US tax changes - estimated impact on BP results

BP expects its future US after-tax earnings to be positively impacted by the recently-enacted changes to US corporate taxes, largely due to the reduction of the US federal corporate income tax rate from 35% to 21% (effective 1 January 2018). The ultimate impact of the change in the US corporate income tax rate is subject to a number of complex provisions in the legislation which BP is reviewing.

The lowering of the US corporate income tax rate to 21% requires revaluation of BP's US deferred tax assets and liabilities. The current estimated impact of this will be a one-off non-cash charge to the Group income statement of around \$1.5 billion that will impact BP's fourth quarter 2017 results. Details of the final actual charge are expected to be disclosed in BP's fourth quarter 2017 results announcement, due on 6 February 2018.
