QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended June 30, 2017

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 001-33963

Iridium Communications Inc.

(Exact name of registrant as specified in its charter)

DELAWARE
(State of incorporation)

26-1344998
(I.R.S. Employer
Identification No.)

1750 Tysons Boulevard, Suite 1400, McLean, Virginia
(Address of principal executive offices)

22102
(Zip code)

703-287-7400

(Registrant's telephone number, including area code)

Edgar Filing: Iridium Communications Inc. - Form 10-Q

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of the registrant’s common stock, par value \$0.001 per share, outstanding as of July 24, 2017 was 97,668,880.

Iridium Communications Inc.

Notes to Condensed Consolidated Financial Statements

1. Basis of Presentation and Principles of Consolidation

Iridium Communications Inc. (the “Company”) has prepared its condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States (“U.S. GAAP”). The accompanying condensed consolidated financial statements include the accounts of (i) the Company, (ii) its wholly owned subsidiaries, and (iii) all less than wholly owned subsidiaries that the Company controls. All material intercompany transactions and balances have been eliminated.

In the opinion of management, the condensed consolidated financial statements reflect all normal recurring adjustments that the Company considers necessary for the fair presentation of its results of operations and cash flows for the interim periods covered, and of the financial position of the Company at the date of the interim condensed consolidated balance sheet. The operating results for interim periods are not necessarily indicative of the operating results for the entire year. Certain information and footnote disclosures normally included in consolidated financial statements prepared in accordance with U.S. GAAP have been condensed or omitted pursuant to instructions, rules and regulations prescribed by the U.S. Securities and Exchange Commission (“SEC”). These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2016, as filed with the SEC on February 23, 2017.

2. Significant Accounting Policies

Adopted Accounting Pronouncements

In March 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2016-09, Compensation – Stock Compensation, Improvements to Employee Share-Based Payment Accounting (“ASU 2016-09”). ASU 2016-09 addresses multiple changes that are primarily focused on income taxes and the presentation of taxes related to stock compensation, but also provides an option for two methods to account for forfeitures. The Company applied the new guidance effective January 1, 2017, as required. The requirements resulting from the adoption of ASU 2016-09 will be accounted for on a prospective basis.

• The Company made an accounting policy election to continue estimating the number of awards that are expected to be forfeited, consistent with the Company’s prior practice.

• The Company excluded the excess tax benefits and deficiencies component from the treasury stock method in the diluted earnings per share calculation. The change had an immaterial impact on the Company’s reported diluted earnings per share.

- The Company recorded current excess tax benefits and tax deficiencies as income tax benefit (expense) in the consolidated statements of operations and comprehensive income. The change resulted in an excess tax benefit of \$0.1 million and \$1.0 million recorded in the provision for income taxes for the three and six months ended June 30, 2017, respectively.

• The Company will present excess tax benefits as an operating activity on the condensed consolidated statement of cash flows rather than as a financing activity. Prior periods have not been adjusted.

There were no additional impacts on the Company’s financial statements, resulting from the adoption of ASU 2016-09 that required a retrospective or modified retrospective approach.

In July 2015, the FASB issued ASU No. 2015-11, Simplifying the Measurement of Inventory (“ASU 2015-11”). ASU 2015-11 requires that inventory within the scope of the guidance be measured at the lower of cost and net realizable value. Inventory measured using last-in, first-out and retail inventory method are excluded from this new guidance. When evidence exists that the net realizable value of inventory is less than its cost, the Company will recognize the difference as a loss in earnings in the period the measurement occurs. This ASU replaces the concept of market with the single measurement of net realizable value and is intended to create efficiencies for preparers and more closely aligns U.S. GAAP with International Financial Reporting Standards (IFRS). The Company applied the new guidance prospectively effective January 1, 2017, as required. The adoption had an immaterial impact on the Company’s condensed consolidated balance sheets, the condensed consolidated statements of operations and comprehensive income, and the condensed consolidated statements of cash flows as of and for the three and six months ended June 30, 2017.

Accounting Pronouncements Not Yet Adopted

In May 2014, the FASB and the International Accounting Standards Board jointly issued a comprehensive new revenue recognition standard, ASU No. 2014-09, Revenue from Contracts with Customers (“ASU 2014-09”), that will supersede nearly all existing revenue recognition guidance under U.S. GAAP. Under the new standard, revenue is recognized when a customer obtains control of promised goods or services and is recognized in an amount that reflects the consideration which the entity expects to receive in exchange for those goods or services. In addition, the standard requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from contracts with customers. The FASB has issued several amendments to the standard including clarification on accounting for licenses of intellectual property, identifying performance obligations, and most recently, technical corrections on the interpretation of the new guidance. In July 2015, the FASB voted to defer the effective date of ASU 2014-09 for public entities to be effective for annual and interim periods beginning after December 15, 2017. Early adoption would be permitted no earlier than the original effective date beginning after December 15, 2016. ASU 2014-09 becomes effective for the Company in the first quarter of fiscal 2018 and the Company anticipates adopting the standard using the full retrospective method, which will result in the presentation of prior reporting periods in a manner consistent with 2018. The cumulative effect of the standard will be recognized at the earliest reporting period shown.

The Company has established a project team in order to analyze the effect of the standard on its contracts by reviewing its current accounting policies and practices to identify potential differences which would result from applying the requirements of the new standard to its revenue contracts. The Company has aggregated its contracts into homogeneous revenue streams and is continuing to assess all potential effects of the standard. The Company anticipates a change to the recognition pattern of its prepaid revenue from expiration. The Company currently recognizes unused prepaid revenue at the date the right to access the prepaid service has expired. Under the new standard, the Company will estimate the expected revenue that will expire unused and recognize this revenue over the prepaid term. The Company is currently evaluating the impact on revenue from estimating prepaid revenue upon expiration and changing the term over which this revenue is recognized. The Company has not yet completed its review of the effect of this guidance on all revenue streams and, as a result, other changes from current U.S. GAAP may be identified.

In February 2016, the FASB issued ASU No. 2016-02, Leases (“ASU 2016-02”). ASU 2016-02 requires lessees to put most leases on their balance sheets but recognize expenses on their income statements in a manner similar to current accounting. This ASU is effective for public business entities in fiscal years beginning after December 15, 2018, including interim periods within those years. Early adoption is permitted and reporting organizations are required to use a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements. The Company is currently evaluating the effect ASU 2016-02 may have on its condensed consolidated financial statements and related disclosures, but a lease liability and related right-of-use asset will be recognized for operating lease arrangements.

In November 2016, the FASB issued ASU No. 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash (“ASU 2016-18”). ASU 2016-18 will reduce diversity in the classification and presentation of changes in restricted cash in the statement of cash flows. This ASU is effective for public business entities in fiscal years beginning after December 15, 2017, including interim periods within those years. Early adoption is permitted, including adoption in an interim period, and reporting organizations are required to use a retrospective transition method to each period presented. The Company is currently evaluating the effect ASU 2016-18 may have on its condensed consolidated statements of cash flows and related disclosures, but recognizing transfers between restricted and unrestricted cash accounts will not be reported as a cash flow.

Warranty Expense

The Company provides the first end-user purchaser of its subscriber equipment a warranty for one to five years from the date of purchase by such first end-user, depending on the product. The Company maintains a warranty reserve based on historical experience of warranty costs and expected occurrences of warranty claims on equipment. Costs associated with warranties, including equipment replacement, repairs, freight and program administration, are recorded as cost of subscriber equipment in the accompanying condensed consolidated statements of operations and comprehensive income.

Fair Value Measurements

The Company evaluates assets and liabilities subject to fair value measurements on a recurring and non-recurring basis to determine the appropriate level to classify them for each reporting period. This determination requires significant judgments to be made by management of the Company. The instruments identified as subject to fair value measurements on a recurring basis are cash and cash equivalents, marketable securities, prepaid expenses and other current assets, accounts receivable, accounts payable and accrued expenses and other current liabilities. Fair value is the price that would be received from the sale of an asset or paid to transfer a liability assuming an orderly transaction in the most advantageous market at the measurement date. U.S. GAAP establishes a hierarchical disclosure framework which prioritizes and ranks the level of observability of inputs used in measuring fair value. The fair value hierarchy consists of the following tiers:

Level 1, defined as observable inputs such as quoted prices in active markets for identical assets or liabilities;

7

Level 2, defined as observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and

Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

The carrying values of short-term financial instruments (primarily cash and cash equivalents, prepaid expenses and other current assets, accounts receivable, accounts payable, and accrued expenses and other current liabilities) approximate their fair values because of their short-term nature. The fair value of the Company's investments in money market funds approximates its carrying value; such instruments are classified as Level 1 and are included in cash and cash equivalents in the accompanying condensed consolidated balance sheets. The fair value of the Company's investments in commercial paper and short-term U.S. agency securities with original maturities of less than ninety days approximates their carrying value; such instruments are classified as Level 2 and are included in cash and cash equivalents in the accompanying condensed consolidated balance sheets.

The fair value of the Company's investments in fixed-income debt securities and commercial paper with original maturities of greater than ninety days are obtained using similar investments traded on active securities exchanges and are classified as Level 2 and are included in marketable securities in the accompanying condensed consolidated balance sheets. For fixed income securities that do not have quoted prices in active markets, the Company uses third-party vendors to price its debt securities resulting in classification as Level 2.

Depreciation and Amortization

The Company calculates depreciation expense using the straight line method and evaluates the appropriateness of the useful life used on a quarterly basis or as events occur that require additional assessment. Throughout 2017 and 2016, the Company updated its estimate of the first-generation satellites' remaining useful lives based on the continued refinement of the launch schedule, health of the first-generation constellation, and deployment plan for the Company's next-generation satellite constellation ("Iridium NEXT"). As a result, the estimated useful lives of the satellites within the first-generation constellation were extended and are consistent with the expected deployment of Iridium NEXT. The Company will continue to evaluate the useful lives of its first-generation satellites on an ongoing basis through the full deployment of Iridium NEXT, which is expected to occur in 2018. The changes in estimate will also have an effect on future periods through the deployment of Iridium NEXT. The \$7.5 million increase in depreciation expense for the six months ended June 30, 2017 compared to the same period of the prior year is primarily related to the addition of new assets, including Iridium NEXT satellites placed into service during the six-month period ended June 30, 2017 and assets related to the Russian gateway completed at the end of 2016, partially offset by the continued refinement in the estimated useful lives of the first-generation satellites.

3. Cash and Cash Equivalents, Restricted Cash and Marketable Securities

Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of ninety days or less to be cash equivalents. These investments, along with cash deposited in institutional money market funds, commercial paper, regular interest bearing and non-interest bearing depository accounts, are classified as cash and cash equivalents in the accompanying condensed consolidated balance sheet. The following table summarizes the Company's cash and cash equivalents:

	December	
June 30,	31,	Recurring Fair
2017	2016	Value Measurement

Edgar Filing: Iridium Communications Inc. - Form 10-Q

(in thousands)

Cash and cash equivalents:			
Cash	\$ 117,885	\$ 102,194	
Money market funds	217,314	266,478	Level 1
Commercial paper	-	2,495	Level 2
Total cash and cash equivalents	\$ 335,199	\$ 371,167	

Restricted Cash

The Company is required to maintain a minimum cash reserve for debt service related to its \$1.8 billion loan facility (the “Credit Facility”) (see Note 4). As of June 30, 2017 and December 31, 2016, the Company’s restricted cash balance, which includes a minimum cash reserve for debt service related to the Credit Facility and the interest earned on these amounts, was \$135.3 million and \$113.1 million, respectively.

Marketable Securities

Marketable securities consist of fixed-income debt securities and commercial paper with an original maturity in excess of ninety days. These investments are classified as available-for-sale and are included in marketable securities within current assets in the accompanying condensed consolidated balance sheets. All investments are carried at fair value. Unrealized gains and losses, net of taxes, are reported as a component of other comprehensive income or loss. The specific identification method is used to determine the cost basis of the marketable securities sold. There were no material realized gains or losses on the sale of marketable securities for six months ended June 30, 2017 and 2016. The Company regularly monitors and evaluates the fair value of its investments to identify other-than-temporary declines in value. The Company determined that the decline in fair value of its investments is temporary at June 30, 2017 as the Company does not intend to sell these securities, and it is not likely that the Company will be required to sell the securities before the recovery of their amortized cost basis.

The following tables summarize the Company's marketable securities:

	As of June 30, 2017					
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Recurring Fair Value Measurement	
	(in thousands)					
Fixed-income debt securities	\$17,075	\$ 6	\$ (6) \$17,075	Level 2	
U.S. treasury notes	4,251	-	(4) 4,247	Level 2	
Total marketable securities	\$21,326	\$ 6	\$ (10) \$21,322		

	As of December 31, 2016					
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Recurring Fair Value Measurement	
	(in thousands)					
Fixed-income debt securities	\$30,037	\$ 14	\$ (11) \$30,040	Level 2	
U.S. treasury notes	9,283	7	(2) 9,288	Level 2	
Total marketable securities	\$39,320	\$ 21	\$ (13) \$39,328		

The following table presents the contractual maturities of the Company's marketable securities:

	As of June 30, 2017		As of December 31, 2016	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(in thousands)			
Mature within one year	\$19,828	\$19,826	\$32,776	\$32,788
Mature after one year and within three years	1,498	1,496	6,544	6,540
Total	\$21,326	\$21,322	\$39,320	\$39,328

4. Commitments and Contingencies

Commitments

Thales

In June 2010, the Company executed a primarily fixed-price full-scale development contract (the “FSD”) with Thales Alenia Space France (“Thales”) for the design and build of satellites for Iridium NEXT. The total price under the FSD is \$2.3 billion, and the Company expects payment obligations under the FSD to extend through 2018, subject to payments using bills of exchange as described below. As of June 30, 2017, the Company had made aggregate payments of \$1,826.8 million to Thales, of which \$1,511.4 million were financed from borrowings under the Credit Facility, and which were capitalized as construction in progress within property and equipment, net in the accompanying condensed consolidated balance sheet. The Credit Facility was fully drawn in February 2017. Prior to the Credit Facility being fully drawn, the Company used the Credit Facility to pay 85% of each invoice received from Thales under the FSD, with the remaining 15% funded from cash on hand. The Company currently pays 100% of each invoice received from Thales from cash and marketable securities on hand or the issuance of a bill of exchange, a French law instrument of indebtedness similar to a promissory note.

On July 26, 2017, the Company entered into Amendments 28 and 29 to its FSD. The Company signed Amendment 28 on May 18, 2017, but effectiveness was conditioned on the effectiveness of Amendment 29. Amendment 28 revises the liquidated damages and other cost provisions regarding delays to the Iridium NEXT program. Under Amendment 28, the Company agreed with Thales that liquidated damages for Thales production delays to date would be set at \$30.0 million, with this amount to be used only to offset costs otherwise payable by the Company to Thales under the FSD with respect to past and future delays to the launch schedule from causes

other than Thales, at agreed upon rates. Any portion of the \$30.0 million remaining at the completion of the launch campaign will be forgiven. Liquidated damages owed to the Company from any future delays caused by Thales would remain payable in cash. Similarly, costs payable by the Company to Thales for non-Thales delays exceeding the \$30.0 million would be payable in cash. Unless there are substantial future delays to the Iridium NEXT program, the Company expects this arrangement will result in no cash payments due to delays by either party.

Amendment 29 provides for the deferral of payment by the Company of approximately \$100.0 million in milestones under the FSD that the Company expects to be completed in 2017 and 2018. Under Amendment 29, the Company will pay these milestones using bills of exchange due in March 2019, with interest at a specified base rate (LIBOR or SWAP, depending on the term of the bill of exchange) plus 1.4%, with the bills of exchange guaranteed by Bpifrance Assurance Export S.A.S. (“BPIAE”). Amendment 29 also requires that the Company pay Thales for the BPIAE premium on the guarantee in the amount of \$1.0 million in cash at signing plus 1.62% to be paid by bills of exchange on the same terms as stated above, on each bill of exchange to be issued.

The Company’s obligations to Thales that are currently scheduled to be paid, including the long-term bills of exchange, during the 12 months ending June 30, 2018 and 2019 are in the amounts of \$323.2 million and \$104.6 million, respectively, exclusive of fees and related interest. The timing of the Company’s obligations to Thales is based on current expectations regarding Thales’ manufacturing schedule and the targeted Space Exploration Technologies Corp. (“SpaceX”) launch schedule to complete the Iridium NEXT constellation in 2018.

SpaceX

In March 2010, the Company entered into an agreement with SpaceX to secure SpaceX as the primary launch services provider for Iridium NEXT (as amended to date, the “SpaceX Agreement”). The total price under the SpaceX Agreement for seven launches and a reflight option in the event of a launch failure is \$468.1 million. The SpaceX Falcon 9 rocket is configured to carry ten Iridium NEXT satellites to orbit for each of these seven launches. In November 2016, the Company entered into an agreement for an eighth launch with SpaceX to launch five additional satellites and share the launch services with GFZ German Research Centre for Geosciences (“GFZ”). The total price under this additional agreement with SpaceX for the eighth launch is \$67.9 million. GFZ will pay Iridium \$31.8 million to share the launch services to launch NASA’s two Gravity Recovery and Climate Experiment Follow-On satellites. As of June 30, 2017, the Company had made aggregate payments of \$420.4 million to SpaceX, which were capitalized as construction in progress within property and equipment, net in the accompanying condensed consolidated balance sheet. Additionally, the Company received \$22.9 million from GFZ as of June 30, 2017. The Company maintains a \$1.5 million refundable deposit with SpaceX for the reservation of additional future launches, which is not included in the total contract price. The Company’s obligations to SpaceX that are currently scheduled to be paid during the 12 months ending June 30, 2018 and 2019 are in the amounts of \$101.2 million and \$14.4 million, respectively. The timing of the Company’s obligations to SpaceX is based on the targeted SpaceX launch schedule to complete the Iridium NEXT constellation in 2018.

Kosmotras

In June 2011, the Company entered into an agreement with International Space Company Kosmotras (“Kosmotras”) as a supplemental launch service provider for Iridium NEXT (the “Kosmotras Agreement”). In June 2013, the Company exercised an option for one launch to carry two Iridium NEXT satellites. If the Company does not exercise any additional options, the total cost under the contract including this single launch will be \$51.8 million. As of June 30, 2017, the Company had made aggregate payments of \$36.8 million to Kosmotras, which were capitalized as construction in progress within property and equipment, net in the accompanying condensed consolidated balance sheet. In June 2015, the Company agreed with Kosmotras to replace the remaining options with a new set of options to purchase up to six dedicated launches. Kosmotras has to date been unable to obtain permission to launch the Company’s satellites. If permission is not obtained, the Company may be unable to recover the amounts already paid to Kosmotras. The Company’s obligations to Kosmotras that are currently scheduled to be paid during the 12 months

ending June 30, 2019 are \$15.0 million. The timing of the Company's obligations to Kosmotras is based on the earliest date the Company may include Kosmotras in its launch schedule.

Iridium NEXT Launch and In-Orbit Insurance

The Credit Facility requires the Company to obtain insurance covering the launch and first 12 months of operation of the Iridium NEXT satellites. The launch and in-orbit insurance the Company has obtained contains elements, consistent with the terms of the Credit Facility, of self-insurance and deductibles, providing reimbursement only after a specified number of satellite failures. As a result, a failure of one or more of the Company's NEXT satellites, or the occurrence of equipment failures and other related problems, could constitute an uninsured loss or require the payment of additional premiums and could harm the Company's financial condition. Furthermore, launch and in-orbit insurance does not cover lost revenue. The total premium for the Company's current launch and in-orbit insurance is \$118.2 million; as of June 30, 2017, the Company had made aggregate premium payments of \$48.9 million. The Company's insurance premium obligations to be paid during the 12 months ending June 30, 2018 are \$69.3 million. The timing of the majority of the contractual obligation payments is based on the targeted SpaceX launch schedule to complete the Iridium NEXT constellation in 2018.

Credit Facility

The Company estimates the aggregate costs associated with the design, build and launch of Iridium NEXT and related infrastructure upgrades through 2018 to be approximately \$3 billion. In October 2010, the Company entered into a \$1.8 billion credit facility with a syndicate of bank lenders (as amended to date, the “Credit Facility”). As of June 30, 2017, the Company reported \$1,688.4 million in borrowings from the credit facility in the accompanying condensed consolidated balance sheet, net of \$111.6 million of deferred financing costs, for an aggregate total of \$1.8 billion in borrowings. Pursuant to the Credit Facility, the Company maintains a minimum cash reserve for debt repayment in a debt service reserve account (the “DSRA”). As of June 30, 2017, the minimum required cash reserve balance was \$135.0 million, which is classified as restricted cash in the accompanying condensed consolidated balance sheet.

On July 26, 2017, the Company amended and restated the Credit Facility by a supplemental agreement. As amended, the Credit Facility delays \$54.0 million of the Company’s 2017 DSRA contributions, provides a refund of \$33.0 million in contributions made to date, and provides for a refund of an additional \$11.0 million in contributions made to date in the event that the Company’s projected Available Cash (as defined in the Credit Facility) falls below \$35.0 million on a three-month forward-looking basis through March 2019. The delay and refunds are effective through the end of March 2019, at which time the DSRA must be fully funded to the previously agreed amount of \$189.0 million. The Credit Facility also requires that the Company establish a new restricted account to receive payment of hosting fees from Aireon. Hosting fees up to \$50.0 million would be placed in the restricted account, which the Company could access based on the same \$35.0 million three-month forward-looking Available Cash threshold described above. Aireon hosting fees received in excess of the first \$50 million would be distributed pro rata to replenish the DSRA and secure the Thales bills of exchange, as described above. The Company will still need to receive a substantial payment of the Aireon hosting fees or make other financing arrangements by the end of the first quarter of 2019 in order to repay Thales and fully fund the DSRA.

The Credit Facility does not include any requirements that the Company raise additional equity, but requires the temporary suspension of dividend payments for five quarters on its Series A Preferred Stock and Series B Preferred Stock. As previously announced, in anticipation of this requirement, the Company began this suspension with the dividend payments payable on June 15, 2017.

Prior to the Credit Facility being fully drawn, the Company paid interest on the outstanding principal balance under the Credit Facility on a semi-annual basis in April and October through a combination of a cash payment and a deemed additional loan. The Credit Facility was fully drawn in February 2017, and beginning in April 2017, interest is being paid in cash. Interest costs incurred under the Credit Facility were \$21.6 million and \$42.8 million for the three and six months ended June 30, 2017, respectively, and \$19.0 million and \$37.2 million for the three and six months ended June 30, 2016, respectively. Scheduled semi-annual principal repayments will begin on March 31, 2018. During this repayment period, interest will be paid on the same date as the principal repayments. All interest costs incurred related to the Credit Facility have been capitalized during the construction period of the Iridium NEXT assets.

The funding plan for the \$3 billion in costs includes the substantial majority of the funds drawn under the Credit Facility, together with cash and marketable securities on hand, and internally generated cash flows, including contracted cash flows from hosted payloads.

While the contracted cash flows from the Company’s primary hosted payload customer, Aireon, are interest-bearing if not paid on time, the Company expects those hosted payload payments to be delayed. Aireon is working to secure contracts with the air navigation service providers, or ANSPs, including the FAA, for the sale of Aireon’s space-based automatic dependent surveillance-broadcast, or ADS-B, services. Aireon is currently seeking to raise the capital it will need to fund its continued operations and its hosted payload payments to the Company. Aireon’s ability to fund its hosted payload payments to the Company in the previously anticipated timeframe has been adversely affected by delays in its completion of sales to these ANSPs, which the Company believes results in part from delays in the development, construction and launch of the Iridium NEXT system.

There can be no assurance that internally generated cash flows, including those from hosting and data services on the Iridium NEXT satellites, will meet the Company's current expectations. If sufficient cash flows are not generated, or if the cost of implementing Iridium NEXT or the other elements of the Company's business plan are higher than anticipated, the Company may need further external funding. The ability to obtain additional funding may be adversely affected by a number of factors, including global economic conditions, and such funding may not be available on reasonable terms or at all. If the Company is not able to secure such funding in a timely manner, the ability to maintain the network, to design, build and launch Iridium NEXT and related ground infrastructure, products and services, and to pursue additional growth opportunities will be impaired, and the Company would likely need to delay some elements of the Iridium NEXT development. The Company's liquidity and the ability to fund its liquidity requirements also depend on the Company's future financial performance, which is subject to general economic, financial, regulatory and other factors that are beyond the Company's control.

The Company believes that its liquidity sources will provide sufficient funds for it to meet its liquidity requirements for at least the next 12 months.

Contingencies

From time to time, in the normal course of business, the Company is party to various pending claims and lawsuits. The Company is not aware of any such actions that it would expect to have a material adverse impact on its business, financial results or financial condition.

5. Boeing Insourcing Agreement

On November 28, 2016, the Company entered into an Insourcing Agreement with Boeing for the Company to hire, effective January 3, 2017, the majority of Boeing employees and third party contractors who were responsible for the operations and maintenance of the Company's satellite constellation and ground infrastructure. Pursuant to the Insourcing Agreement, the Company agreed to pay Boeing \$5.5 million, of which \$2.75 million was paid in December 2016 and the remaining \$2.75 million will be paid in December 2017. Concurrent with the hiring of the assembled workforce on January 3, 2017, the Company and Boeing terminated their previous Operations and Maintenance Agreement ("O&M Agreement") and Iridium NEXT Support Service Agreement and entered into a new Development Services Agreement ("DSA") with a \$6.0 million minimum annual commitment through 2021. As a result of these agreement terminations, Boeing no longer has a unilateral right to commence the de-orbit of the Company's first-generation satellites. The assembled workforce was recorded as a definite-lived intangible asset in January 2017 and will be amortized over an estimated useful life of 7 years. Additionally, by terminating the O&M Agreement, the Company recognized a \$14.2 million gain from the derecognition of a purchase accounting liability created from GHL Acquisition Corp.'s acquisition of Iridium in 2009 related to the fair value of the contractual arrangement with Boeing as of that date and the remainder of a credit resulting from the July 2010 Boeing O&M contract amendment.

6. Stock-Based Compensation

The Company accounts for stock-based compensation at fair value. The fair value of stock options is determined at the grant date using the Black-Scholes option pricing model. The fair value of restricted stock units ("RSUs") is equal to the closing price of the underlying common stock on the grant date. The fair value of an award that is ultimately expected to vest is recognized on a straight-line basis over the requisite service or performance period and is classified in the condensed consolidated statements of operations and comprehensive income in a manner consistent with the classification of the recipient's compensation. The expected vesting of the Company's performance-based RSUs is based upon the likelihood that the Company achieves the defined performance goals. The level of achievement of performance goals, if any, is determined by the compensation committee of the Company's Board of Directors. Stock-based awards to non-employee consultants are expensed at their fair value as services are provided according to the terms of their agreements and are classified in selling, general and administrative expenses in the accompanying condensed consolidated statements of operations and comprehensive income.

In May 2015, the Company's stockholders approved the 2015 Equity Incentive Plan (the "2015 Plan") to provide stock-based awards, including nonqualified stock options, incentive stock options, restricted stock and other equity securities, as incentives and rewards for employees, consultants and non-employee directors. In May 2017, the Company's stockholders amended and restated the 2015 Plan (the "Amended 2015 Plan"), primarily to increase the number of shares available under the plan. All grants in June 2017 were made under the Amended 2015 Plan, which continues to permit the grant of stock-based awards, including nonqualified stock options, incentive stock options, restricted stock and other equity securities to employees, consultants and non-employee directors. Members of the Company's board of directors have received a portion of their annual compensation in the form of equity awards under the 2015 Plan. An aggregate amount of approximately 96,000 and 126,000 RSUs were granted in January 2017 and 2016, respectively. These RSUs vest in full on the first anniversary of the grant date. The estimated aggregate grant date fair value of the RSUs granted to the directors in January 2017 and 2016 was \$1.0 million for each year.

During the six months ended June 30, 2017 and 2016, the Company granted approximately 110,000 and 214,000 stock options, respectively, to its employees, with an estimated aggregate grant date fair value of \$0.5 million and \$0.7

million, respectively. Additionally, during the six months ended June 30, 2017 and 2016, the Company granted 964,000 and 564,000 service-based RSUs, respectively, to its employees, with an estimated aggregate grant date fair value of \$8.5 million and \$4.0 million, respectively. Employee stock options and service-based RSUs generally vest over a four-year service period, with 25% vesting on the first anniversary of the grant date and the remainder vesting ratably on a quarterly basis thereafter.

In March 2017 and 2016, the Company awarded approximately 1,190,000 and 1,335,000 performance-based RSUs to the Company's executives and employees (the "Bonus RSUs"). The Company records stock-based compensation expense related to performance-based RSUs when it is considered probable that the performance conditions will be met. Vesting of the March 2017 and 2016 Bonus RSUs is and was dependent upon the Company's achievement of defined performance goals over a one-year period (fiscal year 2017 for the March 2017 Bonus RSUs and fiscal year 2016 for the March 2016 Bonus RSUs). Management believes it is probable that certain of the March 2017 Bonus RSUs will vest. The level of achievement, if any, of performance goals will be determined by the compensation committee of the Company's Board of Directors and, if such goals are achieved, the March 2017 Bonus RSUs will vest, subject to continued employment, in March 2018. Certain of the March 2016 Bonus RSUs vested in March 2017. The estimated aggregate grant date fair value of the March 2017 and 2016 Bonus RSUs was \$10.5 million and \$9.4 million, respectively.

Additionally, in March 2017 and 2016, the Company awarded approximately 173,000 and 119,000 performance-based RSUs, respectively, to the Company's executives (the "Performance RSUs"). Vesting of the 2017 and 2016 Performance RSUs is and was dependent upon the Company's achievement of defined performance goals over a two-year period (fiscal years 2017 and 2018 for the Performance RSUs granted in 2017 and fiscal years 2016 and 2017 for the Performance RSUs granted in 2016). Management believes it is probable that certain of the Performance RSUs will vest. The number of Performance RSUs that will ultimately vest may range from 0% to 150% of the original grant based on the level of achievement of the performance goals. If the Company achieves the performance goals, 50% of the Performance RSUs will vest in March in the year after the performance period ends and the remaining 50% will vest in March of the third year after grant, in each case subject to the executive's continued service as of the vesting date. The estimated aggregate grant date fair value of the Performance RSUs was \$1.5 million for the 2017 grants and \$0.8 million for the 2016 grants.

In June 2017 and June 2016, the Company granted approximately 8,000 and 35,000 RSUs, respectively, to non-employee consultants. The RSUs are generally subject to service-based vesting. The RSUs will vest 50% in June of the year after the grant and the remaining 50% will vest quarterly thereafter. The estimated aggregate grant date fair value of the RSUs granted to non-employee consultants during the six months ended June 30, 2017 and 2016 was \$0.1 million and \$0.3 million, respectively.

7. Equity Transactions and Instruments

Preferred Stock

The Company is authorized to issue 2.0 million shares of preferred stock with a par value of \$0.0001 per share. As described below, the Company issued 1.0 million shares of preferred stock in the fourth quarter of 2012 and 0.5 million shares of preferred stock in the second quarter of 2014. The remaining 0.5 million authorized shares of preferred stock remain undesignated and unissued as of June 30, 2017.

Series A Cumulative Perpetual Convertible Preferred Stock

In the fourth quarter of 2012, the Company issued 1.0 million shares of its 7.00% Series A Cumulative Perpetual Convertible Preferred Stock (the "Series A Preferred Stock") in a private offering. The Company received proceeds of \$96.5 million from the sale of the Series A Preferred Stock, net of the aggregate \$3.5 million in initial purchaser discount and offering costs. The net proceeds of this offering were used to partially fund the construction and deployment of Iridium NEXT and for other general corporate purposes.

Holders of Series A Preferred Stock are entitled to receive cumulative cash dividends at a rate of 7.00% per annum of the \$100 liquidation preference per share (equivalent to an annual rate of \$7.00 per share). Dividends are payable quarterly in arrears on each March 15, June 15, September 15 and December 15. The Series A Preferred Stock does not have a stated maturity date and is not subject to any sinking fund or mandatory redemption provisions. The Series A Preferred Stock ranks senior to the Company's common stock and pari passu with the Company's 6.75% Series B Cumulative Perpetual Convertible Preferred Stock (the "Series B Preferred Stock") with respect to dividend rights and rights upon the Company's liquidation, dissolution or winding-up. Holders of Series A Preferred Stock generally have no voting rights except for limited voting rights if the Company fails to pay dividends for six or more quarterly periods (whether or not consecutive) and in other specified circumstances. Holders of Series A Preferred Stock may convert some or all of their outstanding Series A Preferred Stock at an initial conversion rate of 10.6022 shares of common stock per \$100 liquidation preference, which is equivalent to an initial conversion price of approximately \$9.43 per share of common stock (subject to adjustment in certain events).

During the three months ended June 30, 2017, the Company began a five-quarter deferral of dividends on the Series A Preferred Stock. No cash dividends were declared or paid during the three months ended June 30, 2017, and no dividends were accrued. During the six months ended June 30, 2017, the Company paid cash dividends of \$1.8

million to holders of the Series A Preferred Stock. During the three and six months June 30, 2016, the Company paid cash dividends of \$1.8 million and \$3.5 million, respectively, to holders of the Series A Preferred Stock. As of June 30, 2017 and December 31, 2016, the Company had accrued \$0.3 million in cash dividends for the holders of the Series A Preferred Stock, which is included within accrued expenses and other current liabilities in the accompanying condensed consolidated balance sheets.

On or after October 3, 2017, the Company may, at its option, convert some or all of the Series A Preferred Stock into the number of shares of common stock that are issuable at the then-applicable conversion rate, subject to specified conditions. On or prior to October 3, 2017, the holders of Series A Preferred Stock will have a special right to convert some or all of the Series A Preferred Stock into shares of common stock in the event of fundamental changes described in the Certificate of Designations for the Series A Preferred Stock, subject to specified conditions and limitations. In certain circumstances, the Company may also elect to settle conversions in cash as a result of these fundamental changes. Any suspended dividends are required to be paid prior to conversion.

Series B Cumulative Perpetual Convertible Preferred Stock

In May 2014, the Company issued 500,000 shares of its Series B Preferred Stock in an underwritten public offering at a price to the public of \$250 per share. The purchase price received by the Company, equal to \$242.50 per share, reflected an underwriting discount of \$7.50 per share. The Company received proceeds of \$120.8 million from the sale of the Series B Preferred Stock, net of the \$3.8 million underwriter discount and \$0.4 million of offering costs. The net proceeds of this offering are being used to partially fund the construction and deployment of Iridium NEXT and for other general corporate purposes.

As of June 30, 2017, there were 499,955 shares of Series B Preferred Stock outstanding. Holders of Series B Preferred Stock are entitled to receive cumulative cash dividends at a rate of 6.75% per annum of the \$250 liquidation preference per share (equivalent to an annual rate of \$16.875 per share). Dividends are payable quarterly in arrears on each March 15, June 15, September 15 and December 15. The Series B Preferred Stock does not have a stated maturity date and is not subject to any sinking fund or mandatory redemption provisions. The Series B Preferred Stock ranks senior to the Company's common stock and pari passu with respect to the Company's Series A Preferred Stock with respect to dividend rights and rights upon the Company's voluntary or involuntary liquidation, dissolution or winding-up. Holders of Series B Preferred Stock generally have no voting rights except for limited voting rights if the Company fails to pay dividends for six or more quarterly periods (whether or not consecutive) and in other specified circumstances. Holders of Series B Preferred Stock may convert some or all of their outstanding Series B Preferred Stock at an initial conversion rate of 33.456 shares of common stock per \$250 liquidation preference, which is equivalent to an initial conversion price of approximately \$7.47 per share of common stock (subject to adjustment in certain events).

During the three months ended June 30, 2017, the Company began a five-quarter deferral of dividends on the Series B Preferred Stock. No cash dividends were declared or paid during the three months ended June 30, 2017, and no dividends were accrued. During the six months ended June 30, 2017, the Company paid cash dividends of \$2.1 million to holders of the Series B Preferred Stock. During the three and six months ended June 30, 2016, the Company paid cash dividends of \$2.1 million and \$4.2 million, respectively, to holders of the Series B Preferred Stock. As of June 30, 2017 and December 31, 2016, the Company had accrued \$0.4 million in cash dividends for the holders of the Series B Preferred Stock, which is included within accrued expenses and other current liabilities in the accompanying condensed consolidated balance sheet.

On or after May 15, 2019, the Company may, at its option, convert some or all of the Series B Preferred Stock into the number of shares of common stock that are issuable at the then-applicable conversion rate, subject to specified conditions. On or prior to May 15, 2019, in the event of certain specified fundamental changes, holders of the Series B Preferred Stock will have the right to convert some or all of their shares of Series B Preferred Stock into the greater of (i) a number of shares of the Company's common stock as subject to adjustment plus the make-whole premium, if any, and (ii) a number of shares of the Company's common stock equal to the lesser of (a) the liquidation preference divided by the market value of the Company's common stock on the effective date of such fundamental change and (b) 81.9672 (subject to adjustment). In certain circumstances, the Company may elect to cash settle any conversions in connection with a fundamental change. Any suspended dividends are required to be paid prior to conversion.

8. Net Income Per Share

The Company calculates basic net income per share by dividing net income attributable to common stockholders by the weighted-average number of shares of common stock outstanding during the period. Diluted net income per share takes into account the effect of potential dilutive common shares when the effect is dilutive. The effect of potential dilutive common shares, including common stock issuable upon exercise of outstanding stock options, is computed using the treasury stock method. The effect of potential dilutive common shares from the conversion of outstanding convertible preferred securities is computed using the as-if converted method at the stated conversion rate. The RSUs granted to members of the Company's board of directors contain non-forfeitable rights to dividends and therefore are

considered to be participating securities in periods of net income. As a result, the calculation of basic and diluted net income per share excludes net income attributable to the unvested RSUs granted to the Company's board of directors from the numerator and excludes the impact of the unvested RSUs granted to the Company's board of directors from the denominator.

Edgar Filing: Iridium Communications Inc. - Form 10-Q

The computations of basic and diluted net income per share are as follows:

	Three Months Ended June 30,	
	2017	2016
	(in thousands, except per share data)	
Numerator:		
Net income attributable to common stockholders		
(numerator for basic net income per share)	\$ 20,919	\$ 22,995
Net income allocated to participating securities	(20)	(30)
Numerator for basic net income per share	20,899	22,965
Dividends on Series A Preferred Stock, paid and unpaid	1,750	1,750
Dividends on Series B Preferred Stock, paid and unpaid	2,109	2,109
Numerator for diluted net income per share	\$ 24,758	\$ 26,824
Denominator:		
Denominator for basic net income per share - weighted		
average outstanding common shares	97,989	95,913
Dilutive effect of stock options	1,571	222
Dilutive effect of contingently issuable shares	54	-
Dilutive effect of Series A Preferred Stock	10,602	10,602
Dilutive effect of Series B Preferred Stock	16,727	16,728
Denominator for diluted net income per share	126,943	123,465
Net income per share attributable to common		
stockholders - basic	\$ 0.21	\$ 0.24
Net income per share attributable to common		
stockholders - diluted	\$ 0.20	\$ 0.22

For the three months ended June 30, 2017, \$1.8 million and \$2.1 million in cumulative unpaid dividends to holders of the Series A Preferred Stock and Series B Preferred Stock, respectively, were not declared or accrued as a result of all cash dividends being suspended in connection with the amendments described in Note 4, but such amounts were deducted to arrive at net income attributable to common stockholders. For the three months ended June 30, 2017, 1.8 million unvested non-performance-based RSUs were excluded from the computation of basic net income per share and not included in the computation of diluted net income per share, as the effect would be anti-dilutive, and 0.1 million unvested performance-based RSUs were not included in the computation of basic and diluted net income per share, as certain performance criteria have not been satisfied.

For the three months ended June 30, 2016, options to purchase 4.1 million shares of common stock were not included in the computation of diluted net income per share, as the effect would be anti-dilutive. For the three months ended June 30, 2016, 1.5 million unvested non-performance based RSUs were not included in the computation of basic net income per share and excluded from the computation of diluted net income per share, as the effect would be

anti-dilutive, and 1.7 million unvested performance-based RSUs were not included in the computation of basic and diluted net income per share, as certain performance criteria have not been satisfied.

average outstanding common shares	97,424	95,782
Dilutive effect of stock options	1,353	112
Dilutive effect of contingently issuable shares	553	3
Dilutive effect of Series A Preferred Stock	10,602	10,602
Dilutive effect of Series B Preferred Stock	16,727	16,728
Denominator for diluted net income per share	126,659	123,227

Net income per share attributable to common

stockholders - basic	\$ 0.56	\$ 0.50
----------------------	---------	---------

Net income per share attributable to common

stockholders - diluted	\$ 0.49	\$ 0.45
------------------------	---------	---------

For the six months ended June 30, 2017, \$1.8 million and \$2.1 million in cumulative unpaid dividends to holders of the Series A Preferred Stock and Series B Preferred Stock, respectively, were not declared or accrued as a result of all cash dividends being suspended in connection with the amendments described in Note 4, but such amounts were deducted to arrive at net income attributable to common stockholders. For the six months ended June 30, 2017, options to purchase 0.1 million shares of common stock were not included in the computation of diluted net income per share, as the effect would be anti-dilutive. For the six months ended June 30, 2017, 1.6 million unvested non-performance-based RSUs were excluded from the computation of basic net income per share and not included in the computation of diluted net income per share, as the effect would be anti-dilutive, and 0.6 million unvested performance-based RSUs were not included in the computation of basic and diluted net income per share, as certain performance criteria have not been satisfied.

For the six months ended June 30, 2016, options to purchase 4.4 million shares of common stock were not included in the computation of diluted net income per share, as the effect would be anti-dilutive. For the six months ended June 30, 2016, 1.4 million unvested non-performance based RSUs were excluded from the computation of basic net income per share and not included in the computation of diluted net income per share, as the effect would be anti-dilutive, and 1.3 million unvested performance-based RSUs were not included in the computation of basic and diluted net income per share, as certain performance criteria have not been satisfied.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

You should read the following discussion along with our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, filed on February 23, 2017 with the Securities and Exchange Commission, or the SEC, as well as our condensed consolidated financial statements included in this Form 10-Q.

This report contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. For this purpose, any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Such forward-looking statements include those that express plans, anticipation, intent, contingencies, goals, targets or future development or otherwise are not statements of historical fact. Without limiting the foregoing, the words "believe," "anticipate," "plan," "expect," "intend" and similar expressions are intended to identify forward-looking statements. These forward-looking statements are based on our current expectations and projections about future events, and they are subject to risks and uncertainties, known and unknown, that could cause actual results and developments to differ materially from those expressed or implied in such statements. The important factors described under the caption "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2016 filed on February 23, 2017, could cause actual results to differ materially from those indicated by forward-looking statements made herein. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Overview of Our Business

We are engaged primarily in providing mobile voice and data communications services using a constellation of orbiting satellites. We are the second largest provider of satellite-based mobile voice and data communications services based on revenue, and the only commercial provider of communications services offering true global coverage. Our satellite network provides communications services to regions of the world where wireless or wireline networks do not exist or are limited, including remote land areas, open oceans, airways, the polar regions, and regions where the telecommunications infrastructure has been affected by political conflicts or natural disasters.

We provide voice and data communications services to businesses, the U.S. and foreign governments, non-governmental organizations and consumers via our satellite network, which has an architecture of 66 in-orbit satellites with in-orbit spares and related ground infrastructure. We utilize an interlinked mesh architecture to route traffic across our satellite constellation using radio frequency crosslinks between satellites. This unique architecture minimizes the need for local ground facilities to support the constellation, which facilitates the global reach of our services and allows us to offer services in countries and regions where we have no physical presence.

We sell our products and services to commercial end-users through a wholesale distribution network, encompassing approximately 70 service providers, approximately 200 value-added resellers, or VARs, and approximately 70 value-added manufacturers, or VAMs, which create and sell technology that uses the Iridium® network either directly to the end user or indirectly through other service providers, VARs or dealers. These distributors often integrate our products and services with other complementary hardware and software and have developed a broad suite of applications using our products and services to target specific lines of business. We expect that demand for our services will increase as more applications are developed and deployed that utilize our technology.

At June 30, 2017, we had over 912,000 billable subscribers worldwide, representing an increase of 11% from approximately 823,000 billable subscribers at June 30, 2016. We have a diverse customer base, with end users in the following lines of business: land-based handset; machine-to-machine, or M2M; maritime; aviation; and government.

We recognize revenue from both the sale of equipment and the provision of services. We expect a higher proportion of our future revenue will be derived from service revenue, including revenue from hosting and data services. Revenues from providing voice and data service historically have generated higher gross margins than sales of subscriber equipment.

We began launching our new Iridium NEXT satellite constellation in January 2017, which we expect to complete in 2018, and which will replace our first-generation satellite network with the same interlinked mesh architecture of our first-generation constellation, with 66 operational satellites, as well as in-orbit and ground spares. Of the 20 Iridium NEXT satellites we have launched so far in 2017, 13 have been, or will soon be, placed into service and seven are being drifted to adjacent planes.

We have contracted with Thales Alenia Space France, or Thales, to construct the Iridium NEXT satellites, which are compatible with our first-generation constellation and current end-user equipment, so that as we launch Iridium NEXT satellites, we will replace the first-generation satellites in our constellation without affecting the service to our end users. We plan to deploy 75 satellites on seven dedicated Falcon 9 rockets and one shared Falcon 9 rocket launched by Space Exploration Technologies Corporation, or SpaceX. We estimate the costs associated with the design, build and launch of Iridium NEXT and related ground infrastructure upgrades through 2018 to be approximately \$3 billion. Our funding plan for these costs includes the substantial majority of the funds drawn under our

\$1.8 billion credit facility, or the Credit Facility, which was fully drawn as of February 2017, together with cash on hand and internally generated cash flows, including contracted cash flows from hosted payloads.

The Iridium NEXT constellation will also host the AireonSM system to provide a global air traffic surveillance service through a series of automatic dependent surveillance-broadcast, or ADS-B, receivers on the Iridium NEXT satellites. We formed Aireon LLC in 2011, with subsequent investments from the air navigation service providers, or ANSPs, of Canada, Italy, Denmark and Ireland, to develop and market this service. Aireon has contracted to provide the service to our co-investors in Aireon, as well as NATS (En Route) PLC, the ANSP of the United Kingdom, and other ANSPs. Aireon also plans to offer the service to other customers worldwide, including the U.S. Federal Aviation Administration, or FAA. Aireon has contracted to pay us a fee to host the ADS-B receivers on Iridium NEXT, and has begun paying us data service fees for the delivery of the air traffic surveillance data over the Iridium NEXT system on a per satellite basis, which will increase with the number of Iridium NEXT satellites placed into service. In addition, we have entered into an agreement with Harris Corporation, the manufacturer of the Aireon hosted payload, pursuant to which Harris pays us fees to allocate the remaining hosted payload capacity to its customers; Harris also pays us data service fees on behalf of these customers.

Recent Developments

Iridium NEXT

As described above, we have begun launching Iridium NEXT. As a result of the delays in the Iridium NEXT launch schedule, we updated the estimated useful lives of the current satellites and extended the lives to be consistent with the expected deployment of Iridium NEXT in 2018. We will continue to evaluate the useful lives of our current satellites through the full deployment of Iridium NEXT as the satellites are placed into service.

The Credit Facility requires us to obtain insurance covering the launch and first 12 months of operation of the Iridium NEXT satellites. We finished placing this insurance during 2016.

Our insurance program includes our ground spares and a prepaid relaunch right with SpaceX to self-insure a portion of our launch and in-orbit risks, as permitted under the Credit Facility. While we believe this has enabled us to obtain insurance at a substantially lower cost than would have been possible without the spares and relaunch right, if we use our spares to replace lost satellites, we will likely choose to purchase additional satellites to maintain a backup supply of spares. The cost of such additional spares is not included in the \$3 billion estimated cost for the design, build and launch of Iridium NEXT and related infrastructure upgrades through 2018.

Amendments to Credit Facility and FSD

As described below under “Liquidity and Capital Resources,” on July 26, 2017, we amended and restated the Credit Facility by a supplemental agreement. As amended and restated, the Credit Facility delays, until March 2019, \$54.0 million in contributions that we were previously scheduled to make during 2017 to the debt service reserve account, or DSRA, that we are required to maintain under the Credit Facility, and we will be refunded \$33.0 million of the contributions we have made to date. In addition, in the event that our projected Available Cash (as defined in the Credit Facility) falls below \$35.0 million on a three-month forward-looking basis between now and March 2019, we will receive a refund of an additional \$11.0 million in contributions made to date. The amended and restated Credit Facility also requires that we establish a new restricted account to receive payment of hosting fees from Aireon. Hosting fees up to \$50.0 million would be kept in the account and could also be drawn by us based on the same \$35.0 million three-month forward-looking Available Cash threshold described above. Hosting fees in excess of \$50.0 million will be distributed pro rata to replenish the DSRA and secure the payment of the bills of exchange to Thales described below.

The Credit Facility does not include any requirements that the Company raise additional equity but requires that we suspend the payment of dividends on our 7% Series A Cumulative Perpetual Convertible Preferred Stock and our 6.75% Series B Cumulative Perpetual Convertible Preferred Stock for five quarters. As previously announced, in anticipation of this requirement, we began this suspension with the dividend payments payable on June 15, 2017. The Credit Facility also includes revised financial covenant levels to reflect changing business conditions and makes immaterial changes to certain definitions and other terms in the Credit Facility.

Also on July 26, 2017, we entered into Amendments 28 and 29 to our Full Scale Development Contract with Thales Alenia Space France SAS, or Thales, for the Iridium NEXT System, dated June 1, 2010, which we refer to as the FSD. We signed Amendment 28 on May 18, 2017, but effectiveness was conditioned on the effectiveness of Amendment 29. Amendment 28 revises the liquidated damages and other cost provisions regarding delays to the Iridium NEXT program. Under Amendment 28, we agreed with Thales that liquidated damages for Thales production delays to date would be set at \$30.0 million, with this amount to be used only to offset costs otherwise payable by us to Thales under the FSD with respect to past and future delays to the launch schedule from causes other than Thales, at agreed upon rates. Any portion of the \$30.0 million remaining at the completion of the launch campaign will be forgiven. Liquidated damages owed to us from any future delays caused by Thales would remain payable in cash. Similarly, costs payable by us to Thales for non-Thales delays exceeding the \$30.0 million would be payable in cash. Unless there are substantial future delays to the Iridium NEXT program, we expect this arrangement will result in no cash payments by either party due to delays.

Amendment 29 provides for the deferral of payment by us of approximately \$100.0 million in milestones under the FSD that we expect to be completed in 2017 and 2018. Under Amendment 29, we will pay these milestones using bills of exchange due in March 2019, with interest at a specified base rate (LIBOR or SWAP, depending on the term of the bill of exchange) plus 1.4%, with the bills of exchange guaranteed by Bpifrance Assurance Export S.A.S., which we refer to as BPIAE. Amendment 29 also requires that we pay Thales for the BPIAE premium on the guarantee in the amount of \$1 million in cash at signing plus 1.62%, to be paid by bills of exchange on the same terms as stated above, on each bill of exchange to be issued.

Material Trends and Uncertainties

Our industry and customer base has historically grown as a result of:

- demand for remote and reliable mobile communications services;
- increased demand for communications services by disaster and relief agencies, and emergency first responders;
- a broad wholesale distribution network with access to diverse and geographically dispersed niche markets;
- a growing number of new products and services and related applications;
- improved data transmission speeds for mobile satellite service offerings;
- regulatory mandates requiring the use of mobile satellite services;
- a general reduction in prices of mobile satellite services and subscriber equipment; and
- geographic market expansion through the ability to offer our services in additional countries.

Nonetheless, we face a number of challenges and uncertainties in operating our business, including:

- our ability to continue to manufacture and launch Iridium NEXT and successfully transfer service from our first-generation satellites to our Iridium NEXT satellites;
- our ability to develop new and innovative products and services for Iridium NEXT, including Iridium Certus;
- our ability to generate sufficient internal cash flows, including contracted cash flows from hosted payloads, to fund a portion of the remaining costs associated with Iridium NEXT and to support our ongoing business;
- Aireon LLC's ability to successfully deploy and market its space-based ADS-B global aviation monitoring service to be carried as a hosted payload on the Iridium NEXT system;
- Aireon's ability to raise sufficient funds to pay hosting fees to us or our ability to seek alternative financing arrangements;
- our ability to maintain the health, capacity, control and level of service of our first-generation satellites through the completion of Iridium NEXT;
- changes in general economic, business and industry conditions, including the effects of currency exchange rates;
- our reliance on a single primary commercial gateway and a primary satellite network operations center;
- competition from other mobile satellite service providers and, to a lesser extent, from the expansion of terrestrial-based cellular phone systems and related pricing pressures;
- market acceptance of our products;
- regulatory requirements in existing and new geographic markets;
- rapid and significant technological changes in the telecommunications industry;
- reliance on our wholesale distribution network to market and sell our products, services and applications effectively;
- reliance on single-source suppliers for the manufacture of most of our subscriber equipment and for some of the components required in the manufacture of our end-user subscriber equipment and our ability to purchase parts that are periodically subject to shortages resulting from surges in demand, natural disasters or other events; and
- reliance on a few significant customers, particularly agencies of the U.S. government, for a substantial portion of our revenue, as a result of which the loss or decline in business with any of these customers may negatively impact our revenue, and risk of collectability of accounts receivable is more concentrated.

Edgar Filing: Iridium Communications Inc. - Form 10-Q

Comparison of Our Results of Operations for the Three Months Ended June 30, 2017 and 2016

(\$ in thousands)	Three Months Ended June 30,

Revenue

Commercial Service Revenue

	Three Months Ended June 30, 2017			June 30, 2016			Change		
	(Revenue in millions and subscribers in thousands)								
	Billable		ARPU	Billable		ARPU	Billable		ARPU
	Revenue	Subscribers		Revenue	Subscribers		Revenue	Subscribers	
Commercial voice and data	\$45.6	360	\$ 41	\$45.0	359	\$ 41	\$0.6	1	\$ -
Commercial M2M data	19.0	461	14	16.5	384	15	2.5	77	(1)
Total Commercial	\$64.6	821		\$61.5	743		\$3.1	78	

(1) Billable subscriber numbers shown are at the end of the respective period.

(2) Average monthly revenue per unit, or ARPU, is calculated by dividing revenue in the respective period by the average of the number of billable subscribers at the beginning of the period and the number of billable subscribers at the end of the period and then dividing the result by the number of months in the period. ARPU excludes revenue from our non-subscriber satellite, timing, and location service that was launched in the second quarter of 2016 and revenue from data fees collected as part of the hosted payload service that became available with Iridium NEXT in the first quarter of 2017.

For the three months ended June 30, 2017, commercial voice and data revenue increased slightly primarily due to the increase in hosting and data services and push-to-talk, offset by continued declines in telephony airtime usage.

We anticipate revenue from our hosting and data services to increase as more Iridium NEXT satellites are placed into service over the launch campaign, which is expected to be completed in 2018. Hosting and data services for the three months ended June 30, 2017 were immaterial.

Edgar Filing: Iridium Communications Inc. - Form 10-Q

For the three months ended June 30, 2017, commercial M2M data revenue increased \$2.5 million from the prior year period primarily due to a 20% increase in commercial M2M data billable subscribers, partially offset by a decline in the related ARPU due to the growth in subscribers using lower data usage plans.

We anticipate continued growth in billable commercial subscribers for the remainder of 2017.

Government Service Revenue

	Three Months Ended					
	June 30, 2017		June 30, 2016		Change	
	(Revenue in millions and subscribers in thousands)					
	Billable		Billable		Billable	
	Revenue	Subscribers ⁽¹⁾	Revenue	Subscribers ⁽¹⁾	Revenue	Subscribers
Government service revenue	\$22.0	92	\$22.0	80	\$ -	12

(1) Billable subscriber numbers shown are at the end of the respective period.

Government service revenues for the three months ended June 30, 2017 did not change from the prior year period as a result of the final contractual price increase having taken place in October 2015 under the Enhanced Mobile Satellite Services, or EMSS, contract with the U.S. government's Defense Information Systems Agency. Under this contract, revenue is a fixed monthly amount and is not based on subscribers or usage, allowing an unlimited number of users access to existing services. As we continue to innovate and better meet the needs of our customers, additional services not contemplated under the current EMSS contract may be provided in future periods at an amount mutually agreed upon by both parties. Additionally, the EMSS contract expires in October 2018 and pricing is then subject to renegotiation.

Subscriber Equipment Revenue

Subscriber equipment revenue decreased \$1.5 million, or 7%, for the three months ended June 30, 2017 compared to the prior year period. The decrease was primarily due to lower handset and Iridium M2M device sales, partially offset by increased Iridium L-Band transceiver unit sales.

Engineering and Support Service Revenue

	Three Months Ended		
	June 30, 2017	June 30, 2016	Change
	(In millions)		
Government	\$5.4	\$4.8	\$0.6
Commercial	0.7	0.5	0.2
Total	\$6.1	\$5.3	\$0.8

Engineering and support service revenue increased by \$0.8 million, or 15%, for the three months ended June 30, 2017 compared to the prior year period primarily as a result of increased engineering on the U.S. government's gateway modernization effort offset by decreased revenue for a contract with the U.S. Department of Defense, or DoD, to adapt

the Iridium Extreme® handset for DoD applications, which is near completion.

Operating Expenses

Cost of Services (exclusive of depreciation and amortization)

Cost of services (exclusive of depreciation and amortization) includes the cost of network engineering and operations staff, including contractors, software maintenance, product support services and cost of services for government and commercial engineering and support service revenue.

Cost of services (exclusive of depreciation and amortization) increased \$4.9 million, or 30%, for the three months ended June 30, 2017 from the prior year period, primarily as a result of insurance costs from Iridium NEXT satellites placed into service during 2017.

We expect our insurance expenses to increase as we place Iridium NEXT satellites into service throughout the launch campaign, which is expected to be complete in 2018.

Cost of Subscriber Equipment

Cost of subscriber equipment includes the direct costs of equipment sold, which consist of manufacturing costs, allocation of overhead, and warranty costs.

Cost of subscriber equipment decreased by \$1.0 million, or 8%, for the three months ended June 30, 2017 compared to the prior year period. This decrease is primarily due to a lower volume of handset and Iridium M2M device sales.

Research and Development

Research and development expenses decreased by \$1.0 million, or 25%, for the three months ended June 30, 2017 compared to the prior year period due to decreased spend on Iridium NEXT projects.

Selling, General and Administrative

Selling, general and administrative expenses that are not directly attributable to the sale of services or products include sales and marketing costs as well as employee-related expenses (such as salaries, wages, and benefits), legal, finance, information technology, facilities, billing and customer care expenses.

Selling, general and administrative expenses decreased by \$1.9 million, or 8%, for the three months ended June 30, 2017 compared to the prior year period, primarily due to decreases in employee-related expenses related to the reclassification of expenses associated with the Boeing Insourcing Agreement, partially offset by increases in professional fees.

Depreciation and Amortization

Depreciation and amortization expense increased by \$7.4 million, or 57%, for the three months ended June 30, 2017 compared to the prior year period, primarily due to the addition of new assets, including Iridium NEXT satellites placed into service during 2017 and assets related to the Russian gateway completed at the end of 2016.

Provision for Income Taxes

For the three months ended June 30, 2017, our income tax provision was \$11.7 million, compared to \$15.6 million for the prior year period. The decrease in the income tax provision is primarily related to a decrease in our income before taxes as well as a decrease in our effective tax rate related to lower state taxes in the current year compared to the prior year. If our current estimates change in future periods, the impact on the deferred tax assets and liabilities may change correspondingly.

Net Income

Net income was \$24.8 million for the three months ended June 30, 2017, a decrease of \$2.1 million from the prior year period. This decrease in net income was primarily driven by the increases in depreciation expense and insurance costs as described above, partially offset by the increase in commercial M2M data service revenue and the decrease in the provision for income taxes as described above.

For the six months ended June 30, 2017, commercial voice and data revenue increased slightly primarily due to increases in hosting and data services and Iridium OpenPort® services, partially offset by continued declines in telephony airtime usage.

Edgar Filing: Iridium Communications Inc. - Form 10-Q

We anticipate revenue from our hosting and data services to increase as more Iridium NEXT satellites are placed into service over the launch campaign, which is expected to be completed in 2018. Hosting and data services for the six months ended June 30, 2017 were immaterial.

For the six months ended June 30, 2017, commercial M2M data revenue increased primarily due to a 20% increase in commercial M2M data billable subscribers, partially offset by a decline in the related ARPU due to the growth in subscribers using lower data usage plans.

We anticipate continued growth in billable commercial subscribers for the remainder of 2017.

Government Service Revenue

	Six Months Ended					
	June 30, 2017		June 30, 2016		Change	
	(Revenue in millions and subscribers in thousands)					
	Billable		Billable		Billable	
	Revenue	Subscribers ⁽¹⁾	Revenue	Subscribers ⁽¹⁾	Revenue	Subscribers
Government service revenue	\$44.0	92	\$44.0	80	\$ -	12

(1) Billable subscriber numbers shown are at the end of the respective period.

Government service revenues for the six months ended June 30, 2017 did not change from the prior year period as a result of the final contractual price increase having taken place in October 2015 under the EMSS contract as described above.

Subscriber Equipment Revenue

Subscriber equipment revenue decreased \$2.0 million, or 5%, for the six months ended June 30, 2017 compared to the prior year period. The decrease was primarily due to lower handset sales, partially offset by increased Iridium L-Band transceiver and M2M device unit sales.

Engineering and Support Service Revenue

Six Months Ended		
June 30, 2017	June 30, 2016	Change
(In millions)		

Edgar Filing: Iridium Communications Inc. - Form 10-Q

Government	\$10.5	\$11.0	\$ (0.5)
Commercial	1.2	1.2	-
Total	\$11.7	\$12.2	\$ (0.5)

Engineering and support service revenue decreased by \$0.5 million, or 4%, for the six months ended June 30, 2017 compared to the prior year period primarily as a result of decreased revenue for a contract with the U.S. Department of Defense, or DoD, to adapt the Iridium Extreme® handset for DoD applications, which is near completion, offset by increased engineering for the U.S. government's gateway modernization effort.

Operating Expenses

Cost of Services (exclusive of depreciation and amortization)

Cost of services (exclusive of depreciation and amortization) increased \$6.0 million, or 18%, for the six months ended June 30, 2017 from the prior year period, primarily as a result of insurance costs from Iridium NEXT satellites placed into service during the first half of 2017 and costs associated with operating our new gateway in Russia that completed at the end of 2016.

We expect our insurance expenses to increase as we place Iridium NEXT satellites into service throughout the launch campaign, which is expected to be complete in 2018.

Cost of Subscriber Equipment

Cost of subscriber equipment decreased by \$1.4 million, or 6%, for the six months ended June 30, 2017 compared to the prior year period. This decrease is primarily due to a lower volume of handset sales, partially offset by increased Iridium L-Band transceiver and M2M device unit sales.

Research and Development

Research and development expenses decreased by \$0.3 million, or 5%, for the six months ended June 30, 2017 compared to the prior year period due to decreased spend on Iridium NEXT projects.

Selling, General and Administrative

Selling, general and administrative expenses decreased by \$1.7 million, or 4%, for the six months ended June 30, 2017 compared to the prior year period, primarily due to decreases in employee-related expenses related to the reclassification of expenses associated with the Boeing Insourcing Agreement, partially offset by increases in professional fees.

Depreciation and Amortization

Depreciation and amortization expense increased by \$7.9 million, or 31%, for the six months ended June 30, 2017 compared to the prior year period, primarily due to the addition of new assets, including Iridium NEXT satellites placed into service during the six-month period ended June 30, 2017 and assets related to the Russian gateway completed at the end of 2016.

Gain on Boeing Transaction

On November 28, 2016, we entered into an Insourcing Agreement with Boeing for us to hire, effective as of January 3, 2017, the majority of Boeing employees and third party contractors who were responsible for the operations and maintenance of our satellite constellation and ground infrastructure. As a result, we and Boeing terminated our previous Operations and Maintenance Agreement, or O&M Agreement, and our previous Iridium NEXT Support Service Agreement and entered into a new Development Services Agreement, or DSA, with a \$6.0 million annual take-or-pay commitment through 2021.

We recognized a \$14.2 million gain in the first quarter of 2017, consisting of (1) the derecognition of a purchase accounting liability of \$11.0 million created when GHL Acquisition Corp. acquired Iridium in 2009 related to the fair value of the contractual arrangement with Boeing as of that date and (2) the remainder of a credit, \$3.2 million, resulting from an O&M Agreement amendment in July 2010.

Provision for Income Taxes

For the six months ended June 30, 2017, our income tax provision was \$30.1 million, compared to \$30.6 million for the prior year period. The decrease in the income tax provision is primarily related to a decrease in our effective tax rate related to lower state taxes in the current year compared to the prior year partially offset by an increase in our income before income taxes compared to the prior year. If our current estimates change in future periods, the impact on the deferred tax assets and liabilities may change correspondingly.

Net Income

Net income was \$62.7 million for the six months ended June 30, 2017, an increase of \$7.4 million from the prior year period. This increase in net income was primarily driven by the \$14.2 million gain on the Boeing transaction, and the increase in commercial M2M data service revenue, as described above. This increase was partially offset by the \$10.5 million increase in total operating expenses driven by increased depreciation and Iridium NEXT insurance as noted above.

Liquidity and Capital Resources

As of June 30, 2017, our total cash and cash equivalents balance was \$335.2 million, and our marketable securities balance was \$21.3 million. Our principal sources of liquidity are cash, cash equivalents and marketable securities, as well as internally generated cash flows, including contracted cash flows from hosted payloads. Our Credit Facility was fully drawn as of February 2017. Our principal liquidity requirements are to meet capital expenditure needs, principally the launch and deployment of Iridium NEXT, as well as for working capital, interest and future principal payments on the Credit Facility, and bills of exchange to Thales, as described below, and future dividend payments on our Series A Preferred Stock and Series B Preferred Stock.

On July 26, 2017, we amended and restated the Credit Facility by a supplemental agreement. As amended, the Credit Facility delays \$54.0 million of our 2017 debt service reserve account, or DSRA contributions, provides a refund of \$33.0 million in contributions we have made to date, and provides for a refund of an additional \$11.0 million in contributions made to date in the event that our projected Available Cash (as defined in the Credit Facility) falls below \$35.0 million on a three-month forward-looking basis through March 2019. The delay and refunds are effective through the end of March 2019, at which time the DSRA must be fully funded to the previously agreed amount of \$189.0 million. The Credit Facility also requires that we establish a new restricted account to receive payment of hosting fees from Aireon. Hosting fees up to \$50.0 million would be kept in the account and could also be drawn by us based on the same \$35.0 million three-month forward-looking Available Cash threshold described above. Aireon hosting fees in excess of the first \$50.0 million would be distributed pro rata to replenish the DSRA and secure the payment of the bills of exchange to Thales described below.

The Credit Facility does not include any requirements that we raise additional equity but requires that we suspend the payment of dividends on our 7% Series A Cumulative Perpetual Convertible Preferred Stock and our 6.75% Series B Cumulative Perpetual Convertible Preferred Stock for five quarters. As previously announced, in anticipation of this requirement, we began this suspension with the dividend payments payable on June 15, 2017.

Also on July 26, 2017, we entered into Amendment 29 to our Full Scale Development Contract with Thales Alenia Space France SAS, or Thales, for the Iridium NEXT System, dated June 1, 2010, which we refer to as the FSD.

Amendment 29 provides for the deferral of payment by us of approximately \$100.0 million in milestones under the FSD that we expect to be completed in 2017 and 2018. Under Amendment 29, we will pay these milestones using bills of exchange due in March 2019, with interest at a specified base rate (LIBOR or SWAP, depending on the term of the bill of exchange) plus 1.4%, with the bills of exchange guaranteed by Bpifrance Assurance Export S.A.S., which we refer to as BPIAE. Amendment 29 also requires that we pay Thales for the BPIAE premium on the guarantee in the amount of \$1.0 million in cash at signing plus 1.62%, to be paid by bills of exchange on the same terms as stated above, on each bill of exchange to be issued. In connection with these arrangements, we also agreed with Thales as to the amount of liquidated damages Thales owes us for manufacturing delays to date and the additional costs we must pay Thales for launch delays. Unless there are substantial future delays to the Iridium NEXT program, we expect this arrangement will result in no cash payments due to delays by either party.

While the contracted cash flows from our primary hosted payload customer, Aireon, are interest-bearing if not paid on time, we expect those hosted payload payments will continue to be delayed. Aireon is working to secure contracts with ANSPs, including the FAA, for the sale of Aireon's space-based ADS-B services. Aireon is currently seeking to raise the capital it will need to fund its continued operations and a portion of our hosted payload payments. Its ability to fund our hosted payload payments in the previously anticipated timeframe has been adversely affected by delays in its sales efforts to these ANSPs, which we believe in part results from delays in the development, construction and launch of the Iridium NEXT system.

There can be no assurance that our internally generated cash flows, including those from hosting and data services on our Iridium NEXT satellites, will meet our current expectations. If we do not generate sufficient cash flows, or if the

cost of implementing Iridium NEXT or the other elements of our business plan are higher than anticipated, we may need further external funding. Our ability to obtain additional funding may be adversely affected by a number of factors, including global economic conditions, and such funding may not be available on reasonable terms or at all. If we are not able to secure such funding in a timely manner, our ability to maintain our network, to design, build and launch Iridium NEXT and related ground infrastructure, products and services, and to pursue additional growth opportunities will be impaired, and we would likely need to delay some elements of our Iridium NEXT deployment. Our liquidity and our ability to fund our liquidity requirements also depend on our future financial performance, which is subject to general economic, financial, regulatory and other factors that are beyond our control.

Holders of Series A Preferred Stock and Series B Preferred Stock are entitled to receive cumulative cash dividends at an annual rate of \$7.00 and \$16.875 per share, respectively. Dividends are payable quarterly in arrears on each March 15, June 15, September 15 and December 15. For each full quarter that the Series A Preferred Stock or Series B Preferred Stock, as applicable, is outstanding, and assuming that no shares have been converted into common stock, we are required to pay cash dividends of \$1.75 million and \$2.1 million, respectively, per quarter. Except to the extent we suspend payment of the dividends as described above, we expect that we will satisfy dividend requirements, if and when declared. As discussed above, in anticipation of the amendment to the Credit Facility, we suspended these payments for five quarters, beginning with the June 15, 2017 payment.

As of June 30, 2017, we reported \$1,688.4 million in borrowings under the Credit Facility in our condensed consolidated balance sheet, net of \$111.6 million of deferred financing costs, for an aggregate balance of \$1.8 billion outstanding under the Credit Facility. As of June 30, 2017, the DSRA balance was \$135.2 million, which is classified as restricted cash in our condensed consolidated balance sheet. The DSRA requirement is scheduled to increase to \$189.0 million in March 2019. In addition to the minimum debt service levels, financial covenants under the Credit Facility include:

- an available cash balance of at least \$25 million;
 - a debt-to-equity ratio, which is calculated as the ratio of total net debt to the aggregate of total net debt and total stockholders' equity, of no more than 0.7 to 1, measured each June 30 and December 31;
 - specified maximum levels of annual capital expenditures (excluding expenditures on the construction of Iridium NEXT satellites) through the year ending December 31, 2024;
 - specified minimum levels of consolidated operational earnings before interest, taxes, depreciation and amortization, or operational EBITDA, for the 12-month periods ending June 30 and December 31, 2017;
 - specified minimum cumulative cash flow requirements from customers who have hosted payloads on our satellites, measured each June 30 and December 31 through June 30, 2019;
 - a debt service coverage ratio, measured during the repayment period, of not less than 1 to 1.5; and
 - specified maximum leverage levels during the repayment period that decline from a ratio of 7.53 to 1 for the twelve months ending June 30, 2018 to a ratio of 2.36 to 1 for the twelve months ending December 31, 2024.
- Our available cash balance, as defined by the Credit Facility, was \$339.9 million as of June 30, 2017. Our debt-to-equity ratio was 0.51 to 1 as of June 30, 2017, the last point at which it was required to be measured. We were also in compliance with the operational EBITDA and hosted payload cash flow covenants set forth above as of June 30, 2017, the last point at which they were required to be measured, and with the annual capital expenditure covenant as of December 31, 2016, the last point at which it was required to be measured.

The covenants regarding capital expenditures, operational EBITDA and hosted payload cash flows are calculated in connection with a measurement, which we refer to as available cure amount, that is derived using a complex calculation based on overall cash flows, as adjusted by numerous measures specified in the Credit Facility. In a period in which our capital expenditures exceed, or our operational EBITDA or hosted payload cash flows fall short of, the amount specified in the respective covenant, we would be permitted to allocate available cure amount, if any, to prevent a breach of the applicable covenant. As of June 30, 2017, the last point at which it was measured, we had no available cure amount, although it was not necessary for us to apply any available cure amount to maintain compliance with the covenants. The available cure amount has fluctuated significantly from one measurement period to the next, and we expect that it will continue to do so.

The covenants also place limitations on our ability and that of our subsidiaries to carry out mergers and acquisitions, dispose of assets, grant security interests, declare, make or pay dividends, enter into transactions with affiliates, incur additional indebtedness, or make loans, guarantees or indemnities. If we are not in compliance with the financial covenants under the Credit Facility, after any opportunity to cure such non-compliance, or we otherwise experience an event of default under the Credit Facility, the lenders may require repayment in full of all principal and interest outstanding under the Credit Facility. It is unlikely we would have adequate funds to repay such amounts prior to the scheduled maturity of the Credit Facility. If we fail to repay such amounts, the lenders may foreclose on the assets we have pledged under the Credit Facility, which include substantially all of our assets and those of our domestic subsidiaries.

We believe that our liquidity sources will provide sufficient funds for us to meet our liquidity requirements for at least the next 12 months.

Cash Flows

The following table summarizes our cash flows:

	Six Months Ended June 30,		
	2017	2016	Change
	(in thousands)		
Cash provided by operating activities	\$119,866	\$108,835	\$11,031
Cash used in investing activities	\$(150,271)	\$(29,951)	\$(120,320)
Cash provided by (used in) financing activities	\$(5,492)	\$101,955	\$(107,447)

Cash Flows from Operating Activities

Net cash provided by operating activities for the six months ended June 30, 2017 increased \$11.0 million from the prior year period principally due to changes in working capital requirements compared to the prior period.

Cash Flows from Investing Activities

Net cash used in investing activities for the six months ended June 30, 2017 increased by \$120.3 million compared to the prior year period primarily due to a \$109.0 million decrease in net sales of marketable securities and an \$11.4 million increase in capital expenditures primarily related to Iridium NEXT.

Cash Flows from Financing Activities

Net cash used in financing activities for the six months ended June 30, 2017 increased by \$107.4 million from the prior year period primarily due to the decrease in borrowings under our credit facility in 2017, as it was fully drawn in February 2017.

Contractual Obligations and Commitments

The following table summarizes our outstanding contractual obligations as of June 30, 2017 (in millions), but includes the impact of the July 26, 2017 amendment and restatement of the Credit Facility and the amendments executed on that date to the FSD, as described above in Liquidity and Capital Resources:

	Less than 1 year	1-3 Years	3-5 years	More than 5 years	Total
Contractual Obligations					
Payment obligations:					
Thales ⁽¹⁾	\$323.2	\$104.6	\$—	\$—	\$427.8
Thales related interest	1.0	5.9	—	—	6.9
SpaceX ⁽²⁾	101.2	14.4	—	—	115.6
Launch and in-orbit insurers ⁽³⁾	69.3	—	—	—	69.3
Kosmotras ⁽⁴⁾	—	15.0	—	—	15.0
Boeing ⁽⁵⁾	8.8	12.0	9.0	—	29.8

Debt obligations: ⁽⁶⁾

Principal	18.0	405.0	748.2	628.8	1,800.0
Contractual interest	78.9	158.3	100.6	38.2	376.0
Operating lease obligations ⁽⁷⁾	3.6	7.3	7.4	10.5	28.8
Uncertain tax positions ⁽⁸⁾	—	—	—	—	1.0
Unconditional purchase obligations ⁽⁹⁾	14.4	3.8	1.4	—	19.6
Total	\$618.4	\$726.3	\$866.6	\$677.5	\$2,889.8

- (1) Thales obligations consist of commitments under the FSD for the design and manufacture of satellites for Iridium NEXT. We previously used the Credit Facility to pay 85% of each invoice received from Thales under the FSD with the remaining 15% funded from cash on hand. The Credit Facility was fully drawn in February 2017, and as a result, we now pay 100% of each invoice received from Thales from cash and marketable securities on hand or the issuance of up to \$100.0 million in bills of exchange due in March 2019. As of June 30, 2017, we had made aggregate payments of \$1,826.8 million to Thales. The timing of a portion of the contractual obligation payments to Thales shown in the table above is based on current expectations regarding Thales' manufacturing schedule and SpaceX's targeted launch schedule.
- (2) SpaceX obligations consist of remaining payments to secure SpaceX as the primary launch services provider for Iridium NEXT. The total price for seven launches and a reflight option in the event of launch failure is \$468.1 million. In November 2016, we entered into an agreement for an eighth launch with SpaceX to launch five spare satellites and share the services with GFZ, the German Research Centre for Geosciences. The total price under our agreement with SpaceX for the eighth launch is \$67.9 million. As of June 30, 2017, we had made aggregate payments of \$420.4 million to SpaceX. The timing of a

portion of the contractual obligation payments to SpaceX shown in the table above is based on SpaceX's targeted launch schedule.

- (3) The total insurance premium is \$118.2 million, and as of June 30, 2017, we had made aggregate payments of \$48.9 million. The timing of the majority of the contractual obligation payments shown in the table above is based on SpaceX's targeted launch schedule.
- (4) Kosmotras obligations consist of remaining payments to purchase one launch. In June 2013, we exercised an option for one launch to carry two Iridium NEXT satellites. If we do not exercise any additional options, the total cost under the contract including this single launch will be \$51.8 million. As of June 30, 2017, we had made aggregate payments of \$36.8 million to Kosmotras. The timing of a portion of the contractual obligation payments to Kosmotras shown in the table above is based on the earliest date we may include Kosmotras in our launch schedule.
- (5) Boeing obligations represent a new five-year take-or-pay commitment with the execution of the Development Services Agreement and the final payment for the acquisition of the assembled workforce due in December 2017.
- (6) Debt obligations include repayment of the Credit Facility as of June 30, 2017. We have included interest payments to be made on our fixed and variable rate tranches of the Credit Facility. Interest payments for variable rate debt have been estimated based on the six-month LIBOR forward contracts. We did not include any scheduled increases in the DSRA, which is classified as restricted cash on our condensed consolidated balance sheet. The repayment schedule includes \$120.0 million in Aireon redemption and Aireon dividends that must be used to prepay the Credit Facility based on current expectations regarding Aireon funding.
- (7) Operating lease obligations do not include payments to landlords covering real estate taxes, common area maintenance and other charges, as such fees are not determinable based upon the provisions of our lease agreements.
- (8) As of June 30, 2017, we estimated our uncertain tax positions to be \$1.0 million, including penalties and interest. However, we are unable to reasonably estimate the period of the possible future payments for the remaining balance, and therefore the remaining balance has not been reflected in a specified period.
- (9) Unconditional purchase obligations include our agreement with a supplier for the manufacturing of our devices and various commitments with other vendors that are enforceable, legally binding and have specified terms, including fixed or minimum quantities, minimum or variable price provisions, and a fixed timeline. Unconditional purchase obligations do not include agreements that are cancelable by us without penalty.

The contractual obligations table does not include future payments of dividends on the Series A Preferred Stock or Series B Preferred Stock. Holders of Series A Preferred Stock are entitled to receive cumulative cash dividends when, as and if declared from, and including, the date of original issue at a rate of 7.00% per annum of the \$100 liquidation preference per share, which is equivalent to an annual rate of \$7.00 per share. Holders of Series B Preferred Stock are entitled to receive cumulative cash dividends when, as and if declared from, and including, the date of original issue at a rate of 6.75% per annum of the \$250 liquidation preference per share, which is equivalent to an annual rate of \$16.875 per share. Dividends on both the Series A Preferred Stock and Series B Preferred Stock are payable quarterly in arrears, on March 15, June 15, September 15 and December 15 of each year, although we have temporarily suspended dividend payments as noted above. Neither the Series A Preferred Stock nor the Series B Preferred stock has a stated maturity date. Holders of Series A Preferred Stock and Series B Preferred Stock may convert some or all of their outstanding shares to common stock at the stated conversion rate. On or after October 3, 2017, we may at our option cause some or all of the shares of Series A Preferred Stock to be automatically converted into shares of common stock at the then prevailing conversion rate if specified conditions are satisfied. On or after May 15, 2019, we may, at our option, convert some or all of the Series B Preferred Stock into the number of shares of common stock that are issuable at the then-applicable conversion rate, subject to specified conditions. We cannot forecast the conversions, if any, of Series A Preferred Stock or Series B Preferred Stock to common stock and thus cannot forecast with certainty the amounts of future dividend payments on outstanding Series A Preferred Stock. As of June 30, 2017, there were 1,000,000 shares of Series A Preferred Stock and 499,955 shares of Series B Preferred Stock outstanding.

Off-Balance Sheet Arrangements

We do not currently have any off-balance sheet arrangements, as such term is defined in Item 303(a)(4)(ii) of the SEC's Regulation S-K, that have or are reasonably likely to have a material current or future effect on our financial condition, results of operations, liquidity or capital resources.

Seasonality

Our results of operations have been subject to seasonal usage changes for commercial customers, and we expect that our results will be affected by similar seasonality effects in the future. March through October are typically the peak months for commercial voice services revenue and related subscriber equipment sales. Commercial M2M revenue has been less subject to seasonal usage changes, and revenue from our fixed-price U.S. government contract is not subject to seasonal fluctuations.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States, or U.S. GAAP. The preparation of these financial statements requires the use of estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to revenue recognition, collectability of accounts receivable, useful lives of property and equipment, long-lived assets and other intangible assets, inventory, internally developed software, deferred financing costs, asset retirement obligations, income taxes, stock-based compensation, warranty expenses, loss contingencies, and other estimates. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. During the three months ended June 30, 2017, there were no material changes to our critical accounting policies and use of estimates.

Recent Accounting Pronouncements

Refer to Note 2 to our condensed consolidated financial statements for a full description of recent accounting pronouncements and recently adopted pronouncements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The fixed price under the FSD with Thales is denominated in U.S. dollars. As a result, we do not bear any foreign currency exchange risk under the FSD.

We have borrowed an aggregate \$1.8 billion under the Credit Facility as of June 30, 2017. A portion of the draws we made under the Credit Facility bear interest at a floating rate equal to the London Interbank Offered Rate, or LIBOR, plus 1.95% and will, accordingly, subject us to interest rate fluctuations in future periods. Had the currently outstanding borrowings under the Credit Facility been outstanding throughout the three months ended June 30, 2017, a one-half percentage point increase or decrease in the LIBOR would not have had a material impact on our interest cost for the period.

Financial instruments that potentially subject us to concentrations of credit risk consist primarily of cash and cash equivalents, marketable securities, accounts receivable and accounts payable. At times we maintain cash and cash equivalent deposit balances in excess of Federal Deposit Insurance Corporation limits, and we may have marketable securities balances in excess of Securities Investment Protection Corporation limits. However, we maintain our cash, cash equivalents and marketable securities with financial institutions with high credit ratings. The majority of our cash is swept nightly into funds that invest in or are collateralized by U.S. government-backed securities. We invest in marketable securities consisting of U.S. treasury notes, fixed income debt instruments and commercial paper debt instruments with fixed interest rates and maturity dates within three years of original purchase. Due to the credit quality and nature of these debt instruments, we do not believe there has been a significant change in our market risk exposure since December 31, 2016. Accounts receivable are due from both domestic and international customers. We perform credit evaluations of our customers' financial condition and record reserves to provide for estimated credit losses. Accounts payable are owed to both domestic and international vendors.

We also currently hold marketable securities consisting of commercial paper and fixed-income debt securities. As of June 30, 2017, a 100 basis point change in interest rates would not have had a material impact on the fair value of our marketable securities.

ITEM 4. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our chief executive officer, who is our principal executive officer, and our chief financial officer, who is our principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act, as of the end of the period covered by this report. In evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs. In addition, the design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent limitations in a control system, misstatements due to error or fraud may occur and not be detected.

Based on this evaluation, our chief executive officer and our chief financial officer concluded that our disclosure controls and procedures were effective, as of the end of the period covered by this report, to provide reasonable assurance that information required to be disclosed by us in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required

disclosures.

Changes in Internal Control Over Financial Reporting

During the quarter ended June 30, 2017, there were no changes in our internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II.

OTHER INFORMATION

ITEM 1.LEGAL PROCEEDINGS.

None.

ITEM 1A.RISK FACTORS.

Our business is subject to risks and events that, if they occur, could adversely affect our financial condition and results of operations and the trading price of our securities. In addition to the other information set forth in this quarterly report on Form 10-Q, you should carefully consider the factors described in “Part I, Item 1A. Risk Factors” of our Annual Report on Form 10-K for the fiscal year ended December 31, 2016, filed with the Securities and Exchange Commission on February 23, 2017. There have been no material changes from the risk factors described in the annual report.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None.

ITEM 3.DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4.MINE SAFETY DISCLOSURES.

Not applicable.

ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS.
See the exhibit index.
