ý QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended June 29, 2014

OR

.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

Commission File No. 001-35603

CHUY'S HOLDINGS, INC.
(Exact name of registrant as specified in its charter)

DELAWARE (State of Incorporation or Organization)	20-5717694 (I.R.S. Employer Identification No.)
---	---

1623 TOOMEY ROAD AUSTIN, TEXAS (Address of Principal Executive Offices)	78704 (Zip Code)
---	---------------------

Registrant's Telephone Number, Including Area Code: (512) 473-2783

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (Check One):

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input checked="" type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

The number of shares of the registrant's common stock outstanding at August 1, 2014 was 16,435,687.

Notes to Unaudited Condensed Consolidated Financial Statements
(Tabular dollar amounts in thousands, except share and per share data)

1. BASIS OF PRESENTATION

Chuy's Holdings, Inc. (the "Company" or "Chuy's") is in the business of developing and operating Chuy's restaurants throughout the United States. Chuy's is a fast-growing, full-service restaurant concept offering a distinct menu of authentic, freshly-prepared Mexican and Tex Mex inspired food. As of June 29, 2014, the Company operated 54 restaurants in fourteen states.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements and the related notes reflect all adjustments, consisting only of normal recurring adjustments, necessary to present fairly the Company's financial position, results of operations and cash flows for the periods presented. The financial statements have been prepared in accordance with Generally Accepted Accounting Principles ("GAAP"), except that certain information and notes have been condensed or omitted pursuant to rules and regulations of the Securities and Exchange Commission (the "SEC"). Results for interim periods are not necessarily indicative of the results that may be expected for the full fiscal year. The unaudited condensed consolidated financial statements should be read in conjunction with consolidated financial statements and notes included in the Company's annual report on Form 10-K for the fiscal year ended December 29, 2013. The accompanying consolidated balance sheet as of December 29, 2013, has been derived from our audited consolidated financial statements.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for the period. Actual results could differ from those estimates.

Certain prior period amounts were reclassified to conform to the 2014 presentation. These reclassifications had no impact on net income or total stockholders' equity.

The Company operates on a 52- or 53- week fiscal year that ends on the last Sunday of the calendar year. Each quarterly period has 13 weeks, except for a 53-week year when the fourth quarter has 14 weeks. Our 2014 fiscal year will consist of 52 weeks and our 2013 fiscal year consisted of 52 weeks.

On January 30, 2013, a secondary offering of the Company's common stock was completed by certain of the Company's existing stockholders. The selling stockholders sold 5,175,000 previously outstanding shares, including 675,000 shares sold pursuant to the full exercise of the underwriters' option to purchase additional shares.

On April 17, 2013, a secondary offering of the Company's common stock was completed by certain of the Company's existing stockholders. The selling stockholders sold 3,000,000 previously outstanding shares. In addition, the underwriters exercised their option to purchase an additional 257,113 shares of common stock from the selling stockholders.

The Company did not receive any proceeds from these two offerings. The selling stockholders paid all of the underwriting discounts and commissions associated with the sale of the shares; however, the Company incurred approximately \$1.2 million in costs and registration expenses related to the offerings, of which \$508,000 and \$925,000 was incurred during the thirteen and twenty-six weeks ended June 30, 2013, respectively.

2. RECENT ACCOUNTING PRONOUNCEMENTS

We reviewed all significant newly-issued accounting pronouncements and concluded that they either are not applicable to our operations or that no material effect is expected on our consolidated financial statements as a result of future adoption.

In May 2014, the Financial Accounting Standards Board ("FASB") issued ASU No. 2014-09, "Revenue from Contracts with Customers." The pronouncement was issued to clarify the principles for recognizing revenue and to develop a common revenue standard and disclosure requirements for U.S. GAAP and IFRS. The pronouncement is effective for reporting periods beginning after December 15, 2016. The adoption of ASU 2014-09 is not expected to have a significant impact on the Company's consolidated financial position or results of operations.

3. NET INCOME PER SHARE

The number of shares and net income per share data for all periods presented are based on the historical weighted-average shares of common stock outstanding.

Basic net income per share of the Company's common stock is computed by dividing net income available to common stockholders by the weighted-average number of shares of common stock outstanding for the period.

Diluted net income per share of the Company's common stock is computed on the basis of the weighted-average number of shares of common stock plus the effect of dilutive potential shares of common stock equivalents outstanding during the period using the treasury stock method for dilutive options and deferred shares (these deferred shares were granted under the Chuy's Holdings, Inc. 2012 Omnibus Equity Incentive Plan, and herein after will be referred to as "restricted stock units"). For the thirteen and twenty-

Table of Contents

six-week periods ended June 29, 2014, there were approximately 4,000 and 3,000 shares of common stock equivalents, respectively, that have been excluded from the calculation of diluted net income per share because their inclusion would have been anti-dilutive.

The computation of basic and diluted earnings per share is as follows:

	Thirteen Weeks Ended		Twenty-Six Weeks Ended	
	June 29, 2014	June 30, 2013	June 29, 2014	June 30, 2013
BASIC

Diluted net income per common share	\$0.21	\$0.19	\$0.36	\$0.35

4. STOCK-BASED COMPENSATION

The Company has outstanding awards under the 2006 Plan. The outstanding options vest 20% on each of the first five anniversaries of the date of grant and have a maximum term of 10 years. In connection with the IPO, the Company terminated the 2006 Plan, and no further awards will be granted under the 2006 Plan. The termination of the 2006 Plan did not affect awards outstanding under the 2006 Plan at the time of its termination and the terms of the 2006 Plan continue to govern those outstanding awards.

In connection with the IPO, the Company adopted the Chuy's Holdings, Inc. 2012 Omnibus Equity Incentive Plan (the "2012 Plan") which allows the Company's Board of Directors to grant stock options, restricted stock, restricted stock units and other equity-based awards to directors, officers, and key employees of the Company. The outstanding options vest 20% on each of the first five anniversaries of the date of grant and have a maximum term of 10 years. The outstanding restricted stock units vest 25% on each of the first four anniversaries of the date of grant. As of June 29, 2014, a total of 986,378 shares of common stock are reserved and remain available for issuance under the 2012 Plan. Stock-based compensation cost recognized in the accompanying consolidated income statements was \$197,000 and \$138,000 for the thirteen weeks ended June 29, 2014 and June 30, 2013 and \$399,000 and \$236,000 for the twenty-six weeks ended June 29, 2014 and June 30, 2013, respectively.

Stock Options

A summary of stock-based compensation activity related to stock options for the twenty-six weeks ended June 29, 2014 are as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding and expected to vest at December 29, 2013	729,874	\$ 11.45		
Granted	6,780	38.50		

Edgar Filing: CHUY'S HOLDINGS, INC. - Form 10-Q

Exercised	(50,004) 6.05		
Forfeited	(1,472) 24.36		
Outstanding and expected to vest at June 29, 2014	685,178	\$12.08	5.32	\$16,150
Exercisable at June 29, 2014	466,839	\$7.12	4.07	\$13,296

7

Table of Contents

The aggregate intrinsic value in the table above is obtained by subtracting the weighted average exercise price from the estimated fair value of the underlying common stock as of June 29, 2014 and multiplying this result by the related number of options outstanding and exercisable at June 29, 2014. The estimated fair value of the common stock as of June 29, 2014 used in the above calculation was \$35.60 per share, the closing price of the Company's common stock on June 27, 2014, the last trading day of the second quarter. The total intrinsic value of options exercised during the twenty-six weeks ended June 29, 2014 was \$1.7 million.

The weighted-average grant date fair value of options granted during the twenty-six weeks ended June 29, 2014 was \$13.44 per share, as estimated at the date of grant using the Black-Scholes pricing model with the following weighted-average assumptions:

Dividend yield	0	%
Expected volatility	37	%
Risk-free rate of return	1.56	%
Expected life (in years)	5	

The assumptions above represent management's best estimates, but these estimates involve inherent uncertainties and the application of management's judgment. The expected term of options granted is based on a representative peer group with similar employee groups and expected behavior. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury constant maturities rate in effect at the time of grant. The Company utilized a weighted rate for expected volatility based on a representative peer group within the industry.

There was approximately \$1.7 million of total unrecognized compensation costs related to options granted under the 2006 Plan and the 2012 Plan as of June 29, 2014. These costs will be recognized ratably through the year 2019. In the event of a change of control, approximately \$269,000 of the Company's unrecognized compensation costs would be immediately recognized.

Restricted Stock Units

A summary of stock-based compensation activity related to restricted stock units for the twenty-six weeks ended June 29, 2014 are as follows:

	Shares	Weighted Average Fair Value
Outstanding and expected to vest at December 29, 2013	—	\$—
Granted	86,717	40.47
Outstanding and expected to vest at June 29, 2014	86,717	\$40.47

The fair value of the restricted stock units is the quoted market value of our common stock on the date of grant. As of June 29, 2014, total unrecognized stock-based compensation expense related to non-vested restricted stock units was approximately \$3.2 million, which is expected to be recognized ratably over the next four years.

5. LONG-TERM DEBT**Revolving Credit Facility**

On November 30, 2012, the Company entered into a secured \$25 million revolving credit facility (the "Revolving Credit Facility") with Wells Fargo Bank, National Association, which replaced the Company's previous credit facility. As of June 29, 2014, the interest rate on our Revolving Credit Facility was 1.91%. The Revolving Credit Facility requires the Company to comply with a fixed charge coverage ratio, a lease adjusted leverage ratio and certain non-financial covenants. The Revolving Credit Facility also places certain restrictions on the payment of dividends and distributions. Under the Revolving Credit Facility, Chuy's may declare and make dividend payments so long as (i) no default or event of default has occurred and is continuing or would result therefrom and (ii) immediately after giving effect to any such dividend payment, on a pro forma basis, the lease adjusted leverage ratio is at least .50 less than the ratio required to be maintained at such time.

The obligations under the Company's long-term debt are secured by a first priority lien on substantially all of the Company's assets.

Table of Contents

6. ACCRUED LIABILITIES

The major classes of accrued liabilities at June 29, 2014 and December 29, 2013 are summarized as follows:

	June 29, 2014	December 29, 2013
Accrued compensation and related benefits	\$4,030	\$4,122
Other accruals	1,951	2,184
Sales and use tax	2,092	1,493
Deferred gift card revenue	805	1,095
Property tax	880	1,009
Total accrued liabilities	\$9,758	\$9,903

7. INCOME TAXES

The effective income tax rate for the twenty-six weeks ended June 29, 2014 and June 30, 2013 was 29.9% and 27.2%, respectively. The difference between the effective income tax rate and the statutory rate of 35% is mainly attributable to employment tax credits attributable to employment taxes paid on employee tips. However, the lower rate during the twenty-six weeks ended June 30, 2013, was primarily attributable to the favorable impact of a one time adjustment made for these incremental employment tax credits for the prior year as well as the previous open tax years, which resulted in a \$556,000 net favorable impact in net income during the twenty-six weeks ended June 30, 2013 which was partially offset by the unfavorable impact of the non-tax deductible secondary offering costs incurred during the same period .

Since the Company has net operating loss carry forwards, the net favorable tax benefit mentioned above primarily increased the general business credits deferred tax asset.

8. SUBSEQUENT EVENTS

Subsequent to June 29, 2014, the Company opened two new restaurants for a total of 56 restaurants, in fourteen states.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our unaudited condensed consolidated financial statements and accompanying notes. Unless otherwise specified, or the context otherwise requires, the references in this report to "our Company", "the Company", "us", "we" and "our" refer to Chuy's Holdings, Inc. together with its subsidiaries. The following discussion contains, in addition to historical information, forward-looking statements that include risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those set forth under the heading "Risk Factors" in our Annual Report on Form 10-K for the year ended December 29, 2013 (our "Annual Report").

Although we believe that the expectations reflected in the forward-looking statements are reasonable based on our current knowledge of our business and operations, we cannot guarantee future results, levels of activity, performance or achievements. We assume no obligation to provide revisions to any forward-looking statements should circumstances change, except as may be required by law.

The following discussion summarizes the significant factors affecting the consolidated operating results, financial condition, liquidity and cash flows of our company as of and for the periods presented below. The following discussion and analysis should be read in conjunction with our Annual Report and the unaudited condensed consolidated financial statements and the accompanying notes thereto included herein.

Overview

We are a fast-growing, full-service restaurant concept offering a distinct menu of authentic, freshly-prepared Mexican and Tex Mex inspired food. We were founded in Austin, Texas in 1982 by Mike Young and John Zapp, and as of June 29, 2014, we operated 54 Chuy's restaurants across fourteen states.

We are committed to providing value to our customers through offering generous portions of made-from-scratch, flavorful Mexican and Tex Mex inspired dishes. We also offer a full-service bar in all of our restaurants providing our customers a wide variety of beverage offerings. We believe the Chuy's culture is one of our most valuable assets, and we are committed to preserving and continually investing in our culture and our customers' restaurant experience. Our restaurants have a common décor, but we believe each location is unique in format, offering an "unchained" look and feel, as expressed by our motto "If you've seen one Chuy's, you've seen one Chuy's!" We believe our restaurants have an upbeat, funky, eclectic, somewhat irreverent atmosphere while still maintaining a family-friendly environment.

Our Growth Strategies and Outlook

Our growth is based primarily on the following strategies:

- Pursue new restaurant development;
- Deliver consistent same store sales through providing high-quality food and service; and
- Leverage our infrastructure.

As of June 29, 2014, we opened six restaurants year-to-date and opened two additional restaurant subsequent to June 29, 2014. We have an established presence in Texas, the Southeast and the Midwest, with restaurants in multiple large markets in these regions. Our growth plan over the next five years focuses on developing additional locations in our existing core markets, new core markets and in smaller markets surrounding each of those core markets.

Performance Indicators

We use the following performance indicators in evaluating our performance:

Number of Restaurant Openings. Number of restaurant openings reflects the number of restaurants opened during a particular fiscal period. For restaurant openings we incur pre-opening costs, which are defined below, before the restaurant opens. Typically new restaurants open with an initial start-up period of higher than normalized sales volumes, which decrease to a steady level approximately six to twelve months after opening. However, operating costs during this initial six to twelve month period are also higher than normal, resulting in restaurant operating margins that are generally lower during the start-up period of operation and increase to a steady level approximately nine to twelve months after opening.

Comparable Restaurant Sales. We consider a restaurant to be comparable in the first full quarter following the 18th month of operations. Changes in comparable restaurant sales reflect changes in sales for the comparable group of restaurants over a specified period of time. Changes in comparable sales reflect changes in customer count trends as well as changes in average check. Our comparable restaurant base consisted of 38 and 29 restaurants at June 29, 2014

and June 30, 2013, respectively.

10

Table of Contents

Average Check. Average check is calculated by dividing revenue by total entrées sold for a given time period. Average check reflects menu price increases as well as changes in menu mix. Our management team uses this indicator to analyze trends in customers' preferences, effectiveness of menu changes and price increases and per customer expenditures.

Average Weekly Customers. Average weekly customers is measured by the number of entrées sold per week. Our management team uses this metric to measure changes in customer traffic.

Average Unit Volume. Average unit volume consists of the average sales of our comparable restaurants over a certain period of time. This measure is calculated by dividing total comparable restaurant sales within a period of time by the total number of comparable restaurants within the relevant period. This indicator assists management in measuring changes in customer traffic, pricing and development of our brand.

Operating Margin. Operating margin represents income from operations as a percentage of our revenue. By monitoring and controlling our operating margins, we can gauge the overall profitability of our company.

The following table presents operating data for the periods indicated:

	Thirteen Weeks Ended		Twenty-Six Weeks Ended		
	June 29, 2014	June 30, 2013	June 29, 2014	June 30, 2013	
Total restaurants (at end of period)	54	44	54	44	
Total comparable restaurants (at end of period)	38	29	38	29	
Average sales per comparable restaurant (in thousands)	\$1,286	\$1,290	\$2,499	\$2,500	
Change in comparable restaurant sales	2.4	% 2.1	% 3.2	% 2.2	%
Average check	\$13.84	\$13.63	\$13.74	\$13.49	

Our Fiscal Year

We operate on a 52- or 53-week fiscal year that ends on the last Sunday of the calendar year. Each quarterly period has 13 weeks, except for a 53-week year when the fourth quarter has 14 weeks. Our 2013 fiscal year consisted of 52 weeks and our 2014 fiscal year will consist of 52 weeks.

Key Financial Definitions

Revenue. Revenue primarily consists of food and beverage sales and also includes sales of our t-shirts, sweatshirts and hats. Revenue is presented net of discounts associated with each sale. Revenue in a given period is directly influenced by the number of operating weeks in such period, the number of restaurants we operate and comparable restaurant sales growth.

Cost of Sales. Cost of sales consists primarily of food, beverage and merchandise related costs. The components of cost of sales are variable in nature, change with sales volume and are subject to increases or decreases based on fluctuations in commodity costs.

Labor Costs. Labor costs include restaurant management salaries, front- and back-of-house hourly wages and restaurant-level manager bonus expense, employee benefits and payroll taxes.

Operating Costs. Operating costs consist primarily of restaurant-related operating expenses, such as supplies, utilities, repairs and maintenance, travel cost, insurance, credit card fees, recruiting, delivery service and security. These costs generally increase with sales volume but decline as a percentage of revenue.

Occupancy Costs. Occupancy costs include rent charges, both fixed and variable, as well as common area maintenance costs, property insurance and taxes, the amortization of tenant allowances and the adjustment to straight-line rent. These costs are generally fixed but a portion may vary with an increase in sales when the lease contains percentage rent.

General and Administrative Expenses. General and administrative expenses include costs associated with corporate and administrative functions that support our operations, including senior and supervisory management and staff compensation (including stock-based compensation) and benefits, travel, legal and professional fees, information systems, corporate office rent and other related corporate costs.

Marketing. Marketing costs include costs associated with our local restaurant marketing programs, community service and sponsorship activities, our menus and other promotional activities.

Restaurant Pre-opening Costs. Restaurant pre-opening costs consist of costs incurred before opening a restaurant, including manager salaries, relocation costs, supplies, recruiting expenses, initial new market public relations costs, pre-opening activities, employee payroll and related training costs for new employees. Restaurant pre-opening costs also include rent recorded during the period between date of possession and the restaurant opening date.

Table of Contents

Depreciation and Amortization. Depreciation and amortization principally include depreciation on fixed assets, including equipment and leasehold improvements, and amortization of certain intangible assets for restaurants. Interest Expense. Interest expense consists primarily of interest on our outstanding indebtedness and the amortization of our debt issuance costs reduced by capitalized interest.

Results of Operations

Potential Fluctuations in Quarterly Results and Seasonality

Our quarterly operating results may fluctuate significantly as a result of a variety of factors, including the timing of new restaurant openings and related expenses, profitability of new restaurants, weather, increases or decreases in comparable restaurant sales, general economic conditions, consumer confidence in the economy, changes in consumer preferences, competitive factors, changes in food costs, changes in labor costs and rising gas prices. In the past, we have experienced significant variability in restaurant pre-opening costs from quarter to quarter primarily due to the timing of restaurant openings. We typically incur restaurant pre-opening costs in the five months preceding a new restaurant opening. In addition, our experience to date has been that labor and direct operating costs associated with a newly opened restaurant during the first several months of operation are often materially greater than what will be expected after that time, both in aggregate dollars and as a percentage of restaurant sales. Accordingly, the number and timing of new restaurant openings in any quarter has had, and is expected to continue to have, a significant impact on quarterly restaurant pre-opening costs, labor and direct operating costs.

Our business also is subject to fluctuations due to seasonality and adverse weather. The spring and summer months have traditionally had higher sales volume than other periods of the year. Holidays, severe winter weather, hurricanes, thunderstorms and similar conditions may impact restaurant unit volumes in some of the markets where we operate and may have a greater impact should they occur during our higher volume months. As a result of these and other factors, our financial results for any given quarter may not be indicative of the results that may be achieved for a full fiscal year.

Thirteen Weeks Ended June 29, 2014 Compared to Thirteen Weeks Ended June 30, 2013

The following table presents, for the periods indicated, the consolidated statement of operations (in thousands):

	Thirteen Weeks Ended							
	June 29, 2014	% of Revenue	June 30, 2013	% of Revenue	Change	% Change		
Revenue	\$63,284	100.0	% \$53,427	100.0	% \$9,857	18.4		%
Costs and expenses:								
Cost of sales	17,980	28.4	% 14,644	27.4	% 3,336	22.8		%
Labor	20,806	32.9	% 16,740	31.3	% 4,066	24.3		%
Operating	8,595	13.6	% 7,537	14.1	% 1,058	14.0		%
Occupancy	3,804	6.0	% 3,108	5.8	% 696	22.4		%
General and administrative	2,939	4.6	% 2,507	4.7	% 432	17.2		%

Income tax expense	1,468	2.4	% 1,621	3.0	% (153)	(9.4)		%
Net income	\$3,446	5.4	% \$3,160	5.9	% \$286	9.1		%

Revenue. Revenue increased \$9.9 million, or 18.4%, to \$63.3 million for the thirteen weeks ended June 29, 2014 from \$53.4 million for the comparable period in 2013. This increase was primarily driven by \$10.0 million in incremental revenue from an additional 129 operating weeks provided by 13 new restaurants opened during and subsequent to the thirteen weeks ended June 30, 2013 and increased revenue at our comparable restaurants. These increases were

partially offset by a decrease in revenue related to non-comparable restaurants that are not included in the incremental revenue discussed above. Revenue for these non-comparable restaurants is historically lower as the stores transition out of the 'honeymoon' period that follows a restaurant's initial opening.

Table of Contents

Comparable restaurant sales increased 2.4% for the thirteen weeks ended June 29, 2014 compared to the thirteen weeks ended June 30, 2013. The increase in comparable restaurant sales was driven primarily by a 1.5% increase in average check and a 0.9% increase in average weekly customers. Our revenue mix attributed to bar sales was 19.3% during the thirteen weeks ended June 29, 2014 compared to 19.6% during the comparable period in 2013.

Cost of Sales. Cost of sales as a percentage of revenue increased to 28.4% during the thirteen weeks ended June 29, 2014 from 27.4% during the comparable period in 2013, primarily as a result of higher beef, dairy and produce costs.

Labor Costs. Labor costs as a percentage of revenue increased to 32.9% during the thirteen weeks ended June 29, 2014 from 31.3% during the comparable period in 2013, primarily as a result of lower volumes on fixed labor and longer learning curves related to hourly labor at some of our newer locations.

Operating Costs. Operating costs as a percentage of revenue decreased to 13.6% during the thirteen weeks ended June 29, 2014 from 14.1% during the comparable period in 2013. The decrease in the current period was primarily caused by lower liquor taxes as a result of the impact of the new Texas liquor tax law, which went into effect on January 1, 2014 and a continued increase in the number of new store openings outside of Texas, which generally has lower liquor taxes than Texas, if any. This decrease was partially offset by an increase in utility costs as a percentage of revenue of approximately 20 basis points.

Occupancy Costs. Occupancy costs as a percentage of revenue increased to 6.0% during the thirteen weeks ended June 29, 2014 from 5.8% during the comparable period in 2013, primarily as a result of higher rent expense as a percentage of revenue at certain new restaurants as we expand into newer markets.

General and Administrative Expenses. General and administrative expenses increased \$0.4 million, or 17.2%, to \$2.9 million for the thirteen weeks ended June 29, 2014 from \$2.5 million during the comparable period in 2013. This increase was primarily driven by an increase in stock-based compensation and an increase in salary expense of \$0.2 million associated with our new long term incentive program and additional employees as we continue to strengthen our infrastructure for growth and higher legal and professional fees of \$0.2 million related to increased public company costs as well as smaller increases in other categories related to growth of \$0.2 million, partially offset by lower performance-based bonuses of \$0.2 million.

Secondary Offering Costs. During the thirteen weeks ended June 30, 2013 we incurred \$508,000 of offering expenses related to two secondary offerings of the Company's common stock that were completed in January 2013 and April 2013. All of the common stock sold in the offerings was sold by certain existing stockholders and as a result, the Company did not receive any proceeds from these offerings.

Marketing Costs. As a percentage of revenue, marketing costs remained flat at approximately 0.8%.

Restaurant Pre-opening Costs. Restaurant pre-opening costs increased \$0.2 million, or 24.3%, to \$1.3 million for the thirteen weeks ended June 29, 2014 from \$1.1 million during the comparable period in 2013. This increase is primarily due to the timing of the opening dates and stage of development for the restaurants in development and scheduled to open during the third quarter.

Depreciation and Amortization. Depreciation and amortization costs increased \$0.3 million to \$2.4 million during the thirteen weeks ended June 29, 2014 from \$2.1 million during the comparable period in 2013, primarily as the result of an increase in equipment and leasehold improvement costs associated with our new restaurants.

Interest Expense. Interest expense as a percentage of revenue remained flat at approximately 0.1%. Our average interest rate on outstanding borrowings during the thirteen weeks ended June 29, 2014 was 1.91% compared to 1.95% during the thirteen weeks ended June 30, 2013.

Income Tax Expense. For the thirteen weeks ended June 29, 2014 our effective tax rate decreased to 29.9% from 33.9% during the comparable period in 2013 primarily as a result of non-deductible secondary offering costs of \$508,000, which were expensed during thirteen weeks ended June 30, 2013 and treated as a discrete tax item. The effective tax rates differ from the statutory rate of 35.0% primarily due to the non-deductible secondary offering costs offset by normal recurring tax credits attributable to employment taxes paid on employee tips.

Net Income. As a result of the foregoing, net income increased 9.1% to \$3.4 million during thirteen weeks ended June 29, 2014 from \$3.2 million during the comparable period in 2013.

Table of Contents

Twenty-Six Weeks Ended June 29, 2014 Compared to Twenty-Six Weeks Ended June 30, 2013

The following table presents, for the periods indicated, the consolidated statement of operations (in thousands):

	Twenty-Six Weeks Ended		June 30, 2013	% of Revenue	Change	% Change	
	June 29, 2014	% of Revenue					
Revenue	\$119,235	100.0	% \$100,125	100.0	% \$19,110	19.1	%
Costs and expenses:

Income tax expense	2,596	2.2	% 2,172	2.1	% 424	19.5	%
Net income	\$6,078	5.1	% \$5,801	5.8	% \$277	4.8	%

Revenue. Revenue increased \$19.1 million, or 19.1%, to \$119.2 million for the twenty-six weeks ended June 29, 2014, from \$100.1 million for the comparable period in 2013. This increase was primarily driven by \$18.6 million in incremental revenue from an additional 253 operating weeks provided by 15 new restaurants opened during and subsequent to the twenty-six weeks ended June 30, 2013 and increased revenue at our comparable restaurants. These increases were partially offset by a decrease in revenue related to non-comparable restaurants that are not included in the incremental revenue discussed above. Revenue for these non-comparable restaurants is historically lower as the stores transition out of the 'honeymoon' period that follows a restaurant's initial opening.

Comparable restaurant sales increased 3.2% for the twenty-six weeks ended June 29, 2014 compared to the twenty-six weeks ended June 30, 2013. The increase in comparable restaurant sales was driven primarily by a 1.7% increase in average check and a 1.5% increase in average weekly customers. Our revenue mix attributed to bar sales was 18.9% during the thirteen weeks ended June 29, 2014 compared to 19.1% during the comparable period in 2013.

Cost of Sales. Cost of sales as a percentage of revenue increased to 28.1% during the twenty-six weeks ended June 29, 2014 from 27.2% during the comparable period in 2013, primarily as a result of higher beef, dairy and produce costs. Labor Costs. Labor costs as a percentage of revenue increased to 33.1% during the twenty-six weeks ended June 29, 2014 from 31.7% during the comparable period in 2013 primarily as a result of lower volumes on fixed labor and longer learning curves related to hourly labor at some of our newer locations.

Operating Costs. Operating costs as a percentage of revenue decreased to 13.5% during the twenty-six weeks ended June 29, 2014 from 14.1% during the comparable period in 2013. The decrease in the current period was primarily caused by lower liquor taxes as a result of the impact of the new Texas liquor tax law, which went into effect on January 1, 2014 and a continued increase in the number of new store openings outside of Texas, which generally has lower liquor taxes than Texas, if any. This decrease was partially offset by an increase in utility costs as a percentage of revenue of approximately 30 basis points.

Occupancy Costs. Occupancy costs as a percentage of revenue increased to 6.2% in the twenty-six weeks ended June 29, 2014, from 6.0% during the comparable period in 2013, primarily as a result of higher rent expense as a percentage of revenue at certain new restaurants as we expand into newer markets.

General and Administrative Expenses. General and administrative expenses increased \$0.6 million, or 10.6%, to \$5.9 million for the twenty-six weeks ended June 29, 2014, as compared to \$5.3 million during the comparable period in

2013. This increase was primarily driven by an increase in stock-based compensation and salary expense of \$0.4 million associated with our new long-

14

Table of Contents

term incentive program and additional employees as we continue to strengthen our infrastructure for growth, higher legal and professional fees of \$0.3 million related to increased public company costs and smaller increases in other categories of \$0.3 million related to normal growth, partially offset by lower performance-based bonuses of \$0.4 million.

Secondary Offering Costs. During the twenty-six weeks ended June 30, 2013, we incurred \$925,000 of offering expenses related to two secondary offerings of the Company's common stock that were completed in January 2013 and April 2013. All of the common stock sold in the offerings was sold by certain existing stockholders, and as a result, the Company did not receive any proceeds from these offerings.

Marketing Costs. As a percentage of revenue, marketing costs remained flat at approximately 0.8%.

Restaurant Pre-opening Costs. Restaurant pre-opening costs increased \$0.4 million, or 21.7%, to \$2.4 million for the twenty-six weeks ended June 29, 2014 from \$2.0 million during the comparable period in 2013. This increase is primarily due to opening six restaurants during the twenty-six weeks ended June 29, 2014 compared to five restaurants opened during the comparable period in 2013, and due to the timing of the opening dates and stage of development for restaurants in development and scheduled to open during the third quarter.

Depreciation and Amortization. Depreciation and amortization costs increased \$0.7 million to \$4.8 million for the twenty-six weeks ended June 29, 2014 from \$4.1 million during the comparable period in 2013, primarily as the result of an increase in equipment and leasehold improvement costs associated with our new restaurants.

Interest Expense. Interest expense remained constant at approximately \$50,000 for the twenty-six weeks ended June 29, 2014, as compared to the twenty-six weeks ended June 30, 2013. Our interest rate on outstanding borrowings as of June 29, 2014 was 1.91% compared to 1.95% as of June 30, 2013.

Income Tax Expense. For the twenty-six weeks ended June 29, 2014, the effective tax rate increased to 29.9% from 27.2% for the comparable period in 2013. The increase in the effective income tax rate as compared to the comparable period in 2013 was primarily attributable to the favorable impact of a one time adjustment made for incremental employment tax credits for the prior year as well as the previous open tax years, which resulted in a \$556,000 net favorable impact in net income during the twenty-six weeks ended June 30, 2013. This net favorable impact during 2013 was partially offset by the unfavorable impact of the non-tax deductible secondary offering costs incurred during the same period. The impact on the effective income tax rate for these items was treated discretely in the twenty-six weeks ended June 30, 2013 as required by the Financial Accounting Standards Board's Accounting Standards Codification. Additionally, due to the Company's net operating loss carry forwards the net favorable tax benefit related to employment tax credits was added to the general business credits deferred tax asset and was not utilized to reduce taxes paid.

Net Income. As a result of the foregoing, net income increased \$0.3 million, to \$6.1 million for the twenty-six weeks ended June 29, 2014 from \$5.8 million during the comparable period in 2013.

Liquidity

Our principal sources of cash are net cash provided by operating activities, which includes tenant improvement allowances from our landlords, and borrowings under our \$25 million credit facility (the "Revolving Credit Facility"), which we entered into on November 30, 2012. Our need for capital resources is driven by our restaurant expansion plans, ongoing maintenance of our restaurants, investment in our corporate and information technology infrastructure, obligations under our operating leases and interest payments on our debt. Based on our current growth plans, we believe our expected cash flows from operations, expected tenant improvement allowances and available borrowings under our Revolving Credit Facility will be sufficient to finance our planned capital expenditures and other operating activities for at least the next twelve months.

Consistent with many other restaurant and retail chain store operations, we use operating lease arrangements for our restaurants. We believe that these operating lease arrangements provide appropriate leverage of our capital structure in a financially efficient manner. We have entered into operating leases with certain related parties with respect to six of our restaurants and our corporate headquarters as described on Amendment No. 2 to our Annual Report under the heading "Certain Relationships and Related Transactions, and Director Independence", which was filed on form 10-K/A with the Securities and Exchange Commission on April 28, 2014.

Our liquidity may be adversely affected by a number of factors, including a decrease in customer traffic or average check per customer due to changes in economic conditions.

15

Table of Contents

Cash Flows for Twenty-Six Weeks Ended June 29, 2014 and June 30, 2013

The following table summarizes the statement of cash flows for the twenty-six weeks ended June 29, 2014 and June 30, 2013 (in thousands):

	Twenty-Six Weeks Ended	
	June 29, 2014	June 30, 2013
Net cash provided by operating activities	\$ 14,436	\$ 11,178
Net cash used in investing activities	(17,659) (13,921
Net cash provided by financing activities	2,339	658
Net decrease in cash and cash equivalents	(884) (2,085
Cash and cash equivalents at beginning of year	5,323	5,855
Cash and cash equivalents at end of period	\$4,439	\$3,770

Operating Activities. Net cash provided by operating activities increased \$3.2 million to \$14.4 million for the twenty-six weeks ended June 29, 2014, from \$11.2 million during the comparable period in 2013. Our business is almost exclusively a cash business. Almost all of our receipts come in the form of cash and cash equivalents and a large majority of our expenditures are paid within a 30 day period. The increase in net cash provided by operating activities during the twenty-six weeks ended June 29, 2014 from the comparable period in 2013 was primarily due to an increase in accrued liabilities, deferred rent and accounts payable due to timing differences and increases in depreciation and amortization and deferred lease incentives received as a result of our continued expansion. These increases were partially offset by the excess tax benefit from stock-based compensation in 2014.

Investing Activities. Net cash used in investing activities increased \$3.8 million to \$17.7 million for the twenty-six weeks ended June 29, 2014, from \$13.9 million for the twenty-six weeks ended 2013. This increase was the result of the timing of our construction schedule and the related construction payments associated with the construction of our six new restaurants that opened during the twenty-six weeks ended June 29, 2014, as well as expenditures related to five additional unopened restaurants currently under construction as compared to five new restaurants opened and four additional restaurants under construction during the comparable period in 2013.

Financing Activities. Net cash provided by financing activities increased \$1.6 million to \$2.3 million for the twenty-six weeks ended June 29, 2014 from \$0.7 million during the comparable period in 2013. This increase was primarily the result of \$1.5 million in additional borrowing under our Revolving Credit facility (net of payments of \$1.5 million) during the twenty-six weeks ended June 29, 2014, compared to no net payments of \$0.5 million during the comparable period in 2013 and \$0.5 million in excess tax benefits from stock based compensation during the twenty-six weeks ended June 29, 2014. In addition, our proceeds from the exercise of stock options decreased by \$0.9 million to \$0.3 million during the twenty-six weeks ended June 29, 2014 from \$1.2 million during the comparable period in 2013.

As of June 29, 2014, we had no financing transactions, arrangements or other relationships with any unconsolidated affiliates or related parties. Additionally, we had no financing arrangements involving synthetic leases or trading activities involving commodity contracts.

Capital Resources

Long-Term Capital Requirements

Our capital requirements are primarily dependent upon the pace of our growth plan and resulting new restaurants. Our growth plan is dependent upon many factors, including economic conditions, real estate markets, restaurant locations and the nature of our lease agreements. Our capital expenditure outlays are also dependent on costs for maintenance and capacity additions in our existing restaurants as well as information technology and other general corporate capital expenditures.

The capital resources required for a new restaurant depend on whether the restaurant is a ground-up construction or a conversion. We estimate that each ground-up restaurant will require a total cash investment of \$1.7 million to \$2.5 million (net of estimated tenant improvement allowances of between zero and \$1.0 million). We estimate that each conversion will require a total cash investment of \$2.0 million to \$2.2 million. In addition to the cost of the conversion or ground-up buildout, we expect to spend approximately \$350,000 to \$400,000 per restaurant for restaurant

pre-opening costs. We target a cash-on-cash return beginning in the third operating year of 40.0%, and a sales to investment ratio of 2:1 for our new restaurants.

For 2014, we currently estimate capital expenditure outlays will range between \$27.5 million and \$30.0 million, net of agreed upon tenant improvement allowances and excluding approximately \$4.4 million of restaurant pre-opening costs for new restaurants that are not capitalized. We spent \$2.5 million on pre-opening costs during the twenty-six weeks ended June 29, 2014. These capital expenditure estimates are based on average new restaurant capital expenditures of \$2.4 million in 2014 (net of estimated

Table of Contents

tenant improvement allowances) each for the opening of 11 new restaurants as well as \$3.0 million to maintain and remodel our existing restaurants and for general corporate purposes.

Based on our growth plans, we believe our combined expected cash flows from operations, available borrowings under our Revolving Credit Facility and expected tenant improvement allowances will be sufficient to finance our planned capital expenditures and other operating activities in fiscal 2014.

Short-Term Capital Requirements

Our operations have not required significant working capital and, like many restaurant companies, we operate with negative working capital. Restaurant sales are primarily paid for in cash or by credit card, and restaurant operations do not require significant inventories or receivables. In addition, we receive trade credit for the purchase of food, beverages and supplies, therefore reducing the need for incremental working capital to support growth. We had a net working capital deficit of \$6.2 million at June 29, 2014, compared to a net working capital deficit of \$5.5 million at December 29, 2013.

Revolving Credit Facility

On November 30, 2012, the Company entered into a \$25.0 million Revolving Credit Facility with Wells Fargo Bank, National Association, which replaced the company's previous credit facility. As of June 29, 2014, we had borrowings under our Revolving Credit Facility of \$7.5 million, and the amount available for future borrowings was \$17.5 million. The Revolving Credit Facility (a) will mature on November 30, 2017, unless the Company exercises its option to voluntarily reduce all of the commitment before the maturity date, (b) accrues commitment fees on the daily unused balance of the facility at an applicable margin, which varies based on the Company's consolidated total lease adjusted leverage ratio and (c) provides for letters of credit in amounts totaling the lesser of \$5 million or the available borrowings under our Revolving Credit Facility.

Borrowings under the Revolving Credit Facility bear interest at a variable rate based upon the Company's election, of (i) the base rate (which is the highest of the prime rate, federal funds rate plus 0.50% or one month LIBOR) plus 1%, or (ii) LIBOR, plus, in either case, an applicable margin based on the Company's consolidated total lease adjusted leverage ratio. Interest is due at the end of each quarter if the Company selects to pay interest based on the base rate and at the end of each LIBOR period if it selects to pay interest based on LIBOR. The Company has elected a variable rate of interest based on LIBOR. As of June 29, 2014, this interest rate was 1.91%. The Revolving Credit Facility requires the Company to comply with a fixed charge coverage ratio, a lease adjusted leverage ratio and certain non-financial covenants. As of June 29, 2014, the Company was in compliance with all covenants under the Revolving Credit Facility. Based on our capital expenditure plans, contractual commitments and cash flow from operations, we expect to be able to comply with these covenants during the term of the agreement.

The obligations under the Company's long-term debt are secured by a first priority lien on substantially all of the Company's assets.

Contractual Obligations

There have been no material changes to our contractual obligations from what was previously reported in our Annual Report.

Off-Balance Sheet Arrangements

As of June 29, 2014, we had no off balance sheet arrangements or transactions.

Significant Accounting Policies

There have been no material changes to the significant accounting policies from what was previously reported in our Annual Report.

Recent Accounting Pronouncements

We reviewed all significant newly-issued accounting pronouncements and concluded that they either are not applicable to our operations or that no material effect is expected on our consolidated financial statements as a result of future adoption.

In May 2014, the Financial Accounting Standards Board ("FASB") issued ASU No. 2014-09, "Revenue from Contracts with Customers." The pronouncement was issued to clarify the principles for recognizing revenue and to develop a common revenue standard and disclosure requirements for U.S. GAAP and IFRS. The pronouncement is effective for reporting periods beginning after December 15, 2016. The adoption of ASU 2014-09 is not expected to have a

significant impact on the Company's consolidated financial position or results of operations.

Cautionary Statement Concerning Forward-Looking Statements

Forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause our actual results to differ materially from those indicated in these statements. We believe that these factors include, but are not limited to, the following:

17

Table of Contents

the success of our existing and new restaurants;

our ability to identify appropriate sites and develop and expand our operations;

changes in economic conditions;

damage to our reputation or lack of acceptance of our brand in existing or new markets;

economic and other trends and developments, including adverse weather conditions, in the local or regional areas in which our restaurants are located;

the impact of negative economic factors, including the availability of credit, on our landlords and surrounding tenants;

changes in food availability and costs;

labor shortages and increases in our labor costs, including as a result of changes in government regulation such as the adoption of the new federal healthcare legislation;

increased competition in the restaurant industry and the segments in which we compete;

the impact of legislation and regulations regarding nutritional information, and new information or attitudes regarding diet and health or adverse opinions about the health of consuming our menu offerings;

the impact of federal, state and local beer, liquor and food service regulations;

the impact of litigation;

the success of our marketing programs;

the impact of new restaurant openings, including on the effect on our existing restaurants of opening new restaurants in the same markets;

the loss of key members of our management team and the transition to new officers;

strain on our infrastructure and resources caused by our growth;

the inadequacy of our insurance coverage and fluctuating insurance requirements and costs;

the impact of our indebtedness on our ability to invest in the ongoing needs of our business;

our ability to obtain debt or other financing on favorable terms or at all;

the impact of a potential requirement to record asset impairment charges in the future;

the impact of security breaches of confidential customer information in connection with our electronic processing of credit and debit card transactions;

inadequate protection of our intellectual property;

the failure of our information technology system or the breach of our network security;

a major natural or man-made disaster;

our increased costs and obligations as a result of being a public company;

the impact of our election to take advantage of certain exemptions applicable to emerging growth companies;

the failure of our internal control over financial reporting;

the impact of federal, state and local tax rules;

volatility in the price of our common stock;

the impact of future sales of our common stock in the public market, and the exercise of stock options and any additional capital raised by us through the sale of our common stock;

the impact of a downgrade of our shares by securities analysts or industry analysts, the publication of negative research or reports, or lack of publication of reports about our business;

the effect of anti-takeover provisions in our charter documents and under Delaware law;

the effect of our decision to not pay dividends for the foreseeable future;

the effect of changes in accounting principles applicable to us; and

our ability to raise capital in the future.

Table of Contents

The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this report and in our Annual Report. If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. Any forward-looking statements you read in this report reflect our views as of the date of this report with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, growth strategy and liquidity. We assume no obligation to provide revisions to any forward looking statements should circumstances change, except as may be required by law.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

We are subject to interest rate risk in connection with our long-term indebtedness. Our principal interest rate exposure relates to loans outstanding under our Revolving Credit Facility. All outstanding indebtedness under our Revolving Credit Facility bears interest at a variable rate based on LIBOR. Each quarter point change in interest rates on the variable portion of indebtedness under our Revolving Credit Facility would result in a change of approximately \$19,000 to our interest expense on an annual basis.

Commodity Price Risk

We are exposed to market price fluctuation in food product prices. Given the historical volatility of certain of our food product prices, including produce, chicken, beef and cheese, these fluctuations can materially impact our food and beverage costs. While we have taken steps to enter into long term agreements for some of the commodities used in our restaurant operations, there can be no assurance that future supplies and costs for such commodities will not fluctuate due to weather and other market conditions outside of our control.

Consequently, such commodities can be subject to unforeseen supply and cost fluctuations. Dairy costs can also fluctuate due to government regulation. Because we typically set our menu prices in advance of our food product prices, we cannot immediately take into account changing costs of food items. To the extent that we are unable to pass the increased costs on to our customers through price increases, our results of operations would be adversely affected. We do not use financial instruments to hedge our risk to market price fluctuations in our food product prices at this time.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) as of the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report.

The design of any system of control is based upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated objectives under all future events, no matter how remote, or that the degree of compliance with the policies or procedures may not deteriorate. Because of its inherent limitations, disclosure controls and procedures may not prevent or detect all misstatements. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

Part II—Other Information

Item 1. Legal Proceedings

Occasionally, we are a party to various legal actions arising in the ordinary course of our business including claims resulting from “slip and fall” accidents, employment related claims and claims from customers or employees alleging illness, injury or other food quality, health or operational concerns. None of these types of litigation, most of which are covered by insurance, has had a material effect on us in the past. As of the date of this report, we are not a party to any material pending legal proceedings and are not aware of any claims that could have a materially adverse effect on our financial position, results of operations or cash flows.

Item 1A. Risk Factors

There have been no material changes from the risk factors previously disclosed in our Annual Report and our other recent filings with the Securities and Exchange Commission.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.

Item 6. Exhibits

See Exhibit Index following the signature page of this report.
