UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q
 QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the quarterly period ended September 30, 2018

OR
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934

For the transition period from _____ to _____

Commission File Number: 1-768

CATERPILLAR INC.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation)

37-0602744
(IRS Employer
I.D. No.)

510 Lake Cook Road, Suite 100, Deerfield, Illinois
(Address of principal executive offices)

60015
(Zip Code)

Registrant's telephone number, including area code: (224) 551-4000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

At September 30, 2018, 590,106,711 shares of common stock of the registrant were outstanding.

All short-term investments, which consist primarily of highly liquid investments with original maturities of three months or less, are considered to be cash equivalents.

See accompanying notes to Consolidated Financial Statements.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. A. Nature of operations

Information in our financial statements and related commentary are presented in the following categories:

Machinery, Energy & Transportation (ME&T) – Represents the aggregate total of Construction Industries, Resource Industries, Energy & Transportation and All Other operating segments and related corporate items and eliminations.

Financial Products – Primarily includes the company’s Financial Products Segment. This category includes Caterpillar Financial Services Corporation (Cat Financial), Caterpillar Insurance Holdings Inc. (Insurance Services) and their respective subsidiaries.

B. Basis of presentation

In the opinion of management, the accompanying unaudited financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of (a) the consolidated results of operations for the three and nine months ended September 30, 2018 and 2017, (b) the consolidated comprehensive income for the three and nine months ended September 30, 2018 and 2017, (c) the consolidated financial position at September 30, 2018 and December 31, 2017, (d) the consolidated changes in shareholders’ equity for the nine months ended September 30, 2018 and 2017 and (e) the consolidated cash flow for the nine months ended September 30, 2018 and 2017. The financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America (U.S. GAAP) and pursuant to the rules and regulations of the Securities and Exchange Commission (SEC).

Interim results are not necessarily indicative of results for a full year. The information included in this Form 10-Q should be read in conjunction with the audited financial statements and notes thereto included in our company’s annual report on Form 10-K for the year ended December 31, 2017 (2017 Form 10-K).

The December 31, 2017 financial position data included herein is derived from the audited consolidated financial statements included in the 2017 Form 10-K but does not include all disclosures required by U.S. GAAP. Certain amounts for prior periods have been reclassified to conform to the current period financial statement presentation. See Note 2 for more information. In addition, deferred revenue of \$233 million was reclassified from Other current liabilities to Customer advances in the December 31, 2017 Consolidated Statement of Financial Position.

Unconsolidated Variable Interest Entities (VIEs)

We have affiliates, suppliers and dealers that are VIEs of which we are not the primary beneficiary. Although we have provided financial support, we do not have the power to direct the activities that most significantly impact the economic performance of each entity.

Our maximum exposure to loss from VIEs for which we are not the primary beneficiary was as follows:

(Millions of dollars)	September 30, December 31,	
	2018	2017
Receivables - trade and other	\$ 29	\$ 34
Receivables - finance	47	42

Edgar Filing: CATERPILLAR INC - Form 10-Q

Long-term receivables - finance	26	38
Investments in unconsolidated affiliated companies	30	39
Guarantees ¹	—	259
Total	\$ 132	\$ 412

¹ Related contract was terminated during the first quarter of 2018. No payments were made under the guarantee.

Table of Contents

In addition, Cat Financial has end-user customers that are VIEs of which we are not the primary beneficiary. Although we have provided financial support to these entities and therefore have a variable interest, we do not have the power to direct the activities that most significantly impact their economic performance. Our maximum exposure to loss from our involvement with these VIEs is limited to the credit risk inherently present in the financial support that we have provided. These risks are evaluated and reflected in our financial statements as part of our overall portfolio of finance receivables and related allowance for credit losses.

2. New accounting guidance

Revenue recognition – In May 2014, the Financial Accounting Standards Board (FASB) issued new revenue recognition guidance to provide a single, comprehensive revenue recognition model for all contracts with customers. Under the new guidance, an entity will recognize revenue to depict the transfer of promised goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. A five step model has been introduced for an entity to apply when recognizing revenue. The new guidance also includes enhanced disclosure requirements. The guidance was effective January 1, 2018, and was applied to contracts that were not completed at the date of initial application on a modified retrospective basis through a cumulative effect adjustment to retained earnings as of January 1, 2018. The prior period comparative information has not been recasted and continues to be reported under the accounting guidance in effect for those periods.

Under the new guidance, sales of certain turbine machinery units changed to a point-in-time recognition model. Under previous guidance, we accounted for these sales under an over-time model following the percentage-of-completion method as the product was manufactured. In addition, under the new guidance we began to recognize an asset for the value of expected replacement part returns and discontinued lease accounting treatment for certain product sales containing residual value guarantees.

See Note 3 for additional information.

The cumulative effect of initially applying the new revenue recognition guidance to our consolidated financial statements on January 1, 2018 was as follows:

Consolidated Statement of Financial Position

(Millions of dollars)	Balance as of December 31, 2017	Cumulative Impact from Adopting New Revenue Guidance	Balance as of January 1, 2018
Assets			
Receivables - trade and other	\$ 7,436	\$ (66)	\$7,370

Table of Contents

Recognition and measurement of financial assets and financial liabilities – In January 2016, the FASB issued accounting guidance that affects the accounting for equity investments, financial liabilities accounted for under the fair value option and the presentation and disclosure requirements for financial instruments. Under the new guidance, all equity investments in unconsolidated entities (other than those accounted for using the equity method of accounting) will generally be measured at fair value through earnings. There will no longer be an available-for-sale classification for equity securities with readily determinable fair values. For financial liabilities when the fair value option has been elected, changes in fair value due to instrument-specific credit risk will be recognized separately in other comprehensive income. In addition, the FASB clarified guidance related to the valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale debt securities. The guidance was effective January 1, 2018, and was applied on a modified retrospective basis through a cumulative effect adjustment to retained earnings as of January 1, 2018. The adoption did not have a material impact on our financial statements.

Lease accounting – In February 2016, the FASB issued accounting guidance that revises the accounting for leases. Under the new guidance, lessees are required to recognize a right-of-use asset and a lease liability for substantially all leases. The new guidance will continue to classify leases as either financing or operating, with classification affecting the pattern of expense recognition. The accounting applied by a lessor under the new guidance will be substantially equivalent to current lease accounting guidance. Entities have the option to adopt the new guidance using a modified retrospective approach through a cumulative effect adjustment to retained earnings applied either to the beginning of the earliest period presented or the beginning of the period of adoption. We will adopt the new guidance effective January 1, 2019 using a modified retrospective approach through a cumulative effect adjustment to retained earnings as of the beginning of the period of adoption.

The new guidance provides a number of optional practical expedients in transition. We plan to elect the ‘package of practical expedients’, which allows us not to reassess under the new guidance our prior conclusions about lease identification, lease classification and initial direct costs. We do not expect to elect the use-of-hindsight practical expedient. In addition, the new guidance provides practical expedients for an entity’s ongoing accounting that we are still evaluating such as whether or not to separate lease and non-lease components. We plan to elect the short-term lease recognition exemption for all leases that qualify which means we will not recognize right-of-use assets or lease liabilities for these leases.

We are currently designing new processes and controls, cataloging and entering our leases into a recently implemented software solution and evaluating our population of leased assets to assess the effect of the new guidance on our financial statements. While we continue to assess the effects of adoption, we believe the most significant effects relate to the recognition of right-of-use assets and lease liabilities on our balance sheet, and providing new disclosures about our leasing activities. In addition, we expect to derecognize about \$125 million of existing assets and \$375 million of debt obligations for a sale-leaseback transaction that qualifies for sale accounting under the new guidance. The gain associated with this change in accounting will be recognized through opening retained earnings as of January 1, 2019. We are continuing to evaluate the impact of the new guidance on lessor accounting, which will primarily impact Cat Financial. We do not expect the new guidance to have a material impact on our results of operations.

Stock-based compensation – In March 2016, the FASB issued accounting guidance to simplify several aspects of the accounting for share-based payments. The new guidance changes how reporting entities account for certain aspects of share-based payments, including the accounting for income taxes and the classification of the tax impact on the Consolidated Statement of Cash Flow. Under the new guidance, all excess tax benefits and deficiencies during the period are recognized in income (rather than equity) on a prospective basis. The guidance removes the requirement to delay recognition of excess tax benefits until it reduces income taxes currently payable. This change was required to be applied on a modified retrospective basis, resulting in a cumulative-effect adjustment to opening retained earnings

in the period of adoption. In addition, Cash flows related to excess tax benefits are now included in Cash provided by operating activities and will no longer be separately classified as a financing activity. This change was adopted retrospectively. The guidance was effective January 1, 2017, and did not have a material impact on our financial statements.

Measurement of credit losses on financial instruments – In June 2016, the FASB issued accounting guidance to introduce a new model for recognizing credit losses on financial instruments based on an estimate of current expected credit losses. The new guidance will apply to loans, accounts receivable, trade receivables, other financial assets measured at amortized cost, loan commitments and other off-balance sheet credit exposures. The new guidance will also apply to debt securities and other financial assets measured at fair value through other comprehensive income. The new guidance is effective January 1, 2020, with early adoption permitted beginning January 1, 2019. We are in the process of evaluating the effect of the new guidance on our financial statements.

Table of Contents

Classification for certain cash receipts and cash payments – In August 2016, the FASB issued accounting guidance related to the presentation and classification of certain transactions in the statement of cash flows where diversity in practice exists. The guidance was effective January 1, 2018, and was applied on a retrospective basis. The adoption did not have a material impact on our financial statements.

Tax accounting for intra-entity asset transfers – In October 2016, the FASB issued accounting guidance that requires the recognition of tax expense from the sales of intra-entity assets in the seller's tax jurisdiction at the time of transfer. The new guidance does not apply to intra-entity transfers of inventory. Under previous guidance, the tax effects of these assets were deferred until the transferred asset was sold to a third party or otherwise recovered through use. The guidance was effective January 1, 2018, and was applied on a modified retrospective basis through a cumulative effect adjustment to retained earnings as of January 1, 2018. The adoption did not have a material impact on our financial statements.

Classification of restricted cash – In November 2016, the FASB issued accounting guidance related to the presentation and classification of changes in restricted cash on the statement of cash flows where diversity in practice exists. The guidance was effective January 1, 2018, and was applied on a retrospective basis. The adoption did not have a material impact on our financial statements.

Presentation of net periodic pension costs and net periodic postretirement benefit costs – In March 2017, the FASB issued accounting guidance that requires an employer to disaggregate the service cost component from the other components of net periodic benefit cost. Service cost is required to be reported in the same line item or items as other compensation costs arising from services rendered by the pertinent employees during the period. The other components of net periodic benefit cost are required to be reported outside the subtotal for income from operations. Additionally, only the service cost component of net periodic benefit costs is eligible for capitalization. The guidance was effective January 1, 2018. We applied the presentation changes retrospectively and the capitalization change prospectively. The adoption primarily resulted in the reclassification of other components of net periodic benefit cost outside of Operating profit in the Consolidated Statement of Results of Operations.

Consolidated Statement of Results of Operations

(Millions of dollars)	Three Months Ended September 30, 2017		
	As Revised	Previously Reported	Effect of Change

Other income (expense)	\$260	\$ 88	\$ 172

Table of Contents

Premium amortization on purchased callable debt securities – In March 2017, the FASB issued accounting guidance related to the amortization period for certain purchased callable debt securities held at a premium. Securities held at a premium will be required to be amortized to the earliest call date rather than the maturity date. The new standard is required to be applied with a modified retrospective approach through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. We will adopt the new guidance effective January 1, 2019. We do not expect the adoption to have a material impact on our financial statements.

Clarification on stock-based compensation – In May 2017, the FASB issued accounting guidance to clarify which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting. The guidance was effective January 1, 2018, and was applied prospectively. The adoption did not have a material impact on our financial statements.

Derivatives and hedging – In August 2017, the FASB issued accounting guidance to better align hedge accounting with a company's risk management activities, simplify the application of hedge accounting and improve the disclosures of hedging arrangements. The new guidance is required to be applied on a modified retrospective basis, resulting in a cumulative-effect adjustment to opening retained earnings in the period of adoption. We will adopt the new guidance effective January 1, 2019. The impact on our financial statements at the time of adoption will primarily be reclassification of our gains (losses) for designated ME&T foreign exchange contracts from Other income (expense) to components of Operating profit in the Consolidated Statement of Results of Operations.

Reclassification of certain tax effects from accumulated other comprehensive income – In February 2018, the FASB issued accounting guidance to allow a reclassification from accumulated other comprehensive income to retained earnings for stranded tax effects resulting from U.S. tax reform legislation. The new guidance is required to be applied either in the period of adoption or retrospectively to each period affected by U.S. tax reform legislation. The guidance is effective January 1, 2019, with early adoption permitted. We are in the process of evaluating the effect of the new guidance on our financial statements.

Defined benefit plan disclosures – In August 2018, the FASB issued accounting guidance that revises the annual disclosure requirements for employers by removing and adding certain disclosures for these plans. The applicable requirements that were removed include the amount of prior service cost (credit) that will be amortized from Accumulated other comprehensive income (loss) into net periodic benefit cost for the next fiscal year and the effect of a one-percentage-point change in the assumed health care cost trend rates on the service and interest cost components of other postretirement benefit cost and on the accumulated postretirement benefit obligations. The new disclosure requirements include the weighted average interest crediting rates for cash balance plans and other plans with promised interest crediting rates and narrative description of the reasons for significant actuarial gains and losses related to changes in benefit plan obligations or assets for the period. The new guidance is required to be applied on a retrospective basis. The guidance is effective January 1, 2020, with early adoption permitted. We do not expect the adoption to have a material impact on our financial statements.

3. Sales and revenue recognition

A. Sales of Machinery, Energy & Transportation

Sales of Machinery, Energy & Transportation are recognized when all the following criteria are satisfied: (i) a contract with an independently owned and operated dealer or an end user exists which has commercial substance; (ii) it is probable we will collect the amount charged to the dealer or end user; and (iii) we have completed our performance obligation whereby the dealer or end user has obtained control of the product. A contract with commercial substance exists once we receive and accept a purchase order under a dealer sales agreement, or once we enter into a contract with an end user. If collectibility is not probable, the sale is deferred and not recognized until collection is probable or

payment is received. Control of our products typically transfers when title and risk of ownership of the product has transferred to the dealer or end user. Typically, where product is produced and sold in the same country, title and risk of ownership transfer when the product is shipped. Products that are exported from a country for sale typically transfer title and risk of ownership at the border of the destination country.

Table of Contents

Our remanufacturing operations are primarily focused on the remanufacture of Cat engines and components and rail related products. In this business, used engines and related components (core) are inspected, cleaned and remanufactured. In connection with the sale of our remanufactured product to dealers, we collect a deposit that is repaid if the dealer returns an acceptable core within a specified time period. Caterpillar owns and has title to the cores when they are returned from dealers. The rebuilt engine or component (the core plus any new content) is then sold as a remanufactured product to dealers and end users. Revenue is recognized pursuant to the same criteria as Machinery, Energy & Transportation sales noted above (title and risk of ownership of the entire remanufactured product passes to the dealer or end user upon sale). At the time of sale, the deposit is recognized in Other current liabilities in the Consolidated Statement of Financial Position, and the core to be returned is recognized as an asset in Prepaid expenses and other current assets in the Consolidated Statement of Financial Position at the estimated replacement cost (based on historical experience with usable cores). Upon receipt of an acceptable core, we repay the deposit and relieve the liability. The returned core is then included in inventory. In the event that the deposit is forfeited (i.e., upon failure by the dealer to return an acceptable core in the specified time period), we recognize the core deposit and the cost of the core in Sales and Cost of goods sold, respectively.

We provide discounts to dealers through merchandising programs. We have numerous programs that are designed to promote the sale of our products. The most common dealer programs provide a discount when the dealer sells a product to a targeted end user. Generally, the cost of these discounts is estimated for each product by model by geographic region based on historical experience and known changes in merchandising programs. The cost of these discounts is reported as a reduction to the transaction price when the product sale is recognized. A corresponding post-sale discount reserve is accrued in the Consolidated Statement of Financial Position, which represents discounts we expect to pay on previously sold units. If discounts paid differ from those estimated, the difference is reported as a change in the transaction price.

Except for replacement parts, no right of return exists on the sale of our products. We estimate replacement part returns based on historical experience and recognize a parts return asset in Prepaid expenses and other current assets in the Consolidated Statement of Financial Position, which represents our right to recover replacement parts we expect will be returned. We also recognize a refund liability in Other current liabilities in the Consolidated Statement of Financial Position for the refund we expect to pay for returned parts. If actual replacement part returns differ from those estimated, the difference in the estimated replacement part return asset and refund liability is recognized in Cost of goods sold and Sales, respectively.

Our standard dealer invoice terms are established by marketing region. Our invoice terms for end user sales are established by the responsible business unit. Payments from dealers are due shortly after the time of sale. When a sale is made to a dealer, the dealer is responsible for payment even if the product is not sold to an end user. Dealers and end users must make payment within the established invoice terms to avoid potential interest costs. Interest at or above prevailing market rates may be charged on any past due balance, and generally our practice is to not forgive this interest. In addition, Cat Financial provides wholesale inventory financing for a dealer's purchase of inventory. Wholesale inventory receivables have varying payment terms and are included in Receivables – trade and other and Long-term receivables – trade and other in the Consolidated Statement of Financial Position. Trade receivables from dealers and end users were \$6,902 million and \$6,399 million as of September 30, 2018 and January 1, 2018, respectively, and are recognized in Receivables – trade and other in the Consolidated Statement of Financial Position. Long-term trade receivables from dealers and end users were \$664 million and \$639 million as of September 30, 2018 and January 1, 2018, respectively, and are recognized in Long-term receivables – trade and other in the Consolidated Statement of Financial Position.

We establish a bad debt allowance for Machinery, Energy & Transportation receivables when it becomes probable that the receivable will not be collected. Our allowance for bad debts is not significant.

We invoice in advance of recognizing the sale of certain products. Advanced customer payments are recognized as a contract liability in Customer advances and Other liabilities in the Consolidated Statement of Financial Position. Long-term customer advances recognized in Other liabilities in the Consolidated Statement of Financial Position were \$432 million and \$396 million as of September 30, 2018 and January 1, 2018, respectively. We reduce the contract liability when revenue is recognized. During the three and nine months ended September 30, 2018, we recognized \$145 million and \$1,124 million, respectively, of revenue that was recorded as a contract liability at the beginning of 2018.

We have elected the practical expedient to not adjust the amount of revenue to be recognized under a contract with a dealer or end user for the effects of time value of money when the timing difference between receipt of payment and recognition of revenue is less than one year.

Table of Contents

As of September 30, 2018, we have entered into contracts with dealers and end users for which sales have not been recognized as we have not satisfied our performance obligations and transferred control of the products. The dollar amount of unsatisfied performance obligations for contracts with an original duration greater than one year is \$5.9 billion, of which \$2.7 billion is expected to be completed and revenue recognized in the twelve months following September 30, 2018. We have elected the practical expedient to not disclose unsatisfied performance obligations with an original contract duration of one year or less. Contracts with an original duration of one year or less are primarily sales to dealers for machinery, engines and replacement parts.

Sales and other related taxes are excluded from the transaction price. Shipping and handling costs associated with outbound freight after control over a product has transferred are accounted for as a fulfillment cost and are included in Cost of goods sold.

We provide a standard manufacturer's warranty of our products at no additional cost. At the time a sale is recognized, we record estimated future warranty costs. See Note 10 for further discussion of our product warranty liabilities.

See Note 15 for further disaggregated sales and revenues information.

B. Revenues of Financial Products

Revenues of Financial Products are generated primarily from finance revenue on finance receivables and rental payments on operating leases. Finance revenue is recorded over the life of the related finance receivable using the interest method, including the accretion of certain direct origination costs that are deferred. Revenue from rental payments received on operating leases is recognized on a straight-line basis over the term of the lease.

Recognition of finance revenue and rental revenue is suspended and the account is placed on non-accrual status when management determines that collection of future income is not probable (generally after 120 days past due).

Recognition is resumed, and previously suspended income is recognized, when the account becomes current and collection of remaining amounts is considered probable. See Note 16 for more information.

Revenues are presented net of sales and other related taxes.

4. Stock-based compensation

Accounting for stock-based compensation requires that the cost resulting from all stock-based payments be recognized in the financial statements based on the grant date fair value of the award. Our stock-based compensation primarily consists of stock options, restricted stock units (RSUs) and performance-based restricted stock units (PRSU).

Beginning with the 2018 grant, RSU and PRSU awards are credited with dividend equivalent units on each date that a cash dividend is paid to holders of Common Stock. The fair value of the RSU and PRSU awards granted in 2018 was determined as the closing stock price on the date of grant. Prior to 2018, RSU and PRSU awards were not credited with dividend equivalent units and the fair value was determined by reducing the stock price on the date of grant by the present value of the estimated dividends to be paid during the vesting period. The estimated dividends were based on Caterpillar's quarterly dividend per share at the time of grant.

We recognized pretax stock-based compensation expense of \$52 million and \$164 million for the three and nine months ended September 30, 2018, respectively, and \$48 million and \$165 million for the three and nine months ended September 30, 2017, respectively.

The following table illustrates the type and fair value of the stock-based compensation awards granted during the nine months ended September 30, 2018 and 2017, respectively:

17

Table of Contents

	Nine Months Ended September 30, 2018			Nine Months Ended September 30, 2017		
	Shares Granted	Weighted-Average Fair Value Per Share	Weighted-Average Grant Date Stock Price	Shares Granted	Weighted-Average Fair Value Per Share	Weighted-Average Grant Date Stock Price
Stock options	1,605,220	\$ 46.11	\$ 150.90	2,701,644	\$ 25.01	\$ 95.66
RSUs	722,521	\$ 150.64	\$ 150.64	924,421	\$ 90.11	\$ 96.01
PRSU's	344,866	\$ 150.93	\$ 150.93	437,385	\$ 86.78	\$ 95.66

The following table provides the assumptions used in determining the fair value of the stock-based awards for the nine months ended September 30, 2018 and 2017, respectively:

	Grant Year	
	2018	2017
Weighted-average dividend yield	2.70	% 3.42
Weighted-average volatility	30.2	% 29.2
Range of volatilities	21.5-33.0%	22.1-33.0%
Range of risk-free interest rates	2.02-2.87%	0.81-2.35%
Weighted-average expected lives	8 years	8 years

As of September 30, 2018, the total remaining unrecognized compensation expense related to nonvested stock-based compensation awards was \$217 million, which will be amortized over the weighted-average remaining requisite service periods of approximately 1.9 years.

5. Derivative financial instruments and risk management

Our earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates, interest rates and commodity prices. Our Risk Management Policy (policy) allows for the use of derivative financial instruments to prudently manage foreign currency exchange rate, interest rate and commodity price exposures. Our policy specifies that derivatives are not to be used for speculative purposes. Derivatives that we use are primarily foreign currency forward, option and cross currency contracts, interest rate contracts and commodity forward and option contracts. Our derivative activities are subject to the management, direction and control of our senior financial officers. Risk management practices, including the use of financial derivative instruments, are presented to the Audit Committee of the Board of Directors at least annually.

All derivatives are recognized on the Consolidated Statement of Financial Position at their fair value. On the date the derivative contract is entered into, we designate the derivative as (1) a hedge of the fair value of a recognized asset or liability (fair value hedge), (2) a hedge of a forecasted transaction or the variability of cash flow (cash flow hedge) or (3) an undesignated instrument. Changes in the fair value of a derivative that is qualified, designated and highly effective as a fair value hedge, along with the gain or loss on the hedged recognized asset or liability that is attributable to the hedged risk, are recorded in current earnings. Changes in the fair value of a derivative that is qualified, designated and highly effective as a cash flow hedge are recorded in Accumulated other comprehensive income (loss) (AOCI), to the extent effective, on the Consolidated Statement of Financial Position until they are reclassified to earnings in the same period or periods during which the hedged transaction affects earnings. Changes in the fair value of undesignated derivative instruments and the ineffective portion of designated derivative instruments are reported in current earnings. Cash flows from designated derivative financial instruments are

classified within the same category as the item being hedged on the Consolidated Statement of Cash Flow. Cash flows from undesignated derivative financial instruments are included in the investing category on the Consolidated Statement of Cash Flow.

We formally document all relationships between hedging instruments and hedged items, as well as the risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives that are designated as fair value hedges to specific assets and liabilities on the Consolidated Statement of Financial Position and linking cash flow hedges to specific forecasted transactions or variability of cash flow.

Table of Contents

We also formally assess, both at the hedge's inception and on an ongoing basis, whether the designated derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flow of hedged items. When a derivative is determined not to be highly effective as a hedge or the underlying hedged transaction is no longer probable, we discontinue hedge accounting prospectively, in accordance with the derecognition criteria for hedge accounting.

Foreign Currency Exchange Rate Risk

Foreign currency exchange rate movements create a degree of risk by affecting the U.S. dollar value of sales made and costs incurred in foreign currencies. Movements in foreign currency rates also affect our competitive position as these changes may affect business practices and/or pricing strategies of non-U.S.-based competitors. Additionally, we have balance sheet positions denominated in foreign currencies, thereby creating exposure to movements in exchange rates.

Our Machinery, Energy & Transportation operations purchase, manufacture and sell products in many locations around the world. As we have a diversified revenue and cost base, we manage our future foreign currency cash flow exposure on a net basis. We use foreign currency forward and option contracts to manage unmatched foreign currency cash inflow and outflow. Our objective is to minimize the risk of exchange rate movements that would reduce the U.S. dollar value of our foreign currency cash flow. Our policy allows for managing anticipated foreign currency cash flow for up to five years. As of September 30, 2018, the maximum term of these outstanding contracts was approximately 51 months.

We generally designate as cash flow hedges at inception of the contract any Australian dollar, Brazilian real, British pound, Canadian dollar, Chinese yuan, Indian rupee, Japanese yen, Mexican peso, Singapore dollar or Thailand baht forward or option contracts that meet the requirements for hedge accounting and the maturity extends beyond the current quarter-end. Designation is performed on a specific exposure basis to support hedge accounting. The remainder of Machinery, Energy & Transportation foreign currency contracts are undesignated.

As of September 30, 2018, \$33 million of deferred net losses, net of tax, included in equity (AOCI in the Consolidated Statement of Financial Position), are expected to be reclassified to current earnings (Other income (expense) in the Consolidated Statement of Results of Operations) over the next twelve months when earnings are affected by the hedged transactions. The actual amount recorded in Other income (expense) will vary based on exchange rates at the time the hedged transactions impact earnings.

In managing foreign currency risk for our Financial Products operations, our objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions, and future transactions denominated in foreign currencies. Our policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between our assets and liabilities, and exchange rate risk associated with future transactions denominated in foreign currencies. Our foreign currency forward and option contracts are primarily undesignated. We designate fixed-to-fixed cross currency contracts as cash flow hedges to protect against movements in exchange rates on foreign currency fixed-rate assets and liabilities.

Interest Rate Risk

Interest rate movements create a degree of risk by affecting the amount of our interest payments and the value of our fixed-rate debt. Our practice is to use interest rate contracts to manage our exposure to interest rate changes.

Our Machinery, Energy & Transportation operations generally use fixed-rate debt as a source of funding. Our objective is to minimize the cost of borrowed funds. Our policy allows us to enter into fixed-to-floating interest rate contracts and forward rate agreements to meet that objective. We designate fixed-to-floating interest rate contracts as

fair value hedges at inception of the contract, and we designate certain forward rate agreements as cash flow hedges at inception of the contract.

Financial Products operations has a match-funding policy that addresses interest rate risk by aligning the interest rate profile (fixed or floating rate) of Cat Financial's debt portfolio with the interest rate profile of their receivables portfolio within predetermined ranges on an ongoing basis. In connection with that policy, we use interest rate derivative instruments to modify the debt structure to match assets within the receivables portfolio. This matched funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

Our policy allows us to use fixed-to-floating, floating-to-fixed and floating-to-floating interest rate contracts to meet the match-funding objective. We designate fixed-to-floating interest rate contracts as fair value hedges to protect debt against

Table of Contents

changes in fair value due to changes in the benchmark interest rate. We designate most floating-to-fixed interest rate contracts as cash flow hedges to protect against the variability of cash flows due to changes in the benchmark interest rate.

We have, at certain times, liquidated fixed-to-floating and floating-to-fixed interest rate contracts at both Machinery, Energy & Transportation and Financial Products. The gains or losses associated with these contracts at the time of liquidation are amortized into earnings over the original term of the previously designated hedged item.

Commodity Price Risk

Commodity price movements create a degree of risk by affecting the price we must pay for certain raw material. Our policy is to use commodity forward and option contracts to manage the commodity risk and reduce the cost of purchased materials.

Our Machinery, Energy & Transportation operations purchase base and precious metals embedded in the components we purchase from suppliers. Our suppliers pass on to us price changes in the commodity portion of the component cost. In addition, we are subject to price changes on energy products such as natural gas and diesel fuel purchased for operational use.

Our objective is to minimize volatility in the price of these commodities. Our policy allows us to enter into commodity forward and option contracts to lock in the purchase price of a portion of these commodities within a five-year horizon. All such commodity forward and option contracts are undesignated.

The location and fair value of derivative instruments reported in the Consolidated Statement of Financial Position are as follows:

(Millions of dollars)	Consolidated Statement of Financial Position Location	Asset (Liability) Fair Value	
		September 30, 2018	December 31, 2017

We enter into International Swaps and Derivatives Association (ISDA) master netting agreements within Machinery, Energy & Transportation and Financial Products that permit the net settlement of amounts owed under their respective derivative contracts. Under these master netting agreements, net settlement generally permits the company or the counterparty to determine the net amount payable for contracts due on the same date and in the same currency for similar types of derivative transactions. The master netting agreements generally also provide for net settlement of all outstanding contracts with a counterparty in the case of an event of default or a termination event.

Collateral is generally not required of the counterparties or of our company under the master netting agreements. As of September 30, 2018 and December 31, 2017, no cash collateral was received or pledged under the master netting agreements.

Table of Contents

The effect of the net settlement provisions of the master netting agreements on our derivative balances upon an event of default or termination event is as follows:

September 30, 2018		Gross Amounts Not Offset in the Statement of Financial Position

Table of Contents

6. Inventories

Inventories (principally using the last-in, first-out (LIFO) method) are comprised of the following:

(Millions of dollars)	September 30, December 31,	
	2018	2017
Raw materials	\$ 3,413	\$ 2,802
Work-in-process	2,764	2,254
Finished goods	5,425	4,761
Supplies	212	201
Total inventories	\$ 11,814	\$ 10,018

During the first nine months of 2017, there was a liquidation of LIFO inventory resulting from closure of our facility in Gosselies, Belgium. The liquidated inventory was carried at lower costs prevailing in prior years as compared with current costs. The effect of this reduction of inventory decreased Cost of goods sold by approximately \$62 million and increased Profit by approximately \$45 million or \$0.07 per share.

7. Intangible assets and goodwill

A. Intangible assets

Intangible assets are comprised of the following:

(Millions of dollars)	Weighted Amortizable Life (Years)	September 30, 2018			Net
		Gross Carrying Amount	Accumulated Amortization		
Customer relationships	15	\$2,462	\$ (1,212)	\$ 1,250	
Intellectual property	12	1,562	(933)	629	
Other	13	198	(101)	97	
Total finite-lived intangible assets	14	\$4,222	\$ (2,246)	\$ 1,976	
		December 31, 2017			
		Weighted Amortizable Life (Years)	Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	15		\$2,441	\$ (1,122)	\$ 1,319
Intellectual property	11		1,538	(851)	687
Other	13		198	(93)	105
Total finite-lived intangible assets	14		\$4,177	\$ (2,066)	\$ 2,111

During the first quarter of 2018, we acquired finite-lived intangible assets of \$112 million and \$5 million due to the purchase of ECM S.p.A. and Downer Freight Rail, respectively. See Note 20 for details on these acquisitions.

Amortization expense for the three and nine months ended September 30, 2018 was \$82 million and \$248 million, respectively. Amortization expense for the three and nine months ended September 30, 2017 was \$82 million and

Edgar Filing: CATERPILLAR INC - Form 10-Q

\$241 million, respectively. Amortization expense related to intangible assets is expected to be:

(Millions of dollars)

Remaining Three Months of 2018	2019	2020	2021	2022	Thereafter
\$84	\$326	\$311	\$293	\$274	\$688

25

Table of Contents

B. Goodwill

No goodwill was impaired during the nine months ended September 30, 2018 or 2017.

During the first quarter of 2018, we acquired net assets with related goodwill of \$121 million in the Energy & Transportation segment. We recorded goodwill of \$109 million related to the acquisition of ECM S.p.A. and \$12 million related to the acquisition of Downer Freight Rail. See Note 20 for details on these acquisitions.

The changes in carrying amount of goodwill by reportable segment for the nine months ended September 30, 2018 were as follows:

(Millions of dollars)	December 31, 2017	Acquisitions ¹	Other Adjustments ²	September 30, 2018
Construction Industries				
Goodwill	\$ 305	\$ —	\$ —	\$ 305

Consolidated total				
Goodwill	7,397	121	(88)	7,430
Impairments	(1,197)	—	—	(1,197)
Net goodwill	\$ 6,200	\$ 121	\$ (88)	\$ 6,233

¹ See Note 20 for additional details.

² Other adjustments are comprised primarily of foreign currency translation.

³ Includes All Other operating segments (See Note 15).

8. Investments in debt and equity securities

We have investments in certain debt and equity securities, primarily at Insurance Services, which are recorded at fair value and are primarily included in Other assets in the Consolidated Statement of Financial Position.

Debt securities have been classified as available-for-sale and the unrealized gains and losses arising from the revaluation of these debt securities are included, net of applicable deferred income taxes, in equity (Accumulated other comprehensive income (loss) in the Consolidated Statement of Financial Position). Realized gains and losses on sales of debt investments are generally determined using the specific identification method and are included in Other income (expense) in the Consolidated Statement of Results of Operations.

Beginning January 1, 2018, we adopted new accounting guidance issued by the FASB resulting in the unrealized gains and losses arising from the revaluation of these equity securities to be included in Other income (expense) in the Consolidated Statement of Results of Operations. Prior to January 1, 2018, the unrealized gains and losses arising from revaluation of the available-for-sale equity securities and the Real Estate Investment Trust were included, net of applicable deferred income taxes, in equity (Accumulated other comprehensive income (loss) in the Consolidated Statement of Financial Position). See Note 2 for additional information.

Table of Contents

The cost basis and fair value of debt and equity securities with unrealized gains and losses included in equity (Accumulated other comprehensive income (loss) in the Consolidated Statement of Financial Position) were as follows:

(Millions of dollars)	September 30, 2018			December 31, 2017

Equity securities						
Large capitalization value	129	5	14	2	143	7
Smaller company growth	17	1	1	—	18	1
Total	\$587	\$ 9	\$163	\$ 5	\$750	\$ 14

¹ Indicates the length of time that individual securities have been in a continuous unrealized loss position.

Corporate Bonds. The unrealized losses on our investments in corporate bonds relate to changes in interest rates and credit-related yield spreads since time of purchase. We do not intend to sell the investments, and it is not likely that we will be required to sell the investments before recovery of their amortized cost basis. We do not consider these investments to be other-than-temporarily impaired as of September 30, 2018.

Mortgage-Backed Debt Securities. The unrealized losses on our investments in U.S. government agency mortgage-backed securities and commercial mortgage-backed securities relate to changes in interest rates and credit-related yield spreads since time of purchase. We do not intend to sell the investments, and it is not likely that we will be required to sell the investments before recovery of their amortized cost basis. We do not consider these investments to be other-than-temporarily impaired as of September 30, 2018.

Table of Contents

The cost basis and fair value of the available-for-sale debt securities at September 30, 2018, by contractual maturity, is shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to prepay and creditors may have the right to call obligations.

(Millions of dollars)	September 30, 2018	
	Cost Basis	Fair Value
Due in one year or less	\$160	\$159
Due after one year through five years	540	531
Due after five years through ten years	122	120
Due after ten years	17	18
U.S. governmental agency mortgage-backed securities	300	290
Residential mortgage-backed securities	7	7
Commercial mortgage-backed securities	15	14
Total debt securities – available-for-sale	\$1,161	\$1,139

Sales of available-for-sale securities:

(Millions of dollars)	Three Months Ended September 30 2018		Nine Months Ended September 30 2017 ¹	
	2018	2017	2018 ¹	2017
Proceeds from the sale of available-for-sale securities	\$41	\$244	\$181	\$431
Gross gains from the sale of available-for-sale securities	\$—	\$38	\$—	\$40
Gross losses from the sale of available-for-sale securities	\$—	\$1	\$—	\$3

¹ Beginning January 1, 2018, equity securities are no longer classified as available-for-sale securities. See Note 2 for additional information.

For the three and nine months ended September 30, 2018, the net unrealized gains (losses) for equity securities were \$10 million and \$14 million, respectively. For the three and nine months ended September 30, 2017, there were \$4 million of realized net gains (losses) recognized on the sale of equity securities.

9. Postretirement benefits

A. Pension and postretirement benefit costs

In the first quarter of 2017, we announced the closure of our Gosselies, Belgium, facility. This announcement impacted certain employees that participated in a defined benefit pension plan and resulted in a net loss of \$20 million in the first quarter of 2017 for curtailment and termination benefits. In addition during the first quarter of 2017, we announced the decision to phase out production at our Aurora, Illinois, facility, which resulted in termination benefits of \$9 million for certain hourly employees that participate in our U.S. hourly defined benefit pension plan. See Note 19 for more information on the Gosselies closure.

Table of Contents

(Millions of dollars)	U.S. Pension Benefits		Non-U.S. Pension Benefits		Other Postretirement Benefits	
	September 30		September 30		September 30	
	2018	2017	2018	2017	2018	2017
For the three months ended:						
Components of net periodic benefit cost:						
Service cost	\$31	\$29	\$22	\$23	\$22	\$19
Interest cost	134	131	25	23	31	33
Expected return on plan assets	(202)	(184)	(55)	(55)	(9)	(10)
Amortization of prior service cost (credit) ¹	—	—	—	—	(9)	(6)
Net periodic benefit cost (benefit) ²	\$(37)	\$(24)	\$(8)	\$(9)	\$35	\$36

For the nine months ended:

Components of net periodic benefit cost:						
Service cost	\$94	\$87	\$67	\$70	\$64	\$58
Interest cost	401	393	74	73	93	98
Expected return on plan assets	(607)	(551)	(167)	(168)	(25)	(28)
Amortization of prior service cost (credit) ¹	—	—	—	(1)	(26)	(17)
Curtailments and termination benefits	—	9	—	20	—	—
Net periodic benefit cost (benefit) ²	\$(112)	\$(62)	\$(26)	\$(6)	\$106	\$111

Weighted-average assumptions used to determine net cost:

Discount rate used to measure service cost	3.7	%	4.2	%	2.3	%	2.3	%	3.5	%	3.9	%
Discount rate used to measure interest cost	3.2	%	3.3	%	2.2	%	2.3	%	3.2	%	3.3	%
Expected rate of return on plan assets	6.3	%	6.7	%	5.2	%	5.9	%	7.5	%	7.5	%
Rate of compensation increase	4.0	%	4.0	%	4.0	%	4.0	%	4.6	%	4.0	%

Prior service cost (credit) for both pension and other postretirement benefits is generally amortized using the straight-line method over the average remaining service period of active employees expected to receive benefits from the plan. For pension plans in which all or almost all of the plan's participants are inactive and other postretirement benefit plans in which all or almost all of the plan's participants are fully eligible for benefits under the plan, prior service cost (credit) is amortized using the straight-line method over the remaining life expectancy of those participants.

The service cost component of net periodic pension and other postretirement benefits cost (benefit) is included in Operating costs in the Consolidated Statement of Results of Operations. All other components of net periodic pension and other postretirement benefits cost (benefit) are included in Other income (expense) in the Consolidated Statement of Results of Operations.

We made \$1,064 million and \$1,291 million of contributions to our pension and other postretirement plans during the three and nine months ended September 30, 2018, respectively. The 2018 contributions include a \$1.0 billion discretionary contribution made to our U.S. pension plans in September 2018. We currently anticipate full-year 2018 contributions of approximately \$1,362 million. We made \$324 million and \$522 million of contributions to our pension and other postretirement plans during the three and nine months ended September 30, 2017, respectively.

B. Defined contribution benefit costs

Total company costs related to our defined contribution plans were as follows:

	Three Months Ended September 30		Nine Months Ended September 30	
(Millions of dollars)	2018	2017	2018	2017
U.S. Plans	\$97	\$97	\$247	\$267
Non-U.S. Plans	21	19	64	54
	\$118	\$116	\$311	\$321

Table of Contents

10. Guarantees and product warranty

Caterpillar dealer performance guarantees

We have provided an indemnity to a third-party insurance company for potential losses related to performance bonds issued on behalf of Caterpillar dealers. The bonds have varying terms and are issued to insure governmental agencies against nonperformance by certain dealers. We also provided guarantees to third-parties related to the performance of contractual obligations by certain Caterpillar dealers. These guarantees have varying terms and cover potential financial losses incurred by the third-parties resulting from the dealers' nonperformance.

In 2016, we provided a guarantee to an end user related to the performance of contractual obligations by a Caterpillar dealer. Under the guarantee, which expires in 2025, non-performance by the Caterpillar dealer could require Caterpillar to satisfy the contractual obligations by providing goods, services or financial compensation to the end user up to an annual designated cap.

Customer loan guarantees

We provide loan guarantees to third-party lenders for financing associated with machinery purchased by customers. These guarantees have varying terms and are secured by the machinery. In addition, Cat Financial participates in standby letters of credit issued to third parties on behalf of their customers. These standby letters of credit have varying terms and beneficiaries and are secured by customer assets.

Supplier consortium performance guarantees

We have provided guarantees to a customer in Brazil and a customer in Europe related to the performance of contractual obligations by supplier consortiums to which our Caterpillar subsidiaries are members. The guarantees cover potential damages incurred by the customers resulting from the supplier consortiums' non-performance. The damages are capped except for failure of the consortiums to meet certain obligations outlined in the contract in the normal course of business. The guarantees will expire when the supplier consortiums perform all their contractual obligations, which are expected to be completed in 2022 for the customer in Europe and 2025 for the customer in Brazil.

Third party logistics business lease guarantees

We have provided guarantees to third-party lessors for certain properties leased by a third party logistics business, formerly Caterpillar Logistics Services LCC, in which we sold our equity interest in 2015. The guarantees are for the possibility that the third party logistics business would default on real estate lease payments. The guarantees were granted at lease inception and generally will expire at the end of the lease terms.

We have dealer performance guarantees and third party performance guarantees that do not limit potential payment to end users related to indemnities and other commercial contractual obligations. In addition, we have entered into contracts involving industry standard indemnifications that do not limit potential payment. For these unlimited guarantees, we are unable to estimate a maximum potential amount of future payments that could result from claims made.

No significant loss has been experienced or is anticipated under any of these guarantees. At both September 30, 2018 and December 31, 2017, the related liability was \$8 million. The maximum potential amount of future payments (undiscounted and without reduction for any amounts that may possibly be recovered under recourse or collateralized provisions) we could be required to make under the guarantees are as follows:

(Millions of dollars)	September 30, 2018	December 31, 2017
Caterpillar dealer performance guarantees	\$ 1,375	\$ 1,313

Edgar Filing: CATERPILLAR INC - Form 10-Q

Customer loan guarantees	31	40
Supplier consortium performance guarantees	556	565
Third party logistics business lease guarantees	68	69
Other guarantees	122	118
Total guarantees	\$ 2,152	\$ 2,105

31

Table of Contents

Cat Financial provides guarantees to repurchase certain loans of Caterpillar dealers from a special-purpose corporation (SPC) that qualifies as a variable interest entity. The purpose of the SPC is to provide short-term working capital loans to Caterpillar dealers. This SPC issues commercial paper and uses the proceeds to fund its loan program. Cat Financial has a loan purchase agreement with the SPC that obligates Cat Financial to purchase certain loans that are not paid at maturity. Cat Financial receives a fee for providing this guarantee, which provides a source of liquidity for the SPC. Cat Financial is the primary beneficiary of the SPC as its guarantees result in Cat Financial having both the power to direct the activities that most significantly impact the SPC's economic performance and the obligation to absorb losses, and therefore Cat Financial has consolidated the financial statements of the SPC. As of September 30, 2018 and December 31, 2017, the SPC's assets of \$1,133 million and \$1,107 million, respectively, were primarily comprised of loans to dealers, and the SPC's liabilities of \$1,133 million and \$1,106 million, respectively, were primarily comprised of commercial paper. The assets of the SPC are not available to pay Cat Financial's creditors. Cat Financial may be obligated to perform under the guarantee if the SPC experiences losses. No loss has been experienced or is anticipated under this loan purchase agreement.

Our product warranty liability is determined by applying historical claim rate experience to the current field population and dealer inventory. Generally, historical claim rates are based on actual warranty experience for each product by machine model/engine size by customer or dealer location (inside or outside North America). Specific rates are developed for each product shipment month and are updated monthly based on actual warranty claim experience.

(Millions of dollars)	2018
Warranty liability, January 1	\$1,419

SARs and stock options to purchase 1,471,071 and 5,136,715 common shares were outstanding for the three and nine months ended September 30, 2018 and 2017, respectively, which were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive.

In January 2014, the Board authorized the repurchase of up to \$10.0 billion of Caterpillar common stock, which will expire on December 31, 2018. During the first quarter of 2018, 3.1 million shares of our common stock were repurchased at an aggregate cost to Caterpillar of \$500 million.

During the second quarter of 2018, we repurchased \$750 million of common stock. In May 2018, we entered into an accelerated stock repurchase agreement (ASR) with a third-party financial institution to purchase shares of our common stock. Pursuant to the terms of the ASR Agreement, 3.3 million shares of our common stock were repurchased at an aggregate cost to Caterpillar of \$500 million. In May 2018, we repurchased 1.6 million shares for \$250 million in open market transactions.

During the third quarter of 2018, we entered into an ASR with a third-party financial institution to purchase \$750 million of our common stock. In August 2018, upon payment of \$750 million to the financial institution, we received 4.8 million shares. In October 2018, upon final settlement of the ASR, we received an additional 0.4 million shares. In total, we repurchased 5.2 million shares under this ASR. As of September 30, 2018, approximately \$3.5 billion of the 2014 \$10.0 billion authorization remained.

In July 2018, the Board approved a new share repurchase authorization of up to \$10.0 billion of Caterpillar common stock effective January 1, 2019, with no expiration.

13. Environmental and legal matters

The Company is regulated by federal, state and international environmental laws governing its use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

Table of Contents

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, the investigation, remediation, and operating and maintenance costs are accrued against our earnings. Costs are accrued based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in Accrued expenses. We believe there is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

On January 7, 2015, the Company received a grand jury subpoena from the U.S. District Court for the Central District of Illinois. The subpoena requests documents and information from the Company relating to, among other things, financial information concerning U.S. and non-U.S. Caterpillar subsidiaries (including undistributed profits of non-U.S. subsidiaries and the movement of cash among U.S. and non-U.S. subsidiaries). The Company has received additional subpoenas relating to this investigation requesting additional documents and information relating to, among other things, the purchase and resale of replacement parts by Caterpillar Inc. and non-U.S. Caterpillar subsidiaries, dividend distributions of certain non-U.S. Caterpillar subsidiaries, and Caterpillar SARL and related structures. On March 2-3, 2017, agents with the Department of Commerce, the Federal Deposit Insurance Corporation and the Internal Revenue Service executed search and seizure warrants at three facilities of the Company in the Peoria, Illinois area, including its former corporate headquarters. The warrants identify, and agents seized, documents and information related to, among other things, the export of products from the United States, the movement of products between the United States and Switzerland, the relationship between Caterpillar Inc. and Caterpillar SARL, and sales outside the United States. It is the Company's understanding that the warrants, which concern both tax and export activities, are related to the ongoing grand jury investigation. The Company is continuing to cooperate with this investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On March 20, 2014, Brazil's Administrative Council for Economic Defense (CADE) published a Technical Opinion which named 18 companies and over 100 individuals as defendants, including two subsidiaries of Caterpillar Inc., MGE - Equipamentos e Serviços Ferroviários Ltda. (MGE) and Caterpillar Brasil Ltda. The publication of the Technical Opinion opened CADE's official administrative investigation into allegations that the defendants participated in anticompetitive bid activity for the construction and maintenance of metro and train networks in Brazil. While companies cannot be held criminally liable for anticompetitive conduct in Brazil, criminal charges have been brought against two current employees of MGE and one former employee of MGE involving the same conduct alleged by CADE. The Company has responded to all requests for information from the authorities. The Company is unable to predict the outcome or reasonably estimate the potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

In addition, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to product design, manufacture and performance liability (including claimed asbestos and welding fumes exposure), contracts, employment issues, environmental matters, intellectual property rights, taxes (other than income taxes) and securities laws. The aggregate range of reasonably possible losses in excess of accrued liabilities, if any, associated with these unresolved legal actions is not material. In some cases, we cannot reasonably estimate a range of loss because there is insufficient information regarding the matter. However, we believe there is no more than a remote chance that any liability arising from these

matters would be material. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

14. Income taxes

The provision for income taxes for the first nine months of 2018 reflected an estimated annual tax rate of 24 percent, compared to 32 percent for the first nine months of 2017, excluding the discrete items discussed in the following paragraph. The decrease was primarily due to the reduction in the U.S. corporate tax rate beginning January 1, 2018, along with other changes in the geographic mix of profits from a tax perspective.

Table of Contents

The 2018 provision for income taxes for the first nine months of 2018 also included a \$154 million reduction to the provisionally estimated charge of \$2.371 billion recognized during the fourth quarter of 2017 due to enactment of U.S. tax reform legislation. The \$154 million benefit revises the estimated impact of the write-down of U.S. net deferred tax assets to reflect the reduction in the U.S. corporate tax rate from 35 percent to 21 percent. This benefit primarily related to the decision to make an additional discretionary pension contribution of \$1.0 billion to U.S. pension plans in the third quarter of 2018 treated as deductible on the 2017 U.S. tax return. The provision for income taxes for the first nine months of 2018 also includes a charge of \$59 million to correct for an error which resulted in an understatement of the valuation allowance offsetting deferred tax assets for prior years. This error had the effect of overstating profit by \$17 million, \$33 million and \$9 million for the years ended December 31, 2017, 2016 and 2015, respectively. Management has concluded that the error was not material to any period presented. In addition, a discrete tax benefit of \$52 million was recorded in the first nine months of 2018, compared to \$45 million in the first nine months of 2017, for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense. The provision for income taxes for the first nine months of 2018 also included a \$25 million benefit for the release of a valuation allowance against the deferred tax assets of a non-U.S. subsidiary. The provision for income taxes for the first nine months of 2017 also included a \$15 million increase to prior year taxes related to non-U.S. restructuring costs.

Our analysis of U.S. tax reform legislation, updated through September 30, 2018, resulted in no other changes to the 2017 year-end provisional charge. We will continue to update our calculations as additional required information is prepared and analyzed, interpretations and assumptions are refined, and additional guidance is issued. These updates could significantly impact the provision for income taxes, the amount of taxes payable and the deferred tax asset and liability balances. We account for the new U.S. tax on global intangible low-taxed income as a period cost.

On January 31, 2018, we received a Revenue Agent's Report from the Internal Revenue Service (IRS) indicating the end of the field examination of our U.S. income tax returns for 2010 to 2012. In the audits of 2007 to 2012 including the impact of a loss carryback to 2005, the IRS has proposed to tax in the United States profits earned from certain parts transactions by Caterpillar SARL, based on the IRS examination team's application of the "substance-over-form" or "assignment-of-income" judicial doctrines. We are vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion. We believe that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. We have filed U.S. income tax returns on this same basis for years after 2012. Based on the information currently available, we do not anticipate a significant increase or decrease to our unrecognized tax benefits for this matter within the next 12 months. We currently believe the ultimate disposition of this matter will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

15. Segment information

A. Basis for segment information

Our Executive Office is comprised of a Chief Executive Officer (CEO), four Group Presidents, a Chief Financial Officer (CFO), a General Counsel & Corporate Secretary and a Chief Human Resources Officer. The Group Presidents and CFO are accountable for a related set of end-to-end businesses that they manage. The General Counsel & Corporate Secretary leads the Law, Security and Public Policy Division. The Chief Human Resources Officer leads the Human Resources Organization. The CEO allocates resources and manages performance at the Group President/CFO level. As such, the CEO serves as our Chief Operating Decision Maker, and operating segments are primarily based on the Group President/CFO reporting structure.

Three of our operating segments, Construction Industries, Resource Industries and Energy & Transportation, are led by Group Presidents. One operating segment, Financial Products, is led by the CFO who also has responsibility for

Corporate Services. Corporate Services is a cost center primarily responsible for the performance of certain support functions globally and to provide centralized services; it does not meet the definition of an operating segment. One Group President leads two smaller operating segments that are included in the All Other operating segments. The Law, Security and Public Policy Division and the Human Resources Organization are cost centers and do not meet the definition of an operating segment.

Segment information for 2017 has been recast due to our adoption of new accounting guidance issued by the FASB related to the presentation of net periodic pension costs and net periodic postretirement benefit costs. Prior service cost (credits) is no longer included in segment profit. See Note 2 for additional information.

Table of Contents

B. Description of segments

We have six operating segments, of which four are reportable segments. Following is a brief description of our reportable segments and the business activities included in the All Other operating segments:

Construction Industries: A segment primarily responsible for supporting customers using machinery in infrastructure, forestry and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes asphalt pavers, backhoe loaders, compactors, cold planers, compact track and multi-terrain loaders, mini, small, medium and large track excavators, forestry excavators, feller bunchers, harvesters, knuckleboom loaders, motor graders, pipelayers, road reclaimers, site prep tractors, skidders, skid steer loaders, telehandlers, small and medium track-type tractors, track-type loaders, utility vehicles, wheel excavators, compact, small and medium wheel loaders and related parts and work tools. Inter-segment sales are a source of revenue for this segment.

Resource Industries: A segment primarily responsible for supporting customers using machinery in mining, quarry and aggregates, waste and material handling applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes large track-type tractors, large mining trucks, hard rock vehicles, longwall miners, electric rope shovels, draglines, hydraulic shovels, rotary drills, large wheel loaders, off-highway trucks, articulated trucks, wheel tractor scrapers, wheel dozers, landfill compactors, soil compactors, hard rock continuous mining systems, select work tools, machinery components, electronics and control systems and related parts. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management, equipment management analytics and autonomous machine capabilities. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing and research and development. Inter-segment sales are a source of revenue for this segment.

Energy & Transportation: A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related parts across industries serving Oil and Gas, Power Generation, Industrial and Transportation applications, including marine and rail-related businesses. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support of turbine machinery and integrated systems and solutions and turbine-related services, reciprocating engine-powered generator sets, integrated systems used in the electric power generation industry, reciprocating engines and integrated systems and solutions for the marine and oil and gas industries; reciprocating engines supplied to the industrial industry as well as Cat machinery; the remanufacturing of Cat engines and components and remanufacturing services for other companies; the business strategy, product design, product management and development, manufacturing, remanufacturing, leasing and service of diesel-electric locomotives and components and other rail-related products and services and product support of on-highway vocational trucks for North America. Inter-segment sales are a source of revenue for this segment.

Financial Products Segment: Provides financing alternatives to customers and dealers around the world for Caterpillar products, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Financing plans include operating and finance leases, installment sale contracts, working capital loans and wholesale financing plans. The segment also provides insurance and risk management products and services that help customers and dealers manage their business risk. Insurance and risk management products offered include physical damage insurance, inventory protection plans, extended service coverage for machines and engines, and dealer property and casualty insurance. The various forms of financing, insurance and risk management products offered to customers and dealers help support the purchase and lease of our equipment. The segment also earns revenues from Machinery, Energy & Transportation, but the related costs are not allocated to operating segments.

All Other operating segments: Primarily includes activities such as: business strategy, product management and development, manufacturing of filters and fluids, undercarriage, ground engaging tools, fluid transfer products, precision seals, rubber sealing and connecting components primarily for Cat products; parts distribution; integrated logistics solutions, distribution services responsible for dealer development and administration including a wholly owned dealer in Japan, dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts; digital investments for new customer and dealer solutions that integrate data analytics with state-of-the-art digital technologies while transforming the buying experience. Results for the All Other operating segments are included as a reconciling item between reportable segments and consolidated external reporting.

Table of Contents

C. Segment measurement and reconciliations

There are several methodology differences between our segment reporting and our external reporting. The following is a list of the more significant methodology differences:

Machinery, Energy & Transportation segment net assets generally include inventories, receivables, property, plant and equipment, goodwill, intangibles, accounts payable and customer advances. Liabilities other than accounts payable and customer advances are generally managed at the corporate level and are not included in segment operations. Financial Products Segment assets generally include all categories of assets.

Segment inventories and cost of sales are valued using a current cost methodology.

Goodwill allocated to segments is amortized using a fixed amount based on a 20 year useful life. This methodology difference only impacts segment assets; no goodwill amortization expense is included in segment profit. In addition, only a portion of goodwill for certain acquisitions made in 2011 or later has been allocated to segments.

The present value of future lease payments for certain Machinery, Energy & Transportation operating leases is included in segment assets. The estimated financing component of the lease payments is excluded.

Currency exposures for Machinery, Energy & Transportation are generally managed at the corporate level and the effects of changes in exchange rates on results of operations within the year are not included in segment profit. The net difference created in the translation of revenues and costs between exchange rates used for U.S. GAAP reporting and exchange rates used for segment reporting is reported as a methodology difference.

Stock-based compensation expense is not included in segment profit.

- Postretirement benefit expenses are split; segments are generally responsible for service costs, with the remaining elements of net periodic benefit cost included as a methodology difference.

Machinery, Energy & Transportation segment profit is determined on a pretax basis and excludes interest expense and most other income/expense items. Financial Products Segment profit is determined on a pretax basis and includes other income/expense items.

Reconciling items are created based on accounting differences between segment reporting and our consolidated external reporting. Please refer to pages 45 to 51 for financial information regarding significant reconciling items. Most of our reconciling items are self-explanatory given the above explanations. For the reconciliation of profit, we have grouped the reconciling items as follows:

Corporate costs: These costs are related to corporate requirements primarily for compliance and legal functions for the benefit of the entire organization.

Restructuring costs: Primarily costs for employee separation, long-lived asset impairments and contract terminations. These costs are included in Other operating (income) expenses except for defined-benefit plan curtailment losses and special termination benefits, which are included in Other income (expense). Restructuring costs also include other exit-related costs primarily for accelerated depreciation, inventory write-downs, equipment relocation and project management costs and LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold. A table, Reconciliation of Restructuring costs on page 48, has been included to illustrate how segment profit would have been impacted by the restructuring costs. See Note 19 for more information.

Methodology differences: See previous discussion of significant accounting differences between segment reporting and consolidated external reporting.

Timing: Timing differences in the recognition of costs between segment reporting and consolidated external reporting. For example, certain costs are reported on the cash basis for segment reporting and the accrual basis for consolidated external reporting.

16. Cat Financial financing activities

Allowance for credit losses

The allowance for credit losses is an estimate of the losses inherent in Cat Financial's finance receivable portfolio and includes consideration of accounts that have been individually identified as impaired, as well as pools of finance receivables where it is probable that certain receivables in the pool are impaired but the individual accounts cannot yet be identified. In identifying and measuring impairment, management takes into consideration past loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of underlying collateral and current economic conditions.

Accounts are identified for individual review based on past-due status and information available about the customer, such as financial statements, news reports and published credit ratings, as well as general information regarding industry trends and the economic environment in which Cat Financial's customers operate. The allowance for credit losses attributable to finance receivables that are individually evaluated and determined to be impaired is based on the present value of expected future cash flows discounted at the receivables' effective interest rate, the fair value of the collateral for collateral-dependent receivables or the observable market price of the receivable. In determining collateral value, Cat Financial estimates the current fair market value of the collateral less selling costs. Cat Financial also considers credit enhancements such as additional collateral and contractual third-party guarantees. The allowance for credit losses attributable to the remaining accounts not yet individually identified as impaired is estimated based on loss forecast models utilizing probabilities of default, our estimate of the loss emergence period and the estimated loss given default. In addition, qualitative factors not able to be fully captured in the loss forecast models including industry trends, macroeconomic factors and model imprecision are considered in the evaluation of the adequacy of the allowance for credit losses. These qualitative factors are subjective and require a degree of management judgment.

Cat Financial's allowance for credit losses is segregated into two portfolio segments:

- Customer - Finance receivables with retail customers.
- Dealer - Finance receivables with Caterpillar dealers.

A portfolio segment is the level at which the company develops a systematic methodology for determining its allowance for credit losses.

Cat Financial further evaluates portfolio segments by the class of finance receivables, which is defined as a level of information (below a portfolio segment) in which the finance receivables have the same initial measurement attribute and a similar method for assessing and monitoring credit risk. Typically, Cat Financial's finance receivables within a geographic area have similar credit risk profiles and methods for assessing and monitoring credit risk. Cat Financial's classes, which align with management reporting for credit losses, are as follows:

•North America - Finance receivables originated in the United States or Canada.

•Europe - Finance receivables originated in Europe, Africa, the Middle East and the Commonwealth of Independent States.

•Asia Pacific - Finance receivables originated in Australia, New Zealand, China, Japan and Southeast Asia.

•Mining - Finance receivables related to large mining customers worldwide and project financing in various countries.

•Latin America - Finance receivables originated in Mexico, and Central and South American countries.

Caterpillar Power Finance - Finance receivables originated worldwide related to marine vessels with Caterpillar engines and Caterpillar electrical power generation, gas compression and co-generation systems and non-Caterpillar equipment that is powered by these systems.

Credit quality of finance receivables

At origination, Cat Financial evaluates credit risk based on a variety of credit quality factors including prior payment experience, customer financial information, credit-rating agency ratings, loan-to-value ratios and other internal metrics. On an ongoing basis, Cat Financial monitors credit quality based on past-due status and collection experience as there is a meaningful correlation between the past-due status of customers and the risk of loss.

In determining past-due status, Cat Financial considers the entire recorded investment in finance receivables past due when any installment is over 30 days past due. The tables below summarize the recorded investment in finance receivables by aging category.

Table of Contents

(Millions of dollars)	September 30, 2018				Total Past Due	Current	Recorded Investment in Finance Receivables	91+ Still Accruing

Impaired finance receivables

For all classes, a finance receivable is considered impaired, based on current information and events, if it is probable that Cat Financial will be unable to collect all amounts due according to the contractual terms. Impaired finance receivables include finance receivables that have been restructured and are considered to be troubled debt restructurings.

Table of Contents

There were no impaired finance receivables as of September 30, 2018 or December 31, 2017, for the Dealer portfolio segment. Cat Financial's recorded investment in impaired finance receivables and the related unpaid principal balances and allowance for the Customer portfolio segment were as follows:

(Millions of dollars)	September 30, 2018			December 31, 2017		
	Recorded Investment	Unpaid Principal Balance	Related Allowance	Recorded Investment	Unpaid Principal Balance	Related Allowance

Recognition of income is suspended and the finance receivable is placed on non-accrual status when management determines that collection of future income is not probable (generally after 120 days past due). Recognition is resumed and previously suspended income is recognized when the finance receivable becomes current and collection of remaining amounts is considered probable. Payments received while the finance receivable is on non-accrual status are applied to interest and principal in accordance with the contractual terms.

As of September 30, 2018, there were finance receivables on non-accrual status for the Dealer portfolio segment of \$79 million, all of which were in the Latin America finance receivable class. As of December 31, 2017, there were no finance receivables on non-accrual status for the Dealer portfolio segment. The recorded investment in customer finance receivables on non-accrual status was as follows:

Troubled Debt Restructurings

A restructuring of a finance receivable constitutes a troubled debt restructuring (TDR) when the lender grants a concession it would not otherwise consider to a borrower experiencing financial difficulties. Concessions granted may include extended contract maturities, inclusion of interest only periods, below market interest rates, extended skip payment periods and reduction of principal and/or accrued interest.

As of September 30, 2018 and December 31, 2017, there were no additional funds committed to lend to a borrower whose terms have been modified in a TDR.

There were no finance receivables modified as TDRs during the three or nine months ended September 30, 2018 or 2017 for the Dealer portfolio segment. Cat Financial's investment in finance receivables in the Customer portfolio segment modified as TDRs during the three and nine months ended September 30, 2018 and 2017, were as follows:

(Millions of dollars)	Three Months Ended September 30, 2018			Three Months Ended September 30, 2017

17. Fair value disclosures

A. Fair value measurements

The guidance on fair value measurements defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. This guidance also specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques. Observable inputs (highest level) reflect market data obtained from independent sources, while unobservable inputs (lowest level) reflect internally developed market assumptions. In accordance with this guidance, fair value measurements are classified under the following hierarchy:

Level 1 – Quoted prices for identical instruments in active markets.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs or significant value-drivers are observable in active markets.

Level 3 – Model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable.

When available, we use quoted market prices to determine fair value, and we classify such measurements within Level 1. In some cases where market prices are not available, we make use of observable market based inputs to calculate fair value, in which case the measurements are classified within Level 2. If quoted or observable market prices are not available, fair value is based upon valuations in which one or more significant inputs are unobservable, including

internally developed models that use, where possible, current market-based parameters such as interest rates, yield curves and currency rates. These measurements are classified within Level 3.

Fair value measurements are classified according to the lowest level input or value-driver that is significant to the valuation. A measurement may therefore be classified within Level 3 even though there may be significant inputs that are readily observable.

Fair value measurement includes the consideration of nonperformance risk. Nonperformance risk refers to the risk that an obligation (either by a counterparty or Caterpillar) will not be fulfilled. For financial assets traded in an active market (Level 1 and certain Level 2), the nonperformance risk is included in the market price. For certain other financial assets and liabilities (certain Level 2 and Level 3), our fair value calculations have been adjusted accordingly.

Table of Contents

Investments in debt and equity securities

We have investments in certain debt and equity securities, primarily at Insurance Services, that are recorded at fair value. Fair values for our U.S. treasury bonds and large capitalization value and smaller company growth equity securities are based upon valuations for identical instruments in active markets. Fair values for other government bonds, corporate bonds and mortgage-backed debt securities are based upon models that take into consideration such market-based factors as recent sales, risk-free yield curves and prices of similarly rated bonds.

In addition, Insurance Services has an equity investment in a real estate investment trust (REIT) which is recorded at fair value based on the net asset value (NAV) of the investment. Beginning January 1, 2018, we adopted new accounting guidance issued by the FASB which results in the fair value of the REIT no longer being classified within the fair value hierarchy. Prior to January 1, 2018, the fair value was classified as Level 3.

See Note 8 for additional information on our investments in debt and equity securities.

Derivative financial instruments

The fair value of interest rate contracts is primarily based on models that utilize the appropriate market-based forward swap curves and zero-coupon interest rates to determine discounted cash flows. The fair value of foreign currency and commodity forward, option and cross currency contracts is based on a valuation model that discounts cash flows resulting from the differential between the contract price and the market-based forward rate.

Table of Contents

Assets and liabilities measured on a recurring basis at fair value, primarily related to Financial Products, included in our Consolidated Statement of Financial Position as of September 30, 2018 and December 31, 2017 are summarized below:

In addition to the amounts above, Cat Financial impaired loans are subject to measurement at fair value on a nonrecurring basis and are classified as Level 3 measurements. A loan is considered impaired when management determines that collection of contractual amounts due is not probable. In these cases, an allowance for credit losses may be established based either on the present value of expected future cash flows discounted at the receivables' effective interest rate, the fair value of the collateral for collateral-dependent receivables, or the observable market price of the receivable. In determining collateral value, Cat Financial estimates the current fair market value of the collateral less selling costs. Cat Financial had impaired loans with a fair value of \$366 million and \$341 million as of September 30, 2018 and December 31, 2017, respectively.

B. Fair values of financial instruments

In addition to the methods and assumptions we use to record the fair value of financial instruments as discussed in the Fair value measurements section above, we used the following methods and assumptions to estimate the fair value of our financial instruments:

Cash and short-term investments

Carrying amount approximated fair value.

Restricted cash and short-term investments

Carrying amount approximated fair value. Restricted cash and short-term investments are included in Prepaid expenses and other current assets in the Consolidated Statement of Financial Position.

Finance receivables

Fair value was estimated by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Wholesale inventory receivables

Fair value was estimated by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Table of Contents

Short-term borrowings

Carrying amount approximated fair value.

Long-term debt

Fair value for fixed and floating rate debt was estimated based on quoted market prices.

Guarantees

The fair value of guarantees is based upon our estimate of the premium a market participant would require to issue the same guarantee in a stand-alone arms-length transaction with an unrelated party. If quoted or observable market prices are not available, fair value is based upon internally developed models that utilize current market-based assumptions.

Please refer to the table below for the fair values of our financial instruments.

(Millions of dollars)	Fair Value of Financial Instruments				Fair Value Levels	Reference
	September 30, 2018		December 31, 2017			
	Carrying Amount	Fair Value	Carrying Amount	Fair Value

Total	\$102	\$132	\$350	\$260

¹ Includes gains (losses) from foreign exchange derivative contracts. See Note 5 for further details.

² Includes pretax gain of \$85 million related to the sale of Caterpillar's equity interest in Iron Planet Holdings Inc.

19. Restructuring costs

Our accounting for employee separations is dependent upon how the particular program is designed. For voluntary programs, eligible separation costs are recognized at the time of employee acceptance unless the acceptance requires explicit approval by the company. For involuntary programs, eligible costs are recognized when management has approved the program, the affected employees have been properly notified and the costs are estimable.

Restructuring costs for the three and nine months ended September 30, 2018 and 2017 were as follows:

(Millions of dollars)	Three Months Ended September 30		Nine Months Ended September 30	
	2018	2017	2018	2017
Employee separations ¹	\$44	\$8	\$121	\$514
Contract terminations ¹	—	6	—	32
Long-lived asset impairments ¹	18	31	49	306
Other ²	48	45		
Total restructuring costs	\$110	\$90		

Defined benefit plan curtailments and termination benefits ³	—	29
Other ²	123	130
Total restructuring costs	\$293	\$1,011

¹ Recognized in Other operating (income) expenses.

² Represents costs related to our restructuring programs, primarily for accelerated depreciation, project management costs, equipment relocation, inventory write-downs and LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold.

³ Recognized in Other income (expense).

For the nine months ended September 30, 2018, the restructuring costs were primarily related to ongoing facility closures across the company.

Table of Contents

Restructuring costs of \$649 million for the nine months ended September 30, 2017, were related to the closure of the facility in Gosselies, Belgium, within Construction Industries. The remaining restructuring costs for the first nine months of 2017 were primarily related to restructuring actions in Resource Industries.

Restructuring costs are a reconciling item between Segment profit and Consolidated profit before taxes. See Note 15 for more information.

The following table summarizes the 2017 and 2018 employee separation activity:

(Millions of dollars)	
Liability balance at December 31, 2016	\$ 147
Increase in liability (separation charges)	525
Reduction in liability (payments)	(423)
Liability balance at December 31, 2017	\$ 249
Increase in liability (separation charges)	121
Reduction in liability (payments)	(233)
Liability balance at September 30, 2018	\$ 137

Most of the liability balance at September 30, 2018 is expected to be paid in 2018 and 2019. About one-third of this balance is for employee separation payments related to closure of the Gosselies, Belgium, facility.

In March 2017, Caterpillar informed Belgian authorities of the decision to proceed to a collective dismissal, which led to the closure of the Gosselies site, impacting about 2,000 employees. Production of Caterpillar products at the Gosselies site ended during the second quarter of 2017. The other operations and functions at the Gosselies site were phased out by the end of the second quarter of 2018. We estimate restructuring costs incurred under this program to be about \$675 million. In the first nine months of 2018, we incurred \$11 million of restructuring costs, and we incurred \$653 million in 2017 for a total of \$664 million through September 30, 2018. We expect to recognize the remaining costs in 2018.

In September 2015, we announced a large scale restructuring plan (the Plan) including a voluntary retirement enhancement program for qualifying U.S. employees, several voluntary separation programs outside of the U.S., additional involuntary programs throughout the company and manufacturing facility consolidations and closures expected to occur through 2018. The largest action among those included in the Plan was related to our European manufacturing footprint, which led to the Gosselies, Belgium, facility closure as discussed above. In the first nine months of 2018, we incurred \$109 million of restructuring costs related to the Plan, and we have incurred \$1,776 million related to the Plan through September 30, 2018. We expect to recognize approximately \$50 million of additional restructuring costs related to the Plan in 2018.

Table of Contents

20. Acquisitions

ECM S.p.A.

On January 2, 2018, we acquired 100 percent of the equity in privately held ECM S.p.A. (ECM). Headquartered in Pistoia, Italy, ECM designs, manufactures, sells and services advanced signal systems for the rail industry. The ECM acquisition was executed to expand our presence in the international freight and transit industries through a combination of broad product offerings and strong reputation in the signaling market. The purchase price for the acquisition was \$225 million, consisting of \$249 million paid at closing, net of \$25 million of cash acquired and \$1 million of debt assumed.

The transaction was financed with available cash. Tangible assets as of the acquisition date were \$109 million, recorded at their fair values, and primarily included cash of \$25 million, receivables of \$28 million, inventories of \$29 million, and property, plant and equipment of \$17 million. Finite-lived intangible assets acquired of \$112 million included customer relationships, developed technology and trade names. The finite lived intangible assets are being amortized on a straight-line basis over a weighted-average amortization period of approximately 13 years. Liabilities assumed as of the acquisition date were \$79 million, recorded at their fair values, and primarily included accounts payable of \$38 million and net deferred tax liabilities of \$29 million. Goodwill of \$109 million, non-deductible for income tax purposes, represented the excess of the consideration transferred over the net assets recognized and represented the estimated future economic benefits arising from other assets acquired that could not be individually identified and separately recognized. Factors that contributed to a purchase price resulting in the recognition of goodwill include ECM's strategic fit into our rail product portfolio, the opportunity to provide a complete line-up of signaling and train control systems and the acquired assembled workforce. These values represent a preliminary allocation of purchase price subject to finalization of post-closing procedures. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and reported in the Energy & Transportation segment in Note 15. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

Downer Freight Rail

On January 2, 2018, we completed the acquisition of certain assets and liabilities of the Downer Freight Rail business (Downer Freight Rail). Headquartered in North Ryde, Australia, Downer Freight Rail provides a full suite of rolling stock, aftermarket parts and services throughout Australia. The acquisition was executed to strengthen our existing Rail footprint in Australia, which currently includes rolling stock maintenance facilities, as well as infrastructure and signaling facilities. The purchase price for the acquisition was \$99 million.

The transaction was financed with available cash. Tangible assets as of the acquisition date were \$92 million, recorded at their fair values, and primarily included receivables of \$26 million, inventories of \$42 million, and property, plant and equipment of \$17 million. Finite-lived customer relationship intangible assets acquired were \$5 million. The finite lived intangible assets are being amortized on a straight-line basis over an amortization period of 15 years. Liabilities assumed as of the acquisition date were \$10 million, which represented their fair values. Goodwill of \$12 million, not expected to be deducted for income tax purposes, represented the excess of the consideration transferred over the net assets recognized and represented the estimated future economic benefits arising from other assets acquired that could not be individually identified and separately recognized. Factors that contributed to a purchase price resulting in the recognition of goodwill include Downer Freight Rail's strategic fit into our rail product portfolio, the opportunity to expand our aftermarket parts and maintenance service portfolio in Australia and the acquired assembled workforce. These values represent a preliminary allocation of purchase price subject to finalization of post-closing procedures. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and reported in the Energy & Transportation segment in Note 15. Assuming this

transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

Table of Contents

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Overview

Third-quarter 2018 sales and revenues were \$13.510 billion, an 18 percent increase from third-quarter 2017 sales and revenues of \$11.413 billion. The increase was primarily due to higher sales volume driven by improved demand across the three primary segments. Profit per share for the third quarter of 2018 was \$2.88, an increase of \$1.11 from the third quarter of 2017. Profit was \$1.727 billion in the third quarter of 2018, an increase of \$668 million from the third quarter of 2017. Profit increased primarily due to higher sales volume and lower tax expense. Higher manufacturing costs and selling, general and administrative (SG&A) and research and development (R&D) expenses were partially offset by favorable price realization.

Sales and revenues for the nine months ended September 30, 2018, were \$40.380 billion, up \$7.814 billion, or 24 percent, from \$32.566 billion for the nine months ended September 30, 2017. Profit per share for the nine months ended September 30, 2018, was \$8.45, up significantly from profit per share of \$3.44 for the same period last year. Profit was \$5.099 billion for the nine months ended September 30, 2018, a substantial increase from \$2.053 billion for the nine months ended September 30, 2017.

Highlights for the third quarter of 2018 include:

Third-quarter sales and revenues were \$13.510 billion, compared with \$11.413 billion in the third quarter of 2017. Sales increased in Construction Industries, Energy & Transportation and Resource Industries. Financial Products’ revenues increased slightly.

Operating profit as a percent of sales and revenues was 15.8 percent in the third quarter of 2018, compared with 13.2 percent in the third quarter of 2017. Adjusted operating profit margin was 16.6 percent in the third quarter of 2018, compared with 14.0 percent in the third quarter of 2017.

Profit per share was \$2.88 in the third quarter of 2018, compared with \$1.77 in the third quarter of 2017. Excluding restructuring costs of \$0.14 per share and a net tax benefit to adjust deferred tax balances of \$0.16 per share, third-quarter 2018 adjusted profit per share was \$2.86. In comparison, adjusted profit per share for the third quarter of 2017, which excluded restructuring costs of \$0.18 per share, was \$1.95.

During the third quarter of 2018, Machinery, Energy & Transportation (ME&T) operating cash flow was \$848 million. In the quarter, the company deployed significant capital, including a discretionary pension contribution of \$1.0 billion, the repurchase of \$750 million of Caterpillar common stock and a dividend payment of \$511 million. The enterprise cash balance at the end of the third quarter of 2018 was \$8.0 billion.

Highlights for the nine months ended September 30, 2018, include:

Sales and revenues for the nine months ended September 30, 2018, were \$40.380 billion, compared with \$32.566 billion for the nine months ended September 30, 2017. Sales increased in Construction Industries, Energy & Transportation and Resource Industries. Financial Products’ revenues increased slightly.

Operating profit as a percent of sales and revenues was 15.9 percent for the nine months ended September 30, 2018, compared with 9.4 percent for the nine months ended September 30, 2017. Adjusted operating profit margin was 16.6 percent for the nine months ended September 30, 2018, compared with 12.5 percent for the nine months ended September 30, 2017.

Profit per share was \$8.45 for the nine months ended September 30, 2018, compared with \$3.44 in the nine months ended September 30, 2017. Excluding restructuring costs of \$0.37 per share and a net tax benefit to adjust deferred tax balances of \$0.16 per share, adjusted profit per share was \$8.66 for the nine months ended September 30, 2018. In comparison, adjusted profit per share for the nine months ended September 30, 2017, was \$4.72, which excluded restructuring costs of \$1.37 and a gain on the sale of an equity investment of \$0.09 per share.

Machinery, Energy & Transportation (ME&T) operating cash flow was \$3.9 billion for the nine months ended September 30, 2018, compared to \$4.2 billion for the nine months ended September 30, 2017.

Restructuring Costs

In recent years, we have incurred substantial restructuring costs to achieve a flexible and competitive cost structure. We incurred \$110 million of restructuring costs during the third quarter of 2018 and \$293 million during the nine months ended September 30, 2018. We incurred \$90 million of restructuring costs during the third quarter of 2017 and

\$1.011 billion during the nine months ended September 30, 2017. We expect restructuring actions to continue and anticipate costs of about \$400 million for the full year of 2018.

Notes:

• Glossary of terms is included on pages 80-82; first occurrence of terms shown in bold italics.

• Information on non-GAAP financial measures is included on page 87.

Consolidated Results of Operations

THREE MONTHS ENDED SEPTEMBER 30, 2018 COMPARED WITH THREE MONTHS ENDED
SEPTEMBER 30, 2017

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in Consolidated Sales and Revenues between the third quarter of 2017 (at left) and the third quarter of 2018 (at right). Items favorably impacting sales and revenues appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting sales and revenues appear as downward stair steps with dollar amounts reflected in parentheses above each bar. Caterpillar management utilizes these charts internally to visually communicate with the company's board of directors and employees.

Total sales and revenues were \$13.510 billion in the third quarter of 2018, an increase of \$2.097 billion, or 18 percent, compared with \$11.413 billion in the third quarter of 2017. The increase was due to higher sales volume driven by improved demand across the three primary segments, which included an increase in dealer inventories. Favorable price realization, primarily in Resource Industries, also contributed to the sales improvement. The increase was partially offset by unfavorable currency impacts, primarily due to a weaker Australian dollar and Brazilian real. Sales increased in all regions. The largest sales increase was in North America, which improved 24 percent as strong economic conditions in key end markets drove higher demand, including favorable changes in dealer inventories. Dealer inventories increased in the third quarter of 2018 and were about flat in the third quarter of 2017. Sales increased 11 percent in Latin America primarily due to stabilizing economic conditions in several countries in the region that resulted in improved demand from low levels, partially offset by a weaker Brazilian real. EAME sales increased 7 percent primarily due to higher demand as economic conditions have improved in several countries in the region, however, this was partially offset by economic uncertainty in a few countries in the Middle East.

Asia/Pacific sales increased 28 percent mostly due to higher demand in several countries across the region, including favorable changes in dealer inventories. Dealer inventories increased more significantly in the third quarter of 2018 than during the third quarter of 2017. The increase in sales was partially offset by the unfavorable impact of a weaker Australian dollar.

Dealer machine and engine inventories increased about \$800 million during the third quarter of 2018, compared to an increase of about \$200 million during the third quarter of 2017. Dealers are independent, and there could be many reasons for changes in their inventory levels, including their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions, machine rental rates and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers.

Table of Contents**CONSOLIDATED OPERATING PROFIT**

The chart above graphically illustrates reasons for the change in Consolidated Operating Profit between the third quarter of 2017 (at left) and the third quarter of 2018 (at right). Items favorably impacting operating profit appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting operating profit appear as downward stair steps with dollar amounts reflected in parentheses above each bar. Caterpillar management utilizes these charts internally to visually communicate with the company's board of directors and employees. The bar entitled Other includes consolidating adjustments and Machinery, Energy & Transportation other operating (income) expenses.

Operating profit for the third quarter of 2018 was \$2.135 billion, compared to \$1.509 billion in the third quarter of 2017. The increase of \$626 million was mostly due to higher sales volume and favorable price realization.

Manufacturing costs were higher due to increased material and freight costs. Material costs were higher primarily due to increases in steel prices and tariffs. Freight costs increased primarily due to supply chain inefficiencies as the industry continues to respond to strong global demand. SG&A/R&D expenses increased primarily due to investments aligned with the company's strategic growth initiatives.

Short-term incentive compensation expense was about \$350 million in the third quarter of 2018, compared to about \$400 million in the third quarter of 2017. For the full year, we expect short-term incentive compensation will be about \$1.4 billion, nearly the same as 2017.

Other Profit/Loss Items

Other income/expense in the third quarter of 2018 was income of \$102 million, compared with income of \$132 million in the third quarter of 2017. The unfavorable change was primarily a result of higher currency translation and hedging net losses.

The provision for income taxes in the third quarter of 2018 reflected an estimated annual tax rate of 24 percent, compared to 32 percent in the third quarter of 2017, excluding the discrete items discussed in the following paragraph. The decrease was primarily due to the reduction in the U.S. corporate tax rate beginning January 1, 2018, along with other changes in the geographic mix of profits from a tax perspective.

The 2018 provision for income taxes in the third quarter of 2018 also included a \$154 million reduction to the provisionally estimated charge of \$2.371 billion recognized during the fourth quarter of 2017 due to enactment of U.S. tax reform legislation. The \$154 million benefit revises the estimated impact of the write-down of U.S. net deferred tax assets to reflect the reduction in the U.S. corporate tax rate from 35 percent to 21 percent. This benefit primarily related to the decision to make an additional discretionary pension contribution of \$1.0 billion to U.S. pension plans in the third quarter of 2018 which was treated as deductible on the 2017 U.S. tax return. The provision for income taxes in the third quarter of 2018 also includes a charge of \$59 million to correct for an error which resulted in an understatement of the valuation allowance offsetting deferred tax assets for prior years. This error had the effect of overstating profit by \$17 million, \$33 million and \$9 million for the years ended December 31, 2017, 2016 and 2015, respectively. Management has concluded that the error was not material to any period presented. In addition, a discrete tax benefit of \$3 million was recorded in the third quarter of 2018, compared to \$18 million in the third quarter of 2017, for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense.

Consolidating Adjustments	(100)	(78)	(22)		
Consolidated Operating Profit	\$2,135	\$1,509	\$ 626	41	%

Construction Industries

Construction Industries' total sales were \$5.683 billion in the third quarter of 2018, compared with \$4.886 billion in the third quarter of 2017. The increase was mostly due to higher sales volume for construction equipment.

Sales increased in all regions except Latin America.

In North America, the sales increase was mostly due to higher demand for new equipment, primarily to support oil and gas activities, including pipelines, and non-residential building construction activities.

Sales in Latin America were about flat as economic conditions remained weak.

Sales increased in EAME as infrastructure and building construction activities drove higher demand across several countries in the region.

Sales in Asia/Pacific were higher across the region, with the most significant impact from improved demand in China, including an increase in dealer inventories from low levels, stemming from increased non-residential building construction and infrastructure activities.

Construction Industries' profit was \$1.058 billion in the third quarter of 2018, compared with \$884 million in the third quarter of 2017. The increase in profit was a result of higher sales volume, partially offset by higher manufacturing costs. Manufacturing costs were higher primarily due to increased material and freight costs.

Construction Industries' profit as a percent of total sales was 18.6 percent in the third quarter of 2018, compared with 18.1 percent in the third quarter of 2017.

Resource Industries

Resource Industries' total sales were \$2.638 billion in the third quarter of 2018, an increase of \$682 million from the third quarter of 2017. The increase was primarily due to higher demand for both mining and heavy construction equipment. Commodity market fundamentals remained positive, contributing to higher mining equipment sales. In addition, increased sales to heavy construction and quarry and aggregate customers were driven by positive global economic growth. Resource Industries' customers globally continue to focus on improving the productivity and efficiency of existing machine assets, thereby extending equipment life cycles and lowering operating costs. Rebuild, overhaul and maintenance activity remains strong, resulting in higher aftermarket parts sales. Favorable price realization also contributed to the sales improvement.

Resource Industries' profit was \$414 million in the third quarter of 2018, compared with \$229 million in the third quarter of 2017. The improvement was mostly due to higher sales volume and favorable price realization. The increase was partially offset by higher manufacturing costs, including freight and material costs, and increased SG&A/R&D expenses primarily due to investments aligned with strategic growth initiatives.

Resource Industries' profit as a percent of total sales was 15.7 percent in the third quarter of 2018, compared with 11.7 percent in the third quarter of 2017.

Table of Contents

Energy & Transportation

Sales by Application

(Millions of dollars)	Third Quarter 2018	Third Quarter 2017	\$ Change	% Change
Oil and Gas	\$ 1,362	\$ 1,065	\$ 297	28 %
Power Generation	1,102	898	204	23 %
Industrial	863	885	(22)	(2 %)
Transportation	1,250	1,113	137	12 %
External Sales	4,577	3,961	616	16 %
Inter-Segment	978	877	101	12 %
Total Sales	\$ 5,555	\$ 4,838	\$ 717	15 %

Energy & Transportation's total sales were \$5.555 billion in the third quarter of 2018, compared with \$4.838 billion in the third quarter of 2017. The increase was primarily due to higher sales volume across all applications except Industrial.

Oil and Gas - Sales increased due to higher demand in North America for well servicing and gas compression applications. Higher energy prices and growth in U.S. onshore oil and gas drove increased sales for reciprocating engines.

Power Generation - Sales improved across all regions, with the largest increases in North America and Asia/Pacific primarily for reciprocating engine applications, including data centers and power plants, and for aftermarket parts.

Industrial - Sales were lower in EAME primarily due to economic uncertainty in a few countries in the Middle East, partially offset by slightly higher sales in Asia/Pacific and North America.

Transportation - Sales were higher primarily due to rail services, driven by acquisitions in Asia/Pacific and EAME, and increased rail traffic in North America.

Energy & Transportation's profit was \$973 million in the third quarter of 2018, compared with \$743 million in the third quarter of 2017. The improvement was mostly due to higher sales volume. The increase was partially offset by higher manufacturing costs, including freight costs, and increased SG&A/R&D expenses primarily due to investments aligned with strategic growth initiatives.

Energy & Transportation's profit as a percent of total sales was 17.5 percent in the third quarter of 2018, compared with 15.4 percent in the third quarter of 2017.

Financial Products Segment

Financial Products' segment revenues were \$845 million in the third quarter of 2018, an increase of \$71 million, or 9 percent, from the third quarter of 2017. The increase was primarily due to higher average financing rates and higher average earning assets in North America and Asia/Pacific as well as a favorable impact from returned or repossessed equipment. These favorable impacts were partially offset by lower intercompany lending activity in North America, lower average earning assets in Latin America and lower average financing rates in Europe.

Financial Products' segment profit was \$201 million in the third quarter of 2018, compared with \$185 million in the third quarter of 2017. The increase was primarily due to a favorable impact from returned or repossessed equipment, higher average earning assets and an increase in net yield on average earning assets. This was partially offset by an unfavorable impact from available for sale securities in Insurance Services.

At the end of the third quarter of 2018, past dues at Cat Financial were 3.47 percent, compared with 2.73 percent at the end of the third quarter of 2017. The increase in past dues was primarily driven by the Cat Power Finance portfolio. Write-offs, net of recoveries, in the third quarter of 2018 were \$40 million, compared with \$47 million in the third quarter of 2017.

As of September 30, 2018, Cat Financial's allowance for credit losses totaled \$416 million, or 1.49 percent of finance receivables, compared with \$416 million, or 1.48 percent of finance receivables at June 30, 2018. The allowance for credit losses at December 31, 2017, was \$365 million, or 1.33 percent of finance receivables.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$401 million in the third quarter of 2018, a decrease of \$58 million from the third quarter of 2017, primarily due to methodology differences and lower corporate costs. Restructuring costs were \$110 million in the third quarter of 2018, compared to \$90 million in the third quarter of 2017.

Table of Contents

NINE MONTHS ENDED SEPTEMBER 30, 2018 COMPARED WITH NINE MONTHS ENDED SEPTEMBER 30, 2017

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in Consolidated Sales and Revenues between the nine months ended September 30, 2017 (at left) and the nine months ended September 30, 2018 (at right). Items favorably impacting sales and revenues appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting sales and revenues appear as downward stair steps with dollar amounts reflected in parentheses above each bar. Caterpillar management utilizes these charts internally to visually communicate with the company's board of directors and employees.

Total sales and revenues were \$40.380 billion in the nine months ended September 30, 2018, an increase of \$7.814 billion, or 24 percent, compared with \$32.566 billion in the nine months ended September 30, 2017. The increase was primarily due to higher sales volume driven by improved demand for equipment across the three primary segments. Sales were also higher due to currency impacts, primarily from a stronger euro and Chinese yuan. Favorable price realization in Resource Industries and Energy & Transportation also contributed to the sales improvement. Financial Products' revenues increased slightly.

Sales increased in all regions, with the largest sales increase in North America, which improved 27 percent as strong economic conditions in key end markets drove higher end-user demand. Also contributing to higher sales was an increase in dealer inventories in the nine months ended September 30, 2018, compared to a decrease in the nine months ended September 30, 2017.

Sales increased 14 percent in Latin America primarily due to stabilizing economic conditions in several countries in the region that resulted in improved demand from low levels.

EAME sales increased 16 percent primarily due to higher demand, including favorable changes in dealer inventories, as economic conditions have improved in several countries in the region. The impact of a stronger euro and favorable price realization also contributed to higher sales. The impact of changes in dealer inventories was favorable as dealer inventories increased more significantly in the nine months ended September 30, 2018, than during the nine months ended September 30, 2017.

Asia/Pacific sales increased 37 percent primarily due to higher demand in several countries across the region, including favorable changes in dealer inventories, the impact of a stronger Chinese yuan and favorable price realization. Dealer inventories increased in the nine months ended September 30, 2018, and were about flat in the nine months ended September 30, 2017.

The sharp increase in demand has led to supply chain challenges. Although the company is making efforts to improve material flows, constraints remain for some parts and components that are impacting lead times and availability. During the first nine months of 2018, dealer machine and engine inventories increased about \$2.1 billion, compared to an increase of about \$100 million in the first nine months of 2017. The company believes the increase in dealer inventories during the first nine months of 2018 is reflective of current end-user demand. However, dealers are independent, and there could be many reasons for changes in their inventory levels, including their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions, machine rental rates and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers.

Table of Contents**CONSOLIDATED OPERATING PROFIT**

The chart above graphically illustrates reasons for the change in Consolidated Operating Profit between the nine months ended September 30, 2017 (at left) and the nine months ended September 30, 2018 (at right). Items favorably impacting operating profit appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting operating profit appear as downward stair steps with dollar amounts reflected in parentheses above each bar. Caterpillar management utilizes these charts internally to visually communicate with the company's board of directors and employees. The bar entitled Other includes consolidating adjustments and Machinery, Energy & Transportation other operating (income) expenses.

Operating profit for the nine months ended September 30, 2018, was \$6.410 billion, compared with \$3.073 billion for the nine months ended September 30, 2017. The increase of \$3.337 billion was primarily due to higher sales volume and lower restructuring costs. Higher manufacturing costs and increased SG&A/R&D were partially offset by favorable price realization. Financial Products operating profit declined. The company expects price realization in the fourth quarter of 2018 will be favorably impacted by previously announced mid-year price increases.

Manufacturing costs were higher due to increased freight and material costs, partially offset by lower warranty expense. Freight costs were unfavorable primarily due to supply chain inefficiencies as the industry responds to strong global demand. Material costs were higher primarily due to increases in steel prices. The impact of recently imposed tariffs was about \$40 million during the nine months ended September 30, 2018. For the full year of 2018, we expect the impact of recently imposed tariffs will be at the low end of the previously provided range of \$100 million to \$200 million. In addition, the company expects supply chain challenges to continue to impact freight costs during the fourth quarter of 2018.

SG&A/R&D expenses increased primarily due to investments aligned with the company's strategic growth initiatives. Restructuring costs were \$293 million for the nine months ended September 30, 2018. In the first nine months of 2017, restructuring costs impacting operating profit of \$982 million were primarily related to the closure of the facility in Gosselies, Belgium, and restructuring actions in Resource Industries.

Short-term incentive compensation expense is directly related to financial and operational performance, measured against targets set annually. Expense for the nine months ended September 30, 2018, was about \$1.070 billion compared to about \$1.050 billion for the nine months ended September 30, 2017. For the full year, we expect short-term incentive compensation will be about \$1.4 billion, nearly the same as 2017.

Other Profit/Loss Items

Other income/expense for the nine months ended September 30, 2018, was income of \$350 million, compared with income of \$260 million for the nine months ended September 30, 2017. The favorable change was primarily a result of the impact from pension and other postemployment benefits (OPEB) plans and other miscellaneous items, partially offset by the absence of a pretax gain of \$85 million on the sale of Caterpillar's equity investment in IronPlanet in the nine months ended September 30, 2017.

The provision for income taxes for the first nine months of 2018 reflected an estimated annual tax rate of 24 percent, compared to 32 percent for the first nine months of 2017, excluding the discrete items discussed in the following paragraph. The decrease was primarily due to the reduction in the U.S. corporate tax rate beginning January 1, 2018, along with other changes in the geographic mix of profits from a tax perspective.

Table of Contents

The 2018 provision for income taxes for the first nine months of 2018 also included a \$154 million reduction to the provisionally estimated charge of \$2.371 billion recognized during the fourth quarter of 2017 due to enactment of U.S. tax reform legislation. The \$154 million benefit revises the estimated impact of the write-down of U.S. net deferred tax assets to reflect the reduction in the U.S. corporate tax rate from 35 percent to 21 percent. This benefit primarily related to the decision to make an additional discretionary pension contribution of \$1.0 billion to U.S. pension plans in the third quarter of 2018 which was treated as deductible on the 2017 U.S. tax return. The provision for income taxes for the first nine months of 2018 also includes a charge of \$59 million to correct for an error which resulted in an understatement of the valuation allowance offsetting deferred tax assets for prior years. This error had the effect of overstating profit by \$17 million, \$33 million and \$9 million for the years ended December 31, 2017, 2016 and 2015, respectively. Management has concluded that the error was not material to any period presented. In addition, a discrete tax benefit of \$52 million was recorded in the first nine months of 2018, compared to \$45 million in the first nine months of 2017, for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense. The provision for income taxes for the first nine months of 2018 also included a \$25 million benefit for the release of a valuation allowance against the deferred tax assets of a non-U.S. subsidiary. The provision for income taxes for the first nine months of 2017 also included a \$15 million increase to prior year taxes related to non-U.S. restructuring costs.

Our analysis of U.S. tax reform legislation, updated through September 30, 2018, resulted in no other changes to the 2017 year-end provisional charge. We will continue to update our calculations as additional required information is prepared and analyzed, interpretations and assumptions are refined, and additional guidance is issued. These updates could significantly impact the provision for income taxes, the amount of taxes payable and the deferred tax asset and liability balances. We account for the new U.S. tax on global intangible low-taxed income as a period cost.

Profit (Loss) by Segment

(Millions of dollars)	Nine Months Ended September 30, 2018	Nine Months Ended September 30, 2017	\$ Change	% Change	
Construction Industries	\$ 3,329	\$ 2,418	\$911	38	%

Construction Industries

Construction Industries' total sales were \$17.532 billion in the nine months ended September 30, 2018, compared with \$13.945 billion in the nine months ended September 30, 2017. The increase was mostly due to higher sales volume for construction equipment. Sales were also higher due to currency impacts, primarily from a stronger euro and Chinese yuan.

Sales volume increased primarily due to higher demand for construction equipment and the impact of favorable changes in dealer inventories. Dealer inventories increased significantly more in the nine months ended September 30, 2018, than in the nine months ended September 30, 2017.

Sales increased in all regions.

In North America, the sales increase was primarily due to higher demand for construction equipment, primarily to support oil and gas activities, including pipelines, non-residential building construction and infrastructure activities. In addition, sales increased due to the favorable impact of dealer inventories, which increased in the nine months ended September 30, 2018, compared to a slight decrease in the nine months ended September 30, 2017.

Although construction activities remained weak in Latin America, sales were higher in the region.

Sales increased in EAME primarily due to higher demand, including favorable changes in dealer inventories, and the favorable impact of currency, mostly from a stronger euro. Higher demand was driven by increased construction activities across several countries in the region. Dealer inventories increased more in the nine months ended September 30, 2018, than during the nine months ended September 30, 2017. Favorable price realization also contributed to the sales increase.

Table of Contents

Sales in Asia/Pacific were higher in several countries in the region, with most of the improved demand in China, including an increase in dealer inventories, stemming from increased building construction and infrastructure investment. The favorable impact of a stronger Chinese yuan also contributed to increased sales.

Construction Industries' profit was \$3.329 billion for the nine months ended September 30, 2018, compared with \$2.418 billion for the nine months ended September 30, 2017. The increase in profit was a result of higher sales volume, partially offset by higher material and freight costs, and increased SG&A/R&D expenses, partially due to spending for strategic growth initiatives.

Construction Industries' profit as a percent of total sales was 19.0 percent for the nine months ended September 30, 2018, compared with 17.3 percent for the nine months ended September 30, 2017.

Resource Industries

Resource Industries' total sales were \$7.473 billion in the nine months ended September 30, 2018, an increase of \$1.920 billion from the nine months ended September 30, 2017. The increase was primarily due to higher demand for both mining and heavy construction equipment, including aftermarket parts. Commodity market fundamentals remained positive contributing to higher mining equipment sales. In addition, increased sales to heavy construction and quarry and aggregate customers were driven by positive global economic growth. Resource Industries' customers globally continue to focus on improving productivity and efficiency of existing machine assets, thereby extending equipment life cycle and lowering operating costs. Rebuild, overhaul and maintenance activity remains strong, resulting in higher aftermarket parts sales. Favorable price realization also contributed to the sales improvement.

Resource Industries' profit was \$1.203 billion for the nine months ended September 30, 2018, compared with \$488 million for the nine months ended September 30, 2017. The improvement was mostly due to higher sales volume and favorable price realization, partially offset by increased SG&A/R&D expenses, unfavorable currency impacts, and higher manufacturing costs. SG&A/R&D expenses increased primarily due to investments aligned with strategic growth initiatives. Manufacturing costs were unfavorable as lower warranty expense was more than offset by higher freight and material costs.

Resource Industries' profit as a percent of total sales was 16.1 percent for the nine months ended September 30, 2018, compared with 8.8 percent for the nine months ended September 30, 2017.

Energy & Transportation**Sales by Application**

(Millions of dollars)	Nine	Nine	\$	%	
	Months	Months			
	Ended	Ended	Change	Change	
	September	September			
	30, 2018	30, 2017			
Oil and Gas	\$ 4,044	\$ 2,927	\$ 1,117	38	%
Power Generation	3,063	2,491	572	23	%
Industrial	2,738	2,546	192	8	%
Transportation	3,722	3,294	428	13	%
External Sales	13,567	11,258	2,309	21	%
Inter-Segment	2,931	2,484	447	18	%
Total Sales	\$ 16,498	\$ 13,742	\$ 2,756	20	%

Energy & Transportation's total sales were \$16.498 billion in the nine months ended September 30, 2018, compared with \$13.742 billion in the nine months ended September 30, 2017. The increase was primarily due to higher sales volume across all applications. Favorable currency impacts, mostly from a stronger euro, and favorable price realization also contributed to the increase in sales.

Oil and Gas - Sales increased due to higher demand in North America for gas compression and well servicing applications. Higher energy prices and growth in U.S. onshore oil and gas drove increased sales for reciprocating engines and related aftermarket parts.

Power Generation - Sales improved across all regions, with the largest increases in EAME from turbines and turbine-related services, reciprocating engine projects and favorable currency. In addition, sales increased in North America and Asia/Pacific primarily for reciprocating engine applications, including data centers and power plants, and for aftermarket parts.

Industrial - Sales were higher in North America and Asia/Pacific, primarily due to improving economic conditions supporting higher engine sales into industrial applications. Sales in EAME were about flat as economic uncertainty in a few countries in the Middle East were mostly offset by favorable currency impacts.

Table of Contents

Transportation - Sales were higher for rail services driven by acquisitions in Asia/Pacific and EAME and increased rail traffic in North America. Marine sales were higher in Asia/Pacific, led by increased activity in the ferry sector. Energy & Transportation's profit was \$2.859 billion for the nine months ended September 30, 2018, compared with \$1.982 billion for the nine months ended September 30, 2017. The improvement was due to higher sales volume and favorable price realization. This was partially offset due to increased spending for strategic growth initiatives and higher freight costs.

Energy & Transportation's profit as a percent of total sales was 17.3 percent for the nine months ended September 30, 2018, compared with 14.4 percent for the nine months ended September 30, 2017.

Financial Products Segment

Financial Products' segment revenues were \$2.467 billion for the nine months ended September 30, 2018, an increase of \$157 million, or 7 percent, from the nine months ended September 30, 2017. The increase was primarily due to higher average financing rates and higher average earning assets in North America and Asia/Pacific. These favorable impacts were partially offset by lower intercompany lending activity in North America, lower average earning assets in Latin America and lower average financing rates in Europe.

Financial Products' segment profit was \$476 million for the nine months ended September 30, 2018, compared with \$559 million for the nine months ended September 30, 2017. The decrease was primarily due to an increase in the provision for credit losses at Cat Financial, lower intercompany lending activity and an unfavorable impact from available for sale securities in Insurance Services. These unfavorable impacts were partially offset by an increase in net yield on average earning assets, higher average earning assets and a favorable impact from returned or repossessed equipment.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$1.245 billion in the nine months ended September 30, 2018, a decrease of \$865 million from the nine months ended September 30, 2017. The decrease in expense was mostly due to lower restructuring costs and methodology differences. Restructuring costs were \$293 million for the nine months ended September 30, 2018. In the first nine months of 2017, restructuring costs impacting operating profit of \$982 million were primarily related to the closure of the facility in Gosselies, Belgium.

Table of Contents

RESTRUCTURING COSTS

Restructuring costs for the three and nine months ended September 30, 2018 and 2017 were as follows:

(Millions of dollars)	Three Months Ended September 30	
	2018	2017
Employee separations ¹	\$44	\$8
Contract terminations ¹	—	6
Long-lived asset impairments ¹	18	31
Other ²	48	45
Total restructuring costs	\$110	\$90

	Nine Months Ended September 30	
	2018	2017
Employee separations ¹	\$121	\$514
Contract terminations ¹	—	32
Long-lived asset impairments ¹	49	306
Defined benefit plan curtailments and termination benefits ³	—	29
Other ²	123	130
Total restructuring costs	\$293	\$1,011

¹ Recognized in Other operating (income) expenses.

² Represents costs related to our restructuring programs, primarily for accelerated depreciation, project management costs, equipment relocation, inventory write-downs and LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold.

³ Recognized in Other income (expense).

For the nine months ended September 30, 2018, the restructuring costs were primarily related to ongoing facility closures across the company.

Restructuring costs of \$649 million for the nine months ended September 30, 2017, were related to the closure of the facility in Gosselies, Belgium, within Construction Industries. The remaining costs for the first nine months of 2017 were primarily related to restructuring actions in Resource Industries.

Restructuring costs are a reconciling item between Segment profit and Consolidated profit before taxes.

The following table summarizes the 2017 and 2018 employee separation activity:

(Millions of dollars)	
Liability balance at December 31, 2016	\$ 147
Increase in liability (separation charges)	525
Reduction in liability (payments)	(423)
Liability balance at December 31, 2017	\$ 249
Increase in liability (separation charges)	121
Reduction in liability (payments)	(233)
Liability balance at September 30, 2018	\$ 137

Most of the liability balance at September 30, 2018 is expected to be paid in 2018 and 2019. About one-third of this balance is for employee separation payments related to closure of the Gosselies, Belgium, facility.

Table of Contents

In March 2017, Caterpillar informed Belgian authorities of the decision to proceed to a collective dismissal, which led to the closure of the Gosselies site, impacting about 2,000 employees. Production of Caterpillar products at the Gosselies site ended during the second quarter of 2017. The other operations and functions at the Gosselies site were phased out by the end of the second quarter of 2018. We estimate restructuring costs incurred under this program to be about \$675 million. In the first nine months of 2018, we incurred \$11 million of restructuring costs, and we incurred \$653 million in 2017 for a total of \$664 million through September 30, 2018. We expect to recognize the remaining costs in 2018.

In September 2015, we announced a large scale restructuring plan (the Plan) including a voluntary retirement enhancement program for qualifying U.S. employees, several voluntary separation programs outside of the U.S., additional involuntary programs throughout the company and manufacturing facility consolidations and closures expected to occur through 2018. The largest action among those included in the Plan was related to our European manufacturing footprint, which led to the Gosselies, Belgium, facility closure as discussed above. In the first nine months of 2018, we incurred \$109 million of restructuring costs related to the Plan, and we have incurred \$1,776 million related to the Plan through September 30, 2018. We expect to recognize approximately \$50 million of additional restructuring costs related to the Plan in 2018.

We expect 2018 restructuring costs will be about \$400 million, unchanged from the previous estimate. We expect that restructuring actions will result in a benefit to operating costs, primarily Cost of goods sold and SG&A expenses of about \$180 million in 2018 compared with 2017. Although we expect restructuring activities to continue in 2019, restructuring costs should decline compared to 2018.

GLOSSARY OF TERMS

1. Adjusted Operating Profit Margin - Operating profit excluding restructuring costs as a percent of sales and revenues.
- Adjusted Profit Per Share - Profit per share excluding restructuring costs for 2018 and 2017. For 2018, adjusted profit per share also excludes a net tax benefit to adjust deferred tax balances. For 2017, adjusted profit per share also excludes a gain on the sale of an equity investment in IronPlanet recognized in the second quarter.
2. All Other Segments - Primarily includes activities such as: business strategy, product management and development, manufacturing of filters and fluids, undercarriage, ground engaging tools, fluid transfer products, precision seals, rubber sealing and connecting components primarily for Cat® products; parts distribution;
3. integrated logistics solutions, distribution services responsible for dealer development and administration including a wholly owned dealer in Japan, dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts; digital investments for new customer and dealer solutions that integrate data analytics with state-of-the-art digital technologies while transforming the buying experience.
4. Consolidating Adjustments - Elimination of transactions between Machinery, Energy & Transportation and Financial Products.
- Construction Industries - A segment primarily responsible for supporting customers using machinery in infrastructure, forestry and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes asphalt pavers, backhoe loaders, compactors, cold planers, compact track and multi-terrain loaders, mini, small, medium and large track excavators, forestry excavators, feller bunchers, harvesters, knuckleboom loaders, motor graders, pipelayers, road reclaimers, site prep tractors, skidders, skid steer loaders, telehandlers, small and medium track-type tractors, track-type loaders, utility vehicles, wheel excavators, compact, small and medium wheel loaders and related parts and work tools.
5. Corporate Items and Eliminations - Includes restructuring costs; corporate-level expenses; timing differences, as some expenses are reported in segment profit on a cash basis; methodology differences between segment and consolidated external reporting; and inter-segment eliminations.
6. Currency - With respect to sales and revenues, currency represents the translation impact on sales resulting from changes in foreign currency exchange rates versus the U.S. dollar. With respect to operating profit, currency
- 7.

represents the net translation impact on sales and operating costs resulting from changes in foreign currency exchange rates versus the U.S. dollar. Currency only includes the impact on sales and operating profit for the Machinery, Energy & Transportation lines of business excluding restructuring costs; currency impacts on Financial Products' revenues and operating profit are included in the Financial Products' portions of the respective analyses. With respect to other income/expense, currency represents the effects of forward and option contracts entered into by the company to reduce the risk of fluctuations in exchange rates (hedging) and the net effect of changes in foreign currency exchange rates on our foreign currency assets and liabilities for consolidated results (translation).

8. EAME - A geographic region including Europe, Africa, the Middle East and the Commonwealth of Independent States (CIS).

Table of Contents

9. Earning Assets - Assets consisting primarily of total finance receivables net of unearned income, plus equipment on operating leases, less accumulated depreciation at Cat Financial.
 Energy & Transportation - A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related parts across industries serving Oil and Gas, Power Generation, Industrial and Transportation applications, including marine and rail-related businesses. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support of turbine machinery and integrated systems and solutions and turbine-related services,
10. reciprocating engine-powered generator sets, integrated systems used in the electric power generation industry, reciprocating engines and integrated systems and solutions for the marine and oil and gas industries; reciprocating engines supplied to the industrial industry as well as Cat machinery; the remanufacturing of Cat engines and components and remanufacturing services for other companies; the business strategy, product design, product management and development, manufacturing, remanufacturing, leasing and service of diesel-electric locomotives and components and other rail-related products and services and product support of on-highway vocational trucks for North America.
 Financial Products Segment - Provides financing alternatives to customers and dealers around the world for Caterpillar products, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Financing plans include operating and finance leases, installment sale contracts, working capital loans and wholesale financing plans. The segment also provides insurance and risk management products and services that help customers and dealers manage their business risk. Insurance and risk
11. management products offered include physical damage insurance, inventory protection plans, extended service coverage for machines and engines, and dealer property and casualty insurance. The various forms of financing, insurance and risk management products offered to customers and dealers help support the purchase and lease of our equipment. The segment also earns revenues from Machinery, Energy & Transportation, but the related costs are not allocated to operating segments. Financial Products segment profit is determined on a pretax basis and includes other income/expense items.
12. Latin America - A geographic region including Central and South American countries and Mexico.
13. Machinery, Energy & Transportation (ME&T) - Represents the aggregate total of Construction Industries, Resource Industries, Energy & Transportation, All Other Segments and related corporate items and eliminations.
14. Machinery, Energy & Transportation Other Operating (Income) Expenses - Comprised primarily of gains/losses on disposal of long-lived assets, gains/losses on divestitures and legal settlements and accruals. Restructuring costs classified as other operating expenses on the Results of Operations are presented separately on the Operating Profit Comparison.
 Manufacturing Costs - Manufacturing costs exclude the impacts of currency and restructuring costs (see definition below) and represent the volume-adjusted change for variable costs and the absolute dollar change for period manufacturing costs. Variable manufacturing costs are defined as having a direct relationship with the volume of production. This includes material costs, direct labor and other costs that vary directly with production volume
15. such as freight, power to operate machines and supplies that are consumed in the manufacturing process. Period manufacturing costs support production but are defined as generally not having a direct relationship to short-term changes in volume. Examples include machinery and equipment repair, depreciation on manufacturing assets, facility support, procurement, factory scheduling, manufacturing planning and operations management.
16. Pension and Other Postemployment Benefit (OPEB) - The company's defined-benefit pension and postretirement benefit plans.
 Price Realization - The impact of net price changes excluding currency and new product introductions. Price
17. realization includes geographic mix of sales, which is the impact of changes in the relative weighting of sales prices between geographic regions.
18. Resource Industries - A segment primarily responsible for supporting customers using machinery in mining, quarry and aggregates, waste and material handling applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes large track-type tractors, large mining trucks, hard rock vehicles, longwall miners,

electric rope shovels, draglines, hydraulic shovels, rotary drills, large wheel loaders, off-highway trucks, articulated trucks, wheel tractor scrapers, wheel dozers, landfill compactors, soil compactors, hard rock continuous mining systems, select work tools, machinery components, electronics and control systems and related parts. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management, equipment management analytics and autonomous machine capabilities. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing and research and development.

Table of Contents

19. Restructuring Costs - Primarily costs for employee separation, long-lived asset impairments and contract terminations. These costs are included in Other operating (income) expenses except for defined-benefit plan curtailment losses and special termination benefits, which are included in Other income (expense). Restructuring costs also include other exit-related costs primarily for accelerated depreciation, inventory write-downs, equipment relocation and project management costs and LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold.
20. Sales Volume - With respect to sales and revenues, sales volume represents the impact of changes in the quantities sold for Machinery, Energy & Transportation as well as the incremental sales impact of new product introductions, including emissions-related product updates. With respect to operating profit, sales volume represents the impact of changes in the quantities sold for Machinery, Energy & Transportation combined with product mix as well as the net operating profit impact of new product introductions, including emissions-related product updates. Product mix represents the net operating profit impact of changes in the relative weighting of Machinery, Energy & Transportation sales with respect to total sales. The impact of sales volume on segment profit includes inter-segment sales.

LIQUIDITY AND CAPITAL RESOURCES

Sources of funds

We generate significant capital resources from operating activities, which are the primary source of funding for our ME&T operations. Funding for these businesses is also available from commercial paper and long-term debt issuances. Financial Products' operations are funded primarily from commercial paper, term debt issuances and collections from its existing portfolio. During the first nine months of 2018, we experienced favorable liquidity conditions globally in both our ME&T and Financial Products' operations. On a consolidated basis, we ended the first nine months of 2018 with \$8.01 billion of cash, a decrease of \$254 million from year-end 2017. We intend to maintain a strong cash and liquidity position.

Our cash balances are held in numerous locations throughout the world with approximately \$7.1 billion held by our non-U.S. subsidiaries. As a result of U.S. tax reform legislation enacted in December 2017, we expect to be able to use cash held by non-U.S. subsidiaries in the United States in the future with minimal U.S. tax consequences. Consolidated operating cash flow for the first nine months of 2018 was \$4.48 billion, down from \$5.17 billion for the same period last year. The decrease was primarily due to higher working capital requirements to support increasing production volumes, higher short-term incentive compensation payments and a \$1.0 billion discretionary pension contribution made to our U.S. pension plans in the third quarter of 2018, mostly offset by higher profit. See further discussion of operating cash flow under ME&T and Financial Products.

Total debt as of September 30, 2018 was \$35.77 billion, an increase of \$895 million from year-end 2017. Debt related to Financial Products increased \$771 million, reflecting increasing portfolio balances. Debt related to ME&T increased \$124 million in the first nine months of 2018. In the first nine months of 2018, we repurchased \$2.0 billion of Caterpillar common stock.

We have three global credit facilities with a syndicate of banks totaling \$10.50 billion (Credit Facility) available in the aggregate to both Caterpillar and Cat Financial for general liquidity purposes. Based on management's allocation decision, which can be revised from time to time, the portion of the Credit Facility available to ME&T as of September 30, 2018 was \$2.75 billion. Information on our Credit Facility is as follows:

- In September 2018, we entered into a new 364-day facility. The 364-day facility of \$3.15 billion (of which \$0.82 billion is available to ME&T) expires in September 2019.

- In September 2018, we amended and extended the three-year facility. The three-year facility of \$2.73 billion (of which \$0.72 billion is available to ME&T) now expires in September 2021.

- In September 2018, we amended and extended the five-year facility. The five-year facility of \$4.62 billion (of which \$1.21 billion is available to ME&T) now expires in September 2023.

At September 30, 2018, Caterpillar's consolidated net worth was \$15.87 billion, which was above the \$9.00 billion required under the Credit Facility. The consolidated net worth is defined as the consolidated shareholders' equity including preferred stock but excluding the pension and other postretirement benefits balance within Accumulated other comprehensive income (loss).

At September 30, 2018, Cat Financial's covenant interest coverage ratio was 1.70 to 1. This is above the 1.15 to 1 minimum ratio calculated as (1) profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to (2) interest expense calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended, required by the Credit Facility.

Table of Contents

In addition, at September 30, 2018, Cat Financial's covenant leverage ratio was 7.56 to 1. This is below the maximum ratio of debt to net worth of 10 to 1, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31, required by the Credit Facility.

In the event Caterpillar or Cat Financial does not meet one or more of their respective financial covenants under the Credit Facility in the future (and are unable to obtain a consent or waiver), the syndicate of banks may terminate the commitments allocated to the party that does not meet its covenants. Additionally, in such event, certain of Cat Financial's other lenders under other loan agreements where similar financial covenants or cross default provisions are applicable, may, at their election, choose to pursue remedies under those loan agreements, including accelerating the repayment of outstanding borrowings. At September 30, 2018, there were no borrowings under the Credit Facility. Our total credit commitments and available credit as of September 30, 2018 were:

(Millions of dollars)	September 30, 2018		
	Consolidated	Machinery, Energy & Transportation	Financial Products
Credit lines available:			
Global credit facilities	\$10,500	\$ 2,750	\$ 7,750
Other external	4,523	59	4,464
Total credit lines available	15,023	2,809	12,214
Less: Commercial paper outstanding	(3,636)	—	(3,636)
Less: Utilized credit	(1,101)	(59)	(1,042)
Available credit	\$10,286	\$ 2,750	\$ 7,536

The other external consolidated credit lines with banks as of September 30, 2018 totaled \$4.52 billion. These committed and uncommitted credit lines, which may be eligible for renewal at various future dates or have no specified expiration date, are used primarily by our subsidiaries for local funding requirements. Caterpillar or Cat Financial may guarantee subsidiary borrowings under these lines.

We receive debt ratings from the major credit rating agencies. In December 2016, Moody's Investors Service downgraded our long-term ratings to A3 from A2, and short-term ratings to Prime-2 from Prime-1. The Moody's downgrade did not have a material impact on our borrowing costs or our overall financial health. A further downgrade of our credit ratings by Moody's or one of the other major credit rating agencies would result in increased borrowing costs and could make access to certain credit markets more difficult. However, our long-term ratings with Fitch and S&P continue to be "mid-A". In the event economic conditions deteriorate such that access to debt markets becomes unavailable, ME&T's operations would rely on cash flow from operations, use of existing cash balances, borrowings from Cat Financial and access to our Credit Facility. Our Financial Products' operations would rely on cash flow from its existing portfolio, existing cash balances, access to our Credit Facility and other credit line facilities of Cat Financial and potential borrowings from Caterpillar. In addition, we maintain a support agreement with Cat Financial, which requires Caterpillar to remain the sole owner of Cat Financial and may, under certain circumstances, require Caterpillar to make payments to Cat Financial should Cat Financial fail to maintain certain financial ratios.

Machinery, Energy & Transportation

Net cash provided by operating activities was \$3.88 billion in the first nine months of 2018, compared with \$4.16 billion for the same period in 2017. The decrease was primarily due to higher working capital requirements to support increasing production volumes, higher short-term incentive compensation payments and a \$1.0 billion discretionary pension contribution made to our U.S. pension plans in the third quarter of 2018, mostly offset by higher profit. Within working capital, changes to accounts payable, customer advances and inventories unfavorably impacted cash flow.

Net cash used for investing activities in the first nine months of 2018 was \$836 million, compared with net cash used of \$300 million in the first nine months of 2017. The change was primarily due to the acquisition of ECM S.p.A. and

Downer Freight Rail in the first nine months of 2018, as well as increased cash used for capital expenditures. Net cash used for financing activities during the first nine months of 2018 was \$3.13 billion, compared with net cash used of \$361 million in the same period of 2017. In the first nine months of 2018, we repurchased \$2.0 billion of Caterpillar common stock. The first nine months of 2017 included \$1.0 billion in borrowings from Financial Products, proceeds of \$360 million related to a sale-leaseback transaction in Japan and a long-term debt maturity of \$500 million.

While our short-term priorities for the use of cash may vary from time to time as business needs and conditions dictate, our long-term cash deployment strategy is focused on the following priorities. Our top priority is to maintain a strong financial position in support of a Mid-A rating. Next, we intend to fund operational requirements and commitments. Then, we intend to fund priorities

Table of Contents

that profitably grow the company and return capital to shareholders through dividend growth and share repurchases. Additional information on cash deployment is as follows:

Strong financial position – Our top priority is to maintain a strong financial position in support of a Mid-A rating. We historically tracked a period ending debt-to-capital ratio and a target range as a key measure of ME&T's financial strength. We have transitioned to tracking a diverse group of financial metrics that focus on liquidity, leverage, cash flow and margins to better align with the various methodologies used by the major credit rating agencies and our cash deployment actions.

Operational excellence and commitments – Capital expenditures were \$845 million during the first nine months of 2018, compared to \$574 million for the same period in 2017. We expect ME&T's capital expenditures in 2018 to be between \$1.0 and \$1.5 billion, up from \$916 million in 2017. We made \$1.29 billion of contributions to our pension and other postretirement benefit plans during the first nine months of 2018, including a \$1.0 billion discretionary contribution made to our U.S. pension plans in September 2018. We currently anticipate full-year 2018 contributions of approximately \$1.36 billion. We made \$522 million of contributions to our pension and other postretirement benefit plans during the first nine months of 2017.

Fund strategic growth initiatives and return capital to shareholders – We intend to fund initiatives that drive long-term profitable growth that will be focused in the areas of expanded offerings and services, including acquisitions. In the first nine months of 2018, we acquired ECM S.p.A. and Downer Freight Rail. Each quarter, our Board of Directors reviews the company's dividend for the applicable quarter. The Board evaluates the financial condition of the company and considers the economic outlook, corporate cash flow, the company's liquidity needs, and the health and stability of global credit markets to determine whether to maintain or change the quarterly dividend. Dividends totaled \$1.44 billion in the first nine months of 2018, representing 78 cents per share paid in the first and second quarters, and 86 cents per share paid in the third quarter. In January 2014, the Board of Directors approved an authorization to repurchase up to \$10 billion of Caterpillar common stock (the 2014 Authorization), which will expire on December 31, 2018. As of January 1, 2018, \$5.47 billion remained available under the 2014 Authorization, and in the first nine months of 2018, we repurchased \$2.0 billion of Caterpillar common stock, leaving \$3.47 billion in the 2014 Authorization as of September 30, 2018. In July 2018, the Board of Directors approved a new share repurchase authorization of up to \$10 billion of Caterpillar common stock effective January 1, 2019, with no expiration. We currently expect to repurchase more than \$750 million of common stock during the fourth quarter, bringing total repurchases to more than \$2.75 billion in 2018. Our share repurchase plans are subject to the company's cash deployment priorities and are evaluated on an ongoing basis; however, we plan to consistently repurchase common stock with the intent to, at a minimum, offset the impact of dilution over time. The timing and amount of future repurchases may vary depending on market conditions and investing priorities. Caterpillar's basic shares outstanding as of September 30, 2018 were approximately 590 million.

Financial Products

Financial Products operating cash flow was \$1.08 billion in the first nine months of 2018, compared with \$1.03 billion for the same period a year ago. Net cash used for investing activities was \$2.00 billion for the first nine months of 2018, compared with \$992 million for the same period in 2017. The change was primarily due to the impact of portfolio related activity, partially offset by the impact of lending with ME&T. Net cash provided by financing activities was \$846 million for the first nine months of 2018, compared with cash used for financing activities of \$1.12 billion for the same period in 2017. The change was primarily due to the impact of net borrowings.

CRITICAL ACCOUNTING POLICIES

For a discussion of the company's critical accounting policies, see Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2017 Annual Report on Form 10-K. There have been no significant changes to our critical accounting policies since our 2017 Annual Report on Form 10-K.

Table of Contents

OTHER MATTERS

Environmental and Legal Matters

The Company is regulated by federal, state and international environmental laws governing its use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, the investigation, remediation, and operating and maintenance costs are accrued against our earnings. Costs are accrued based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in Accrued expenses. We believe there is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

On January 7, 2015, the Company received a grand jury subpoena from the U.S. District Court for the Central District of Illinois. The subpoena requests documents and information from the Company relating to, among other things, financial information concerning U.S. and non-U.S. Caterpillar subsidiaries (including undistributed profits of non-U.S. subsidiaries and the movement of cash among U.S. and non-U.S. subsidiaries). The Company has received additional subpoenas relating to this investigation requesting additional documents and information relating to, among other things, the purchase and resale of replacement parts by Caterpillar Inc. and non-U.S. Caterpillar subsidiaries, dividend distributions of certain non-U.S. Caterpillar subsidiaries, and Caterpillar SARL and related structures. On March 2-3, 2017, agents with the Department of Commerce, the Federal Deposit Insurance Corporation and the Internal Revenue Service executed search and seizure warrants at three facilities of the Company in the Peoria, Illinois area, including its former corporate headquarters. The warrants identify, and agents seized, documents and information related to, among other things, the export of products from the United States, the movement of products between the United States and Switzerland, the relationship between Caterpillar Inc. and Caterpillar SARL, and sales outside the United States. It is the Company's understanding that the warrants, which concern both tax and export activities, are related to the ongoing grand jury investigation. The Company is continuing to cooperate with this investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On March 20, 2014, Brazil's Administrative Council for Economic Defense (CADE) published a Technical Opinion which named 18 companies and over 100 individuals as defendants, including two subsidiaries of Caterpillar Inc., MGE - Equipamentos e Serviços Ferroviários Ltda. (MGE) and Caterpillar Brasil Ltda. The publication of the Technical Opinion opened CADE's official administrative investigation into allegations that the defendants participated in anticompetitive bid activity for the construction and maintenance of metro and train networks in Brazil. While companies cannot be held criminally liable for anticompetitive conduct in Brazil, criminal charges have been brought against two current employees of MGE and one former employee of MGE involving the same conduct alleged by CADE. The Company has responded to all requests for information from the authorities. The Company is unable to predict the outcome or reasonably estimate the potential loss; however, we currently believe that this matter

will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

In addition, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to product design, manufacture and performance liability (including claimed asbestos and welding fumes exposure), contracts, employment issues, environmental matters, intellectual property rights, taxes (other than income taxes) and securities laws. The aggregate range of reasonably possible losses in excess of accrued liabilities, if any, associated with these unresolved legal actions is not material. In some cases, we cannot reasonably estimate a range of loss because there is insufficient information regarding the matter. However, we believe there is no more than a remote chance that any liability arising from these matters would be material. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

Table of Contents

Retirement Benefits

We recognize mark-to-market gains and losses immediately through earnings upon the remeasurement of our pension and OPEB plans. Mark-to-market gains and losses represent the effects of actual results differing from our assumptions and the effects of changing assumptions. We will record a mark-to-market adjustment as of the measurement date, December 31, 2018. Based on market conditions as of September 30, 2018, we would recognize an increase to the funded status of our plans of approximately \$500 million. This would result in a decrease in our Liability for postemployment benefits and the recognition of a net mark-to-market gain in earnings of approximately \$500 million pre-tax, \$375 million net of tax or \$0.63 per share. The gain would be primarily due to higher discount rates at September 30, 2018 (approximately 4.2 percent for our U.S. pension plans) as compared to the discount rates used at December 31, 2017 (approximately 3.5 percent for our U.S. pension plans), partially offset by losses resulting from lower than expected returns on plan assets. It is difficult to predict the December 31, 2018 adjustment amount, as it is dependent on several factors including the discount rate, actual returns on plan assets and other actuarial assumptions.

Order Backlog

At the end of the third quarter of 2018, the dollar amount of backlog believed to be firm was approximately \$17.3 billion, about \$400 million lower than the second quarter of 2018, with decreases across the three primary segments. Compared with the third quarter of 2017, the order backlog increased about \$1.9 billion, with increases across the three primary segments. Of the total backlog at September 30, 2018, approximately \$3.4 billion was not expected to be filled in the following twelve months.

Table of Contents

NON-GAAP FINANCIAL MEASURES

The following definitions are provided for the non-GAAP financial measures used in this report. These non-GAAP financial measures have no standardized meaning prescribed by U.S. GAAP and therefore are unlikely to be comparable to the calculation of similar measures for other companies. Management does not intend for these items to be considered in isolation or as a substitute for the related GAAP measures.

We believe it is important to separately quantify the profit impact of several significant items in order for our results to be meaningful to our readers. These items consist of (i) restructuring costs, which are incurred in the current year to generate longer term benefits, (ii) a net tax benefit to adjust deferred tax balances and (iii) a gain on the sale of an equity investment. We do not consider these items indicative of earnings from ongoing business activities and believe the non-GAAP measures will provide investors with useful perspective on underlying business results and trends and aids with assessing our period-over-period results.

Reconciliations of adjusted operating profit margin to the most directly comparable GAAP measure, operating profit as a percent of sales and revenues are as follows:

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2018	2017	2018	2017
Operating profit as a percent of total sales and revenues	15.8%	13.2%	15.9%	9.4 %
Restructuring costs	0.8 %	0.8 %	0.7 %	3.1 %
Adjusted operating profit margin	16.6%	14.0%	16.6%	12.5%

Reconciliations of adjusted profit per share to the most directly comparable GAAP measure, profit per share - diluted are as follows:

	Three Months Ended		Nine Months Ended	
	September 30		September 30	
	2018	2017	2018	2017
Profit per share - diluted	\$2.88	\$1.77	\$8.45	\$3.44
Per share restructuring costs ¹	0.14	0.18	0.37	1.37
Per share gain on sale of equity investment ²	—	—	—	(0.09)
Per share deferred tax balance adjustment	\$(0.16)	\$—	\$(0.16)	\$—
Adjusted profit per share	\$2.86	\$1.95	\$8.66	\$4.72

¹ At estimated annual tax rate based on full-year outlook for per share restructuring costs at statutory tax rates. Three and nine months ended September 30, 2018 at estimated annual rate of 24 percent. Three and nine months ended September 30, 2017 at estimated annual rate of 20 percent. Nine months ended September 30, 2017 also includes \$15 million increase to prior year taxes related to non-U.S. restructuring costs recognized in the first quarter of 2017. Third-quarter 2017 includes an unfavorable interim adjustment of \$0.06 per share and nine months ended September 30, 2017 includes a favorable interim adjustment of \$0.01 per share resulting from the difference in the estimated annual tax rate for consolidated reporting of 32 percent and the estimated annual tax rate for profit per share excluding restructuring costs,

gain on sale of equity investment and discrete items of 29 percent.

² At U.S. statutory tax rate of 35 percent.

Supplemental Consolidating Data

We are providing supplemental consolidating data for the purpose of additional analysis. The data has been grouped as follows:

Consolidated – Caterpillar Inc. and its subsidiaries.

Machinery, Energy & Transportation – Caterpillar defines Machinery, Energy & Transportation as it is presented in the supplemental data as Caterpillar Inc. and its subsidiaries with Financial Products accounted for on the equity basis. Machinery, Energy & Transportation information relates to the design, manufacturing and marketing of our products. Financial Products' information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment. The nature of these businesses is different, especially with regard to the financial position and cash flow items. Caterpillar management utilizes this presentation internally to highlight these differences. We also believe this presentation will assist readers in understanding our business.

Table of Contents

Financial Products – Our finance and insurance subsidiaries, primarily Cat Financial and Insurance Services.

Consolidating Adjustments – Eliminations of transactions between Machinery, Energy & Transportation and Financial Products.

Pages 89 to 96 reconcile Machinery, Energy & Transportation with Financial Products on the equity basis to Caterpillar Inc. consolidated financial information.

Forward-looking Statements

Certain statements in this Form 10-Q relate to future events and expectations and are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as “believe,” “estimate,” “will be,” “will,” “would,” “expect,” “anticipate,” “plan,” “project,” “intend,” “could,” “should” or other similar words or expressions of forward-looking statements. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding our outlook, projections, forecasts or trend descriptions. These statements do not guarantee future performance and speak only as of the date they are made, and we do not undertake to update our forward-looking statements.

Caterpillar’s actual results may differ materially from those described or implied in our forward-looking statements based on a number of factors, including, but not limited to: (i) global and regional economic conditions and economic conditions in the industries we serve; (ii) commodity price changes, material price increases, fluctuations in demand for our products or significant shortages of material; (iii) government monetary or fiscal policies; (iv) political and economic risks, commercial instability and events beyond our control in the countries in which we operate; (v) international trade policies and their impact on demand for our products and our competitive position, including the imposition of new tariffs or changes in existing tariff rates; (vi) our ability to develop, produce and market quality products that meet our customers’ needs; (vii) the impact of the highly competitive environment in which we operate on our sales and pricing; (viii) information technology security threats and computer crime; (ix) additional restructuring costs or a failure to realize anticipated savings or benefits from past or future cost reduction actions; (x) failure to realize all of the anticipated benefits from initiatives to increase our productivity, efficiency and cash flow and to reduce costs; (xi) inventory management decisions and sourcing practices of our dealers and our OEM customers; (xii) a failure to realize, or a delay in realizing, all of the anticipated benefits of our acquisitions, joint ventures or divestitures; (xiii) union disputes or other employee relations issues; (xiv) adverse effects of unexpected events including natural disasters; (xv) disruptions or volatility in global financial markets limiting our sources of liquidity or the liquidity of our customers, dealers and suppliers; (xvi) failure to maintain our credit ratings and potential resulting increases to our cost of borrowing and adverse effects on our cost of funds, liquidity, competitive position and access to capital markets; (xvii) our Financial Products segment’s risks associated with the financial services industry; (xviii) changes in interest rates or market liquidity conditions; (xix) an increase in delinquencies, repossessions or net losses of Cat Financial’s customers; (xx) currency fluctuations; (xxi) our or Cat Financial’s compliance with financial and other restrictive covenants in debt agreements; (xxii) increased pension plan funding obligations; (xxiii) alleged or actual violations of trade or anti-corruption laws and regulations; (xxiv) additional tax expense or exposure including the impact of U.S. tax reform; (xxv) significant legal proceedings, claims, lawsuits or government investigations; (xxvi) new regulations or changes in financial services regulations; (xxvii) compliance with environmental laws and regulations; and (xxviii) other factors described in more detail in Caterpillar’s Forms 10-Q, 10-K and other filings with the Securities and Exchange Commission.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The information required by this Item is incorporated by reference from Note 5 – “Derivative financial instruments and risk management” included in Part I, Item 1 and Management’s Discussion and Analysis included in Part I, Item 2 of this Form 10-Q.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures

An evaluation was performed under the supervision and with the participation of the company's management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of the company's disclosure controls and procedures, as that term is defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this quarterly report. Based on that evaluation, the CEO and CFO concluded that the company's disclosure controls and procedures were effective as of the end of the period covered by this quarterly report.

Changes in internal control over financial reporting

During the third quarter of 2018, there has been no change in the company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information required by this Item is incorporated by reference from Note 13 – "Environmental and legal matters" included in Part I, Item 1 of this Form 10-Q.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased ²	Average Price Paid per Share ²	Total Number of Shares Purchased Under the Program	Approximate Dollar Value of Shares that may yet be Purchased under the Program (in billions) ¹
July 1-31, 2018	—	\$—	—	\$ 4.225
August 1-31, 2018	4,774,613	\$143.31	4,774,613	\$ 3.543
September 1-30, 2018	—	\$—	—	\$ 3.543
Total	4,774,613	\$143.31	4,774,613	

¹ In January 2014, the Board of Directors authorized the repurchase of up to \$10.0 billion of Caterpillar common stock, which will expire on December 31, 2018 (the 2014 Authorization). As of September 30, 2018, approximately \$3.5 billion remained available under the 2014 Authorization.

² During the third quarter of 2018, we entered into an Accelerated Stock Repurchase Agreement (ASR) with a third-party financial institution to purchase \$750 million of our common stock. In August 2018, upon payment of \$750 million to the financial institution, we received 4.8 million shares. In October 2018, upon final settlement of the ASR, we received an additional 0.4 million shares. In total, we repurchased 5.2 million shares under this ASR at an average price per share of \$143.31.

Share repurchases in the table above are reported based on the trade dates.

Non-U.S. Employee Stock Purchase Plans

As of September 30, 2018, we had 23 employee stock purchase plans (the "EIP Plans") that are administered outside the United States for our non-U.S. employees, which had approximately 12,000 active participants in the aggregate. During the third quarter of 2018, approximately 91,000 shares of Caterpillar common stock were purchased by the EIP Plans pursuant to the terms of such plans.
