Management of the Funds

84

2

President's Letter

Dear Fellow Shareholders:

We are pleased to present you with this annual report for Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., Value Line Income and Growth Fund, Inc., Value Line Larger Companies Fund, Inc., Value Line Core Bond Fund and The Value Line Tax Exempt Fund, Inc. (individually, a "Fund" and collectively, the "Funds") for the 12 months ended December 31, 2014.

The 12 months ended December 31, 2014 were rewarding ones for the equity, hybrid and fixed income Value Line Funds, as both equities and fixed income generated positive returns. The annual period was also highlighted by several of the Funds being recognized for their long-term performance and attractive risk profiles.

- Value Line Premier Growth Fund, Inc. outpaced its peers for the five- and ten-year periods ended December 31, 2014, as noted by leading independent mutual fund advisory service Lipper Inc.1 (multi-cap growth category). Lipper also awarded its top Lipper Leader rating of 5 to the Fund for Preservationi versus its peers overall as of December 31, 2014. Additionally, the Fund earned an overall four-star rating from Morningstar2 in the mid-cap growth category among 645 funds as of December 31, 2014 based on risk-adjusted returns. Morningstar gave the Fund an overall Risk rating of Below Average.ii
- The Value Line Fund, Inc. outpaced its peers for the five-year period ended December 31, 2014, as noted by leading independent mutual fund advisory service Lipper Inc.1 (multi-cap growth category). Additionally, the Fund was given an overall Risk rating of Below Averageiv by Morningstar as of December 31, 2014.
- Value Line Income and Growth Fund, Inc. outpaced its peers for the one-, three-, five- and ten-year periods ended December 31, 2014, as noted by Lipper Inc.1 (mixed-asset target allocation moderate category). Lipper also awarded its top Lipper Leader rating of 5 to the Fund for Total Returniii and Consistent Returniii versus its peers overall as of December 31, 2014. Additionally, the Fund earned an overall five-star rating from Morningstar2 in the moderate allocation category among 740 funds as of December 31, 2014 based on risk-adjusted returns. Morningstar gave the Fund an overall Risk rating of Below Average.vi In October 2014, Value Line Income and Growth Fund, Inc. was named to the Fund Picks from FidelitySM list.
- Value Line Larger Companies Fund, Inc. outpaced its peers for the one-year period ended December 31, 2014, as noted by leading independent mutual fund advisory service Lipper Inc.1 (larger-cap growth category). Additionally, the Fund was given an overall Risk rating of Below Averagevii by Morningstar as of December 31, 2014.
- Value Line Core Bond Fund outpaced its peers for the three-, five- and ten-year periods ended December 31, 2014, as noted by Lipper Inc.1 (core bond category). Lipper also awarded its top Lipper Leader rating of 5 to the Fund for Total Returnv versus its peers overall as of December 31, 2014. Additionally, the Fund earned an overall four-star rating from Morningstar2 in the intermediate-term bond category among 913 funds as of December 31, 2014 based on risk-adjusted returns.viii

On the following pages, the Funds' portfolio managers discuss the management of their respective Funds during the annual period. The discussions highlight key factors influencing recent performance of the Funds. You will also find a schedule of investments and financial statements for each of the Funds.

Before reviewing the performance of your individual mutual fund investment(s), we encourage you to take a brief look at the major factors affecting the financial markets over the 12 months ended December 31, 2014, especially given the newsworthy events of the annual period. With the positive absolute performance results of the Funds during 2014, we also invite you to take this time to consider a broader diversification strategy by including additional Value Line Funds, which you can read about on the following pages, in your investment portfolio. You can also find out more about the entire family of Value Line Funds at our website, www.vlfunds.com.

Economic Review

U.S. real Gross Domestic Product (GDP) got off to a slow start in 2014, contracting at a 2.9% annualized rate from January through March. This was the biggest decline in the pace of U.S. economic growth since the first quarter of 2009. Part of the decline was due to the unusually harsh winter weather conditions throughout much of the nation. Home and auto sales were negatively impacted. In turn, consumer spending grew at the weakest pace in five years, restrained further by a drop in health care outlays.

Economic growth rebounded from those low early levels, with GDP posting growth at an annualized rate of 5% by the third quarter of 2014. This growth stemmed from increases in personal consumption expenditures, higher nonresidential fixed investment and higher spending by federal, state and local governments. There was also steady growth in manufacturing and a significant drop in the national unemployment rate from 6.7% in December 2013 to 5.6% at year-end 2014. Many analysts forecast that combined third and fourth quarter GDP will average an annualized rate of 4.8%, marking the best two-quarter stretch for the U.S. economy since 2003.

(continued)

Despite the growing economy, inflationary pressures remained modest through the annual period. Consumer prices remained in check, with the headline Consumer Price Index (CPI) rising just 0.8% year over year before seasonal adjustment as of December 2014, notably lower than the 1.3% change for the 12 months ending November 2014. Core inflation, which excludes food and energy and which is the price measure tied to consumer spending watched most closely by the Fed, was up 1.6% in December 2014 from a year earlier, the smallest 12-month change since the 12 months ending February 2014. Limited wage growth, as well as sharply lower energy and commodity prices, were key contributors to the relatively benign inflation scenario. Indeed, the energy segment of the CPI declined 10.6% over the 12-month span ended December 2014. The rapid decline in the price of oil, in particular, was seen as a net positive to U.S. companies and U.S. consumers. With gasoline at \$2 or less per gallon, consumers should have some discretionary income to spend, potentially benefiting the U.S. economy going forward.

Along with the drop in the unemployment rate, the steady increase in job creation made 2014 the best year for the labor market since 1999. Almost three million Americans found work in 2014, the most in 15 years. However, the labor picture was not uniformly positive, with the labor force participation rate dropping from 63.0% at the start of the year to 62.7% at year end 2014.

Against this backdrop of broadly improving economic growth, the Federal Reserve (the Fed) reduced the amount of bonds it had been buying as part of its quantitative easing program in each month beginning in January 2014. The Fed kept its focus on key market data, including unemployment and inflation targets, and completed its bond market purchases on schedule in October 2014. The Fed left the targeted federal funds rate unchanged throughout the annual period. While future Fed moves will likely be data dependent, the Fed has pointed to the possibility of a modest increase in short-term interest rates in 2015.

Equity Market Review

U.S. equities, as measured by the S&P 500® Index³, posted a solid gain of 13.69% during the 12 months ended December 31, 2014, generating its third consecutive year of double-digit gains.

Diverging global economies and declining U.S. interest rates were major themes affecting the U.S. equity markets during the annual period. The U.S. economic recovery accelerated through the annual period, particularly compared to other major developed markets, including Europe, Japan and China. This comparatively strong recovery helped fuel U.S. corporate earnings and cash flow growth. Share buybacks became a full-fledged trend, resulting in higher earnings per share and helping to support stock prices, and regular cash dividend payments set another record, posting their fourth year of double-digit gains. Furthermore, new job growth, a lower unemployment rate, a stable housing market and dramatically lower energy prices gave new hope to the potential for a broader consumer recovery, boosting both consumer and business confidence. U.S. equity market volatility heightened during the second half of the year from exceptionally low levels mid-year, but the S&P 500® Index had no more than three consecutive down days during 2014, a feat not seen since 1928, and posted 53 new closing highs, up from 45 in 2013, as it broke through the 2,000 milestone level in August 2014.

Nine of the ten sectors of the S&P 500® Index posted positive absolute performance for the annual period, with the utilities, health care and information technology sectors leading the way, the latter two in particular on the highest level of merger and acquisition activity since 2007. Energy was the only sector to generate negative returns, as U.S. and global crude oil prices experienced a precipitous decline on surprisingly strong supply and weakening global demand. Telecommunication services posted modestly positive returns but was the second weakest performing sector

in the S&P 500® Index during the annual period, as aggressive competition, including price wars aimed at luring customers, and market saturation put growth pressures on the sector, especially on the wireless side.

Fixed Income Market Review

In contrast to a challenging 2013, the broad U.S. fixed income market, as measured by the Barclays U.S. Aggregate Bond Index⁴, posted a solid positive return of 5.97% during the annual period. The yield curve flattened, as intermediate-term and longer-term yields declined and shorter-term maturities edged up. A flattening yield curve is one in which the differential in yields of securities with various maturities narrows. The yield on the two-year U.S. Treasury bill rose approximately 28 basis points, while the yield on the bellwether 10-year U.S. Treasury note fell approximately 83 basis points and the yield on the 30-year U.S. Treasury declined approximately 117 basis points during the annual period. (A basis point is 1/100th of a percentage point.)

While virtually all key fixed income sectors and maturities posted positive returns, U.S. Treasuries maturing beyond 20 years were the clear winners. Short-term yields reacted to the expectation of the slowing and subsequent conclusion of the Fed's stimulus program, but the sharp drop in long-term interest rates was driven in part by a significant decline in oil and other commodity prices. The end of quantitative easing in October 2014 had investors bracing for a rise in rates, but the increase did not materialize. Instead, U.S. Treasury rates continued to drift downward in tandem with a global easing of rates. Slowing economic growth in China and a weak Eurozone—along with geopolitical tensions in Ukraine and the Middle East—were significant concerns throughout 2014. Such concerns drove a flight to safety and a search for comparatively higher yields for many investors, additional key factors behind the broad drop in rates. Inflation well under the Fed's inflation target of 2% exerted further downward pressure on long-term interest rates.

(continued)

The flight to safety, along with a search for yield, impacted investors in the corporate bond market as well. In turn, investment grade bonds outperformed high yield bonds by a significant margin, despite a record-setting year in terms of global new issuance. Even within the high yield corporate bond sector, BB-rated bonds outperformed lower rated bonds.

The tax-exempt fixed income market, as measured by the Barclays Municipal Bond Index⁵, outpaced the broad taxable fixed income market during the annual period, with a return of 9.05%. As in the taxable fixed income market, longer maturity tax-exempt bonds were the best performers, as falling oil and other commodity prices, a harbinger of lower inflation, pushed rates down on the longer-term end of the municipal bond yield curve. Intermediate-term yields also declined, but municipal bonds maturing within five years saw higher rates by year-end 2014, as investors anticipated a less accommodative Fed policy in 2015. In turn, as shorter-term yields rose and low inflation boosted investor demand for longer maturity bonds, the municipal bond yield curve flattened.

From a fundamental perspective, those states that saw the steepest drops in their unemployment rates saw particularly good returns on their bonds, as the new workers contributed to increased tax receipts. Overall default rates rose slightly in 2014, but a good percentage of the increase can be attributed to the default of Energy Future Holdings (formerly TXU), a widely anticipated default that occurred during the second quarter of 2014. Even with this energy-related corporate municipal bond default, the overall default rate within the municipal bond sector remained well below 1% at the end of the annual period.

The municipal bond market enjoyed strong supply/demand metrics during the annual period. New issuance in 2014 was virtually unchanged from 2013. However, steady fund inflows in 2014 were a marked change from the significant outflows of 2013. Investors became more comfortable with the outlook for most state and municipal credit profiles, as the fear of credit contagion from the Puerto Rico and Detroit credit blowups did not spill over into the broader credit universe.

Overall, lower rated issues outperformed higher quality issues within the tax-exempt fixed income market, as investors reached for yield within the low rate environment.

Past performance does not guarantee future results. Investment return and principal value of an investment can fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost; and that current performance may be lower or higher than the performance data quoted. Investors should carefully consider the investment objective, risks, charges and expense of a fund. This and other important information about a fund is contained in the fund's prospectus. A copy of our funds' prospectuses can be obtained free of charge by going to our website at www.vlfunds.com or calling 800.243.2729.

The Value Line Funds are distributed by EULAV Securities LLC.

1 Lipper Rankings represent the funds' ranking within its Lipper asset class peer group and are based on total return performance and do not reflect the effect of sales charges. Although a fund may outperform peers when compared to Lipper peer groups, the returns for that time period may still be negative. Rankings shown include management fees and are provided by Lipper Inc., a leading independent performance analysis service. This information is provided for educational purposes only and should not be considered investment advice. Lipper ratings are not intended to predict future results, and Lipper does not guarantee the accuracy of this information. Past performance is no guarantee of future results. Lipper Leader ratings are derived from highly sophisticated formulas that analyze funds against clearly defined criteria. Funds are compared to similar funds, and only those that trust stand out are awarded Lipper Leader status. Funds are ranked against their peers on each of four measures: Total Return, Consistent Return, Preservation and Expense. A fifth measure, Tax Efficiency, applies in the United States. Scores are subject to change every month and are calculated for the following periods: 3-year, 5-year, 10-year and overall. The overall calculation is based on an equal-weighted average of percentile ranks for each measure over 3-year, 5-year and 10-year periods (if applicable). For each measure, the highest 20% of funds in each peer group are named Lipper Leaders. The next 20% receive a rating of 4: the middle 20% are rated 3: the next 20% are rated 2; and the lowest 20% are rated 1.

i For Value Line Premier Growth Fund, Inc.: Preservation 5 rating for 5-year (9,208 funds) and overall (11,118 funds) periods ended December 31, 2014; 4 rating for 3-year (11,118 funds) and 10-year (5,548 funds) periods ended December 31, 2014.

iii For Value Line Income and Growth Fund, Inc.: Total Return 5 rating for 3-year (452 funds), 5-year (398 funds), 10-year (260 funds) and overall (452 funds) periods ended December 31, 2014. Consistent Return 5 rating for 3-year (450 funds), 5-year (396 funds), 10-year (258 funds) and overall (450 funds) periods ended December 31, 2014.

v For Value Line Core Bond Fund: Total Return 5 rating for 3-year (454 funds), 5-year (405 funds), 10-year (296 funds) and overall (454 funds) periods ended December 31, 2014.

2 The Morningstar RatingTM for funds methodology rates funds based on an enhanced Morningstar Risk-Adjusted Return measure, which also accounts for the effects of all sales charges, loads, or redemption fees. Funds are ranked by their Morningstar Risk-Adjusted Return scores and stars are assigned using the following scale: 5 stars for top 10%; 4 stars next 22.5%; 3 stars next 35%; 2 stars next 22.5%; 1 star for bottom 10%. Funds are rated for up to three periods: the trailing three-, five- and 10-years. For a fund that does not change categories during the

Edgar Filing: VALUE LINE FUND INC - Form N-CSR

evaluation period, the overall rating is calculated using the following weights: At least 3 years, but less than 5 years uses 100% three-year rating. At least 5 years but less than 10 years uses 60% five-year ratings/40% three-year rating. At least 10 years uses 50% ten-year rating/30% five-year rating/20% three-year rating.

- ii For Value Line Premier Growth Fund, Inc.: Three-star rating for 3-year (645 funds) period ended December 31, 2014. Four-star rating for 5-year (584 funds), 10-year (429 funds) and overall (645 funds) periods ended December 31, 2014. All in the mid-cap growth category. Morningstar Risk: Low for the 3-year and 5-year periods ended December 31, 2014; Below Average for the 10-year and overall periods ended December 31, 2014.
- iv For The Value Line Fund, Inc.: Morningstar Risk: Low for the 3-year and 5-year periods ended December 31, 2014; Below Average for the 10-year and overall periods ended December 31, 2014.
- vi For Value Line Income and Growth Fund: Five-star rating for 10-year (438 funds) and overall (740 funds) periods ended December 31, 2014; 4-star rating for 3-year (740 funds) and 5-year (652 funds) periods ended December 31, 2014. All in the moderate allocation category. Morningstar Risk: Below Average for the 3-year, 5-year, 10-year and overall periods ended December 31, 2014.
- vii For Value Line Larger Companies Fund, Inc.: Morningstar Risk: Below Average for the 3-year, 5-year, 10-year and overall periods ended December 31, 2014.

(continued)

viii

For Value Line Core Bond Fund: four-star rating for 3-year (913 funds), 50-year (807 funds) and overall (913 funds) periods ended December 31, 2014; three-star rating for 10-year (588 funds) period ended December 31, 2014.

- 3 The S&P 500® Index consists of 500 stocks that are traded on the New York Stock Exchange, American Stock Exchange and the NASDAQ national Market System and is representative of the broad stock market. This is an unmanaged index and does not reflect charges, expenses or taxes, and it is not possible to directly invest in this index.
- 4 The Barclays U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including U.S. Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS. This is an unmanaged index and does not reflect charges, expenses or taxes, which are deducted from the Fund's return. It is not possible to directly invest in this index.
- 5 The Barclays Municipal Bond Index is a total-return performance benchmark for the long-term investment grade tax-exempt bond market. The returns for the index do not reflect charges, expense or taxes. It is not possible to directly invest in this index.

7

VALUE LINE PREMIER GROWTH FUND, INC.

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The Fund primarily seeks long-term growth of capital.

To achieve the Fund's goal, the Fund's investment adviser invests at least 80% of the Fund's net assets in a diversified portfolio of U.S. equity securities with favorable growth prospects. In selecting securities for purchase or sale, the Adviser generally analyzes the issuer of a security using fundamental factors such as growth potential and earnings estimates and quantitative factors such as historical earnings, earnings momentum and price momentum. The Fund may invest in small, mid or large capitalization companies, including foreign companies. There are no set limitations of investments according to a company's size, or to a sector weighting.

Manager Discussion of Fund Performance

Below, Value Line Premier Growth Fund, Inc. portfolio manager Stephen E. Grant discusses the Fund's performance and positioning for the 12 months ended December 31, 2014.

How did the Fund perform during the annual period?

The Fund generated a total return of 6.75% during the 12 months ended December 31, 2014. This compares to the 13.69% return of the Fund's benchmark, the S&P 500® Index, during the same annual period.

What key factors were responsible for the Fund's performance during the 12-month reporting period?

The Fund generated solid absolute gains but underperformed the S&P 500® Index during the 12-month reporting period due to both stock selection and sector allocation decisions overall.

While the annual period ended December 31, 2014 saw gains for the equity market, it was a year when large-cap stocks, particularly mega-cap stocks, performed best. Relative to the benchmark, this acted as a headwind to Fund results, as the Fund concentrates its holdings on stocks with an average market capitalization well below that of the S&P 500® Index. Indeed, less than half of the Fund's holdings are large-cap stocks and very few would be considered mega-cap stocks. Further, lower quality, more speculative and volatile stocks, exemplified by information technology and biotechnology stocks, outperformed steadier, less cyclical issues more typical of the Fund's higher quality holdings. This trend served as a detractor as well during the annual period.

Which equity market sectors most significantly affected Fund performance?

Stock selection in industrials, information technology and consumer staples detracted from the Fund's performance most during the annual period. Having an overweighted allocation to the industrials sector, which lagged the S&P 500® Index during the annual period, and having an underweighted exposure to the strong information technology sector also hurt. In industrials, positions in engineering and constructing firm Chicago Bridge & Iron and inland tank barge fleet operator Kirby each dampened results, as each saw double-digit share price declines during the annual period. In information technology, the Fund held no positions in the strongly performing large-cap stocks in the sector, including Apple, Microsoft and Intel, each of which saw their shares achieve double-digit percentage gains during the annual period. The Fund had a sizable position in application software developer Ansys, however, which also hurt, as its shares fell. In consumer staples, positions in beverages companies Ambev and Coca-Cola Femsa

detracted from the Fund's relative results, with each stock experiencing double-digit share price declines during the annual period.

Partially offsetting these detractors was the positive contribution made by having an underweighted exposure to energy, which was the poorest performing sector in the S&P 500® Index on the precipitous decline in the price of crude oil during the second half of 2014. Avoiding positions in large integrated oil companies Chevron and Exxon Mobil particularly helped, as each saw its share price fall during the annual period. Effective stock selection in the telecommunication services sector also buoyed Fund results. A position in wireless communications infrastructure owner and operator SBA Communications was an especially strong performer.

(continued)

Which stocks detracted significantly from the Fund's performance during the annual period?

During the annual period, not holding a position in information technology giant Apple was the largest relative detractor. Also, due to the dramatic decline in energy prices, some impacted directly and some indirectly, positions in Chicago Bridge & Iron and Kirby, each mentioned earlier, as well as oil and gas services and equipment company Core Laboratories and energy exploration and production company Noble Energy were among the stocks that detracted most from the Fund's relative performance.

What were some of the Fund's best-performing individual stocks?

Among the individual stocks that contributed most to the Fund's relative results were actually stocks the Fund did not own, including Exxon Mobil, already mentioned, Internet search engine giant Google and industrials and financial services conglomerate General Electric, each of which saw its shares decline during the annual period. Among holdings, a position in biopharmaceuticals firm Alexion Pharmaceuticals performed robustly on strong quarterly earnings reports. A position in Indian bank HDFC Bank also was an outstanding performer. One of the Fund's weakest performers in 2013, HDFC Bank rebounded in 2014 as investors regained confidence in the economy of India.

How did the Fund use derivatives and similar instruments during the reporting period?

The Fund did not use derivatives during the reporting period.

Did the Fund make any significant purchases or sales during the annual period?

During the annual period, we did not make any significant new purchases but we made sizable additions to a number of holdings, led by tool manufacturer Snap-on, application software developer Ultimate Software Group and aerospace and defense electronic subsystems and instrumentation provider Teledyne Technologies. In our view, each of these stocks became increasingly attractive during the annual period as measured by the criteria we use, most importantly strong long-term track records of consistently growing earnings and stock price.

We sold the Fund's positions in electrical power equipment provider ABB, pharmacy benefits management services and health care information technology solutions provider Catamaran and quick-service restaurant owner and franchiser Yum! Brands. In each case, the elimination of the position from the Fund's portfolio was due to some erosion in its long-term track record of earnings and stock price growth.

Were there any notable changes in the Fund's weightings during the 12-month period?

There were no material changes in the Fund's sector weightings during the 12-month period ended December 31, 2014.

How was the Fund positioned relative to its benchmark index at the end of December 2014?

As of December 31, 2014, the Fund was overweighted relative to the S&P 500® Index in the industrials and materials sectors. The Fund was underweighted relative to the S&P 500® Index in the information technology, financials and energy sectors and was rather neutrally weighted relative to the Index in the consumer discretionary, consumer staples, health care, utilities and telecommunication services sectors on the same date.

What is your tactical view and strategy for the months ahead?

Regardless of market conditions, we intend to stay true to our time-tested investment discipline going forward, seeking to invest in companies that have demonstrated a solid history of consistent growth in both their earnings and stock price. In our view, these companies possess attractive portfolios of proprietary products and services that give them strong market positions and make them less vulnerable to swings in national and international economic conditions. At the same time, we believe the underlying stocks of these companies tend to be less volatile than the average stock in the S&P 500® Index. By maintaining our investment discipline, the Fund has historically provided a smoother ride to investors than its peer group averages. Putting aside short-term ebbs and flows in the equity market, we believe the Fund's investments are likely to provide superior returns to our shareholders over the long term.

The following graph compares the performance of the Value Line Premier Growth Fund, Inc. to that of the S&P 500® Index (the “Index”). The Value Line Premier Growth Fund, Inc. is a professionally managed mutual fund, while the Index is not available for investment and is unmanaged. The returns for the Index do not reflect charges, expenses or taxes but do include the reinvestment of dividends. The comparison is shown for illustrative purposes only.

Comparison of a Change in Value of a \$10,000 Investment in the Value Line Premier Growth Fund, Inc. and the S&P 500® Index*

Performance Data: **

	Average Annual Total Return	Growth of an Assumed Investment of \$10,000
1 year ended 12/31/14	6.75%	\$10,675
5 years ended 12/31/14	15.16%	\$20,252
10 years ended 12/31/14	8.88%	\$23,417

* The Standard and Poor’s 500® Stock Index is an unmanaged index that is representative of the larger-capitalization stocks traded in the United States.

** The performance data quoted represent past performance and are no guarantee of future performance. The average annual total returns and growth of an assumed investment of \$10,000 include dividends reinvested and capital gains distributions accepted in shares. The investment return and principal value of an investment will fluctuate so that an investment, when redeemed, may be worth more or less than its original cost. The performance data and graph do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares.

THE VALUE LINE FUND, INC.

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The Fund's primary investment objective is long-term growth of capital. Current income is a secondary investment objective. To achieve the Fund's investment objectives the Advisor invests substantially all of the Fund's net assets in common stocks. While the Fund is actively managed by the Advisor, the Advisor relies primarily on the rankings of companies by the Value Line Timeliness™ Ranking System (the "Ranking System") in selecting securities for purchase or sale. The Fund's investments principally are selected from common stocks ranked 1, 2 or 3 by the Ranking System at the time of purchase. The Advisor will determine the percentage of the Fund's assets invested in each stock based on the stock's relative attractiveness.

Manager Discussion of Fund Performance

Below, The Value Line Fund, Inc. portfolio manager Stephen E. Grant discusses the Fund's performance and positioning for the 12 months ended December 31, 2014.

How did the Fund perform during the annual period?

The Fund generated a total return of 7.90% during the 12 months ended December 31, 2014. This compares to the 13.69% return of the Fund's benchmark, the S&P 500® Index, during the same annual period.

What key factors were responsible for the Fund's performance during the 12-month reporting period?

The Fund generated solid absolute gains but underperformed the S&P 500® Index during the 12-month reporting period due to both stock selection and sector allocation decisions overall.

While the annual period ended December 31, 2014 saw gains for the equity market, it was a year when large-cap stocks, particularly mega-cap stocks, performed best. Relative to the benchmark, this acted as a headwind to Fund results, as the Fund concentrates its holdings on stocks with an average market capitalization well below that of the S&P 500® Index. Indeed, less than half of the Fund's holdings are large-cap stocks and very few would be considered mega-cap stocks. Further, lower quality, more speculative and volatile stocks, exemplified by information technology and biotechnology stocks, outperformed steadier, less cyclical issues more typical of the Fund's higher quality holdings. This trend served as a detractor as well during the annual period.

Which equity market sectors most significantly affected Fund performance?

Stock selection in information technology, industrials and financials detracted from the Fund's performance most during the annual period. Having an underweighted allocation to the strongly performing information technology sector and having an overweighted exposure to the weaker industrials sector also hurt. In information technology, the Fund held no positions in the strongly performing large-cap stocks in the sector, including Apple, Microsoft and Intel, each of which saw their shares achieve double-digit percentage gains during the annual period. The Fund had sizable positions, however, in information technology services provider Cognizant Technology Solutions and application software developer Ansys, which also hurt, as each experienced a share price decline during the annual period. In industrials, positions in engineering and constructing firm Chicago Bridge & Iron, inland tank barge fleet operator Kirby and pollution control equipment manufacturer Donaldson each dampened results, as each saw significant share

price declines during the annual period. In financials, overweighted positions in asset management company Affiliated Managers Group and supplemental insurance company Aflac detracted from the Fund's relative results, with each stock experiencing a share price decline during the annual period. Not owning shares of diversified conglomerate Berkshire Hathaway and diversified financial services company Wells Fargo also dampened relative results, as each enjoyed double-digit share price gains during the annual period.

Partially offsetting these detractors was the positive contribution made by having an underweighted exposure to energy, which was the poorest performing sector in the S&P 500® Index on the precipitous decline in the price of crude oil during the second half of 2014. Avoiding positions in large integrated oil companies Chevron and Exxon Mobil particularly helped, as each saw its share price fall during the annual period. Effective stock selection in the consumer staples sector also buoyed Fund results. Positions in packaged food and beverage manufacturer J&J Snack Foods and convenience store operator Casey's General Stores were especially strong performers.

(continued)

Which stocks detracted significantly from the Fund's performance during the annual period?

During the annual period, not holding a position in information technology giant Apple was the largest relative detractor. Also, due to the dramatic decline in energy prices, some impacted directly and some indirectly, positions in Chicago Bridge & Iron and Kirby, each mentioned earlier, as well as integrated energy company EQT were among the stocks that detracted most from the Fund's relative performance. Additionally, a position in chemicals company FMC of the materials sector detracted, as its shares fell sharply on weaker than expected quarterly earnings reports.

What were some of the Fund's best-performing individual stocks?

Among the individual stocks that contributed most to the Fund's relative results were actually stocks the Fund did not own, including Exxon Mobil, already mentioned, Internet search engine giant Google and industrials and financial services conglomerate General Electric, each of which saw its shares decline during the annual period. Among holdings, a position in specialty chemicals company Sigma-Aldrich performed robustly following a takeover offer from Germany's Merck.

How did the Fund use derivatives and similar instruments during the reporting period?

The Fund did not use derivatives during the reporting period.

Did the Fund make any significant purchases or sales during the annual period?

During the annual period, new additions to the Fund's portfolio included tool manufacturer Snap-on, application software developer Ultimate Software Group and aerospace and defense electronic subsystems and instrumentation provider Teledyne Technologies, each based primarily upon its long-term track records of consistently growing earnings and stock price.

We sold the Fund's positions in several large-cap stocks to increase the portfolio's focus on mid-cap stocks. Among the large-cap stocks sold were pharmaceuticals company Novo Nordisk, railway operator Canadian National Railway and global payment solutions company MasterCard.

Were there any notable changes in the Fund's weightings during the 12-month period?

During the second half of 2014, we implemented stage 2 of the Fund's transformation. Stage 1 took place in the second half of 2009, when the Fund's then-new portfolio manager emphasized stock holdings that possessed consistently strong long-term track records in both earnings results and stock performance. At that time, the Fund retained its multi-cap characteristics, with large-cap stocks comprising 40% to 45% of holdings and the remainder in mid-cap and small-cap stocks. Stage 1 has been highly successful, with the Fund placing in the top quintile of its peer group (as measured by both Morningstar and Lipper) for performance for the five years ending December 31, 2014, while exposing investors to less risk than the average fund in its peer group, as measured by volatility and standard deviation. Indeed, Morningstar awards the Fund its top five-star overall rating for the five-year period ended December 31, 2014. (Please see footnotes on pages 6-7 for more details on these ratings.)

The now-completed stage 2 transformation focuses on our "best ideas." We reduced the number of stock holdings from about 135 at June 30, 2014 to between 45 and 50 holdings at the end of the annual period, concentrating on the stocks

that we feel best meet the criteria that have generated the Fund's success thus far. In doing so, we sold most of the Fund's large-cap holdings to focus more on the mid-cap segment. In our view, mid-cap stocks represent the "sweet spot" of the Fund's strategy. Unlike most large-cap stocks, mid-cap stocks still have a large runway for above-average potential future growth. And unlike most small-cap stocks, mid-cap stocks have already established a strong long-term track record of consistent growth in both earnings and stock price. More than 90% of the Fund's holdings at the end of the annual period had a market capitalization in the range of \$3 billion to \$18 billion.

Some changes in sector weightings resulted from this stage 2 transformation. The Fund's exposure to consumer staples and information technology increased and its allocations to the financials, energy and consumer discretionary sectors decreased.

How was the Fund positioned relative to its benchmark index at the end of December 2014?

As of December 31, 2014, the Fund was overweighted relative to the S&P 500® Index in the industrials, materials and consumer staples sectors. The Fund was underweighted relative to the S&P 500® Index in the financials, energy, consumer discretionary and information technology sectors and was rather neutrally weighted relative to the Index in the health care, utilities and telecommunication services sectors on the same date.

(continued)

What is your tactical view and strategy for the months ahead?

Regardless of market conditions, we intend to stay true to our time-tested investment discipline going forward, seeking to invest in companies that have demonstrated a solid history of consistent growth in both their earnings and stock price. In our view, these companies possess attractive portfolios of proprietary products and services that give them strong market positions and make them less vulnerable to swings in national and international economic conditions. At the same time, we believe the underlying stocks of these companies tend to be less volatile than the average stock in the S&P 500® Index. By maintaining our investment discipline, the Fund has historically provided a smoother ride to investors than its peer group averages. Putting aside short-term ebbs and flows in the equity market, we believe the Fund's investments are likely to provide superior returns to our shareholders over the long term.

Value Line Income and Growth Fund, Inc.

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The Fund's primary investment objective is income, as high and dependable as is consistent with reasonable risk. Capital growth to increase total return is a secondary objective.

To achieve the Fund's goals, the Adviser invests not less than 50% of the Fund's net assets in common or preferred stocks or securities convertible into common stock which may or may not pay dividends. The balance of the Fund's net assets are primarily invested in U.S. government securities, money market securities and investment grade debt securities rated at the time of purchase from the highest (AAA) to medium (BBB) quality. Although the Fund can invest in companies of any size, it generally invests in U.S. securities issued by larger, more established companies (those with a market capitalization of more than \$5 billion).

Manager Discussion of Fund Performance

Below, Value Line Income and Growth Fund, Inc. portfolio managers Cindy Starke, Stephen E. Grant and Liane Rosenberg discuss the Fund's performance and positioning for the 12 months ended December 31, 2014.

How did the Fund perform during the annual period?

The Fund generated a total return of 10.62% during the 12 months ended December 31, 2014. This compares to the 10.60% return of the Fund's blended benchmark, comprised 60% of the S&P 500® Index and 40% of the Barclays U.S. Aggregate Bond Index (the Barclays Index), during the same annual period.

What key factors were responsible for the Fund's performance during the 12-month reporting period?

The Fund benefited from being overweighted equities and underweighted fixed income throughout the 12-month reporting period. With U.S. equities, as measured by the S&P 500® Index, up 13.69% during the annual period, and bonds, as measured by the Barclays Index, posting a return of 5.97%, this asset allocation clearly added value. Security selection overall within the equity portion of the Fund also proved beneficial. However, the Fund's allocation to cash equivalents during a period of rallying markets and a small weighting in convertible bonds were a drag on the Fund's relative performance.

Which equity market sectors most significantly affected Fund performance?

Stock selection in the consumer staples, health care and industrials sectors contributed most positively to the Fund's results. Having an underweighted allocation to energy, the only sector in the S&P 500® Index to decline during the annual period, also boosted relative results. Detracting most from relative results was stock selection in the information technology, financials and materials sectors.

What were some of the Fund's best-performing individual stocks?

Contributing most to the Fund's relative results were semiconductor company Avago Technologies, medical device company Edward Lifesciences and organic and natural foods retailer Whole Foods Market, each of which posted

robust double-digit gains during the annual period. Avago Technologies' shares rose sharply based on better than expected results and enthusiasm over the accretive benefits and diversification gains from its acquisition of LSI. Edward Lifesciences, a leader in minimally invasive medical devices for the cardiovascular market, saw its shares rise on better than expected sales and guidance. We saw an opportunity to purchase shares of Whole Foods Market on a significant pullback in its share price after disappointing results during the summer of 2014. Subsequent to our purchase date, the retailer's shares rebounded, as the company appeared to be taking steps to get back on track.

Which stocks detracted significantly from the Fund's performance during the annual period?

During the annual period, the stocks that detracted most from the Fund's performance were global health care company Sanofi, construction and engineering firm Chicago Bridge & Iron and global casino operator Las Vegas Sands, each of which experienced share price declines. Shares of Sanofi sold off based on weakness in its diabetes portfolio and concerns regarding the removal of its chief executive officer. Chicago Bridge & Iron's shares sold off following a weaker than expected first quarter 2014 earnings report. We sold the Fund's position in Chicago Bridge & Iron in August 2014 due to accounting concerns regarding its Shaw acquisition's nuclear projects. The firm's shares continued to decline after our sale date. Las Vegas Sands was a weak performer in 2014 due to a prolonged slowdown in Macau, usually a major source of casino revenue for the company.

(continued)

Did the equity portion of the Fund make any significant purchases or sales?

During the annual period, among the positions we initiated were two health care companies—biotechnology company Celgene and medical device company Medtronic. We believe that Celgene’s diversified and profitable business model along with what we believe are its good growth prospects should provide above average capital returns for shareholders. We believe Medtronic’s acquisition of Covidien, which was proposed during 2014, has the potential to provide Medtronic with strengthened revenue growth, earnings accretion driven by substantial cost synergies, improved free cash flow flexibility and higher returns on invested capital.

In addition to the sale of Chicago Bridge & Iron, already mentioned, we sold the Fund’s position in information technology stalwart International Business Machines (IBM), as we grew less confident in the company’s ability to deliver future sales and earnings growth. We replaced IBM with another large-cap technology bellwether, Cisco Systems, as we felt Cisco Systems is better positioned for future growth.

During the summer of 2014—and before the precipitous decline in the price of crude oil, we felt oil rig pricing may be close to its peak, so we eliminated the Fund’s three positions in offshore rig operators—Diamond Offshore Drilling, EnSCO and Transocean.

Were there any notable changes in the equity portion of the Fund’s weightings during the 12-month period?

During the annual period, we decreased weightings in the energy, financials, industrials, utilities and consumer staples sectors, and we increased positions in the health care, consumer discretionary and information technology sectors.

How was the equity portion of the Fund positioned relative to its benchmark index at the end of December 2014?

As of December 31, 2014, the Fund was overweighted relative to the S&P 500® Index in the consumer discretionary and health care sectors. The Fund was underweighted relative to the S&P 500® Index in the energy, financials and consumer staples sectors and was rather neutrally weighted to the S&P 500® Index in the industrials, utilities, telecommunication services, information technology and materials sectors on the same date.

What was the duration strategy of the fixed income portion of the Fund?

Duration positioning in the fixed income portion of the Fund had a modestly positive effect on its performance relative to the Barclays Index during the reporting period. While we kept the Fund’s duration short that of the Barclays Index by approximately 1/4 year, which hurt as rates generally declined, we kept the Fund’s U.S. Treasury holdings’ duration overall longer than the U.S. Treasury duration of the Barclays Index. This helped the Fund given the strong price action of longer-dated U.S. Treasuries during the annual period. Duration is a measure of the Fund’s sensitivity to changes in interest rates.

Which fixed income market segments most significantly affected Fund performance?

Sector allocation overall produced mixed results in the fixed income portion of the Fund. The Fund’s position in long-dated U.S. Treasuries was a significant positive contributor to performance, as these were the best performing securities in the Barclays Index during the annual period. Similarly, other long-dated securities performed well,

including long-maturity corporate bonds and taxable municipal bonds. The biggest detractors from the fixed income portion of the Fund's results were lower-rated corporate bonds, particularly high yield corporate bonds. These securities lagged the Barclays Index given the sustained flight to quality by investors. Within the high yield corporate bond sector, energy-related credits were the worst performers, as they were impacted most by the sharp drop in the price of oil and other commodities.

Were there any notable changes in the fixed income portion of the Fund's weightings during the 12-month period?

During the annual period, particularly in the second half of 2014, the overall theme of changes made was a reduction in credit quality risk. Thus, we increased the fixed income portion of the Fund's exposure to investment grade corporate bonds and reduced its exposure to high yield corporate bonds. Within the investment grade bond sector, we increased exposure to financials companies, as newly-imposed regulations are expected to lead to stronger credit profiles for the major banks. We focused our selling within the high yield corporate bond sector on commodity-linked issuers, as commodity prices weakened substantially. These sales proved particularly prudent, as spreads on commodity-linked high yield corporate bonds continued widening after our sales dates. Within the mortgage-backed securities sector, we sold shorter-term securities, including commercial mortgage-backed securities, and added higher quality, longer-term maturities. This helped performance, as the longer-term securities benefited more from the drop in interest rates at the long-term end of the yield curve. In terms of yield curve positioning, we prudently reduced the fixed income portion of the Fund's holdings in the belly, or intermediate segment, of the curve in anticipation of a flattening yield curve, which did indeed materialize.

(continued)

How was the fixed income portion of the Fund positioned relative to its benchmark index at the end of December 2014?

As of December 31, 2014, the fixed income portion of the Fund was overweight relative to the Barclays Index in investment grade corporate bonds, as, in our view, corporate profits remain relatively strong and as we expect the default rate to remain at a historically low level for some time. The fixed income portion of the Fund was also overweight taxable municipal bonds due to generally rising state and municipal tax receipts. The fixed income portion of the Fund's securitized exposure was modestly underweight mortgage-backed securities at the end of the annual period, as we expect mortgage pre-payment activity to accelerate given the still low level of interest rates. However, we continued to favor higher quality mortgage-backed securities, as we expect them to continue to perform better than their lower quality counterparts. The fixed income portion of the Fund also maintained its out-of-benchmark exposure to high yield corporate bonds. The fixed income portion of the Fund was underweight relative to the Barclays Index in U.S. Treasuries, especially short-term U.S. Treasuries, in anticipation of a Fed move to raise short-term rates some time later in 2015. At the end of the annual period, the fixed income portion of the Fund was rather neutrally weighted to the benchmark index in asset-backed securities, sovereign debt and supranational agency debt.

How did the Fund's overall asset allocation shift from beginning to end of the annual period?

At the end of December 2013, the Fund had a weighting of 66% in stocks, 4% in bonds convertible into common stocks, 22% in fixed income securities and 8% in cash equivalents. Some changes during 2014 were based on active management decisions. For example, we reduced the Fund's allocation to convertible bonds, as we found what we considered to be better capital appreciation and income opportunities in shares of common stocks. Other changes were due to appreciation of equities. At December 31, 2014, the Fund had a weighting of 73.4% in stocks, 0.5% in bonds convertible into common stocks, 20.8% in fixed income securities and 5.3% in cash equivalents.

How did the Fund use derivatives and similar instruments during the reporting period?

The Fund did not use derivatives during the reporting period.

What is your tactical view and strategy for the months ahead?

The Fund will continue to focus its investments on a diversified and high quality portfolio of equities. We seek to own companies that are well positioned to grow their dividends, revenues and earnings in the coming years, regardless of economic conditions. In the fixed income portion of the Fund, we intend to continue to emphasize investment grade corporate bonds and taxable municipal bonds and to underweight short-term U.S. Treasuries.

We intend to closely monitor the pace of economic growth, jobs growth, wage growth, inflation and interest rate moves to determine what impact these factors may have on the Fund's equity and fixed income holdings. A steeper or slower path of interest rate increases by the Fed will be a particular focus for us in determining our asset allocation decisions for the Fund in the months ahead. That said, with short-term interest rates and inflation still low, and the global economy and global monetary policies diverging, we remained comfortable at the end of the annual period with the Fund's overweighted allocation to equities and underweighted allocation to fixed income.

As always, our goal is to preserve capital in the near term while generating solid total return (i.e., income plus capital appreciation) over the long term and across economic cycles.

Value Line Larger Companies Fund, Inc.

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The Fund's investment objective is to realize capital growth.

To achieve the Fund's investment objective the Adviser invests substantially all of the Fund's assets in common stock. While the Fund is actively managed by the Adviser, the Adviser relies primarily on the rankings of companies by the Value Line Timeliness™ Ranking System (the "Ranking System") in selecting securities for purchase or sale. The Fund's investments usually, as measured by the number and total value of purchases, are selected from common stocks of the 100 largest companies by capitalization that are ranked 1, 2, or 3 by the Ranking System. The Adviser will determine the percentage of the Fund's assets invested in each stock based on the stock's relative attractiveness.

Manager Discussion of Fund Performance

Below, Value Line Larger Companies Fund, Inc. portfolio manager Cindy Starke discusses the Fund's performance and positioning for the 12 months ended December 31, 2014.

How did Value Line Larger Companies Fund perform during the annual period?

The Fund generated a total return of 12.41% during the 12 months ended December 31, 2014. This compares to the 13.69% return of the Fund's benchmark, the S&P 500® Index, during the same annual period.

What key factors were responsible for the Fund's performance during the 12-month reporting period?

While the Fund generated solid double-digit absolute gains, its underperformance of the S&P 500® Index during the 12-month reporting period can be attributed primarily to not owning some of the slower growing and more cyclical information technology companies that outperformed. Having a position, albeit modest, in cash during a period when the equity market rallied, also detracted. Sector allocation as a whole had a rather neutral impact.

Which equity market sectors most significantly affected Fund performance?

Stock selection in information technology detracted from the Fund's performance, more than offsetting the positive effect of having an overweighted allocation to the strongly performing sector. Both stock selection in and having an overweighted allocation to consumer discretionary, which lagged the S&P 500® Index during the reporting period, also dampened results. To a more modest degree, having an underweighted allocation to utilities, which was the top performing sector in the S&P 500® Index during the reporting period, also hurt. With a decline in interest rates during the year, utilities shares overall rallied as investors chased higher dividend-paying instruments.

Partially offsetting these detractors were the positive contributions made by effective stock selection in the health care and consumer staples sectors. Having an overweighted allocation to health care, which was the second-strongest sector in the S&P 500® Index during the reporting period, and having an underweighted exposure to energy, which was the worst performing sector in the S&P 500® Index during the reporting period and the only sector to post negative absolute returns, also buoyed the Fund's relative results. Energy stocks started 2014 on a high note but

reversed during the fourth quarter, as the price of oil had a dramatic move downward.

Which stocks detracted significantly from the Fund's performance during the annual period?

During the annual period, the stocks that detracted most from the Fund's performance were Trimble Navigation, Discovery Communications and Activision Blizzard. Trimble Navigation, a global technology company focused primarily on agriculture and construction end-markets, sold off after weak quarterly results and disappointing guidance. Although we like the longer-term prospects for the company, we reduced the Fund's weighting in its shares due to the lack of near-term visibility. Shares of global media company Discovery Communications sold off during the annual period due to softness in the U.S. advertising market and a deceleration of growth in its international markets. Shares of interactive entertainment software developer Activision Blizzard were volatile during the annual period but not due to any fundamental problems. We added to the Fund's position in Activision Blizzard on its share price weakness.

What were some of the Fund's best-performing individual stocks?

The individual stocks that contributed most to the Fund's relative results were actually three new positions added to the Fund in 2014—leading energy drink maker Monster Beverage, medical device company Edward Lifesciences and biotechnology company Celgene, each of which posted robust double-digit gains during the annual period. Shares of Monster Beverage rose, as the market reacted favorably to news of The Coca-Cola Company taking an equity stake in the company. Edward Lifesciences, a leader in minimally invasive medical devices for the cardiovascular market, saw its shares rise on better than expected sales and guidance. Shares of Celgene enjoyed a strong upward move, driven by strong sales and earnings growth as well as by its burgeoning pipeline and attractive valuation.

(continued)

How did the Fund use derivatives and similar instruments during the reporting period?

The Fund did not use derivatives during the reporting period.

Did the Fund make any significant purchases or sales during the annual period?

During the annual period, we initiated a Fund position Constellation Brands, a leading producer and marketer of premium beer, wine and spirits. Constellation Brands has more than 100 well-known brands in these categories, including Corona, Robert Mondavi and Svedka vodka. We believe that Constellation Brands is well positioned to grow its earnings and revenues over the next few years and at a rate faster than its peers. We established a Fund position in Facebook, the world's largest social network. We believe Facebook has become increasingly important to advertisers and small businesses, which may result in outsized revenue and earnings growth for the company.

We sold the Fund's position in information technology stalwart International Business Machines (IBM), as we grew less confident in the company's ability to deliver future sales and earnings growth. During the summer—and before the precipitous decline in the price of crude oil, we eliminated the Fund's position in Cameron International, a leading manufacturer of oil and gas equipment, as we felt its shares had become fully valued.

Were there any notable changes in the Fund's weightings during the 12-month period?

During the 12-month period ended December 31, 2014, we increased the Fund's weightings in the health care, information technology, consumer discretionary and consumer staples sectors and decreased the Fund's weightings in the industrials, financials, utilities, telecommunication services, energy and materials sectors.

How was the Fund positioned relative to its benchmark index at the end of December 2014?

As of December 31, 2014, the Fund was overweighted relative to the S&P 500® Index in the consumer discretionary, information technology and health care sectors. The Fund was underweighted relative to the S&P 500® Index in the industrials, energy, consumer staples and financials sectors and was rather neutrally weighted relative to the Index in the materials sector on the same date. The Fund had no exposure to the utilities and telecommunication services sectors at the end of December 2014.

What is your tactical view and strategy for the months ahead?

On a macro level, despite the improving U.S. economy during 2014, there are still some lingering concerns regarding the depth and strength of the economic recovery, as inflation remained low and well under the Fed's target of 2% and wage growth was still lagging. In addition, although the U.S. economy grew stronger, global economic growth weakened during the annual period. This scenario likely means lower interest rates for longer, which should, in our view, be a net positive for the U.S. equity market.

All that said, as we look toward 2015, regardless of economic or market conditions, we intend to continue to look for and to emphasize leading larger-capitalization growth stocks that generally are ranked in the higher categories of 1, 2 or 3 in the Value Line Timeliness™ Ranking System. As of December 31, 2014, a majority of the Fund's assets were in stocks that met these criteria. We intend to seek investments in a diversified portfolio of high quality companies that

we believe are well positioned to grow sales and earnings over the next few years, regardless of the pace of economic growth or the interest rate environment. As always, our goal is to generate solid returns through capital growth across market cycles.

Value Line Core Bond Fund

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The investment objective of the Fund is to maximize current income. Capital appreciation is a secondary objective but only when consistent with the Fund's primary objective.

The Fund invests primarily in a diversified portfolio of primarily investment grade, fixed income obligations, including securities issued or guaranteed by the U.S. government, its agencies or instrumentalities (U.S. government securities), mortgage-backed securities, asset-backed securities, corporate bonds, and other fixed income securities. Under normal circumstances, the Fund invests at least 80% of its assets in fixed income securities. The Fund invests in debt securities of any maturity, and there is no limit on the Fund's maximum average portfolio maturity.

Manager Discussion of Fund Performance

Below, Value Line Core Bond Fund's portfolio managers Liane Rosenberg and Jeffrey D. Geffen discuss the Fund's performance and positioning for the 12 months ended December 31, 2014.

How did the Fund perform during the annual period?

The Fund generated a total return of 4.49% during the 12 months ended December 31, 2014. This compares to the 5.97% return of the Fund's benchmark, the Barclays U.S. Aggregate Bond Index (the "Barclays Index"), during the same annual period.

What key factors were responsible for the Fund's performance during the 12-month reporting period?

The Fund posted solid absolute gains, but lagged its benchmark, the Barclays Index, as the positive contribution made by duration positioning was slightly more than offset by the detracting effect of yield curve positioning. Sector allocation and issue selection decisions produced mixed results during the reporting period overall.

Which fixed income market sectors most significantly affected Fund performance?

Sector allocation overall produced mixed results during the reporting period. Overweighted allocations relative to the Barclays Index to long-maturity corporate bonds and to taxable municipal bonds boosted the Fund's results, as they were participants in the rally at the long-term end of the yield curve. Underweighted allocations to certain commodity-based credits, including metals & mining bonds and energy-related bonds, were also a positive, given the significant drop in commodity prices during the annual period.

Conversely, an out-of-benchmark exposure to high yield corporate bonds detracted from relative results, as the sector significantly underperformed the Barclays Index during the annual period. The Fund's holdings in short-term mortgage-backed securities also detracted, underperforming the longer maturities that benefited from the flattening of the yield curve. The Fund's modest underweight in long maturity U.S. Treasuries also dampened Fund results, for these securities were the best performers within the Barclays Index during the annual period, posting a return of more than 27% for the 12 months ended December 31, 2014.

Issue selection also generated mixed results. Several of the Fund's holdings of taxable municipal bonds posted especially strong returns, especially a 30-year bond issued by Tarrant County, Texas. These taxable municipal bonds

benefited not only from relatively long durations but also from improving credit quality. Similarly, issue selection within the investment grade corporate bond and mortgage-backed securities sectors buoyed the Fund's relative results. Within the investment grade corporate bond sector, an emphasis on both industrials and financials companies helped. A 30-year bond issued by supermarket Kroger was a particularly strong performer. However, utilities bonds offered higher returns than either industrials or financials bonds, and so the Fund's modest underweight in utilities dampened relative results. Within the mortgage-backed securities sector, an emphasis on high quality, premium coupon mortgage pass-throughs helped most, as these securities performed strongly based on their low pre-payment rates.

The poorest performers on an individual basis were a high yield energy-related bond issued by Whiting Petroleum and mid-grade credits issued by casino and gaming company International Game Technology and global investment banking firm Jefferies.

What was the Fund's duration strategy?

Duration positioning in the Fund had a modestly positive effect on its performance relative to the Barclays Index during the reporting period. While we kept the Fund's duration short that of the Barclays Index by approximately 1/4 year, which hurt as rates generally declined, we kept the Fund's U.S. Treasury holdings' duration overall longer than the U.S. Treasury duration of the Barclays Index. This helped the Fund given the strong price action of longer-dated U.S. Treasuries during the annual period. Duration is a measure of the Fund's sensitivity to changes in interest rates.

(continued)

How did yield curve positioning decisions affect the Fund's performance?

Yield curve positioning modestly detracted from the Fund's performance. The Fund benefited from an underweighting relative to the Barclays Index of maturities three years and under, but a relative underweighting at the long-term end of the U.S. Treasury yield curve, i.e. 22+ years, had a negative effect given the outperformance of longer-dated bonds during the annual period.

How did the Fund use derivatives and similar instruments during the reporting period?

The Fund did not use derivatives during the reporting period.

Were there any notable changes in the Fund's weightings during the annual period?

During the annual period, particularly in the second half of 2014, the overall theme of changes made was a reduction in credit quality risk. Thus, we increased the Fund's exposure to investment grade corporate bonds and reduced its exposure to high yield corporate bonds. Within the investment grade bond sector, we increased exposure to financials companies, as newly-imposed regulations are expected to lead to stronger credit profiles for the major banks. We focused our selling within the high yield corporate bond sector on commodity-linked issuers, as commodity prices weakened substantially. Within the mortgage-backed securities sector, which we reduced overall, we sold shorter-term securities and added longer-term maturities. This helped performance, as the longer-term securities benefited more from the drop in interest rates at the long-term end of the yield curve. We increased the Fund's position in long-term U.S. Treasuries, as our expectations for U.S. and global inflation lessened. Within the Fund's sovereign debt holdings, we sold all Petrobras bonds before this Brazilian oil company's senior management was investigated for financial improprieties. In terms of yield curve positioning, we prudently reduced the Fund's holdings in the belly, or intermediate segment, of the curve in anticipation of a flattening yield curve.

How was the Fund positioned relative to its benchmark index at the end of December 2014?

At the end of December 2014, the Fund was overweight relative to the Barclays Index in the investment grade corporate bond sector, as corporate profits remain relative strong and as we expect the default rate to remain at a historically low level for some time. The Fund was also overweight taxable municipal bonds due to generally rising state and municipal tax receipts. The Fund was modestly underweight mortgage-backed securities at the end of the annual period, as we expect mortgage pre-payment activity to accelerate at anticipated ongoing low levels of rates. Within the sector, we continued to favor higher quality mortgages, as we expect them to perform better than their lower quality counterparts. The Fund remained underweight relative to the Barclays Index short-term U.S. Treasuries in anticipation of a Fed move to raise short-term rates around mid-2015.

What is your tactical view and strategy for the months ahead?

In our view, global economic growth, jobs growth and inflation expectations—and how close actual data reports adhere to the Fed's targets—are likely to be key factors in fixed income market returns in the months ahead.

Of course, any significant change in the inflation outlook, either domestically or internationally, might cause us to reduce the Fund's exposure to longer-dated U.S. Treasuries. Any change in the Fed's outlook, either for a slower or faster rise in rates, or any change in economic growth expectations, either higher or lower, could cause us to change

the Fund's duration and/or yield curve positioning accordingly.

As we continue to seek to maximize current income, we maintain a long-term investment perspective.

The Value Line Tax Exempt Fund, Inc.

INVESTMENT OBJECTIVE AND STRATEGY (condensed)

The primary investment objective of the Fund is to provide investors with the maximum income exempt from federal income taxes while avoiding undue risk to principal. Capital appreciation is a secondary objective.

To achieve the Fund's investment objectives, under normal conditions, the Adviser invests at least 80% of the Fund's assets in securities the income of which is exempt from regular federal income taxation and will not subject non-corporate shareholders to the alternative minimum tax. The Fund invests primarily in investment grade municipal bonds and expects to maintain an average maturity of between 7 and 20 years.

Manager Discussion of Fund Performance

The fiscal year-end for Value Line Tax Exempt Fund, Inc. was changed from February 28 to December 31. Thus, below, Value Line Tax Exempt Fund, Inc. portfolio manager Liane Rosenberg discusses the Fund's performance and positioning for the 10 months ended December 31, 2014 (the "reporting period").

How did the Fund perform during the reporting period?

The Fund generated a total return of 4.38% during the 10 months ended December 31, 2014. This compares to the 5.73% return of the Fund's benchmark, the Barclays Municipal Bond Index (the "Barclays Index"), during the same period.

What key factors were responsible for the Fund's performance during the reporting period?

The Fund underperformed its benchmark, the Barclays Index, due primarily to its comparatively higher quality bias. Issue selection and sector allocation generated mixed results.

Which tax-exempt fixed income market segments most significantly affected Fund performance?

Detracting most from relative results was the Fund's higher credit quality bias than the Barclays Index. As lower-rated investment grade bonds outperformed higher-rated investment grade bonds during the reporting period, such an emphasis on quality hampered results. In particular, the Fund's higher credit quality bias led to underweighted allocations to the hospitals/health care and transportation sectors. These sectors tend to contain lower quality investment grade issues, but each posted some of the best returns in the Barclays Index during the reporting period. More modestly, a general overweight to the education sector also hurt, with the exception of California education bonds. Having an underweighted position relative to the Barclays Index in State of California bonds, which posted strong returns, also hindered Fund performance. Positions in State of New Jersey bonds detracted from results, as bonds issued by the State of New Jersey performed relatively poorly in the face of multiple credit rating downgrades for the state during the reporting period.

On the positive side, significantly underweighting general obligation ("GO") bonds at the local and state level and overweighting revenue bonds helped performance, as the Revenue Index (a subset of the Barclays Index) outperformed the GO Index (another subset of the Barclays Index) by approximately 200 basis points during the

reporting period. (A basis point is 1/100th of a percentage point.) Investors searching for yield saw value in the higher yielding revenue bonds that offered some credit protection in the form of regular tax receipts or other revenue streams. Also, as indicated, issue selection amongst California education bonds added value. The bonds of the Dry Creek Elementary School District and the Long Beach Community College District enjoyed strong double-digit returns. These securities, which were two of the top five performers in the Fund during the reporting period, benefited both from improving state fundamentals and from being longer-dated securities. Further, having an overweighted allocation to the bonds of Texas, a state that outperformed the Barclays Index during the reporting period, contributed positively.

What was the Fund's duration strategy?

Duration positioning in the Fund had a rather neutral impact on relative results during the reporting period. We kept the Fund's duration approximately one-fourth of a year shorter than that of the Barclays Index through most of the reporting period. We maintained this stance in light of the expected end to the Federal Reserve's (the "Fed") quantitative easing program in October 2014 and the widely anticipated increase in interest rates. Duration is a measure of the Fund's sensitivity to changes in interest rates.

How did yield curve positioning decisions affect the Fund's performance?

Yield curve positioning overall contributed positively, albeit modestly, to the Fund's performance during the reporting period. The Fund was modestly underweight the longer-term segment of the yield curve, i.e. bonds with maturities of 22 years or longer. This hurt performance, as these longer-duration bonds performed well. However, more than offsetting this was the positive impact of having an overweight in the slightly shorter maturity segments of bonds with maturities of 17 to 22 years, which still posted solid returns, and having an underweight in very short-term bonds, i.e. those with maturities of two years or less, which was the worst performing part of the yield curve.

(continued)

How did the Fund use derivatives and similar instruments during the reporting period?

The Fund did not use derivatives during the reporting period.

Were there any notable changes in the Fund's weightings during the reporting period?

During the reporting period, we increased the Fund's bias to higher quality issues. More specifically, we sold the Fund's last remaining exposure to Puerto Rico bonds, as the risk/reward dynamic of these securities—even with improved returns—remained unattractive, in our view. Indeed, while we started the reporting period with only a modest exposure to Puerto Rico bonds and while what bonds the Fund did own were still rated investment grade, we decided to sell when it became clear to us that the commonwealth's deteriorating credit metrics were indicative of a speculative grade credit rating. We also reduced exposure to New Jersey, which also experienced declining credit metrics during the reporting period. Conversely, we increased the Fund's exposure to higher rated states, such as California, Texas and New York. From a sector perspective, we increased the Fund's exposure to the health care sector, as we believe these bonds should continue to be good performers in the coming months. We also increased the Fund's focus on revenue bonds with solid revenue streams that we believe provide more reliable bondholder protections.

How was the Fund positioned relative to its benchmark index at the end of December 2014?

At the end of December 2014, the Fund maintained its overweight to revenue bonds, as we believe revenue bonds are likely to continue to outperform general obligation bonds in the months ahead and because we continued to like having the protection of steady, specific revenue streams dedicated to bond payments.

What is your tactical view and strategy for the months ahead?

At the end of December 2014, we expected the U.S. economy to continue to strengthen, with improved job growth, lower unemployment and modest inflation expectations remaining positive supports for the municipal bond market. In our view, this scenario, along with higher interest rates, bodes well for increased tax receipts and for reduced unfunded pension liabilities. Given this view, we are likely to extend the Fund's duration modestly to a more neutral position relative to that of the Barclays Index. We may also seek opportunities to increase exposure to housing, as this sector often improves with overall growth in the U.S. economy. Of course, any surprises from the Fed in terms of the timing of interest rate increases will likely cause us to reassess the Fund's duration. Similarly, any changes to the inflation outlook would likely cause us to reassess the Fund's duration and yield curve positioning. Additionally, if GDP is weaker than expected, we may re-evaluate the Fund's sector positioning as well as our overall quality bias.

As we continue to seek maximum income exempt from federal income taxes while avoiding undue risk to principal, we maintain a long-term investment perspective.

The Value Line Tax Exempt Fund, Inc.

The following graph compares the performance of The Value Line Tax Exempt Fund, Inc. to that of the Barclays Capital Municipal Bond Index (the "Index"). The Value Line Tax Exempt Fund, Inc. is a professionally managed mutual fund, while the Index is not available for investment and is unmanaged. The returns for the Index do not reflect charges, expenses or taxes, but do include the reinvestment of dividends. The comparison is shown for illustrative purposes only.

Comparison of a Change in Value of a \$10,000 Investment in The Value Line Tax Exempt Fund, Inc. and the Barclays Capital Municipal Bond Index*

Performance Data: **

	Average Annual Total Return	Growth of an Assumed Investment of \$10,000
1 year ended 12/31/14	7.76%	\$10,776
5 years ended 12/31/14	3.97%	\$12,150
10 years ended 12/31/14	3.03%	\$13,479

- * The Barclays Capital Municipal Bond Index is representative of the broad based fixed income market. It includes long-term investment grade tax-exempt bonds. The returns for the Index do not reflect charges, expenses, or taxes, and it is not possible to directly invest in this unmanaged Index. The return for the Index does not reflect expenses which are deducted from the Fund's returns.
- ** The performance data quoted represent past performance and are no guarantee of future performance. The average annual total returns and growth of an assumed investment of \$10,000 include dividends reinvested and capital gains distributions accepted in shares. The investment return and principal value of an investment will fluctuate so that an investment, when redeemed, may be worth more or less than its original cost. The performance data and graph do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares.

Notes to Financial Statements

1. Significant Accounting Policies

Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., Value Line Income and Growth Fund, Inc., Value Line Larger Companies Fund, Inc., Value Line Core Bond Fund, and The Value Line Tax Exempt Fund, Inc. (individually a “Fund” and collectively, the “Funds”) are each registered under the Investment Company Act of 1940, as amended, as diversified, open-end management investment companies. The primary investment objective of the Value Line Premier Growth Fund, Inc. and The Value Line Fund, Inc. is long-term growth of capital. The primary investment objective of the Value Line Income and Growth Fund, Inc. is income, as high and dependable as is consistent with reasonable risk and capital growth to increase total return is a secondary objective. The sole investment objective of the Value Line Larger Companies Fund, Inc. is to realize capital growth. The primary investment objective of the Value Line Core Bond Fund is to maximize current income. As a secondary investment objective, the Fund will seek capital appreciation, but only when consistent with its primary objective. The primary investment objective of The Value Line Tax Exempt Fund, Inc. is to provide investors with the maximum income exempt from federal income taxes while avoiding undue risk to principal by investing primarily in investment-grade municipal securities. The Value Line Funds (the “Value Line Funds”) is a family of 10 mutual funds that includes a wide range of solutions designed to meet virtually any investment goal and consists of a variety of equity, fixed income, and hybrid funds.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies consistently followed by the Funds in the preparation of their financial statements.

(A) Security Valuation: Securities listed on a securities exchange are valued at the closing sales prices on the date as of which the net asset value (“NAV”) is being determined. Securities traded on the National Association of Securities Dealers Automated Quotations (“NASDAQ”) Stock Market are valued at the NASDAQ Official Closing Price. In the absence of closing sales prices for such securities and for securities traded in the over-the-counter market, the security is valued at the midpoint between the latest available and representative asked and bid prices. Short-term instruments with maturities of 60 days or less at the date of purchase are valued at amortized cost, which approximates fair value. Short-term instruments with maturities greater than 60 days at the date of purchase are valued at the midpoint between the latest available and representative asked and bid prices, and commencing 60 days prior to maturity such securities are valued at amortized cost.

The Board of Directors (the “Board”) has determined that the value of bonds and other fixed income corporate securities be calculated on the valuation date by reference to valuations obtained from an independent pricing service that determines valuations for normal institutional-size trading units of debt securities, without exclusive reliance upon quoted prices. This service takes into account appropriate factors such as institutional-size trading in similar groups of securities, yield, quality, coupon rate, maturity, type of issue, trading characteristics and other market data in determining valuations. Bonds and fixed income securities are valued at the evaluated bid on the date as of which the NAV is being determined. Securities, other than bonds and other fixed income securities, not priced in this manner are valued at the midpoint between the latest available and representative bid and asked prices, or when stock valuations are used, at the latest quoted sale price as of the regular close of business of the New York Stock Exchange (“NYSE”)

on the valuation date.

Investments in shares of open-end mutual funds, including money market funds, are valued at their daily NAV which is calculated as of the close of regular trading on the NYSE (usually 4:00 P.M. Eastern Standard Time) on each day on which the NYSE is open for business. NAV per share is determined by dividing each Fund's total net assets by each Fund's total number of shares outstanding at the time of calculation.

The Board has adopted procedures for valuing portfolio securities in circumstances where market quotes are not readily available, and has delegated the responsibility for applying the valuation methods to the Adviser. A valuation committee (the "Valuation Committee") was established by the Board to oversee the implementation of the Funds' valuation methods and to make fair value determinations on behalf of the Board, as instructed. The Adviser monitors the continued appropriateness of methods applied and determines if adjustments should be made in light of market changes, events affecting the issuer, or other factors. If the Adviser determines that a valuation method may no longer be appropriate, another valuation method may be selected, or the Valuation Committee will be convened to consider the matter and take any appropriate action in accordance with procedures set forth by the Board. The Board shall review the appropriateness of the valuation methods and these methods may be amended or supplemented from time to time by the Valuation Committee. In addition, the Funds may use the fair value of a security when the closing market price on the primary exchange where the security is traded no longer reflects the value of a security due to factors affecting one or more relevant securities markets or the specific issuer.

December 31, 2014

(B) Fair Value Measurements: The Funds follow fair valuation accounting standards (FASB ASC 820-10) which establishes a definition of fair value and set out a hierarchy for measuring fair value. These standards require additional disclosures about the various inputs and valuation techniques used to develop the measurements of fair value and a discussion of changes in valuation techniques and related inputs during the period. These inputs are summarized in the three broad levels listed below:

Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities
– that the Fund has the ability to access at the measurement date;

Level 2 Inputs other than quoted prices that are observable for the asset or liability either directly or
– indirectly, including inputs in markets that are not considered to be active;

Level 3 Inputs that are unobservable.

–

Transfers between investment levels may occur as the markets fluctuate and/or the availability of data used in an investment's valuation changes. The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The Funds follow the updated provisions surrounding fair value measurements and disclosures on transfers in and out of all levels of the fair value hierarchy on a gross basis and the reasons for the transfers as well as to disclosures about the valuation techniques and inputs used to measure fair value for investments that fall in either Level 2 or Level 3 of the fair value hierarchy.

For the year ended December 31, 2014, there were no transfers between Level 1, Level 2, and Level 3 assets for each fund.

The Funds' policy is to recognize transfers between levels at the beginning of the reporting period.

The amounts and reasons for all transfers in and out of each level within the three-tier hierarchy are disclosed when the Funds had an amount of total transfers during the reporting period that were meaningful in relation to their net assets as of the end of the reporting period (e.g. greater than 1%). An investment asset's or liability's level within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used.

For the year ended December 31, 2014, there were no Level 3 investments. The Schedule of Investments includes a breakdown of the Funds' investments by category.

(C) Repurchase Agreements: Each Fund may enter into repurchase agreements, under the terms of a Master Repurchase Agreement, with selected commercial banks and broker-dealers, under which the Funds acquire securities as collateral and agrees to resell the securities at an agreed upon time and at an agreed upon price. Each Fund, through the custodian or a sub-custodian, receives delivery of the underlying securities collateralizing repurchase agreements. The Funds' custodian takes possession of the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds

one business day, it is the Funds' policy to mark-to-market the value of the underlying securities daily to ensure the adequacy of the collateral. In the event of default by either the seller or the Funds, the Master Repurchase Agreement may permit the non-defaulting party to net and close out all transactions. The Funds have the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. Under certain circumstances, in the event of default or bankruptcy by the other party to the agreement, realization and/or retention of the collateral or proceeds may be subject to legal proceedings. At year end, there were no open repurchase agreements for the Value Line Funds.

Notes to Financial Statements (continued)

(D) Federal Income Taxes: It is the policy of each Fund to continue to qualify as a regulated investment company by complying with the provisions available to regulated investment companies, as defined in applicable sections of the Internal Revenue Code, and to distribute all of their investment income and capital gains to their shareholders. Therefore, no provision for federal income tax is required.

As of December 31, 2014, and for all open tax years, management has analyzed the Fund's tax positions taken on federal and state income tax returns, and has concluded that no provision for federal or state income tax is required in the Funds' financial statements. The Funds' federal and state income tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

(E) Security Transactions and Distributions: Security transactions are accounted for on the date the securities are purchased or sold. Realized gains and losses on sales of securities are calculated for financial accounting and federal income tax purposes on the basis of first in first out convention ("FIFO"). Dividend income and distributions to shareholders are recorded on the ex-dividend date. Distributions are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Interest income, adjusted for the amortization of discount and premium, is earned from settlement date and recognized on the accrual basis. Gains and losses realized on prepayments received on mortgage-related securities are recorded as interest income.

The dividends and distributions were as follows:

	Year Ended December 31, 2014	Period Ended December 31, 2013
Value Line Premier Growth Fund, Inc.		
Dividends per share from net investment income	\$ 0.0059	\$ 0.0000
Distributions per share from net realized gains	\$ 2.4421	\$ 2.4934
The Value Line Fund, Inc.		
Dividends per share from net investment income	\$ 0.0063	\$ 0.0570
Value Line Income and Growth Fund, Inc.		
Dividends per share from net investment income	\$ 0.1147	\$ 0.1157
Distributions per share from net realized gains	\$ 1.3457	\$ 0.4174
Value Line Larger Companies Fund, Inc.		
Dividends per share from net investment income	\$ 0.1060	\$ 0.1521
Distributions per share from net realized gains	\$ 3.3972	\$ 0.0000
Value Line Core Bond Fund		
Dividends per share from net investment income	\$ 0.2601	\$ 0.0537
Distributions per share from return of capital	\$ 0.0000	\$ 0.0089
	Period Ended December 31, 2014	Year Ended February 28, 2014
The Value Line Tax Exempt Fund, Inc.		

Dividends per share from net investment income	\$	0.2187	\$	0.2746
--	----	--------	----	--------

The Funds may purchase mortgage pass-through securities on a to-be-announced (“TBA”) basis, with payment and delivery scheduled for a future date. The Funds may enter into a TBA agreement, sell the obligation to purchase the pools stipulated in the TBA agreement prior to the stipulated settlement date and enter into a new TBA agreement for future delivery of pools of mortgage pass-through securities (a “TBA roll”). A TBA roll is treated by the Funds as a purchase transaction and a sale transaction in which the Funds realize a gain or loss. The Funds’ use of TBA rolls may cause the Funds to experience higher portfolio turnover and higher transaction costs. The Funds could be exposed to possible risk if there is an adverse market action, expenses or delays in connection with TBA transactions, or if the counterparty fails to complete the transaction.

72

December 31, 2014

The Value Line Core Bond Fund may invest in Treasury Inflation-Protection Securities (“TIPS”). The principal value and interest payout of TIPS are periodically adjusted according to the rate of inflation based on the Consumer Price Index. The adjustments for principal and income due to inflation are reflected in interest income in the Statements of Operations.

Income dividends and capital gains distributions are automatically reinvested in additional shares of the Fund unless the shareholder has requested otherwise. Income earned by the Fund on weekends, holidays and other days on which the Fund is closed for business is declared as a dividend on the next day on which the Fund is open for business. The Value Line Income and Growth Fund, Inc. distributes all of its net investment income quarterly and the Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., and the Value Line Larger Companies Fund, Inc. distribute all of their net investment income annually. The Value Line Core Bond Fund and The Value Line Tax Exempt Fund, Inc. declares and pays dividends monthly. Net realized capital gains, if any, are distributed to shareholders annually or more frequently if necessary to comply with the Internal Revenue Code.

(F) Foreign Currency Translation: The books and records of the Funds are maintained in U.S. dollars. Assets and liabilities which are denominated in foreign currencies are translated to U.S. dollars at the prevailing rates of exchange at the valuation date. The Funds do not isolate changes in the value of investments caused by foreign exchange rate differences from the changes due to other circumstances.

Income and expenses are translated to U.S. dollars based upon the rates of exchange on the respective dates of such transactions.

Net realized foreign exchange gains or losses arise from currency fluctuations realized between the trade and settlement dates on securities transactions, the differences between the U.S. dollar amounts of dividends, interest, and foreign withholding taxes recorded by the Funds, and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, other than investments, at the end of the fiscal period, resulting from changes in the exchange rates. The effect of the change in foreign exchange rates on the value of investments is included in realized gain/(loss) on investments and change in net unrealized appreciation/(depreciation) on investments.

(G) Representations and Indemnifications: In the normal course of business, the Funds enter into contracts that contain a variety of representations and warranties which provide general indemnifications. The Funds’ maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, based on experience, management expects the risk of loss to be remote.

(H) Accounting for Real Estate Investment Trusts: The Funds own shares of Real Estate Investment Trusts (“REITs”) which report information on the source of their distributions annually. Distributions received from REITs during the year which represent a return of capital are recorded as a reduction of cost and distributions which represent a capital gain dividend are recorded as a realized long-term capital gain on investments.

(I) Foreign Taxes: The Funds may be subject to foreign taxes on income, gains on investments, or currency repatriation, a portion of which may be recoverable. The Funds will accrue such taxes and recoveries as applicable, based upon its current interpretation of tax rules and regulations that exist in the markets in which it invests.

(J) Securities Lending: Under an agreement with State Street Bank & Trust (“State Street”), the Funds can lend their securities to brokers, dealers and other financial institutions approved by the Board. By lending their investment securities, the Funds attempt to increase their net investment income through receipt of interest on the loan. Any gain or loss in the market price of the securities loaned that might occur and any interest or dividends declared during the term of the loan would accrue to the account of the Funds. Risks of delay in recovery of the securities or even loss of rights in the collateral may occur should the borrower of the securities fail financially. Generally, in the event of a counter-party default, the Funds have the right to use the collateral to offset the losses incurred. The lending fees received and the Funds’ portion of the interest income earned on the cash collateral are included in the Statements of Operations.

Notes to Financial Statements (continued)

Upon entering into a securities lending transaction, the Funds receive cash or other securities as collateral in an amount equal to or exceeding 102% of the current market value of the loaned securities. Any cash received as collateral is invested by State Street Global Advisors, acting in its capacity as securities lending agent (the “Agent”), in The Value Line Funds collateral account, which is subsequently invested into joint repurchase agreements and/or State Street Navigator Securities Lending Prime Portfolio. When the Funds invest the cash collateral in the State Street Navigator Securities Lending Prime Portfolio, a portion of the dividends received on the collateral is rebated to the borrower of the securities and the remainder is split between the Agent and the Funds.

The Funds enter into joint repurchase agreements whereby their uninvested cash collateral from securities lending is deposited into a joint cash account with other funds managed by the Adviser and may be used to invest in one or more repurchase agreements. The value and face amount of the joint repurchase agreement are allocated to the funds based on their pro-rata interest in the repurchase agreement. A repurchase agreement is accounted for as a loan by the funds to the seller, collateralized by securities which are delivered to the Fund’s custodian. The market value, including accrued interest, of the initial collateralization is required to be at least 102% of the dollar amount invested by the funds, with the value of the underlying securities marked-to-market daily to maintain coverage of at least 100%. Investments made with the cash collateral are disclosed on the Schedules of Investments.

At year end, the Value Line Funds were not invested in joint repurchase agreements.

As of December 31, 2014, the Funds loaned securities which were collateralized by cash which was reinvested into the State Navigator Securities Lending Prime Portfolio as disclosed on the Schedule of Investments. The value of the securities on loan and the value of the related collateral were as follows:

Fund	Value of Securities Loaned	Value of Collateral	Total Collateral (including Calculated Mark)*
Value Line Premier Growth Fund, Inc.	\$ 6,358,195	\$6,576,025	\$6,506,450
The Value Line Fund, Inc.	1,259,752	1,301,303	1,286,504
Value Line Income and Growth Fund, Inc.	10,753,662	11,071,945	10,989,988
Value Line Larger Companies Fund, Inc.	6,763,885	6,975,500	6,903,250
Value Line Core Bond Fund	823,311	839,535	840,505

* Balances represent the end of day mark-to-market of securities lending collateral that will be reflected by the Funds as of the next business day.

(K) Options: The Value Line Income and Growth Fund, Inc.’s investment strategy allows the use of options. The Fund utilizes options to hedge against changes in market conditions or to provide market exposure while trying to reduce transaction costs.

When the Fund writes a put or call option, an amount equal to the premiums received is included on the Statement of Assets and Liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option. If an option expires on its stipulated expiration date or if the Fund enters into a closing

purchase transaction, a gain or loss is realized. If a written call option on an individual security is exercised, a gain or loss is realized for the sale of the underlying security, and the proceeds from the sale are increased by the premium originally received. If a written put option on an individual security is exercised, the cost of the security acquired is decreased by the premium originally received. As a writer of an option, a Fund bears the market risk of an unfavorable change in the price of the individual security underlying the written option. Additionally, written call options may involve the risk of limited gains.

December 31, 2014

The Fund may also purchase put and call options. When a Fund purchases a put or call option, an amount equal to the premium paid is included on the Fund's Statement of Assets and Liabilities as an investment, and is subsequently marked-to-market to reflect the current market value of the option. If an option expires on the stipulated expiration date or if the Fund enters into a closing sale transaction, a gain or loss is realized. If the Fund exercises a call option on an individual security, the cost of the security acquired is increased by the premium paid for the call. If the Fund exercises a put option on an individual security, a gain or loss is realized from the sale of the underlying security, and the proceeds from such a sale are decreased by the premium originally paid. Written and purchased options are non-income producing securities.

As of December 31, 2014, the Value Line Income and Growth Fund, Inc. had no open options contracts.

(L) Subsequent Events: Management has evaluated all subsequent transactions and events through the date on which these financial statements were issued and has determined that no additional items require adjustment to or disclosure in the financial statements.

2. Investment Risks

Securities issued by U.S. Government agencies or government-sponsored enterprises may not be guaranteed by the U.S. Treasury. The Government National Mortgage Association ("GNMA" or "Ginnie Mae"), a wholly-owned U.S. Government corporation, is authorized to guarantee, with the full faith and credit of the U.S. Government, the timely payment of principal and interest on securities issued by institutions approved by GNMA and backed by pools of mortgages insured by the Federal Housing Administration or guaranteed by the Department of Veterans Affairs. Government-related guarantors (i.e., not backed by the full faith and credit of the U.S. Government) include the Federal National Mortgage Association ("FNMA" or "Fannie Mae") and the Federal Home Loan Mortgage Corporation ("FHLMC" or "Freddie Mac"). Pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA, but are not backed by the full faith and credit of the U.S. Government. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but its participation certificates are not backed by the full faith and credit of the U.S. Government.

3. Reorganization

On February 17, 2012 and December 13, 2012, respectively, the Board approved an agreement and plan of reorganization (the "Reorganization") pursuant to which the Value Line New York Tax Exempt Trust (the "Acquired Trust") and Value Line U.S. Government Securities Fund, Inc. (the "Acquired Fund"), respectively, would merge into and become shareholders of the Value Line Tax Exempt Fund, Inc. and Value Line Core Bond Fund, respectively, (the "Surviving Funds"). The Board believed the reorganization would be advantageous to the shareholders of each Fund for the reason that each Fund has similar investment objectives, improved performance and a larger and more diverse investment universe, potentially allowing for economies of scale to be realized over time.

On May 18, 2012 and March 22, 2013, respectively, the Surviving Funds acquired all of the assets and assumed the liabilities of the Acquired Trust and Acquired Fund, respectively, in a tax-free exchange for Federal tax purposes, pursuant to the Reorganization approved by the Board of each Fund and shareholders of record of the Acquired Trust and Acquired Fund, respectively, as of the applicable record date. All of the expenses incurred in connection with the Reorganization were paid by the Acquired Trust, Acquired Fund and Surviving Funds proportionately based on the

Edgar Filing: VALUE LINE FUND INC - Form N-CSR

Funds' respective net assets. The total Reorganization costs are \$123,474 and \$172,439, respectively. The value of shares issued by the Surviving Funds is presented in the Statement of Changes in Net Assets. The following tables set forth the number of shares issued by the Surviving Funds, the net assets and unrealized appreciation or depreciation of the Acquired Trust and Acquired Fund immediately prior to the Reorganization, and the net assets of the Surviving Funds immediately prior to and after the Reorganization:

Date of Reorganization	Surviving Fund	Shares Issued In Acquisition	Net Assets Before Reorganization	Net Assets After Reorganization
5-18-12	The Value Line Tax Exempt Fund, Inc.	1,523,225	\$ 89,797,170	\$ 105,301,354
3-22-13	Value Line Core Bond Fund	14,453,737	29,565,559	102,961,637

75

Notes to Financial Statements (continued)

Date of Reorganization	Acquired Trust/Acquired Fund	Shares Outstanding	Acquired Portfolio Net Assets	Acquired Portfolio Unrealized Appreciation/Depreciation
5-18-12	Value Line New York Tax Exempt Trust	1,654,552	\$ 15,504,184	\$ (1,018,322)
3-22-13	Value Line U.S. Government Securities Fund, Inc.	6,308,486	73,396,078	1,483,441

Assuming the Reorganization had been completed on March 1, 2012, the beginning of the period for the Value Line Tax Exempt Fund, Inc., the Surviving Fund's pro forma results of operations for the year ended February 28, 2013 would have been as follows:

Net investment income	\$ 2,518,390
Net gain on investments	\$ 2,536,661
Net increase in net assets from operations	\$ 5,055,051

Assuming the Reorganization had been completed on February 1, 2013, the beginning of the period for the Value Line Core Bond Fund, the Surviving Fund's pro forma results of operations for the year ended December 31, 2013 would have been as follows:

Net investment income	\$ 1,580,309
Net loss on investments	\$ (4,057,854)
Net decrease in net assets from operations	\$ (2,477,545)

Because each combined investment portfolios have been managed as a single integrated portfolio since the closing of the Reorganization, it is not practicable to separate the amounts of revenue and earnings of the Acquired Trust and Acquired Fund that have been included in the Surviving Trust's and Surviving Fund's, respectively, Statement of Operations since May 18, 2012 and March 22, 2013, respectively.

4. Purchases and Sales of Securities

Purchases and sales of securities, excluding short-term investments, were as follows:

Fund	Purchases of Investment Securities	Sales of Investment Securities	Purchases of U.S. Government Agency Obligations	Sales of U.S. Government Agency Obligations
Value Line Premier Growth Fund, Inc.	\$34,119,684	\$88,235,654	\$ —	\$ —
The Value Line Fund, Inc.	74,611,148	88,074,082	—	—
Value Line Income and Growth Fund, Inc.	196,485,958	167,644,301	11,144,279	15,702,763
Value Line Larger Companies Fund, Inc.	187,929,397	198,117,964	—	—
Value Line Core Bond Fund	54,613,818	43,434,078	34,418,388	51,072,174

Edgar Filing: VALUE LINE FUND INC - Form N-CSR

The Value Line Tax Exempt Fund	\$8,854,303	17,269,511	\$—	\$—

December 31, 2014

5. Income Taxes

At December 31, 2014, information on the tax components of capital is as follows:

Fund	Cost of investments for tax purposes	Gross tax unrealized appreciation	Gross tax unrealized depreciation	Net tax unrealized appreciation/ (depreciation) on investments	Undistributed ordinary income	Undistributed long-term gain	Undistributed tax exempt income
Value Line Premier Growth Fund, Inc.	\$ 195,180,211	\$ 192,044,713	\$ (634,551)	\$ 191,410,162	\$ 27,772	\$ 17,140,683	\$ —
The Value Line Fund, Inc.	102,117,337	31,218,293	(466,902)	30,751,391	—	—	—
Value Line Income and Growth Fund, Inc.	319,840,500	63,043,805	(2,738,360)	60,305,445	—	4,188,097	—
Value Line Larger Companies Fund, Inc.	184,634,745	46,851,099	(3,954,763)	42,896,336	—	8,067,690	—
Value Line Core Bond Fund	78,797,249	1,437,554	(490,748)	946,806	56,181	—	—
The Value Line Tax Exempt Fund, Inc.*	70,749,880	3,523,221	(38,873)	3,484,348	—	—	13,272

* Period from March 1, 2014 to December 31, 2014.

On December 22, 2010, the Regulated Investment Company Modernization Act of 2010 (the “Act”) was signed by the President of the United States of America. Under the Act, net capital losses recognized by the Funds after December 31, 2010, may get carried forward indefinitely, and retain their character as short-term and/or long-term losses. Prior to this Act, pre-enactment net capital losses incurred by the Funds were carried forward for eight years and treated as short-term losses. The Act requires under the transition that post-enactment net capital losses are used before pre-enactment net capital losses.

As of December 31, 2014, the following Funds had a realized capital loss carryforward, for federal income tax purposes, available to be used to offset future realized capital gains:

Edgar Filing: VALUE LINE FUND INC - Form N-CSR

Fund	Expiring December 31, 2016	Expiring December 31, 2017	Unlimited Short-Term Losses	Unlimited Long-Term Losses
Value Line Premier Growth Fund, Inc.	\$—	\$—	\$—	\$—
The Value Line Fund, Inc.	—	7,366,758	—	—
Value Line Income and Growth Fund, Inc.	—	—	—	—
Value Line Larger Companies Fund, Inc.	—	—	—	—
Value Line Core Bond Fund	—	—	913,444	—
The Value Line Tax Exempt Fund, Inc.*	5,827,979	1,077,011	200	104,461

The capital loss carry forward amounts for The Value Line Tax Exempt Fund may be subject to limitations on their use pursuant to IRS sections 381-384.

* Period from March 1, 2014 to December 31, 2014.

For the period ended December 31, 2014, the following Funds had late year ordinary loss deferrals:

Fund	Amount
Value Line Premier Growth Fund, Inc.	\$—
The Value Line Fund, Inc.	(24)
Value Line Income and Growth Fund, Inc.	—
Value Line Larger Companies Fund, Inc.	—
Value Line Core Bond Fund	—
The Value Line Tax Exempt Fund, Inc.*	—

* Period from March 1, 2014 to December 31, 2014.

Notes to Financial Statements (continued)

During the period ended December 31, 2014, the following Funds utilized capital loss carryforwards:

Fund	Amount
Value Line Premier Growth Fund, Inc.	\$—
The Value Line Fund, Inc.	35,481,465
Value Line Income and Growth Fund, Inc.	—
Value Line Larger Companies Fund, Inc.	35,126,549
Value Line Core Bond Fund	—
The Value Line Tax Exempt Fund, Inc.*	—

* Period from March 1, 2014 to December 31, 2014.

To the extent that current or future capital gains are offset by capital losses, the Funds do not anticipate distributing any such gains to shareholders.

It is uncertain whether the Funds will be able to realize the benefits of the losses before they expire.

Net realized gain/(loss) differs from financial statements and tax purposes primarily due to wash sales, contingent payment debt instruments, return of capital from investments in REITs, or investments in partnerships.

Permanent book-tax differences relating to the current year were reclassified within the composition of the net asset accounts.

A reclassification has been made on the Statements of Assets and Liabilities to increase/(decrease) undistributed net investment income, accumulated net realized gain, and additional paid-in capital for the Funds as follows:

Fund	Undistributed Net Investment Income/(Loss)	Accumulated Net Realized Gains/(Losses)	Additional Paid-In Capital
Value Line Premier Growth Fund, Inc.	\$ 4,108	\$ (4,108)	—
The Value Line Fund, Inc.	74,269	2,777	(77,046)
Value Line Income and Growth Fund, Inc.	(323,362)	323,606	(244)
Value Line Larger Companies Fund, Inc.	29,014	775,044	(804,058)
Value Line Core Bond Fund	504	(504)	—
The Value Line Tax Exempt Fund, Inc.*	275	(275)	—

* Period from March 1, 2014 to December 31, 2014.

These reclassifications were primarily due to differing treatments of net operating loss, distribution reclassification, prior year adjustments due to investments in real estate investment trusts, foreign currency gains/(losses) and litigation interest. Net assets were not affected by these reclassifications.

During the year ended December 31, 2014, as permitted under federal income tax regulations, the Value Line Income and Growth Fund, Inc. elected to defer \$9,538 of post October short-term losses.

Edgar Filing: VALUE LINE FUND INC - Form N-CSR

The tax composition of distributions paid to shareholders during fiscal 2014 and 2013, were as follows:

Fund	Year Ended December 31, 2014			Total Distributions Paid

Fund	Year Ended January 31, 2013		
	Ordinary Income	Long-Term Capital Gain	Total Distributions Paid
Value Line Core Bond Fund	\$ 1,614,009	\$ 25,662	\$ 1,639,671

Distributions Paid From	Year Ended February 28, 2014	Year Ended February 28, 2013
	Tax exempt income	\$ 2,273,751
Taxable ordinary income	4,666	5,421
Total	\$ 2,278,417	\$ 2,415,136

6. Investment Advisory Fee, Service and Distribution Fees and Transactions With Affiliates

Advisory fees of \$2,897,997, \$854,491, \$2,284,424, \$1,607,518, \$414,473 and \$322,539 for the Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., Value Line Income and Growth Fund, Inc., Value Line Larger Companies Fund, Inc., Value Line Core Bond Fund and The Value Line Tax Exempt Fund, Inc., respectively, were paid or payable to the Adviser for the period ended December 31, 2014. An advisory fee of \$407,267 was paid or payable for The Tax Exempt Fund, Inc., for the year ended February 28, 2014. For the Value Line Premier Growth Fund, Inc. and Value Line Larger Companies Fund, Inc. advisory fees were computed at an annual rate of 0.75% of the daily net assets during the year. For The Value Line Fund, Inc. and Value Line Income and Growth Fund, Inc. advisory fees were computed at an annual rate of 0.70% of the first \$100 million of the Fund's average daily net assets plus 0.65% of the excess thereof. For the Value Line Core Bond Fund and The Value Line Tax Exempt Fund, Inc. advisory fees were computed at an annual rate of 0.50% of the Fund's average daily net assets during the year prior to any fee waivers. The Funds advisory fees are paid monthly. The Adviser provides research, investment programs, and supervision of the investment portfolio and pays costs of administrative services, office space, equipment and compensation of administrative, bookkeeping, and clerical personnel necessary for managing the affairs of the Funds. The Adviser also provides persons, satisfactory to the Funds' Board, to act as officers and employees of the Funds and pays their salaries. Effective February 1, 2013, and voluntarily renewed annually through June 30, 2015, the Adviser contractually agreed to waive 0.10% of the advisory fee for the Value Line Core Bond Fund. The fees waived amounted to \$123,886 for the period ended December 31, 2014. The Adviser has no right to recoup previously waived amounts.

Notes to Financial Statements (continued)

The Funds have a Service and Distribution Plan (the “Plan”), adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940, which compensates EULAV Securities LLC (the “Distributor”) for advertising, marketing and distributing the Funds’ shares and for servicing the Funds’ shareholders at an annual rate of 0.25% of the Funds’ average daily net assets. For the period ended December 31, 2014, fees amounting to \$965,999, \$309,419, \$859,394, \$535,839, \$207,237 and \$161,269 before fee waivers for the Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., Value Line Income and Growth Fund, Inc., Value Line Larger Companies Fund, Inc., Value Line Core Bond Fund and the Value Line Tax Exempt Fund, Inc., respectively, were accrued under this Plan. The Tax Exempt Fund Inc., accrued fees amounting to \$204,326, before fee waivers, for the year ended February 28, 2014. Effective May 1, 2009, and voluntarily renewed annually through July 31, 2013, the Distributor contractually agreed to waive The Value Line Fund, Inc.’s 12b-1 fee by 0.25%; effective August 1, 2013, the Distributor discontinued to waive The Value Line Fund, Inc.’s 12b-1 fee. Effective March 1, 2009, and voluntarily renewed annually, the Distributor contractually agreed to reduce the fee for the Value Line Income and Growth Fund, Inc. by 0.05%. Effective May 1, 2007, and voluntarily renewed annually through July 31, 2013, the Distributor contractually agreed to waive Value Line Larger Companies Fund, Inc.’s 12b-1 fee by 0.25%; effective August 1, 2013 and voluntarily renewed annually, the Distributor contractually agreed to waive the Value Line Larger Companies Fund, Inc.’s 12b-1 fee by 0.10%. Effective June 1, 2007, and voluntarily renewed annually, the Distributor contractually agreed to reduce the 12b-1 fee by 0.10% for the Value Line Core Bond Fund. Effective July 1, 2008, and voluntarily renewed annually, the Distributor contractually agreed to waive the 12b-1 fees for The Tax Exempt Fund, Inc., for the year ended February 28, 2014 and the period ended December 31, 2014. The Value Line Income and Growth Fund, Inc., Value Line Larger Companies Fund, Inc., Value Line Core Bond Fund and The Value Line Tax Exempt Fund, Inc. fees waived amounted to \$82,712, \$214,336, \$82,439, and \$161,269, respectively, for the period ended December 31, 2014. The Value Line Tax Exempt Fund Inc. fees waived amount to \$204,326 for the year ended February 28, 2014. The Distributor has no right to recoup previously waived amounts.

Effective July 5, 2012, the Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., Value Line Income and Growth, Inc., and Value Larger Companies Fund, Inc., have a Sub-Transfer Agent Plan (the “sub TA plan”) which compensates financial intermediaries that provide sub-transfer agency and related services to investors that hold their Fund shares in omnibus accounts maintained by the financial intermediaries with the Funds. The sub-transfer agency fee, which may be paid directly to the financial intermediary or indirectly via the Distributor, is equal to the lower of (i) the aggregate amount of additional transfer agency fees and expenses that the Funds would otherwise pay to the transfer agent if each subaccount in the omnibus account maintained by the financial intermediary with the Funds were a direct account with the Funds and (ii) the amount by which the fees charged by the financial intermediary for including the Funds on its platform and providing shareholder, sub-transfer agency and related services exceed the amount paid under the Funds’ Plan with respect to each Fund’s assets attributable to shares held by the financial intermediary in the omnibus account. In addition, the amount of sub-transfer agency fees payable by the Fund’s to all financial intermediaries in the aggregate is subject to a maximum cap of 0.05% of each Fund’s average daily net assets. If the sub-transfer agency fee is paid to financial intermediaries indirectly via the Distributor, the Distributor does not retain any amount thereof and such fee otherwise reduces the amount that the Distributor is contractually obligated to pay to the financial intermediary. For the year ended December 31, 2014, fees amounting to \$75,186, \$5,326, \$47,488 and \$9,231 for the Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., Value Line Income and Growth Fund, Inc., and Value Line Larger Companies Fund, Inc., respectively, were paid under the sub TA plan.

Each Fund bears direct expenses incurred specifically on its behalf while common expenses of the Value Line Funds are allocated proportionately based upon each Fund’s respective net assets. The Funds bear all other costs and

expenses.

Certain officers and a trustee of the Adviser are also officers and a director of the Funds. At December 31, 2014, the officers and directors of the Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., Value Line Income and Growth Fund, Inc., Value Line Larger Companies Fund, Inc., Value Line Core Bond Fund and The Value Line Tax Exempt Fund, Inc. as a group owned less than 1% of the outstanding shares of each Fund.

7. Other

The Board of Trustees authorized a 3-for-1 reverse stock split effective October 17, 2014, for the Value Line Core Bond Fund. The transaction had no impact on total return, net assets, or any ratio presented in the Statements of Financial Highlights.

8. New Accounting Pronouncements

In June 2014, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) No. 2014-11. Transfers and Servicing (Topic 860), Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures. The ASU changes the accounting for certain repurchase agreements and expands disclosure requirements related to repurchase agreements, securities lending, repurchase-to-maturity and similar transactions. The ASU is effective for interim and annual reporting periods beginning after December 15, 2014. Management has reviewed the requirements and believes the adoption of the ASU will not have a material impact on the financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Directors/Trustees and Shareholders of Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., Value Line Income and Growth Fund, Inc., Value Line Larger Companies Fund, Inc., Value Line Core Bond Fund and The Value Line Tax Exempt Fund, Inc.:

In our opinion, the accompanying statements of assets and liabilities, including the schedules of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Value Line Premier Growth Fund, Inc., The Value Line Fund, Inc., Value Line Income and Growth Fund, Inc., Value Line Larger Companies Fund, Inc., Value Line Core Bond Fund and The Value Line Tax Exempt Fund, Inc. (the "Funds") at December 31, 2014, and the results of their operations, the changes in their net assets and the financial highlights for the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2014 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP
New York, New York
February 25, 2015

Fund Expenses (unaudited):

Example

As a shareholder of the Funds, you incur ongoing costs, including management fees, distribution and service (12b-1) fees, and other Fund expenses. This Example is intended to help you understand your ongoing costs (in dollars) of investing in each Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The Example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period (July 1, 2014 through December 31, 2014).

Actual Expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line for each Fund under the heading “Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Funds’ actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Funds’ actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the table is useful in comparing ongoing costs only and will not help you determine the relative total costs of owning different funds. In addition, if transactional costs were included, your costs would have been higher.

	Beginning account value 7/1/14	Ending account value 12/31/14	Expenses paid during period 7/1/14 thru 12/31/14*
Actual			
Value Line Premier Growth Fund, Inc.	\$1,000.00	\$1,022.98	\$6.34
The Value Line Fund, Inc.	1,000.00	1,036.01	6.38
Value Line Income and Growth Fund, Inc.	1,000.00	1,048.26	6.02
Value Line Larger Companies Fund, Inc.	1,000.00	1,065.36	5.92
Value Line Core Bond Fund	1,000.00	1,009.43	4.53
The Value Line Tax Exempt Fund, Inc.	1,000.00	1,022.57	2.87

Edgar Filing: VALUE LINE FUND INC - Form N-CSR

Hypothetical (5% return before expenses)			
Value Line Premier Growth Fund, Inc.	1,000.00	1,018.94	6.33
The Value Line Fund, Inc.	1,000.00	1,018.94	6.33
Value Line Income and Growth Fund, Inc.	1,000.00	1,019.32	5.94
Value Line Larger Companies Fund, Inc.	1,000.00	1,019.47	5.79
Value Line Core Bond Fund		1,020.70	4.56
The Value Line Tax Exempt Fund, Inc.	1,000.00	1,027.23	2.87

* Expenses are equal to the Funds' annualized expense ratio of 1.24%, 1.24%, 1.17%, 1.14%, 0.89% and 0.47%, respectively, multiplied by the average account value over the period, multiplied by 184/365 to reflect the one-half year period. These expense ratios may differ from the expense ratios shown in the Financial Highlight

Federal Tax Notice (unaudited)

Each Fund designates the following amounts distributed during the fiscal year ended December 31, 2014, if any, as capital gain dividends, dividends eligible for the corporate dividends received deduction and/or qualified dividend income:

Fund	% of Qualifying Dividend Income	%	% of Dividends Eligible for the Corporate Dividends Received Deduction	%	Long-Term Capital Gains
Value Line Premier Growth Fund, Inc.	100	%	100	%	\$ 25,215,058
The Value Line Fund, Inc.	100		100		—
Value Line Income and Growth Fund, Inc.	100		96.27		46,684,297
Value Line Larger Companies Fund, Inc.	100		100		26,337,667
Value Line Core Bond Fund	—		—		—
The Value Line Tax Exempt Fund, Inc.	—		—		—

During the year ended December 31, 2014, the Value Line Tax Exempt Fund paid dividends to shareholders of \$0.2245 per share from net investment income, of which 99.76% are designated as exempt interest dividends for federal tax purposes. However, state and local taxes differ from state to state and a portion of the dividends may be subject to the individual Alternative Minimum Tax, so it is suggested that you consult your own tax adviser with respect to those taxes.

The Funds file their complete schedule of portfolio holdings with the Securities and Exchange Commission (“SEC”) for the first and third quarters of each fiscal year on Form N-Q. The Funds’ Form N-Q is available on the SEC’s website at <http://www.sec.gov> and may be reviewed and copied at the SEC’s Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities, and information regarding how the Funds voted these proxies for the 12-month period ended June 30 is available through the Funds’ website at <http://www.vlfunds.com> and on the SEC’s website at <http://www.sec.gov>. The description of the policies and procedures is also available without charge, upon request, by calling 1-800-243-2729.

Management of the Funds

The business and affairs of each Fund are managed by the Fund's officers under the direction of the Board. The following table sets forth information on the Directors and officers of the Funds, each of which serves in that capacity for every Fund. Each Director serves as a director or trustee of each of the registered investment companies advised by the Adviser (the "Value Line Funds"). Each Director serves until his or her successor is elected and qualified.

The Value line Family of Funds

In 1950, Value Line started its first mutual fund. Since then, knowledgeable investors have been relying on the Value Line Funds to help them build their financial futures. Over the years, Value Line Funds has evolved into what we are today - a diversified family of no-load mutual funds with a wide range of investment objectives - ranging from small, mid and large capitalization equities to fixed income. We also provide strategies that effectively combine both equities and fixed income, diligently taking into account the potential risk and reward of each investment.

* Only available through the purchase of Guardian Investor, a tax deferred variable annuity, or ValuePlus, a variable life insurance policy.

** Formerly known as the Value Line Aggressive Income Trust.

*** Formerly known as the Value Line Emerging Opportunities Fund, Inc.

For more complete information about any of the Value Line Funds, including charges and expenses, send for a prospectus from EULAV Securities LLC, 7 Times Square, New York, New York 10036-6524 or call 1-800-243-2729, 9am-5pm CST, Monday-Friday, or visit us at www.vlfunds.com. Read the prospectus carefully before you invest or send money.

Item 2 Code of Ethics

(a) The Registrant has adopted a Code of Ethics that applies to its principal executive officer, and principal financial officer and principal accounting officer.

(f) Pursuant to item 12(a), the Registrant is attaching as an exhibit a copy of its Code of Ethics that applies to its principal executive officer, and principal financial officer and principal accounting officer.

Item 3. Audit Committee Financial Expert.

(a)(1)The Registrant does not have an Audit Committee Financial Expert serving on its Audit Committee as of the date of this filing.

(3) However, the Registrant's Board expects to designate two new Board members as Audit Committee Financial Experts at the meeting of the Board on March 18-19, 2015. The two new Board members will each be independent directors and serve on the Audit Committee of the Registrant. The Registrant's previously designated Audit Committee Financial Expert resigned from its positions with the Registrant effective September 19, 2014.

A person who is designated as an “audit committee financial expert” shall not make such person an “expert” for any purpose, including without limitation under Section 11 of the Securities Act of 1933 or under applicable fiduciary laws, as a result of being designated or identified as an audit committee financial expert. The designation or identification of a person as an audit committee financial expert does not impose on such person any duties, obligations, or liabilities that are greater than the duties, obligations, and liabilities imposed on such person as a member of the audit committee and Board of Trustees in the absence of such designation or identification.

Item 4 Principal Accountant Fees and Services

(a) Audit Fees 2014 - \$8,149
Audit Fees 2013 - \$39,435

(b) Audit-Related fees – None.

(c) Tax Preparation Fees 2014 - \$12,767
Tax Preparation Fees 2013 - \$13,915

(d) All Other Fees – None

(e) (1) Audit Committee Pre-Approval Policy. All services to be performed for the Registrant by PricewaterhouseCoopers LLP must be pre-approved by the audit committee. All services performed were pre-approved by the committee.

(e) (2) Not applicable.

(f) Not applicable.

(g) Aggregate Non-Audit Fees 2014 - \$0
Aggregate Non-Audit Fees 2013 - \$1,200

(h) Not applicable.

Item 5. Audit Committee of Listed Registrants

Not Applicable.

Item 6. Investments

Not Applicable

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies

Not Applicable

Item 8. Portfolio Managers of Closed-End Management Investment Companies

Not Applicable

Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers

Not Applicable

Item 10 Submission of Matters to a Vote of Security Holders

Not Applicable

Item 11 Controls and Procedures

- (a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in rule 30a-2(c) under the Act (17 CFR 270.30a-2(c)) based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this report, are appropriately designed to ensure that material information relating to the registrant is made known to such officers and are operating effectively.
- (b) The registrant's principal executive officer and principal financial officer have determined that there have been no significant changes in the registrant's internal controls or in other factors that could significantly affect these controls subsequent to the date of their evaluation, including corrective actions with regard to significant deficiencies and material weaknesses.

Item 12 Exhibits

- (a) Code of Business Conduct and Ethics for Principal Executive and Senior Financial Officers attached hereto as Exhibit 100.COE
- (b)(1) Certification pursuant to Rule 30a-2(a) under the Investment Company Act of 1940 (17 CFR 270.30a-2) attached hereto as Exhibit 99.CERT.
- (2) Certification pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 attached hereto as Exhibit 99.906.CERT.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
