<u>PART 1</u>

ITEM 2	<u>1.</u>	<u>BUSIN</u>	ESS.									
<u>History</u>	<u>,</u>											

Supreme Industries, Inc., a Delaware Corporation (the "Company" or "Supreme"), is one of the nation's leading manufacturers of specialized vehicles, including truck bodies and shuttle buses. The Company was incorporated in 1979 and originally had one operating subsidiary, TGC Industries, Inc., which was spun-off to stockholders of the Company effective July 31, 1986.

Supreme Corporation, the Company's wholly-owned operating subsidiary, was formed in January 1984 to acquire a company engaged in the business of manufacturing, selling and repairing specialized truck bodies, shuttle buses and related equipment.

Financial Information About Operating Segments

The Company has two operating segments, specialized vehicles and vertically integrated fiberglass products. The vertically integrated fiberglass products segment does not meet the quantitative thresholds for separate disclosure.

General Description of the Company's Business

The specialized vehicle industry consists of companies that manufacture and/or distribute specialized truck bodies and shuttle buses. Depending on the product, it is either built directly on a truck chassis or built separately and installed at a later date. The truck chassis, which consists of an engine, frame with wheels, and in some cases a cab, is manufactured by third parties who are major automotive or truck companies. Such companies typically do not build specialized truck bodies. See "Competition."

Supreme's products are medium-priced although prices can range from \$1,000 to \$175,000. Supreme's truck bodies are offered in aluminum or fiberglass reinforced plywood panel ("FRP") construction and are available in lengths of 9 to 45 feet and heights up to 13 feet, 6 inches. Examples of optional equipment offered by Supreme include lift

gates, cargo-handling equipment, customized doors, special bumpers, ladder racks, and refrigeration equipment, which are configured with the truck bodies to meet the end-user's needs.

Supreme also makes its own fiberglass wind deflectors under the name of Fuel Shark, which reduce wind resistance and improve fuel efficiency. Supreme is not in the business of manufacturing recreational vehicles or long-distance truck-trailers. The following is a brief summary of Supreme's products:

- <u>Van bodies.</u> Supreme's van bodies are typically fabricated up to 28 feet in length with pre-painted aluminum or FRP panels, aerodynamic front and side corners, hardwood floors and various door configurations to accommodate end-user loading and unloading requirements. This product is used for diversified dry freight transportation.
-
- Iner-City® cutaway van bodies. An ideal route truck for a variety of commercial applications, the Iner-City's aluminum or FRP bodies are manufactured on cutaway chassis, which allow access from the cab to the cargo area. Borrowing many design elements from Supreme's larger van body, the Iner-City is shorter in length (10 to 17 feet) than a van body.

Page 2 of 56

 Spartan service bodies. Built on the cutaway chassis out of durable FRP, the Spartan Service Body is a virtual workshop on wheels. In lengths from 10 to 14 feet, the Spartan's selection of compartments, shelves, doors, and pre-designed options provides job-site protection from the weather while offering a secure lockable workspace.

 Spartan cargo vans. Built on a cutaway chassis and constructed of FRP, the Spartan Cargo Van provides the smooth maneuverability of a commercial van with the full-height, spacious cargo area of a truck body. In lengths of 10 to 14 feet and available with a variety of pre-designed options, the Spartan Cargo Van is a bridge product for those moving up from a traditional cargo van into the truck body category.

- <u>Kold King® insulated van bodies.</u> Kold King insulated bodies, in lengths up to 28 feet, provide versatility and dependability for temperature controlled applications. Flexible for either hand-load or pallet load requirements, they are ideal for multi-stop distribution of both fresh and frozen products.
-
- IceOTherm insulated bodies.IceOTherm is the high efficiency, lightweight insulated body that
provides superior load protection for hand-load applications. Available in lengths of 10 to 16 feet,
the IceOTherm's unique urethane foam and fiberglass pultrusion body design creates a lighter
body, superior thermal efficiency, and a cleaner appearance than traditional insulated bodies.
-

- <u>Stake bodies.</u> Stake bodies are flatbeds with various configurations of removable sides. The stake body is utilized for a broad range of agricultural and construction industries transportation needs.
-
- <u>Armored trucks.</u> Supreme's armored trucks are built to customer specifications in either aluminum, galvaneal or stainless steel.
-
- <u>StarTrans® shuttle buses.</u> The StarTrans® shuttle buses have seating capacities for 12 to 29 & shutper people and are offered with a variety of seating arrangements and with options such as wheelchair lifts, custom interiors, and special exterior paint schemes. The shuttle bus line features an improved aerodynamic exterior design and is intended for use by hotels, nursing homes, car leasing companies, and airport-related users.
-

 StarTrans® mid-size buses. Supreme's StarTrans® mid-size buses (President and Ambassador)

 are offered in lengths of up to 31 feet with capacities of up to 35 passengers. This product serves
 the public transit and tour markets and provides the Company's dealer network with a more
 comprehensive product line.

-
- <u>StarTrans® trolleys.</u> Supreme's StarTrans® trolley line is similar in size to the mid-size bus line but resembles a San Francisco trolley car. It is marketed to resort areas, theme parks and cities desiring unique transportation vehicles.
-
- Kold King®, Nordica®, Iner-City®, Spartan, StarTrans®, and Fuel Shark are trademarks used by Supreme in its marketing of truck bodies and buses. Kold King®, Nordica®, Iner-City®, and StarTrans® are trademarks registered in the U.S. Patent and Trademark Office.

Page 3 of 56

Some examples of specialized vehicles that are not manufactured by Supreme are dump bodies, utility bodies and garbage packers. Neither Supreme nor any of its competitors manufacture every type of specialized vehicle. Supreme intends to continue to expand its products line, but there is no assurance that it will do so.

Manufacturing

Supreme's manufacturing facilities are located in Goshen, Indiana; Griffin, Georgia; Cleburne, Texas; Moreno Valley, California; Jonestown, Pennsylvania and Woodburn, Oregon. Supreme's management estimates that the capacity utilization of its plants and equipment ranges from 60% to 90% of capacity when annualized on a one-shift basis. At various times during the year, several of the Company's plants operate at 100% capacity to meet fleet requirements.

Supreme builds specialized truck bodies and installs other equipment on truck chassis, most of which are provided by bailment pool arrangements or are owned by dealers or end-users. These truck bodies are built on an assembly line from engineered structural components, such as floors, roofs, and wall panels. These components are manufactured from Supreme's proprietary designs and are installed on the truck chassis. Supreme then installs optional equipment and applies any special finishes that the customer has specified. At each step of the manufacturing and installation process, Supreme conducts quality control procedures to ensure that the products meet its customers' specifications. Supreme's products are generally produced to firm orders and are designed and engineered by Supreme. Order levels will vary depending upon price, competition, prevailing economic conditions and other factors.

Supreme is more vertically integrated than many of its competitors. The Company manufactures its own fiberglass reinforced plywood, fiberglass parts, and has extensive roll forming and metal bending capabilities. A portion of the excess capacity of these fabrication capabilities is used to supply products to the recreational vehicle and marine industries. These supply facilities are located in Goshen and Ligonier, Indiana.

Supreme provides limited warranties against construction defects in its products. These warranties generally provide for the replacement or repair of defective parts or workmanship for periods of up to five years following the date of retail sale.

Supreme generally does not purchase vehicle chassis for its inventory. Supreme accepts shipment of vehicle chassis owned by dealers or end-users, for the purpose of installing and/or manufacturing its specialized truck bodies and buses on such chassis. In the event of a labor disruption or other uncontrollable event adversely affecting the limited number of companies which manufacture and/or deliver such chassis, Supreme's level of manufacturing could be substantially reduced. The Company has established relationships with all major chassis manufacturers, and in the event of a disruption in supply from one manufacturer the Company would attempt to divert its demand to the other manufacturers. Approximately 30% of the chassis involved in Supreme's manufacturing have been secured through bailment or consignment agreements with three major chassis manufacturers that provide for truck chassis pools at each of Supreme's manufacturing facilities.

					р	4 6 5	(

Page 4 of 56

Raw Materials

Supreme does not have any long-term raw material contracts and is dependent upon suppliers of lumber, fiberglass, aluminum and steel for its manufacturing. However, there are several readily available sources for these raw materials. Supreme's operations could be affected by labor disruptions at its raw material suppliers or freight carriers. The single greatest threat to Supreme would be the disruption of chassis availability since virtually all of Supreme's products are built on chassis. The Company believes that it enjoys good relationships with all chassis manufacturers that supply the chassis upon which the Company's products are built. In the event of a problem with one chassis supplier, the Company would attempt to divert its products to other chassis suppliers.

 Marketing

Supreme normally sells the vehicle and/or equipment that has been installed on the chassis to either truck dealers, truck equipment distributors, fleet leasing companies or directly to end-users. Truck bodies purchased by a truck dealer from Supreme are sold by the dealer to its own customers. Since Supreme or its distributors (but not the truck dealers) generally service all Supreme products sold by the truck dealers, each truck dealer is normally located within relatively close geographic proximity to Supreme or the distributor supplying such dealer.

Supreme's distributor/dealer network consists of approximately 40 bus distributors, a limited number of truck equipment distributors and approximately 500 truck dealers. Management believes that this large distributor/dealer network, coupled with Supreme's geographically-dispersed plant and distribution sites, gives Supreme a distinct marketing advantage over its competitors. Supreme generally delivers its products within 4 to 8 weeks after the receipt of orders.

Supreme markets products in geographic areas where the Company does not have a strong distributor. The Company currently has distribution/mounting facilities in or near the cities of St. Louis, Missouri; Louisville, Kentucky; Cleveland and Columbus, Ohio; Orlando, Florida; Houston and San Antonio, Texas; Denver, Colorado; San Francisco, California and Harrisville, Rhode Island.

Approximately 85 employees are engaged in direct sales. Supreme engages in direct advertising in trade publications, trade shows and cooperative advertising campaigns with distributors.

Competition

The competitive nature of the specialized vehicle industry creates a number of challenges for the Company. Important factors include product pricing, quality of product, lead times, geographic proximity to customers and the ability to manufacture a product customized to customer specifications. Management believes that the Company has a competitive advantage in each of these areas due to its years of experience in the industry, established dealer/distributor relationships, strong relationships with chassis manufacturers and its nationwide presence. However, specialized vehicles are produced by a number of smaller, regional companies, which create product pricing pressures that could adversely impact the Company's profits. Chassis manufacturers have not generally shown an interest in manufacturing specialized vehicles, including truck bodies and shuttle buses, because such manufacturers' highly-automated assembly line operations do not lend themselves to the efficient production of a wide variety of highly specialized vehicles with various options and equipment.

Page 5 of 56

<u>Trademarks</u>

Working Capital

The Company utilizes its revolving line of credit to finance its accounts receivable and inventories. The Company had working capital of \$50.9 million and \$42.9 million at December 25, 2004 and December 27, 2003, respectively.

Major Customers

No single customer, or group of customers, accounted for 10% or more of the Company's revenues for the fiscal years ended in 2004, 2003 and 2002. The Company's export sales are not significant.

Environment Regulation

The Company's manufacturing operations are subject to federal, state, and local statutes and regulations relating to the protection of the environment, work site safety standards, and product size and weight limitations. Such regulations increase the Company's cost of doing business. Because other companies are subject to similar regulations, such regulations are not believed to have an adverse effect on the Company's competitive position.

Employees

As of December 25, 2004 and December 27, 2003, the Company employed approximately 2,300 and 2,000 employees, respectively, none of whom are represented by a collective bargaining unit. The Company considers its relations with its employees to be satisfactory.

Back Log

The Company's backlog of firm orders was \$89.1 million at December 25, 2004 compared to \$66.1 million at December 27, 2003.

 (1) During the third quarter of 2002, the Company ceased business operations at its facility in Wilson, North Carolina. The property has been listed for sale; however, the Company has been unable to sell the property because of the economic conditions and excess building facilities in this region of the country.

Page 8 of 56

ITEM 3.LEGAL PROCEEDINGS.

The Company is subject to various investigations, claims and legal proceedings covering a wide range of matters that arise in the ordinary course of its business activities. Each of these matters is subject to various uncertainties, and it is possible that some of these matters may be resolved unfavorably to the Company. The Company has established accruals for matters that are probable and reasonably estimable. Management believes that any liability that may ultimately result from the resolution of these matters in excess of accruals and or amounts provided by insurance coverage will not have a material adverse effect on the consolidated financial position or results of operations of the Company.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS. & mbsp

No matters were submitted by the Company to a vote of the Company's security holders, through the solicitation of proxies or otherwise, during the fourth quarter of the year ended December 25, 2004.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER

MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

13

The Company's Class A Common Stock is traded on the American Stock Exchange (ticker symbol STS). The number of record holders of the Class A Common Stock as of March 7, 2005 was approximately 295. Due to the number of shares held in nominee or street name, it is likely that there are more than 295 beneficial owners of the Company's Class A Common Stock.

The Company's Class A Common Stock closed at a price of \$6.70 per share on the American Stock Exchange on March 7, 2005 on which date there were 10,105,328 shares of Class A Common Stock outstanding. High and low sales prices of the Class A Common Stock for the two-year period ended December 25, 2004 were:

				2004				2003

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL

 <u>CONDITION AND RESULTS OF OPERATIONS.</u>

 <td

Revenue includes net sales and other income. Net sales for the year ended December 25, 2004 were \$307.3 million, an increase million over the \$224.9 million for the year ended December 27, 2003. All of the Company's major product lines increased over experienced in 2003. The largest increase in net sales was in the Company's dry freight product line which grew \$61.6 million. The balance of the increase in net sales was spread over its remaining product lines. The opening of the Company's Northwest facility in Oregon contributed \$9.9 million to the increase in net sales, primarily in the dry freight area.

The improving market conditions experienced in the fourth quarter of 2003 carried over into 2004. On a unit basis, new orders approximately 52%, and backlog grew to a record \$89.1 million. The Company anticipates demand to remain strong barring a repercussions from the significant price increases passed on to its customers during the year. While the Company implemented price increases during the year, these price increases only impacted revenues by an estimated 3% to 4% due to the Company's backlog and policy of honoring quotes outstanding at the time of the increase.

					De	ecember 2	25,		D	ecember 2	27,		
						2004				2003			
			Materials			57.6%				53.9%			
			Direct Labor				15.0				14.8		.2
			Overhead				14.3				15.4		-1.1
			Delivery		<u>3.1</u>				<u>3.2</u>				<u>1</u>
						<u>90.0%</u>				<u>87.3%</u>			
													&nl
			Gross Profit			<u>10.0%</u>				<u>12.7%</u>			
													&nl

The Company experienced rapidly escalating raw material costs throughout 2004. The most significant increases were encoun Company's steel purchases which aggregate approximately 20% of total raw material purchases. Steel costs, on average, increasproximately 71% during 2004 from the levels paid during 2003. Cost of all other major raw material items also increased si in 2004 from the levels experienced in 2003. Cost of resins and gelcoats used in the Company's composites products increased 21%, respectively. Plywood costs spiked as high as 31%, but leveled off at 19% over prices paid in 2003. Other items experience increases as compared with 2003 were flooring at 10% and aluminum at 8 to 9%.

The Company's major suppliers indicated that they do not see an end to escalating raw material costs. Raw materials anticipat most affected in 2005 are steel, resins and gelcoats. The Company is seeking to purchase its raw material requirements at the l and prices possible and is expanding vendor relationships both domestically and internationally.

Page 11 of 56

The slight increase in direct labor of .2% was attributed primarily to startup and training costs at the Company's bus operation California, its new Oregon facility and, to a lesser extent, the Armored plant startup in Texas.

Both overhead and delivery expenses improved as a percentage of net sales in 2004 when compared to 2003. The improvement overhead was due to the fixed nature of certain expenses that do not fluctuate when volume changes. The Company has been unable since 2000 by rising overhead expenses that the Company has been unable to pass on due to competitive market con categories that have felt the most pressure are commercial and general liability insurance, workers' compensation insurance an health insurance.

To improve gross profit and mitigate rising material costs, the Company implemented a series of price increases beginning in 2004. The most recent price increase was effective January 1, 2005. The cumulative effect of these price increases now totals approximately 20%. Product lines containing large amounts of steel and composite materials had price increases significantly average. Prior to the March increases, the Company had not had a price increase since June 2000.

Industry practice is such that price increases take effect approximately 30 days after announcement. In addition, firm backlogg historically have been honored and not subject to price increases for either escalating material cost increases or otherwise. As significant backlogs (approximately 70 to 90 days throughout the year), each of the price increases did not take effect for 4 to after announcement. Therefore, we estimate that approximately \$11.4 million of material cost increases were not recovered th increases in 2004. To help eliminate the effect of the above industry practices, the Company now makes its price increases eff immediately, while attempting to include escalation provisions in large fleet orders. With regard to dealer and direct non-fleet business, the Company is evaluating various strategies for more post-order pricing flexibility. Changing historical industry practices absorption due to the delay in effectiveness of price increases. In addition, competitive conditions in certain markets and product the net selling price the Company may realize and it is difficult to predict the effect our price increases may have on customer

Selling, general and administrative expenses were \$24.3 million or 7.9% of net sales in 2004 compared to \$22.2 million or 9.9 sales in 2003. The largest component of selling, general and administrative expense was compensation related expense which approximately 72% and 71% of total selling, general and administrative expenses in 2004 and 2003, respectively. The dollar i 2004 relates to additional commission expense on increased net sales, additional incentive programs that resulted in higher vol investment in upgrading the Company's sales literature. The Company benefited from cooperative marketing income in both 2 2003 in approximately the same dollar amounts. These cooperative marketing funds, received from original equipment manuf ("OEM"), are used to offset marketing and promotional expenses for the Company's products. There is no assurance that these will continue or that the Company will benefit from these programs as the OEM tend to reduce them as their business improved.

Interest expense increased \$234,070 in 2004 to \$1,016,732 from \$782,662 in 2003. The increase in interest expense was prima result of gradually increasing interest rates and additional borrowings under the Company's revolving credit agreement to function in accounts receivable and inventories associated with substantially higher net sales throughout 2004.

													&nl
													&nl
						Page	e 12 of 56)					

The Company's effective income tax rate was 22.2% for 2004 compared to 38.6% in 2003. The favorable rate reduction in 200 from federal and state research and development tax credits claimed on amended tax filings. Additionally, other tax reserves w to income as they were no longer required as the result of the favorable conclusion of tax audits or the expiration of the statute limitations on open years (See Note 7 of the Notes to Consolidated Financial Statements).

Net income for 2004 was \$4.7 million, or \$.38 per diluted share compared to \$4.6 million, or \$.38 per diluted share in 2003. Net was negatively impacted principally by raw material cost increases and positively impacted by the lower effective tax rate as prediscussed.

Liquidity and Capital Resources

The Company's revolving line of credit, net income and depreciation and amortization were the major sources of cash flows de The Company increased the availability under its revolving credit agreement from \$30.0 million to \$40.0 million for the period through June 30 of each year. The availability returns to \$30.0 million for the period July 1 through December 31 of each year increase is necessary to fund the Company's working capital needs during the first six months of the year when its large consu customers require the bulk of their deliveries.

Inventories were up \$9.2 million and accounts receivables were up \$4.3 million at December 25, 2004 from December 27, 200 increase of \$8.3 million in accounts payable at December 25, 2004 helped fund the working capital requirements.

The Company invested \$11.8 million in property, plant and equipment during 2004. Major additions were made in Texas, Pen and Georgia. The Company purchased 32 acres and a 61,000 sq.ft. building for \$1.1 million to support its growing armored true in Cleburne, Texas. It also invested \$.9 million in machinery and equipment for this facility, that will be utilized for the truck plines as well as the armored truck business. This will give the Company processing abilities it previously had to purchase from reduce the labor content of its products as well as reduce the amount of inventory on hand. The Company purchased 30 acres a 300,000 sq.ft. manufacturing facility adjacent to its primary facility in Jonestown, Pennsylvania for \$1.6 million. This purchase enable us to consolidate operations that will enhance efficiency, provide needed chassis storage space and increase capacity. A \$.6 million was spent to bring the facility to a production-ready state. We also invested \$1.2 million in equipment for the Penn plant. The major item was a combination turret/laser for \$.5 million was in our Georgia facility for additional capacity for the S We invested \$.2 million for 10 acres adjacent to our existing Georgia property. We are currently constructing a 60,000 sq.ft. manufacturing facility that is in process. We invested \$.5 million in this facility during 2004. The cost to complete this facility estimated to be \$.7 million and production is expected to begin late first quarter or early second quarter of 2005.

The Company's former manufacturing facility in Wilson, North Carolina (closed in the third quarter of 2002) continues to be l sale; however, we have been unable to sell this facility because of economic conditions and excess buildings in this region. W ultimate net sales price will exceed the \$1.9 million carrying value and the sales proceeds would provide additional liquidity.

The Company believes that cash flow generated from operations and funds available under the Company's revolving line of cr sufficient to meet the Company's cash needs during 2005.

													&nl
													&nl
						Page	e 13 of 56	5					
<u>Compa</u>	rison of 2	2003 witl	<u>h 2002</u>										&nl

Revenue includes net sales and other income. For the year ended December 27, 2003, net sales increased \$15.3 million to \$22 from \$209.6 million for the year ended December 28, 2002. Other income increased \$1.4 million to \$2.0 million from \$.6 million rease in net sales. Sales of Supreme's line of specialty transit buses and trolley replicas decreased slightly during 2003 when to 2002. While a small decrease of sales was realized in these bus product lines on a year-over-year basis, the Company was e as each quarter showed gains when compared to the immediately preceding quarter. These bus product lines represented 18% in 2003 compared to 20% in 2002. The Company's specialized line of Spartan service and cargo products showed a slight rever of \$1.7 million in 2003 when compared to 2002. The Company was the first to introduce these specialized products to the mat products have since been duplicated by virtually every competitor, accounting for the slight decline in net sales. The Company refrigerated products declined \$.4 million in 2003 when compared to 2002. This decline was due to the closing of the Wilson, Carolina plant, which primarily manufactured refrigerated product lines, in the third quarter of 2002. The Company's smaller of product lines, armored vehicles and fiberglass bodies, showed improvement in 2003 over 2002.

The Company experienced improving market conditions primarily during the last quarter of 2003. For the year, new orders incompared to 2002. The Company has also received a 5,000 unit, \$20.0 million order for products to be manufactured and delive the first six months of 2004.

The \$1.4 million increase in other income was principally attributable to gains on the sale of two properties.

Gross profit as a percentage of net sales was 12.7% in 2003 compared to 13.5% in 2002. The gross profit margin for 2003 was impacted by .2% as a result of a \$.5 million impairment charge (included in cost of sales) for the North Carolina facility held to

Material costs as a percentage of net sales increased in 2003 compared to 2002 primarily as a result of extremely competitive p conditions in virtually all of the Company's product lines brought about by excess industry capacity. The Company and its cor experiencing improving market conditions which should reduce the excess capacity that was available in 2003. The Company experienced any significant material cost increase over the last two years but is anticipating both rising material cost and, in co instances, availability issues as market conditions improve.

The Company experienced a slight decline in direct labor as a percentage of net sales in 2003 as compared to 2002. This decli attributed to a shift in product mix in 2003 compared to 2002. The Company's FRP van product line, which is less labor intens aluminum van product line, increased significantly in 2003 compared to 2002 resulting in the improvement in direct labor as a of net sales.

Overhead expenses as a percentage of net sales were down slightly in 2003 as compared to 2002. Overhead expenses have been unfavorably impacted over the last three years as the Company has incurred increases in their costs but could not pass them the customer due to the extremely competitive market conditions. Commercial and general liability insurance, workers' compensation insurance and group health insurance have been under intense upward pressure. While there is some indication the pressure in insurance is abating, the areas of group health and workers' compensation insurance are still under intense upward pressure.

													&nl
													&nl
													&nl
Page 14 of 56													

Selling, general and administrative expenses were \$22.2 million or 9.9% of net sales in 2003 compared to \$22.0 million or 10. sales in 2002. The largest components of selling, general and administrative expenses were compensation related expenses whe comprised approximately 71% and 68% of total selling, general and administrative expenses in 2003 and 2002, respectively. I and commission compensation, as well as a concerted effort to improve the Company's product research and development, we responsible for the slight increase in selling, general and administrative compensation costs. These efforts will continue in 200 Company's efforts in promoting its products through special marketing programs, combined with OEM cooperative advertisin are a substantial part of the Company's marketing efforts. OEM marketing income accounted for 8.5% of the total spent on sel general and administrative expenses in 2003 and 7.3% in 2002. With improving economic conditions there can be no assurance Company will continue to benefit from these incentives.

Interest expense declined \$213,000 in 2003 when compared to 2002. This decline resulted from favorable interest rates combines borrowing during most of 2003. The improved market conditions experienced at the end of 2003, which are expected to c through 2004, will likely result in increased revolving line of credit borrowings that could result in higher interest expense in 2

The Company's effective income tax rate was 38.6% and 38.5% for 2003 and 2002, respectively. The provision for state income increased primarily the result of fluctuations in state taxable income and varying tax rates in the states in which the Company business.

Critical	Accoun	ting Poli	cies and Esti	mates									

Management's discussion and analysis of its financial position and results of operations are based upon the Company's consoli financial statements, which have been prepared in accordance with accounting principles generally accepted in the United Sta America. The preparation of these financial statements requires management to make estimates and judgments that affect the amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. The Company's accounting policies are discussed in Note 1 of the Notes to Consolidated Financial Statements. In management's opinion, the critical accounting policies include allowance for doubtful accounts, excess and obsolete inventories, inventory relief, accrued and accrued warranty.

Allowance for Doubtful Accounts - The Company maintains an allowance for doubtful accounts for estimated losses resulting inability of our customers to make required payments. If the financial condition of our customers were to deteriorate, resulting impairment of their ability to make payments, additional allowances may be required which would affect our future operating

Page 15 of 56

Excess and Obsolete Inventories - The Company must make estimates regarding the future use of products and provides a pro obsolete or slow-moving inventories. If actual product life-cycles, product demand or market conditions are less favorable that projected by management, additional inventory write-downs may be required which would affect future operating results.

Inventory Relief - For monthly and quarterly financial reporting, cost of sales is recorded and inventories are relieved by the u standard bills of material. Because of the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the Company's products, it is difficult to place full reliance on the customized nature of the cust material for accurate relief of inventories. Although the Company continues to refine the process of creating accurate bills of 1 manual adjustments, which are based on estimates, are necessary to assure correct relief of inventories for products sold. The calculations consider the customized nature of products, historical inventory relief percentages, scrap variances and other factorized nature of products and other factorized nature of products.

could impact inventory relief. The accuracy of the inventory relief is not known until the annual physical inventories and it is a to consider more frequent physical inventories because of the sales order backlog and the costs associated with ceasing product purpose of conducting physical inventories. If the annual physical inventories result in significant favorable or unfavorable ad such adjustments would affect future operating results.

Accrued Insurance - The Company has a self-insured retention against product liability claims with insurance coverage over a the retention. The Company is also self-insured for a portion of its employee medical benefits and workers' compensation. Pro liability claims are routinely reviewed by the Company's insurance carrier and management routinely reviews other self-insura for purposes of establishing ultimate loss estimates. In addition, management must determine estimated liability for claims inc not reported. Such estimates and any subsequent changes in estimates may result in adjustments to our operating results in the

Accrued Warranty - The Company provides limited warranties for periods of up to five years from the date of retail sale. Estir warranty costs are provided at the time of sale and are based upon historical experience.

Pending Accounting Policies

Forward-Looking Statements

This report contains forward-looking statements, other than historical facts, which reflect the view of the Company's managen respect to future events. When used in this report, words such as "believe," "expect," "anticipate," "estimate," "intend," and sir expressions, as they relate to the Company or its plans or operations, identify forward-looking statements. Such forward-looking statements are based on assumptions made by, and information currently available to, the Company's management. Although believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that the expectations will prove to a correct. Important factors that could cause actual results to differ materially from such expectations include, without limitation on the availability of chassis on which the Company's product is dependent, availability of raw material cost increases can b to its customers through implementation of price increases for the Company's products. The forward-looking statements contained reflect the current view of the Company's management with respect to future events and are subject to those factors and other uncertainties and assumptions relating to the operations, results of operations, cash flows and financial position of the Company company assumes no obligation to update the forward-looking statements or to update the reasons actual results could differ f contemplated by such forward-looking statements.

Page 16 of 56

Control Risks

While the Company believes its control systems are effective, there are inherent limitations in all control systems, and misstate to error or fraud may occur and not be detected. The Company continues to take action to assure compliance with the internal disclosure controls, and other requirements of the Sarbanes-Oxley Act of 2002. Our management, including our Chief Execution and Chief Financial Officer, cannot guarantee that our internal controls and disclosure controls will prevent all possible errors. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the of the control system are met. In addition, the design of a control system must reflect the fact that there are resource constraints, a benefit of controls must be relative to their costs. Because of the inherent limitations in all control systems, no system of control provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of sin mistake. Further, controls can be circumvented by individual acts of some persons, by collusion of two or more persons, or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all p future conditions. Over time, a control may be inadequate because of changes in conditions or the degree of compliance with to or procedures may deteriorate. Because of inherent limitations in a cost-effective control system, misstatements due to error or occur and not be detected.

<u>ITEM '</u>	7A.		QUANTIT	<u>ATIVE A</u>	ND QUA	ALITAT	<u>IVE DIS</u>	<u>CLOSU</u>	RES ABO	<u>DUT MA</u>	RKET		
			<u>RISK.</u>										&nl

In the normal course of business, operations of the Company are exposed to fluctuations in interest rates. These fluctuations can cost of investing, financing and operating. The Company's primary risk exposure results from changes in short-term interest rate effort to manage risk exposures, the Company strives to achieve an acceptable balance between fixed and floating rate debt per Company's revolving line of credit is floating rate debt and bears interest at the bank's prime rate or LIBOR plus certain basis depending on the pricing option selected and the Company's leverage ratio. The Company has been party to interest rate swap which exchanged floating rate for fixed rate interest payments. The final interest rate swap agreement matured in May 2004 ar were none in existence at December 25, 2004.

Based on the Company's overall interest rate exposure at December 25, 2004, a hypothetical 10 percent change in interest rate the fair value of the financial instruments as of December 25, 2004, would have no material impact on earnings, cash flows or of interest rate risk sensitive instruments over a one-year period.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

 &n &n &n

To the Board of Directors and Stockholders of

Supreme Industries, Inc.:

We have audited the accompanying consolidated balance sheets of Supreme Industries, Inc. and its subsidiaries as of December and December 27, 2003, and the related consolidated statements of income, stockholders' equity and cash flows for each of the in the period ended December 25, 2004. Our audits also included the financial statement schedule listed in the Index of Item 1 financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility express an opinion on these financial statements and financial statements chedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the fi statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial post Supreme Industries, Inc. and its subsidiaries as of December 25, 2004 and December 27, 2003, and the results of their operation cash flows for each of the three years in the period ended December 25, 2004 in conformity with accounting principles general in the United States of America. In addition, in our opinion, the financial statement schedule referred to above, when consider relation to the basic financial statements taken as a whole, presents fairly, in all material respects, the information required to be therein.

	 specialized truck bodies that are mounted on new truck chassis produced by others. The Company's truck body products include cutaway and dry freight van bodies, refrigerated units stake bodies and other specialized trucks. The Company also manufactures shuttle buses. At December 25, 2004, the Company had 18 manufacturing, distribution and supply facilities. The Company's customers are located principally in the United States. &n												
	Fiscal Year End - Effective January 1, 2002, the Company changed its fiscal year from a calendar year ending December 31 to a 52 or 53 week fiscal year ending the last Saturday in December. The fiscal years ended December 25, 2004, December 27, 2003 and December 28, 2002 each contained 52 weeks.

1.	NATURE OF OPERATIONS AND ACCOUNT	NTING F	POLICIES,	Continu	ed.		
	Financial Instruments and Fair Values - The agreements to reduce the impact of changes in in swap agreements are contracts to exchange the other states and the second states are contracted by the second state	nterest rat lebt oblig	es on certain ation's LIBO	n of its flo DR floatir	Dating rate	e debt. The xclusive of	

the applicable spread) for fixed rate interest payments over the life of the debt obligations without

exchange of the underlying notional amounts. The notional amounts of the interest rate swap agreements are used to measure interest to be paid or received and do not represent the amount of exposure of credit loss. The differential paid or received under interest rate swap agreements is recognized as an adjustment to interest expense.

 There were no interest rate swap agreements outstanding at December 25, 2004. The Company had one interest rate swap agreement outstanding at December 27, 2003 for a notional amount of \$2,091,000. The interest rate swap agreement provided a 5.8% fixed interest rate and matured on May 11, 2004. In accordance with Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities," the interest rate swap agreement was designated and qualified as a fair value hedging instrument. It was fully effective, resulting in no net gain or loss recorded in the consolidated statements of income. The fair value of the contract at December 27, 2003 was a \$29,910 liability under SFAS No. 133 and changes in fair value were adjusted through accumulated other comprehensive loss.

 The carrying amounts of cash and cash equivalents, accounts receivable and trade accounts payable approximated fair value as of December 25, 2004 and December 27, 2003 because of the relatively short maturities of these financial instruments. The carrying amount of long-term debt, including current maturities, approximated fair value as of December 25, 2004 and December 27, 2003, based upon terms and conditions available to the Company at those dates in comparison to the terms and conditions of its outstanding long-term debt.

 Cash and Cash Equivalents - The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. During 2002, the Company made an interest bearing cash deposit to secure the payment of amounts due under certain insurance policies. This deposit is included in other current assets and was \$600,000 and \$1,000,000 at December 25, 2004 and December 27, 2003, respectively.

&	anbsp &nbs	b							
---	------------	---	--	--	--	--	--	--	--

 Accounts Receivable - The Company accounts for trade receivables based on the amounts billed to customers. Past due receivables are determined based on contractual terms. The Company does not accrue interest on any of its trade receivables.

 Allowance for Doubtful Accounts - The allowance for doubtful accounts is determined by
management based on the Company's historical losses, specific customer circumstances and
general economic conditions. Periodically, management reviews accounts receivable and adjusts
the allowance based on current circumstances and charges off uncollectible receivables against the
allowance when all attempts to collect the receivable have failed.

 Property Held for Sale - During 2002, the Company ceased business operations at its North Carolina manufacturing facility and reclassified this facility to property held for sale. The closing of the facility did not result in discontinued operations because the operations and cash flows of the facility were absorbed by the Company's other locations. In the fourth quarter of 2003, the Company recognized an impairment loss of \$497,406 as it lowered the sales price of the property. In the fourth quarter of 2004, the Company reclassified this asset, with a carrying value of \$1,860,000, to property, plant and equipment and resumed depreciation. Although the property continues to be listed for sale, the economic conditions in the region where this building is located has created difficulty in selling this property and prompted the reclassification.

) &n	bsp
--	--------	-----

 Intangible Assets - Intangible assets subject to amortization consist of favorable lease agreements with a cost of \$1,048,167 less accumulated amortization (\$1,018,101 in 2004 and \$966,559 in 2003). The favorable leases are being amortized using the straight-line method over the twenty-five year term of the lease which includes renewal terms. Amortization expense for the years ended December 25, 2004, December 27, 2003 and December 28, 2002 was \$51,542, \$51,542 and \$70,412, respectively. Amortization expense is estimated to be \$30,066 for 2005 as the lease agreements expire in July 2005.

4.	LONG	TERM I	DEBT, C	Conclude	d.							

 The revolving line of credit, term notes and a letter of credit facility are part of a Credit Agreement & nbsp dated January 5, 2004 and as amended through December 17, 2004 (the "Credit Agreement"). The Credit Agreement replaced a previous credit agreement with the same financial institution. All borrowings under the Credit Agreement are unsecured. The Credit Agreement provides for a revolving line of credit facility, as defined, up to \$30 million and increasing to \$40 million during

the period each year from January 1 to June 30. Interest on outstanding borrowings under the revolving line of credit is based on the bank's prime rate or certain basis points above LIBOR depending on the pricing option selected and the Company's leverage ratio, as defined (effective rate of 4.13% and 3.06% at December 25, 2004 and December 27, 2003, respectively). The Company's cash management system and revolving line of credit are designed to maintain zero cash balances and, accordingly, checks outstanding in excess of bank balances are classified as additional borrowings under the revolving line of credit. Checks outstanding in excess of bank balances were \$0 and \$5,758,276 at December 25, 2004 and December 27, 2003, respectively. The revolving line of credit also requires a quarterly commitment fee ranging from 1/8% to 1/4% per annum depending on the Company's financial ratios and based upon the average daily unused portion. Any amounts outstanding under the revolving line of credit will be due at maturity, June 30, 2006.

-
- Outstanding letters of credit, which reduce availability under the credit facility, aggregated \$2.8 million and \$2.5 million at December 25, 2004 and December 27, 2003, respectively. Under separate agreements, at December 25, 2004 the Company had outstanding \$3.8 million (\$4.3 million at December 27, 2003) of irrevocable letters of credit in favor of bond trustees as a credit enhancement for bondholders of two industrial development revenue bonds.
-
- The Credit Agreement contains, among other matters, certain restrictive covenants including required financial ratios.
-
- Maturities of long-term debt for each of the next five years are as follows: 2005 \$1,633,333; 2006 \$24,766,667; 2007 \$1,508,333; 2008 \$441,667 and 2009 \$508,333.
- 5. RETIREMENT PLAN.
- The Company maintains a defined contribution plan which covers substantially all employees of the Company who have reached the age of twenty-one years and have completed one year of credited service. The plan provides that eligible employees can contribute from one to fifteen percent of their annual compensation and the Company will match thirty percent of employee's contributions up to seven percent of the employee's compensation. The Board of Directors may increase or decrease the Company's contribution on a year-to-year basis. Expense related to this plan was \$570,721, \$479,144 and \$492,498 for the fiscal years ended 2004, 2003 and 2002, respectively.

	Stock Options				

 On October 29, 1998, the Company's Board of Directors approved, and the Company's stockholders subsequently ratified, the 1998 Stock Option Plan under which 869,087 shares of Class A Common Stock were reserved for grant. On January 31, 2001, the Company's Board of Directors approved, and the Company's stockholders subsequently ratified, the 2001 Stock Option Plan under which 825,000 shares of Class A Common Stock were reserved for grant. On January 23, 2004, the Company's Board of Directors approved, and the Company's stockholders subsequently ratified, the 2004 Stock Option Plan under which 600,000 shares of Class A Common Stock were reserved for grant. Under the terms of the stock option plans, both incentive stock options and non-statutory stock options can be granted by a specially designated Stock Option Committee. For persons age sixty-five and younger as of the date of grant, no options may be exercised during the first year after the date of grant and are exercisable cumulatively in three installments of 33 1/3% each year

thereafter. For persons over age sixty-five as of the date of grant, one half of the options may be exercised during the first year and thereafter all options may be exercised. Options granted under the stock option plans expire five years after the date of grant.

	\$2,000,0 with an (\$250,0 occurrin	The Company is self-insured for a portion of product liability (\$100,000 per occurrence with a \$2,000,000 annual aggregate), certain employee health benefits (\$200,000 annually per employee with an annual aggregate of approximately \$6,700,000) and workers' compensation in certain states (\$250,000 per occurrence with no annual aggregate). The Company accrues for the estimated losses occurring from both asserted and unasserted claims. The estimate of the liability for unasserted claim arising from incurred but not reported claims is based on an analysis of historical claims data.

	<u>Other</u>											
	The Company is subject to various investigations, claims and legal proceedings covering a wide range of matters that arise in the ordinary course of its business activities. Each of these matters is subject to various uncertainties, and it is possible that some of these matters may be resolved unfavorably to the Company. The Company has established accruals for matters that are probable and reasonably estimable. Management believes that any liability that may ultimately result from the resolution of these matters in excess of accruals and or amounts provided by insurance coverage will not have a material adverse effect on the consolidated financial position or results of operation of the Company.

SUPPLEMENTARY DATA

Quarterly Results (Unaudited)											

		First		Second		Third		Fourth
	2004 Quarter							
	Revenue	\$73,564,467		\$90,845,945		\$70,778,471		\$72,773,572
	Gross profit	7,150,616		9,615,050		7,656,903		6,347,665
	Net income	989,769		1,887,747		892,540		978,061
	Per share:							
	Basic	.08		.16		.07		.08
	Diluted	.08		.15		.07		.08
	2003 Quarter							
	Revenue	\$49,824,210		\$60,749,259		\$58,061,838		\$58,240,873
	Gross profit	5,767,831		7,758,431		8,334,526		6,701,962
	Net income	418,421		1,237,238		1,808,600		1,177,440
	Per share:							
	Basic	.04		.10		.15		.10
	Diluted	.04		.10		.15		.10

Net income for the fourth quarter of 2004 was favorably impacted by the recognition of prior year's research and development tax credits (federal - \$256,600 and state - \$166,200) and tax benefits resulting from the reversal of certain tax reserves (see Note 7 of Notes to Consolidated Financial Statements).

Net income for the fourth quarter of 2003 was favorably impacted by \$359,000 as a result of pretax gains of \$1,084,868 on the sale of two properties, net of a pretax impairment charge of \$497,406 on property held for sale.

The sum of quarterly earnings per share for the four quarters may not equal annual earnings per share due to rounding and changes in the diluted potential common shares.

of Supreme Industries, Inc. Pursuant to

Section 906 of the Sarbanes-Oxley Act of 2002

 This certification is furnished solely pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (18 U.S.C. 1350) and

accompanies the annual report on Form 10-K (the "Form 10-K") for the year ended December 25, 2004 of Supreme Industries, Inc. (the "Company"). I, Robert W. Wilson, the Chief Financial Officer of the Company, certify that, based on my knowledge:

(1) The Form 10-K fully complies with the requirements of Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934; and

(2) The information contained in the Form 10-K fairly presents, in all material respects, the financial condition and results of operations of the Company as of and for the periods covered in this report.

Dated: March 17, 2005
