FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE QUARTERLY PERIOD ENDED JUNE 30, 2016

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

FOR THE TRANSITION PERIOD FROM TO

Commission File Number: 1-34392

PLUG POWER INC.

(Exact name of registrant as specified in its charter)

| Delaware | 22-3672377 |
| --- | --- |
| (State or Other Jurisdiction of Incorporation or Organization) | (I.R.S. Employer Identification Number) |

968 ALBANY SHAKER ROAD, LATHAM, NEW YORK 12110

(Address of Principal Executive Offices, including Zip Code)

(518) 782-7700

(Registrant’s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer,” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b 2 of the Exchange Act). Yes No

The number of shares of common stock, par value of $.01 per share, outstanding as of August 9, 2016 was 180,332,405.

Notes to Interim Consolidated Financial Statements (Unaudited)

1. Nature of Operations

Description of Business

Plug Power Inc., or the Company, is a leading provider of alternative energy technology focused on the design, development, commercialization and manufacture of hydrogen fuel cell systems used primarily for the material handling and stationary power market.

We are focused on proton exchange membrane, or PEM, fuel cell and fuel processing technologies, fuel cell/battery hybrid technologies, and associated hydrogen storage and dispensing infrastructure from which multiple products are available. A fuel cell is an electrochemical device that combines hydrogen and oxygen to produce electricity and heat without combustion. Hydrogen is derived from hydrocarbon fuels such as liquid petroleum gas, or LPG, natural gas, propane, methanol, ethanol, gasoline or biofuels. Plug Power develops complete hydrogen delivery, storage and refueling solutions for customer locations. Hydrogen can also be obtained from the electrolysis of water, or produced on-site at consumer locations through a process known as reformation. Currently the Company obtains hydrogen by purchasing it from fuel suppliers for resale to customers.

We provide and continue to develop fuel cell product solutions to replace lead-acid batteries in material handling vehicles and industrial trucks for some of the world's largest distribution and manufacturing businesses. We are focusing our efforts on material handling applications (forklifts) at multi-shift high volume manufacturing and high throughput distribution sites where our products and services provide a unique combination of productivity, flexibility and environmental benefits. Our current product line includes: GenDrive, our hydrogen fueled PEM fuel cell system providing power to material handling vehicles; GenFuel, our hydrogen fueling delivery system; GenCare, our ongoing maintenance program for both the GenDrive fuel cells and GenFuel products; GenSure (formerly ReliOn), our stationary fuel cell solution providing scalable, modular PEM fuel cell power to support the backup and grid-support power requirements of the telecommunications, transportation, and utility sectors; GenKey, our turn-key solution combining either GenDrive or GenSure with GenFuel and GenCare, offering complete simplicity to customers transitioning to fuel cell power; and GenFund, a collaboration with leasing organizations to provide cost efficient and seamless financing solutions to customers.

We provide our products worldwide, with a primary focus on North America, through our direct product sales force, and by leveraging relationships with original equipment manufacturers, or OEMs, and their dealer networks.

We were organized as a corporation in the State of Delaware on June 27, 1997.

Unless the context indicates otherwise, the terms "Company," "Plug Power," "we," "our" or "us" as used herein refers to Plug Power Inc. and its subsidiaries.

Liquidity

Our cash requirements relate primarily to working capital needed to operate and grow our business, including funding operating expenses, growth in inventory to support both shipments of new units and servicing the installed base, growth in equipment leased to customers under long-term arrangements, funding the growth in our GenKey “turn-key” solution, which includes the installation of our customer’s hydrogen infrastructure as well as delivery of the hydrogen fuel, continued development and expansion of our products, and the repayment or refinancing of our long-term debt. Our ability to achieve profitability and meet future liquidity needs and capital requirements will depend upon numerous factors, including the timing and quantity of product orders and shipments; attaining positive gross margins; the timing and amount of our operating expenses; the timing and costs of working capital needs; the timing and costs of building a sales base; the ability of our customers to obtain financing to support commercial transactions; our ability to obtain financing arrangements to support the sale or leasing of our products and services to customers, including financing arrangements to repay or refinance our long-term debt, and the terms of such agreements that may require us to pledge or restrict

Table of Contents

substantial amounts of our cash to support these financing arrangements; the timing and costs of developing marketing and distribution channels; the timing and costs of product service requirements; the timing and costs of hiring and training product staff; the extent to which our products gain market acceptance; the timing and costs of product development and introductions; the extent of our ongoing and new research and development programs; and changes in our strategy or our planned activities. If we are unable to fund our operations with positive cash flows and cannot obtain external financing, we may not be able to sustain future operations. As a result, we may be required to delay, reduce and/or cease our operations and/or seek bankruptcy protection.

We have experienced and continue to experience negative cash flows from operations and net losses. The Company incurred net losses attributable to common shareholders of $24.9 million for the six months ended June 30, 2016 and $55.8 million, $88.6 million and $62.8 million for the years ended December 31, 2015, 2014, and 2013, respectively, and has an accumulated deficit of $1.0 billion at June 30, 2016.

During the six months ended June 30, 2016, cash used in operating activities was $15.8 million, consisting primarily of a net loss attributable to the Company of $24.9 million, offset by the impact of noncash charges/gains of $2.7 million and net inflows from fluctuations in working capital and other assets and liabilities of $6.4 million. The changes in working capital primarily were related to collections of accounts receivable and managing of accounts payable offset by an investment in inventory procured to meet our backlog requirements, as well as increases in prepaid expenses and consumption against the accrual for loss contracts related to service. As of June 30, 2016, we had cash and cash equivalents of $66.0 million and net working capital of $77.8 million. By comparison, at December 31, 2015, we had cash and cash equivalents of $64.0 million and net working capital of $88.5 million. Additionally, a portion of the cash and cash equivalents on hand at June 30, 2016, is required to be maintained at all times under a covenant requirement associated with the Company’s secured term loan facility that requires a minimum unencumbered cash and cash equivalents balance equal to or greater than 75% of the outstanding principal balance plus accounts payable aged more than 150 days.

Net cash used in investing activities for the six months ended June 30, 2016 included purchases of property, plant and equipment and outflows associated with materials, labor, and overhead necessary to construct new leased property of $28.8 million. Cash outflows related to equipment that we sell and equipment we lease directly to customers are included in net cash used in operating activities and net cash used in investing activities, respectively. Net cash provided by financing activities for the six months ended June 30, 2016 primarily resulted from increases in finance obligations and borrowings against a long-term secured term loan facility, as described in Note 8. The secured term loan facility has events of default, including a material adverse change clause that is at the sole discretion of the lender.

Between 2014 and 2016, the Company signed sale/leaseback agreements with the Company’s primary financial institution (M&T Bank or the Bank) to facilitate the Company’s commercial transactions with key customers. The Company then leased the fuel cell systems and hydrogen infrastructure back from the Bank and operates them at customer locations to fulfill Power Purchase Agreements (PPAs). In connection with these operating leases, the Bank requires the Company to maintain cash balances in restricted accounts securing its lease obligations to the Bank. Cash added to these restricted accounts was $14.2 million during 2015. (No additional cash was added during the three and

six months ended June 30, 2016, other than interest earned on restricted cash balances.) Cash received from customers under the PPAs is used to make lease payments to the Bank. As the Company performs under these agreements, the required restricted cash balances are released, according to a set schedule. At June 30, 2016, the Company had 7 PPA deployments related to these sale/leaseback agreements. At June 30, 2016, the total remaining lease payments to the Bank under these agreements were $23.6 million and have been secured with restricted cash and pledged service escrows. Cash associated with sales of future revenues is required to be recorded as financing obligations on the consolidated balance sheets and accordingly represents a financing cash inflow.

The master lease agreement with the Bank requires the Company to maintain a minimum of $50.0 million of unrestricted cash, as of June 30, 2016 (subsequently reduced to $40 million as of July 27, 2016). As mentioned above, the Company's remaining contractual lease payments to the Bank are fully secured through a combination of restricted cash, unrestricted cash and pledges on funds escrowed for future service by the Company. The covenant is maintained in association with the residual exposure of the Bank, which stems from tax benefits taken by the Bank that could be recaptured should the underlying assets not be deployed for five years. This residual exposure at June 30, 2016 amounted to approximately $12.0 million, and the exposure decreases with the passage of time. In the event that the Company's

Table of Contents

unrestricted cash balance falls below the minimum threshold, the Company is entitled to cure the failure by providing additional restricted cash to secure the outstanding residual tax exposure of the Bank at that time.

In addition to the financing activities described above, we have historically funded our operations primarily through public and private offerings of common and preferred stock, as well as short-term borrowings, long-term debt and project financing, as described in Notes 7 and 8. The Company believes that its current working capital and cash anticipated to be generated from future operations, as well as various sources of capital from additional project financing platforms with various third parties that are currently being evaluated, will provide sufficient liquidity to fund operations for at least the next twelve months. This projection is based on our current expectations regarding new project financing and product sales and service, cost structure, cash burn rate and other operating assumptions.

2. Summary of Significant Accounting Policies

Principles of Consolidation

The accompanying unaudited interim consolidated financial statements include the financial statements of the Company and its wholly-owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Interim Financial Statements

The accompanying unaudited interim consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). In the opinion of management, all adjustments, which consist solely of normal recurring adjustments, necessary to present fairly, in accordance with U.S. generally accepted accounting principles (GAAP), the financial position, results of operations and cash flows for all periods presented, have been made. The results of operations for the interim periods presented are not necessarily indicative of the results that may be expected for the full year.

Certain information and footnote disclosures normally included in annual consolidated financial statements prepared in accordance with GAAP have been condensed or omitted. These unaudited interim consolidated financial statements should be read in conjunction with the Company’s audited consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K, filed for the fiscal year ended December 31, 2015.

The information presented in the accompanying consolidated balance sheet as of December 31, 2015 has been derived from the Company's December 31, 2015 audited consolidated financial statements. All other information has been derived from the unaudited interim consolidated financial statements of the Company.

Revenue Recognition

The Company recognizes revenue under arrangements for products and services, which may include the sale of products and related services, including revenue from installation, service and maintenance, spare parts, hydrogen fueling services (which may include hydrogen supply as well as hydrogen fueling infrastructure) and leased units. The Company also recognizes revenue under research and development contracts, which are primarily cost reimbursement contracts associated with the development of PEM fuel cell technology.

The Company enters into revenue arrangements that may contain a combination of fuel cell systems and infrastructure, installation, service, maintenance, spare parts, and other support services. Revenue arrangements containing fuel cell systems and related infrastructure may be sold, or provided to customers under a PPA.

Sales of and Services Performed on Fuel Cell Systems and Related Infrastructure

When sold to customers, the Company accounts for each separate deliverable of these multiple deliverable arrangements as a separate unit of accounting, if the delivered item or items have value to the customer on a standalone basis. The Company considers a deliverable to have standalone value if the item is sold separately by us or another entity

Table of Contents

or if the item could be resold by the customer. The Company allocates revenue to each separate deliverable based on its relative selling price. For a majority of our deliverables, the Company determines relative selling prices using its best estimate of the selling price since vendor-specific objective evidence and third-party evidence is generally not available for the deliverables involved in its revenue arrangements due to a lack of a competitive environment in selling fuel cell technology. When determining estimated selling prices, the Company considers the cost to produce the deliverable, a reasonable gross margin on that deliverable, the selling price and profit margin for similar products and services, the Company's ongoing pricing strategy and policies, the value of any enhancements that have been built into the deliverable and the characteristics of the varying markets in which the deliverable is sold, as applicable. The Company determines estimated selling prices for deliverables in its arrangements based on the specific facts and circumstances of each arrangement and analyzes the estimated selling prices used for its allocation of consideration of each arrangement.

Once relative selling prices are determined, the Company proportionately allocates the sale consideration to each element of the arrangement. The allocated sales consideration related to fuel cell systems and infrastructure, spare parts, and hydrogen infrastructure is recognized as revenue at shipment if title and risk of loss have passed to the customer, there is persuasive evidence of an arrangement, the sales price is fixed or determinable, collection of the related receivable is reasonably assured, and customer acceptance criteria, if any, have been successfully demonstrated. The allocated sales consideration related to service and maintenance is generally recognized as revenue on a straight-line basis over the term of the contract, as appropriate.

With respect to sales of consigned spare parts, the Company does not recognize revenue until the risks and rewards of ownership have transferred, the price is fixed, and the Company has a reasonable expectation of collection upon billing.

For those customers who do not purchase an extended maintenance contract, the Company does not include a right of return on its products other than rights related to standard warranty provisions that permit repair or replacement of defective goods. The Company accrues for anticipated standard warranty costs at the same time that revenue is recognized for the related product. Only a limited number of fuel cell units are under standard warranty.

In a vast majority of its commercial transactions, the Company sells extended maintenance contracts that generally provide for a five to ten year warranty from the date of product installation. These types of contracts are accounted for as a separate deliverable, and accordingly, revenue generated from these transactions is deferred and recognized in income over the warranty period, generally on a straight-line basis. Additionally, the Company may enter into annual service and extended maintenance contracts that are billed monthly. Revenue generated from these transactions is recognized in income on a straight-line basis over the term of the contract. Costs are recognized as incurred over the term of the contract. When costs are projected to exceed revenues on the life of the contract, an accrual for loss contracts is recorded. Costs are estimated based upon historical experience, contractual agreements and the estimated impact of the Company's cost reduction initiatives. The actual results may differ from these estimates.

Power Purchase Agreements

When fuel cell systems and related infrastructure are provided to customers through a PPA, revenues associated with these agreements are treated as rental income and recognized on a straight-line basis over the life of the agreements. In conjunction with entering into a PPA with a customer, the Company may enter into sale/leaseback transactions with third party financial institutions, whereby the fuel cells, related infrastructure, and service are sold to the third party financial institution and leased back to the Company through either an operating or capital lease.

During 2016, the Company's sale/leaseback transactions with third party financial institutions were required to be accounted for as capital leases under Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Subtopic 840-40, Leases – Sale/Leaseback Transactions (ASC Subtopic 840-40). As a result, no upfront revenue was recognized at the closing of these transactions and a finance obligation for each lease was established. The fuel cell systems and related infrastructure that are provided to customers through these PPAs are considered leased property on the accompanying unaudited interim consolidated balance sheet. Costs to service the leased property are considered cost of PPA revenue on the accompanying unaudited interim consolidated statement of operations.

Table of Contents

All PPAs entered into through December 31, 2015 had a corresponding sale-leaseback transaction with a third party financial institution which was required to be accounted for as an operating lease. The Company accounts for sale/leaseback transactions as operating leases in accordance with ASC Subtopic 840-40. The Company has rental expense associated with sale/leaseback agreements with financial institutions that were entered into commensurate with the PPAs. Rental expense is recognized on a straight-line basis over the life of the agreements and is characterized as cost of PPA revenue on the accompanying unaudited interim consolidated statement of operations.

Fuel Delivered to Customers

The Company purchases hydrogen fuel from suppliers and sells to its customers upon delivery. Revenue and cost of revenue related to this fuel is recorded as dispensed and delivered, respectively, and are included in the respective “Fuel delivered to customers” lines on the unaudited interim consolidated statements of operations.

Research and Development Contracts

Contract accounting is used for research and development contract revenue. The Company generally shares in the cost of these programs with cost sharing percentages ranging from 30% to 50% of total project costs. Revenue from time and material contracts is recognized on the basis of hours expended plus other reimbursable contract costs incurred during the period and is included within the “other” revenue line on the unaudited interim consolidated statement of operations. All allowable work performed through the end of each calendar quarter is billed, subject to limitations in the respective contracts. We expect to continue research and development contract work that is directly related to our current product development efforts.

Cash Equivalents

For purposes of the unaudited interim consolidated statements of cash flows, the Company considers all highly-liquid debt instruments with original maturities of three months or less to be cash equivalents. At June 30, 2016 and December 31, 2015, cash equivalents consist of money market accounts. The Company’s cash and cash equivalents are deposited with financial institutions primarily located in the U.S. and may at times exceed insured limits.

Common Stock Warrant Accounting

The Company accounts for common stock warrants in accordance with applicable accounting guidance provided in ASC Subtopic 815-40, Derivatives and Hedging – Contracts in Entity's Own Equity, as either derivative liabilities or as equity instruments depending on the specific terms of the warrant agreement. In compliance with applicable securities law, registered common stock warrants that require the issuance of registered shares upon exercise and do not sufficiently preclude an implied right to cash settlement are accounted for as derivative liabilities. We currently classify these derivative warrant liabilities on the accompanying unaudited interim consolidated balance sheets as a long-term liability, which is revalued at each balance sheet date subsequent to the initial issuance using the Black-Scholes pricing model. The Black-Scholes pricing model, which is based, in part, upon unobservable inputs for which there is little or no market data, requires the Company to develop its own assumptions. Changes in the fair value of the warrants are reflected in the accompanying unaudited interim consolidated statements of operations as change in fair value of common stock warrant liability.

Use of Estimates

The unaudited interim consolidated financial statements of the Company have been prepared in conformity with U.S. generally accepted accounting principles, which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the unaudited interim consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Table of Contents

Reclassifications

Reclassifications are made, whenever necessary, to prior period financial statements to conform to the current period presentation. These reclassifications did not have a net impact the results of operations or net cash flows in the periods presented.

Recent Accounting Pronouncements

In March 2016, an accounting update was issued to simplify various aspects related to how share-based payments are accounted for and presented. This accounting update is effective for annual periods beginning after December 15, 2016 and interim periods within those years. Early adoption is permitted in any interim or annual period, with any adjustments reflected as of the beginning of the fiscal year of adoption. The Company is evaluating the impact this update will have on the consolidated financial statements.

In February 2016, an accounting update was issued which requires balance sheet recognition for operating leases, among other changes to previous lease guidance. This accounting update is effective for fiscal years beginning after December 15, 2018. The Company is evaluating the impact this update will have on the consolidated financial statements.

In July 2015, an accounting update was issued that changes inventory measurement from lower of cost or market to lower of cost and net realizable value. The new standard applies to inventory measured at first-in, first-out (FIFO). This accounting update is effective for the annual reporting periods beginning after December 15, 2016, and interim periods within those years. The Company does not expect the adoption of this update to have a significant effect on the consolidated financial statements.

In August 2014, an accounting update was issued relating to how management assesses conditions and events that could raise substantial doubt about an entity’s ability to continue as a going concern. This accounting update is effective for reporting periods ending after December 15, 2016, and for annual and interim periods thereafter. The Company does not expect the adoption of this update to have a significant effect on the consolidated financial statements.

In June 2014, an accounting update was issued that replaces the existing revenue recognition framework regarding contracts with customers. In July 2015, the Financial Accounting Standards Board (FASB) announced a one year delay in the required adoption date from January 1, 2017 to January 1, 2018. The Company is evaluating the effect this update will have on the consolidated financial statements and has not yet selected a transition method.

3. Acquisition of HyPulsion

On July 24, 2015, the Company entered into a Share Purchase Agreement with Axane, pursuant to which on July 31, 2015, the Company (through a wholly-owned subsidiary) acquired Axane's 80% equity interest in HyPulsion for $11.5 million, payable in shares of its common stock. In connection with the aforementioned agreement, the Company initially issued 4,781,250 shares of its common stock at closing. On August 26, 2015, the Company subsequently issued an additional 1,613,289 shares of common stock pursuant to a post-closing true-up provision, which was liability classified contingent consideration.

The Company acquired all of the net assets of HyPulsion, with the excess of the purchase price over net assets attributed to goodwill. Goodwill associated with the acquisition represents expanded access to the European markets related to the sale of fuel cell technology for material handling equipment. Changes in goodwill between the acquisition date and June 30, 2016 are attributed to foreign currency translation, and to a lesser extent, changes to estimated fair values of acquired assets and liabilities upon completion of purchase accounting.

4. Earnings Per Share

For purposes of determining diluted earnings per share, when the Company is in a net loss position, all common stock equivalents would be considered to be anti-dilutive.

Table of Contents

The potential dilutive common shares are summarized as follows:

| | At June 30, 2016 | 2015 |
|---|---|---|
| Stock options outstanding (1) | 11,752,286 | 8,576,278 |
| Restricted stock outstanding | 204,444 | 395,558 |
| Common stock warrants (2) | 4,000,100 | 4,219,442 |
| Preferred stock (3) | 5,554,594 | 5,554,594 |
| Number of dilutive potential common shares | 21,511,424 | 18,745,872 |

(1) During the three months ended June 30, 2016 and 2015, the Company granted 265,000 and 440,000 stock options, respectively. During the six months ended June 30, 2016 and 2015, the Company granted 280,000 and 650,000 stock options, respectively.

(2) In May 2011, the Company issued 7,128,563 warrants as part of an underwritten public offering with an exercise price of $0.93 per warrant. As a result of additional public offerings, and pursuant to the effect of the anti-dilution provisions of these warrants, the number of warrants increased to 22,995,365. Of these warrants issued in May 2011, zero and 219,342 were unexercised as of June 30, 2016 and 2015, respectively. In February 2013, the Company issued 23,637,500 warrants as part of an underwritten public offering with an exercise price of $0.15 per warrant. Of these warrants issued in February 2013, 100 were unexercised as of June 30, 2016 and 2015. In January 2014, the Company issued 4,000,000 warrants as part of an underwritten public offering with an exercise price of $4.00 per warrant. Of these warrants issued in January 2014, none have been exercised as of June 30, 2016 and 2015. All warrants have anti-dilution provisions.

(3) The preferred stock amount represents the dilutive potential common shares of the Series C redeemable convertible preferred stock issued on May 16, 2013, based on the conversion price of the preferred stock as of June 30, 2016. Of the 10,431 preferred shares issued in May 2013, 5,200 had been converted to common stock as of June 30, 2016.

5. Inventory

Inventory as of June 30, 2016 and December 31, 2015 consists of the following (in thousands):

| | June 30, 2016 | December 31, 2015 |
|---|---|---|
| Raw materials and supplies | $ 29,128 | $ 23,705 |

| | | |
|---|---|---|
| Work-in-process | 2,568 | 5,567 |
| Finished goods | 3,232 | 3,480 |
| | $ 34,928 | $ 32,752 |

6. Leased Property

Leased property at June 30, 2016 and December 31, 2015 consists of the following (in thousands):

| | June 30, 2016 | December 31, 2015 |
|---|---|---|
| Leased property under capital lease | $ 29,598 | $ 3,367 |
| Less: accumulated depreciation | (2,351) | (1,700) |
| Leased property under capital lease, net | $ 27,247 | $ 1,667 |

7. Short-Term Borrowing

On March 2, 2016, the Company entered into a Loan Agreement with Generate Lending, LLC (Lender). The Loan Agreement, among other things, provided for a $30 million secured term loan facility (the Short-Term Loan Facility). Advances under the Short-Term Loan Facility bore interest at the rate of 12.0% per annum. The term of the Loan Agreement was one year, ending March 2, 2017. Pursuant to the Loan Agreement, $25.0 million of the Short-Term Loan

Table of Contents

Facility was drawn upon and outstanding as of March 31, 2016.

On June 27, 2016, the Short-Term Loan Facility was paid off with proceeds from long-term project financing. That financing was accounted for as a series of capital leases, the obligation of which is now presented as part of finance obligations on the accompanying unaudited interim consolidated balance sheet, as discussed in Note 12.

8. Long-Term Debt

During the three months ended June 30, 2016, Plug Power Inc. and its subsidiaries Emerging Power Inc. and Emergent Power Inc. entered into a Loan and Security Agreement with Hercules Capital, Inc. (Hercules) pursuant to which Hercules agreed to make available to the Company a secured term loan facility in the amount of up to $40.0 million (the Term Loan Facility), subject to certain terms and conditions. The Company borrowed $25.0 million under the Loan and Security Agreement on the date of closing, and incurred transaction costs of $1.1 million. The Company may borrow an additional $5.0 million under the Loan and Security Agreement between October 12, 2016 and December 12, 2016 subject to the Company satisfying certain conditions. The Company may also borrow an additional $10.0 million under the Loan and Security Agreement after June 27, 2016 and until June 27, 2017 subject to satisfying certain other conditions.

Advances under the Term Loan Facility bear interest at the rate of 10.45% per annum, subject to compliance with financial covenants and other conditions. The Loan and Security Agreement includes covenants, limitations, and events of default customary for similar facilities. The term of the Loan and Security Agreement is three years, ending June 27, 2019 (the Maturity Date).

Interest is payable on a monthly basis and the entire then outstanding principal balance of the Term Loan Facility, together with all accrued and unpaid interest, is due and payable on the Maturity Date. On the earliest to occur of the Maturity Date, the date on which the obligations under the Loan and Security Agreement are paid and the date on which such obligations become due and payable, the Company is also required to pay the Lender an end of term charge $2.5 million, based on the amount borrowed.

Until such time as certain net income milestones are met, the Loan and Security Agreement has financial covenants that require the Company to maintain at all times minimum unencumbered cash and cash equivalents equal to or greater than 75% of the then outstanding principal balance of the Term Loan Facility plus accounts payable aged more than 150 days. After such net income milestones are met, the Loan and Security Agreement’s financial covenants are reduced to require minimum unencumbered cash and cash equivalents equal to or greater than 50% of the then outstanding principal balance of the Term Loan Facility plus accounts payable aged more than 150 days.

All obligations under the Loan and Security Agreement are unconditionally guaranteed by the Company's subsidiaries, Emerging Power Inc. and Emergent Power Inc. The Term Loan Facility is secured by substantially all of Plug Power Inc. and the guarantors' assets, including all intellectual property, all securities in domestic subsidiaries and 65% of the securities in foreign subsidiaries, subject to certain exceptions and exclusions.

The Loan and Security Agreement contains customary covenants for arrangements of this type and other covenants agreed to by the parties, including, among others, (i) the provision of annual and quarterly financial statements, management rights and insurance policies and (ii) restrictions on incurring debt, granting liens, making acquisitions, making loans, paying dividends, dissolving, and entering into leases and asset sales. The Loan and Security Agreement also provides for customary events of default, including, among others, payment, bankruptcy, covenant, representation and warranty, change of control, judgment and material adverse effect defaults.

The fair value of the Term Loan Facility approximates the carrying value of $23.9 million as of June 30, 2016.

Table of Contents

9. Accrual for Loss Contracts Related to Service

In 2015, the Company determined that its projected estimated service costs related to certain extended maintenance contracts exceeded future revenues and recorded a provision for loss contracts related to service. During the six months ended June 30, 2016, the Company renegotiated one of its service contracts. As a result, the projected costs over the remaining life of the amended contract were estimated to be reduced and the Company recognized a gain within cost of revenue where the original charge was recorded.

The following table summarizes activity related to the accrual for loss contracts related to service during the six months ended June 30, 2016 (in thousands):

| | |
|---|---|
| Beginning balance - January 1, 2016 | $ 10,050 |
| Change in estimate | (1,071) |
| Reductions for losses realized | (3,559) |
| Ending balance - June 30, 2016 | $ 5,420 |

10. Income Taxes

The deferred tax asset generated from our net operating loss has been offset by a full valuation allowance because it is more likely than not that the tax benefits of the net operating loss carry forward will not be realized. The Company also recognizes accrued interest and penalties related to unrecognized tax benefits as a component of income tax expense.

During the six months ended June 30, 2016, the Company released its liability for unrecognized tax benefits of $392 thousand, as the related statute of limitations has expired.

11. Fair Value Measurements

The Company's common stock warrant liability represents the only financial instrument measured at fair value on a recurring basis in the consolidated balance sheets. The fair value measurement is determined by using Level 3 inputs due to the lack of active and observable markets that can be used to price identical assets. Level 3 inputs are unobservable inputs and should be used to determine fair value only when observable inputs are not available. Unobservable inputs should be developed based on the best information available in the circumstances, which might include internally generated data and assumptions being used to price the asset or liability.

Fair value of the common stock warrant liability is based on the Black-Scholes pricing model which is based, in part, upon unobservable inputs for which there is little or no market data, requiring the Company to develop its own assumptions. The Company used the following assumptions for its common stock warrants:

| | June 30, 2016 | June 30, 2015 |
|---|---|---|
| Risk-free interest rate | 0.73 % - 0.86 % | 0.28 % - 1.375 % |
| Volatility | 59.50 % - 95.23 % | 52.92 % - 134.4 % |
| Expected average term | 1.64 - 2.55 | 0.92 - 3.55 |

There was no expected dividend yield for the warrants granted. If factors change and different assumptions are used, the warrant liability and the change in estimated fair value could be materially different. Generally, as the market price of our common stock increases, the fair value of the warrant increases, and conversely, as the market price of our common stock decreases, the fair value of the warrant decreases. Also, a significant increase in the volatility of the market price of the Company's common stock, in isolation, would result in a significantly higher fair value measurement; and a significant decrease in volatility would result in a significantly lower fair value measurement.

Table of Contents

The following table shows reconciliations of the beginning and ending balances for the common stock warrant liability (in thousands):

| | Six months ended | |
|---|---|---|
| | June 30, | June 30, |
| Common stock warrant liability | 2016 | 2015 |
| Beginning of period | $ 5,735 | $ 9,418 |
| Change in fair value of common stock warrants | (2,734) | (2,436) |
| Exercise of common stock warrants | (141) | — |
| End of period | $ 2,860 | $ 6,982 |

12. Commitments and Contingencies

Operating Leases

As of June 30, 2016 and December 31, 2015, the Company has several non-cancelable operating leases (as lessor and as lessee), primarily associated with sale/leaseback transactions that are partially secured by restricted cash (see also Note 1) as summarized below. These leases expire over the next six years. Minimum rent payments under operating leases are recognized on a straight line basis over the term of the lease. Leases where the Company is the lessor contain termination clauses with associated penalties, the amount of which cause the likelihood of cancelation to be remote.

Future minimum lease payments under non-cancelable operating leases (with initial or remaining lease terms in excess of one year) as of June 30, 2016 are (in thousands):

| | As Lessor | As Lessee |
|---|---|---|
| Remainder of 2016 | $ 7,304 | $ 8,597 |
| 2017 | 14,608 | 25,383 |
| 2018 | 14,608 | 20,717 |
| 2019 | 14,608 | 13,697 |
| 2020 | 13,452 | 12,563 |
| Thereafter | 10,479 | 10,239 |
| Total future minimum lease payments | $ 75,059 | $ 91,196 |

Rental expense for all operating leases was $6.4 million and $2.2 million for six months ended June 30, 2016 and 2015, respectively. Rental expense for all operating leases was $3.4 million and $1.3 million for three months ended June 30, 2016 and 2015, respectively.

At June 30, 2016 and December 31, 2015, prepaid rent and security deposits associated with sale/leaseback transactions were $11.8 million and $12.1 million, respectively, and are included in other current and noncurrent assets on the consolidated balance sheets.

Finance Obligations

During the six months ended June 30, 2016, the Company entered into sale/leaseback transactions, which were accounted for as capital leases. These transactions represented project financing as referenced in Note 7. The outstanding balance of the finance obligation at June 30, 2016 was $24.0 million. The fair value of the finance obligation approximates the carrying value as of June 30, 2016.

Table of Contents

Future minimum lease payments under non-cancelable capital leases (with initial or remaining lease terms in excess of one year) as of June 30, 2016 are (in thousands):

| | |
|---|---|
| Remainder of 2016 | $ 364 |
| 2017 | 9,425 |
| 2018 | 6,743 |
| 2019 | 1,662 |
| 2020 | 2,118 |
| Thereafter | 3,682 |
| Total future minimum lease payments | $ 23,994 |

During the year ended December 31, 2015, the Company received cash for future services to be performed associated with certain sale/leaseback transactions and recorded the balance as a finance obligation. The outstanding balance of this obligation at June 30, 2016 and December 31, 2015 is $14.0 million and $15.1 million, respectively. The amount is amortized using the effective interest method.

In 2013, the Company completed a sale-leaseback transaction of its property in Latham, New York, for an aggregate sale price of $4.5 million. Although the property was sold and the Company has no legal ownership of the facility, the Company was prohibited from recording the transaction as a sale because of continuing involvement with the property. Accordingly, the sale has been accounted for as a financing transaction, which requires the Company to continue reporting the building as an asset and to record a financing obligation for the sale price. Liabilities relating to this agreement of $2.4 million and $2.5 million have been recorded as a finance obligation, in the accompanying unaudited interim consolidated balance sheets as of June 30, 2016 and December 31, 2015, respectively.

Restricted Cash

The Company has entered into sale/leaseback agreements associated with its products and services. In connection with these agreements, cash of $46.9 million is required to be restricted as security and will be released over the lease term. Included in the $46.9 million are security deposits backing letters of credit, as disclosed in the Operating Leases section above.

The Company also has letters of credit in the aggregate amount of $1.0 million associated with an agreement to provide hydrogen infrastructure and hydrogen to a customer at its distribution center and with a finance obligation from the sale/leaseback of its building. Cash collateralizing these letters of credit is also considered restricted cash.

Litigation

Legal matters are defended and handled in the ordinary course of business. The Company has established accruals for matters for which management considers a loss to be probable and reasonably estimable. It is the opinion of management that facts known at the present time do not indicate that such litigation, after taking into account insurance coverage and the aforementioned accruals, will have a material adverse impact on our results of operations, financial position, or cash flows.

Concentrations of credit risk

Concentrations of credit risk with respect to receivables exist due to the limited number of select customers with whom the Company has initial commercial sales arrangements. To mitigate credit risk, the Company performs appropriate evaluation of a prospective customer's financial condition.

At June 30, 2016, three customers comprise approximately 50.8% of the total accounts receivable balance, with each customer individually representing 20.6%, 17.8% and 12.4% of total accounts receivable, respectively. At December 31, 2015, two customers comprise approximately 50.9% of the total accounts receivable balance, with each customer individually representing 38.5% and 12.4% of total accounts receivable, respectively.

Table of Contents

For the six months ended June 30, 2016, 49.4% of total consolidated revenues were associated with Walmart and one other customer, with each representing 38.6% and 10.8% of total consolidated revenues, respectively. For the six months ended June 30, 2015, 95.1% of total consolidated revenues were associated with Walmart and two other customers, with each representing 68.8%, 16.1%, and 10.2% of total consolidated revenues, respectively.

Item 2 — Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our accompanying unaudited interim consolidated financial statements and notes thereto included within this report, and our audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K, filed for the fiscal year ended December 31, 2015. In addition to historical information, this Form 10-Q and the following discussion contain statements that are not historical facts and are considered forward-looking within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. These forward-looking statements contain projections of our future results of operations or of our financial position or state other forward-looking information. In some cases you can identify these statements by forward-looking words such as "anticipate," "believe," "could," "continue," "estimate," "expect," "intend," "may," "should," "will," "would," "plan," "projected" or the negative of such words or other similar words or phrases. We believe that it is important to communicate our future expectations to our investors. However, there may be events in the future that we are not able to accurately predict or control and that may cause our actual results to differ materially from the expectations we describe in our forward-looking statements. Investors are cautioned not to unduly rely on forward-looking statements because they involve risks and uncertainties, and actual results may differ materially from those discussed as a result of various factors, including, but not limited to: the risk that we continue to incur losses and might never achieve or maintain profitability; the risk that we will need to raise additional capital to fund our operations and such capital may not be available to us; the risk that our lack of extensive experience in manufacturing and marketing products may impact our ability to manufacture and market products on a profitable and large-scale commercial basis; the risk that unit orders will not ship, be installed and/or converted to revenue, in whole or in part; the risk that a loss of one or more of our major customers could result in a material adverse effect on our financial condition; the risk that a sale of a significant number of shares of stock could depress the market price of our common stock; the risk that negative publicity related to our business or stock could result in a negative impact on our stock value and profitability; the risk of potential losses related to any product liability claims or contract disputes; the risk of loss related to an inability to maintain an effective system of internal controls; our ability to attract and maintain key personnel; the risks related to the use of flammable fuels in our products; the risk that pending orders may not convert to purchase orders, in whole or in part; the cost and timing of developing, marketing and selling our products and our ability to raise the necessary capital to fund such costs; our ability to obtain financing arrangements to support the sale or leasing of our products and services to customers; the ability to achieve the forecasted gross margin on the sale of our products; the cost and availability of fuel and fueling infrastructures for our products; the risk of elimination of government subsidies and economic incentives for alternative energy products; market acceptance of our products and services, including GenDrive units; our ability to establish and maintain relationships with third parties with respect to product development, manufacturing, distribution and servicing and the supply of key product components; the cost and availability of components and parts for our products; our ability to develop commercially viable products; our ability to reduce product and manufacturing costs; our ability to successfully market, distribute and service our products and services internationally; our ability to improve system reliability for our products; competitive factors, such as price competition and competition from other traditional and alternative energy companies; our ability to protect our intellectual property; the cost of complying with current and future federal, state

and international governmental regulations; the risks associated with potential future acquisitions; the volatility of our stock price; and other risks and uncertainties discussed under Item IA—Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015, as filed March 14, 2016. Readers should not place undue reliance on our forward-looking statements. These forward-looking statements speak only as of the date on which the statements were made and are not guarantees of future performance. Except as may be required by applicable law, we do not undertake or intend to update any forward-looking statements after the date of this Form 10-Q.

Table of Contents

Overview

Plug Power Inc., or the Company, is a leading provider of alternative energy technology focused on the design, development, commercialization and manufacture of hydrogen fuel cell systems used primarily for the material handling and stationary power market.

We are focused on proton exchange membrane, or PEM, fuel cell and fuel processing technologies, fuel cell/battery hybrid technologies, and associated hydrogen storage and dispensing infrastructure from which multiple products are available. A fuel cell is an electrochemical device that combines hydrogen and oxygen to produce electricity and heat without combustion. Hydrogen is derived from hydrocarbon fuels such as liquid petroleum gas, or LPG, natural gas, propane, methanol, ethanol, gasoline or biofuels. Plug Power develops complete hydrogen delivery, storage and refueling solutions for customer locations. Hydrogen can also be obtained from the electrolysis of water, or produced on-site at consumer locations through a process known as reformation. Currently, the Company obtains hydrogen for resale to customers by purchasing it from fuel suppliers.

We provide and continue to develop fuel cell product solutions to replace lead-acid batteries in material handling vehicles and industrial trucks for some of the world's largest distribution and manufacturing businesses. We are focusing our efforts on material handling applications (forklifts) at multi-shift high volume manufacturing and high throughput distribution sites where our products and services provide a unique combination of productivity, flexibility and environmental benefits. Our current product line includes: GenDrive, our hydrogen fueled PEM fuel cell system providing power to material handling vehicles; GenFuel, our hydrogen fueling delivery system; GenCare, our ongoing maintenance program for both GenDrive fuel cells and GenFuel products; GenSure (formerly ReliOn), our stationary fuel cell solution providing scalable, modular PEM fuel cell power to support the backup and grid-support power requirements of the telecommunications, transportation, and utility sectors; and GenKey, our turn-key solutions combining either GenDrive or GenSure, GenCare and GenFuel, offering complete simplicity to customers transitioning to fuel cell power; and GenFund, a collaboration with leasing organizations to provide cost efficient and seamless financing solutions to customers.

We provide our products worldwide, with a primary focus on North America, through our direct product sales force, and by leveraging relationships with original equipment manufacturers, or OEMs, and their dealer networks.

Table of Contents

Results of Operations

Revenue, cost of revenue, gross profit/(loss) and gross margin for the three and six months ended June 30, 2016 and 2015, was as follows (in thousands):

| | Three Months Ended June 30, | | | | Six Months Ended June 30, | | | |
|---|---|---|---|---|---|---|---|---|
| | Revenue | Cost of Revenue | Gross Profit/(Loss) | Gross Margin | Revenue | Cost of Revenue | Gross Profit/(Loss) | Gross Margin |
| For the three and six months ended June 30, 2016: | | | | | | | | |
| Sales of fuel cell systems and related infrastructure | $ 9,121 | $ 8,043 | $ 1,078 | 11.8 % | $ 14,339 | $ 11,941 | $ 2,398 | 16.7 % |
| Services performed on fuel cell systems and related infrastructure | 5,360 | 5,926 | (566) | (10.6) % | 10,633 | 11,709 | (1,076) | (10.1) % |
| Power Purchase Agreements | 3,062 | 3,616 | (554) | (18.1) % | 5,768 | 6,497 | (729) | (12.6) % |
| Fuel delivered to customers | 2,638 | 3,208 | (570) | (21.6) % | 4,648 | 5,619 | (971) | (20.9) % |
| Other | 278 | 353 | (75) | (27.0) % | 403 | 542 | (139) | (34.5) % |

Our primary sources of revenue are from sales of fuel cell systems and related infrastructure, services performed on fuel cell systems and related infrastructure, Power Purchase Agreements (PPAs), and fuel delivered to customers. Revenue from sales of fuel cell systems and related infrastructure represents sales of our GenDrive units, GenSure (formerly ReliOn) stationary backup power units, as well as hydrogen fueling infrastructures. Revenue from services performed on fuel cell systems and related infrastructure represents revenue earned on our service and maintenance contracts and sales of spare parts. Revenue from PPAs primarily represents payments received from customers who make monthly payments to access the Company's GenKey solution. Revenue associated with fuel delivered to customers represents the sale of hydrogen to customers that has been purchased by the Company from a third party.

Prior to December 31, 2015, equipment used in PPAs was sold in accompanying sale/leaseback transactions in which the Company sold fuel cell systems, related infrastructure and service to a third-party financial institution, then leased the fuel cell system and related infrastructure back and provided them to customers who were parties to the PPAs. These sale/leaseback transactions met the criteria of and were accounted for as operating leases (and the related equipment revenue was recognized up front). Beginning in 2016, sale/leaseback transactions associated with PPAs met the criteria of and were accounted for as capital leases, and the equipment is accordingly classified by the Company as leased property under "Leased Property" in the Consolidated Balance Sheet.

Table of Contents

Revenue – sales of fuel cell systems and related infrastructure. Revenue from sales of fuel cell systems and related infrastructure represents revenue from the sale of our fuel cells, such as GenDrive units and GenSure (formerly ReliOn) stationary backup power units, as well as hydrogen fueling infrastructure referred to at the site level as hydrogen installations.

Revenue from sales of fuel cell systems and related infrastructure for the three months ended June 30, 2016 decreased $9.5 million or 51.1%, to $9.1 million from $18.7 million for the three months ended June 30, 2015. There were 254 GenDrive units recognized as revenue for the three months ended June 30, 2016, compared to 892 for the three months ended June 30, 2015. The change in revenue is generally consistent with the change in units sold; however, the extent of which is impacted by pricing and class mix differences. An additional 672 units were shipped during the three months ended June 30, 2016 and held as leased property because they were associated with sale/leaseback transactions accounted for as capital leases. As such, the Company will recognize revenue on these shipments over the life of the related PPA under “Power Purchase Agreements” in the Consolidated Statement of Operations. Revenue associated with three hydrogen installations was recognized during the three months ended June 30, 2016, consistent with three sites recognized as revenue during the three months ended June 30, 2015. In addition, three additional sites were constructed and held as leased property during the three months ended June 30, 2016, also because they were associated with sale/leaseback transactions accounted for as capital leases. Sales of GenSure units increased $0.8 million to $2.0 million in the three months ended June 30, 2016, compared to $1.2 million in the three months ended June 30, 2015 as the Company continues to fulfill a large multi-site order received in prior years.

Revenue from sales of fuel cell systems and related infrastructure for the six months ended June 30, 2016 decreased $9.4 million or 39.6%, to $14.3 million from $23.8 million for the six months ended June 30, 2015. There were 414 GenDrive units recognized as revenue for the three months ended June 30, 2016, compared to 1,157 for the six months ended June 30, 2015. The change in revenue is generally consistent with the change in units sold; however, the extent of which is impacted by pricing and class mix differences. An additional 1,346 units were shipped during the six months ended June 30, 2016 and held as leased property because they were associated with sale/leaseback transactions accounted for as capital leases. Revenue associated with three hydrogen installations was recognized during the three months ended June 30, 2016, down from four sites recognized as revenue during the six months ended June 30, 2015. In addition, six additional sites were constructed and held as leased property during the six months ended June 30, 2016, also because they were associated with sale/leaseback transactions accounted for as capital leases. Sales of GenSure units increased $2.3 million to $4.0 million in the six months ended June 30, 2016, compared to the six months ended June 30, 2015 as the Company continues to fulfill a large multi-site order received in prior years.

Revenue – services performed on fuel cell systems and related infrastructure. Revenue from services performed on fuel cell systems and related infrastructure represents revenue earned on our service and maintenance contracts and sales of spare parts.

Revenue from services performed on fuel cell systems and related infrastructure for the three months ended June 30, 2016 increased $2.5 million or 85.9%, to $5.4 million from $2.9 million for the three months ended June 30, 2015. The increase in this revenue category is primarily related to the increase in sales of fuel cell systems and hydrogen installations in 2015 and 2016 to date, which has had a corresponding impact on the installed base. At June 30, 2016, there were 8,949 fuel cell units under extended maintenance contracts, an increase of 41.6% from 6,320 at June 30, 2015. Revenue growth is directionally consistent with installed base growth, however the extent of the increases can be impacted by concentration of units per site, pricing, unit class mix, and timing of when units were installed within

the reporting periods. At June 30, 2016, there were extended maintenance contracts associated with 26 hydrogen installations, as compared to 12 at June 30, 2015.

Revenue from services performed on fuel cell systems and related infrastructure for the six months ended June 30, 2016 increased $5.1 million or 92.3%, to $10.6 million from $5.5 million for the six months ended June 30, 2015. The increase in this revenue category is primarily related to the increase in sales of fuel cell systems and hydrogen installations in 2015 and 2016 to date, which has had a corresponding impact on the installed base, as described above.

Revenue – Power Purchase Agreements. Revenue from PPAs represents payments received from customers for power generated through the provision of equipment and service. The equipment and service can be associated with

Table of Contents

sale/leaseback transactions in which the Company sells fuel cell systems and related infrastructure to a third-party, leases them back and operates them at customers' locations who are parties to PPAs with the Company. Alternatively, the Company can retain the equipment as leased property and provide it to customers under PPAs.

Revenue from PPAs for the three months ended June 30, 2016 increased $2.0 million or 184.3%, to $3.1 million from $1.1 million for the three months ended June 30, 2015. The increase is due to the increased numbers of GenKey sites the Company has deployed with these types of arrangements, (20 at June 30, 2016 as compared to seven at June 30, 2015).

Revenue from PPAs for the six months ended June 30, 2016 increased $3.7 million or 180.8%, to $5.8 million from $2.1 million for the six months ended June 30, 2015. The increase is due to the increased numbers of GenKey sites the Company has deployed with these types of arrangements, as described above.

Revenue – fuel delivered to customers. Revenue associated with fuel delivered to customers represents the sale of hydrogen to customers that has been purchased by the Company from a third party. As part of the GenKey solution, the Company contracts with fuel suppliers to purchase liquid hydrogen, which is then sold to its customers.

Revenue associated with fuel delivered to customers for the three months ended June 30, 2016 increased $1.5 million or 133.9%, to $2.6 million from $1.1 million for the three months ended June 30, 2015. The increase in revenue is due to 31 sites taking fuel deliveries at June 30, 2016, compared 11 at June 30, 2015. The sites generally are the same as those which had purchased hydrogen installations within the GenKey solution.

Revenue associated with fuel delivered to customers for the six months ended June 30, 2016 increased $2.9 million or 160.1%, to $4.6 million from $1.8 million for the six months ended June 30, 2015. The increase in revenue is due to 31 sites taking fuel deliveries at June 30, 2016, compared 11 at June 30, 2015. The sites generally are the same as those which had purchased hydrogen installations within the GenKey solution.

Revenue – other. Other revenue primarily represents cost reimbursement research and development contracts associated with the development of PEM fuel cell technology. We generally share in the cost of these programs with our cost-sharing percentages ranging from 30% to 50% of total project costs. Revenue from time and material contracts is recognized on the basis of hours expended plus other reimbursable contract costs incurred during the period. We expect to continue certain research and development contract work that is related to our current product development efforts. Other miscellaneous revenue is recognized from time to time.

Other revenue for the three months ended June 30, 2016 increased $20 thousand, or 7.8%, to $278 thousand from $258 thousand for the three months ended June 30, 2015. During the three months ended June 30, 2016, the Company recorded $125 thousand associated with a customer stack development program. This program did not exist in the second quarter of 2015. This increase in revenue is offset by reduced activity in research and development contracts as compared to prior years.

Other revenue for the six months ended June 30, 2016 increased $100 thousand, or 33.0%, to $403 thousand from $303 thousand for the six months ended June 30, 2015. During the six months ended June 30, 2016, the Company recorded revenue of $250 thousand associated with a customer stack development program. This program did not exist in the first half of 2015. This increase in revenue is offset by reduced activity in research and development contracts as compared to prior years.

Cost of revenue – sales of fuel cell systems and related infrastructure. Cost of revenue from sales of fuel cell systems and related infrastructure includes direct material, labor costs, and allocated overhead costs related to the manufacture of our fuel cells such as GenDrive units and GenSure (formerly ReliOn) stationary backup power units, as well as hydrogen fueling infrastructure referred to at the site level as hydrogen installations.

Cost of revenue from sales of fuel cell systems and related infrastructure for the three months ended June 30, 2016 decreased 45.5%, or $6.7 million, compared to the three months ended June 30, 2015. Gross margin generated from sales

Table of Contents

of fuel cell systems and related infrastructure was 11.8% for the three months ended June 30, 2016, down from 21.0% for the three months ended June 30, 2015, due to cost overruns for two sites completed and also pricing mix.

Cost of revenue from sales of fuel cell systems and related infrastructure for the six months ended June 30, 2016 decreased 39.8%, or $7.9 million, compared to the six months ended June 30, 2015. Gross margin generated from sales of fuel cell systems and related infrastructure was 16.7% for the six months ended June 30, 2016, relatively consistent with 16.5% for the six months ended June 30, 2015, due to cost overruns for two sites recently completed offset by supply chain and product design cost down programs, as well as manufacturing process improvements.

Cost of revenue – services performed on fuel cell systems and related infrastructure. Cost of revenue from services performed on fuel cell systems and related infrastructure includes the labor, material costs and allocated overhead costs incurred for our product service and hydrogen site maintenance contracts and spare parts.

Cost of revenue from services performed on fuel cell systems and related infrastructure for the three months ended June 30, 2016 increased 10.4%, or $0.6 million, compared to the three months ended June 30, 2015. These increases are a direct result of a growing installed base of GenDrive units, and the number of customers that have GenCare and GenFuel service contracts. These increases resulted in increases in replacement parts, as well as labor and overhead for service personnel necessary to support these service and hydrogen site maintenance contracts. At June 30, 2016, there were 8,949 GenDrive units under GenCare contracts and 26 customer sites under GenFuel contracts, as compared to 6,320 GenDrive units under GenCare contracts and 12 customer sites under GenFuel contracts at June 30, 2015. Gross margin improved to (10.6)% for the three months ended June 30, 2016 from (86.2%) for the three months ended June 30, 2015 due to improved model design driving down parts costs, better leverage of fixed costs and absorption of $1.8 million in net losses on loss contracts against the accrual for loss contracts related to service. During 2015, the Company recognized a $10.1 million provision for loss contracts related to service. This provision represented expected losses on extended maintenance contracts that had projected costs over the remaining life of the contracts which exceeded contractual revenues.

Cost of revenue from services performed on fuel cell systems and related infrastructure for the six months ended June 30, 2016 increased 15.5%, or $1.6 million, compared to the six months ended June 30, 2015. These increases are a direct result of a growing installed base of GenDrive units, and the number of customers that have GenCare and GenFuel service contracts, as described above. These increases resulted in increases in costs of replacement parts, as well as labor and overhead for service personnel necessary to support these service and hydrogen site maintenance contracts. At June 30, 2016, there were 8,949 GenDrive units under GenCare contracts and 26 customer sites under GenFuel contracts, as compared to 6,320 GenDrive units under GenCare contracts and 12 customer sites under GenFuel contracts at June 30, 2015. Gross margin improved to (10.1)% for the six months ended June 30, 2016 from (83.4%) for the six months ended June 30, 2015 due to improved model design driving down parts costs, better leverage of fixed costs and absorption of $3.6 million in net losses on loss contracts against the accrual for loss contracts related to service.

Cost of revenue—provision for loss contracts related to service. In 2015, the Company recognized a $10.1 million provision for loss contracts related to service. This provision represents extended maintenance contracts that have projected costs over the remaining life of the contracts that exceed contractual revenues. During the three and six months ended June 30, 2016, the Company renegotiated one of its service contracts and replaced 96 of the older fuel cell systems in service at that particular customer. As a result, the projected costs over the remaining life of the amended contract were estimated to be reduced as compared to the previous estimate, resulting in a lower necessary accrual. The change in estimate was recorded as gain within cost of revenue where the original charge was recorded.

Cost of revenue – Power Purchase Agreements. Cost of revenue from PPAs includes payments made to financial institutions for leased equipment and service used to fulfill the PPAs. Leased units are primarily associated with sale/leaseback transactions in which the Company sells fuel cell systems and related infrastructure to a third-party, leases them back, and operates them at customers' locations who are parties to PPAs with the Company. Alternatively, the Company can hold the equipment for investment and recognize the depreciation and service cost of the assets as cost of revenue from PPAs.

Cost of revenue from PPAs for the three months ended June 30, 2016 increased $2.7 million, or 287.6%, to $3.6 million from $0.9 million for the three months ended June 30, 2015. The increase was a result of the increase in the number of customer sites party to these agreements (20 at June 30, 2016 as compared to seven at June 30, 2015). Gross

Table of Contents

margin declined to (18.1%) for the three months ended June 30, 2016 from 13.4% for the three months ended June 30, 2015, due primarily to changes in financing pricing, depreciation of capitalized leased asset costs related to sites constructed in 2016 associated with capital leases, as well as costs to maintain them.

Cost of revenue from PPAs for the six months ended June 30, 2016 increased $4.8 million, or 285.8%, to $6.5 million from $1.7 million for the six months ended June 30, 2015. The increase was a result of the increase in the number of customer sites party to these agreements, as described above. Gross margin declined to (12.6%) for the six months ended June 30, 2016 from 18.0% for the six months ended June 30, 2015, due primarily to changes in financing pricing, depreciation of capitalized leased asset costs related to sites constructed in 2016 associated with capital leases, as well as costs to maintain them.

Cost of revenue – fuel delivered to customers. Cost of revenue from fuel delivered to customers represents the purchase of hydrogen from suppliers that ultimately is sold to customers. As part of the GenKey solution, the Company contracts with fuel suppliers to purchase liquid hydrogen and separately sells to its customers upon delivery.

Cost of revenue from fuel delivered to customers for the three months ended June 30, 2016 increased $2.1 million, or 196.2%, to $3.2 million from $1.1 million for the three months ended June 30, 2015. The increase is due primarily to higher volume of liquid hydrogen delivered to customer sites as a result of an increase in the number of hydrogen installations completed under GenKey agreements. At June 30, 2016, there were 31 customer sites taking hydrogen fuel delivery compared to 11 customer sites at June 30, 2015. The sites generally are the same as those who had purchased hydrogen installations within the GenKey solution. Gross margin declined to (21.6)% during the three months ended June 30, 2016 from 4.0% during the three months ended June 30, 2015, due to inefficiencies in fuel usage.

Cost of revenue from fuel delivered to customers for the six months ended June 30, 2016 increased $3.7 million, or 186.8%, to $5.6 million from $2.0 million for the six months ended June 30, 2015. The increase is due primarily to higher volume of liquid hydrogen delivered to customer sites, as a result of an increase in the number of hydrogen installations completed under GenKey agreements, as described above. The sites generally are the same as those who had purchased hydrogen installations within the GenKey solution. Gross margin declined to (20.9)% during the six months ended June 30, 2016 from (9.6)% during the six months ended June 30, 2015, due to inefficiencies in fuel usage.

Cost of revenue – other. Other cost of revenue primarily represents costs associated with research and development contracts including: cash and non-cash compensation and benefits for engineering and related support staff, fees paid to outside suppliers for subcontracted components and services, fees paid to consultants for services provided, materials and supplies used and other directly allocable general overhead costs allocated to specific research and development contracts.

Cost of other revenue for the three months ended June 30, 2016 increased $43 thousand, or 13.9%, to $353 thousand from $310 thousand for the three months ended June 30, 2015. Activity in research and development contracts has been reduced compared to prior years, however those activities that do occur are generally at 30% to 50% cost sharing arrangements, which results in negative margin.

Cost of other revenue for the six months ended June 30, 2016 increased $0.2 million, or 50.1%, to $0.5 million from $0.4 million for the six months ended June 30, 2015. Activity in research and development contracts has been

reduced compared to prior years, as described above.

Research and development expense. Research and development expense includes: materials to build development and prototype units, cash and non-cash compensation and benefits for the engineering and related staff, expenses for contract engineers, fees paid to consultants for services provided, materials and supplies consumed, facility related costs such as computer and network services, and other general overhead costs associated with our research and development activities.

Research and development expense for the three months ended June 30, 2016 increased $1.8 million, or 51.9% to $5.2 million, from $3.4 million for the three months ended June 30, 2015. This increase was primarily related to an increase in personnel related expenses, focused on refinement of hydrogen infrastructure design, multiple product cost-down programs and prototyping for stack performance enhancement.

Table of Contents

Research and development expense for the six months ended June 30, 2016 increased $3.7 million, or 58.6% to $10.0 million, from $6.3 million for the three months ended June 30, 2015. This increase was primarily related to an increase in personnel related expenses, focused on refinement of hydrogen infrastructure design, multiple product cost-down programs and prototyping for stack performance enhancement.

Selling, general and administrative expenses. Selling, general and administrative expenses includes cash and non-cash compensation, benefits, amortization of intangible assets and related costs in support of our general corporate functions, including general management, finance and accounting, human resources, selling and marketing, information technology and legal services.

Selling, general and administrative expenses for the three months ended June 30, 2016 increased $0.6 million, or 7.0%, to $8.6 million from $8.0 million for the three months ended June 30, 2015. The increase was primarily due to an increase in stock-based compensation resulting from increases in compensation and employee head count, partially offset by reductions in amortization of intangible assets due to certain assets becoming fully amortized in the prior year.

Selling, general and administrative expenses for the six months ended June 30, 2016 increased $1.1 million, or 7.0%, to $16.9 million from $15.8 million for the six months ended June 30, 2015. The increase was primarily due to an increase in stock-based compensation resulting from increases in compensation and employee head count, partially offset by reductions in amortization of intangible assets.

Interest and other expense, net. Interest and other expense, net consists of interest and other expenses related to interest on our short-term borrowing, long-term debt, obligations under capital lease and our finance obligations, as well as foreign currency exchange gain (loss), offset by interest and other income consisting primarily of interest earned on our cash and cash equivalents, note receivable, and other income.

Interest and other expense for the three months ended June 30, 2016, increased $1.2 million as compared to the three months ended June 30, 2015. The increase is attributed to interest on the short-term borrowing originated in March 2016, which was converted to project financing in June 2016, the long-term debt originated during the three months ended June 30, 2016 and the increase in finance obligations during the latter half of 2015 and through 2016 to date, offset by interest and other income which remained relatively insignificant for the three months ended June 30, 2016 and June 30, 2015.

Interest and other expense for the six months ended June 30, 2016, increased $1.6 million as compared to the six months ended June 30, 2015. The increase is attributed to interest on the short-term borrowing originated in March 2016, which was converted to project financing in June 2016, the long-term debt originated during the three months ended June 30, 2016 and the increase in finance obligations during the latter half of 2015 and through 2016 to date, offset by interest and other income whish remained relatively insignificant for the six months ended June 30, 2016 and June 30, 2015

Change in fair value of common stock warrant liability. The Company accounts for common stock warrants as common stock warrant liability with changes in the fair value reflected in the consolidated statement of operations as change in the fair value of common stock warrant liability.

The change in fair value of common stock warrant liability for the three months ended June 30, 2016 resulted in a decrease in the associated warrant liability of $1.5 million as compared to a decrease of $0.7 million for the three months ended June 30, 2015. These variances are primarily due to changes in the Company's common stock share price, and changes in volatility of our common stock, which are significant inputs to the Black-Scholes valuation model.

The change in fair value of common stock warrant liability for the six months ended June 30, 2016 resulted in a decrease in the associated warrant liability of $2.7 million as compared to a decrease of $2.4 million for the six months ended June 30, 2015. These variances are primarily due to changes in the Company's common stock share price, and changes in volatility of our common stock, which are significant inputs to the Black-Scholes valuation model.

Table of Contents

Income taxes. The deferred tax asset generated from our net operating loss has been offset by a full valuation allowance because it is more likely than not that the tax benefits of the net operating loss carry forward will not be realized. The Company also recognizes accrued interest and penalties related to unrecognized tax benefits as a component of income tax expense.

During the six months ended June 30, 2016, the Company released its liability for unrecognized tax benefits of $392 thousand, as the related statute of limitations has expired. No other tax expense or benefit was recognized in the three months ended June 30, 2016 or 2015, or the six months ended June 30, 2015.

Liquidity and Capital Resources

Our cash requirements relate primarily to working capital needed to operate and grow our business, including funding operating expenses, growth in inventory to support both shipments of new units and servicing the installed base, growth in equipment leased to customers under long-term arrangements, funding the growth in our GenKey “turn-key” solution, which includes the installation of our customer’s hydrogen infrastructure as well as delivery of the hydrogen fuel, continued development and expansion of our products, and the repayment or refinancing of our long-term debt. Our ability to achieve profitability and meet future liquidity needs and capital requirements will depend upon numerous factors, including the timing and quantity of product orders and shipments; attaining positive gross margins; the timing and amount of our operating expenses; the timing and costs of working capital needs; the timing and costs of building a sales base; the ability of our customers to obtain financing to support commercial transactions; our ability to obtain financing arrangements to support the sale or leasing of our products and services to customers, including financing arrangements to repay or refinance our long-term debt, and the terms of such agreements that may require us to pledge or restrict substantial amounts of our cash to support these financing arrangements; the timing and costs of developing marketing and distribution channels; the timing and costs of product service requirements; the timing and costs of hiring and training product staff; the extent to which our products gain market acceptance; the timing and costs of product development and introductions; the extent of our ongoing and new research and development programs; and changes in our strategy or our planned activities. If we are unable to fund our operations with positive cash flows and cannot obtain external financing, we may not be able to sustain future operations. As a result, we may be required to delay, reduce and/or cease our operations and/or seek bankruptcy protection.

We have experienced and continue to experience negative cash flows from operations and net losses. The Company incurred net losses attributable to common shareholders of $24.9 million for the six months ended June 30, 2016 and $55.8 million, $88.6 million and $62.8 million for the years ended December 31, 2015, 2014, and 2013, respectively, and has an accumulated deficit of $1.0 billion at June 30, 2016.

During the six months ended June 30, 2016, cash used in operating activities was $15.8 million, consisting primarily of a net loss attributable to the Company of $24.9 million, offset by the impact of noncash charges/gains of $2.7 million and net inflows from fluctuations in working capital and other assets and liabilities of $6.4 million. The changes in working capital primarily were related to collections of accounts receivable and managing of accounts

payable offset by an investment in inventory procured to meet our backlog requirements, as well as increases in prepaid expenses and consumption against the accrual for loss contracts related to service. As of June 30, 2016, we had cash and cash equivalents of $66.0 million and net working capital of $77.8 million. By comparison, at December 31, 2015, we had cash and cash equivalents of $64.0 million and net working capital of $88.5 million. Additionally, a portion of the cash and cash equivalents on hand at June 30, 2016, is required to be maintained at all times under a covenant requirement associated with the Company's secured term loan facility that requires a minimum unencumbered cash and cash equivalents balance equal to or greater than 75% of the outstanding principal balance plus accounts payable aged more than 150 days.

Net cash used in investing activities for the six months ended June 30, 2016 included purchases of property, plant and equipment and outflows associated with materials, labor, and overhead necessary to construct new leased property of $28.8 million. Cash outflows related to equipment that we sell and equipment we lease directly to customers are included in net cash used in operating activities and net cash used in investing activities, respectively. Net cash provided by financing activities for the six months ended June 30, 2016 primarily resulted from increases in finance obligations and borrowings against a long-term secured term loan facility, as described in Note 8. The secured term loan facility has events of default, including a material adverse change clause that is at the sole discretion of the lender.

Table of Contents

Between 2014 and 2016, the Company signed sale/leaseback agreements with the Company's primary financial institution (M&T Bank or the Bank) to facilitate the Company's commercial transactions with key customers. The Company then leased the fuel cell systems and hydrogen infrastructure back from the Bank and operates them at customer locations to fulfill Power Purchase Agreements (PPAs). In connection with these operating leases, the Bank requires the Company to maintain cash balances in restricted accounts securing its lease obligations to the Bank. Cash added to these restricted accounts was $14.2 million during 2015. (No additional cash was added during the three and six months ended June 30, 2016, other than interest earned on restricted cash balances.) Cash received from customers under the PPAs is used to make lease payments to the Bank. As the Company performs under these agreements, the required restricted cash balances are released, according to a set schedule. At June 30, 2016, the Company had 7 PPA deployments related to these sale/leaseback agreements. At June 30, 2016, the total remaining lease payments to the Bank under these agreements were $23.6 million and have been secured with restricted cash and pledged service escrows. Cash associated with sales of future revenues is required to be recorded as financing obligations on the consolidated balance sheets and accordingly represents a financing cash inflow.

The master lease agreement with the Bank requires the Company to maintain a minimum of $50.0 million of unrestricted cash, as of June 30, 2016 (subsequently reduced to $40 million as of July 27, 2016). As mentioned above, the Company's remaining contractual lease payments to the Bank are fully secured through a combination of restricted cash and pledges on funds escrowed for future service by the Company. The covenant is maintained in association with the residual exposure of the Bank, which stems from tax benefits taken by the Bank that could be recaptured should the underlying assets not be deployed for five years. This residual exposure at June 30, 2016 amounted to approximately $12.0 million, and the exposure decreases with the passage of time. In the event that the Company's unrestricted cash balance falls below the minimum threshold, the Company is entitled to cure the failure by providing additional restricted cash to secure the outstanding residual tax exposure of the Bank at that time.

In addition to the financing activities described above, we have historically funded our operations primarily through public and private offerings of common and preferred stock, as well as short-term borrowings, long-term debt and project financing, as described below. The Company believes that its current working capital and cash anticipated to be generated from future operations, as well as various sources of capital from additional project financing platforms with various third parties that are currently being evaluated, will provide sufficient liquidity to fund operations for at least the next twelve months. This projection is based on our current expectations regarding new project financing and product sales and service, cost structure, cash burn rate and other operating assumptions.

On March 2, 2016, the Company entered into a Loan Agreement with Generate Lending, LLC (Lender). The Loan Agreement, among other things, provided for a $30 million secured term loan facility (the Short-Term Loan Facility). Advances under the Short-Term Loan Facility bore interest at the rate of 12.0% per annum. The term of the Loan Agreement was one year, ending March 2, 2017. Pursuant to the Loan Agreement, $25.0 million of the Short-Term Loan Facility was drawn upon and outstanding as of March 31, 2016.

On June 27, 2016, the Short-Term Loan Facility was paid off with proceeds from long-term project financing. That financing was accounted for as a series of capital leases, the obligation of which is now presented as part of finance obligations on the accompanying unaudited interim consolidated balance sheet.

During the three months ended June 30, 2016, Plug Power Inc. and its subsidiaries Emerging Power Inc. and Emergent Power Inc. entered into a Loan and Security Agreement with Hercules Capital, Inc. (Hercules) pursuant to which Hercules agreed to make available to the Company a secured term loan facility in the amount of up to $40.0 million (the Term Loan Facility), subject to certain terms and conditions. The Company borrowed $25.0 million under the Loan and Security Agreement on the date of closing, and incurred transaction costs of $1.1 million. The Company may borrow an additional $5.0 million under the Loan and Security Agreement between October 12, 2016 and December 12, 2016 subject to the Company satisfying certain conditions. The Company may also borrow an additional $10.0 million under the Loan and Security Agreement after June 27, 2016 and until June 27, 2017 subject to satisfying certain other conditions.

Advances under the Term Loan Facility bear interest at the rate of 10.45% per annum, subject to compliance with financial covenants and other conditions. The Loan and Security Agreement includes covenants, limitations, and events

Table of Contents

of default customary for similar facilities. The term of the Loan and Security Agreement is three years, ending June 27, 2019 (the Maturity Date).

Interest is payable on a monthly basis and the entire then outstanding principal balance of the Term Loan Facility, together with all accrued and unpaid interest, is due and payable on the Maturity Date. On the earliest to occur of the Maturity Date, the date on which the obligations under the Loan and Security Agreement are paid and the date on which such obligations become due and payable, the Company is also required to pay the Lender an end of term charge $2.5 million, based on the amount borrowed.

Until such time as certain net income milestones are met, the Loan and Security Agreement has financial covenants that require the Company to maintain at all times minimum unencumbered cash and cash equivalents equal to or greater than 75% of the then outstanding principal balance of the Term Loan Facility plus accounts payable aged more than 150 days. After such net income milestones are met, the Loan and Security Agreement's financial covenants are reduced to require minimum unencumbered cash and cash equivalents equal to or greater than 50% of the then outstanding principal balance of the Term Loan Facility plus accounts payable aged more than 150 days.

All obligations under the Loan and Security Agreement are unconditionally guaranteed by the Company's subsidiaries, Emerging Power Inc. and Emergent Power Inc. The Term Loan Facility is secured by substantially all of Plug Power Inc. and the guarantors' assets, including all intellectual property, all securities in domestic subsidiaries and 65% of the securities in foreign subsidiaries, subject to certain exceptions and exclusions.

The Loan and Security Agreement contains customary covenants for arrangements of this type and other covenants agreed to by the parties, including, among others, (i) the provision of annual and quarterly financial statements, management rights and insurance policies and (ii) restrictions on incurring debt, granting liens, making acquisitions, making loans, paying dividends, dissolving, and entering into leases and asset sales. The Loan and Security Agreement also provides for customary events of default, including, among others, payment, bankruptcy, covenant, representation and warranty, change of control, judgment and material adverse effect defaults.

Several key indicators of liquidity are summarized in the following table (in thousands):

| | Six months ended or at June 30, 2016 | Year ended or at December 31, 2015 |
|---|---|---|
| Cash and cash equivalents at end of period | $ 66,040 | $ 63,961 |
| Restricted cash at end of period | 47,895 | 47,835 |

| | | |
|---|---|---|
| Working capital at end of period | 77,801 | 88,524 |
| Net loss attributable to common shareholders | 24,934 | 55,795 |
| Net cash used in operating activities | 15,761 | 47,274 |
| Purchases of property, plant and equipment and leased property | 28,842 | 3,520 |
| Net cash provided by (used in) financing activities | 46,614 | (32,923) |

Operating Leases

As of June 30, 2016, the Company has several non-cancelable operating leases (as lessor and as lessee), primarily associated with sale/leaseback transactions that are partially secured by restricted cash as summarized below. These leases expire over the next six years. Minimum rent payments under operating leases are recognized on a straight line basis over the term of the lease. Leases where the Company is the lessor contain termination clauses with associated penalties, the amount of which cause the likelihood of cancelation to be remote.

Table of Contents

Future minimum lease payments under non-cancelable operating leases (with initial or remaining lease terms in excess of one year) as of June 30, 2016 are (in thousands):

| | As Lessor | As Lessee |
|---|---|---|
| Remainder of 2016 | $ 7,304 | $ 8,597 |
| 2017 | 14,608 | 25,383 |
| 2018 | 14,608 | 20,717 |
| 2019 | 14,608 | 13,697 |
| 2020 | 13,452 | 12,563 |
| Thereafter | 10,479 | 10,239 |
| Total future minimum lease payments | $ 75,059 | $ 91,196 |

Critical Accounting Estimates

Management’s discussion and analysis of our financial condition and results of operations are based upon our unaudited interim consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these unaudited interim consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of and during the reporting period. On an on-going basis, we evaluate our estimates and judgments, including those related to revenue recognition for multiple element arrangements, bad debts, inventories, intangible assets, valuation of long-lived assets, accrual for loss contracts on service, product warranty reserves, unbilled revenue, common stock warrants, income taxes, stock-based compensation, contingencies, and purchase accounting. We base our estimates and judgments on historical experience and on various other factors and assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about (1) the carrying values of assets and liabilities and (2) the amount of revenue and expenses realized that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We refer to the policies and estimates set forth in the section “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Estimates”, as well as a discussion of significant accounting policies included in Note 2, Summary of Significant Accounting Policies, of the consolidated financial statements, both of which are included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015.

Recent Accounting Pronouncements

In March 2016, an accounting update was issued to simplify various aspects related to how share-based payments are accounted for and presented. This accounting update is effective for annual periods beginning after December 15, 2016 and interim periods within those years. Early adoption is permitted in any interim or annual period, with any adjustments reflected as of the beginning of the fiscal year of adoption. The Company is evaluating the impact this update will have on the consolidated financial statements.

In February 2016, an accounting update was issued which requires balance sheet recognition for operating leases, among other changes to previous lease guidance. This accounting update is effective for fiscal years beginning after December 15, 2018. The Company is evaluating the impact this update will have on the consolidated financial statements.

In July 2015, an accounting update was issued that changes inventory measurement from lower of cost or market to lower of cost and net realizable value. The new standard applies to inventory measured at first-in, first-out (FIFO). This accounting update is effective for the annual reporting periods beginning after December 15, 2016, and interim periods within those years. The Company does not expect the adoption of this update to have a significant effect on the consolidated financial statements.

In August 2014, an accounting update was issued relating to how management assesses conditions and events that could raise substantial doubt about an entity’s ability to continue as a going concern. This accounting update is effective

Table of Contents

for reporting periods ending after December 15, 2016, and for annual and interim periods thereafter. The Company does not expect the adoption of this update to have a significant effect on the consolidated financial statements.

In June 2014, an accounting update was issued that replaces the existing revenue recognition framework regarding contracts with customers. In July 2015, the Financial Accounting Standards Board (FASB) announced a one year delay in the required adoption date from January 1, 2017 to January 1, 2018. The Company is evaluating the effect this update will have on the consolidated financial statements and has not yet selected a transition method.

Item 3 — Quantitative and Qualitative Disclosures about Market Risk

From time to time, we may invest our cash in government, government backed and interest-bearing investment-grade securities that we generally hold for the duration of the term of the respective instrument. We do not utilize derivative financial instruments, derivative commodity instruments or other market risk sensitive instruments, positions or transactions in any material fashion. We are not subject to any material risks arising from changes in interest rates, foreign currency exchange rates, commodity prices, equity prices or other market changes that affect market risk sensitive instruments.

Our exposure to changes in foreign currency rates is primarily related to sourcing inventory from foreign locations and operations of HyPulsion. This practice can give rise to foreign exchange risk resulting from the varying cost of inventory to the receiving location. The Company reviews the level of foreign content as part of its ongoing evaluation of overall sourcing strategies and considers the exposure to be not significant. Our HyPulsion exposure presently is mitigated by low levels of operations and its sourcing is primarily intercompany in nature and denominated in U.S. dollar.

Item 4 — Controls and Procedures

a) Disclosure controls and procedures.

The chief executive officer and chief financial officer, based on their evaluation of disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Quarterly Report on Form 10-Q, have concluded that the Company’s disclosure controls and procedures are effective for ensuring that information required to be disclosed in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Commission’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in filed or submitted reports is accumulated and communicated to the

Company's management, including its principal executive officer and principal financial officer as appropriate, to allow timely decisions regarding required disclosure.

(b) Changes in internal control over financial reporting.

There were no changes in the Company's internal control over financial reporting that occurred during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1 — Legal Proceedings

An action has been brought in New York State Supreme Court by General Electric Co. (GE) and an affiliate against the Company seeking $1 million that GE claims is due under an indemnification agreement between GE and the Company. GE seeks indemnification for funds it paid to settle a claim with Soroof Trading Development Co., an entity that had paid funds to GE to become a distributor of the Company's products. The Company is vigorously defending the action.

Item 1A - Risk Factors

Part I, Item 1A, “Risk Factors” of our most recently filed Annual Report on Form 10-K, filed with the Securities and Exchange Commission for the fiscal year ended December 31, 2015, sets forth information relating to important risks and uncertainties that could materially adversely affect our business, financial condition and operating results. Except to the extent that information disclosed elsewhere in this Quarterly Report on Form 10-Q relates to such risk factors (including, without limitation, the matters described in Part I, Item 2, “Management’s Discussion and Analysis of Financial Condition and Results of Operations”), there have been no material changes to our risk factors disclosed in our most recently filed Annual Report on Form 10-K. However, those risk factors continue to be relevant to an understanding of our business, financial condition and operating results and, accordingly, you should review and consider such risk factors in making any investment decision with respect to our securities.
