 16(a) of the Exchange Act, as well as our Code of Business Ethics. Financial and other material information regarding us is routinely posted on and accessible at <http://investor.accenture.com>. We do not intend for information contained in our website to be part of this Annual Report on Form 10-K.

Any materials we file with the SEC may be read and copied at the SEC’s Public Reference Room at 100 F Street, NE, Washington, DC, 20549. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site (<http://www.sec.gov>) that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC.

In this Annual Report on Form 10-K, we use the terms “Accenture,” “we,” the “Company,” “our” and “us” to refer to Accenture plc and its subsidiaries or, prior to September 1, 2009, to Accenture Ltd and its subsidiaries. All references to years, unless otherwise noted, refer to our fiscal year, which ends on August 31.

ITEM 1. BUSINESS

Overview

We are one of the world’s leading organizations providing management consulting, technology and outsourcing services, with approximately 275,000 employees; offices and operations in more than 200 cities in 56 countries; and revenues before reimbursements (“net revenues”) of \$28.56 billion for fiscal 2013.

Our “high performance business” strategy is to use our expertise in consulting, technology and outsourcing to help clients achieve performance at higher levels so they can create sustainable value for their customers and stakeholders. We use our industry and business-process knowledge, our service offering expertise and our insight into, and understanding of, emerging technologies and new business and technology trends to formulate and implement solutions with and for our clients. Our strategy is focused on helping clients improve operational performance, deliver their products and services more effectively and efficiently, and grow their businesses in existing and new markets. We operate globally with one common brand and business model designed to enable us to provide clients around the world with the same high level of service. Drawing on a combination of industry expertise, functional capabilities, alliances, global resources and technology, we seek to deliver competitively priced, high-value services that help our clients measurably improve business performance. Our global delivery model enables us to provide an end-to-end delivery capability by drawing on our global resources to deliver high-quality, cost-effective solutions to our clients.

In fiscal 2013, we continued to implement a strategy focused on industry and technology differentiation, as well as geographic expansion. We combine our capabilities across management consulting, technology and business process outsourcing to provide differentiated, industry- and function-based, end-to-end business services. We continue to invest in strategic initiatives including analytics, cloud computing, insight-driven health, interactive/digital marketing, mobility and smart grid. In fiscal 2013, these investments included a number of acquisitions in interactive/digital marketing. Our geographic expansion strategy focuses on emerging and mature markets with significant growth potential for us. Our priority emerging markets are the

Table of Contents

ASEAN (Association of Southeast Asian Nations) countries, Brazil, China, India, Mexico, the Middle East, Russia, South Africa, South Korea and Turkey.

Consulting, Technology and Outsourcing Services and Solutions

Our business is structured around five operating groups, which together comprise 19 industry groups serving clients in major industries around the world. Our industry focus gives us an understanding of industry evolution, business issues and applicable technologies, enabling us to deliver innovative solutions tailored to each client or, as appropriate, more standardized capabilities to multiple clients.

Our three growth platforms—management consulting, technology and business process outsourcing—are the innovation engines through which we build world-class skills and capabilities; develop our knowledge capital; and create, acquire and manage key assets central to the development of solutions for our clients. The professionals within these areas work closely with those in our operating groups to develop and deliver integrated services and solutions to clients.

Client engagement teams—which typically consist of industry experts, capability specialists and professionals with local market knowledge—leverage the capabilities of our global delivery model to deliver price-competitive services and solutions. In certain instances, our client engagement teams include subcontractors, who supplement our professionals with additional resources in a specific skill, service or product area, as needed.

Operating Groups

The following table shows the current organization of our five operating groups and their 19 industry groups. Our operating groups are our reportable operating segments. We do not allocate total assets by operating group, although our operating groups do manage and control certain assets. For certain historical financial information regarding our operating groups (including certain asset information), as well as financial information by geography (including long-lived asset information), see Note 16 (Segment Reporting) to our Consolidated Financial Statements under Item 8, “Financial Statements and Supplementary Data.”

Communications, Media & Technology

Our Communications, Media & Technology operating group serves the communications, electronics, high technology, media and entertainment industries. Professionals in this operating group help clients accelerate and deliver digital transformation, enhance their business results through industry-specific solutions and seize the opportunities made possible by the convergence of communications, computing and content. Examples of our services include helping clients develop cost-effective operations, create business model innovations, and digitally engage and entertain their customers. Our Communications, Media & Technology operating group comprises the following industry groups:

**Communications.** Our Communications industry group serves most of the world’s leading wireline, wireless, cable and satellite communications and service providers. We provide a range of services designed to help our communications clients grow revenues, increase profitability and improve customer satisfaction. We offer a portfolio of consulting, technology and outsourcing services designed to address major business and operational issues related to sales and service channels, billing and revenue management, new product innovation, network services, corporate and enterprise functions and information technology. Our Communications industry group represented approximately

54% of our Communications, Media & Technology operating group's net revenues in fiscal 2013.

Electronics & High Tech. Our Electronics & High Tech industry group serves the following industries: information and communications technology, software, semiconductor, consumer electronics, aerospace and defense, and medical equipment. We provide services in areas such as strategy, enterprise resource management, customer relationship management, integrated mobile services, embedded software services, product lifecycle management, sales transformation, digital marketing services, supply chain management, and merger/acquisition integration. Our Electronics & High Tech industry group represented approximately 35% of our Communications, Media & Technology operating group's net revenues in fiscal 2013.

## Table of Contents

**Media & Entertainment.** Our Media & Entertainment industry group serves the broadcast, entertainment, print, publishing and Internet/social media industries. We provide a wide range of digital services, including video solutions, marketing, performance advertising, intellectual property management, and content and media technologies designed to help clients effectively manage, access, distribute, sell and protect content across multiple platforms and devices. We also provide additional comprehensive turn-key solutions that help content owners and distributors adapt business processes and systems to enable digital monetization.

### **Financial Services**

Our Financial Services operating group serves the banking, capital markets and insurance industries. Professionals in this operating group work with clients in a dynamic global market environment to address growth, cost and profitability pressures, industry consolidation, regulatory changes and the need to continually adapt to new technologies. We offer services designed to help our clients increase cost efficiency, grow their customer base, manage risk and transform their operations. Our Financial Services operating group comprises the following industry groups:

**Banking.** Our Banking industry group works with retail and commercial banks, mortgage lenders and diversified financial enterprises. We help these organizations execute strategies to lower costs; acquire and retain customers; expand product and service offerings; manage risks; comply with new regulations; and leverage new technologies and distribution channels. We also provide software and services to improve the performance of our clients' core banking, credit and payments operations. Our Banking industry group represented approximately 51% of our Financial Services operating group's net revenues in fiscal 2013.

**Capital Markets.** Our Capital Markets industry group helps investment banks, broker/dealers, asset management firms, depositories, exchanges and clearing and settlement organizations by providing consulting and outsourcing services to improve business performance. We also help clients develop and implement trading, wealth and asset-management, and market infrastructure systems and solutions.

**Insurance.** Our Insurance industry group helps property and casualty insurers, life insurers, reinsurance firms and insurance brokers improve business processes, modernize their technologies and improve the quality and consistency of risk underwriting decisions. We offer claims and policy management software and services designed to enable better customer service while optimizing costs and delivering products faster. We also provide outsourcing solutions designed to help insurers improve working capital and cash flow, deliver cost savings and enhance long-term growth. Our Insurance industry group represented approximately 32% of our Financial Services operating group's net revenues in fiscal 2013.

### **Health & Public Service**

Our Health & Public Service operating group serves healthcare payers and providers, as well as government departments and agencies, public service organizations, educational institutions and non-profit organizations around the world. The group's service offerings and research-based insights are designed to help clients deliver better social, economic and health outcomes to the people they serve. Our Health & Public Service operating group comprises the following industry groups:

**Health.** Our Health industry group works with healthcare providers, such as hospitals, public health systems, policy-making authorities, health insurers (payers) and industry organizations and associations around the world to improve the quality, accessibility and productivity of healthcare. Our key industry business services address a variety of areas, including clinical services, such as electronic medical records; health management and administration services, such as health insurance exchanges; claims excellence/cost containment, and improving and connecting health information technology systems. Our Health industry group represented approximately 31% of our Health & Public Service operating group's net revenues in fiscal 2013.

**Public Service.** Our Public Service industry group helps governments position themselves for the future by transforming the way they deliver public services and engage with citizens. We provide services designed to help them increase the efficiency of their operations, improve service delivery to citizens and reduce their overall costs. We work primarily with defense departments and military forces; public safety authorities, such as police forces and border management agencies; justice departments; human services agencies; educational institutions, such as universities; non-profit organizations; and postal, customs, revenue and tax agencies. Our clients include national,

state and local-level governments as well as multilateral organizations. Our Public Service industry group represented approximately 69% of our Health & Public Service operating group's net revenues in fiscal 2013. In addition, our work with clients in the U.S. federal government represented approximately 28% of our Health & Public Service operating group's net revenues in fiscal 2013.

Table of Contents

Products

Our Products operating group serves a set of increasingly interconnected consumer-relevant industries. Our Products operating group comprises the following industry groups:

**Air, Freight & Travel Services.** Our Air, Freight & Travel Services industry group serves airlines, freight and logistics companies, and travel services companies, including hotels, tour operators, rental car companies and cruise operators. We help clients address organizational effectiveness by developing and implementing more efficient networks, optimizing back-office functions, integrating supply chains, developing procurement strategies and building improved customer relationship management capabilities. We also offer industry-specific solutions, such as Navitaire for the airline industry and a proprietary end-to-end shipment management solution for the freight and logistics industry. For hospitality and travel services companies, we provide services ranging from multichannel commerce and global personalization services to transforming and automating back-office functions such as IT and finance and accounting.

**Automotive.** Our Automotive industry group works with original equipment manufacturers and suppliers. We help clients respond to the evolving needs of their customers with offerings that range from in-vehicle infotainment to customer-centered sales and marketing. In addition, our global capabilities are designed to improve efficiencies and drive value in areas including global manufacturing, aftersales and services and product lifecycle optimization.

**Consumer Goods & Services.** Our Consumer Goods & Services industry group serves food and beverage, alcoholic beverage, household goods, personal care, tobacco, fashion/apparel, agribusiness and consumer health companies around the world. Our offerings are designed to help companies improve their performance by addressing core IT, enterprise services, channel and sales management, consumer engagement, working capital productivity improvement and supply chain collaboration. We also help clients build operating models that support end-to-end processes needed to improve business results.

**Industrial Equipment.** Our Industrial Equipment industry group serves the industrial and electrical equipment, automotive supplier, consumer durable and heavy equipment industries. We help our clients increase operating and supply chain efficiencies by improving processes and leveraging technology, and also help clients generate value from strategic mergers and acquisitions. In addition, our Industrial Equipment industry group develops and deploys solutions in the areas of cloud computing, product lifecycle management, channel management, collaborative product design, remote field maintenance, enterprise application integration and outsourcing.

**Infrastructure & Transportation Services.** Our Infrastructure & Transportation Services industry group serves companies in the construction, infrastructure management (ports, airports, seaports and road-tolling facilities) and mass transportation industries. We help clients develop and implement strategies and solutions designed to improve their information technology and customer relationship management capabilities, operate more efficient networks, integrate supply chains, develop procurement and electronic business marketplace strategies, and more effectively manage maintenance, repair and overhaul processes and expenses—all in the context of increasing priorities around mobility services and sustainability.

**Life Sciences.** Our Life Sciences industry group works with pharmaceutical, medical technology and biotechnology companies. We provide services in large-scale business and technology transformation, business performance improvement, post-merger integration, and business process and technology outsourcing. Our life sciences expertise covers the key business areas of research and development, marketing and sales/commercial services, supply chain, manufacturing and select back-office functions.

**Retail.** Our Retail industry group serves a wide range of companies, including supermarkets, hardline retailers, mass-merchandise discounters, department stores, and fashion and other specialty retailers. We provide offerings designed to help retailers become integrated digital enterprises and provide a seamless shopping experience across multiple channels for their customers. We use analytics to revamp traditional approaches to marketing, pricing, promotion, assortment and fulfillment.

## Table of Contents

### Resources

Our Resources operating group serves the chemicals, energy, forest products, metals and mining, utilities and related industries. Market conditions are driving energy companies to seek new ways of creating value for shareholders; deregulation and climate change are fundamentally reforming the utilities industry and yielding cross-border opportunities; and there is an intensive focus on productivity and portfolio management in the chemicals and natural resources industries. We work with clients to address all of these challenges and to create solutions designed to help them differentiate themselves in the marketplace, gain competitive advantage and manage their large-scale capital investments. We also work with clients across all industry groups on sustainability to help them meet emission targets and increase energy efficiency. Our Resources operating group comprises the following industry groups:

**Chemicals.** Our Chemicals industry group works with a wide cross-section of industry segments, including petrochemicals, specialty chemicals, polymers and plastics, gases and agricultural chemicals, among others. We help chemical companies develop and implement new business strategies, redesign business processes, manage complex change initiatives, and integrate processes and technologies to achieve higher levels of performance.

**Energy.** Our Energy industry group serves a wide range of companies in the oil and gas industry, including upstream, downstream, oil services and clean-energy companies. We help our clients optimize production, manage their hydrocarbon and non-hydrocarbon supply chains, streamline marketing operations and realize the potential of third-party enterprise-wide technology solutions. Our Energy industry group represented approximately 33% of our Resources operating group's net revenues in fiscal 2013.

**Natural Resources.** Our Natural Resources industry group serves the metals, mining, forest products and building materials industries. We help our clients—which primarily include mining companies in the coal, iron ore, copper and precious metals sectors, as well as steel and aluminum producers—develop and execute innovative strategies, improve operations and reduce risk.

**Utilities.** Our Utilities industry group works with electric, gas and water utilities around the world to respond to an evolving marketplace. Our services and solutions enable transformation across the entire value chain for generation and energy markets, transmission and distribution, retail and customer operations. These offerings include customer relationship management, workforce enablement, smart-grid development, supply chain optimization, and trading and risk management. Accenture's capabilities additionally support corporate services and outsourcing for our utilities clients. Our Utilities industry group represented approximately 32% of our Resources operating group's net revenues in fiscal 2013.

### Growth Platforms

Our management consulting, technology and business process outsourcing (“BPO”) growth platforms are the skill-based innovation engines through which we build world-class skills and capabilities; develop our knowledge capital; and create, acquire and manage key assets central to the development of solutions for our clients. The professionals within these areas work closely with those in our operating groups to develop and deliver integrated services and solutions to clients.

#### Management Consulting

Our management consulting growth platform is responsible for the development and delivery of our strategic, operational, functional, industry, process and change consulting capabilities, working closely with the professionals in our operating groups and the other growth platforms. Our management consulting professionals help large, complex organizations design and execute changes to their business and operating models, either for one or more business units or across the entire organization. This growth platform comprises seven function-based service areas, as well as industry-focused teams of management consulting professionals with deep skills in the numerous industry segments that we serve. The majority of management consulting professionals have a primary focus on either one of the seven service areas or on an industry, with a secondary focus on the other (i.e., industry or service area).

The service areas are as follows:

**Finance & Enterprise Performance.** The professionals in Finance & Enterprise Performance work with our clients' finance and business unit executives to develop financial transaction processing, corporate finance and business performance reporting capabilities. Among the services we provide are strategic consulting on the design and structure of the finance function and the establishment of shared service centers for multiple business functions. Our

finance capability services also address revenue cycle management, billing, credit and collection effectiveness, electronic invoicing and settlement, tax processing, treasury operations, trading operations, lending and debt recovery, real estate optimization and benchmarking. Our performance management services address shareholder value targeting, scorecard and performance metrics development, performance reporting solutions and applied business analytics to improve profitability. Our professionals work with finance executives to develop and implement solutions designed to help them

5

---

## Table of Contents

align their companies' investments with their business objectives and establish security relating to the exchange of information with reporting institutions.

**Operations.** The professionals in Operations work with clients across a broad range of industries to develop and implement measurable, lasting improvements in all aspects of operations to enable profitable growth in new and existing markets. Our professionals combine global industry expertise and skills in a variety of areas, including operations and process transformation; sourcing and procurement; innovation and product development; manufacturing strategy and operations; service strategy and operations; integrated planning and fulfillment; and supply chain education. We work with clients to help align underlying process and operating models to support business strategies; optimize global operations; support profitable product launches; and enhance the skills and capabilities of the operations and supply chain workforce.

**Risk Management.** The professionals in Risk Management work with clients to develop risk management capabilities to help protect and grow the economic value of their organizations. Our Risk Management services help our clients align business strategy and risk capabilities to evaluate market options and drive profitable growth; develop a risk-conscious culture across their organizations; adapt to industry and geographic regulations to drive positive business impact; and develop capabilities to collect, model and analyze business information for better risk-based decision-making.

**Sales & Customer Services.** The professionals in Sales & Customer Services (formerly Customer Relationship Management) help companies acquire, develop and retain more profitable customer relationships to accelerate growth, improve sales and profitability, and reduce sales operations and customer service costs. We offer a full range of capabilities that address every aspect of sales and post-sales customer service, including pricing strategy and profitability assessment, customer analytics, direct and indirect salesforce performance improvement, customer service, field support and customer contact operations.

**Strategy.** Our Strategy professionals combine their strategy and operating model experience to help clients turn insights into results at both the enterprise and business unit level. With deep skills and capabilities in corporate strategy, corporate restructuring, growth and innovation strategies, mergers and acquisitions, and merger integration, we help clients develop and execute pragmatic ways to transform organizations and drive sustained high performance.

**Sustainability.** Our Sustainability professionals work with clients to integrate sustainability approaches into their business strategies, operating models, critical processes and infrastructure, including technical operations and support, to help them balance positive economic, environmental and social impact.

**Talent & Organization.** The professionals in Talent & Organization work with clients on a wide range of talent management, human resources, organizational effectiveness, human capital, learning and change issues to deliver improved business and operational results. Our integrated approach and end-to-end capabilities include services and solutions in organization and change management, human resources transformation, learning and collaboration, organizational performance management, talent management and overall transformation of key workforces. We help companies and governments improve the efficiency and effectiveness of talent and organization capabilities while lowering associated costs; deliver improvements in employee, workforce and business performance; improve the efficiency and effectiveness of the human resources function and transform organizations through project-, program- and enterprise-level change management.

In addition to our function-based service areas, we have specialized teams that provide industry-specific management consulting services, which draw from our functional service areas but are customized and adapted to each industry. The majority of our management consultants—whether in a function-based service area or on an industry management consulting team—have a specific industry alignment, underscoring the strength of our industry assets and experience.

### Technology

Our technology growth platform comprises three service areas: systems integration consulting, technology consulting and technology outsourcing.

#### Systems Integration Consulting

Our systems integration consulting services and solutions include:

-

Enterprise Solutions and Enterprise Resource Planning (“ERP”). We implement a variety of application software—including SAP, Oracle, Salesforce.com and Workday, among others—to consolidate operations, streamline business processes, connect geographies and manage and exploit data to make more informed business decisions. Industry and Functional Solutions. We provide clients with industry and functional solutions that streamline, integrate and manage business processes, systems and information, based on other vendors’ software assets or our own assets. These are typically “add-ons” to our clients’ core ERP systems or software to support industry-unique functions such as trading solutions and billing systems. From design to implementation, these end-to-end services help our clients improve

## Table of Contents

analytics-based decision-making, financial management, customer service excellence, supply chain management and human resource management.

**Information Management Services.** We provide services to help organizations manage the full range of their information needs to improve data quality, enhance decision-making capabilities and meet compliance requirements across social media, cloud and mobile platforms, as well as legacy environments. Our services include business intelligence; content management and portals; data management; and data quality solutions.

**Custom Solutions.** With deep skills and expertise in both J2EE (Java-based) and .NET technology architectures, we work with clients to develop custom solutions that meet unique business needs, often using open-source technology products and platforms.

**Microsoft Solutions.** Together with our alliance partner Microsoft and our Avanade subsidiary, we develop and deliver cost-efficient, innovative business solutions across the Microsoft platform and full set of software, leveraging our deep industry expertise and practical applications of technologies. We have also helped a significant number of clients implement Microsoft's BPOS (Business Productivity Online Standard Suite) and other cloud-based tools using Microsoft's Azure platform.

### Technology Consulting

Our key technology consulting services and solutions include:

**Information Technology ("IT") Strategy.** We help client CEOs and CIOs link IT investments to business results and help manage those investments to ensure that the planned business impact is achieved. We also help CIOs transform how IT works, both internally and with business partners, so that IT is "run like a business" to deliver high performance.

**Infrastructure Consulting.** We provide solutions to help clients optimize their IT infrastructures—whether on-premise, in the cloud, or a hybrid—while reducing costs. From virtualization of servers and desktops and service integration, to data center operations engineering and enterprise network design and implementation, our services are designed to enable clients to rationalize, standardize, optimize, secure and transform their IT infrastructures for improved performance of mission-critical business processes, applications and end-users.

**IT Security Consulting.** We help clients integrate security into key business processes and implement security tools and processes so they can become more agile in response to changing market forces and evolving threats. Working with us, our clients are better able to secure data and applications, protect identities, address threats and vulnerabilities, and meet compliance demands while reducing costs and improving efficiency.

**Application Modernization and Optimization.** We specialize in defining and executing strategies that transform our clients' application portfolios into rationalized, flexible, cost-efficient and reliable assets. Our services and solutions help clients define and implement innovative approaches to extending the useful life of legacy applications at a significantly reduced cost or help to retire platforms and replace them with more modern, sustainable solutions.

### Technology Outsourcing

Our approach to technology outsourcing goes beyond traditional cost-cutting measures to help clients improve the total performance of application and infrastructure development and maintenance. We provide a full range of application outsourcing and infrastructure outsourcing services and solutions:

**Application Outsourcing.** We provide a wide array of application outsourcing services under flexible arrangements, managing custom or packaged software applications—including enterprise-wide applications such as SAP and Oracle—over their complete development and maintenance lifecycles. Our scope of services ranges from standardized, discrete application outsourcing services—including application testing, application management of enterprise-wide software programs, and capacity services—to large-scale application enhancement and development for individual or multiple applications, or an entire portfolio of applications.

**Infrastructure Outsourcing.** We provide ongoing management of clients' IT infrastructure capabilities and functions, with expertise in six service areas: service desk; workplace services; data-center services; network services; security services; and IT spend management. We provide discrete skills (e.g., capacity services) as well as fully managed services. Our services offer clients a more cost-effective, secure and responsive infrastructure that can be scaled and adapted to their business needs.

Accenture helps business leaders and IT leaders define and execute a digital agenda to support their business strategy, harnessing the power of digital technology innovation, including social media, cloud, big data and analytics, and

mobility to help the entire organization better compete, innovate and expand. The following initiatives span our three service areas described above:

• **Cloud Computing.** We provide cloud services in three areas to help clients improve IT efficiency and agility: we help clients plan, implement and manage services from our provider ecosystem; we develop Software as a Service (SaaS)

7

---

## Table of Contents

solutions built on our proprietary assets; and we provide provisioning, integration and management of services to bridge operations across traditional and cloud environments through the Accenture Cloud Platform. In addition, we help clients implement SaaS, Platform as a Service (PaaS) and Infrastructure as a Service (IaaS) solutions to meet their business needs with the added benefits of increasing flexibility and reducing total cost of ownership. Our cloud methodology and toolset enable delivery of cloud solutions across a wide range of services with leading providers including Amazon Web Services, Google, Microsoft, NetSuite, Oracle, Pivotal, Salesforce.com, SAP, Verizon and Workday.

**Mobility Services.** Accenture helps clients deliver mobility solutions, which are designed to run their businesses more efficiently so they can focus on improving connections with their customers and workforces. We develop and implement enterprise mobile solutions incorporating strategies, applications, and managed services; create and deliver mobile commerce solutions; and help organizations become digital businesses.

### **Business Process Outsourcing**

Our business process outsourcing (“BPO”) growth platform provides business process services that help clients drive business value, achieve higher levels of performance and results, and/or reduce costs. Through our BPO services, we manage specific business processes or functions for clients, providing solutions that are more efficient and cost-effective than if the functions were provided in-house while also providing business insight to drive business outcomes.

We offer clients across all industries a variety of BPO services for specific business functions and/or processes, including finance and accounting, human resources, learning and procurement, among others. We also offer industry-specific BPO services, such as credit services, designed to address the unique needs of client organizations and deliver business outcomes. We provide these services on a global basis and across industry sectors through our Global Delivery Network.

### **Global Delivery Model**

A key differentiator is our global delivery model, which allows us to draw on the benefits of using people and other resources from around the world—including scalable, standardized processes, methods and tools; specialized management consulting, business process and technology skills; cost advantages; foreign language fluency; proximity to clients; and time zone advantages—to deliver high-quality solutions. Emphasizing quality, productivity, reduced risk, speed to market and predictability, our global delivery model enables us to provide clients with price-competitive services and solutions.

Our Global Delivery Network continues to be a competitive differentiator for us. As of August 31, 2013, we had more than 182,000 people in our network globally and more than 50 delivery centers around the world.

### **Alliances**

We have sales and delivery alliances with companies whose capabilities complement our own by, among other things, enhancing a service offering, delivering a new technology or helping us extend our services to new geographies. By combining our alliance partners’ products and services with our own capabilities and expertise, we create innovative, high-value business solutions for our clients. Most of our alliances are non-exclusive. These alliances can generate significant revenues from services we provide to implement our alliance partners’ products as well as revenue from the resale of their products. We also receive as reimbursement some direct payments, which are not material to our business, from our alliance partners to cover costs we incur for marketing and other assistance.

### **Research and Innovation**

We are committed to developing leading-edge ideas. Research and innovation have been major factors in our success, and we believe they will help us continue to grow in the future. We use our investment in research and development—on which we spent \$715 million, \$560 million and \$482 million in fiscal 2013, 2012 and 2011, respectively—to help create, commercialize and disseminate innovative business strategies and technology solutions.

Our research and innovation program is designed to generate early insights into how knowledge can be harnessed to create innovative business solutions for our clients and to develop business strategies with significant value. One component of this is our research and development organization, Accenture Technology Labs, which identifies and develops new technologies that we believe will be the drivers of our clients’ growth and enable them to be first to market with unique capabilities.

We also promote the creation of knowledge capital and thought leadership through the Accenture Institute for High Performance. In addition, we spend a significant portion of our research and development investment directly through our operating groups and our consulting, technology and outsourcing growth platforms to develop market-ready solutions for our clients.

Employees

Our most important asset is our people. The diverse and global makeup of our workforce enables us to serve our diverse and global client base. We are deeply committed to the continued development of our employees, who receive significant and focused technical, functional, industry, managerial and leadership skill development and training appropriate for their roles and

## Table of Contents

levels within our company throughout their careers with us. We seek to reinforce our employees' commitments to our clients, culture and values through a comprehensive performance management system and a career philosophy that rewards both individual performance and teamwork. We strive to maintain a work environment that reinforces collaboration, motivation and innovation and is consistent with our core values and Code of Business Ethics. As of August 31, 2013, we had approximately 275,000 employees worldwide.

### Competition

We operate in a highly competitive and rapidly changing global marketplace and compete with a variety of organizations that offer services competitive with those we offer. Our competitors include:

- large multinational providers, including the services arms of large global technology providers (hardware, equipment and software), that offer some or all of the services that we do;
- off-shore service providers in lower-cost locations, particularly in India, the Philippines and China, that offer services similar to those we offer, often at highly competitive prices and on more aggressive contractual terms;
- accounting firms that have expanded or are in the process of expanding, including through acquisitions, their consulting services in areas that compete with us;
- niche solution or service providers or local competitors that compete with us in a specific geographic market, industry segment or service area, including companies that provide new or alternative products, services or delivery models; and
- in-house departments of large corporations that use their own resources, rather than engage an outside firm for the types of services we provide.

Our revenues are derived primarily from Fortune Global 500 and Fortune 1000 companies, medium-sized companies, governments, government agencies and other enterprises. We believe that the principal competitive factors in the industries in which we compete include:

- skills and capabilities of people;
- technical and industry expertise;
- innovative service and product offerings;
- ability to add business value and improve performance;
- reputation and client references;
- contractual terms, including competitive pricing;
- ability to deliver results reliably and on a timely basis;
- scope of services;
- service delivery approach;
- quality of services and solutions;
- availability of appropriate resources; and
- global reach and scale, including level of presence in key emerging markets.

Our clients typically retain us on a non-exclusive basis.

### Intellectual Property

We provide value to our clients based in part on a differentiated range of proprietary inventions, methodologies, software, reusable knowledge capital and other intellectual property. We recognize the increasing value of intellectual property in the marketplace and create, harvest, and protect this intellectual property. We leverage patent, trade secret, copyright and trademark laws as well as contractual arrangements to protect our intellectual property. We have also established policies to respect the intellectual property rights of third parties, such as our clients, partners and others. As of August 31, 2013, we had 2,632 patent applications pending in the United States and other jurisdictions and had been issued 855 U.S. patents and 1,000 non-U.S. patents.

Trademarks appearing in this report are the trademarks or registered trademarks of Accenture Global Services Ltd or third parties, as applicable.

### Organizational Structure

Accenture plc is an Irish public limited company with no material assets other than Class I common shares in its subsidiary, Accenture SCA, a Luxembourg partnership limited by shares ("Accenture SCA"). Accenture plc's only business is to hold these

Table of Contents

shares. Accenture plc owns a majority voting interest in Accenture SCA. As the general partner of Accenture SCA and as a result of Accenture plc's majority voting interest in Accenture SCA, Accenture plc controls Accenture SCA's management and operations and consolidates Accenture SCA's results in its Consolidated Financial Statements. We operate our business through subsidiaries of Accenture SCA. Accenture SCA generally reimburses Accenture plc for its expenses but does not pay Accenture plc any fees.

History

Prior to our transition to a corporate structure in fiscal 2001, we operated as a series of related partnerships and corporations under the control of our partners. In connection with our transition to a corporate structure, our partners generally exchanged all of their interests in these partnerships and corporations for Accenture Ltd Class A common shares or, in the case of partners in certain countries, Accenture SCA Class I common shares or exchangeable shares issued by Accenture Canada Holdings Inc., an indirect subsidiary of Accenture SCA. Generally, partners who received Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares also received a corresponding number of Accenture Ltd Class X common shares, which entitled their holders to vote at Accenture Ltd shareholder meetings but did not carry any economic rights. The combination of the Accenture Ltd Class X common shares and the Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares gave these partners substantially similar economic and governance rights as holders of Accenture Ltd Class A common shares.

On June 10, 2009, Accenture plc was incorporated in Ireland, as a public limited company, in order to effect moving the place of incorporation of our parent holding company from Bermuda to Ireland (the "Transaction"). The Transaction was completed on September 1, 2009, at which time Accenture Ltd, our predecessor holding company, became a wholly owned subsidiary of Accenture plc and Accenture plc became our parent holding company. Accenture Ltd was dissolved on December 29, 2009.

On December 1, 2012, we ceased using the designation "senior executive." The majority of our leaders are now designated "managing directors," and a select group of our most experienced leaders are "senior managing directors." Managing directors and senior managing directors, along with members of the Accenture global management committee (the Company's primary management and leadership team, which consists of 17 of our most senior leaders), comprise "Accenture Leadership."

The selected financial data included in Item 6, "Selected Financial Data," of this report with respect to periods prior to September 1, 2009 reflect the consolidated operations of Accenture Ltd (the predecessor registrant of Accenture plc) and its subsidiaries. The Consolidated Financial Statements included in this report reflect the ownership interests in Accenture SCA and Accenture Canada Holdings Inc. held by certain of our current and former members of Accenture Leadership as noncontrolling interests. The noncontrolling ownership interests percentage was 6% as of August 31, 2013.

Accenture plc Class A and Class X Ordinary Shares

Each Class A ordinary share and each Class X ordinary share of Accenture plc entitles its holder to one vote on all matters submitted to a vote of shareholders of Accenture plc. A Class X ordinary share does not, however, entitle its holder to receive dividends or to receive payments upon a liquidation of Accenture plc. As described above under "—History," Class X ordinary shares generally provide the holders of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares with a vote at Accenture plc shareholder meetings that is equivalent to the voting rights held by Accenture plc Class A ordinary shareholders, while their economic rights consist of interests in Accenture SCA Class I common shares or in Accenture Canada Holdings Inc. exchangeable shares.

Under its memorandum and articles of association, Accenture plc may redeem, at its option, any Class X ordinary share for a redemption price equal to the nominal value of the Class X ordinary share, or \$0.0000225 per share. Accenture plc, as successor to Accenture Ltd, has separately agreed with the original holders of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares not to redeem any Class X ordinary share of such holder if the redemption would reduce the number of Class X ordinary shares held by that holder to a number that is less than the number of Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares owned by that holder. Accenture plc will redeem Class X ordinary shares upon the redemption or

exchange of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares so that the aggregate number of Class X ordinary shares outstanding at any time does not exceed the aggregate number of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares outstanding.

Class X ordinary shares are not transferable without the consent of Accenture plc.

A transfer of Accenture plc Class A ordinary shares effected by transfer of a book-entry interest in The Depository Trust Company will not be subject to Irish stamp duty. Other transfers of Accenture plc Class A ordinary shares may be subject to Irish stamp duty (currently at the rate of 1% of the price paid or the market value of the Class A ordinary shares acquired, if higher) payable by the buyer.

Accenture SCA Class I Common Shares

Only Accenture and the current and former members of Accenture Leadership and their permitted transferees hold Accenture SCA Class I common shares. Each Class I common share entitles its holder to one vote on all matters submitted to the shareholders

## Table of Contents

of Accenture SCA and entitles its holder to dividends and liquidation payments. As of October 15, 2013, Accenture holds a voting interest of approximately 94% of the aggregate outstanding Accenture SCA Class I common shares entitled to vote, with the remaining 6% of the voting interest held by the current and former members of Accenture Leadership and their permitted transferees.

Accenture SCA is obligated, at the option of the holder, to redeem any outstanding Accenture SCA Class I common share at a redemption price per share generally equal to its current market value as determined in accordance with Accenture SCA's articles of association. Under Accenture SCA's articles of association, the market value of a Class I common share that is not subject to transfer restrictions will be deemed to be equal to (i) the average of the high and low sales prices of an Accenture plc Class A ordinary share as reported on the New York Stock Exchange (or on such other designated market on which the Class A ordinary shares trade), net of customary brokerage and similar transaction costs, or (ii) if Accenture plc sells its Class A ordinary shares on the date that the redemption price is determined (other than in a transaction with any employee or an affiliate or pursuant to a preexisting obligation), the weighted average sales price of an Accenture plc Class A ordinary share on the New York Stock Exchange (or on such other market on which the Class A ordinary shares primarily trade), net of customary brokerage and similar transaction costs. Accenture SCA may, at its option, pay this redemption price with cash or by delivering Accenture plc Class A ordinary shares on a one-for-one basis. In order to maintain Accenture plc's economic interest in Accenture SCA, Accenture plc generally will acquire additional Accenture SCA common shares each time additional Accenture plc Class A ordinary shares are issued.

Except in the case of a redemption of Class I common shares or a transfer of Class I common shares to Accenture plc or one of its subsidiaries, Accenture SCA's articles of association provide that Accenture SCA Class I common shares may be transferred only with the consent of the general partner of Accenture SCA. In addition, all holders of Class I common shares (except Accenture) are precluded from having their shares redeemed by Accenture SCA or transferred to Accenture SCA, Accenture plc or a subsidiary of Accenture plc at any time or during any period when Accenture SCA determines, based on the advice of counsel, that there is material non-public information that may affect the average price per share of Accenture plc Class A ordinary shares, if the redemption would be prohibited by applicable law, during an underwritten offering due to an underwriters lock-up or during the period from the announcement of a tender offer by Accenture SCA or its affiliates for Accenture SCA Class I common shares until the expiration of ten business days after the termination of the tender offer (other than to tender the holder's Accenture SCA Class I common shares in the tender offer).

### Accenture Canada Holdings Inc. Exchangeable Shares

Holders of Accenture Canada Holdings Inc. exchangeable shares may exchange their shares for Accenture plc Class A ordinary shares at any time on a one-for-one basis. Accenture may, at its option, satisfy this exchange with cash at a price per share generally equal to the market price of an Accenture plc Class A ordinary share at the time of the exchange. Each exchangeable share of Accenture Canada Holdings Inc. entitles its holder to receive distributions equal to any distributions to which an Accenture plc Class A ordinary share entitles its holder. The exchange of all of the outstanding Accenture Canada Holdings Inc. exchangeable shares for Accenture plc Class A ordinary shares would not have a material impact on the equity ownership position of Accenture or the other shareholders of Accenture SCA.

### ITEM 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the following factors which could materially adversely affect our business, financial condition, results of operations (including revenues and profitability) and/or stock price. Our business is also subject to general risks and uncertainties that may broadly affect companies, including us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also could materially adversely affect our business, financial condition, results of operations or stock price. Our results of operations could be adversely affected by volatile, negative or uncertain economic conditions and the effects of these conditions on our clients' businesses and levels of business activity.

Global macroeconomic conditions affect our clients' businesses and the markets they serve. Volatile, negative or uncertain economic conditions in our significant markets have undermined and could in the future undermine business confidence in our significant markets or in other markets and cause our clients to reduce or defer their spending on

new initiatives and technologies, or may result in clients reducing, delaying or eliminating spending under existing contracts with us, which would negatively affect our business. Growth in the markets we serve could be at a slow rate, or could stagnate or contract, in each case, for an extended period of time. Differing economic conditions and patterns of economic growth and contraction in the geographical regions in which we operate and the industries we serve have affected and may in the future affect demand for our services. For example, revenue growth in local currency during fiscal 2013 was lower than we expected due, in large part, to lower than expected demand, particularly in certain geographies experiencing challenging macroeconomic conditions, such as certain countries in Europe and in Brazil. A material portion of our revenues and profitability is derived from our clients in Europe and North America. Weak demand or a slower than expected recovery in these markets could have a material adverse effect on our results of operations. In addition, an economic slowdown in key emerging markets, where we typically grow faster than in more mature markets, also

Table of Contents

could adversely affect our results of operations, as we experienced. Ongoing economic volatility and uncertainty and changing demand patterns affect our business in a number of other ways, including making it more difficult to accurately forecast client demand and effectively build our revenue and resource plans, particularly in consulting. This could result, for example, in us having to use involuntary terminations as means to keep our supply of skills and resources in balance.

Economic volatility and uncertainty is particularly challenging because it may take some time for the effects and changes in demand patterns resulting from these and other factors to manifest themselves in our business and results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Our business depends on generating and maintaining ongoing, profitable client demand for our services and solutions, and a significant reduction in such demand could materially affect our results of operations.

Our revenue and profitability depend on the demand for our services with favorable margins, which could be negatively affected by numerous factors, many of which are beyond our control and unrelated to our work product. As described above, volatile, negative or uncertain global economic conditions and lower growth in the markets we serve have adversely affected and could in the future adversely affect client demand for our services and solutions. In addition, as new technologies become available, such as Software as a Service (SaaS), which continually change the nature of our business, clients may slow spending on legacy technologies in anticipation of implementing these new technologies. Developments in the industries we serve, which may be rapid, also could shift demand to new services and solutions. If, as a result of new technologies or changes in the industries we serve, our clients demand new services and solutions, we may be less competitive in these new areas or need to make significant investment to meet that demand. Companies in the industries we serve sometimes seek to achieve economies of scale and other synergies by combining with or acquiring other companies. If one of our current clients merges or consolidates with a company that relies on another provider for its consulting, systems integration and technology, or outsourcing services, we may lose work from that client or lose the opportunity to gain additional work if we are not successful in generating new opportunities from the merger or consolidation. Many of our consulting contracts are less than 12 months in duration, and these contracts typically permit a client to terminate the agreement with as little as 30 days' notice. Longer-term, larger and more complex contracts, such as the majority of our outsourcing contracts, generally require a longer notice period for termination and often include an early termination charge to be paid to us, but this charge might not be sufficient to cover our costs or make up for anticipated ongoing revenues and profits lost upon termination of the contract. Many of our contracts allow clients to terminate, or delay, reduce or eliminate spending on the services and solutions we provide. Additionally, a client could choose not to retain us for additional stages of a project, try to renegotiate the terms of its contract or cancel or delay additional planned work. When contracts are terminated or not renewed, we lose the anticipated revenues, and it may take significant time to replace the level of revenues lost. Consequently, our results of operations in subsequent periods could be materially lower than expected. The specific business or financial condition of a client, changes in management and changes in a client's strategy also are all factors that can result in terminations, cancellations or delays.

If we are unable to keep our supply of skills and resources in balance with client demand around the world and attract and retain professionals with strong leadership skills, our business, the utilization rate of our professionals and our results of operations may be materially adversely affected.

Our success is dependent, in large part, on our ability to keep our supply of skills and resources in balance with client demand around the world and our ability to attract and retain personnel with the knowledge and skills to lead our business globally. Experienced personnel in our industry are in high demand, and competition for talent is intense. We must hire, retain and motivate appropriate numbers of talented people with diverse skills in order to serve clients across the globe, respond quickly to rapid and ongoing technology, industry and macroeconomic developments and grow and manage our business. For example, if we are unable to hire or continually train our employees to keep pace with the rapid and continuing changes in technology and the industries we serve or changes in the types of services clients are demanding, such as the increase in demand for outsourcing services, we may not be able to develop and deliver new services and solutions to fulfill client demand. As we expand our services and solutions, we must also hire and retain an increasing number of professionals with different skills and professional expectations than those of the

professionals we have historically hired and retained. Additionally, if we are unable to successfully integrate, motivate and retain these professionals, our ability to continue to secure work in those industries and for our services and solutions may suffer.

We are particularly dependent on retaining members of Accenture Leadership and other experienced managers, and if we are unable to do so, our ability to develop new business and effectively lead our current projects could be jeopardized. We depend on identifying, developing and retaining key employees to provide leadership and direction for our businesses. This includes developing talent and leadership capabilities in emerging markets, where the depth of skilled employees is often limited and competition for these resources is intense. Our geographic expansion strategy in emerging markets depends on our ability to attract, retain and integrate both local business leaders and people with the appropriate skills.

Similarly, our profitability depends on our ability to effectively utilize personnel with the right mix of skills and experience to perform services for our clients, including our ability to transition employees to new assignments on a timely basis. If we are unable to effectively deploy our employees globally on a timely basis to fulfill the needs of our clients, our ability to perform our

Table of Contents

work profitably could suffer. If the utilization rate of our professionals is too high, it could have an adverse effect on employee engagement and attrition, the quality of the work performed as well as our ability to staff projects. If our utilization rate is too low, our profitability and the engagement of our employees could suffer. The costs associated with recruiting and training employees are significant. An important element of our global business model is the deployment of our employees around the world, which allows us to move talent as needed, particularly in emerging markets. Therefore, if we are not able to deploy the talent we need because of increased regulation of immigration or work visas, including limitations placed on the number of visas granted, limitations on the type of work performed or location in which the work can be performed, and new or higher minimum salary requirements, it could be more difficult to staff our employees on client engagements and could increase our costs.

Our equity-based incentive compensation plans are designed to reward high-performing personnel for their contributions and provide incentives for them to remain with us. If the anticipated value of such incentives does not materialize because of volatility or lack of positive performance in our stock price, or if our total compensation package is not viewed as being competitive, our ability to attract and retain the personnel we need could be adversely affected. In addition, if we do not obtain the shareholder approval needed to continue granting equity awards under our share plans in the amounts we believe are necessary, our ability to attract and retain personnel could be negatively affected.

There is a risk that at certain points in time and in certain geographical regions, we will find it difficult to hire and retain a sufficient number of employees with the skills or backgrounds to meet current and/or future demand. In these cases, we might need to redeploy existing personnel or increase our reliance on subcontractors to fill certain labor needs, and if not done effectively, our profitability could be negatively impacted. Additionally, if demand for our services were to escalate at a high rate, we may need to adjust our compensation practices, which could put upward pressure on our costs and adversely affect our profitability if we are unable to recover these increased costs. At certain times, however, we may also have more personnel than we need in certain skill sets or geographies. In these situations, we must evaluate voluntary attrition and use reduced levels of new hiring and increased involuntary terminations as means to keep our supply of skills and resources in balance with client demand in those geographies. The markets in which we compete are highly competitive, and we might not be able to compete effectively.

The markets in which we offer our services are highly competitive. Our competitors include:

- large multinational providers, including the services arms of large global technology providers (hardware, equipment and software), that offer some or all of the services that we do;
- off-shore service providers in lower-cost locations, particularly in India, the Philippines and China, that offer services similar to those we offer, often at highly competitive prices and on more aggressive contractual terms;
- accounting firms that have expanded or are in the process of expanding, including through acquisitions, their consulting services in areas that compete with us;
- niche solution or service providers or local competitors that compete with us in a specific geographic market, industry segment or service area, including companies that provide new or alternative products, services or delivery models; and
- in-house departments of large corporations that use their own resources, rather than engage an outside firm for the types of services we provide.

Some competitors are companies that may have greater financial, marketing or other resources than we do and, therefore, may be better able to compete for new work and skilled professionals.

Even if we have potential offerings that address marketplace or client needs, competitors may be more successful at selling similar services they offer, including to companies that are our clients. Some competitors are more established in certain emerging markets, and that may make executing our geographic expansion strategy in these markets more challenging. Additionally, competitors may also offer more aggressive contractual terms, which may affect our ability to win work. Our future performance is largely dependent on our ability to compete successfully in the markets we currently serve, while expanding into additional markets. If we are unable to compete successfully, we could lose market share and clients to competitors, which could materially adversely affect our results of operations.

In addition, we may face greater competition due to consolidation of companies in the technology sector, through strategic mergers or acquisitions. Consolidation activity may result in new competitors with greater scale, a broader

footprint or offerings that are more attractive than ours. For example, there has been a trend toward consolidation among hardware manufacturers, software developers and vendors, and service providers, which has resulted in the convergence of products and services. Over time, our access to such products and services may be reduced as a result of this consolidation. Additionally, vertically integrated companies are able to offer as a single provider more integrated services (software and hardware) to clients than we can in some cases and therefore may represent a more attractive alternative to clients. If buyers of services favor using a single provider for an integrated technology stack, such buyers may direct more business to such competitors, and this could materially adversely affect our competitive position and our results of operations.

Table of Contents

We could have liability or our reputation could be damaged if we fail to protect client and/or Accenture data or information systems as obligated by law or contract or if our information systems are breached.

We are dependent on information technology networks and systems to securely process, transmit and store electronic information and to communicate among our locations around the world and with our clients, alliance partners, and vendors. As the breadth and complexity of this infrastructure continue to grow, the potential risk of security breaches and cyberattacks increases. Such breaches could lead to shutdowns or disruptions of our systems and potential unauthorized disclosure of sensitive or confidential information.

In providing services to clients, we often manage, utilize and store sensitive or confidential client or Accenture data, including personal data. As a result, we are subject to numerous laws and regulations designed to protect this information, such as the national laws implementing the European Union Directive on Data Protection and various U.S. federal and state laws governing the protection of health or other personally identifiable information. These laws and regulations are increasing in complexity and number, change frequently and sometimes conflict among the various countries in which we operate. If any person, including any of our employees, negligently disregards or intentionally breaches our established controls with respect to client or Accenture data, or otherwise mismanages or misappropriates that data, we could be subject to significant monetary damages, regulatory enforcement actions, fines and/or criminal prosecution in one or more jurisdictions. These monetary damages might not be subject to a contractual limit of liability or an exclusion of consequential or indirect damages and could be significant.

Unauthorized disclosure of sensitive or confidential client or Accenture data, whether through systems failure, employee negligence, fraud or misappropriation, could damage our reputation and cause us to lose clients. Similarly, unauthorized access to or through our information systems or those we develop for our clients, whether by our employees or third parties, including a cyberattack by computer programmers and hackers who may develop and deploy viruses, worms or other malicious software programs, could result in negative publicity, significant remediation costs, legal liability, damage to our reputation and government sanctions and could have a material adverse effect on our results of operations. In addition, our liability insurance might not be sufficient in type or amount to cover us against claims related to security breaches, cyberattacks and other related breaches.

Our results of operations and ability to grow could be materially negatively affected if we cannot adapt and expand our services and solutions in response to ongoing changes in technology and offerings by new entrants.

Our success depends on our ability to continue to develop and implement services and solutions that anticipate and respond to rapid and continuing changes in technology and industry developments and offerings by new entrants to serve the evolving needs of our clients. Current areas of significant change include mobility, cloud-based computing and the processing and analyzing of large amounts of data. Technological developments such as these may materially affect the cost and use of technology by our clients. These technologies, and others that may emerge, could reduce, and over time, replace some of our legacy business. In addition, we have seen some clients delaying spending under existing contracts and engagements and entering into new contracts more slowly while they evaluate the new technologies. Our growth strategy focuses on responding to these types of developments by driving innovation that will enable us to expand our business into new growth areas. If we do not sufficiently invest in new technology and industry developments, or evolve and expand our business at sufficient speed and scale, or if we do not make the right strategic investments to respond to these developments and successfully drive innovation, our services and solutions, our results of operations, and our ability to develop and maintain a competitive advantage and continue to grow could be negatively affected.

In addition, we operate in a quickly evolving environment, in which there currently are, and we expect will continue to be, new technology entrants. New services or technologies offered by competitors or new entrants may make our offerings less differentiated or less competitive, when compared to other alternatives, which may adversely affect our results of operations.

As a result of our geographically diverse operations and our growth strategy to continue geographic expansion, we are more susceptible to certain risks.

We have offices and operations in more than 200 cities in 56 countries around the world. One aspect of our growth strategy is to continue to expand globally, and particularly to seek significant growth in our priority emerging markets. Our growth strategy might not be successful. If we are unable to manage the risks of our global operations and

geographic expansion strategy, including international hostilities, natural disasters, security breaches, failure to maintain compliance with our clients' control requirements and multiple legal and regulatory systems, our results of operations and ability to grow could be materially adversely affected. In addition, emerging markets generally involve greater financial and operational risks, such as those described below, than our more mature markets. Negative or uncertain political climates in countries or geographies where we operate could also adversely affect us.

We could be subject to strict restrictions on the movement of cash and the exchange of foreign currencies. In some countries, we could be subject to strict restrictions on the movement of cash and the exchange of foreign currencies, which would limit our ability to use this cash across our global operations. This risk could increase as we continue our geographic expansion in emerging markets, which are more likely to impose these restrictions than more established markets.

Table of Contents

International hostilities, terrorist activities, natural disasters, pandemics and infrastructure disruptions could prevent us from effectively serving our clients and thus adversely affect our results of operations. Acts of terrorist violence; political unrest; armed regional and international hostilities and international responses to these hostilities; natural disasters, volcanic eruptions, floods and other severe weather conditions; global health emergencies or pandemics or the threat of or perceived potential for these events; and other acts of god could have a negative impact on us. These events could adversely affect our clients' levels of business activity and precipitate sudden and significant changes in regional and global economic conditions and cycles. These events also pose significant risks to our people and to physical facilities and operations around the world, whether the facilities are ours or those of our alliance partners or clients. By disrupting communications and travel and increasing the difficulty of obtaining and retaining highly skilled and qualified personnel, these events could make it difficult or impossible for us to deliver services to our clients. Extended disruptions of electricity, other public utilities or network services at our facilities, as well as system failures at, or security breaches in, our facilities or systems, could also adversely affect our ability to serve our clients. We might be unable to protect our people, facilities and systems against all such occurrences. We generally do not have insurance for losses and interruptions caused by terrorist attacks, conflicts and wars. If these disruptions prevent us from effectively serving our clients, our results of operations could be adversely affected.

Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violation of these regulations could harm our business. We are subject to numerous, and sometimes conflicting, legal regimes on matters as diverse as anticorruption, import/export controls, content requirements, trade restrictions, tariffs, taxation, sanctions, immigration, internal and disclosure control obligations, securities regulation, anti-competition, data privacy and protection, wage-and-hour standards, and employment and labor relations. The global nature of our operations, including emerging markets where legal systems may be less developed or understood by us, and the diverse nature of our operations across a number of regulated industries, further increase the difficulty of compliance. Compliance with diverse legal requirements is costly, time-consuming and requires significant resources. Violations of one or more of these regulations in the conduct of our business could result in significant fines, criminal sanctions against us or our officers, prohibitions on doing business and damage to our reputation. Violations of these regulations in connection with the performance of our obligations to our clients also could result in liability for significant monetary damages, fines and/or criminal prosecution, unfavorable publicity and other reputational damage, restrictions on our ability to process information and allegations by our clients that we have not performed our contractual obligations. Due to the varying degrees of development of the legal systems of the countries in which we operate, local laws may not be well developed or provide sufficiently clear guidance and may be insufficient to protect our rights.

In particular, in many parts of the world, including countries in which we operate and/or seek to expand, practices in the local business community might not conform to international business standards and could violate anticorruption laws, or regulations, including the U.S. Foreign Corrupt Practices Act and the UK Bribery Act 2010. Our employees, subcontractors, agents, alliance or joint venture partners, the companies we acquire and their employees, subcontractors and agents, and other third parties with which we associate, could take actions that violate policies or procedures designed to promote legal and regulatory compliance or applicable anticorruption laws or regulations. Violations of these laws or regulations by us, our employees or any of these third parties could subject us to criminal or civil enforcement actions (whether or not we participated or knew about the actions leading to the violations), including fines or penalties, disgorgement of profits and suspension or disqualification from work, including U.S. federal contracting, any of which could materially adversely affect our business, including our results of operations and our reputation.

Changes in laws and regulations could also mandate significant and costly changes to the way we implement our services and solutions or could impose additional taxes on our services and solutions. For example, changes in laws and regulations to limit using off-shore resources in connection with our work or to penalize companies that use off-shore resources, which have been proposed from time to time in various jurisdictions, could adversely affect our results of operations. Such changes may result in contracts being terminated or work being transferred on-shore, resulting in greater costs to us. In addition, these changes could have a negative impact on our ability to obtain future work from government clients.

Our Global Delivery Network is increasingly concentrated in India and the Philippines, which may expose us to operational risks.

Our business model is dependent on our Global Delivery Network, which includes Accenture personnel based at more than 50 delivery centers around the world. While these delivery centers are located throughout the world, we have based large portions of our delivery network in India, where we have the largest number of people in our delivery network located, and the Philippines, where we have the second largest number of people located. Concentrating our Global Delivery Network in these locations presents a number of operational risks, many of which are beyond our control. For example, natural disasters of the type described above, some of which India and the Philippines have experienced and other countries may experience, could impair the ability of our people to safely travel to and work in our facilities and disrupt our ability to perform work through our delivery centers. Additionally, both India and the Philippines have experienced, and other countries may experience, political instability and worker strikes. India in particular has experienced civil unrest and hostilities with neighboring countries, including Pakistan. Military activity or civil hostilities in the future, as well as terrorist activities and other conditions, which are described more fully above, could significantly

Table of Contents

disrupt our ability to perform work through our delivery centers. Our business continuity and disaster recovery plans may not be effective, particularly if catastrophic events occur. If any of these circumstances occurs, we have a greater risk that the interruptions in communications with our clients and other Accenture locations and personnel, and any down-time in important processes we operate for clients, could result in a material adverse effect on our results of operations and our reputation in the marketplace.

Our results of operations could materially suffer if we are not able to obtain sufficient pricing to enable us to meet our profitability expectations.

If we are not able to obtain sufficient pricing for our services, our revenues and profitability could materially suffer.

The rates we are able to charge for our services are affected by a number of factors, including:

• general economic and political conditions;

• the competitive environment in our industry, as described below;

• our clients' desire to reduce their costs;

• our ability to accurately estimate, attain and sustain contract revenues, margins and cash flows over the full contract period, which includes our ability to estimate the impact of inflation and foreign exchange on our margins over long-term contracts; and

• procurement practices of clients and their use of third-party advisors.

In addition, our profitability with respect to our services and solutions for new technologies may be different when compared to the profitability of our current business, due to factors such as the mix of work and the number of service providers, among others.

The competitive environment in our industry affects our ability to obtain favorable pricing in a number of ways, any of which could have a material negative impact on our results of operations. The less we are able to differentiate our services and solutions and/or clearly convey the value of our services and solutions, the more risk we have that they will be seen as commodities, with price being the driving factor in selecting a service provider. In addition, the introduction of new services or products by competitors could reduce our ability to obtain favorable pricing for the services or products we offer. Competitors may be willing, at times, to price contracts lower than us in an effort to enter the market or increase market share. Further, if competitors develop and implement methodologies that yield greater efficiency and productivity, they may be better positioned to offer services similar to ours at lower prices. If our pricing estimates do not accurately anticipate the cost, risk and complexity of performing our work or third parties upon whom we rely do not meet their commitments, then our contracts could have delivery inefficiencies and be unprofitable.

Our pricing for our services and solutions is highly dependent on our forecasts and predictions about the level of effort and cost necessary to deliver such services and solutions, which is based on available data and could turn out to be materially inaccurate. If we do not accurately estimate the effort, costs or timing for meeting our contractual commitments and/or completing projects to a client's satisfaction, our contracts could yield lower profit margins than planned, or be unprofitable. Our pricing, cost and profit margin estimates on our consulting and outsourcing work include anticipated long-term cost savings for the client that we expect to achieve and sustain over the life of the contract. We may fail to accurately assess the risks associated with potential contracts. This could result in existing contracts and contracts entered into in the future being less profitable than expected or unprofitable, which could have an adverse effect on our profitability. In addition, contracts used to deliver services and solutions for new technologies might necessitate the use of alternative pricing models, which could negatively impact our profitability. For example, in projects involving our SaaS solutions, revenue is typically generated on a usage basis, which may be more difficult to predict accurately due to our more limited historical data using this new commercial model.

Similarly, if we experience unanticipated delivery difficulties due to our management, the failure of third parties to meet their commitments, or for any other reason, our contracts could yield lower profit margins than planned or be unprofitable. In particular, large and complex arrangements often require that we utilize subcontractors or that our services and solutions incorporate or coordinate with the software, systems or infrastructure requirements of other vendors and service providers, including companies with which we have alliances. Our profitability depends on the ability of these subcontractors, vendors and service providers to deliver their products and services in a timely manner and in accordance with the project requirements, as well as on our effective oversight of their performance. Some of

this work involves new technologies, which may not work as intended or may take more effort to implement than initially predicted. In some cases, these subcontractors are small firms, and they might not have the resources or experience to successfully integrate their services or products with large-scale projects or enterprises. In addition, certain client work requires the use of unique and complex structures and alliances, some of which require us to assume responsibility for the performance of third parties whom we do not control. Any of these factors could adversely affect our ability to perform and subject us to additional liabilities, which could have a material adverse effect on relationships with our clients and on our results of operations.

Table of Contents

Our work with government clients exposes us to additional risks inherent in the government contracting environment. Our clients include national, provincial, state and local governmental entities. Our government work carries various risks inherent in the government contracting process. These risks include, but are not limited to, the following:

Government entities, particularly in the United States, often reserve the right to audit our contract costs and conduct inquiries and investigations of our business practices with respect to government contracts. U.S. government agencies, including the Defense Contract Audit Agency, routinely audit our contract costs, including allocated indirect costs and compliance with the Cost Accounting Standards. These agencies also conduct reviews and investigations and make inquiries regarding our accounting and other systems in connection with our performance and business practices with respect to our government contracts. Negative findings from existing and future audits, investigations or inquiries could affect our future sales and profitability by preventing us, by operation of law or in practice, from receiving new government contracts for some period of time. In addition, if the U.S. government concludes that certain costs are not reimbursable, have not been properly determined or are based on outdated estimates of our work, then we will not be allowed to bill for such costs, may have to refund money that has already been paid to us, or could be required to retroactively and prospectively adjust previously agreed to billing or pricing rates for our work. Negative findings from existing and future audits of our business systems, including our accounting system, may result in the U.S. government preventing us from billing, at least temporarily, a percentage of our costs. As a result of prior negative findings in connection with audits, investigations and inquiries, we have from time to time experienced some of the adverse consequences described above, and may in the future experience adverse consequences, which could materially adversely affect our future results of operations.

If a government client discovers improper or illegal activities in the course of audits or investigations, we may become subject to various civil and criminal penalties, including those under the civil U.S. False Claims Act, and administrative sanctions, which may include termination of contracts, forfeiture of profits, suspension of payments, fines and suspensions or debarment from doing business with other agencies of that government. The inherent limitations of internal controls may not prevent or detect all improper or illegal activities.

U.S. government contracting regulations impose strict compliance and disclosure obligations. Disclosure is required if certain company personnel have knowledge of “credible evidence” of a violation of federal criminal laws involving fraud, conflict of interest, bribery or improper gratuity, a violation of the civil U.S. False Claims Act or receipt of a significant overpayment from the government. Failure to make required disclosures could be a basis for suspension and/or debarment from federal government contracting in addition to breach of the specific contract and could also impact contracting beyond the U.S. federal level. Reported matters also could lead to audits or investigations and other civil, criminal or administrative sanctions.

- Government contracts are subject to heightened reputational and contractual risks compared to contracts with commercial clients. For example, government contracts and the proceedings surrounding them are often subject to more extensive scrutiny and publicity. Negative publicity, including an allegation of improper or illegal activity, regardless of its accuracy, may adversely affect our reputation.

Terms and conditions of government contracts also tend to be more onerous and are often more difficult to negotiate. For example, these contracts often contain high or unlimited liability for breaches and feature less favorable payment terms and sometimes require us to take on liability for the performance of third parties.

Government entities typically fund projects through appropriated monies. While these projects are often planned and executed as multi-year projects, government entities usually reserve the right to change the scope of or terminate these projects for lack of approved funding and/or at their convenience. Changes in government or political developments, including budget deficits, shortfalls or uncertainties, government spending reductions (e.g., Congressional sequestration of funds under the Budget Control Act of 2011) or other debt constraints, such as those recently experienced in the United States and Europe, could result in our projects being reduced in price or scope or terminated altogether, which also could limit our recovery of incurred costs, reimbursable expenses and profits on work completed prior to the termination. Furthermore, if insufficient funding is appropriated to the government entity to cover termination costs, we may not be able to fully recover our investments.

Political and economic factors such as pending elections, the outcome of recent elections, changes in leadership among key executive or legislative decision makers, revisions to governmental tax or other policies and reduced tax

revenues can affect the number and terms of new government contracts signed or the speed at which new contracts are signed, decrease future levels of spending and authorizations for programs that we bid, shift spending priorities to programs in areas for which we do not provide services and/or lead to changes in enforcement or how compliance with relevant rules or laws is assessed.

Legislative proposals remain under consideration or could be proposed in the future, which, if enacted, could limit or even prohibit our eligibility to be awarded state or federal government contracts in the United States in the future.

Various

Table of Contents

U.S. federal and state legislative proposals have been introduced and/or enacted in recent years that deny government contracts to certain U.S. companies that reincorporate or have reincorporated outside the United States. While Accenture was not a U.S. company that reincorporated outside the United States, it is possible that these contract bans and other legislative proposals could be applied in a way to negatively affect Accenture.

The occurrences or conditions described above could affect not only our business with the particular government entities involved, but also our business with other entities of the same or other governmental bodies or with certain commercial clients, and could have a material adverse effect on our business or our results of operations.

Our business could be materially adversely affected if we incur legal liability.

We are subject to, and may become a party to, a variety of litigation or other claims and suits that arise from time to time in the ordinary course of our business. Our business is subject to the risk of litigation involving employees, clients, alliance partners, subcontractors, suppliers, competitors, shareholders, government agencies or others through private actions, class actions, whistleblower claims, administrative proceedings, regulatory actions or other litigation. Regardless of the merits of the claims, the cost to defend current and future litigation may be significant, and such matters can be time-consuming and divert management's attention and resources. The results of litigation and other legal proceedings are inherently uncertain, and adverse judgments or settlements in some or all of these legal disputes may result in materially adverse monetary damages, penalties or injunctive relief against us. Any claims or litigation, even if fully indemnified or insured, could damage our reputation and make it more difficult to compete effectively or to obtain adequate insurance in the future.

For example, we could be subject to significant legal liability and litigation expense if we fail to meet our contractual obligations, or otherwise breach obligations, to third parties, including clients, alliance partners, employees and former employees, and other parties with whom we conduct business, or if our subcontractors breach or dispute the terms of our agreements with them and impede our ability to meet our obligations to our clients. We may enter into agreements with non-standard terms because we perceive an important economic opportunity or because our personnel did not adequately follow our contracting guidelines. In addition, the contracting practices of competitors, along with the demands of increasingly sophisticated clients, may cause contract terms and conditions that are unfavorable to us to become new standards in the marketplace. We may find ourselves committed to providing services or solutions that we are unable to deliver or whose delivery will reduce our profitability or cause us financial loss. If we cannot or do not meet our contractual obligations and if our potential liability is not adequately limited through the terms of our agreements, liability limitations are not enforced or a third party alleges fraud or other wrongdoing to prevent us from relying upon those contractual protections, we might face significant legal liability and litigation expense and our results of operations could be materially adversely affected. A failure of a client's system based on our services or solutions could also subject us to a claim for significant damages that could materially adversely affect our results of operations.

While we maintain insurance for certain potential liabilities, such insurance does not cover all types and amounts of potential liabilities and is subject to various exclusions as well as caps on amounts recoverable. Even if we believe a claim is covered by insurance, insurers may dispute our entitlement to recovery for a variety of potential reasons, which may affect the timing and, if they prevail, the amount of our recovery.

Our results of operations could be materially adversely affected by fluctuations in foreign currency exchange rates. Although we report our results of operations in U.S. dollars, a majority of our net revenues is denominated in currencies other than the U.S. dollar. Unfavorable fluctuations in foreign currency exchange rates could have a material adverse effect on our results of operations.

Because our consolidated financial statements are presented in U.S. dollars, we must translate revenues, expenses and income, as well as assets and liabilities, into U.S. dollars at exchange rates in effect during or at the end of each reporting period. Therefore, changes in the value of the U.S. dollar against other currencies will affect our net revenues, operating income and the value of balance-sheet items, including intercompany payables and receivables, originally denominated in other currencies. These changes cause our growth in consolidated earnings stated in U.S. dollars to be higher or lower than our growth in local currency when compared against other periods. Our currency hedging program, which is designed to partially offset the impact on consolidated earnings related to the changes in value of certain balance sheet items, might not be successful.

As we continue to leverage our global delivery model, more of our expenses are incurred in currencies other than those in which we bill for the related services. An increase in the value of certain currencies, such as the Indian rupee, against the U.S. dollar could increase costs for delivery of services at off-shore sites by increasing labor and other costs that are denominated in local currency. Our contractual provisions or cost management efforts might not be able to offset their impact, and our currency hedging activities, which are designed to partially offset this impact, might not be successful. This could result in a decrease in the profitability of our contracts that are utilizing delivery center resources. Conversely, a decrease in the value of certain currencies against the U.S. dollar, such as the Indian rupee, could place us at a competitive disadvantage compared to service providers that benefit to a greater degree from such a decrease and can, as a result, deliver services at a lower cost. In addition, our currency hedging activities are themselves subject to risk. These include risks related to counterparty performance under hedging contracts and risks

Table of Contents

related to currency fluctuations. We also face risks that extreme economic conditions, political instability, or hostilities or disasters of the type described above could impact or perhaps eliminate the underlying exposures that we are hedging. Such an event could lead to losses being recognized on the currency hedges then in place that are not offset by anticipated changes in the underlying hedge exposure.

Our alliance relationships may not be successful or may change, which could adversely affect our results of operations.

We have alliances with companies whose capabilities complement our own. A very significant portion of our services and solutions are based on technology or software provided by a few major providers that are our alliance partners. See “Business—Alliances.” The priorities and objectives of our alliance partners may differ from ours. As most of our alliance relationships are non-exclusive, our alliance partners are not prohibited from competing with us or forming closer or preferred arrangements with our competitors. One or more of our key alliance partners may be acquired by a competitor, or key alliances partners might merge with each other, either of which could reduce our access over time to the technology or software provided by those partners. If we do not obtain the expected benefits from our alliance relationships for any reason, we may be less competitive, our ability to offer attractive solutions to our clients may be negatively affected, and our results of operations could be adversely affected.

Outsourcing services and the continued expansion of our other services and solutions into new areas subject us to different operational risks than our consulting and systems integration services.

Outsourcing services, which represented approximately 46% of our net revenues in fiscal 2013, present different operational risks, when compared to our consulting and systems integration services. Our outsourcing services involve taking over the operation of certain portions of our clients’ businesses, which may include the operation of functions that are critical to the core businesses of our clients. Disruptions in service or other performance problems could damage our clients’ businesses, expose us to claims, and harm our reputation and our business.

We have continued to expand our services and solutions into new business areas and provide services to new types of clients, and we expect to continue to do so in the future. Expanding into new areas, and providing services to new types of clients may expose us to additional operational, regulatory or other risks specific to these new areas. We could also incur liability for failure to comply with laws or regulations applicable to the services we provide clients.

We may also face exposure in our outsourcing business if we contribute to internal controls issues of a client. If a process we manage for a client were to result in internal controls failures at the client or impair our client’s ability to comply with its own internal control requirements, there is a risk that we could face legal liability. Many of our clients request that we obtain a Service Organization Control (SOC 1 type 2) audit prepared under Statement on Standards for Attestation Engagements No. 16 and International Standard on Assurance Engagements 3402, formerly referred to as SAS 70. If we receive a qualified opinion, or do not deliver the audit reports timely, our ability to acquire new clients and retain existing clients may be adversely affected and our reputation could be harmed.

Our services or solutions could infringe upon the intellectual property rights of others or we might lose our ability to utilize the intellectual property of others.

We cannot be sure that our services and solutions, including, for example, our software solutions, or the solutions of others that we offer to our clients, do not infringe on the intellectual property rights of third parties, and these third parties could claim that we or our clients are infringing upon their intellectual property rights. These claims could harm our reputation, cause us to incur substantial costs or prevent us from offering some services or solutions in the future. Any related proceedings could require us to expend significant time and effort over an extended period of time. In most of our contracts, we agree to indemnify our clients for expenses and liabilities resulting from claimed infringements of the intellectual property rights of third parties. In some instances, the amount of these indemnities could be greater than the revenues we receive from the client. Any claims or litigation in this area could be time-consuming and costly, damage our reputation and/or require us to incur additional costs to obtain the right to continue to offer a service or solution to our clients. If we cannot secure this right at all or on reasonable terms, or we cannot substitute alternative technology, our results of operations could be materially adversely affected. The risk of infringement claims against us may increase as we expand our industry software solutions and continue to develop and license our software to multiple clients. Additionally, in recent years, individuals and firms have purchased intellectual property assets in order to assert claims of infringement against technology providers and customers that

use such technology. Any such action naming us or our clients could be costly to defend or lead to an expensive settlement or judgment against us. Moreover, such an action could result in an injunction being ordered against our client or our own services or operations, causing further damages.

In addition, we rely on third-party software in providing some of our services and solutions. If we lose our ability to continue using such software for any reason, including because it is found to infringe the rights of others, we will need to obtain substitute software or seek alternative means of obtaining the technology necessary to continue to provide such services and solutions. Our inability to replace such software, or to replace such software in a timely or cost-effective manner, could materially adversely affect our results of operations.

Table of Contents

If we are unable to protect our intellectual property rights from unauthorized use or infringement by third parties, our business could be adversely affected.

Our success depends, in part, upon our ability to protect our proprietary methodologies and other intellectual property. Existing laws of the various countries in which we provide services or solutions offer only limited protection of our intellectual property rights, and the protection in some countries may be very limited. We rely upon a combination of confidentiality policies, nondisclosure and other contractual arrangements, and patent, trade secret, copyright and trademark laws to protect our intellectual property rights. These laws are subject to change at any time and could further limit our ability to protect our intellectual property. There is uncertainty concerning the scope of available intellectual property protection for software and business methods, which are fields in which we rely on intellectual property laws to protect our rights. Our intellectual property rights may not prevent competitors from reverse engineering our proprietary information or independently developing products and services similar to or duplicative of ours. Further, the steps we take in this regard might not be adequate to prevent or deter infringement or other misappropriation of our intellectual property by competitors, former employees or other third parties, and we might not be able to detect unauthorized use of, or take appropriate and timely steps to enforce, our intellectual property rights. Enforcing our rights might also require considerable time, money and oversight, and we may not be successful in enforcing our rights.

Depending on the circumstances, we might need to grant a specific client greater rights in intellectual property developed in connection with a contract than we otherwise generally do. In certain situations, we might forego all rights to the use of intellectual property we create, which would limit our ability to reuse that intellectual property for other clients. Any limitation on our ability to provide a service or solution could cause us to lose revenue-generating opportunities and require us to incur additional expenses to develop new or modified solutions for future projects.

Our ability to attract and retain business and employees may depend on our reputation in the marketplace.

We believe the Accenture brand name and our reputation are important corporate assets that help distinguish our services from those of competitors and also contribute to our efforts to recruit and retain talented employees.

However, our corporate reputation is potentially susceptible to material damage by events such as disputes with clients, information technology security breaches or service outages, internal control deficiencies, delivery failures or compliance violations. Similarly, our reputation could be damaged by actions or statements of current or former clients, directors, employees, competitors, vendors, alliance partners, our joint ventures or joint venture partners, adversaries in legal proceedings, legislators or government regulators, as well as members of the investment community or the media. There is a risk that negative information about Accenture, even if based on rumor or misunderstanding, could adversely affect our business. Damage to our reputation could be difficult, expensive and time-consuming to repair, could make potential or existing clients reluctant to select us for new engagements, resulting in a loss of business, and could adversely affect our recruitment and retention efforts. Damage to our reputation could also reduce the value and effectiveness of the Accenture brand name and could reduce investor confidence in us, materially adversely affecting our share price.

We might not be successful at identifying, acquiring or integrating businesses or entering into joint ventures.

We expect to continue pursuing strategic and targeted acquisitions and joint ventures intended to enhance or add to our offerings of services and solutions, or to enable us to expand in certain geographic and other markets. Depending on the opportunities available, we may increase the amount of investment in such acquisitions or joint ventures. We may not successfully identify suitable acquisition candidates or joint venture opportunities. We also might not succeed in completing targeted transactions or achieve desired results of operations. Furthermore, we face risks in successfully integrating any businesses we might acquire or create through a joint venture. Ongoing business may be disrupted and our management's attention may be diverted by acquisition, transition or integration activities. In addition, we might need to dedicate additional management and other resources, and our organizational structure could make it difficult for us to efficiently integrate acquired businesses into our ongoing operations and assimilate and retain employees of those businesses into our culture and operations. Business combination and investment transactions may result in significant costs and expenses and charges to earnings, including those related to severance pay, early retirement costs, employee benefit costs, goodwill and asset impairment charges, assumed litigation and other liabilities, and legal, accounting and financial advisory fees. We may have difficulties as a result of entering into new markets where

we have limited or no direct prior experience or where competitors may have stronger market positions. We might fail to realize the expected benefits or strategic objectives of any acquisition or joint venture we undertake. We might not achieve our expected return on investment or may lose money. We may be adversely impacted by liabilities that we assume from a company we acquire or in which we invest, including from that company's known and unknown obligations, intellectual property or other assets, terminated employees, current or former clients, or other third parties, and may fail to identify or adequately assess the magnitude of certain liabilities, shortcomings or other circumstances prior to acquiring, investing in or partnering with a company, including potential exposure to regulatory sanctions or liabilities resulting from an acquisition target's previous activities, any of which could result in unexpected legal or regulatory exposure, unfavorable accounting treatment, unexpected increases in taxes or other adverse effects on our business. By their nature, joint ventures involve a lesser degree of control over the business operations of the joint venture itself, particularly when we have a minority position. This lesser degree

Table of Contents

of control may expose us to additional reputational, financial, legal, compliance or operational risks. Litigation, indemnification claims and other unforeseen claims and liabilities may arise from the acquisition or operation of acquired businesses. For example, we may face litigation or other claims as a result of certain terms and conditions of the acquisition agreement, such as earnout payments or closing net asset adjustments. Alternatively, shareholder litigation may arise as a result of proposed acquisitions. If we are unable to complete the number and kind of acquisition and joint ventures for which we plan, or if we are inefficient or unsuccessful at integrating any acquired businesses into our operations, we may not be able to achieve our planned rates of growth or improve our market share, profitability or competitive position in specific markets or services.

Our profitability could suffer if our cost-management strategies are unsuccessful, and we may not be able to improve our profitability through improvements to cost-management to the degree we have done in the past.

Our ability to improve or maintain our profitability is dependent on our being able to successfully manage our costs. Our cost management strategies include maintaining appropriate alignment between the demand for our services and our resource capacity, optimizing the costs of service delivery and maintaining or improving our sales and marketing and general and administrative costs as a percentage of revenues. We have also taken actions to reduce certain costs, and these initiatives include, without limitation, re-alignment of portions of our non-client-facing workforce to lower-cost locations. These actions and our other cost-management efforts may not be successful, our efficiency may not be enhanced and we may not achieve desired levels of profitability. Over time, we have seen an improvement in general and administrative costs. Because of the significant steps taken in the past to reduce costs, we may not be able to continue to deliver efficiencies in our cost management, to the same degree as in the past. If we are not effective in reducing our operating costs in response to changes in demand or pricing, or if we are unable to absorb or pass on increases in the compensation of our employees by continuing to move more work to lower-cost locations or otherwise, our margins and results of operations could be materially adversely affected.

Many of our contracts include payments that link some of our fees to the attainment of performance or business targets and/or require us to meet specific service levels. This could increase the variability of our revenues and impact our margins.

Many of our contracts include clauses that tie our compensation to the achievement of agreed-upon performance standards or milestones. If we fail to satisfy these measures, it could significantly reduce or eliminate our fees under the contracts, increase the cost to us of meeting performance standards or milestones, delay expected payments or subject us to potential damage claims under the contract terms. Clients also often have the right to terminate a contract and pursue damage claims under the contract for serious or repeated failure to meet these service commitments. We also have a number of contracts, in both outsourcing and consulting, in which a portion of our compensation depends on performance measures such as cost-savings, revenue enhancement, benefits produced, business goals attained and adherence to schedule. These goals can be complex and may depend on our clients' actual levels of business activity or may be based on assumptions that are later determined not to be achievable or accurate. These provisions could increase the variability in revenues and margins earned on those contracts.

Changes in our level of taxes, and audits, investigations and tax proceedings, or changes in our treatment as an Irish company, could have a material adverse effect on our results of operations and financial condition.

We are subject to income taxes in numerous jurisdictions. We calculate and provide for income taxes in each tax jurisdiction in which we operate. Tax accounting often involves complex matters and requires our judgment to determine our worldwide provision for income taxes and other tax liabilities. We are subject to ongoing tax audits in various jurisdictions. Tax authorities have disagreed, and may in the future disagree, with our judgments, or may take increasingly aggressive positions opposing the judgments we make. We regularly assess the likely outcomes of our audits to determine the appropriateness of our tax liabilities. However, our judgments might not be sustained as a result of these audits, and the amounts ultimately paid could be different from the amounts previously recorded. In addition, our effective tax rate in the future could be adversely affected by changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of deferred tax assets and liabilities and changes in tax laws. Tax rates in the jurisdictions in which we operate may change as a result of macroeconomic or other factors outside of our control. Increases in the tax rate in any of the jurisdictions in which we operate could have a negative impact on our profitability. In addition, changes in tax laws, treaties or regulations, or their interpretation or enforcement, may be

unpredictable, particularly in less developed markets, and could become more stringent, which could materially adversely affect our tax position. Any of these occurrences could have a material adverse effect on our results of operations and financial condition.

Although we expect to be able to rely on the tax treaty between the United States and Ireland, legislative or diplomatic action could be taken that would prevent us from being able to rely on such treaty. Our inability to rely on such treaty would subject us to increased taxation or significant additional expense. Congressional proposals could change the definition of a U.S. person for U.S. federal income tax purposes, which could subject us to increased taxation. In addition, we could be materially adversely affected by future changes in tax law or policy in Ireland or other jurisdictions where we operate, including their treaties with Ireland or the United States. These changes could be exacerbated by economic, budget or other challenges facing Ireland or these other jurisdictions.

Table of Contents

If we are unable to manage the organizational challenges associated with our size, we might be unable to achieve our business objectives.

As of August 31, 2013, we had approximately 275,000 employees worldwide. Our size and scale present significant management and organizational challenges. It might become increasingly difficult to maintain effective standards across a large enterprise and effectively institutionalize our knowledge. It might also become more difficult to maintain our culture, effectively manage and monitor our personnel and operations and effectively communicate our core values, policies and procedures, strategies and goals, particularly given our world-wide operations. The size and scope of our operations increase the possibility that we will have employees who engage in unlawful or fraudulent activity, or otherwise expose us to unacceptable business risks, despite our efforts to train them and maintain internal controls to prevent such instances. For example, employee misconduct could involve the improper use of our clients' sensitive or confidential information or the failure to comply with legislation or regulations regarding the protection of sensitive or confidential information. Furthermore, the inappropriate use of social networking sites by our employees could result in breaches of confidentiality, unauthorized disclosure of non-public company information or damage to our reputation. If we do not continue to develop and implement the right processes and tools to manage our enterprise and instill our culture and core values into all of our employees, our ability to compete successfully and achieve our business objectives could be impaired. In addition, from time to time, we make changes to our operating model, including how we are organized, as the needs and size of our business change, and if we do not successfully implement the changes, our business and results of operation may be negatively impacted.

If we are unable to collect our receivables or unbilled services, our results of operations, financial condition and cash flows could be adversely affected.

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. In limited circumstances, we also extend financing to our clients. We have established allowances for losses of receivables and unbilled services. Actual losses on client balances could differ from those that we currently anticipate, and, as a result, we might need to adjust our allowances. We might not accurately assess the creditworthiness of our clients. Macroeconomic conditions could also result in financial difficulties for our clients, including bankruptcy and insolvency. This could cause clients to delay payments to us, request modifications to their payment arrangements that could increase our receivables balance, or default on their payment obligations to us. In addition, in certain geographies and industries, some clients have requested extended payment terms more frequently, and if this trend continues, our cash flows could be adversely affected. Recovery of client financing and timely collection of client balances also depend on our ability to complete our contractual commitments and bill and collect our contracted revenues. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected. In addition, if we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected.

Our share price and results of operations could fluctuate and be difficult to predict.

Our share price has fluctuated in the past and could continue to fluctuate in the future in response to various factors.

These factors include:

- changes in macroeconomic or political factors unrelated to our business;
- general or industry-specific market conditions or changes in financial markets;
- announcements by us or competitors about developments in our business or prospects;
- projections or speculation about our business or that of competitors by the media or investment analysts;
- our ability to generate enough free cash flow to return cash to our shareholders at historical levels or levels expected by our shareholders; and
- our failure to meet our growth and financial objectives, including with respect to our overall revenue growth and revenue growth for our priority emerging markets and earnings per share growth.

Our results of operations have varied in the past and are likely to vary significantly from quarter to quarter in the future, making them difficult to predict. Some of the factors that could cause our results of operations to vary include:

•

the business decisions of our clients to begin to curtail or reduce the use of our services, including in response to changes in macroeconomic or political conditions unrelated to our business, general market conditions and new technologies;

• periodic differences between our clients' estimated and actual levels of business activity associated with ongoing work, as well as the stage of completion of existing projects and/or their termination or restructuring;

• contract delivery inefficiencies, such as those due to poor delivery or changes in forecasts;

• our ability to transition employees quickly from completed to new projects and maintain an appropriate headcount in each of our workforces;

Table of Contents

- acquisition, integration and operational costs related to businesses acquired;
- the introduction of new products or services by us, competitors or alliance partners;
- changes in our pricing or competitors' pricing;
- our ability to manage costs, including those for our own or subcontracted personnel, travel, support services and severance;
- our ability to limit and manage the incurrence of pre-contract costs, which must be expensed without corresponding revenues, which are then recognized in later periods without the corresponding costs;
- changes in, or the application of changes in, accounting principles or pronouncements under U.S. generally accepted accounting principles, particularly those related to revenue recognition;
- currency exchange rate fluctuations;
- changes in estimates, accruals or payments of variable compensation to our employees;
- global, regional and local economic and political conditions and related risks, including acts of terrorism; and
- seasonality, including number of workdays and holiday and summer vacations.

As a result of any of the above factors, or any of the other risks described in this Item 1A, "Risk Factors," our share price could be difficult to predict, and our share price in the past might not be a good indicator of the price of our shares in the future. In addition, if litigation is instituted against us following declines in our share price, we might need to devote substantial time and resources to responding to the litigation, and our share price could be materially adversely affected.

Our results of operations and share price could be adversely affected if we are unable to maintain effective internal controls.

The accuracy of our financial reporting is dependent on the effectiveness of our internal controls. We are required to provide a report from management to our shareholders on our internal control over financial reporting that includes an assessment of the effectiveness of these controls. Internal control over financial reporting has inherent limitations, including human error, the possibility that controls could be circumvented or become inadequate because of changed conditions, and fraud. Because of these inherent limitations, internal control over financial reporting might not prevent or detect all misstatements or fraud. If we cannot maintain and execute adequate internal control over financial reporting or implement required new or improved controls that provide reasonable assurance of the reliability of the financial reporting and preparation of our financial statements for external use, we could suffer harm to our reputation, fail to meet our public reporting requirements on a timely basis, be unable to properly report on our business and our results of operations, or be required to restate our financial statements, and our results of operations, the market price of our securities and our ability to obtain new business could be materially adversely affected.

We make estimates and assumptions in connection with the preparation of our consolidated financial statements, and any changes to those estimates and assumptions could adversely affect our financial results.

Our financial statements have been prepared in accordance with U.S. generally accepted accounting principles. The application of generally accepted accounting principles requires us to make estimates and assumptions about certain items and future events that affect our reported financial condition, and our accompanying disclosure with respect to, among other things, revenue recognition and income taxes. We base our estimates on historical experience, contractual commitments and on various other assumptions that we believe to be reasonable under the circumstances and at the time they are made. These estimates and assumptions involve the use of judgment and are subject to significant uncertainties, some of which are beyond our control. If our estimates, or the assumptions underlying such estimates, are not correct, actual results may differ materially from our estimates, and we may need to, among other things, adjust revenues or accrue additional charges that could adversely affect our results of operations.

We are incorporated in Ireland and a significant portion of our assets are located outside the United States. As a result, it might not be possible for shareholders to enforce civil liability provisions of the federal or state securities laws of the United States. We may also be subject to criticism and negative publicity related to our incorporation in Ireland. We are organized under the laws of Ireland, and a significant portion of our assets are located outside the United States. A shareholder who obtains a court judgment based on the civil liability provisions of U.S. federal or state securities laws may be unable to enforce the judgment against us in Ireland or in countries other than the United States where we have assets. In addition, there is some doubt as to whether the courts of Ireland and other countries would

recognize or enforce judgments of U.S. courts obtained against us or our directors or officers based on the civil liabilities provisions of the federal or state securities laws of the United States or would hear actions against us or those persons based on those laws. We have been advised that the United States and Ireland do not currently have a treaty providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters. The laws of Ireland do, however, as a general rule, provide that the judgments of the courts of the United States have the same validity in Ireland as if rendered by Irish Courts. Certain important requirements must be satisfied before the Irish Courts will recognize the U.S. judgment. The originating court must have been a court of competent jurisdiction, the

## Table of Contents

judgment must be final and conclusive and the judgment may not be recognized if it was obtained by fraud or its recognition would be contrary to Irish public policy. Any judgment obtained in contravention of the rules of natural justice or that is irreconcilable with an earlier foreign judgment would not be enforced in Ireland.

Similarly, judgments might not be enforceable in countries other than the United States where we have assets. Some companies that conduct substantial business in the United States but which have a parent domiciled in certain other jurisdictions have been criticized as improperly avoiding U.S. taxes or creating an unfair competitive advantage over other U.S. companies. Accenture never conducted business under a U.S. parent company and pays U.S. taxes on all of its U.S. operations. Nonetheless, we could be subject to criticism in connection with our incorporation in Ireland.

Irish law differs from the laws in effect in the United States and might afford less protection to shareholders. Our shareholders could have more difficulty protecting their interests than would shareholders of a corporation incorporated in a jurisdiction of the United States. As an Irish company, we are governed by the Companies Acts 1963 to 2012 of Ireland (the “Companies Acts”). The Companies Acts differ in some significant, and possibly material, respects from laws applicable to U.S. corporations and shareholders under various state corporation laws, including the provisions relating to interested directors, mergers and acquisitions, takeovers, shareholder lawsuits and indemnification of directors.

Under Irish law, the duties of directors and officers of a company are generally owed to the company only. Shareholders of Irish companies do not generally have rights to take action against directors or officers of the company under Irish law, and may only do so in limited circumstances. Directors of an Irish company must, in exercising their powers and performing their duties, act with due care and skill, honestly and in good faith with a view to the best interests of the company. Directors have a duty not to put themselves in a position in which their duties to the company and their personal interests might conflict and also are under a duty to disclose any personal interest in any contract or arrangement with the company or any of its subsidiaries. If a director or officer of an Irish company is found to have breached his duties to that company, he could be held personally liable to the company in respect of that breach of duty.

We might be unable to access additional capital on favorable terms or at all. If we raise equity capital, it may dilute our shareholders’ ownership interest in us.

We might choose to raise additional funds through public or private debt or equity financings in order to:

- take advantage of opportunities, including more rapid expansion;
- acquire other businesses or assets;
- repurchase shares from our shareholders;
- develop new services and solutions; or
- respond to competitive pressures.

Any additional capital raised through the sale of equity could dilute shareholders’ ownership percentage in us.

Furthermore, any additional financing we need might not be available on terms favorable to us, or at all.

### ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

### ITEM 2. PROPERTIES

We have major offices in the world’s leading business centers, including Boston, Chicago, New York, San Francisco, Sao Paulo, Frankfurt, London, Madrid, Milan, Paris, Rome, Bangalore, Beijing, Manila, Mumbai, Shanghai, Singapore, Sydney and Tokyo, among others. In total, we have offices and operations in more than 200 cities in 56 countries around the world. We do not own any material real property. Substantially all of our office space is leased under long-term leases with varying expiration dates. We believe that our facilities are adequate to meet our needs in the near future.

### ITEM 3. LEGAL PROCEEDINGS

We are involved in a number of judicial and arbitration proceedings concerning matters arising in the ordinary course of our business. We and/or our personnel also from time to time are involved in investigations by various regulatory or legal authorities concerning matters arising in the course of our business around the world. We do not expect that any of these matters, individually or in the aggregate, will have a material impact on our results of operations or

financial condition.

We currently maintain the types and amounts of insurance customary in the industries and countries in which we operate, including coverage for professional liability, general liability and management liability. We consider our insurance coverage to be adequate both as to the risks and amounts for the businesses we conduct.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

EXECUTIVE OFFICERS OF THE REGISTRANT

Our executive officers and persons chosen to become executive officers as of the date hereof are as follows:

Gianfranco Casati, 54, became our group chief executive—Products operating group in September 2006. From April 2002 to September 2006, Mr. Casati was managing director of the Products operating group’s Europe operating unit. He also served as Accenture’s country managing director for Italy and as chairman of our geographic council in its IGEM (Italy, Greece, emerging markets) region, supervising Accenture offices in Italy, Greece and several Eastern European countries. Mr. Casati has been with Accenture for 29 years.

Richard P. Clark, 52, became our chief accounting officer in September 2013, and has served as our corporate controller since September 2010. Prior to that, Mr. Clark served as our senior managing director of investor relations from September 2006 to September 2010. Previously he served as our finance director—Communications, Media & Technology from July 2001 to September 2006 and as our finance director—Resources from 1998 to July 2001. Mr. Clark has been with Accenture for 30 years.

Martin I. Cole, 57, became our group chief executive—Technology in March 2012. Prior to that, Mr. Cole served as our group chief executive—Communications, Media & Technology operating group from September 2006 to March 2012. Previously he served as our group chief executive—Public Service operating group from September 2004 to September 2006. From September 2000 to August 2004, he served in leadership roles in our outsourcing group, including serving as global managing partner of our Outsourcing & Infrastructure Delivery group. Mr. Cole has been with Accenture for 33 years.

Shawn Collinson, 52, became our chief strategy officer in March 2011. From September 2009 to March 2011, Mr. Collinson served as our managing director—Industries & Market Innovation. Prior to that, he held numerous leadership roles in our Resources operating group, including as managing director—Management Consulting from September 2006 to August 2009. Mr. Collinson has been with Accenture for 23 years.

Johan (Jo) G. Deblaere, 51, became our chief operating officer in September 2009. From September 2006 to September 2009, Mr. Deblaere served as our chief operating officer—Outsourcing. Prior to that, from September 2005 to September 2006, he led our global network of business process outsourcing delivery centers. From September 2000 to September 2005, he had overall responsibility for work with public-sector clients in Western Europe. Mr. Deblaere has been with Accenture for 28 years.

Richard A. Lumb, 52, became our group chief executive—Financial Services operating group in December 2010. From June 2006 to December 2010, Mr. Lumb led our Financial Services operating group in Europe, Africa, the Middle East and Latin America. He also served as our managing director of business and market development—Financial Services operating group from September 2005 to June 2006. Mr. Lumb has been with Accenture for 28 years.

Pierre Nanterme, 54, became chairman of the Board of Directors in February 2013, and has served as our chief executive officer since January 2011. Mr. Nanterme was our group chief executive—Financial Services operating group from September 2007 to December 2010. Prior to assuming this role, Mr. Nanterme held various leadership roles throughout the Company, including serving as our chief leadership officer from May 2006 through September 2007, and our country managing director for France from November 2005 to September 2007. Mr. Nanterme has been a director since October 2010. Mr. Nanterme has been with Accenture for 30 years.

Jean-Marc Ollagnier, 51, became our group chief executive—Resources operating group in March 2011. From September 2006 to March 2011, Mr. Ollagnier led our Resources operating group in Europe, Latin America, the Middle East and Africa. Previously, he served as our global managing director—Financial Services Solutions group and as our geographic unit managing director—Gallia. Mr. Ollagnier has been with Accenture for 27 years.

Stephen J. Rohleder, 56, became our group chief executive—Health & Public Service operating group in September 2009. From September 2004 to September 2009, Mr. Rohleder served as our chief operating officer. Prior to that, he was our group chief executive—Public Service operating group from March 2003 to September 2004. From March 2000 to March 2003, he was managing partner of our Public Service operating group in the United States. Mr. Rohleder has been with Accenture for 32 years.

David P. Rowland, 52, has been our chief financial officer since July 2013. From October 2006 to July 2013, he was our senior vice president—Finance. Previously, Mr. Rowland was our managing director—Finance Operations from July 2001 to October 2006. Prior to assuming that role, he served as our finance director—Communications, Media & Technology and as our finance director—Products. Mr. Rowland has been with Accenture for 31 years.

Table of Contents

Michael J. Salvino, 48, became our group chief executive—Business Process Outsourcing in September 2009. From July 2006 to September 2009, Mr. Salvino served as managing director—Business Process Outsourcing. Previously, he served as the global sales and accounts co-leader of the HR outsourcing group at Hewitt Associates from January 2005 to July 2006, and as president of the Americas region for Exult Inc. from June 2003 to October 2004 prior to Exult's merger with Hewitt. Mr. Salvino was employed by Accenture from June 1987 until December 1992 and then again from October 1993 until June 2000 before rejoining in July 2006.

Robert E. Sell, 51, became our group chief executive—Communications, Media & Technology operating group in March 2012. From September 2007 to March 2012, Mr. Sell led our Communications, Media & Technology operating group in North America. Prior to assuming that role, he served in a variety of leadership roles throughout Accenture, serving clients in a number of industries. Mr. Sell has been with Accenture for 29 years.

Jill Smart, 53, became our chief human resources officer in September 2004. Previously, Ms. Smart was managing partner of HR delivery. From 2000 until 2003, she served as the head of our People Enablement business practice. Ms. Smart has been with Accenture for 32 years.

Julie Spellman Sweet, 46, has been our general counsel, secretary and chief compliance officer since March 2010. Prior to joining Accenture, Ms. Sweet was, for 10 years, a partner in the Corporate department of the law firm of Cravath, Swaine & Moore LLP, which she joined as an associate in 1992.

Alexander M. van 't Noordende, 50, became our group chief executive—Management Consulting in March 2011. Mr. van 't Noordende was our group chief executive—Resources operating group from September 2006 to March 2011. Prior to assuming that role, he led our Resources operating group in Southern Europe, Africa, the Middle East and Latin America, and served as managing partner of the Resources operating group in France, Belgium and the Netherlands. From 2001 until September 2006, he served as our country managing director for the Netherlands. Mr. van 't Noordende has been with Accenture for 26 years.

Table of Contents

## PART II

## ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

## Price Range of Accenture plc Class A Ordinary Shares

Accenture plc Class A ordinary shares are traded on the New York Stock Exchange under the symbol "ACN." The New York Stock Exchange is the principal United States market for these shares.

The following table sets forth, on a per share basis for the periods indicated, the high and low sale prices for Accenture plc Class A ordinary shares as reported by the New York Stock Exchange.

	Price Range	
	High	Low
Fiscal 2012		
First Quarter	\$61.90	\$48.55
Second Quarter	\$60.20	\$51.08
Third Quarter	\$65.89	\$56.21
Fourth Quarter	\$61.98	\$54.94
Fiscal 2013		
First Quarter	\$71.79	\$60.69
Second Quarter	\$75.97	\$65.20
Third Quarter	\$84.22	\$72.42
Fourth Quarter	\$83.30	\$69.00
Fiscal 2014		
First Quarter (through October 15, 2013)	\$78.34	\$69.78

The closing sale price of an Accenture plc Class A ordinary share as reported by the New York Stock Exchange consolidated tape as of October 15, 2013 was \$71.60. As of October 15, 2013, there were 247 holders of record of Accenture plc Class A ordinary shares.

There is no trading market for Accenture plc Class X ordinary shares. As of October 15, 2013, there were 732 holders of record of Accenture plc Class X ordinary shares.

To ensure that members of Accenture Leadership continue to maintain equity ownership levels that we consider meaningful, we require current members of Accenture Leadership to comply with the Accenture Equity Ownership Requirement Policy. This policy requires members of Accenture Leadership to own Accenture equity valued at a multiple (ranging from 1/2 to 6) of their base compensation determined by their position level.

## Dividend Policy

On November 15, 2011, May 15, 2012, November 15, 2012 and May 15, 2013, Accenture plc paid a cash dividend of \$0.675, \$0.675, \$0.81 and \$0.81 per share, respectively, on our Class A ordinary shares and Accenture SCA paid a semi-annual cash dividend of \$0.675, \$0.675, \$0.81 and \$0.81 per share, respectively, on its Class I common shares.

On September 25, 2013, the Board of Directors of Accenture plc declared a semi-annual cash dividend of \$0.93 per share on our Class A ordinary shares for shareholders of record at the close of business on October 11, 2013.

Accenture plc will cause Accenture SCA to declare a semi-annual cash dividend of \$0.93 per share on its Class I common shares for shareholders of record at the close of business on October 8, 2013. Both dividends are payable on November 15, 2013.

Future dividends on Accenture plc Class A ordinary shares and Accenture SCA Class I common shares, if any, and the timing of declaration of any such dividends, will be at the discretion of the Board of Directors of Accenture plc and will depend on, among other things, our results of operations, cash requirements and surplus, financial condition, contractual restrictions and other factors that the Board of Directors of Accenture plc may deem relevant, as well as our ability to pay dividends in compliance with the Companies Acts.

In certain circumstances, as an Irish tax resident company, we may be required to deduct Irish dividend withholding tax (currently at the rate of 20%) from dividends paid to our shareholders. Shareholders resident in "relevant territories"

(including countries that are European Union member states (other than Ireland), the United States and other countries with which Ireland has a tax treaty) may be exempted from Irish dividend withholding tax. However, shareholders residing in other countries will generally be subject to Irish dividend withholding tax.

## Purchases and Redemptions of Accenture plc Class A Ordinary Shares and Class X Ordinary Shares

The following table provides information relating to our purchases of Accenture plc Class A ordinary shares and redemptions of Accenture plc Class X ordinary shares during the fourth quarter of fiscal 2013. For year-to-date information on all share purchases, redemptions and exchanges by the Company and further discussion of our share purchase activity, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources—Share Purchases and Redemptions.”

Period	Total Number of Shares Purchased	Average Price Paid per Share (1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (3) (in millions of U.S. dollars)
June 1, 2013 — June 30, 2013				
Class A ordinary shares	4,377,528	\$79.81	4,355,703	\$2,635
Class X ordinary shares	—	\$—	—	—
July 1, 2013 — July 31, 2013				
Class A ordinary shares	5,235,350	\$74.24	4,520,497	\$2,295
Class X ordinary shares	124,968	\$0.0000225	—	—
August 1, 2013 — August 31, 2013				
Class A ordinary shares	4,703,455	\$73.19	4,395,400	\$1,964
Class X ordinary shares	451,684	\$0.0000225	—	—
Total				
Class A ordinary shares (4)	14,316,333	\$75.60	13,271,600	
Class X ordinary shares (5)	576,652	\$0.0000225	—	

(1) Average price paid per share reflects the total cash outlay for the period, divided by the number of shares acquired, including those acquired by purchase or redemption for cash and any acquired by means of employee forfeiture.

(2) Since August 2001, the Board of Directors of Accenture plc has authorized and periodically confirmed a publicly announced open-market share purchase program for acquiring Accenture plc Class A ordinary shares. During the fourth quarter of fiscal 2013, we purchased 13,271,600 Accenture plc Class A ordinary shares under this program for an aggregate price of \$1,004 million. The open-market purchase program does not have an expiration date. As of August 31, 2013, our aggregate available authorization for share purchases and redemptions was \$1,964 million, which management has the discretion to use for either our publicly announced open-market share purchase program or the other share purchase programs. Since August 2001 and as of August 31, 2013, the Board of Directors of Accenture plc has authorized an aggregate of \$20.1 billion for purchases and redemptions of

(3) Accenture plc Class A ordinary shares, Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares. On September 25, 2013, the Board of Directors of Accenture plc approved \$5.0 billion in additional share repurchase authority bringing Accenture’s total outstanding authority to approximately \$6.96 billion.

(4) During the fourth quarter of fiscal 2013, Accenture purchased 1,044,733 Accenture plc Class A ordinary shares in transactions unrelated to publicly announced share plans or programs. These transactions consisted of acquisitions of Accenture plc Class A ordinary shares primarily via share withholding for payroll tax obligations due from employees and former employees in connection with the delivery of Accenture plc Class A ordinary shares under our various employee equity share plans. These purchases of shares in connection with employee share plans do not affect our aggregate available authorization for our publicly announced open-market share purchase and the

other share purchase programs.

During the fourth quarter of fiscal 2013, we redeemed 576,652 Accenture plc Class X ordinary shares pursuant to (5) our articles of association. Accenture plc Class X ordinary shares are redeemable at their par value of \$0.0000225 per share.

Table of Contents

## Purchases and Redemptions of Accenture SCA Class I Common Shares and Accenture Canada Holdings Inc. Exchangeable Shares

The following table provides additional information relating to our purchases and redemptions of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares for cash during the fourth quarter of fiscal 2013. We believe that the following table and footnotes provide useful information regarding the share purchase and redemption activity of Accenture. Generally, purchases and redemptions of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares for cash and employee forfeitures reduce shares outstanding for purposes of computing diluted earnings per share.

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share (2)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (3)

Total				
Exchangeable shares	3,200	\$72.95	—	—

During the fourth quarter of fiscal 2013, we acquired a total of 195,261 Accenture SCA Class I common shares and 3,200 Accenture Canada Holdings Inc. exchangeable shares from current and former members of Accenture Leadership and their permitted transferees by means of purchase or redemption for cash, or employee forfeiture, as applicable. In addition, during the fourth quarter of fiscal 2013, we issued 182,898 Accenture plc Class A ordinary shares upon redemptions of an equivalent number of Accenture SCA Class I common shares pursuant to a registration statement.

(1) Average price paid per share reflects the total cash outlay for the period, divided by the number of shares acquired, including those acquired by purchase or redemption for cash and any acquired by means of employee forfeiture.

(2) As of August 31, 2013, our aggregate available authorization for share purchases and redemptions was \$1,964 million, which management has the discretion to use for either our publicly announced open-market share purchase program or the other share purchase programs. Since August 2001 and as of August 31, 2013, the Board of Directors of Accenture plc has authorized an aggregate of \$20.1 billion for purchases and redemptions of Accenture plc Class A ordinary shares, Accenture SCA Class I common shares or Accenture Canada Holdings Inc. exchangeable shares. On September 25, 2013, the Board of Directors of Accenture plc approved \$5.0 billion in

additional share repurchase authority bringing Accenture's total outstanding authority to approximately \$6.96 billion.

## ITEM 6. SELECTED FINANCIAL DATA

The data for fiscal 2013, 2012 and 2011 and as of August 31, 2013 and 2012 are derived from the audited Consolidated Financial Statements and related Notes that are included elsewhere in this report. The data for fiscal 2010 and 2009 and as of August 31, 2011, 2010 and 2009 are derived from the audited Consolidated Financial Statements and related Notes that are not included in this report. The selected financial data should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our Consolidated Financial Statements and related Notes included elsewhere in this report.

	Fiscal				
	2013 (1)	2012	2011	2010	2009 (2)
	(in millions of U.S. dollars)				
Income Statement Data					
Revenues before reimbursements (“Net revenues”)	\$28,563	\$27,862	\$25,507	\$21,551	\$21,577
Revenues	30,394	29,778	27,353	23,094	23,171
Operating income	4,339	3,872	3,470	2,915	2,644
Net income (3)	3,555	2,825	2,553	2,060	1,938
Net income attributable to Accenture plc (3)	3,282	2,554	2,278	1,781	1,590

(1) Includes the impact of \$274 million in reorganization benefits and \$243 million in U.S. federal tax benefits recorded during fiscal 2013. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations for Fiscal 2013 Compared to Fiscal 2012—Reorganization (Benefits) Costs, net and Provision for Income Taxes, respectively.”

(2) Includes the impact of \$253 million in restructuring costs recorded during fiscal 2009.

On September 1, 2009, we adopted guidance issued by the Financial Accounting Standards Board (“FASB”) on noncontrolling interests. As required, the guidance on noncontrolling interests was applied prospectively with the exception of presentation and disclosure requirements, which were applied retrospectively for all periods presented. Prior to fiscal 2010, Net income was referred to as Income before minority interest and Net income attributable to Accenture plc was referred to as Net income.

	Fiscal				
	2013	2012	2011	2010 (1)	2009
Earnings Per Class A Ordinary Share					
Basic	\$5.08	\$3.97	\$3.53	\$2.79	\$2.55
Diluted (2)	4.93	3.84	3.39	2.66	2.44
Dividends per ordinary share	1.62	1.35	0.90	1.125	0.50

In early fiscal 2010, we announced a move to declare and pay cash dividends on a semi-annual basis. During fiscal (1) 2010, we paid a final annual cash dividend of \$0.75 in addition to a transitional semi-annual cash dividend of \$0.375.

Diluted earnings per share amounts have been restated to reflect the impact of the issuance of additional restricted (2) share units to holders of restricted share units in connection with the fiscal 2012 payment of cash dividends. This restatement resulted in a one cent decrease in diluted earnings per share from \$3.40 to \$3.39 for fiscal 2011.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Annual Report on Form 10-K. This discussion and analysis also contains forward-looking statements and should also be read in conjunction with the disclosures and information contained in "Disclosure Regarding Forward-Looking Statements" and "Risk Factors" in this Annual Report on Form 10-K. We use the terms "Accenture," "we," the "Company," "our" and "us" in this report to refer to Accenture plc and its subsidiaries. All references to years, unless otherwise noted, refer to our fiscal year, which ends on August 31. For example, a reference to "fiscal 2013" means the 12-month period that ended on August 31, 2013. All references to quarters, unless otherwise noted, refer to the quarters of our fiscal year.

We use the term "in local currency" so that certain financial results may be viewed without the impact of foreign currency exchange rate fluctuations, thereby facilitating period-to-period comparisons of business performance. Financial results "in local currency" are calculated by restating current period activity into U.S. dollars using the comparable prior year period's foreign currency exchange rates. This approach is used for all results where the functional currency is not the U.S. dollar.

Overview

Revenues are driven by the ability of our executives to secure new contracts and to deliver solutions and services that add value relevant to our clients' current needs and challenges. The level of revenues we achieve is based on our ability to deliver market-leading service offerings and to deploy skilled teams of professionals quickly and on a global basis. Our results of operations are affected by economic conditions, including macroeconomic conditions, credit market conditions and levels of business confidence. There continues to be significant volatility and economic and geopolitical uncertainty in markets around the world, as well as lower levels of spending on some of the types of services we provide in many of the industries we serve, all of which are impacting, and we expect will continue to impact, our business. These conditions have impacted the types of services our clients are demanding. Clients are requesting a higher volume of outsourcing services and are placing a greater emphasis on cost savings initiatives and in some cases, slowing the pace and level of spending on existing contracts. These changing demand patterns are currently having an adverse impact on the timing of revenue and could in the future have a material adverse effect on our results of operations. We continue to monitor the impact of this volatility and uncertainty and seek to manage our costs in order to respond to changing conditions.

Revenues before reimbursements ("net revenues") for the fourth quarter of fiscal 2013 were \$7.09 billion, compared with \$6.84 billion for the fourth quarter of fiscal 2012, an increase of 3.7% in U.S. dollars and 4.5% in local currency. Net revenues for fiscal 2013 were \$28.56 billion, compared with \$27.86 billion for fiscal 2012, an increase of 3% in U.S. dollars and 4% in local currency. During the fourth quarter of fiscal 2013, Health & Public Service, Products, Financial Services and Communications, Media & Technology experienced year-over-year revenue growth in local currency, while Resources was flat in local currency year-over-year. Revenue growth in local currency was solid in outsourcing, while consulting revenues reflected modest growth during the fourth quarter of fiscal 2013. Revenue growth in local currency during fiscal 2013 was lower than we expected due, in large part, to lower than expected demand, particularly in certain geographies experiencing challenging macroeconomic conditions, such as certain countries in Europe and in Brazil. We expect year-over-year revenues to range from a slight decline to a modest increase in the near term and continue to vary across operating groups and geographic regions, with growth in certain areas of our business partially offset by lower growth or declines in other areas.

In our consulting business, net revenues for the fourth quarter of fiscal 2013 were \$3.80 billion, compared with \$3.74 billion for the fourth quarter of fiscal 2012, an increase of 2% in U.S. dollars and 3% in local currency. Net consulting revenues for fiscal 2013 were \$15.38 billion, compared with \$15.56 billion for fiscal 2012, a decrease of 1% in U.S. dollars and an increase of 1% in local currency. Three of our five operating groups, including Health & Public Service, Communications, Media & Technology and Products, experienced quarterly year-over-year consulting revenue growth in local currency, while Resources and Financial Services experienced declines in quarterly year-over-year consulting revenue. We continued to enter into a higher proportion of contracts with longer duration that are converting to revenue at a slower pace, and clients slowed the pace and level of their spending. We expect

these trends to continue in the near term. Clients continued to be focused on initiatives designed to deliver cost savings and operational efficiency, as well as projects to integrate their global operations and grow and transform their businesses. We continue to experience growing demand for our services in emerging technologies, including analytics, cloud computing and mobility. Compared to fiscal 2012, we continued to provide a greater proportion of systems integration consulting through use of lower-cost resources in our Global Delivery Network, and we expect this trend to continue. The business environment is more competitive and, in some areas, we are experiencing pricing pressures.

32

---

Table of Contents

In our outsourcing business, net revenues for the fourth quarter of fiscal 2013 were \$3.28 billion, compared with \$3.10 billion for the fourth quarter of fiscal 2012, an increase of 6% in U.S. dollars and 7% in local currency. Net outsourcing revenues for fiscal 2013 were \$13.18 billion, compared with \$12.30 billion for fiscal 2012, an increase of 7% in U.S. dollars and 9% in local currency. Health & Public Service, Financial Services and Products experienced strong year-over-year outsourcing revenue growth in local currency during the fourth quarter of fiscal 2013.

Year-over-year outsourcing revenue growth in local currency was slight in Resources and declined in Communications, Media & Technology. Outsourcing revenue growth continued to be moderate, compared to the strong year-over-year growth that we experienced in the first half of fiscal 2013, as some clients slowed the pace and level of their spending and we expect these trends to continue in the near term. Clients continue to be focused on transforming their operations to improve effectiveness and save costs. Compared to fiscal 2012, we provided a greater proportion of application outsourcing through use of lower-cost resources in our Global Delivery Network.

As we are a global company, our revenues are denominated in multiple currencies and may be significantly affected by currency exchange-rate fluctuations. If the U.S. dollar weakens against other currencies, resulting in favorable currency translation, our revenues and revenue growth in U.S. dollars may be higher. If the U.S. dollar strengthens against other currencies, resulting in unfavorable currency translation, our revenues and revenue growth in U.S. dollars may be lower. When compared to fiscal 2012, the U.S. dollar strengthened against many currencies during fiscal 2013. This resulted in unfavorable currency translation and U.S. dollar revenue growth that was approximately 1% and 2% lower than our revenue growth in local currency for the fourth quarter and fiscal 2013, respectively.

Assuming that exchange rates stay within recent ranges, we estimate the foreign-exchange impact to our fiscal 2014 revenue growth will be 1% lower growth in U.S. dollars than our growth in local currency.

The primary categories of operating expenses include cost of services, sales and marketing and general and administrative costs. Cost of services is primarily driven by the cost of client-service personnel, which consists mainly of compensation, subcontractor and other personnel costs, and non-payroll outsourcing costs. Cost of services as a percentage of revenues is driven by the prices we obtain for our solutions and services, the utilization of our client-service personnel and the level of non-payroll costs associated with outsourcing contracts. Utilization primarily represents the percentage of our consulting professionals' time spent on billable work. Utilization for the fourth quarter of fiscal 2013 was approximately 88%, flat with the third quarter of fiscal 2013, and within our target range. This level of utilization reflects continued strong demand for resources in our Global Delivery Network and in most countries.

We continue to hire to meet current and projected future demand.

We proactively plan and manage the size and composition of our workforce and take actions as needed to address changes in the anticipated demand for our services, given that compensation costs are the most significant portion of our operating expenses. Based on current and projected future demand, we have increased our headcount, the majority of which serve our clients, to approximately 275,000 as of August 31, 2013, compared with approximately 266,000 as of May 31, 2013 and approximately 257,000 as of August 31, 2012. The year-over-year increase in our headcount reflects an overall increase in demand for our services, including those delivered through our Global Delivery Network in lower-cost locations. Annualized attrition, excluding involuntary terminations, for the fourth quarter of fiscal 2013 was 12%, flat with both the third quarter of fiscal 2013 and the fourth quarter of fiscal 2012. We evaluate voluntary attrition, adjust levels of new hiring and use involuntary terminations as means to keep our supply of skills and resources in balance with increases or decreases in client demand. In addition, we adjust compensation in certain skill sets and geographies in order to attract and retain appropriate numbers of qualified employees, and we may need to continue to adjust compensation in the future. For the majority of our personnel, compensation increases for fiscal 2013 became effective September 1, 2012. As in prior fiscal years, we strive to adjust pricing and/or the mix of resources to reduce the impact of compensation increases on our gross margin. Our ability to grow our revenues and increase our margins could be adversely affected if we are unable to: keep our supply of skills and resources in balance with changes in the types or amounts of services clients are demanding, such as the increase in demand for various outsourcing services; deploy our employees globally on a timely basis; manage attrition; recover increases in compensation; and/or effectively assimilate and utilize new employees.

Gross margin (Net revenues less Cost of services before reimbursable expenses as a percentage of Net revenues) for the fourth quarter of fiscal 2013 was 33.2%, compared with 32.9% for the fourth quarter of fiscal 2012. Gross margin

for fiscal 2013 was 32.9%, compared with 32.3% for fiscal 2012. The increase in gross margin for fiscal 2013 was principally due to higher outsourcing contract profitability, partially offset by higher costs associated with investments in offerings.

Sales and marketing and general and administrative costs as a percentage of net revenues were 19.3% for the fourth quarter of fiscal 2013, compared with 19.1% for the fourth quarter of fiscal 2012. Sales and marketing and general and administrative costs as a percentage of net revenues were 18.6% for fiscal 2013, compared with 18.4% for fiscal 2012. Sales and marketing costs are driven primarily by: compensation costs for business-development activities; investment in offerings; marketing- and advertising-related activities; and acquisition-related costs. General and administrative costs primarily include costs for non-client-facing personnel, information systems and office space. We continuously monitor these costs and implement cost-management actions, as appropriate. For fiscal 2013 compared to fiscal 2012, sales and marketing costs as a percentage of net revenues increased approximately 30 basis points as a result of higher selling and other business development costs associated with generating new contract bookings and expanding our pipeline of business opportunities, as well as acquisition-related costs. Our margins could

Table of Contents

be adversely affected if our cost-management actions are not sufficient to maintain sales and marketing and general and administrative costs at or below current levels as a percentage of net revenues.

Operating expenses for fiscal 2013 included reorganization benefits of \$274 million as a result of final determinations of certain reorganization liabilities established in connection with our transition to a corporate structure in 2001. For additional information, see Note 3 (Reorganization (Benefits) Costs, Net) to our Consolidated Financial Statements under Item 8, "Financial Statements and Supplementary Data."

Operating income for the fourth quarter of fiscal 2013 was \$984 million, compared with \$940 million for the fourth quarter of fiscal 2012. Operating income for fiscal 2013 was \$4,339 million, compared with \$3,872 million for fiscal 2012. Operating margin (Operating income as a percentage of Net revenues) for the fourth quarter of fiscal 2013 was 13.9% compared with 13.8% for the fourth quarter of fiscal 2012. Operating margin for fiscal 2013 was 15.2%, compared with 13.9% for fiscal 2012. The reorganization benefits of \$274 million recorded during the second and third quarters of fiscal 2013 increased operating margin by 100 basis points. Excluding the effects of the reorganization benefits, operating margin would have been 14.2% for fiscal 2013, an increase of 30 basis points compared with fiscal 2012.

The effective tax rate for fiscal 2013 was 18.1%. The above noted reorganization benefits increased income before income taxes without any increase in income tax expense. In addition, during fiscal 2013, we recorded a benefit of \$243 million related to settlements of U.S. federal tax audits for fiscal years 2006 through 2009. Absent these items, our effective tax rate for fiscal 2013 would have been 25.3% compared with 27.6% in fiscal 2012.

Diluted earnings per share were \$4.93 for fiscal 2013, compared with \$3.84 for fiscal 2012. Absent the above noted reorganization benefits and tax benefit recorded during fiscal 2013, diluted earnings per share would have been \$4.21 for fiscal 2013.

Our Operating income and Earnings per share are also affected by currency exchange-rate fluctuations on revenues and costs. Most of our costs are incurred in the same currency as the related net revenues. Where practical, we also seek to manage foreign currency exposure for costs not incurred in the same currency as the related net revenues, such as the cost of our Global Delivery Network, by using currency protection provisions in our customer contracts and through our hedging programs. We seek to manage our costs taking into consideration the residual positive and negative effects of changes in foreign exchange rates on those costs. For more information on our hedging programs, see Note 7 (Derivative Financial Instruments) to our Consolidated Financial Statements under Item 8, "Financial Statements and Supplementary Data."

**Bookings and Backlog**

New contract bookings for the fourth quarter of fiscal 2013 were \$8.40 billion, with consulting bookings of \$3.86 billion and outsourcing bookings of \$4.54 billion. New contract bookings for fiscal 2013 were \$33.28 billion, with consulting bookings of \$16.27 billion and outsourcing bookings of \$17.01 billion.

We provide information regarding our new contract bookings because we believe doing so provides useful trend information regarding changes in the volume of our new business over time. However, new bookings can vary significantly quarter to quarter depending in part on the timing of the signing of a small number of large outsourcing contracts. Clients continue to enter into contracts that are converting to revenue at a slower pace and clients have slowed the pace and level of their spending, all of which impact the conversion of new contract bookings to revenues. Information regarding our new bookings is not comparable to, nor should it be substituted for, an analysis of our revenues over time. There are no third-party standards or requirements governing the calculation of bookings. New contract bookings involve estimates and judgments regarding new contracts as well as renewals, extensions and changes to existing contracts. We do not update our new bookings for material subsequent terminations or reductions related to bookings originally recorded in prior fiscal years. New contract bookings are recorded using then-existing foreign currency exchange rates and are not subsequently adjusted for foreign currency exchange rate fluctuations. The majority of our contracts are terminable by the client on short notice, and some without notice. Accordingly, we do not believe it is appropriate to characterize bookings attributable to these contracts as backlog. Normally, if a client terminates a project, the client remains obligated to pay for commitments we have made to third parties in connection with the project, services performed and reimbursable expenses incurred by us through the date of termination.

**Critical Accounting Policies and Estimates**

The preparation of our Consolidated Financial Statements in conformity with U.S. generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses. We continually evaluate our estimates, judgments and assumptions based on available information and experience. Because the use of estimates is inherent in the financial reporting process, actual results could differ from those estimates. Certain of our accounting policies require higher degrees of judgment than others in their application. These include certain aspects of accounting for revenue recognition and income taxes.

Table of Contents

## Revenue Recognition

Our contracts have different terms based on the scope, deliverables and complexity of the engagement, the terms of which frequently require us to make judgments and estimates in recognizing revenues. We have many types of contracts, including time-and-materials contracts, fixed-price contracts and contracts with features of both of these contract types. In addition, some contracts include incentives related to costs incurred, benefits produced or adherence to schedules that may increase the variability in revenues and margins earned on such contracts. We conduct rigorous reviews prior to signing such contracts to evaluate whether these incentives are reasonably achievable.

We recognize revenues from technology integration consulting contracts using the percentage-of-completion method of accounting, which involves calculating the percentage of services provided during the reporting period compared with the total estimated services to be provided over the duration of the contract. Our contracts for technology integration consulting services generally span six months to two years. Estimated revenues used in applying the percentage-of-completion method include estimated incentives for which achievement of defined goals is deemed probable. This method is followed where reasonably dependable estimates of revenues and costs can be made. Estimates of total contract revenues and costs are continuously monitored during the term of the contract, and recorded revenues and estimated costs are subject to revision as the contract progresses. Such revisions may result in increases or decreases to revenues and income and are reflected in the Consolidated Financial Statements in the periods in which they are first identified. If our estimates indicate that a contract loss will occur, a loss provision is recorded in the period in which the loss first becomes probable and reasonably estimable. Contract losses are determined to be the amount by which the estimated total direct and indirect costs of the contract exceed the estimated total revenues that will be generated by the contract and are included in Cost of services and classified in Other accrued liabilities.

Revenues from contracts for non-technology integration consulting services with fees based on time and materials or cost-plus are recognized as the services are performed and amounts are earned. We consider amounts to be earned once evidence of an arrangement has been obtained, services are delivered, fees are fixed or determinable, and collectibility is reasonably assured. In such contracts, our efforts, measured by time incurred, typically are provided in less than a year and represent the contractual milestones or output measure, which is the contractual earnings pattern. For non-technology integration consulting contracts with fixed fees, we recognize revenues as amounts become billable in accordance with contract terms, provided the billable amounts are not contingent, are consistent with the services delivered, and are earned. Contingent or incentive revenues relating to non-technology integration consulting contracts are recognized when the contingency is satisfied and we conclude the amounts are earned.

Outsourcing contracts typically span several years and involve complex delivery, often through multiple workforces in different countries. In a number of these arrangements, we hire client employees and become responsible for certain client obligations. Revenues are recognized on outsourcing contracts as amounts become billable in accordance with contract terms, unless the amounts are billed in advance of performance of services, in which case revenues are recognized when the services are performed and amounts are earned. Revenues from time-and-materials or cost-plus contracts are recognized as the services are performed. In such contracts, our effort, measured by time incurred, represents the contractual milestones or output measure, which is the contractual earnings pattern. Revenues from unit-priced contracts are recognized as transactions are processed based on objective measures of output. Revenues from fixed-price contracts are recognized on a straight-line basis, unless revenues are earned and obligations are fulfilled in a different pattern. Outsourcing contracts can also include incentive payments for benefits delivered to clients. Revenues relating to such incentive payments are recorded when the contingency is satisfied and we conclude the amounts are earned. We continuously review and reassess our estimates of contract profitability. Circumstances that potentially affect profitability over the life of the contract include decreases in volumes of transactions or other inputs/outputs on which we are paid, failure to deliver agreed benefits, variances from planned internal/external costs to deliver our services, and other factors affecting revenues and costs.

Costs related to delivering outsourcing services are expensed as incurred, with the exception of certain transition costs related to the set-up of processes, personnel and systems, which are deferred during the transition period and expensed evenly over the period outsourcing services are provided. The deferred costs are specific internal costs or incremental external costs directly related to transition or set-up activities necessary to enable the outsourced services. Generally,

deferred amounts are protected in the event of early termination of the contract and are monitored regularly for impairment. Impairment losses are recorded when projected remaining undiscounted operating cash flows of the related contract are not sufficient to recover the carrying amount of contract assets. Amounts billable to the client for transition or set-up activities are deferred and recognized as revenue evenly over the period outsourcing services are provided. Contract acquisition and origination costs are expensed as incurred.

We enter into contracts that may consist of multiple elements. These contracts may include any combination of technology integration consulting services, non-technology integration consulting services or outsourcing services described above. Revenues for contracts with multiple elements are allocated based on the lesser of the element's relative selling price or the amount that is not contingent on future delivery of another element. The selling price of each element is determined by obtaining the vendor-specific objective evidence ("VSOE") of fair value of each element. VSOE of fair value is based on the price charged when the element is sold separately by the Company on a regular basis and not as part of a contract with multiple elements. If the amount

Table of Contents

of non-contingent revenues allocated to a delivered element accounted for under the percentage-of-completion method of accounting is less than the costs to deliver such services, then such costs are deferred and recognized in future periods when the revenues become non-contingent. Revenues are recognized in accordance with our accounting policies for the separate elements when the services have value on a stand-alone basis, selling price of the separate elements exists and, in arrangements that include a general right of refund relative to the delivered element, performance of the undelivered element is considered probable and substantially in our control. While determining fair value and identifying separate elements require judgment, generally fair value and the separate elements are readily identifiable as we also sell those elements unaccompanied by other elements.

Revenues recognized in excess of billings are recorded as Unbilled services. Billings in excess of revenues recognized are recorded as Deferred revenues until revenue recognition criteria are met. Client prepayments (even if nonrefundable) are deferred and recognized over future periods as services are delivered or performed.

Our consulting revenues are affected by the number of work days in a fiscal quarter, which in turn is affected by the level of vacation days and holidays. Consequently, since our first and third quarters typically have approximately 5-10% more work days than our second and fourth quarters, our consulting revenues are typically higher in our first and third quarters than in our second and fourth quarters.

Net revenues include the margin earned on computer hardware and software resale contracts, as well as revenues from alliance agreements, neither of which is material to us. Reimbursements include billings for travel and other out-of-pocket expenses and third-party costs, such as the cost of hardware and software resales. In addition, Reimbursements may include allocations from gross billings to record an amount equivalent to reimbursable costs, where billings do not specifically identify reimbursable expenses. We report revenues net of any revenue-based taxes assessed by governmental authorities that are imposed on and concurrent with specific revenue-producing transactions.

Income Taxes

Determining the consolidated provision for income tax expense, income tax liabilities and deferred tax assets and liabilities involves judgment. Deferred tax assets and liabilities, measured using enacted tax rates, are recognized for the future tax consequences of temporary differences between the tax and financial statement bases of assets and liabilities. As a global company, we calculate and provide for income taxes in each of the tax jurisdictions in which we operate. This involves estimating current tax exposures in each jurisdiction as well as making judgments regarding the recoverability of deferred tax assets. Tax exposures can involve complex issues and may require an extended period to resolve. In assessing the realizability of deferred tax assets, we consider whether it is more likely than not that some portion or all of the deferred tax assets will not be realized and adjust the valuation allowances accordingly. Factors considered in making this determination include the period of expiration of the tax asset, planned use of the tax asset, tax planning strategies and historical and projected taxable income as well as tax liabilities for the tax jurisdiction in which the tax asset is located. Valuation allowances will be subject to change in each future reporting period as a result of changes in one or more of these factors. Changes in the geographic mix or estimated level of annual income before taxes can affect the overall effective tax rate.

We apply an estimated annual effective tax rate to our quarterly operating results to determine the interim provision for income tax expense. In accordance with FASB guidance on uncertainty in income taxes, a change in judgment that impacts the measurement of a tax position taken in a prior year is recognized as a discrete item in the interim period in which the change occurs. In the event there is a significant unusual or infrequent item recognized in our quarterly operating results, the tax attributable to that item is recorded in the interim period in which it occurs.

No taxes have been provided on undistributed foreign earnings that are planned to be indefinitely reinvested. If future events, including material changes in estimates of cash, working capital and long-term investment requirements, necessitate that these earnings be distributed, an additional provision for taxes may apply, which could materially affect our future effective tax rate. We currently do not foresee any event that would require us to distribute these earnings.

Table of Contents

As a matter of course, we are regularly audited by various taxing authorities, and sometimes these audits result in proposed assessments where the ultimate resolution may result in us owing additional taxes. We establish tax liabilities or reduce tax assets for uncertain tax positions when, despite our belief that our tax return positions are appropriate and supportable under local tax law, we believe we may not succeed in realizing the tax benefit of certain positions if challenged. In evaluating a tax position, we determine whether it is more likely than not that the position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Our estimate of the ultimate tax liability contains assumptions based on past experiences, judgments about potential actions by taxing jurisdictions as well as judgments about the likely outcome of issues that have been raised by taxing jurisdictions. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon settlement. We evaluate these uncertain tax positions each quarter and adjust the related tax liabilities or assets in light of changing facts and circumstances, such as the progress of a tax audit or the expiration of a statute of limitations. We believe the estimates and assumptions used to support our evaluation of uncertain tax positions are reasonable. However, final determinations of prior-year tax liabilities, either by settlement with tax authorities or expiration of statutes of limitations, could be materially different from estimates reflected in assets and liabilities and historical income tax provisions. The outcome of these final determinations could have a material effect on our income tax provision, net income, or cash flows in the period in which that determination is made. We believe our tax positions comply with applicable tax law and that we have adequately accounted for uncertain tax positions.

**Revenues by Segment/Operating Group**

Our five reportable operating segments are our operating groups, which are: Communications, Media & Technology; Financial Services; Health & Public Service; Products; and Resources. Operating groups are managed on the basis of net revenues because our management believes net revenues are a better indicator of operating group performance than revenues. In addition to reporting net revenues by operating group, we also report net revenues by two types of work: consulting and outsourcing, which represent the services sold by our operating groups. Consulting net revenues, which include management and technology consulting and systems integration, reflect a finite, distinct project or set of projects with a defined outcome and typically a defined set of specific deliverables. Outsourcing net revenues typically reflect ongoing, repeatable services or capabilities provided to transition, run and/or manage operations of client systems or business functions.

From time to time, our operating groups work together to sell and implement certain contracts. The resulting revenues and costs from these contracts may be apportioned among the participating operating groups. Generally, operating expenses for each operating group have similar characteristics and are subject to the same factors, pressures and challenges. However, the economic environment and its effects on the industries served by our operating groups affect revenues and operating expenses within our operating groups to differing degrees. The mix between consulting and outsourcing is not uniform among our operating groups. Local currency fluctuations also tend to affect our operating groups differently, depending on the geographic concentrations and locations of their businesses.

While we provide discussion about our results of operations below, we cannot measure how much of our revenue growth in a particular period is attributable to changes in price or volume. Management does not track standard measures of unit or rate volume. Instead, our measures of volume and price are extremely complex, as each of our services contracts is unique, reflecting a customized mix of specific services that does not fit into standard comparability measurements. Pricing for our services is a function of the nature of each service to be provided, the skills required and outcome sought, as well as estimated cost, risk, contract terms and other factors.

Table of Contents

## Results of Operations for Fiscal 2013 Compared to Fiscal 2012

Net revenues (by operating group, geographic region and type of work) and reimbursements were as follows:

	Fiscal		Percent	Percent	Percent of Total				
	2013	2012	Increase (Decrease) U.S. Dollars	Increase (Decrease) Local Currency	Net Revenues for Fiscal		2013	2012

(1)EMEA includes Europe, Middle East and Africa.

(2)Amounts in table may not total due to rounding.

We conduct business in the following countries that individually comprised 10% or more of consolidated net revenues during fiscal 2013, 2012 or 2011:

	Fiscal			
	2013	2012	2011	
United States	39	% 36	% 35	%
United Kingdom	9	9	10	

## Net Revenues

Outsourcing revenue growth in local currency moderated during the second half of fiscal 2013 compared to the first half of fiscal 2013. Financial Services, Products and Health & Public Service experienced strong growth in outsourcing revenues in local currency during fiscal 2013. Outsourcing revenue growth in local currency during fiscal 2013 was slight in Resources and declined in Communications, Media & Technology. Consulting revenues were flat in local currency during fiscal 2013. Health & Public Service experienced strong growth in consulting revenues in local currency during fiscal 2013. Consulting revenue growth in local currency during fiscal 2013 was slight in Financial Services and declined in Communications, Media & Technology, Resources and Products.

Table of Contents

The following net revenues commentary discusses local currency net revenue changes for fiscal 2013 compared to fiscal 2012:

## Operating Groups

Communications, Media & Technology net revenues decreased 2% in local currency. Outsourcing revenues reflected slight growth, driven by growth in Americas across all industry groups and Media & Entertainment in EMEA, partially offset by a significant decline in Electronics & High Tech in EMEA, principally due to an expected year-over-year revenue decline from one contract. The revenue decline on this contract is expected to continue to impact outsourcing revenue growth in the near term. In addition, outsourcing revenue growth was impacted by a decline in Electronics & High Tech in Asia Pacific. Consulting revenues reflected a modest decline, due to declines in Communications and Media & Entertainment in Americas and Electronics & High Tech in EMEA and Asia Pacific, partially offset by strong growth in Electronics & High Tech in Americas. Some of our clients continued to reduce and/or defer their investment in consulting, which had a negative impact on our consulting revenues during fiscal 2013. We expect these trends will continue to impact our net revenue growth in the near term.

Financial Services net revenues increased 7% in local currency. Outsourcing revenues reflected very strong growth, driven by all industry groups in Americas and Banking in EMEA, including the impact of an acquisition in Banking during fiscal 2012. Consulting revenues reflected slight growth, with very strong growth driven by Insurance in Americas and Asia Pacific and Capital Markets in EMEA. These increases were partially offset by declines in Insurance and Banking in EMEA and Banking in Americas. Changes in the banking and capital markets industries continue to influence the business needs of our clients. This is resulting in higher current demand for outsourcing services, including transformational projects, and lower demand for short-term consulting services and we expect this trend to continue in the near term.

Health & Public Service net revenues increased 12% in local currency. Consulting revenues reflected strong growth, led by Public Service in Americas and Asia Pacific and Health in Americas and EMEA. This growth was partially offset by a decline in Public Service in EMEA and Health in Asia Pacific. Outsourcing revenues also reflected strong growth, led by Public Service in Americas and Health in Americas and Asia Pacific.

Products net revenues increased 5% in local currency. Outsourcing revenues reflected strong growth, driven by growth across all geographic regions and industry groups, led by Life Sciences, Retail and Industrial Equipment. Consulting revenues reflected a slight decline, due to declines in Asia Pacific across most industry groups, Americas and EMEA in Retail, and Americas in Consumer Goods & Services. These decreases were largely offset by growth in Americas and EMEA in Life Sciences, Americas in Industrial Equipment and EMEA in Consumer Goods & Services. During fiscal 2013, several large systems integration projects ended, transitioned to smaller phases or to outsourcing services. We also had higher demand for outsourcing services, including transformational projects, and lower demand for short-term consulting services and we expect this trend to continue in the near term.

Resources net revenues decreased 1% in local currency. Outsourcing revenues reflected modest growth, driven by all industry groups in EMEA and Utilities and Energy in Asia Pacific, partially offset by a decline in Utilities in Americas. Consulting revenues reflected a modest decline, as growth in Chemicals across all geographic regions was more than offset by declines in Natural Resources in Asia Pacific and Americas, Utilities in EMEA and Energy in Americas. Some of our clients, primarily in Natural Resources and Utilities, reduced their level of consulting investments. In addition, several large systems integration projects have ended or have transitioned to smaller phases and demand for our outsourcing services has moderated. We expect these trends will continue to impact Resources year-over-year net revenue growth in the near term.

## Geographic Regions

Americas net revenues increased 9% in local currency, driven by growth in the United States.

EMEA net revenues were flat in local currency. We experienced a significant decline in Finland, principally due to an expected year-over-year decline from one contract in Communications, Media & Technology, as well as declines in Spain, Sweden and the United Kingdom. These declines were offset by growth in Switzerland, the Netherlands, Germany, Ireland, South Africa and Italy.

Asia Pacific net revenues increased 3% in local currency, driven by China, India, Singapore and Australia, partially offset by declines in Japan, South Korea and Malaysia.

Operating Expenses

Operating expenses for fiscal 2013 were \$26,056 million, an increase of \$149 million, or 1%, over fiscal 2012, and decreased as a percentage of revenues to 85.7% from 87.0% during this period. Operating expenses before reimbursable expenses for fiscal 2013 were \$24,224 million, an increase of \$233 million, or 1%, over fiscal 2012, and decreased as a percentage of net revenues to 84.8% from 86.1% during this period.

Table of Contents

## Cost of Services

Cost of services for fiscal 2013 was \$21,010 million, an increase of \$220 million, or 1%, over fiscal 2012, and decreased as a percentage of revenues to 69.1% from 69.8% during this period. Cost of services before reimbursable expenses for fiscal 2013 was \$19,179 million, an increase of \$304 million, or 2%, over fiscal 2012, and decreased as a percentage of net revenues to 67.1% from 67.7% during this period. Gross margin for fiscal 2013 increased to 32.9% from 32.3% during this period, principally due to higher outsourcing contract profitability, partially offset by higher costs associated with investments in offerings.

## Sales and Marketing

Sales and marketing expense for fiscal 2013 was \$3,482 million, an increase of \$178 million, or 5%, over fiscal 2012, and increased as a percentage of net revenues to 12.2% from 11.9% during this period. The increase as a percentage of net revenues was primarily driven by higher selling and other business development costs associated with generating new contract bookings and expanding our pipeline of business opportunities, as well as acquisition-related costs.

## General and Administrative Costs

General and administrative costs for fiscal 2013 were \$1,836 million, an increase of \$25 million, or 1%, from fiscal 2012, and decreased as a percentage of net revenues to 6.4% from 6.5% during this period.

## Reorganization (Benefits) Costs, net

We recorded net reorganization benefits of \$272 million (\$274 million in reorganization benefits less \$1.9 million in interest expense accrued) during fiscal 2013 as a result of final determinations of certain reorganization liabilities established in connection with our transition to a corporate structure in 2001. For additional information, refer to Note 3 (Reorganization (Benefits) Costs, Net) to our Consolidated Financial Statements under Item 8, "Financial Statements and Supplementary Data."

## Operating Income and Operating Margin

Operating income for fiscal 2013 was \$4,339 million, an increase of \$467 million, or 12%, over fiscal 2012, and increased as a percentage of net revenues to 15.2% from 13.9% during this period. The reorganization benefits of \$274 million recorded during fiscal 2013 increased operating margin by 100 basis points. Excluding the effects of the reorganization benefits, operating margin for fiscal 2013 increased 30 basis points compared to fiscal 2012.

Operating income and operating margin for each of the operating groups were as follows:

	Fiscal		2012		
	2013	Operating	Operating	Operating	Operating
	Income	Margin	Income	Margin	
	(in millions of U.S. dollars)				
Communications, Media & Technology	\$786	14	% \$845	14	%
Financial Services	1,003	16	810	14	
Health & Public Service	594	13	376	9	
Products	985	14	864	13	
Resources	971	19	977	19	
Total	\$4,339	15.2	% \$3,872	13.9	%

(1) Amounts in table may not total due to rounding.

Table of Contents

## Operating Income and Operating Margin Excluding Reorganization Benefits (Non-GAAP)

	Fiscal	Operating Income and Operating Margin Excluding Reorganization Benefits (Non-GAAP)			2012 Operating Income and Operating Margin as Reported (GAAP)			Increase (Decrease)
	2013	Reorganization Benefits (1)	Operating Income (2)	Operating Margin (2)	Operating Income	Operating Margin		
Communications, Media & Technology	\$786	\$53	\$733	13 %	\$845	14 %	\$(113 )	
Financial Services	1,003	59	944	15	810	14	134	
Health & Public Service	594	48	546	12	376	9	170	
Products	985	65	921	14	864	13	57	
Resources	971	49	921	18	977	19	(55 )	
Total	\$4,339	\$274	\$4,065	14.2 %	\$3,872	13.9 %	\$193	

(1) Represents reorganization benefits related to final determinations of certain reorganization liabilities established in connection with our transition to a corporate structure during 2001.

(2) We have presented Operating income and operating margin excluding reorganization benefits, as we believe quantifying the effect of the reorganization benefits on Operating income and operating margin facilitates understanding as to both the impact of these benefits and our operating performance.

(3) Amounts in table may not total due to rounding.

During fiscal 2013, each operating group recorded a portion of the \$274 million reorganization benefits. The commentary below provides additional insight into operating group performance and operating margin for fiscal 2013, exclusive of the reorganization benefits, compared with fiscal 2012. See “Reorganization (Benefits), Costs, net.” Communications, Media & Technology operating income decreased, primarily due to a decline in consulting revenue and higher sales and marketing costs as a percentage of net revenues. Operating income was also impacted by an expected significant year-over-year revenue decline from one outsourcing contract.

Financial Services operating income increased, primarily due to strong outsourcing revenue growth and improved outsourcing and consulting contract profitability. Operating income for fiscal 2012 included the impact of costs related to acquisitions.

Health & Public Service operating income increased, primarily due to revenue growth and improved outsourcing contract profitability.

Products operating income increased, primarily due to strong outsourcing revenue growth and improved outsourcing contract profitability, partially offset by a decline in consulting revenues.

Resources operating income decreased, primarily due to a decline in consulting revenue and higher sales and marketing costs as a percentage of net revenues.

**Interest Income**

Interest income for fiscal 2013 was \$33 million, a decrease of \$10 million, or 23%, from fiscal 2012. The decrease was primarily due to lower cash balances.

**Other (Expense) Income, net**

Other (expense) income, net for fiscal 2013 was \$18 million, a decrease of \$23 million from fiscal 2012. The change was primarily driven by net foreign exchange losses during fiscal 2013, compared to net foreign exchange gains during fiscal 2012.

**Provision for Income Taxes**

The effective tax rate for fiscal 2013 was 18.1%, compared with 27.6% for fiscal 2012. During fiscal 2013, we recorded reorganization benefits of \$274 million, which increased income before taxes without any increase in income tax expense. The effective tax rate was also impacted by a benefit of \$243 million related to settlements of U.S. federal tax audits for fiscal years 2006 through 2009 recorded during fiscal 2013. Absent these items, the effective tax rate for fiscal 2013 would have been 25.3%, which is lower than fiscal 2012 primarily due to lower additions to tax reserves.

Table of Contents

Net Income Attributable to Noncontrolling Interests

Net income attributable to noncontrolling interests eliminates the income earned or expense incurred attributable to the equity interest that some of our current and former members of Accenture Leadership and their permitted transferees have in our Accenture SCA and Accenture Canada Holdings Inc. subsidiaries. See “Business—Organizational Structure.” The resulting Net income attributable to Accenture plc represents the income attributable to the shareholders of Accenture plc. Since January 2002, noncontrolling interests has also included immaterial amounts primarily attributable to noncontrolling shareholders in our Avanade Inc. subsidiary.

Net income attributable to noncontrolling interests for fiscal 2013 was \$273 million, an increase of \$1 million over fiscal 2012. The increase was due to higher Net income of \$730 million, offset by a reduction in the Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares average noncontrolling ownership interest to 7% for fiscal 2013 from 9% for fiscal 2012.

Earnings Per Share

Diluted earnings per share were \$4.93 for fiscal 2013, compared with \$3.84 for fiscal 2012. The \$1.09 increase in our earnings per share included the impact of the reorganization benefits of \$274 million, which increased earnings per share by \$0.38, and the \$243 million tax benefit related to settlements of U.S. federal tax audits, which increased earnings per share by \$0.34. Excluding the impact of these benefits, earnings per share increased \$0.37 compared with earnings per share for fiscal 2012, due to increases of \$0.19 from higher revenues and operating results, \$0.13 from a lower effective tax rate, excluding the impact of the tax benefit related to settlements of U.S. federal tax audits and reorganization benefits, and \$0.08 from lower weighted average shares outstanding. These increases were partially offset by a decrease of \$0.03 from lower non-operating income. For information regarding our earnings per share calculations, see Note 2 (Earnings Per Share) to our Consolidated Financial Statements under Item 8, “Financial Statements and Supplementary Data.”

Table of Contents

## Results of Operations for Fiscal 2012 Compared to Fiscal 2011

Net revenues (by operating group, geographic region and type of work) and reimbursements were as follows:

	Fiscal		Percent	Percent	Percent of Total

n/m = not meaningful

(1) Amounts in table may not total due to rounding.

**Net Revenues**

Revenue growth in local currency was very strong in outsourcing during fiscal 2012. All five of our operating groups experienced double-digit year-over-year outsourcing revenue growth in local currency during fiscal 2012. Consulting revenue growth in local currency moderated significantly during the second half of fiscal 2012 compared to the first half of fiscal 2012. While Health & Public Service experienced strong growth in consulting revenues in local currency during fiscal 2012, year-over-year consulting revenue growth in local currency either moderated or declined for all other operating groups in the second half of fiscal 2012.

The following net revenues commentary discusses local currency net revenue changes for fiscal 2012 compared to fiscal 2011:

**Operating Groups**

Communications, Media & Technology net revenues increased 11% in local currency. Outsourcing revenues reflected significant growth, led by Electronics & High Tech in EMEA, principally due to a significant short-term increase from one contract. We also experienced outsourcing growth in Communications across all geographic regions. Consulting revenues declined slightly, with growth in the first half of fiscal 2012 offset by contraction during the second half of the fiscal year. For fiscal 2012, consulting revenues reflected a decline in Communications in EMEA and Asia Pacific, partially offset by growth in Media & Entertainment in Americas and Electronics & High Tech in Asia Pacific. Some of our clients, primarily in Communications, continued to exercise caution by reducing and/or

deferring their investment in consulting, which had a negative impact on our consulting revenues.

43

---

Table of Contents

Financial Services net revenues increased 11% in local currency. Outsourcing revenues reflected very significant growth, driven by all industry groups in Americas, including the impact of an acquisition in Banking. We also experienced outsourcing growth across all industry groups in Asia Pacific and Capital Markets in EMEA. Consulting revenues reflected modest growth, driven by significant growth in Insurance across all geographic regions, including the impact of an acquisition. This growth was partially offset by declines in Banking in EMEA and Americas and Capital Markets in EMEA. The uncertainty in the banking and capital markets industries impacted our consulting revenue growth during fiscal 2012.

Health & Public Service net revenues increased 11% in local currency. Consulting revenues reflected strong growth, led by Health across all geographic regions and Public Service in Asia Pacific. Outsourcing revenues reflected strong growth, driven by Health across all geographic regions and Public Service in EMEA and Asia Pacific. Outsourcing revenues during fiscal 2011 reflected revenues recognized upon favorable resolution of billing holdbacks on certain contracts with United States government agencies. The global uncertainty and challenges in the public sector continued to have an impact on demand in our public service business.

Products net revenues increased 13% in local currency. Consulting revenues increased, driven primarily by growth across all industry groups in Americas and most industry groups in Asia Pacific. By industry group, growth was led by Retail and Industrial Equipment. Outsourcing revenues reflected very strong growth, driven by growth across all geographic regions and most industry groups, led by Life Sciences, Air, Freight & Travel Services and Retail.

Resources net revenues increased 10% in local currency. Consulting revenues increased, driven by Energy across all geographic regions and Natural Resources in Asia Pacific and EMEA, partially offset by a decline in Natural Resources in Americas. Outsourcing revenues reflected strong growth, driven by growth across all geographic regions and all industry groups, led by Energy and Natural Resources.

Geographic Regions

Americas net revenues increased 13% in local currency, led by the United States and Brazil. In general, revenue growth moderated across Americas in the second half of fiscal 2012 compared to the first half of fiscal 2012.

EMEA net revenues increased 8% in local currency, driven by growth in Finland, the United Kingdom, Italy, Germany, the Netherlands and South Africa. In general, revenue growth moderated across EMEA in the second half of fiscal 2012 compared to the first half of fiscal 2012.

Asia Pacific net revenues increased 18% in local currency, driven by Australia, Japan, China, Singapore, South Korea and India.

Operating Expenses

Operating expenses for fiscal 2012 were \$25,906 million, an increase of \$2,024 million, or 8%, over fiscal 2011, and decreased as a percentage of revenues to 87.0% from 87.3% during this period. Operating expenses before reimbursable expenses for fiscal 2012 were \$23,991 million, an increase of \$1,954 million, or 9%, over fiscal 2011, and decreased as a percentage of net revenues to 86.1% from 86.4% during this period.

Cost of Services

Cost of services for fiscal 2012 was \$20,790 million, an increase of \$1,824 million, or 10%, over fiscal 2011, and increased as a percentage of revenues to 69.8% from 69.3% during this period. Cost of services before reimbursable expenses for fiscal 2012 was \$18,875 million, an increase of \$1,754 million, or 10%, over fiscal 2011, and increased as a percentage of net revenues to 67.7% from 67.1% during this period. Gross margin for fiscal 2012 decreased to 32.3% from 32.9% during this period. Gross margin for fiscal 2012 was lower than for fiscal 2011, principally due to higher payroll costs as a percentage of net revenues, including costs associated with investments in offerings and acquisitions, partially offset by higher contract profitability.

Sales and Marketing

Sales and marketing expense for fiscal 2012 was \$3,303 million, an increase of \$209 million, or 7%, over fiscal 2011, and decreased as a percentage of net revenues to 11.9% from 12.1% during this period. The decrease as a percentage of net revenues was due to growth of business development costs at a rate lower than that of net revenues.

General and Administrative Costs

General and administrative costs for fiscal 2012 were \$1,811 million, a decrease of \$9 million, or 1%, from fiscal 2011, and decreased as a percentage of net revenues to 6.5% from 7.1% during this period. The decrease as a

percentage of net revenues was due to management of these costs at a growth rate lower than that of net revenues. In addition, during fiscal 2011, we recorded a provision for litigation matters for \$75 million, or 0.3% of net revenues, which was partially offset by a reduction in the allowance for client receivables and unbilled services.

Table of Contents

## Operating Income and Operating Margin

Operating income for fiscal 2012 was \$3,872 million, an increase of \$401 million, or 12%, over fiscal 2011, and increased as a percentage of net revenues to 13.9% from 13.6% during this period. Operating income and operating margin for each of the operating groups were as follows:

	Fiscal		2011		Increase	
	2012	Operating	Operating	Operating	Operating	(Decrease)
	Operating	Margin	Income	Income	Margin	
	Income					
	(in millions of U.S. dollars)					
Communications, Media & Technology	\$845	14	% \$728	13	%	\$118
Financial Services	810	14	898	17		(89)
Health & Public Service	376	9	318	8		58
Products	864	13	680	11		184
Resources	977	19	846	17		130
Total	\$3,872	13.9	% \$3,470	13.6	%	\$401

(1) Amounts in table may not total due to rounding.

During fiscal 2012, the results of each operating group benefited from our management of general and administrative costs at a growth rate lower than that of net revenues. In addition, during fiscal 2011, each operating group recorded a portion of the \$75 million provision for litigation matters, partially offset by a reduction in the allowance for client receivables and unbilled services. The commentary below provides additional insight into operating group performance and operating margin for fiscal 2012, compared with fiscal 2011, exclusive of these impacts.

Communications, Media & Technology operating income increased, primarily due to outsourcing revenue growth, principally related to a significant short-term increase from one contract.

Financial Services operating income decreased, primarily due to a lower proportion of high margin consulting work, costs related to recent acquisitions and higher sales and marketing costs as a percentage of net revenues, partially offset by strong outsourcing revenue growth.

Health & Public Service operating income increased, primarily due to revenue growth and lower sales and marketing costs as a percentage of net revenues, partially offset by the negative impact of delivery inefficiencies on a few contracts. Health & Public Service operating margin was impacted by administrative and compliance costs associated with our U.S. Federal practice.

Products operating income increased, primarily due to revenue growth and improved consulting and outsourcing contract profitability.

Resources operating income increased, primarily due to strong revenue growth.

## Interest Income

Interest income for fiscal 2012 was \$43 million, an increase of \$1 million, or 4%, over fiscal 2011. The increase was primarily due to higher cash balances.

## Other Income, net

Other income, net for fiscal 2012 was \$5 million, a decrease of \$10 million from fiscal 2011. The change was driven primarily by lower net foreign exchange gains during fiscal 2012.

## Provision for Income Taxes

The effective tax rate for fiscal 2012 was 27.6%, compared with 27.3% for fiscal 2011. The effective tax rate in fiscal 2012 included higher expenses for additions to tax reserves and changes in our geographic mix of income, partially offset by higher benefits related to final determinations of prior year tax liabilities.

Table of Contents

## Net Income Attributable to Noncontrolling Interests

Net income attributable to noncontrolling interests eliminates the income earned or expense incurred attributable to the equity interest that some of our current and former members of Accenture Leadership and their permitted transferees have in our Accenture SCA and Accenture Canada Holdings Inc. subsidiaries. See “Business—Organizational Structure.” The resulting Net income attributable to Accenture plc represents the income attributable to the shareholders of Accenture plc. Since January 2002, noncontrolling interests has also included immaterial amounts primarily attributable to noncontrolling shareholders in our Avanade Inc. subsidiary.

Net income attributable to noncontrolling interests for fiscal 2012 was \$271 million, a decrease of \$4 million, or 2%, from fiscal 2011. The decrease was due to a reduction in the Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares average noncontrolling ownership interest to 9% for fiscal 2012 from 10% for fiscal 2011, partially offset by an increase in Net income of \$272 million.

## Earnings Per Share

Diluted earnings per share were \$3.84 for fiscal 2012, compared with \$3.39 for fiscal 2011. The \$0.45 increase in our earnings per share was due to increases of \$0.40 from higher revenues and operating results and \$0.08 from lower weighted average shares outstanding. These increases were partially offset by decreases of \$0.02 from a higher effective tax rate and \$0.01 from lower non-operating income, compared with fiscal 2011. Diluted earnings per share amounts have been restated to reflect the impact of the issuance of additional restricted share units to holders of restricted share units in connection with the fiscal 2012 payment of cash dividends. This restatement resulted in a one cent decrease in diluted earnings per share from \$3.40 to \$3.39 for fiscal 2011. For information regarding our earnings per share calculations, see Note 2 (Earnings Per Share) to our Consolidated Financial Statements under Item 8, “Financial Statements and Supplementary Data.”

## Liquidity and Capital Resources

Our primary sources of liquidity are cash flows from operations, available cash reserves and debt capacity available under various credit facilities. In addition, we could raise additional funds through public or private debt or equity financings. We may use our available or additional funds to, among other things:

• facilitate purchases, redemptions and exchanges of shares and pay dividends;

• acquire complementary businesses or technologies;

• take advantage of opportunities, including more rapid expansion; or

• develop new services and solutions.

As of August 31, 2013, cash and cash equivalents was \$5.6 billion, compared with \$6.6 billion as of August 31, 2012. Cash flows from operating, investing and financing activities, as reflected in our Consolidated Cash Flows Statements, are summarized in the following table:

	Fiscal			2013 to 2012
	2013	2012	2011	Change
	(in millions of U.S. dollars)			
Net cash provided by (used in):				
Operating activities	\$3,303	\$4,257	\$3,442	\$(954)
Investing activities	(1,156)	(535)	(703)	(621)
Financing activities	(3,066)	(2,559)	(2,122)	(507)
Effect of exchange rate changes on cash and cash equivalents	(90)	(223)	246	133
Net (decrease) increase in cash and cash equivalents	\$(1,009)	\$939	\$863	\$(1,948)

(1) Amounts in table may not total due to rounding.

Operating activities: The reduction in operating cash flow included the impact of a discretionary cash contribution of \$500 million made to our U.S. defined benefit pension plan during fiscal 2013, which had a net impact of \$350 million, after tax. The reduction in operating cash flow was also due to other changes in operating assets and liabilities, including an increase in net client balances (receivables from clients, current and non-current unbilled

services and deferred revenues), partially offset by higher net income.

Investing activities: The \$621 million increase in cash used was primarily due to increased spending on business acquisitions. For additional information, see Note 6 (Business Combinations and Goodwill) to our Consolidated Financial Statements under Item 8, "Financial Statements and Supplementary Data."

Table of Contents

Financing activities: The \$507 million increase in cash used was primarily due to an increase in the net purchases of ordinary shares and an increase in cash dividends paid. For additional information, see Note 13 (Material Transactions Affecting Shareholders' Equity) to our Consolidated Financial Statements under Item 8, "Financial Statements and Supplementary Data."

We believe that our available cash balances and the cash flows expected to be generated from operations will be sufficient to satisfy our current and planned working capital and investment needs for the next twelve months. We also believe that our longer-term working capital and other general corporate funding requirements will be satisfied through cash flows from operations and, to the extent necessary, from our borrowing facilities and future financial market activities.

**Borrowing Facilities**

As of August 31, 2013, we had the following borrowing facilities, including the issuance of letters of credit, to support general working capital purposes:

	Facility Amount	Borrowings Under Facilities
	(in millions of U.S. dollars)	
Syndicated loan facility (1)	\$1,000	\$—
Separate, uncommitted, unsecured multicurrency revolving credit facilities (2)	508	—
Local guaranteed and non-guaranteed lines of credit (3)	170	—
Total	\$1,678	\$—

(1) This facility, which matures on October 31, 2016, provides unsecured, revolving borrowing capacity for general working capital purposes, including the issuance of letters of credit. Financing is provided under this facility at the prime rate or at the London Interbank Offered Rate plus a spread. We continue to be in compliance with relevant covenant terms. The facility is subject to annual commitment fees. As of August 31, 2013 and 2012, we had no borrowings under the facility.

(2) We maintain separate, uncommitted and unsecured multicurrency revolving credit facilities. These facilities provide local-currency financing for the majority of our operations. Interest rate terms on the revolving facilities are at market rates prevailing in the relevant local markets. As of August 31, 2013 and 2012, we had no borrowings under these facilities.

(3) We also maintain local guaranteed and non-guaranteed lines of credit for those locations that cannot access our global facilities. As of August 31, 2013 and 2012, we had no borrowings under these various facilities.

Under the borrowing facilities described above, we had an aggregate of \$179 million and \$164 million of letters of credit outstanding as of August 31, 2013 and 2012, respectively. In addition, we had total outstanding debt of \$25.60 million and \$0.03 million as of August 31, 2013 and 2012, respectively.

Table of Contents

## Share Purchases and Redemptions

The Board of Directors of Accenture plc has authorized funding for our publicly announced open-market share purchase program for acquiring Accenture plc Class A ordinary shares and for purchases and redemptions of Accenture plc Class A ordinary shares, Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares held by our current and former members of Accenture Leadership and their permitted transferees. As of August 31, 2013, our aggregate available authorization was \$1,964 million for our publicly announced open-market share purchase and these other share purchase programs.

Our share purchase activity during fiscal 2013 was as follows:

	Accenture plc Class A Ordinary Shares		Accenture SCA Class I Common Shares and Accenture Canada Holdings Inc. Exchangeable Shares	
	Shares	Amount	Shares	Amount
	(in millions of U.S. dollars, except share amounts)			
Open-market share purchases (1)	26,547,155	\$1,997	—	\$ —
Other share purchase programs	—	—	3,062,148	218
Other purchases (2)	4,750,122	330	—	—
Total	31,297,277	\$2,326	3,062,148	\$ 218

We conduct a publicly announced, open-market share purchase program for Accenture plc Class A ordinary shares.

(1) These shares are held as treasury shares by Accenture plc and may be utilized to provide for select employee benefits, such as equity awards to our employees.

During fiscal 2013, as authorized under our various employee equity share plans, we acquired Accenture plc

Class A ordinary shares primarily via share withholding for payroll tax obligations due from employees and former (2) employees in connection with the delivery of Accenture plc Class A ordinary shares under those plans. These purchases of shares in connection with employee share plans do not affect our aggregate available authorization for our publicly announced open-market share purchase and the other share purchase programs.

(3) Amounts in table may not total due to rounding.

We intend to continue to use a significant portion of cash generated from operations for share repurchases during fiscal 2014. The number of shares ultimately repurchased under our open-market share purchase program may vary depending on numerous factors, including, without limitation, share price and other market conditions, our ongoing capital allocation planning, the levels of cash and debt balances, other demands for cash, such as acquisition activity, general economic and/or business conditions, and board and management discretion. Additionally, as these factors may change over the course of the year, the amount of share repurchase activity during any particular period cannot be predicted and may fluctuate from time to time. Share repurchases may be made from time to time through open-market purchases, in respect of purchases and redemptions of Accenture SCA Class I common shares and Accenture Canada Holdings Inc. exchangeable shares, through the use of Rule 10b5-1 plans and/or by other means. The repurchase program may be accelerated, suspended, delayed or discontinued at any time, without notice.

## Other Share Redemptions

During fiscal 2013, we issued 11,019,187 Accenture plc Class A ordinary shares upon redemptions of an equivalent number of Accenture SCA Class I common shares pursuant to our registration statement on Form S-3 (the “registration statement”). The registration statement allows us, at our option, to issue freely tradable Accenture plc Class A ordinary shares in lieu of cash upon redemptions of Accenture SCA Class I common shares held by current and former members of Accenture Leadership and their permitted transferees.

## Subsequent Developments

On September 25, 2013, the Board of Directors of Accenture plc declared a semi-annual cash dividend of \$0.93 per share on our Class A ordinary shares for shareholders of record at the close of business on October 11, 2013.

Accenture plc will cause Accenture SCA to declare a semi-annual cash dividend of \$0.93 per share on its Class I common shares for shareholders of record at the close of business on October 8, 2013. Both dividends are payable on November 15, 2013.

On September 25, 2013, the Board of Directors of Accenture plc approved \$5.0 billion in additional share repurchase authority bringing Accenture's total outstanding authority to approximately \$6.96 billion.

Table of Contents

## Obligations and Commitments

As of August 31, 2013, we had the following obligations and commitments to make future payments under contracts, contractual obligations and commercial commitments:

Contractual Cash Obligations (1)	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(in millions of U.S. dollars)				
Long-term debt	\$32	\$—	\$2	\$6	\$25
Operating leases	2,160	455	649	383	675
Retirement obligations (2)	111	12	23	23	54
Purchase obligations and other commitments (3)	231	171	53	5	2
Total	\$2,534	\$637	\$726	\$416	\$755

The liability related to unrecognized tax benefits has been excluded from the contractual obligations table because a reasonable estimate of the timing and amount of cash out flows from future tax settlements cannot be determined. (1) For additional information, refer to Note 9 (Income Taxes) to our Consolidated Financial Statements under Item 8, "Financial Statements and Supplementary Data."

Amounts represent projected payments under certain unfunded retirement plans for former pre-incorporation (2) partners. Given these plans are unfunded, we pay these benefits directly. These plans were eliminated for active partners after May 15, 2001.

Other commitments include, among other things, information technology, software support and maintenance (3) obligations, as well as other obligations in the ordinary course of business that we cannot cancel or where we would be required to pay a termination fee in the event of cancellation. Amounts shown do not include recourse that we may have to recover termination fees or penalties from clients.

(4) Amounts in table may not total due to rounding.

## Off-Balance Sheet Arrangements

In the normal course of business and in conjunction with some client engagements, we have entered into contractual arrangements through which we may be obligated to indemnify clients with respect to certain matters. These arrangements with clients can include provisions whereby we have joint and several liability in relation to the performance of certain contractual obligations along with third parties also providing services and products for a specific project. In addition, our consulting arrangements may include warranty provisions that our solutions will substantially operate in accordance with the applicable system requirements. Indemnification provisions are also included in arrangements under which we agree to hold the indemnified party harmless with respect to third party claims related to such matters as title to assets sold or licensed or certain intellectual property rights.

Typically, we have contractual recourse against third parties for certain payments made by us in connection with arrangements where third party nonperformance has given rise to the client's claim. Payments by us under any of the arrangements described above are generally conditioned on the client making a claim which may be disputed by us typically under dispute resolution procedures specified in the particular arrangement. The limitations of liability under these arrangements may be expressly limited or may not be expressly specified in terms of time and/or amount.

For arrangements with unspecified limitations, we cannot reasonably estimate the aggregate maximum potential liability, as it is inherently difficult to predict the maximum potential amount of such payments, due to the conditional nature and unique facts of each particular arrangement.

To date, we have not been required to make any significant payment under any of the arrangements described above. For further discussion of these transactions, see Note 15 (Commitments and Contingencies) to our Consolidated Financial Statements under Item 8, "Financial Statements and Supplementary Data."

Table of Contents

## Recently Adopted Accounting Pronouncements

In August 2013, we early adopted guidance issued by the Financial Accounting Standards Board (“FASB”) which requires enhanced disclosures in the notes to the consolidated financial statements to present separately, by item, reclassifications out of accumulated other comprehensive income (loss). The early adoption of this guidance did not have a material impact on our Consolidated Financial Statements. For additional information related to the reclassifications out of accumulated other comprehensive income (loss), see Note 4 (Accumulated Other Comprehensive Loss) to our Consolidated Financial Statements under Item 8, “Financial Statements and Supplementary Data.”

In September 2012, we adopted guidance issued by the FASB which requires companies to present net income and other comprehensive income in either one continuous statement or in two separate but consecutive statements. The adoption of this guidance resulted in a change in the presentation of the components of comprehensive income, which are now presented in the Consolidated Statements of Comprehensive Income rather than in the Consolidated Shareholders’ Equity Statements, under Item 8, “Financial Statements and Supplementary Data.”

In September 2011, the FASB issued guidance on testing goodwill for impairment. The new guidance provides an entity the option to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If an entity determines that this is the case, it is required to perform the prescribed two-step goodwill impairment test to identify potential goodwill impairment and measure the amount of goodwill impairment to be recognized for that reporting unit (if any). If an entity determines that the fair value of a reporting unit is greater than its carrying amount, the two-step goodwill impairment test is not required. We adopted this new guidance for our fiscal 2013 annual goodwill impairment test. The adoption of this guidance did not have a material impact on our Consolidated Financial Statements under Item 8, “Financial Statements and Supplementary Data.”

## New Accounting Pronouncement

In December 2011, the FASB issued guidance requiring enhanced disclosures about certain financial instruments and derivative instruments that are offset in the Consolidated Balance Sheet or that are subject to enforceable master netting arrangements. The new guidance requires the disclosure of the gross amounts subject to rights of offset, amounts offset and the related net exposure. The new guidance will be effective for Accenture beginning in the first quarter of fiscal 2014, at which time we will include the required disclosures.

## ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

All of our market risk sensitive instruments were entered into for purposes other than trading.

## Foreign Currency Risk

We are exposed to foreign currency risk in the ordinary course of business. We hedge material cash flow exposures when feasible using forward contracts. These instruments are subject to fluctuations in foreign currency exchange rates and credit risk. Credit risk is managed through careful selection and ongoing evaluation of the financial institutions utilized as counterparties.

Certain of these hedge positions are undesignated hedges of balance sheet exposures such as intercompany loans and typically have maturities of less than one year. These hedges—primarily U.S. dollar/Euro, U.S. dollar/Indian rupee, U.S. dollar/Australian dollar, U.S. dollar/Singapore dollar, U.S. dollar/Japanese yen, U.S. dollar/Swiss franc, U.S. dollar/Philippine peso and U.S. dollar/Norwegian krone—are intended to offset remeasurement of the underlying assets and liabilities. Changes in the fair value of these derivatives are recorded in Other expense, net in the Consolidated Income Statement. Additionally, we have hedge positions that are designated cash flow hedges of certain intercompany charges relating to our Global Delivery Network. These hedges—U.S. dollar/Indian rupee, U.S. dollar/Philippine peso, U.K. pound/Indian rupee and Euro/Indian rupee, which typically have maturities not exceeding three years—are intended to partially offset the impact of foreign currency movements on future costs relating to resources supplied by our Global Delivery Network. For additional information, see Note 7 (Derivative Financial Instruments) to our Consolidated Financial Statements under Item 8, “Financial Statements and Supplementary Data.” For designated cash flow hedges, gains and losses currently recorded in Accumulated other comprehensive loss will be reclassified into earnings at the time when certain anticipated intercompany charges are accrued as Cost of services. As of August 31, 2013, it was anticipated that \$177 million of the net losses, net of tax currently recorded in

Accumulated other comprehensive loss will be reclassified into Cost of services within the next 12 months.

50

## Table of Contents

We use sensitivity analysis to determine the effects that market foreign currency exchange rate fluctuations may have on the fair value of our hedge portfolio. The sensitivity of the hedge portfolio is computed based on the market value of future cash flows as affected by changes in exchange rates. This sensitivity analysis represents the hypothetical changes in value of the hedge position and does not reflect the offsetting gain or loss on the underlying exposure. A 10% change in the levels of foreign currency exchange rates against the U.S. dollar (or other base currency of the hedge if not a U.S. dollar hedge) with all other variables held constant would have resulted in a change in the fair value of our hedge instruments of approximately \$309 million and \$402 million as of August 31, 2013 and 2012, respectively.

### Interest Rate Risk

The interest rate risk associated with our borrowing and investing activities as of August 31, 2013 is not material in relation to our consolidated financial position, results of operations or cash flows. While we may do so in the future, we have not used derivative financial instruments to alter the interest rate characteristics of our investment holdings or debt instruments.

### Equity Price Risk

The equity price risk associated with our marketable equity securities that are subject to market price volatility is not material in relation to our consolidated financial position, results of operations or cash flows.

## ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

See the Index to Consolidated Financial Statements and financial statements commencing on page F-1.

## ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

## ITEM 9A. CONTROLS AND PROCEDURES

### Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our principal executive officer and our principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this report. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Based on that evaluation, the principal executive officer and the principal financial officer of Accenture plc have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective at the reasonable assurance level.

### Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that:

- i. pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- ii. provide reasonable assurance that the transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of management and our Board of Directors; and
- iii. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate due to changes in conditions, or that the degree of compliance with the policies or procedures may

deteriorate.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework. Based on its evaluation, our management concluded that our internal control over financial reporting was effective as of the end of the fiscal year covered by this Annual Report on Form 10-K.

## PART III

## ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

There have been no material changes to the procedures by which security holders may recommend nominees to our Board of Directors from those described in the Proxy Statement for our Annual General Meeting of Shareholders filed with the SEC on December 17, 2012.

Information about our executive officers is contained in the discussion entitled “Executive Officers of the Registrant” in Part I of this Form 10-K. The remaining information called for by Item 10 will be included in the sections captioned “Board and Corporate Governance Matters—Director Biographies,” “Board and Corporate Governance Matters—Board Meetings and Committees,” “Board and Corporate Governance Matters—Audit Committee” and “Section 16(a) Beneficial Ownership Reporting Compliance” included in the definitive proxy statement relating to the 2014 Annual General Meeting of Shareholders of Accenture plc to be held on January 30, 2014 and is incorporated herein by reference. Accenture plc will file such definitive proxy statement with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company’s 2013 fiscal year covered by this Form 10-K.

ITEM 11. EXECUTIVE  
COMPENSATION

The information called for by Item 11 will be included in the sections captioned “Compensation of Executive Officers and Directors,” “Compensation Committee Interlocks and Insider Participation” and “Reports of the Committees of the Board—Compensation Committee Report” included in the definitive proxy statement relating to the 2014 Annual General Meeting of Shareholders of Accenture plc to be held on January 30, 2014 and is incorporated herein by reference.

Accenture plc will file such definitive proxy statement with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company’s 2013 fiscal year covered by this Form 10-K.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND  
RELATED SHAREHOLDER MATTERS

## Securities Authorized for Issuance under Equity Compensation Plans

The following table sets forth, as of August 31, 2013, certain information related to our compensation plans under which Accenture plc Class A ordinary shares may be issued.

Plan Category	Number of Shares to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted- Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Shares Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in 1st Column)
Equity compensation plans approved by shareholders:			
2001 Share Incentive Plan	12,515,653	(1) \$25.115	—
Amended and Restated 2010 Share Incentive Plan	24,428,576	(2) 42.699	37,517,583
2010 Employee Share Purchase Plan	—	N/A	21,570,401
Equity compensation plans not approved by shareholders	—	N/A	—
Total	36,944,229		59,087,984

- (1) Consists of 3,701,734 stock options with a weighted average exercise price of \$25.115 per share and 8,813,919 restricted share units.
- (2) Consists of 12,675 stock options with a weighted average exercise price of \$42.699 per share and 24,415,901 restricted share units.

The remaining information called for by Item 12 will be included in the sections captioned “Beneficial Ownership of Directors and Executive Officers” and “Beneficial Ownership of More Than Five Percent of Any Class of Voting Securities” included in the definitive proxy statement relating to the 2014 Annual General Meeting of Shareholders of Accenture plc to be held on January 30, 2014 and is incorporated herein by reference. Accenture plc will file such definitive proxy statement with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company’s 2013 fiscal year covered by this Form 10-K.

Table of Contents

**ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE**

The information called for by Item 13 will be included in the sections captioned “Board and Corporate Governance Matters—Director Independence” and “Board and Corporate Governance Matters—Certain Relationships and Related Person Transactions” included in the definitive proxy statement relating to the 2014 Annual General Meeting of Shareholders of Accenture plc to be held on January 30, 2014 and is incorporated herein by reference. Accenture plc will file such definitive proxy statement with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company’s 2013 fiscal year covered by this Form 10-K.

**ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES**

The information called for by Item 14 will be included in the sections captioned “Independent Auditor’s Fees” included in the definitive proxy statement relating to the 2014 Annual General Meeting of Shareholders of Accenture plc to be held on January 30, 2014 and is incorporated herein by reference. Accenture plc will file such definitive proxy statement with the SEC pursuant to Regulation 14A not later than 120 days after the end of the Company’s 2013 fiscal year covered by this Form 10-K.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Accenture plc:

We have audited the accompanying Consolidated Balance Sheets of Accenture plc and its subsidiaries as of August 31, 2013 and 2012, and the related Consolidated Income Statements, Consolidated Statements of Comprehensive Income, Consolidated Shareholders' Equity Statements, and Consolidated Cash Flows Statements for each of the years in the three-year period ended August 31, 2013. We also have audited Accenture plc's internal control over financial reporting as of August 31, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Accenture plc's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting (Item 9A(b)). Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Accenture plc and its subsidiaries as of August 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended August 31, 2013, in conformity with U.S. generally accepted accounting principles. Also in our opinion, Accenture plc maintained, in all material respects, effective internal control over financial reporting as of August 31, 2013, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.
