Regulation FD Disclosure

On February 22, 2019, Magellan Gold Corporation (the “Company”) issued a press release announcing that it completed a bulk test of mineralized material supplied and delivered by a private third-party to the Company’s SDA Mill at Acaponeta, Nayarit State, Mexico. As announced December 17, 2018, the purpose of the test was to determine the viability of entering into a long-term processing agreement. Test processing of an initial bulk sample of approximately 600 tons was carried out. Magellan also has continued to advance its El Dorado Gold-Silver Project, which lies 50 kilometers south of the SDA Mill. The Company plans to truck ore from El Dorado to the mill for processing. Quotes have been obtained for contract mining and applications for environmental and blasting permits are in progress. Placing El Dorado into production is a key step in Magellan’s strategy of initiating and then increasing production through the SDA Mill. A copy of the press release is filed herewith as Exhibit 99.1.

On March 4, 2019, the Company issued a press release announcing that it has engaged the services of senior mining consultant David E. Drips to provide guidance in the evaluation, design and development of the Company’s El Dorado Gold-Silver mining project, Nayarit State, Mexico. Magellan has continued to advance El Dorado, which lies 50 kilometers south of the Company’s SDA Mill. The Company plans to process the ore at the SDA Mill once the new mine is developed.
