Item 8.01 Other Events.

New Mexico Rate Case Decision

On June 8, 2016, the New Mexico Public Regulation Commission (the “NMPRC”) issued a final order (the “Final Order”) approving an annual increase for El Paso Electric Company (the “Company”) in non-fuel base rates of approximately \$1.1 million in Case No. 15-00127-UT.

On May 11, 2015, the Company filed with the NMPRC for an annual increase in non-fuel base rates of approximately \$8.6 million or 7.1%. Subsequently, the Company reduced its requested increase in non-fuel base rates to approximately \$6.4 million. On February 16, 2016, the Hearing Examiner assigned to the rate case issued to the NMPRC a Recommended Decision proposing an annual increase in non-fuel base rates of approximately \$640,000 and a return on equity of 9.60%. The Final Order deviated from the Hearing Examiner’s Recommended Decision by lowering the return on equity to 9.48% and changing the treatment of the pension and other post-employment benefit liability and other deferred taxes. The NMPRC has required that the Company provide additional information on the pension and other post-employment benefit liability. The primary driver of the rate increase authorized by the Final Order was the inclusion in rate base of 100 percent of the Company’s new plant in service since 2009, including the costs of Montana Power Station Units 1 and 2 and associated transmission lines and common facilities and the Eastside Operations Center. The Company currently anticipates that new non-fuel base rates in New Mexico will become effective early in the third quarter of 2016. The Company expects to file its next rate case in New Mexico in early 2017 based upon a September 30, 2016 test-year.

Approximately 24% of the Company’s customers are in New Mexico.

Item 9.01 Financial Statements and Exhibits.
