PEOPLES BANCORP INC. AND SUBSIDIARIES NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Presentation:

The accompanying unaudited Consolidated Financial Statements of Peoples Bancorp Inc. and its subsidiaries have been prepared in accordance with accounting principles generally accepted in the United States ("US GAAP") for interim financial information and the instructions for Form 10-Q and Article 10 of Regulation S-X. Accordingly, these financial statements do not contain all of the information and footnotes required by US GAAP for annual financial statements and should be read in conjunction with Peoples' Annual Report on Form 10-K for the fiscal year ended December 31, 2007 ("2007 Form 10-K").

The accounting and reporting policies followed in the presentation of the accompanying unaudited Consolidated Financial Statements are consistent with those described in Note 1 of the Notes to the Consolidated Financial Statements included in Peoples' 2007 Form 10-K, as updated by the information contained in this report. In the opinion of management, these financial statements reflect all adjustments necessary to present fairly such information for the periods and dates indicated. Such adjustments are normal and recurring in nature. All significant intercompany accounts and transactions have been eliminated. The Consolidated Balance Sheet at December 31, 2007, contained herein has been derived from the audited Consolidated Balance Sheet included in Peoples' 2007 Form 10-K.

The preparation of the financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. In addition, Peoples' insurance commission income includes contingent performance based insurance commissions that are recognized by Peoples when received, which typically occurs during the first quarter of each year. Contingent performance based insurance commissions of \$835,000 and \$795,000 were received during the three months ended March 31, 2008 and 2007, respectively.

2. New Accounting Pronouncements:

On May 9, 2008, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 162, The Hierarchy of Generally Accepted Accounting Principles ("SFAS 162"). SFAS 162 established a framework for selecting accounting principles to be used in preparing financial statements that are presented in conformity with US GAAP. SFAS 162 is effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board Auditing amendments to AU Section 411, The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles, and is not expected to have an impact on Peoples' Consolidated Financial Statements.

On March 19, 2008, the FASB issued Statement of Financial Accounting Standards No. 161, Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133 ("SFAS 161"), which requires enhanced disclosures about an entity's derivative and hedging activities intended to improve the transparency of financial reporting. Under SFAS 161, entities will be required to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for under Statement 133 and its related interpretations and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. Peoples will adopt SFAS 161 effective January 1, 2009 and adoption is not anticipated to have a material impact on Peoples' Consolidated Financial Statements.

On February 15, 2007, the FASB issued Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities—Including an amendment of FASB Statement No. 115 ("SFAS 159"), which permits companies to choose to measure many financial instruments and certain other items at fair value. The objective of SFAS 159 is to improve financial reporting by providing companies with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently. Peoples adopted SFAS 159 effective January 1, 2008, as required, but has not elected to measure any permissible items at fair value. As a result, the adoption of SFAS 159 did not have any impact on Peoples' Consolidated Financial Statements.

Table Of Contents

On September 15, 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements ("SFAS 157"), which replaces various definitions of fair

value in existing accounting literature with a single definition, establishes a framework for measuring fair value and requires additional disclosures about fair value measurements

upon adoption. SFAS 157 clarifies that fair value is the price that would be received to sell an asset or the price paid to transfer a liability in the most advantageous market

available to the entity and emphasizes that fair value is a market-based measurement and should be based on the assumptions market participants would use. SFAS 157 also

creates a three-level hierarchy under which individual fair value estimates are to be ranked based on the relative reliability of the inputs used in the valuation. This hierarchy is the

basis for the disclosure requirements, with fair value estimates based on the least reliable inputs requiring more extensive disclosures about the valuation method used and the

gains and losses associated with those estimates. SFAS 157 is required to be applied whenever another financial accounting standard requires or permits an asset or liability to be

measured at fair value. The statement does not expand the use of fair value to any new circumstances.

On February 12, 2008, the FASB issued FASB Staff Position No. FAS 157-2, "Effective Date of FASB Statement No. 157" ("FSP 157-2"). FSP 157-2 amends SFAS 157 to delay the effective date for nonfinancial assets and nonfinancial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis, which means at least annually. For items within its scope, Peoples will be required to apply the new guidance beginning January 1, 2009. Management is still determining the impact adoption will have on Peoples' Consolidated Financial Statements. For all other items, Peoples applied the guidance as of January 1, 2008, as required, which did not have a material impact on Peoples' Consolidated Financial Statements.

3. Stock-Based Compensation:

Under the Peoples Bancorp Inc. 2006 Equity Plan (the "2006 Equity Plan") approved by shareholders, Peoples may grant, among other awards, nonqualified stock options, incentive stock options, restricted stock awards, stock appreciation rights or any combination thereof covering up to 500,000 common shares to employees and non-employee directors. In prior years, Peoples granted nonqualified and incentive stock options to employees and nonqualified stock options to non-employee directors under the 2006 Equity Plan and predecessor plans. Since February 2007, Peoples has granted a combination of restricted common shares and stock appreciation rights ("SARs") to be settled in common shares to employees and restricted common shares to non-employee directors subject to the terms and conditions prescribed by the 2006 Equity Plan. In general, common shares issued in connection with stock-based awards are issued from treasury shares to the extent available. If no treasury shares are available, common shares are issued from authorized but unissued common shares.

Stock Options: Under the provisions of the 2006 Equity Plan and predecessor stock option plans, the exercise price per share of any stock option granted may not be less than the fair market value of the underlying common shares on the date of grant of the stock option. The most recent stock options granted to employees and non-employee directors occurred in 2006. The stock options granted to employees will vest three years from the grant date, while the stock options granted to non-employee directors vested six months from the grant date. All stock options granted to both employees and non-employee directors expire ten years from the date of grant.

Stock Appreciation Rights: SARs granted to employees have an exercise price equal to the fair market value of Peoples' common shares on the date of grant and will be settled using common shares of Peoples. Additionally, the SARs granted will vest three years from the grant date and expire ten years from the date of grant. The following summarizes the changes to Peoples' SARs for the period ended June 30, 2008:

	Number of Common Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding	30,374	\$ 27.96		
at January 1				
Granted	28,170	23.85

Restricted Shares: Under the 2006 Equity Plan, Peoples may award restricted common shares to officers, key employees and non-employee directors. In general, the restrictions on common shares awarded to non-employee directors expire after six months, while the restrictions on common shares awarded to employees expire after three years. The following summarizes the changes to Peoples' restricted common shares for the period ended June 30, 2008:

Table Of Contents

	Number	Weighted-		
	of	Average		
	Common	Grant Date		
	Shares	Fair	Value	
Outstanding	9,148	\$	28.49	
at January 1				
Awarded	14,069		23.72	
Released	1,600		27.24	
Forfeited	164		29.25	
Outstanding	21,453	\$	25.45	
at June 30				

For the six months ended June 30, 2008, the total intrinsic value of restricted common shares released was \$40,000.

Stock-Based Compensation: Peoples recognizes stock-based compensation expense, which is included as a component of Peoples' salaries and employee benefits costs, based on the estimated fair value of the awards on the grant date. The following summarizes the amount of stock-based compensation expense and related tax benefit recognized for the period ended June 30:

	-	Three Mon	ths	Ended		Six Months Ended			
		June	30	,		June 30,			
		2008		2007		2008		2007	
Total	\$	107,000	\$	95,000	\$	359,000	\$	239,000	
stock-based									
compensation									
Recognized		(37,000)		(33,000)	((126,000)		(84,000)	
tax benefit									
Net expense	\$	70,000	\$	62,000	\$	233,000	\$	155,000	
recognized									

The estimated fair value of stock options and SARs was calculated at grant date using the Black-Scholes option pricing model with the following weighted-average assumptions:

	2008	2007
Risk-free interest rate	4.38%	4.89%
Dividend yield	3.88%	2.85%
Volatility factor of the		
market price of parent		
stock	26.3%	25.3%
Weighted-average	10	10
expected life	years	years

The Black-Scholes option valuation model was originally developed for use in estimating the fair value of traded options, which have different characteristics than equity awards granted by Peoples, such as no vesting or transfer restrictions. The model requires the input of highly subjective assumptions, including the expected stock price volatility, which can materially affect the fair value estimate. The expected volatility and expected life assumptions were based solely on historical data. The expected dividend yield is computed based on the current dividend rate, and the risk-free interest rate is based on U.S. Treasury zero-coupon issues with a remaining term approximating the

expected life of the equity awards.

Total unrecognized stock-based compensation expense related to unvested awards was \$347,000 at June 30, 2008, which will be recognized over a weighted-average period of 1.8 years.

4. Employee Benefit Plans:

Peoples sponsors a noncontributory defined benefit pension plan that covers substantially all employees. The plan provides retirement benefits based on an employee's years of service and compensation. In 2003, Peoples changed the methodology used to determine the retirement benefits for employees hired on or after January 1, 2003, which has lowered accumulated benefit obligation and net costs. Peoples also has a contributory postretirement benefit plan for former employees who were retired as of December 31, 1992. The plan provides health and life insurance benefits. Peoples' policy is to fund the cost of the benefits as they are incurred. The following table details the components of the net periodic benefit cost for the plans:

6. Earnings per Share:

Basic earnings per share are computed by dividing net income by the weighted-average number of common shares outstanding. Diluted earnings per share is computed by dividing net income by the weighted-average number of common shares outstanding adjusted to include the effect of potentially dilutive common shares. Potentially dilutive common shares include incremental shares issuable upon exercise of outstanding stock options, SARs and non-vested restricted common shares using the treasury stock method. The calculation of basic and diluted earnings per share was as follows:

	Three Months Ended June 30,					Six Months Ended June 30,			
(Dollars in thousands,	2	2008	2	2007	2008		2007		
except per share data)

Diluted	\$	0.19	\$	0.51	\$	0.73	\$	1.04	

7. Fair Values of Financial Instruments:

Effective January 1, 2008, Peoples adopted SFAS 157, which established a hierarchy for measuring fair value that is intended to maximize the use of observable inputs and minimize the use of unobservable inputs. This hierarchy uses three levels of inputs to measure the fair value of assets and liabilities as follows:

Level 1 – Quoted prices in active exchange markets for identical assets or liabilities; also includes certain U.S. Treasury and other U.S. Government and agency securities actively traded in over-the-counter markets.

Level 2 – Observable inputs other than Level 1 including quoted prices for similar assets or liabilities, quoted prices in less active markets, or other observable inputs that can be corroborated by observable market data; also includes derivative contracts whose value is determined using a pricing model with observable market inputs or can be derived principally from or corroborated by observable market data. This category generally includes certain U.S. Government and agency securities, corporate debt securities, derivative instruments, and residential mortgage loans held for sale.

Level 3 – Unobservable inputs supported by little or no market activity for financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation; also includes observable inputs for single dealer nonbinding quotes not corroborated by observable market data. This category generally includes certain private equity investments, retained interests from securitizations, and certain collateralized debt obligations.

Assets measured at fair value on a recurring basis comprise the following at June 30, 2008:

			Fair Value Measurements at Reporting Date					
					Using			
			Quote	ed Prices	Significant			
			in A	Active	Other		Significant	
			Marl	kets for	Observable	J	Unobservable	
			Identic	al Assets	Inputs		Inputs	
(Dollars in	Fa	ir Value	(L	evel 1)	(Level 2)		(Level 3)	
thousands)								
Available-for-sale	\$	576,207	\$	3,281 \$	563,89	1 \$	9,035	
investment								
securities								
Interest rate		3		_		3	_	
contract								
Total	\$	576,210	\$	3,281 \$	563,89	4 \$	9,035	

Table Of Contents

The investment securities measured at fair value utilizing Level 1 and 2 inputs are obligations of the U.S. Treasury, agencies and corporations of the U.S. government, including mortgage-backed securities, bank eligible obligations of any state or political subdivision in the U.S., bank eligible corporate obligations, including private-label mortgage-backed securities and common stocks issued by various unrelated banking holding companies. The fair values used by Peoples are obtained from an independent pricing service and represent either quoted market prices for the identical securities (Level 1 inputs) or fair values determined by pricing models that consider observable market data, such as interest rate volatilities, LIBOR yield curve, credit spreads and prices from market markers and live trading systems.

The investment securities measured at fair value using Level 3 inputs are comprised of four collateralized debt obligations, with a total book value of \$6.1 million, and a single corporate obligation, with a book value of \$1.0 million, for which there is not an active market. Peoples uses multiple input factors to determine the fair value of these securities. Those input factors are discounted cash flow analysis, structure of the security in relation to current level of deferrals and/or defaults, changes in credit ratings, financial condition of the debtors within the underlying securities, broker quotes for securities with similar structure and credit risk, interest rate movements and pricing of new issuances.

The following is a reconciliation of activity for assets measured at fair value based on significant unobservable (non-market) information:

	Investment Securities
Balance, January	\$ 9,004
1, 2008	
Transfers out of	(2,078)
Level 3	
Unrealized gain	2,109
included in	
comprehensive	
income	
Balance, June 30,	\$ 9,035
2008	

Certain assets were measured at fair value on a non-recurring basis at June 30, 2008. Loans held for investment that are considered impaired by Peoples are measured and reported at fair value through a specific allocation of the allowance for loan losses in accordance with the provisions of FASB Statement No. 114, Accounting by Creditors for Impairment of a Loan. The amount of impairment is calculated based on the fair value of the underlying collateral securing the loans. At June 30, 2008, impaired loans with an aggregate outstanding principal balance of \$12.2 million were measured and reported at an aggregate fair value of \$11.6 million, less estimated costs to sell of \$1.0 million (net value of \$10.6 million). For the three and six months ended June 30, 2008, Peoples recognized losses on these impaired loans totaling \$6.9 million and \$7.0 million, respectively, through the allowance for loan losses. Included in these amounts is a \$6.4 million loss recognized in the second quarter related to a single commercial real estate loan being charged down to the fair value of the collateral of \$6.5 million, less estimated costs to sell of \$0.3 million (net value of \$6.2 million). Management's determination of the fair value for these loans represents the estimated amount to be received from the sale of the collateral based on observable market prices and market value provided by

independent, licensed or certified appraisers (Level 2 Inputs).

8. Subsequent Events:

Peoples' investment portfolio includes preferred stock issued by the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac"). In the first half of 2008, Peoples reduced its holding of these preferred stocks due to the uncertainty surrounding these entities. At June 30, 2008, Peoples' remaining investment was limited to a single Fannie Mae issuance with a market value of \$1.9 million. In July 2008, Peoples sold the remaining preferred stock, which completely eliminated all investments in Fannie Mae and Freddie Mac preferred stocks. As a result of the July sales, Peoples will recognize a pre-tax loss of \$594,000 (\$386,000 after-tax) in the third quarter of 2008.

Forward-Looking Statements

Certain statements in this Form 10-Q which are not historical fact are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. Words such as "feels", "expects," "believes", "plans", "will", "would", "should", "could" and similar expressions are intended to identify these forward-looking statements but are not the exclusive means of identifying such statements. Forward-looking statements are subject to risks and uncertain—ties that may cause actual results to differ materially. Factors that might cause such a difference include, but are not limited to:

- (1) deterioration in the credit quality of Peoples' loan portfolio could occur due to a number of factors, such as adverse changes in economic conditions that impair the ability of borrowers to repay their loans, the underlying value of the collateral could prove less valuable than otherwise assumed and assumed cash flows may be less favorable than expected, which may adversely impact the provision for loan losses;
- (2) competitive pressures among financial institutions or from non-financial institutions, which may increase significantly;
 - (3) changes in the interest rate environment, which may adversely impact interest margins;
- (4) changes in prepayment speeds, loan originations, sale volumes, and charge-offs, which may be less favorable than expected and adversely impact the amount of interest income generated;
- (5) general economic conditions, either national or in the states in which Peoples does business, which may be less favorable than expected;
- (6) political developments, wars or other hostilities, which may disrupt or increase volatility in securities markets or other economic conditions;
 - (7) legislative or regulatory changes or actions, which may adversely affect the business of Peoples;
- (8) adverse changes in the conditions and trends in the financial markets, which may adversely affect the fair value of securities within Peoples' investment portfolio;
 - (9) a delayed or incomplete resolution of regulatory issues that could arise:
 - (10) Peoples' ability to receive dividends from its subsidiaries;
- (11) changes in accounting standards, policies, estimates or procedures, which may impact Peoples' reported financial condition or results of operations;
 - (12) Peoples' ability to maintain required capital levels and adequate sources of funding and liquidity;
- (13) the impact of reputational risk created by these developments on such matters as business generation and retention, funding and liquidity;
- (14) the costs and effects of regulatory and legal developments, including the outcome of regulatory or other governmental inquiries and legal proceedings and results of regulatory examinations; and
- (15) other risk factors relating to the banking industry or Peoples as detailed from time to time in Peoples' reports filed with the Securities and Exchange Commission ("SEC"), including those risk factors included in the disclosure under the heading "ITEM 1A. RISK FACTORS" of Part I of Peoples' 2007 Form 10-K.

All forward-looking statements speak only as of the execution date of this Form 10-Q and are expressly qualified in their entirety by the cautionary statements. Although management believes the expectations in these forward-looking statements are based on reasonable assumptions within the bounds of management's knowledge of Peoples' business and operations, it is possible that actual results may differ materially from these projections. Additionally, Peoples undertakes no obligation to update these forward-looking statements to reflect events or circumstances after the date of this Form 10-Q or to reflect the occurrence of unanticipated events except as may be required by applicable legal requirements. Copies of documents filed with the SEC are available free of charge at the SEC's website at www.sec.gov and/or from Peoples Bancorp's website – www.peoplesbancorp.com.

Business Overview

The following discussion and analysis of Peoples' unaudited Consolidated Financial Statements is presented to provide insight into management's assessment of the financial condition and results of operations.

Peoples makes available diversified financial products and services through 50 financial service locations and 38 ATMs in southeastern Ohio, northwestern West Virginia and northeastern Kentucky through its financial service units – Peoples Bank, National Association ("Peoples Bank"), Peoples Financial Advisors (a division of Peoples Bank) and Peoples Insurance Agency, Inc. Peoples Bank is a member of the Federal Reserve System and subject to regulation, supervision and examination by the Office of the Comptroller of the Currency.

Peoples' products and services include traditional banking products, such as deposit accounts, lending products and trust services. Peoples also offers a complete array of insurance products and makes available custom-tailored fiduciary and wealth management services. Peoples provides services through traditional offices, ATMs and telephone and internet-based banking. Brokerage services are offered exclusively through an unaffiliated registered broker-dealer located at Peoples' offices.

Table Of Contents

This discussion and analysis should be read in conjunction with the audited Consolidated Financial Statements, and notes thereto, contained in Peoples' 2007 Form 10-K, as well as the Consolidated Financial Statements, ratios, statistics and discussions contained elsewhere in this Form 10-O.

Critical Accounting Policies

The accounting and reporting policies of Peoples conform to US GAAP and to general practices within the financial services industry. The preparation of the financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could materially differ from those estimates. Management has identified the accounting policies that, due to the judgments, estimates and assumptions inherent in those policies, are critical to an understanding of Peoples' Consolidated Financial Statements and Management's Discussion and Analysis at June 30, 2008, which were unchanged from the policies disclosed in Peoples' 2007 Form 10-K.

Summary of Recent Transactions and Events

The following is a summary of recent transactions that have impacted or are expected to impact Peoples' results of operations or financial condition:

- o As disclosed in the Current Report on Form 8-K filed July 23, 2008, management determined a single commercial real estate construction loan, with a principal balance of \$12.6 million and secured by real estate located in west central Florida, was impaired during the second quarter of 2008. The loan was charged down to the fair value of the underlying collateral securing the loan of \$6.5 million, less estimated costs to sell of \$0.3 million (net value of \$6.2 million) in the second quarter and placed on non-accrual status effective June 30, 2008. Peoples recorded an additional provision for loan losses of \$4.5 million (\$2.9 million or \$0.28 per diluted share after-tax) in the second quarter of 2008 to maintain the adequacy of the allowance for loan losses as of June 30, 2008.
- o In the second quarter of 2008, Peoples sold preferred stocks issued by the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac") with a recorded value of \$2.7 million, at a pre-tax loss of \$191,000, which was partially offset by a \$138,000 pre-tax gain from the sale of mortgage-backed securities with a recorded value of \$18.7 million. At June 30, 2008, Peoples held in its investment portfolio Fannie Mae preferred stock with a market value of \$1.9 million, resulting in a \$260,000 other-than-temporary impairment charge in the second quarter of 2008. In July, Peoples sold the remaining preferred stock, which completely eliminated all holding of preferred stocks issued by Fannie Mae and Freddie Mac, and will recognize a pre-tax loss of \$594,000 (\$386,000 after-tax) in the third quarter of 2008.
- o In the first quarter of 2008, Peoples sold Fannie Mae and Freddie Mac preferred stocks with a recorded value of \$7.2 million to reduce Peoples' exposure to those entities. The book value of these preferred stocks had been reduced previously by \$3.2 million due to impairment charges recorded in the fourth quarter of 2007. Peoples also sold two US agency collateralized mortgage obligations, with an aggregate book value of \$7.6 million, to lessen the exposure to a future rising interest rate environment within Peoples' investment portfolio, as well as several small-lot mortgage-backed securities. The net impact of the first quarter portfolio management initiatives produced a net gain of \$159,000.
- o On January 12, 2007, Peoples announced the authorization to repurchase up to 425,000 of Peoples' outstanding common shares in 2007 from time to time in open market transactions (the "2007 Stock Repurchase Program"). On November 9, 2007, Peoples announced the authorization to repurchase up to 500,000 common shares upon the completion of the 2007 Stock Repurchase Program and continuing in 2008 until expiration on December 31, 2008. Peoples completed the 2007 Stock Repurchase Program on November 23, 2007. Through August 1, 2008,

Peoples had repurchased a total of 52,200 common shares, at an average price of \$23.58, under the stock repurchase plan announced November 9, 2007, of which 13,600 common shares were repurchased during the first quarter of 2008, at an average price of \$21.59. No common shares were repurchased during the second quarter of 2008. All of the common shares repurchased are held as treasury shares and available for future issuances of common shares in connection with equity awards granted from Peoples' equity plans and other general corporate purposes.

Table Of Contents

The impact of these transactions, where material, is discussed in the applicable sections of this Management's Discussion and Analysis.

Executive Summary

For the three months ended June 30, 2008, net income totaled \$2.0 million, or \$0.19 per diluted share, compared to \$5.3 million or \$0.51 per diluted share for the second quarter of 2007. On a year-to-date basis, net income totaled \$7.6 million and diluted earnings per share were \$0.73, versus \$11.0 million and \$1.04, respectively, for the same periods in 2007. Despite the lower earnings, Peoples achieved success in key areas, including deposit growth, increased net interest income, net interest margin expansion and lower operating expenses, which led to improved operating efficiency.

Net interest income totaled \$14.9 million for the second quarter of 2008, up 4% on a linked quarter basis and up 12% from a year ago, while net interest margin expanded to 3.61%, from 3.51% last quarter and 3.31% a year ago. On a year-to-date basis, net interest income grew 9% and net interest margin expanded 24 basis points. These improvements were largely attributable to the widening of credit spreads and Peoples' ability to grow lower cost retail deposits.

For the three and six months ended June 30, 2008, non-interest income, which excludes gains and losses on securities and asset disposals, totaled \$7.9 million and \$16.1 million, unchanged from a year ago, as higher trust and investment income and electronic banking ("e-banking") revenues were offset by lower insurance commissions and deposit account service charges. On a linked-quarter basis, non-interest income was down 4% in the second quarter of 2008, due to the recognition of annual performance based insurance commissions during the first quarter.

Total non-interest expense was \$13.0 million for the three months ended June 30, 2008, down 1% from the same period a year ago, due mostly to a modest decrease in professional fees. Compared to the first quarter of 2008, total non-interest expense decreased 5% in the second quarter, from lower incentive and stock-based compensation expenses and reduced professional fees. Through six months of 2008, non-interest expense totaled \$26.8 million versus \$26.5 million for the first half of 2007, with the increase largely the result of higher sales-based compensation expense and medical costs.

At June 30, 2008, total assets were \$1.91 billion, up \$21.3 million since year-end 2007. Gross portfolio loan balances decreased \$10.9 million in the second quarter, to \$1.10 billion at June 30, 2008, due to commercial loan payoffs during the quarter and the \$6.4 million charge down of the \$12.6 million impaired commercial real estate loan at June 30, 2008. Total investment securities grew to \$599.9 million at quarter-end, from \$574.6 million at March 31, 2008, and \$565.5 million at year-end 2007, attributable to purchases intended to offset the impact of the loan payoffs.

Total liabilities were \$1.71 billion at June 30, 2008, up \$22.7 million compared to December 31, 2007. Total deposit balances increased \$94.7 million since year-end 2007, to \$1.28 billion at June 30, 2008. Retail balances have increased \$114.5 million, or 10%, during 2008, due mostly to higher interest-bearing retail balances from Peoples attracting approximately \$62 million of funds from customers outside its primary market area. This growth also enabled Peoples to reduce higher rate brokered certificates of deposit balances by \$19.8 million. The retail deposit growth also contributed to the \$71.2 million, or 15%, reduction in borrowed funds since year-end 2007.

Total stockholders' equity has decreased \$1.4 million through six months of 2008, to \$201.4 million at June 30, 2008, as the \$2.9 million increase in Peoples' retained earnings was more than offset by the \$4.9 million reduction in accumulated comprehensive income due to the change in fair value of Peoples' available-for-sale investment portfolio.

RESULTS OF OPERATIONS

Net Interest Income

Net interest income, the amount by which interest income exceeds interest expense, remains Peoples' largest source of revenue. The amount of net interest income earned by Peoples each quarter is affected by various factors, including changes in market interest rates due to the Federal Reserve Board's monetary policy, the level and degree of pricing competition for both loans and deposits in Peoples' markets, and the amount and composition of Peoples' earning assets and interest-bearing liabilities.

- (1) Average balances are based on carrying value.
- (2) Interest income and yields are presented on a fully tax-equivalent basis using a 35% Federal statutory tax rate.
- (3) Nonaccrual and impaired loans are included in the average loan balances. Related interest income earned on nonaccrual loans prior to the loan being placed on nonaccrual is included in loan interest income. Loan fees included in interest income were immaterial for all periods presented.
- (4) Loans held for sale are included in the average loan balance listed. Related interest income on loans originated for sale prior to the loan being sold is included in loan interest income.

Table Of Contents

Net interest margin, calculated by dividing fully tax-equivalent ("FTE") net interest income by average interest-earning assets, serves as an important measurement of the net revenue stream generated by the volume, mix and pricing of Peoples' earning assets and interest-bearing liabilities. FTE net interest income is calculated by increasing interest income to convert tax-exempt income earned on obligations of states and political subdivisions to the pre-tax equivalent of taxable income using a 35% federal statutory tax rate. The following table details the calculation of FTE net interest income:

	Ju	Thene 30,		onths Endurch 31,	Six Months Ended June 30,					
(Dollars in thousands)	,	2008	2008		2007		2008			2007

Table Of Contents

Since August 2007, the Federal Reserve has reduced the target Federal Funds rate 325 basis points and the Discount Rate 400 basis points. These actions have caused a corresponding downward shift in short-term interest rates, while longer term rates have not decreased to the same extent. This steepening of the yield curve has provided Peoples with opportunities to improve net interest income and margin by taking advantage of lower-cost funding available in the market place and reducing certain deposit costs. While the reduction in short-term rates has caused asset yields to fall, credit spreads have widened limiting the downward repricing of many loans and tempering the overall decline.

Typically, Peoples' net interest income and margin are impacted by loan prepayment fees, interest reversals for loans placed on non-accrual status and interest collected on non-accrual loans. The net impact of these items resulted in \$226,000 additional income, or five basis points, in the second quarter of 2008. In comparison, second quarter 2007 net interest income and margin were reduced by \$309,000 or seven basis points, which included a \$211,000 or five basis points reduction in investment interest income to write-off interest receivable. The net impact in first quarter 2008 was additional income of \$126,000, or three additional basis points of net interest margin.

Average loan balances were down year-over-year for both the three and six months ended June 30, 2008, as the result of significant loan payoffs exceeding new originations. In response, Peoples increased its holdings of investment securities, producing a higher average balance during 2008. The yields on the recently purchased securities were lower than those of the paid off loans they replaced, which contributed to the lower yield on earning assets.

A key component of management's interest rate risk strategy has been to grow retail deposit balances in order to reduce the amount of, and reliance on, wholesale funding sources that typically carry higher market rates of interest. In addition, management has been adjusting the mix of wholesale funding by repaying higher-costing funds using other lower-cost borrowings. These efforts, coupled with lower short-term interest rates, produced a lower overall cost of funds over the first six months of 2008. In the second half of 2007, management initiated a strategy designed to reduce the impact of repricing of large blocks of funding by systematically borrowing funds in a given maturity range over a period of time, to create a stream of future maturities. This strategy accounts for much of the increase in average long-term borrowings compared to prior periods.

Although Peoples has successfully expanded net interest income and margin during the first half of 2008, future improvements may be limited as the downward repricing of loans and investments may outpace the reduction in rates on funding sources. In addition, Peoples' balance sheet has shifted to a generally neutral interest rate risk position in the one-year time horizon, which could mitigate the impact of future changes in market interest rates on Peoples' net interest income. Therefore, management believes net interest margin may compress slightly in the third quarter of 2008, with earning assets remaining comparable to second quarter levels.

Detailed information regarding changes in Peoples' Consolidated Balance Sheets can be found under appropriate captions of the "FINANCIAL CONDITION" section of this discussion. Additional information regarding Peoples' interest rate risk and the potential impact of interest rate changes on Peoples' results of operations and financial condition can be found later in this discussion under the caption "Interest Rate Sensitivity and Liquidity".

Provision for Loan Losses
The following table details Peoples' provision for loan losses:

		Th	ree Mo		,	Six Mont	hs End	ed		
	Jun	ie 30,	Marc	ch 31,	Jur	ie 30,	June 30,			
(Dollars in thousands)	20	800	20	2008		2007		2008		007

account overdrafts										

Edgar Filing: PEOPLES BANCORP INC - Form 10-Q

Provision for other loan losses	6,605	1,400	711	8,005	1,311
Total provision for loan	\$ 6,765	\$ 1,437	\$ 847	\$ 8,202	\$ 1,470
losses					
As a percentage of average	0.61%	0.13%	0.07%	0.74%	0.13%
gross loans					

The provision for loan losses is based on the results of management's formal quarterly analysis of the adequacy of the allowance for loan losses and procedural methodology that estimates the amount of credit losses probable within the loan portfolio. This analysis considers various factors that affect losses, such as changes in Peoples' loan quality, historical loss experience and current economic conditions. In 2008, Peoples recorded higher provisions for loan losses, with a significant portion related to two large, unrelated commercial real estate loans becoming impaired. The impact of the sluggish housing market and economic conditions on loan quality has also contributed.

Additional information regarding changes in Peoples' allowance for loan losses and loan credit quality can be found later in this discussion under the caption "Allowance for Loan Losses".

Table Of Contents

Non-Interest Income

Deposit account service charges also comprised a sizable portion of Peoples' second quarter non-interest revenue. The following table details Peoples' deposit account service charges:

		Thr	ee M	onths Er		Six Months Ended				
	Ju	ne 30,	Ma	rch 31,	Ju	ne 30,	Jun	e 30,		
(Dollars in	2	2008	2008		2	2007		2008	2	2007
thousands)										
Overdraft fees	\$	1,704	\$	1,504	\$	1,725	\$	3,208	\$	3,231

charges										
Total deposit	\$	2,375	\$	2,295	\$	2,445	\$	4,670	\$	4,813
account service										
charges										

The amount of deposit account service charges, particularly overdraft and non-sufficient funds fees, is largely dependent on the timing and volume of customer activity. As a result, the amount ultimately recognized by Peoples can fluctuate each quarter.

Insurance commissions also comprised a significant portion of Peoples' second quarter non-interest income. The following table details Peoples' insurance commissions:

		Thr	ee M	onths En		Six Months Ended				
	Ju	ne 30,	M	larch 31,	Jui	ne 30,		June	e 30,

commissions										
Total insurance	\$	2,225	\$	2,930	\$	2,409	\$	5,155	\$	5,359
commissions										

Property and casualty insurance sales commissions continue to be challenged by tighter pricing margins within the insurance industry caused by insurance companies reducing premiums to attract market share. The bulk of the performance based commission income is received annually by Peoples during the first quarter and is based on a combination of factors, including loss experience of insurance policies sold, production volumes and overall financial performance of the insurance industry during the preceding year.

The following tables detail Peoples' trust and investment revenues and related assets under management:

Edgar Filing: PEOPLES BANCORP INC - Form 10-Q

management								
Total managed assets	\$ 987,644		\$ 997,174		\$	51,021,393	\$	976,275

Both fiduciary and brokerage revenues are based in part on the value of assets under management. Over the last several quarters, Peoples has been successful in attracting new clients, which has increased assets under management over the past twelve months and generated additional revenues in 2008. However, the recent downturn in the financial markets has tempered the overall growth in assets and caused the decline in asset value since year-end 2007.

Table Of Contents

Peoples' e-banking revenues totaled \$1.0 million in the second quarter of 2008, up 13% over 2007's second quarter and up 10% from the first quarter of 2008. Through six months of 2008, e-banking revenues were up 12% compared to the first half of 2007. Sustained increases in debit card activity were the key drivers of the higher revenue levels in 2008. At June 30, 2008, Peoples had 40,761 deposit accounts with debit cards, or 59% of all eligible deposit accounts, compared to 38,415 accounts and a 55% penetration rate a year ago. Peoples' customers used debit cards to complete \$133.1 million of transactions for the six months ended June 30, 2008, up 20% from \$111.3 million a year ago.

Non-Interest Expense

Salary and employee benefit costs remain Peoples' largest non-interest expense, accounting for over 50% of the total non-interest expense. The following table details Peoples' salaries and employee benefit costs:

		Thr	ee Mo	onths End		Six Months Ended				
	June :	30,	M	larch 31,	Ju	ne 30,	Jur	ne 30,	Jui	ne 30,

Actual at end of period		554		556		556		554		556
Average during the period		556		556		555		556		552

Normal annual merit increases have resulted in higher base salaries during 2008, although mostly offset by larger amounts of salaries attributed to loan origination costs. While increased insurance and investment sales activity has produced additional sales-based compensation for both the three and six months ended June 30, 2008, this increase has been negated by lower incentive plan expense tied to Peoples' full year 2008 results of operation. Peoples' employee benefit costs consist of expenses related to Peoples' medical insurance, retirement savings and pension plans. While employee medical benefit costs have increased steadily in recent periods, Peoples has experienced only a modest increased in employee benefit costs, due to a lower pension expense.

The additional stock-based compensation expense in 2008 reflects the impact of annual equity-based incentive awards made in February 2008 to employees and directors. Compensation expense is generally recognized over the vesting period. However, Peoples must immediately recognize the entire expense for awards to employees who are eligible for retirement at the grant date, which accounted for \$127,000 of the first quarter 2008 expense and was the major driver of the decline during the second quarter of 2008. Stock-based compensation expense in each of the final two quarters of 2008 should be comparable to the second quarter expense based on the current equity awards outstanding.

Peoples' net occupancy and equipment expense was comprised of the following:

Edgar Filing: PEOPLES BANCORP INC - Form 10-Q

		Thr	ee M	onths En	Six Months Ended					
	Ju	June 30,		March 31,		June 30,		ne 30,	June 30,	
(Dollars in thousands)	2	8008	2	8008	2	007	2	2008	2	007
Depreciation	\$	550	\$	525	\$	556	\$	1,076	\$	1,093
Repairs and maintenance costs		360		372		358		732		711
		157		174		157		332		310
Net rent expense						10,

Total net occupancy and	\$	1,399	\$	1,426	\$	1,352	\$	2,825	\$	2,684
equipment expense										

While net occupancy and equipment costs for the three and six months ended June 30, 2008, were up compared to the same periods a year ago, management continues to monitor capital expenditures and explore opportunities to enhance Peoples' operating efficiency. Still, Peoples will continue to make investments designed to improve customer service and/or produce long-term benefits which may impact future expense levels.

Table Of Contents

In the second quarter of 2008, Peoples decreased professional fees 28% from the prior year and 25% on a linked quarter basis, through a lower utilization of external legal services. On a year-to-date basis, professional fees decreased 14% from a year ago, reflecting a general decline in the use of third-party professional services and consultants.

E-banking expense, which is comprised of bankcard and internet-based banking costs, was down 7% in the second quarter of 2008 compared to the second quarter of 2007, due largely to lower internet banking costs. On a year-to-date basis, e-banking expense is up 3%, primarily the result of customers completing a larger percentage of their transactions using their debit cards and Peoples' internet banking service. However, the increase was partially offset by Peoples first quarter 2008 adjustment of the litigation-related liabilities associated with its membership in the Visa USA network originally recorded in the fourth quarter of 2007.

Income Tax Expense

Peoples' effective tax rate was 26.0% on a year-to-date basis through June 30, 2008, which represents management's current estimate for the full year 2008 and an increase from the effective rate of 23.3% for the full year 2007. The higher projected effective tax rate for 2008 is based on the estimated utilization of tax credits in 2008 compared to 2007.

FINANCIAL CONDITION

Investment Securities

The following table details Peoples' available-for-sale investment portfolio:

(Dollars in thousands)	ane 30, 2008	arch 31, 2008	D	ecember 31, 2007	ine 30, 2007

During the first six months of 2008, management grew Peoples' investment portfolio to mitigate the impact of commercial loan payoffs on interest income levels and took action to reduce credit and interest rate exposures in Peoples' investment portfolio. In addition, management has reinvested the principal runoff from the portfolio into mortgage-backed securities and corporate securities. These actions account for much of the change in the investment portfolio composition compared to June 30, 2007. Peoples will continue to manage its investment portfolio and may adjust the size or composition based on, among other factors, changes in the loan portfolio, liquidity needs and interest rate conditions.

Peoples' investment in obligations of U.S. government-sponsored enterprises has included preferred stock issued by Fannie Mae and Freddie Mac. In the first half of 2008, Peoples reduced its holding of these preferred stocks due to the uncertainty surrounding these entities. At June 30, 2008, Peoples' remaining investment was limited to a single Fannie Mae preferred stock issuance with a fair value of \$1.9 million. Peoples recognized a \$260,000 other-than-temporary impairment charge in the second quarter of 2008 related to the remaining preferred stock. There were no other securities within the investment portfolio identified by management as other-than-temporarily impaired at June 30, 2008.

In July 2008, Peoples sold its remaining Fannie Mae preferred stock, which completely eliminates all investments in preferred stocks issued by Fannie Mae and Freddie Mac from its portfolio. As a result of the sale, Peoples will recognize a pre-tax loss of \$594,000 in the third quarter of 2008.

Peoples' other investment securities consist solely of shares of the Federal Home Loan Bank ("FHLB") of Cincinnati and Federal Reserve Bank of Cleveland. These restricted equity securities do not have readily determinable fair values and are carried at cost since Peoples does not exercise significant influence. The following table details Peoples' other investment securities:

Total percentage	100.0%	100.0%	100.0%	100.0%		

Overall, loan production remained steady in the first half of 2008, although payoffs exceeded new production causing a slight reduction in loan balances. Contributing to the decline in the second quarter was the \$6.4 million charge-down of the impaired commercial real estate construction loan indentified during the quarter, which is included in the real estate construction loan category above. This loan was originated in 2006 with an Ohio-based customer to finance the purchase of an apartment complex in the Tampa, Florida area and the subsequent conversion of a portion of the apartments to condominium units.

Residential real estate loan balances continue to be impacted by customer demand for long-term, fixed-rate mortgages, which Peoples generally sells to the secondary market with the servicing rights retained. Peoples' serviced real estate loan portfolio continues to increase steadily, reaching \$182.3 million at June 30, 2008 versus \$176.7 million at December 31, 2007 and \$172.3 million at June 30, 2007.

Peoples experienced consumer loan growth during the second quarter of 2008, due mainly to the efforts of Peoples' indirect lending area. Peoples' indirect lending activity involves the origination of consumer loans primarily through automobile dealers and comprises a significant portion of Peoples' consumer loans. Management remains committed to originating quality consumer loans based on sound underwriting practices and appropriate loan pricing discipline, which could limit opportunities for future growth.

Overall, Peoples has had minimal lending activity outside its primary market areas, with total out-of-market loans comprising \$108.2 million, or approximately 10% of total outstanding loan balances, at June 30, 2008. Included in this amount are \$68.8 million of loans located in Ohio, West Virginia and Kentucky. Of the remaining \$39.4 million of loans, the largest concentrations are in Arizona and Florida, with outstanding balances of \$10.1 million and \$8.5 million, respectively, at June 30, 2008. In all other states, the aggregate outstanding balance in the state was less than \$5 million at June 30, 2008. Except for the previously-mentioned impaired loan, these loans are performing in accordance with their original terms. The majority of the Arizona properties are retail and office centers in the Phoenix area securing loans to an experienced Ohio-based real estate developer.

Table Of Contents

Loan Concentration

Peoples' loans consist of credits to borrowers spread over a broad range of industrial classifications, with no concentration of loans to borrowers engaged in the same or similar industries that exceeds 10% of total loans. Peoples currently has no loans to foreign entities that exceed 1% of total assets. Peoples' largest concentration of loans consists of credits to borrowers in the lodging and lodging related industry. Those loans totaled \$50.5 million at June 30, 2008, or 10.1% of total outstanding commercial real estate loans, compared to \$50.6 million, or 9.8%, at December 31, 2007. Loans to borrowers in the assisted living facilities and nursing homes industry also represent a significant portion of Peoples' commercial real estate loans, totaling \$48.0 million at June 30, 2008 and \$54.0 million at December 31, 2007, or 9.6% and 10.5%, respectively. These credits were subjected to Peoples' normal commercial underwriting standards and did not present more than the normal amount of risk assumed in Peoples' other commercial lending activities.

These lending opportunities typically have arisen due to the growth of these industries in markets served by Peoples or in neighboring areas, and also from sales associates' efforts to develop these lending relationships. Management believes these industrial concentrations do not pose abnormal risk when compared to the risk assumed in other types of lending since these credits have been subjected to Peoples' normal commercial underwriting standards, which include an evaluation of the financial strength, market expertise and experience of the borrowers and principals in these business relationships. In addition, a sizeable portion of the loans to lodging and lodging-related companies is spread over various geographic areas.

charge-offs to average					
loans					

The higher gross charge-offs for the three and six months ended June 30, 2008, compared to the prior year periods, reflect the previously-mentioned \$6.4 million charge-down on the impaired \$12.6 million commercial real estate loan during the second quarter of 2008, which is included in the commercial category above. In comparison, first quarter 2008 gross charge-offs included a \$1.0 million loss on a single, unrelated \$8 million commercial loan relationship comprised of two loans secured by commercial real estate. Second quarter 2008 gross recoveries were comparable to a year ago, although down on a year-to-date basis, due to a \$609,000 recovery that occurred during the first quarter of 2007 on a group of commercial loans charged-off in 2002.

The allowance for loan losses is allocated among the loan categories based upon management's consistent, quarterly procedural discipline, which includes consideration of changes in loss trends and loan quality. However, the entire allowance for loan losses is available to absorb loan losses in any loan category. The following details the allocation of the allowance for loan losses:

(Dallars in thousands)	June 30,		M	March 31,		ecember 31,	Jì	une 30,
(Dollars in thousands)		2008		2008		2007		2007
Commercial	\$	12,415	\$	13,611	\$	14,147	\$	12,911
Real estate		1,339		983		419		958
Consumer		1,229		1,124		868		554
Overdrafts		246		235		284		269
Total allowance for	\$	15,229	\$	15,953	\$	15,718	\$	14,692
loan losses								
As a percentage of total loans		1.38%		1.43%		1.40%		1.33%

The significant allocation of the allowance to commercial loans reflects the higher credit risk associated with this type of lending and the size of this loan category in relationship to the entire loan portfolio. The allowance allocated to the real estate and consumer loan categories is based upon Peoples' allowance methodology for homogeneous pools of loans, which includes consideration of changes in loss experience and total loan balances.

Asset quality remains a key focus, as management emphasizes loan underwriting quality more than loan growth. The following table details Peoples' nonperforming assets:

	Jun	e 30,	Mar	ch 31,	De	cember 31,	Jur	ie 30,
(Dollars in thousands)	20	800	20	800	2	007	2	007

Table Of Contents

The increased amount of non-performing loans during the first half of 2008 was due to the previously-mentioned impaired loan written down to \$6.2 million net value being placed on nonaccrual status during the second quarter and a \$7.0 million, unrelated commercial loan being placed on nonaccrual status during the first quarter of 2008. No specific reserves were made for these loans at June 30, 2008, since they have been charged down to the estimated net realizable fair value of the underlying collateral, resulting in a lower allowance for loan losses to nonperforming loans ratio at June 30, 2008.

The following tables summarize loans classified as impaired:

	Ju	ne 30,	Ma	rch 31,	D	ecember 31,	Ju	ne 30,
(Dollars in	2	2008	2	2008	2	2007	2	2007

impaired loans									
Interest income	\$	227	\$	344	\$	317	\$	678	
recognized on									
impaired loans									

Peoples has not allocated a portion of the allowance for loan losses to certain impaired loans because those loans either have been written-down previously to the amount expected to be collected or possess characteristics indicative of Peoples' ability to collect the remaining outstanding principal from the sale of collateral and/or enforcement of guarantees by the principals.

Overall, management believes the allowance for loan losses was adequate at June 30, 2008, based on all information currently available. Still, there can be no assurance that Peoples' allowance for loan losses will be adequate to cover future losses or that the amount of nonperforming loans will remain at current levels, especially considering the current economic uncertainty that exists and the concentration of commercial loans in Peoples' loan portfolio.

Deposits

The following table details Peoples' deposit balances:

June 30,	March 31,	December 31,	June 30,

The growth in retail certificates of deposit ("CDs") during the first six months of 2008 has been largely attributable to Peoples attracting approximately \$62 million of funds from customers outside its primary market area, primarily school districts, government entities and credit unions located in the Midwest, instead of using higher-costing brokered CDs. Money market balances were up at June 30, 2008, due to Peoples offering more competitive rates. The fluctuations in interest-bearing transaction accounts primarily reflect seasonal changes in governmental deposit balances related to the timing of tax revenue collections and subsequent disbursements. Non-interest-bearing deposits grew 9% during the second quarter of 2008, attributable to higher commercial balances. Since year-end 2007, non-interest-bearing balances have increased 10%, from higher consumer and commercial balances of \$10.3 million and \$8.4 million, respectively.

The retail deposit growth has allowed Peoples to reduce brokered CD balances since June 30, 2007. The majority of \$39.8 million of brokered CDs at June 30, 2008, will mature during the third quarter of 2008. Management anticipates Peoples will be able to replace those funds with other, lower-costing funds, such as retail deposits or borrowed funds, assuming interest rates do not rise rapidly.

Table Of Contents

Borrowed Funds

The following details Peoples' short-term and long-term borrowings:

(Dollars in thousands) Short-term borrowings:	June 30, 2008	-	March 31, 2008	D	ecember 31, 2007	ine 30, 2007

Total borrowed	\$ 405,733	\$	415,311	\$	476,980	\$ 439,208
funds						

Since December 31, 2007, Peoples has reduced the level of borrowed funds, primarily its short-term FHLB advances, using the retail deposit growth. The short-term FHLB advances consist of overnight borrowings and fluctuate daily based on Peoples' liquidity needs. Long-term borrowings have increased since June 30, 2007, in connection with management's interest rate management strategies. The level and composition of Peoples' borrowed funds may change in future quarters, as management will continue to use a combination of short-term and long-term borrowings to manage the interest rate risk of the balance sheet.

Capital/Stockholders' Equity

In the second quarter of 2008, Peoples increased its dividend 4.5% to \$0.23 per share, from the \$0.22 per share declared for both the first quarter of 2008 and second quarter of 2007. Through six months of 2008, Peoples declared dividends of \$4.7 million, or 61.5% of earnings, compared to \$4.7 million, or 42.3% of earnings, a year ago. Management anticipates Peoples continuing its 42-year history of consistent dividend growth in future periods, although the restrictions and limitations disclosed in Peoples' 2007 Form 10-K may prohibit Peoples from paying dividends even when sufficient cash is available.

At June 30, 2008, Peoples' tangible capital ratio, defined as tangible equity as a percentage of tangible assets, was 7.30% versus 7.42% at year-end 2007 and 7.14% at June 30, 2007, due to a greater increase in tangible equity compared to tangible assets versus June 30, 2007. In addition, both Peoples and Peoples Bank were well above the minimum standards for a well-capitalized institution under the regulatory capital guidelines.

During 2008, Peoples has been less active with treasury stock purchases, as management has focused on maintaining Peoples' strong capital position, especially considering the uncertainty that currently exists in the financial markets and

economy as a whole. Through six months of 2008, Peoples has repurchased 13,600 of its common shares, at an average price of \$21.59, under its announced stock repurchase program, compared to 240,000 common shares, at an average price of \$28.15, in the first half of 2007.

Interest Rate Sensitivity and Liquidity

While Peoples is exposed to various business risks, the risks relating to interest rate sensitivity and liquidity are typically the most complex and dynamic risks that can materially impact future results of operations and financial condition. The objective of Peoples' asset/liability management ("ALM") function is to measure and manage these risks in order to optimize net interest income within the constraints of prudent capital adequacy, liquidity and safety. This objective requires Peoples to focus on interest rate risk exposure and adequate liquidity through its management of the mix of assets and liabilities, their related cash flows and the rates earned and paid on those assets and liabilities. Ultimately, the ALM function is intended to guide management in the acquisition and disposition of earning assets and selection of appropriate funding sources.

Table Of Contents

Interest Rate Risk

Interest rate risk ("IRR") is one of the most significant risks for Peoples, and the entire financial services industry, primarily arising in the normal course of business of offering a wide array of loans and deposits to its customers, as well as the diversity of its own investment portfolio and borrowed funds. IRR is the potential for economic loss due to future interest rate changes that can impact both the earnings stream as well as fair values of financial assets and liabilities. Peoples' exposure to IRR is due primarily to differences in the maturity or repricing of earning assets and interest-bearing liabilities. In addition, other factors, such as prepayments of loans and investment securities or early withdrawal of deposits, can expose Peoples to IRR and impact interest costs or revenue streams.

Peoples has charged the Asset-Liability Committee (the "ALCO") with the overall management of IRR. Peoples' ALCO has established an IRR management policy that sets minimum requirements and guidelines for monitoring and managing the level and amount of IRR. There have been no material changes to these policies or methods used by the ALCO to assess IRR from those disclosed in Peoples' 2007 Form 10-K.

While the ALCO uses various methods to assess and monitor the level of Peoples' IRR, the ALCO predominantly relies on simulation modeling in its overall management of IRR since it estimates the impact of potential changes in interest rates on Peoples' future earnings and projected fair value of equity. The following table illustrates the estimated impact of an immediate and sustained change in interest rates (dollars in thousands):

Change	Estim	ated (Dec	rease) Increa	ase	Estimated Decrease				
in									
Interest	in	Net Inter	est Income		in Economic Value of Equity				
Rate									
(in									
Basis	June 30,	2008	December 3	31, 2007	June 30,	2008	December 3	December 31, 2007	
Points)									
200	\$ (2,521)	(4.4)%	\$ (5,276)	(9.7)%	\$(12,278)	(4.6)%	\$(19,186)	(7.6)%	
100	(747)	(1.3)%	(2,264)	(4.2)%	(4,259)	(1.6)%	(7,930)	(3.1)%	
(100)	65	- %	1,152	2.1 %	(3,177)	(1.2)%	(3,691)	(1.5)%	
(200)	\$ (1,322)	(2.3)%	\$ 1,234	2.3 %	\$(20,075)	(7.5)%	\$(15,915)	(6.3)%	

This table uses a standard, parallel shock analysis for assessing the IRR to net interest income and the economic value of equity. A parallel shock means all points on the yield curve (one year, two year, three year, etc.) are directionally shocked the same amount of basis points up or down (one basis point is equal to 0.01%). Although a parallel shock table can give insight into the current direction and magnitude of IRR inherent in the balance sheet, interest rates do not always move in a complete parallel manner during interest rate cycles. These nonparallel movements in interest rates, commonly called yield curve steepening or flattening movements, tend to occur during the beginning and end of an interest rate cycle. To understand Peoples' exposure to nonparallel rate shifts, management conducts more advanced interest rate shock scenarios to better understand its exposure to these types of shifts.

In the first half of 2008, Peoples' balance sheet became less liability sensitive due to management's efforts to move to a more neutral IRR position, given the uncertainty regarding future interest rate changes. Management selectively increased and extended the maturities of borrowed funds and retail CDs, thereby reducing its level of overnight funding. Due to these changes in its liability mix, management has reduced Peoples' net interest income at risk in an "up 100 basis point" rate shock as of June 30, 2008. In the last six months, these shifts changed the net interest income at risk in a "down 100 basis point" rate shock from an increase to basically neutral as of June 30, 2008.

While Peoples' balance sheet positioning at June 30, 2008, shows a reduction in net interest income for various parallel rate shock scenarios, these shocks do not take into account Peoples positioning along the curve or ALCO's ability to

take appropriate actions, when necessary, to further minimize the impact of changes in interest rates on future earnings. Management believes a further reduction in short-term rates does not guarantee a similar decline in long term rates, given the current low rates across the yield curve and the presence of core inflation. As a result, Peoples could experience minimal change in net interest income if a further decline in overnight interest rates was to occur.

Due to the current steep yield curve and prospects for future rate increases, Peoples continues to maximize net interest income in the base case while protecting income against future rate increases. While there is uncertainty regarding the timing of future rate increases, management believes the current steep yield curve is signaling the next short-term rate movement to be up.

Table Of Contents

Liquidity

In addition to IRR management, another major objective of the ALCO is to maintain a sufficient level of liquidity. The ALCO defines liquidity as the ability to meet anticipated and unanticipated operating cash needs, loan demand and deposit withdrawals, without incurring a sustained negative impact on profitability. The ALCO's liquidity management policy sets limits on the net liquidity position of Peoples and the concentration of non-core funding sources, both wholesale funding and brokered deposits.

For the six months ended June 30, 2008, Peoples' operating activities provided net cash of \$17.9 million and financing activities provided \$19.0 million, of which \$35.5 million was used in Peoples' investing activities. As a result, total cash and cash equivalents increased \$1.3 million since year-end 2007. Purchases of new investment securities exceeded the cash flows from maturities, calls and principal payments and accounted for most of the cash used in investing activities. In comparison, cash and cash equivalents decreased \$2.0 million in the first half of 2007. Financing activities consumed net cash of \$26.7 million, due mostly to a reduction in deposit balances, while cash provided by operating and investing activities was \$11.7 million and \$13.0 million, respectively. The cash from investing activities was comprised mostly of payoffs and principal payments on loans.

At June 30, 2008, Peoples had available borrowing capacity of approximately \$336 million through its wholesale funding sources, up approximately \$75 million compared to year-end 2007. Borrowing capacity increased as the newly added retail deposits were used to pay down short-term borrowings. Peoples also had unpledged investment securities of approximately \$60 million that can be utilized as an additional source of liquidity, which was unchanged from December 31, 2007. Management believes the current balance of cash and cash equivalents, along with the availability of other funding sources, will allow Peoples to meet anticipated cash obligations, as well as special needs and off-balance sheet commitments.

Off-Balance Sheet Activities and Contractual Obligations

Peoples routinely engages in activities that involve, to varying degrees, elements of risk that are not reflected in whole or in part in the Consolidated Financial Statements. These activities are part of Peoples' normal course of business and include traditional off-balance sheet credit-related financial instruments, interest rate contracts and commitments to make additional capital contributions in low-income housing tax credit investments. Traditional off-balance sheet credit-related financial instruments continue to represent the most significant of Peoples' off-balance sheet exposure. The following table details the total contractual amount of loan commitments and standby letters of credit:
