QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2014, or  
.. TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d)  
OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission file number: 1-3754

ALLY FINANCIAL INC.

(Exact name of registrant as specified in its charter)

Delaware

38-0572512

(State or other jurisdiction of  
incorporation or organization)

(I.R.S. Employer  
Identification No.)

200 Renaissance Center

P.O. Box 200, Detroit, Michigan

48265-2000

(Address of principal executive offices)

(Zip Code)

(866) 710-4623

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for a shorter period that the registrant was required to submit and post such files).

Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a nonaccelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company   
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes  No

At July 31, 2014, the number of shares outstanding of the Registrant's common stock was 479,776,889 shares.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

1. Description of Business, Basis of Presentation, and Changes in Significant Accounting Policies

Ally Financial Inc. (formerly GMAC Inc. and referred to herein as Ally, we, our, or us) is a leading, independent, diversified, financial services firm. Founded in 1919, we are a leading automotive financial services company with approximately 95 years of experience, providing a broad array of financial products and services to automotive dealers and their customers. We operate as a financial holding company and a bank holding company. Our banking subsidiary, Ally Bank, is an indirect wholly owned subsidiary of Ally Financial Inc. and a leading franchise in the growing direct (internet, telephone, mobile, and mail) banking market.

Our accounting and reporting policies conform to accounting principles generally accepted in the United States of America (GAAP). Additionally, where applicable, the policies conform to the accounting and reporting guidelines prescribed by bank regulatory authorities. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and that affect income and expenses during the reporting period. In developing the estimates and assumptions, management uses all available evidence; however, actual results could differ.

The Condensed Consolidated Financial Statements at June 30, 2014, and for the three months and six months ended June 30, 2014, and 2013, are unaudited but reflect all adjustments that are, in management's opinion, necessary for the fair presentation of the results for the interim periods presented. All such adjustments are of a normal recurring nature.

These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements (and the related notes) included in our Annual Report on Form 10-K for the year ended December 31, 2013, as filed on March 3, 2014, with the U.S. Securities and Exchange Commission (SEC).

Initial Public Offering of Common Stock, Stock Split, and Changes in Number of Shares Authorized

In April 2014, we completed an initial public offering (IPO) of our common stock. All proceeds from the offering were obtained by the U.S. Department of the Treasury (Treasury) as the single selling stockholder. In connection with the IPO, we effected a 310-for-one stock split on shares of our common stock, \$0.01 par value per share. Accordingly, all references in the Condensed Consolidated Financial Statements to share and per share amounts relating to common stock have been adjusted, on a retroactive basis, to recognize the 310-for-one stock split. In addition, on April 9, 2014, we increased the number of shares authorized for issuance of common stock to 1.1 billion and decreased the number of shares authorized for issuance of Series A Preferred Stock to approximately 41 million.

Significant Accounting Policies

Income Taxes

In calculating the provision for interim income taxes, in accordance with Accounting Standards Codification (ASC) 740, Income Taxes, we apply an estimated annual effective tax rate to year-to-date ordinary income. At the end of each interim period, we estimate the effective tax rate expected to be applicable for the full fiscal year. This method differs from that described in Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K, which describes our annual significant income tax accounting policy and related methodology.

Recently Adopted Accounting Standards

Liabilities — Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date (ASU 2013-04)

As of January 1, 2014, we adopted Accounting Standards Update (ASU) 2013-04. The guidance within the ASU requires an entity to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of this guidance is fixed at the reporting date, as the sum of the following: (a) The amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and (b) any additional amount the reporting entity expects to pay on behalf of its co-obligors. The amendments were effective retrospectively for all arrangements within its scope. It further requires an entity to disclose the nature and amount of the obligation as well as other information about those obligations. The adoption of this guidance did not have a material effect on our consolidated financial condition or results of operations.

Foreign Currency Matters — Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity (ASU 2013-05)

As of January 1, 2014, we adopted ASU 2013-05. The guidance within the ASU closes diversity in practice in this area and requires a reporting entity that ceases to have a controlling financial interest, in a subsidiary or group of assets or a business, within a foreign entity to release any related Cumulative Translation Adjustment (CTA) into net income. The CTA should be released into net income only if the sale or transfer results in the complete or substantially complete liquidation of the foreign entity. For an equity method investment that is a foreign entity, a pro rata portion of the CTA should be released into net income upon a partial sale of such an investment. This ASU further clarifies that the sale of an investment in a foreign entity includes both events that result in the loss of a controlling financial interest in a foreign entity, irrespective of any retained investment, and events that result in step acquisition under which an acquirer obtains control of an acquiree in which it held an equity interest immediately before the acquisition date. Under these circumstances, the CTA should be released into net income upon their occurrence. The amendments are to be applied prospectively for all transactions within its scope. Since the guidance is prospective and we have previously sold or exited substantially all of our international businesses and released the related CTA upon those dispositions, the implementation will not have a material effect on our consolidated financial condition or results of operations.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

**Income Taxes — Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (ASU 2013-11)**

As of January 1, 2014, we adopted ASU 2013-11. The guidance within the ASU closes diversity in practice and requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. The guidance further includes an exception that if a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available to settle any additional income taxes that would result from the disallowance of a tax position at the reporting date or the tax law of the applicable jurisdiction does not require the entity to use them and the entity does not intend to use them, the unrecognized tax benefit for such purpose should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date.

The amendments are to be applied prospectively to all unrecognized tax benefits that exist at the effective date. The adoption of this guidance did not have a material effect to our consolidated financial condition or results of operations.

**Investments — Accounting for Investments in Qualified Affordable Housing Projects (ASU 2014-01)**

As of January 1, 2014, we adopted ASU 2014-01. The amendments in this ASU allow an entity to make an accounting policy election to account for investments in qualified affordable housing projects using a proportional amortization method, if certain conditions are met. Under the election, the entity would amortize the initial cost of the investment in proportion to the tax credits and other benefits received while recognizing the net investment performance in the statement of comprehensive income as a component of income tax expense. The amendments are to be applied retrospectively to all periods presented. We have elected to utilize the proportional amortization method for qualifying affordable housing investments and therefore will be presenting the amortization and tax impacts of such investments as a component of income tax expense under the proportional amortization method. The adoption of this guidance did not have a material effect to our consolidated financial condition or results of operations.

**Recently Issued Accounting Standards**

**Receivables — Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure (ASU 2014-04)**

In January 2014, the Financial Accounting Standards Board (FASB) issued ASU 2014-04. The amendments in this ASU clarify the timing for which an entity should reclassify a loan that has been foreclosed or where an in substance repossession has occurred to real estate owned. The guidance requires such reclassification to occur when the entity obtains legal title upon completion of foreclosure or the borrower conveys all interest in the residential real estate property to the entity to satisfy the loan through completion of a deed in lieu of foreclosure or similar legal agreement. In addition, the ASU clarifies that redemption rights of the borrower should be ignored for purposes of determining whether legal title has transferred. The amendments are effective for us beginning on January 1, 2015. The amendments can be applied using either a modified retrospective or prospective basis. Under the modified retrospective approach, the entity should record a cumulative-effect adjustment to residential consumer mortgage loans and residential real estate owned as of the beginning of the annual period for which the amendments are effective. Early adoption is permitted. Management is assessing the impact of the adoption of this guidance.

**Presentation of Financial Statements and Property, Plant, and Equipment — Reporting Discontinued Operations and Disclosure of Disposals of Components of an Entity (ASU 2014-08)**

In April 2014, the FASB issued ASU 2014-08. The amendments in this ASU modify the requirements for the reporting of discontinued operations. In order to qualify as a discontinued operation, the disposal of a component of an entity, a group of components, or a business of an entity must represent a strategic shift that has (or will have) a major effect on an entity's operations and financial results. The ASU further indicates that the timing for recording a discontinued operation is when one of the following occurs: the component, group of components, or business meets the criteria to be classified as held for sale; the component, group of components, or business is disposed of by sale; or

the component, group of components, or business is disposed of other than by sale (for example abandonment or spinoff). In addition, the ASU also requires additional disclosure items about an entity's discontinued operations. The amendments are effective for us beginning on January 1, 2015. The amendments are to be applied prospectively solely to newly identified disposals that qualify as discontinued operations after the effective date. Items previously reported as discontinued operations will maintain their classification based on the prior guidance. Early adoption is permitted, but only for disposals that have not been previously reported as discontinued operations in previously issued financial statements. Because the guidance is prospective only for newly identified disposals that qualify as a discontinued operation, this guidance is not expected to have a material impact to our consolidated financial condition or results of operations.

#### Revenue from Contracts with Customers (ASU 2014-09)

In May 2014, the FASB issued ASU 2014-09. The purpose of this guidance is to streamline and consolidate existing revenue recognition principles in GAAP and to converge revenue recognition principles with International Financial Reporting Standards (IFRS). The core principle of the amendments is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to receive in exchange for those goods or services. The amendments include a five step process for consideration of the main principle, guidance on accounting treatment for costs associated with a contract, and disclosure requirements related to the revenue process. The amendments are effective for us beginning on January 1, 2017. The amendments can be applied either through a full retrospective application or retrospectively with a cumulative effect adjustment on the date of initial adoption. Early adoption is prohibited. Management is assessing the impact of the adoption of this guidance.

Transfers and Servicing — Repurchase-to-Maturity Transactions, Repurchase Financings and Disclosures (ASU 2014-11)

In June 2014, the FASB issued ASU 2014-11. The amendments in this ASU change the accounting for repurchase to maturity transactions and repurchase financing transactions such that both will be reported as secured borrowings when the guidance becomes effective. In addition to the changes to how these transactions are reported, the ASU also includes new disclosure requirements. The amendments are effective for us beginning on January 1, 2015. The amendments are to be applied to all transactions that fall under the guidance as of the date of adoption with a cumulative effect adjustment recorded on the date of initial adoption. Early adoption is prohibited. The guidance is not expected to have a material impact to our consolidated financial condition or results of operations.

2. Discontinued and Held-for-sale Operations

Discontinued Operations

We classify operations as discontinued when operations and cash flows will be eliminated from our ongoing operations and we do not expect to retain any significant continuing involvement in their operations after the respective disposal transactions. For all periods presented, the operating results for these discontinued operations have been removed from continuing operations and presented separately as discontinued operations, net of tax, in the Condensed Consolidated Statement of Comprehensive Income. The Notes to the Condensed Consolidated Financial Statements have been adjusted to exclude discontinued operations unless otherwise noted.

Select Mortgage Operations

During the first quarter of 2013, the operations of ResCap were classified as discontinued.

Select Insurance Operations

During the first quarter of 2013, we completed the sale of our U.K.-based operations. During the second quarter of 2013, we sold our Mexican insurance business, ABA Seguros.

Select Automotive Finance Operations

During the fourth quarter of 2012, we committed to sell our automotive finance operations in Europe and Latin America to General Motors Financial Company, Inc. (GM Financial). On the same date, we entered into an agreement with GM Financial to acquire our 40% interest in a motor vehicle finance joint venture in China. During the second quarter of 2013, we completed the sale of our operations in Europe and the majority of Latin America. The transaction included European operations in Germany, the United Kingdom, Italy, Sweden, Switzerland, Austria, Belgium, France and the Netherlands, and Latin American operations in Mexico, Chile, and Colombia. On October 1, 2013, we completed the sale of the remaining Latin American operations in Brazil. Since required regulatory and other approvals related to the sale of our interest in a motor vehicle finance joint venture in China were not received by July 1, 2014, the terms of the sale agreement have become subject to a right of termination by either party. However, we do not expect the agreement to be terminated and consider it probable that the sale of the joint venture in China will be completed in late 2014, or as soon as practicable thereafter.

During the first quarter of 2013, we sold our Canadian automotive finance operations, Ally Credit Canada Limited and ResMor Trust.

## Select Financial Information

Select financial information of discontinued operations is summarized below. The pretax income or loss, including direct costs to transact a sale, includes any impairment recognized to present the operations at the lower-of-cost or fair value. Fair value was based on the estimated sales price, which could differ from the ultimate sales price due to price volatility, changing interest rates, changing foreign-currency rates, and future economic conditions.

Interest and dividends exempt from U.S. federal income tax	3	—	7	—
Interest and dividends on available-for-sale securities	\$93	\$76	\$188	\$144

Certain available-for-sale securities were sold at a loss in 2014 and 2013 as a result of market conditions within these respective periods (e.g., change in market interest rates or a downgrade in the rating of a debt security). The table below summarizes available-for-sale securities in an unrealized loss position in accumulated other comprehensive income. Based on the methodology described below that was applied to these securities, we believe that the unrealized losses relate to factors other than credit losses in the current market environment. As of June 30, 2014, we did not have the intent to sell the debt securities with an unrealized loss position in accumulated other comprehensive income, and it is not more likely than not that we will be required to sell these securities before recovery of their amortized cost basis. As of June 30, 2014, we had the ability and intent to hold equity securities with an unrealized loss position in accumulated other comprehensive income, and it is not more likely than not that we will be required to sell these securities before recovery of their amortized cost basis. As a result, we believe that the securities with an unrealized loss position in accumulated other comprehensive income are not considered to be other-than-temporarily impaired at June 30, 2014. Refer to Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K for additional information related to investment securities and our methodology for evaluating potential other-than-temporary impairments.

Total commercial	34,817	35,467
Total finance receivables and loans (d)	\$100,778	\$100,328

(a) Includes \$30 million and \$1 million of fair value adjustment for loans in hedge accounting relationships at June 30, 2014, and December 31, 2013, respectively. Refer to Note 19 for additional information.

(b) Includes interest-only mortgage loans of \$1.4 billion and \$1.5 billion at June 30, 2014, and December 31, 2013, respectively, the majority of which are expected to start principal amortization in 2015 or beyond.

(c) Includes consumer mortgages at a fair value of \$1 million at both June 30, 2014, and December 31, 2013, as a result of fair value option election.

(d) Totals are net of unearned income, unamortized premiums and discounts, and deferred fees and costs of \$410 million and \$595 million at June 30, 2014, and December 31, 2013, respectively.

The following tables present an analysis of the activity in the allowance for loan losses on finance receivables and loans.

Includes loans classified as special mention, substandard, or doubtful. These classifications are based on regulatory (a) definitions and generally represent loans within our portfolio that have a higher default risk or have already defaulted.

**Impaired Loans and Troubled Debt Restructurings****Impaired Loans**

Loans are considered impaired when we determine it is probable that we will be unable to collect all amounts due according to the terms of the loan agreement. For more information on our impaired finance receivables and loans, refer to Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K.

## Troubled Debt Restructurings

Troubled Debt Restructurings (TDRs) are loan modifications where concessions were granted to borrowers experiencing financial difficulties. Numerous initiatives are in place to provide support to our mortgage customers in financial distress, including principal forgiveness, maturity extensions, delinquent interest capitalization, and changes to contractual interest rates. Additionally for automobile loans, we may offer several types of assistance to aid our customers, including extension of the loan maturity date and rewriting the loan terms. Total TDRs recorded at historical cost and reported at carrying value before allowance for loan losses were \$1.3 billion at both June 30, 2014, and December 31, 2013. Refer to Note 1 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K for additional information.

At June 30, 2014, and December 31, 2013, commercial commitments to lend additional funds to borrowers owing receivables whose terms had been modified in a TDR were \$4 million and \$26 million, respectively.

## 7. Investment in Operating Leases, Net

Investments in operating leases were as follows.

(\$ in millions)	June 30, 2014	December 31, 2013
Vehicles and other equipment	\$22,317	\$21,125
Accumulated depreciation	(3,503)	(3,445)
Investment in operating leases, net	\$18,814	\$17,680

Depreciation expense on operating lease assets includes remarketing gains and losses recognized on the sale of operating lease assets. The following summarizes the components of depreciation expense on operating lease assets.

(\$ in millions)	Three months ended		Six months ended	
	June 30, 2014	2013	June 30, 2014	2013
Depreciation expense on operating lease assets (excluding remarketing gains)	\$677	\$590	\$1,328	\$1,089
Remarketing gains	(168)	(91)	(277)	(155)
Depreciation expense on operating lease assets	\$509	\$499	\$1,051	\$934

## 8. Securitizations and Variable Interest Entities

## Overview

We are involved in several types of securitization and financing transactions that utilize special-purpose entities (SPEs). An SPE is an entity that is designed to fulfill a specified limited need of the sponsor. Our principal use of SPEs is to obtain liquidity by securitizing certain of our financial assets and operating lease assets.

The SPEs involved in our securitization and other financing transactions are generally considered variable interest entities (VIEs). VIEs are entities that have either a total equity investment at risk that is insufficient to permit the entity to finance its activities without additional subordinated financial support or whose equity investors lack the ability to control the entity's activities.

Due to the deconsolidation of ResCap, our mortgage securitization activity and involvement with certain mortgage-related VIEs has substantially decreased. We no longer securitize consumer mortgage loans through transactions involving the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac), and the Government National Mortgage Association (Ginnie Mae) (collectively, the Government-sponsored Enterprises, or GSEs), or through private-label mortgage securitizations. Accordingly, the discussion below represents our current involvement with variable interest entities as of June 30, 2014, except where

otherwise stated or where comparative information is presented.

Securitizations

We provide a wide range of consumer and commercial automobile loans, operating leases, and commercial loans to a diverse customer base. We often securitize these loans (also referred to as financial assets) and leases through the use of securitization entities, which may or

25

---

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

may not be consolidated on our Condensed Consolidated Balance Sheet. We securitize consumer and commercial automobile loans, operating leases, and other commercial loans through private-label securitizations.

In executing a securitization transaction, we typically sell pools of financial assets to a wholly owned, bankruptcy-remote SPE, which then transfers the financial assets to a separate, transaction-specific securitization entity for cash, servicing rights, and in some transactions, other retained interests. The securitization entity is funded through the issuance of beneficial interests in the securitized financial assets. The beneficial interests take the form of either notes or trust certificates, which are sold to investors and/or retained by us. These beneficial interests are collateralized by the transferred leases and loans and entitle the investors to specified cash flows generated from the underlying securitized assets. In addition to providing a source of liquidity and cost-efficient funding, securitizing these leases and financial assets also reduces our credit exposure to the borrowers beyond any economic interest we may retain.

Each securitization is governed by various legal documents that limit and specify the activities of the securitization entity. The securitization entity is generally allowed to acquire the loans, to issue beneficial interests to investors to fund the acquisition of the loans, and to enter into derivatives or other yield maintenance contracts to hedge or mitigate certain risks related to the financial assets or beneficial interests of the entity. A servicer, who is generally us, is appointed pursuant to the underlying legal documents to service the assets the securitization entity holds and the beneficial interests it issues. Servicing functions include, but are not limited to, general collection activity on current and noncurrent accounts, loss mitigation efforts including repossession and sale of collateral, as well as advancing principal and interest payments before collecting them from individual borrowers. Our servicing responsibilities, which constitute continued involvement in the transferred financial assets, consist of primary servicing (i.e., servicing the underlying transferred financial assets) and master servicing (i.e., servicing the beneficial interests that result from the securitization transactions).

Cash flows from the assets initially transferred into the securitization entity represent the sole source for payment of distributions on the beneficial interests issued by the securitization entity and for payments to the parties that perform services for the securitization entity, such as the servicer or the trustee. In certain securitization transactions, a liquidity facility may exist to provide temporary liquidity to the entity. The liquidity provider generally is reimbursed prior to other parties in subsequent distribution periods.

We typically hold retained beneficial interests in our securitizations, which may represent a form of significant continuing economic interest. These retained interests include, but are not limited to, senior or subordinate asset-backed securities and residuals; and other residual interests. Certain of these retained interests provide credit enhancement to the trust as they may absorb credit losses or other cash shortfalls. Additionally, the securitization agreements may require cash flows to be directed away from certain of our retained interests due to specific over-collateralization requirements, which may or may not be performance-driven.

We generally hold certain conditional repurchase options specific to securitizations that allow us to repurchase assets from the securitization entity. The majority of the securitizations provide us, as servicer, with a call option that allows us to repurchase the remaining transferred financial assets or outstanding beneficial interests at our discretion once the asset pool reaches a predefined level, which represents the point where servicing becomes burdensome (a clean-up call option). The repurchase price is typically the par amount of the loans plus accrued interest. Additionally, we may hold other conditional repurchase options that allow us to repurchase a transferred financial asset if certain events outside our control occur. The typical conditional repurchase option is a delinquent loan repurchase option that gives us the option to purchase the loan or contract if it exceeds a certain prespecified delinquency level. We generally have discretion regarding when or if we will exercise these options, but we would do so only when it is in our best interest. Other than our customary representation and warranty provisions, these securitizations are nonrecourse to us, thereby transferring the risk of future credit losses to the extent the beneficial interests in the securitization entities are held by third parties. Representation and warranty provisions generally require us to repurchase loans or indemnify the investor or other party for incurred losses to the extent it is determined that the loans were ineligible or were otherwise

defective at the time of sale. Refer to Note 26 for detail on representation and warranty provisions. We did not provide any noncontractual financial support to any of these entities during the six months ended June 30, 2014 or 2013.

#### Consolidation of Variable Interest Entities

The determination of whether the assets and liabilities of the VIEs are consolidated on our balance sheet (also referred to as on-balance sheet) or not consolidated on our balance sheet (also referred to as off-balance sheet) depends on the terms of the related transaction and our continuing involvement (if any) with the VIE. We are deemed the primary beneficiary and therefore consolidate VIEs for which we have both (a) the power, through voting rights or similar rights, to direct the activities that most significantly impact the VIE's economic performance, and (b) a variable interest (or variable interests) that (i) obligates us to absorb losses that could potentially be significant to the VIE and/or (ii) provides us the right to receive residual returns of the VIE that could potentially be significant to the VIE. We determine whether we hold a significant variable interest in a VIE based on a consideration of both qualitative and quantitative factors regarding the nature, size, and form of our involvement with the VIE. We assess whether we are the primary beneficiary of a VIE on an ongoing basis.

We are generally determined to be the primary beneficiary in VIEs established for our securitization activities when we have a controlling financial interest in the VIE, primarily due to our servicing activities, and we hold a significant beneficial interest in the VIE. The consolidated VIEs included in the Condensed Consolidated Balance Sheet represent separate entities with which we are involved. The third-party investors in the obligations of consolidated VIEs have legal recourse only to the assets of the VIEs and do not have such recourse to us, except for the customary representation and warranty provisions or when we are the counterparty to certain derivative transactions involving the VIE. In addition, the cash flows from the assets are restricted only to pay such liabilities. Thus, our economic exposure to loss from

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

outstanding third-party financing related to consolidated VIEs is significantly less than the carrying value of the consolidated VIE assets. All assets of consolidated VIEs, presented below based upon the legal transfer of the underlying assets in order to reflect legal ownership, are restricted for the benefit of the beneficial interest holders. Refer to Note 22 for discussion of the assets and liabilities for which the fair value option has been elected.

The nature, purpose, and activities of nonconsolidated securitization entities are similar to those of our consolidated securitization entities with the primary difference being the nature and extent of our continuing involvement. We are generally not determined to be the primary beneficiary in VIEs established for our securitization activities when we either do not hold potentially significant variable interests or do not provide servicing or asset management functions for the financial assets held by the securitization entity. Additionally, to qualify for off-balance sheet treatment, transfers of financial assets must meet appropriate sale accounting conditions. For nonconsolidated securitization entities, the transferred financial assets are removed from our balance sheet provided the conditions for sale accounting are met. The financial assets obtained from the securitization are primarily reported as cash, servicing rights, or retained interests (if applicable). Typically, we conclude that the fee we are paid for servicing consumer automobile finance receivables represents adequate compensation, and consequently, we do not recognize a servicing asset or liability. Liabilities incurred as part of these securitization transactions, such as representation and warranty provisions, are recorded at fair value at the time of sale and are reported as accrued expenses and other liabilities on our Condensed Consolidated Balance Sheet. Upon the sale of the loans, we recognize a gain or loss on sale for the difference between the assets recognized, the assets derecognized, and the liabilities recognized as part of the transaction.

We have involvement with various other on-balance sheet, immaterial VIEs. Most of these VIEs are used for additional liquidity whereby we sell certain financial assets into the VIE and issue beneficial interests to third parties for cash. We also provide long-term guarantee contracts to investors in certain nonconsolidated affordable housing entities and have extended a line of credit to provide liquidity and minimize our exposure under these contracts. Since we do not have control over the entities or the power to make decisions, we do not consolidate the entities and our involvement is limited to the guarantee and the line of credit.

We have involvement with various other nonconsolidated affordable housing entities and venture capital funds. We do not consolidate these entities and our involvement is limited to the capital contributed and committed to these funds.

Our involvement with consolidated and nonconsolidated VIEs in which we hold variable interests is presented below.

(\$ in millions)	Consolidated involvement with VIEs (a)	Assets of nonconsolidated VIEs (a)	Maximum exposure to loss in nonconsolidated VIEs	
June 30, 2014				
On-balance sheet variable interest entities				
Consumer automobile	\$20,590			
Commercial automobile	18,008			
Commercial other	—			
Off-balance sheet variable interest entities				
Consumer automobile	—	\$659	\$659	(b)
Commercial other	111	(c) —	(d) 290	
Total	\$38,709	\$659	\$949	
December 31, 2013				
On-balance sheet variable interest entities				
Consumer automobile	\$19,072			
Commercial automobile	20,511			
Commercial other	564			
Off-balance sheet variable interest entities				

Edgar Filing: Ally Financial Inc. - Form 10-Q

Consumer automobile	—	\$899	\$899	(b)
Commercial other	(24	) (c) —	(d) 40	
Total	\$40,123	\$899	\$939	

(a) Asset values represent the current unpaid principal balance of outstanding consumer finance receivables and loans within the VIEs.

(b) Maximum exposure to loss represents the current unpaid principal balance of outstanding loans based on our customary representation and warranty provisions. This measure is based on the unlikely event that all of the loans have underwriting defects or other defects that trigger a representation and warranty provision and the collateral supporting the loans is worthless. This required disclosure is not an indication of our expected loss.

(c) Includes \$134 million and \$0 million classified as other assets, offset by \$23 million and \$24 million classified as accrued expenses and other liabilities at June 30, 2014, and December 31, 2013, respectively.

(d) Includes VIEs for which we have no management oversight and therefore we are not able to provide the total assets of the VIE.

## Cash Flows with Off-balance Sheet Variable Interest Entities

The following table summarizes cash flows received and paid related to securitization entities, asset-backed financings, or other similar transfers of financial assets where the transfer is accounted for as a sale and we have a continuing involvement with the transferred assets (e.g., servicing) that were outstanding during the six months ended June 30, 2014 and 2013. Additionally, this table contains information regarding cash flows received from and paid to nonconsolidated securitization entities that existed during each period.

Six months ended June 30, (\$ in millions)	Consumer automobile	Consumer mortgage GSEs
2014		
Servicing fees	\$4	\$—
Representations and warranties obligations	—	(9 )
2013		
Cash proceeds from transfers completed during the period	\$—	\$8,674
Servicing fees	7	66
Representations and warranties obligations	—	(62 )
Other cash flows	—	71

## Delinquencies and Net Credit Losses

The following tables represent on-balance sheet loans held-for-sale and finance receivables and loans, off-balance sheet securitizations, and whole-loan sales where we have continuing involvement. The tables present quantitative information about delinquencies and net credit losses. Refer to Note 9 for further detail on total serviced assets.

(\$ in millions)	Total Amount		Amount 60 days or more past due (a)	
	June 30, 2014	December 31, 2013	June 30, 2014	December 31, 2013
On-balance sheet loans				
Consumer automobile	\$58,114	\$ 56,417	\$345	\$ 412
Consumer mortgage	7,850	8,460	142	164
Commercial automobile	33,041	33,803	13	42
Commercial other	1,776	1,683	—	—
Total on-balance sheet loans	100,781	100,363	500	618
Off-balance sheet securitization entities				
Consumer automobile	659	899	3	3
Total off-balance sheet securitization entities	659	899	3	3
Whole-loan transactions (b)	1,648	2,848	44	69
Total	\$103,088	\$ 104,110	\$ 547	\$ 690

(a) Includes both accruing and non-accruing loans 60 days or more past due.

(b) Whole-loan transactions are not part of a securitization transaction, but represent consumer automobile pools of loans sold to third-party investors.

## 9. Servicing Activities

## Mortgage Servicing Rights

The following table summarizes past activity related to mortgage servicing rights (MSRs), which were carried at fair value. Management estimated fair value using our transaction data and other market data or, in periods when there were limited MSR market transactions that were directly observable, internally developed discounted cash flow models (an income approach) were used to estimate the fair value. These internal valuation models estimated net cash flows based on internal operating assumptions that we believed would be used by market participants in orderly transactions combined with market-based assumptions for loan prepayment rates, interest rates, and discount rates that we believed approximate yields required by investors in this asset.

Three months ended June 30, (\$ in millions)	2014	2013
Estimated fair value at April 1,	\$—	\$917
Additions	—	6
Sales (a)	—	(911)
Changes in fair value		
Due to changes in valuation inputs or assumptions used in the valuation model	—	(4)
Other changes in fair value	—	(8)
Estimated fair value at June 30,	\$—	\$—

(a) Includes the sales of agency MSRs to Ocwen Financial Corp. (Ocwen) and Quicken Loans, Inc. (Quicken) on April 1, 2013 and April 16, 2013.

Six months ended June 30, (\$ in millions)	2014	2013
Estimated fair value at January 1,	\$—	\$952
Additions	—	60
Sales (a)	—	(911)
Changes in fair value		
Due to changes in valuation inputs or assumptions used in the valuation model	—	(32)
Other changes in fair value	—	(69)
Estimated fair value at June 30,	\$—	\$—

(a) Includes the sales of agency MSRs to Ocwen and Quicken on April 1, 2013 and April 16, 2013.

Changes in fair value due to changes in valuation inputs or assumptions used in the valuation model included all changes due to a revaluation by a model or by a benchmarking exercise. Other changes in fair value primarily included the accretion of the present value of the discount related to forecasted cash flows and the economic runoff of

the portfolio.

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

**Risk Mitigation Activities**

The primary risk of servicing rights is interest rate risk and the resulting impact on prepayments. A significant decline in interest rates could lead to higher-than-expected prepayments that could reduce the value of the MSR. We previously economically hedged the impact of these risks with both derivative and nonderivative financial instruments. Refer to Note 19 for additional information regarding the derivative financial instruments used to economically hedge MSR.

The components of servicing valuation and hedge activities, net, were as follows.

(\$ in millions)	Three months ended		Six months ended	
	June 30, 2014	2013	June 30, 2014	2013
Change in estimated fair value of mortgage servicing rights	\$—	\$(12 )	\$—	\$(101 )
Change in fair value of derivative financial instruments	—	—	—	(112 )
Servicing asset valuation and hedge activities, net	\$—	\$(12 )	\$—	\$(213 )

**Mortgage Servicing Fees**

The components of mortgage servicing fees were as follows.

(\$ in millions)	Three months ended		Six months ended	
	June 30, 2014	2013	June 30, 2014	2013
Contractual servicing fees, net of guarantee fees and including subservicing	\$—	\$3	\$—	\$61
Late fees	—	—	—	1
Ancillary fees	—	—	—	4
Total mortgage servicing fees	\$—	\$3	\$—	\$66

**Automobile Finance Servicing Activities**

We service consumer automobile contracts. Historically, we have sold a portion of our consumer automobile contracts. With respect to contracts we sell, we retain the right to service and earn a servicing fee for our servicing function. Typically, we conclude that the fee we are paid for servicing consumer automobile finance receivables represents adequate compensation, and consequently, we do not recognize a servicing asset or liability. We recognized automobile servicing fees of \$7 million and \$16 million during the three months and six months ended June 30, 2014, respectively, compared to \$16 million and \$35 million for the three months and six months ended June 30, 2013, respectively.

**Automobile Finance Serviced Assets**

The total serviced automobile finance loans outstanding were as follows.

(\$ in millions)	June 30, 2014	December 31, 2013
On-balance sheet automobile finance loans and leases		
Consumer automobile	\$58,114	\$56,417
Commercial automobile	33,041	33,803
Operating leases	18,814	17,680
Other	50	54
Off-balance sheet automobile finance loans		
Loans sold to third-party investors		
Securitizations	650	887
Whole-loan	1,586	2,748
Total serviced automobile finance loans and leases	\$112,255	\$111,589

## 10. Other Assets

The components of other assets were as follows.

(\$ in millions)	June 30, 2014	December 31, 2013
Property and equipment at cost	\$740	\$709
Accumulated depreciation	(511)	(474)
Net property and equipment	229	235
Deferred tax assets	1,825	2,040
Restricted cash collections for securitization trusts (a)	1,783	3,664
Other accounts receivable	349	290
Nonmarketable equity securities	307	337
Cash reserve deposits held-for-securitization trusts (b)	297	402
Unamortized debt issuance cost	255	312
Fair value of derivative contracts in receivable position (c)	235	362
Collateral placed with counterparties	194	328
Restricted cash and cash equivalents	132	205
Other assets	1,152	1,414
Total other assets	\$6,758	\$9,589

(a) Represents cash collections from customer payments on securitized receivables. These funds are distributed to investors as payments on the related secured debt.

(b) Represents credit enhancement in the form of cash reserves for various securitization transactions.

(c) For additional information on derivative instruments and hedging activities, refer to Note 19.

## 11. Deposit Liabilities

Deposit liabilities consisted of the following.

(\$ in millions)	June 30, 2014	December 31, 2013
Noninterest-bearing deposits	\$75	\$60
Interest-bearing deposits		
Savings and money market checking accounts	24,323	21,210
Certificates of deposit	31,295	31,640
Dealer deposits	398	440
Total deposit liabilities	\$56,091	\$53,350

At June 30, 2014, and December 31, 2013, certificates of deposit included \$13.2 billion and \$13.1 billion, respectively, of certificates of deposit in denominations of \$100 thousand or more.

## 12. Short-term Borrowings

The following table presents the composition of our short-term borrowings portfolio.

(\$ in millions)	June 30, 2014			December 31, 2013		
	Unsecured	Secured (a)	Total	Unsecured	Secured (a)	Total
Demand notes	\$3,340	\$—	\$3,340	\$3,225	\$—	\$3,225
Federal Home Loan Bank	—	2,750	2,750	—	3,570	3,570
Securities sold under agreements to repurchase (b)	—	279	279	—	1,500	1,500
Other (c)	—	—	—	—	250	250
Total short-term borrowings	\$3,340	\$3,029	\$6,369	\$3,225	\$5,320	\$8,545

(a) Refer to Note 13 for further details on assets restricted as collateral for payment of the related debt.

(b)

We periodically enter into term repurchase agreements, short-term borrowing arrangements in which we sell financial instruments to one or more investors while simultaneously committing to repurchase them at a specified future date, at the stated price plus accrued interest. The financial instruments sold under agreement to repurchase typically consist of U.S. government and agency securities.

(c) Other relates to secured borrowings at Corporate Finance at December 31, 2013.

## 13. Long-term Debt

The following table presents the composition of our long-term debt portfolio.

(\$ in millions)	June 30, 2014			December 31, 2013		
	Unsecured	Secured	Total	Unsecured	Secured	Total
Long-term debt						
Due within one year	\$6,634	\$12,577	\$19,211	\$5,321	\$11,851	\$17,172
Due after one year (a)	16,047	32,155	48,202	21,425	30,423	51,848
Fair value adjustment (b)	500	—	500	445	—	445
Total long-term debt	\$23,181	\$44,732	\$67,913	\$27,191	\$42,274	\$69,465

(a) Includes \$2.6 billion and \$2.6 billion of trust preferred securities at June 30, 2014 and December 31, 2013, respectively.

(b) Represents the fair value adjustment associated with the application of hedge accounting on certain of our long-term unsecured debt positions. Refer to Note 19 for additional information.

The following table presents the scheduled remaining maturity of long-term debt, assuming no early redemptions will occur. The actual payment of secured debt may vary based on the payment activity of the related pledged assets.

Year ended December 31, (\$ in millions)	2014	2015	2016	2017	2018	2019 and thereafter	Fair value adjustment	Total
Unsecured								
Long-term debt	\$1,760	\$5,026	\$1,934	\$4,059	\$1,278	\$10,115	\$500	\$24,672
Original issue discount	(90)	(57)	(66)	(78)	(92)	(1,108)	—	(1,491)
Total unsecured	1,670	4,969	1,868	3,981	1,186	9,007	500	23,181
Secured								
Long-term debt	5,328	13,891	11,116	8,218	3,395	2,784	—	44,732
Total long-term debt	\$6,998	\$18,860	\$12,984	\$12,199	\$4,581	\$11,791	\$500	\$67,913

The following summarizes assets restricted as collateral for the payment of the related debt obligation primarily arising from securitization transactions accounted for as secured borrowings and repurchase agreements.

(\$ in millions)	June 30, 2014		December 31, 2013	
	Total	Ally Bank (a)	Total	Ally Bank (a)
Investment securities	\$289	\$289	\$2,864	\$2,864
Mortgage finance receivables and loans	7,958	7,958	8,524	8,524
Consumer automobile finance receivables	35,443	13,176	32,947	12,332
Commercial automobile finance receivables	20,741	20,097	21,249	21,249
Investment in operating leases, net	4,931	3,614	5,810	3,190
Other assets	—	—	563	—
Total assets restricted as collateral (b)	\$69,362	\$45,134	\$71,957	\$48,159
Secured debt (c)	\$47,761	\$26,038	\$47,594	\$27,818

(a) Ally Bank is a component of the total column.

Ally Bank has an advance agreement with the Federal Home Loan Bank of Pittsburgh (FHLB) and had assets pledged to secure borrowings that were restricted as collateral to the FHLB totaling \$10.9 billion and \$12.7 billion at June 30, 2014, and December 31, 2013, respectively. These assets were composed primarily of consumer mortgage finance receivables and loans, net. Ally Bank has access to the Federal Reserve Bank Discount Window.

(b) Ally Bank had assets pledged and restricted as collateral to the Federal Reserve Bank totaling \$3.0 billion and \$3.2 billion at June 30, 2014, and December 31, 2013, respectively. These assets were composed of consumer automobile finance receivables and loans, net and investment in operating leases, net. Availability under these programs is only for the operations of Ally Bank and cannot be used to fund the operations or liabilities of Ally or its subsidiaries.

(c) Includes \$3.0 billion and \$5.3 billion of short-term borrowings at June 30, 2014, and December 31, 2013, respectively.

#### Funding Facilities

We utilize both committed and other credit facilities. The amounts outstanding under our various funding facilities are included on our Condensed Consolidated Balance Sheet.

As of June 30, 2014, Ally Bank had exclusive access to \$3.5 billion of funding capacity from committed credit facilities. Funding programs supported by the Federal Reserve and the FHLB, together with repurchase agreements, complement Ally Bank's private committed facilities.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

The total capacity in our committed funding facilities is provided by banks and other financial institutions through private transactions. The committed secured funding facilities can be revolving in nature and allow for additional funding during the commitment period, or they can be amortizing and not allow for any further funding after the closing date. At June 30, 2014, \$20.9 billion of our \$23.1 billion of committed capacity was revolving. Our revolving facilities generally have an original tenor ranging from 364 days to two years. As of June 30, 2014, we had \$11 billion of committed funding capacity from revolving facilities with a remaining tenor greater than 364 days.

## Committed Funding Facilities

(\$ in millions)	Outstanding		Unused Capacity (a)		Total Capacity	
	June 30, 2014	December 31, 2013	June 30, 2014	December 31, 2013	June 30, 2014	December 31, 2013
Bank funding						
Secured	\$2,500	\$2,750	\$1,000	\$250	\$3,500	\$3,000
Parent funding						
Secured (b)	16,009	15,159	3,617	6,497	19,626	21,656
Total committed facilities	\$18,509	\$17,909	\$4,617	\$6,747	\$23,126	\$24,656

Funding from committed secured facilities is available on request in the event excess collateral resides in certain (a) facilities or is available to the extent incremental collateral is available and contributed to the facilities.

(b) Includes the secured facility of Corporate Finance at December 31, 2013.

## 14. Accrued Expenses and Other Liabilities

The components of accrued expenses and other liabilities were as follows.

(\$ in millions)	June 30, 2014	December 31, 2013
Accounts payable	\$435	\$414
Reserves for insurance losses and loss adjustment expenses	283	275
Employee compensation and benefits	235	437
Fair value of derivative contracts in payable position (a)	205	317
Deferred revenue	139	122
Collateral received from counterparties	48	159
Other liabilities (b)	464	673
Total accrued expenses and other liabilities	\$1,809	\$2,397

(a) For additional information on derivative instruments and hedging activities, refer to Note 19.

(b) Included \$150 million accrual for insurance proceeds to be contributed to the ResCap estate at December 31, 2013.

(b) The outstanding accrual was paid in April 2014.

## 17. Earnings per Common Share

The following table presents the calculation of basic and diluted earnings per common share.

	Three months ended		Six months ended	
	June 30,		June 30,	
(\$ in millions, except share data)	2014	2013	2014	2013
Net income from continuing operations	\$283	\$100	\$481	\$160
Preferred stock dividends — U.S. Department of the Treasury	—	(133 )	—	(267 )
Preferred stock dividends	(65 )	(67 )	(133 )	(134 )
Net income (loss) from continuing operations attributable to common shareholders	218	(100 )	348	(241 )
Income (loss) from discontinued operations, net of tax	40	(1,027 )	69	6
Net income (loss) attributable to common shareholders	\$258	\$(1,127 )	\$417	\$(235 )
Basic weighted-average common shares outstanding (a)	481,350,249	412,600,700	480,563,267	412,600,700
Diluted weighted-average common shares outstanding (a) (b)	482,342,629	412,600,700	481,055,084	412,600,700
Basic earnings per common share				
Net income (loss) from continuing operations	\$0.45	\$(0.24 )	\$0.73	\$(0.58 )
Income (loss) from discontinued operations, net of tax	0.09	(2.49 )	0.14	0.01
Net income (loss)	\$0.54	\$(2.73 )	\$0.87	\$(0.57 )
Diluted earnings per common share				
Net income (loss) from continuing operations	\$0.45	\$(0.24 )	\$0.73	\$(0.58 )
Income (loss) from discontinued operations, net of tax	0.09	(2.49 )	0.14	0.01
Net income (loss)	\$0.54	\$(2.73 )	\$0.87	\$(0.57 )

(a) Includes 1.6 million shares related to share-based compensation that have vested but have not been issued as of June 30, 2014.

Due to the antidilutive effect of converting the Fixed Rate Cumulative Mandatorily Convertible Preferred Stock into common shares for the three months and six months ended June 30, 2013 and the net loss from continuing operations attributable to common shareholders for the three months and six months ended June 30, 2013, net income (loss) from continuing operations attributable to common shareholders and basic weighted-average common shares outstanding were used to calculate basic and diluted earnings per share.

The effects of converting the outstanding Fixed Rate Cumulative Mandatorily Convertible Preferred Stock into common shares are not included in the diluted earnings per share calculation for the three months and six months ended June 30, 2013 as the effects would be antidilutive for that period. As such, 178 million of the potential common shares were excluded from the diluted earnings per share calculation for the three months and six months ended June 30, 2013.

## 18. Regulatory Capital and Other Regulatory Matters

As a bank holding company, we and our wholly owned state-chartered banking subsidiary, Ally Bank, are subject to risk-based and leverage capital requirements issued by U.S. banking regulators that require us to maintain regulatory capital ratios above minimum levels. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary action by regulators that, if undertaken, could have a direct material effect on the consolidated financial statements or the results of operations and financial condition of Ally and Ally Bank. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets and certain off-balance sheet items. Our capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk-weightings, and other factors.

A risk-based capital ratio is the ratio of a banking organization's regulatory capital (numerator) to its risk-weighted assets (denominator). Under the existing Basel I capital rules, regulatory capital is divided into two tiers: Tier 1 capital and Tier 2 capital. Tier 1 capital generally consists of common equity, minority interests, qualifying noncumulative preferred stock, and the fixed rate cumulative preferred stock sold to Treasury under the Troubled Asset Relief Program (TARP), less goodwill and other adjustments. Tier 2 capital generally consists of perpetual preferred stock not qualifying as Tier 1 capital, limited amounts of subordinated debt and the allowance for loan losses, and other adjustments. The amount of Tier 2 capital may not exceed the amount of Tier 1 capital. Total regulatory capital is the sum of Tier 1 and Tier 2 capital. Under the existing Basel I capital rules, risk-weighted assets are determined by allocating assets and specified off-balance sheet financial instruments into several broad risk-weight categories with higher risk weights (expressed in percentage) assigned to asset classes that present greater perceived risk. Under the existing Basel I capital rules, banking organizations are required to maintain a minimum Total risk-based capital ratio (Total capital to risk-weighted assets) of 8% and a Tier 1 risk-based capital ratio (Tier 1 capital to risk-weighted assets) of 4%.

The U.S. banking regulators also have established minimum leverage capital ratio requirements. The Tier 1 leverage ratio is defined as Tier 1 capital divided by adjusted quarterly average total assets (which reflect adjustments for disallowed goodwill and certain intangible assets). Under the existing Basel I capital rules, the minimum U.S. Tier 1 leverage ratio is 3% or 4% depending on factors specified in the regulations.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Under the U.S. banking regulators' existing regulations, a banking organization meets the regulatory definition of "well-capitalized" when its Total risk-based capital ratio equals or exceeds 10% and its Tier 1 risk-based capital ratio equals or exceeds 6%; and for insured depository institutions, when its leverage ratio equals or exceeds 5%, unless subject to a regulatory directive to maintain higher capital levels. To maintain its status as a financial holding company, Ally and its bank subsidiary, Ally Bank, must remain "well-capitalized" and "well-managed," as defined under applicable law.

In the context of capital planning and stress testing, the U.S. banking regulators have also developed a measure of capital called "Tier 1 common," which is defined as Tier 1 capital less noncommon elements, including qualifying perpetual preferred stock, minority interest in subsidiaries, trust preferred securities, and mandatory convertible preferred securities. Tier 1 common is used by banking regulators, investors and analysts to assess and compare the quality and composition of Ally's capital with the capital of other financial services companies. Also, bank holding companies with total consolidated assets of \$50 billion or more, such as Ally, must develop and maintain a capital plan annually, and among other elements, the capital plan must include a discussion of how we will maintain a pro forma Tier 1 common risk-based capital ratio (Tier 1 common to risk-weighted assets) above 5% under expected conditions and certain stressed scenarios.

During 2010, Ally, IB Finance Holding Company, LLC, Ally Bank, and the Federal Deposit Insurance Corporation (FDIC) entered into a Capital and Liquidity Maintenance Agreement (CLMA). The effective date of the CLMA was August 24, 2010. The CLMA requires capital at Ally Bank to be maintained at a level such that Ally Bank's leverage ratio is at least 15%. For this purpose, the leverage ratio is determined in accordance with the FDIC's regulations related to capital maintenance.

The U.S. banking regulators have issued the U.S. Basel III final rules to replace the existing Basel I capital rules. Refer to Note 20 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K for additional information about the U.S. Basel III final rules and their applicability to Ally and Ally Bank. Compliance with evolving capital requirements is a strategic priority for Ally. We expect to be in compliance with all applicable requirements within the established timeframes.

The following table summarizes our capital ratios.

(\$ in millions)	June 30, 2014		December 31, 2013		Required minimum	Well-capitalized minimum
	Amount	Ratio	Amount	Ratio		
<b>Risk-based capital</b>						
<b>Tier 1 (to risk-weighted assets)</b>

n/a = not applicable

(a) Federal regulatory reporting guidelines require the calculation of adjusted quarterly average assets using a daily average methodology.

(b) There is no Tier 1 leverage component in the definition of "well-capitalized" for a bank holding company.

(c) Ally Bank, in accordance with the CLMA, is required to maintain a Tier 1 leverage ratio of at least 15%.

At June 30, 2014, Ally and Ally Bank were "well-capitalized" and met all capital requirements to which each was subject.

#### Capital Planning and Stress Tests

As a bank holding company with \$50 billion or more of consolidated assets, Ally is required to conduct periodic stress tests and submit a proposed capital plan to the Board of Governors of the Federal Reserve System (FRB) every January, which the FRB must take action on by the following March. The proposed capital plan must include a description of all planned capital actions over a nine-quarter planning horizon. The proposed capital plan must also include a discussion of how Ally will maintain capital above the minimum regulatory capital ratios and above a Tier 1 common equity-to-total risk-weighted assets ratio of 5%, and serve as a source of strength to Ally Bank. The FRB must approve Ally's proposed capital plan before Ally may take any proposed capital action.

In November 2013, the FRB issued instructions for the 2014 Comprehensive Capital Analysis and Review (CCAR) and the 2014 supervisory stress test scenarios. On January 6, 2014, Ally and Ally Bank submitted the 2014 capital plan and stress tests as required by the rules and the 2014 CCAR instructions, and in March 2014, the FRB indicated that it did not object to our 2014 capital plan. In addition, on

Ally Financial Inc. • Form 10-Q

July 7, 2014, in accordance with the requirements of the Dodd-Frank Act, Ally submitted to the FRB its results of a mid-year stress test conducted under multiple macroeconomic scenarios. Ally will disclose the results of the most severe scenario in September in accordance with regulatory requirements.

19. Derivative Instruments and Hedging Activities

We enter into interest rate, foreign-currency, and equity swaps, futures, forwards, options, and swaptions in connection with our market risk management activities. Derivative instruments are used to manage interest rate risk relating to specific groups of assets and liabilities, including automotive loan assets and debt. We use foreign exchange contracts to mitigate foreign-currency risk associated with foreign-currency-denominated debt, foreign exchange transactions, and our net investment in foreign subsidiaries. In addition, we also enter into equity option contracts to manage our exposure to the equity markets. Our primary objective for utilizing derivative financial instruments is to manage interest rate risk associated with our fixed and variable rate assets and liabilities, foreign exchange risks related to our foreign-currency denominated assets and liabilities, and market risks related to our investment portfolio.

Interest Rate Risk

We monitor our mix of fixed- and variable-rate assets and liabilities. When it is cost-effective to do so, we may enter into interest rate swaps, forwards, futures, options, and swaptions to achieve our desired mix of fixed- and variable-rate assets and liabilities. We execute interest rate swaps, forwards, futures, options, and swaptions to modify our exposure to interest rate risk by converting certain fixed-rate instruments to a variable-rate and certain variable-rate instruments to a fixed-rate. We use a mix of both derivatives that qualify for hedge accounting treatment and economic hedges.

Derivatives qualifying for hedge accounting consist of receive-fixed swaps designated as fair value hedges of specific fixed-rate debt obligations, pay-fixed swaps designated as fair value hedges of specific portfolios of fixed-rate held-for-investment retail automotive loan assets, and pay-fixed swaps designated as cash flow hedges of the expected future cash flows in the form of interest payments on certain outstanding variable-rate borrowings associated with our secured debt.

We also execute economic hedges, which consist of interest rate swaps and interest rate caps held to mitigate interest rate risk associated with our debt portfolio. Other economic hedges include interest rate swaps, futures, forwards, options, and swaptions to hedge our net fixed versus variable interest rate exposure.

In the past, we used a multitude of derivative instruments to manage interest rate risk related to MSRMs, mortgage loan commitments, and mortgage loans held-for-sale. They included, but were not limited to, interest rate swaps, forward sales of mortgage backed securities, interest rate futures contracts, options on U.S. Treasuries, swaptions, interest rate floors, and interest rate caps. Since we no longer have exposures to these activities, we no longer utilize these hedge strategies.

Foreign Exchange Risk

We enter into derivative financial instrument contracts to mitigate the risk associated with variability in cash flows related to our various foreign-currency exposures.

We enter into foreign-currency forwards with external counterparties as net investment hedges of foreign exchange exposure on our investments in foreign subsidiaries. However, we have reduced our foreign exchange exposure to net investments in foreign operations through the sales of discontinued international businesses. Refer to Note 2 for further details on these sales.

Our remaining foreign subsidiaries maintain both assets and liabilities in local currencies. These local currencies are generally the subsidiaries' functional currencies for accounting purposes. Foreign-currency-exchange-rate gains and losses arise when the assets or liabilities of our subsidiaries are denominated in currencies that differ from its functional currency. In addition, our equity is impacted by the cumulative translation adjustments resulting from the translation of foreign subsidiary results; this impact is reflected in our accumulated other comprehensive income (loss).

We utilize a cross-currency swap to economically hedge foreign exchange exposure on foreign-currency-denominated debt by converting the funding currency to our functional currency. This swap was entered into concurrent with the debt issuance with the terms of the derivative matching the terms of the underlying debt.

We also enter into foreign currency forwards to economically hedge our foreign-denominated debt, our centralized lending program, and foreign-denominated third party loans. The hedge of foreign-denominated debt was entered into concurrent with the debt issuance with the terms of the derivative matching the terms of the underlying debt. The centralized lending program manages liquidity for our subsidiary businesses, but as of June 30, 2014, this activity is immaterial. Foreign-currency-denominated loan agreements are executed with our foreign subsidiaries in their local currencies. We evaluate our foreign-currency exposure resulting from intercompany lending and manage our currency risk exposure by entering into foreign-currency derivatives with external counterparties. Our remaining foreign-currency derivatives, such as hedges of foreign-denominated third party loans, are recorded at fair value with changes recorded as income offsetting the gains and losses on the associated foreign-currency transactions.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Market Risk

We enter into equity options to economically hedge our exposure to the equity markets. We purchase options to assume a long position on certain equities and write options to assume a short position.

Counterparty Credit Risk

Derivative financial instruments contain an element of credit risk if counterparties are unable to meet the terms of the agreements. Credit risk associated with derivative financial instruments is measured as the net replacement cost should the counterparties that owe us under the contract completely fail to perform under the terms of those contracts, assuming no recoveries of underlying collateral as measured by the market value of the derivative financial instrument.

To mitigate the risk of counterparty default, we maintain collateral agreements with certain counterparties. The agreements require both parties to maintain collateral in the event the fair values of the derivative financial instruments meet established thresholds. In the event that either party defaults on the obligation, the secured party may seize the collateral. Generally, our collateral arrangements are bilateral such that we and the counterparty post collateral for the value of our total obligation to each other. Contractual terms provide for standard and customary exchange of collateral based on changes in the market value of the outstanding derivatives. The securing party posts additional collateral when their obligation rises or removes collateral when it falls. We also have unilateral collateral agreements whereby we are the only entity required to post collateral.

Certain derivative instruments contain provisions that require us to either post additional collateral or immediately settle any outstanding liability balances upon the occurrence of a specified credit risk-related event. If a credit risk-related event had been triggered, the amount of additional collateral required to be posted by us would have been insignificant.

We placed cash and securities collateral totaling \$194 million and \$328 million at June 30, 2014 and December 31, 2013, respectively, in accounts maintained by counterparties, \$18 million of which relates to non-derivative collateral at June 30, 2014 and December 31, 2013. We received cash collateral from counterparties totaling \$48 million and \$159 million at June 30, 2014 and December 31, 2013, respectively. The receivables for collateral placed and the payables for collateral received are included on our Condensed Consolidated Balance Sheet in other assets and accrued expenses and other liabilities, respectively. In certain circumstances, we receive or post securities as collateral with counterparties. We do not record such collateral received on our Condensed Consolidated Balance Sheet unless certain conditions are met. At June 30, 2014 and December 31, 2013, we received noncash collateral of \$12 million and \$18 million, respectively.

## Balance Sheet Presentation

The following table summarizes the fair value amounts of derivative instruments reported on our Condensed Consolidated Balance Sheet. The fair value amounts are presented on a gross basis, are segregated by derivatives that are designated and qualifying as hedging instruments or those that are not, and are further segregated by type of contract within those two categories. At June 30, 2014 and December 31, 2013, \$235 million and \$362 million, respectively, of the derivative contracts in a receivable position were classified as other assets on the Condensed Consolidated Balance Sheet. At June 30, 2014 and December 31, 2013, \$205 million and \$317 million of derivative contracts in a liability position were classified as accrued expenses and other liabilities on the Condensed Consolidated Balance Sheet.

Interest on long-term debt (b)	107	(215	) 141	(313
Gain (loss) recognized in earnings on hedged items (c)				
Interest rate contracts				
Interest and fees on finance receivables and loans	18	—	29	—
Interest on long-term debt	(107	) 225	(139	) 326
Total derivatives qualifying for hedge accounting	10	10	25	13
Economic derivatives				
(Loss) gain recognized in earnings on derivatives				
Interest rate contracts				
Servicing asset valuation and hedge activities, net	—	—	—	(112
Loss on mortgage and automotive loans, net	—	(5	) —	(37
Other income, net of losses	(11	) 7	(19	) 6
Total interest rate contracts	(11	) 2	(19	) (143
Foreign exchange contracts (d)				
Interest on long-term debt	(4	) (20	) (9	) 19
Other income, net of losses	—	1	—	29
Total foreign exchange contracts	(4	) (19	) (9	) 48
Loss recognized in earnings on derivatives	\$ (5	) \$ (7	) \$ (3	) \$ (82

Amounts exclude losses related to interest for qualifying accounting hedges of portfolios of retail automotive loans (a) held-for-investment of \$14 million and \$27 million for the three months and six months ended June 30, 2014.

These losses are primarily offset by the fixed coupon receipts on the retail automotive loans held-for-investment.

Amounts exclude gains related to interest for qualifying accounting hedges of debt, which are primarily offset by the fixed coupon payment on the long-term debt. The gains were \$27 million and \$28 million for the three months (b) ended June 30, 2014 and 2013, respectively, and \$62 million and \$61 million for the six months ended June 30, 2014 and 2013, respectively.

Amounts exclude gains related to amortization of deferred basis adjustments on the de-designated hedged item of (c) \$37 million and \$38 million for the three months ended June 30, 2014 and 2013, respectively, and \$82 million and \$76 million for the six months ended June 30, 2014 and 2013, respectively.

Amounts exclude gains and losses related to the revaluation of the related foreign-denominated debt or receivable.

Gains of \$6 million and \$18 million were recognized for the three months ended June 30, 2014 and 2013, (d) respectively. Gains of \$10 million and losses of \$47 million were recognized for the six months ended June 30, 2014 and 2013, respectively.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

The following table summarizes derivative instruments used in cash flow and net investment hedge accounting relationships.

(\$ in millions)	Three months ended		Six months ended	
	June 30, 2014	2013	June 30, 2014	2013
Cash flow hedges				
Interest rate contracts				
Loss reclassified from accumulated other comprehensive income to interest on long-term debt (a)	\$—	\$—	\$—	\$(7 )
Gain recorded directly to interest on long-term debt	—	1	—	1
Total interest on long-term debt	\$—	\$1	\$—	\$(6 )
Gain recognized in other comprehensive income	\$—	\$3	\$—	\$10
Net investment hedges				
Foreign exchange contracts				
Loss reclassified from accumulated other comprehensive income (loss) to income from discontinued operations, net	\$—	\$(112 )	\$—	\$(261 )
Total loss from discontinued operations, net	\$—	\$(112 )	\$—	\$(261 )
(Loss) gain recognized in other comprehensive income (b)	\$(9 )	\$158	\$2	\$327

(a) The amount represents losses reclassified from other comprehensive income (OCI) into earnings as a result of the discontinuance of hedge accounting because it is probable that the forecasted transaction will not occur.

The amounts represent the effective portion of net investment hedges. There are offsetting amounts recognized in accumulated other comprehensive income related to the revaluation of the related net investment in foreign (b) operations. There were losses of \$8 million and \$20 million for the three months ended June 30, 2014 and 2013, respectively. There were losses of \$27 million and \$539 million for the six months ended June 30, 2014 and 2013, respectively.

## 20. Income Taxes

We recognized total income tax expense from continuing operations of \$64 million and \$158 million during the three months and six months ended June 30, 2014, compared to income tax expense of \$40 million and an income tax benefit of \$83 million for the same periods in 2013. The increase in income tax expense for the three months ended June 30, 2014, compared to the same period in 2013, was driven by tax expense attributable to higher pretax earnings partially offset by a reduction in the liability for unrecognized tax benefits of approximately \$62 million that was recorded as a result of the completion of the U.S. federal audit related to our 2009 - 2011 tax years. The increase in income tax expense for the six months ended June 30, 2014, compared to the same period in 2013, was driven by tax expense attributable to higher pretax earnings and certain tax benefits recorded in the six months ended June 30, 2013, which did not occur in the six months ended June 30, 2014, related to the 2013 retroactive reinstatement of the active financing exception by the American Taxpayer Relief Act of 2012 and from the 2013 release of valuation allowance related to the measurement of foreign tax credit carryforwards anticipated to be utilized in the future.

As of each reporting date, we consider existing evidence, both positive and negative, that could impact our view with regard to future realization of deferred tax assets. We continue to believe it is more likely than not that the benefit for certain capital loss, foreign tax credit, and state net operating loss carryforwards will not be realized. In recognition of this risk, we continue to provide a partial valuation allowance on the deferred tax assets relating to these carryforwards.

The successful completion of the sale of our joint venture in China during 2014, which is currently held-for-sale as of June 30, 2014, may result in additional capital gains that would allow us to realize additional capital loss carryforwards. Any resulting reversal of valuation allowance on these deferred tax assets would be recognized as an income tax benefit upon such reversal.

21. Share-based Compensation Plans

Based on our transactions with Treasury during 2009, we are required to comply with certain limitations on executive pay as determined by the Special Master of TARP Compensation (Special Master). We have established stock salary, or Deferred Stock Units (DSUs), and TARP Stock, or Incentive Restricted Stock Units (IRSUs), as forms of compensation to our senior executives, which have been approved by the Special Master. We also granted Restricted Stock Units (RSUs) to executives under the Long-Term Equity Compensation Incentive Plan (LTIP), and have adopted the Ally Financial 2014 Incentive Compensation Plan, which allows us to grant an array of equity-based and cash incentive awards to our named executive officers and other employees and service providers (other than our non-employee directors). Each of our approved compensation plans and awards were designed to provide our executives with an opportunity to share in the future growth in value of Ally, which is necessary to attract and retain key executives.

Prior to our initial public offering (IPO) in April 2014, all share-based awards were settled in cash and required liability treatment under the accounting guidance. Accounting treatment for liability-classified awards requires compensation expense to be adjusted each period until the awards are settled based on the value of the underlying share price. Pursuant to the terms of the LTIP, the Ally Board of Directors is required to determine a share price valuation (Share Price Valuation) for share-based compensation awards not less than annually. The Share Price Valuation determined by the Board prior to the IPO, assisted by an independent advisor, considered, among other things, the stock price

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

performance, on an indexed basis, of publicly traded common stock issued by certain comparative companies and considered Ally's common stock as if it were freely tradable in the public markets. After the IPO, the share price valuation is based on the trading price for our stock. Also, after the IPO, certain awards, both existing and future grants, will be settled in stock and, as a result, will be accounted for as equity awards under the accounting guidance. For equity-classified awards, the compensation expense to be recognized over the vesting and service period is determined on the grant date. Certain awards will continue to require liability treatment and receive the same treatment as previously noted. For valuation purposes, we utilize Ally's share price as of the grant date and the end of each reporting period for determining the necessary share-based compensation expense, depending on the classification of the awards. The per-share fair value based on market price for purposes of share-based compensation was \$23.91 as of June 30, 2014.

**RSU Awards**

RSU awards are incentive awards that have been granted to executives as phantom shares of Ally. Prior to our IPO, these awards were paid in cash. As a result, RSU awards required liability treatment and were remeasured quarterly at the Share Price Valuation until they were paid. The compensation costs related to these awards were ratably charged to expense over the applicable service period. Changes in the value related to the portion of the awards that had vested and had not been paid were recognized in earnings in the period in which the changes occurred. After the IPO, the majority of existing RSU awards will settle in the form of Ally common stock, which changed the award classification from a liability award to an equity award. As a result of this classification change, a modification to the accounting for the existing awards was required. As part of the modification, the stock closing price on the date of the IPO (April 10, 2014) of \$23.98 was used as the modification date value, which resulted in the recording of an increase to additional paid-in capital of \$62 million, with a corresponding decrease in the liability. The remaining RSU cost for these awards, based on the modification date value, will be ratably charged to expense over the applicable service periods with an offset to additional paid-in capital. RSU awards granted in 2011 and 2012 can vest in one of two different methods. The first method allows vesting ratably over a three-year period starting on the date the award was issued, with awards fully vesting in February 2014 and February 2015. The second method allows vesting ratably over a two-year period, starting on the date the award was issued, with awards fully vesting in February 2013 and February 2014. RSU awards granted in 2013 and 2014 vest using a single method where vesting is ratable over a two-year period starting on the date the award was issued, with the majority of the awards fully vesting in January 2015 and January 2016. At June 30, 2014, there were a total of 4.2 million award shares outstanding. We recognized expense related to RSU awards of \$11 million and \$26 million for the three months and six months ended June 30, 2014, respectively. These costs were recorded as compensation and benefits expense in our Condensed Consolidated Statement of Comprehensive Income.

**DSU Awards**

DSU awards are granted to senior executives as phantom shares of Ally and are included as part of their base salary. DSU awards are generally granted ratably each pay period throughout the year, vest immediately upon grant, and are paid in cash. DSUs awarded in 2012, 2013 and 2014 will generally be redeemable in three equal installments: the first on the final payroll date of the respective year of grant, the second ratably over the first year following the grant date, and the third ratably over the second year following the grant date. The DSU awards require liability treatment and are remeasured monthly at fair value based on market price until they are paid, with each change in value fully charged to compensation expense in the period in which the change occurs. At June 30, 2014, there were a total of 3.5 million DSU award shares outstanding. We recognized a reduction of expense related to DSU awards of \$3 million for the three months ended June 30, 2014, and expense related to DSU awards of \$16 million for the six months ended June 30, 2014, for the outstanding awards, recorded to compensation and benefits expense in our Condensed Consolidated Statement of Comprehensive Income.

**IRSU Awards**

IRSU awards are incentive awards that have been granted to senior executives as phantom shares of Ally and vest based on continued service with Ally. IRSU awards from 2009 and 2010 have fully vested. The majority of IRSU awards from 2011 are also fully vested, with any remaining awards scheduled to vest by the end of 2014. There were no IRSU awards granted to senior executives in 2012. IRSU awards from 2013 vest two-thirds after two years from grant date and in full three years from grant date. After the vesting requirement is met, IRSU awards are paid in cash, and payouts are made only as we repay our TARP obligations. Payouts are allowed in 25% increments based on the percentage of TARP obligations that have been repaid, as determined in accordance with the established guidelines for determining "repayment." As of June 30, 2014, Ally had repaid 75% of its TARP obligations. Payouts are based on fair value of Ally shares at the time of the payout. The awards require liability treatment and are remeasured monthly at fair value based on market price until they are paid. The compensation costs related to these awards are ratably charged to expense over the requisite service period. Changes in value relating to the portion of the awards that have vested and have not been paid are recognized in earnings in the period in which the changes occur. At June 30, 2014, there were a total of 0.7 million IRSU award shares outstanding. We recognized a reduction of expense related to IRSU awards of \$2 million and \$3 million for the three months and six months ended June 30, 2014, respectively, for the outstanding awards, recorded to compensation and benefits expense in our Condensed Consolidated Statement of Comprehensive Income.

## 22. Fair Value

### Fair Value Measurements

For purposes of this disclosure, fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability (exit price) in the principal or most advantageous market in an orderly transaction between market participants at the measurement date. Fair value is based on the assumptions market participants would use when pricing an asset or liability. Additionally, entities are required to consider all aspects of nonperformance risk, including the entity's own credit standing, when measuring the fair value of a liability.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

GAAP specifies a three-level hierarchy that is used when measuring and disclosing fair value. The fair value hierarchy gives the highest priority to quoted prices available in active markets (i.e., observable inputs) and the lowest priority to data lacking transparency (i.e., unobservable inputs). An instrument's categorization within the fair value hierarchy is based on the lowest level of significant input to its valuation. The following is a description of the three hierarchy levels.

Inputs are quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 1 Additionally, the entity must have the ability to access the active market, and the quoted prices cannot be adjusted by the entity.

Inputs are other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices in active markets for similar assets or liabilities;

Level 2 quoted prices in inactive markets for identical or similar assets or liabilities; or inputs that are observable or can be corroborated by observable market data by correlation or other means for substantially the full term of the assets or liabilities.

Unobservable inputs are supported by little or no market activity. The unobservable inputs represent

Level 3 management's best assumptions of how market participants would price the assets or liabilities. Generally, Level 3 assets and liabilities are valued using pricing models, discounted cash flow methodologies, or similar techniques that require significant judgment or estimation.

Transfers into or out of any hierarchy level are recognized at the end of the reporting period in which the

transfer occurred. During the six months ended June 30, 2014, transfers from Level 3 into Level 2 included

Transfers \$78 million of derivative contracts in a receivable position and \$81 million of derivative contracts in a payable position based on increased observability of significant inputs related to the valuation of our interest rate caps. There were no additional transfers between any levels during the six months ended June 30, 2014.

Following are descriptions of the valuation methodologies used to measure material assets and liabilities at fair value and details of the valuation models, key inputs to those models, and significant assumptions utilized.

Available-for-sale securities — Available-for-sale securities are carried at fair value based on observable market prices, when available. If observable market prices are not available, our valuations are based on internally developed discounted cash flow models (an income approach) that use a market-based discount rate and consider recent market transactions, experience with similar securities, current business conditions, and analysis of the underlying collateral, as available. To estimate cash flows, we are required to utilize various significant assumptions including market observable inputs (e.g., forward interest rates) and internally developed inputs (including prepayment speeds, delinquency levels, and credit losses).

Mortgage loans held-for-sale, net — Our mortgage loans held-for-sale are accounted for at fair value because of fair value option elections. Mortgage loans held-for-sale are typically pooled together and sold into certain exit markets depending on underlying attributes of the loan, such as GSE eligibility, product type, interest rate, and credit quality.

Mortgage loans classified as Level 2 were mainly GSE-eligible mortgage loans carried at fair value due to fair value option election, which are valued predominantly using published forward agency prices. It also includes any domestic loans where recently negotiated market prices for the loan pool exist with a counterparty (which approximates fair value) or quoted market prices for similar loans are available.

Refer to the section within this note titled Fair Value Option for Financial Assets and Financial Liabilities for further information about the fair value elections.

MSRs — MSRs were classified as Level 3. Management estimated fair value using our transaction data and other market data or, in periods when there were limited MSR market transactions that were directly observable, internally developed discounted cash flow models (an income approach) were used to estimate the fair value. These internal valuation models estimated net cash flows based on internal operating assumptions that we believed would be used by market participants in orderly transactions combined with market-based assumptions for loan prepayment rates, interest rates, and discount rates that we believed approximate yields required by investors in this asset. Cash flows

primarily included servicing fees, float income, and late fees in each case less operating costs to service the loans. The estimated cash flows were discounted using an option-adjusted spread-derived discount rate. As of June 30, 2013, we no longer held such positions as a result of our exit from the mortgage servicing business.

Interests retained in financial asset sales — The interests retained are in securitization trusts and deferred purchase prices on the sale of whole-loans. Due to inactivity in the market, valuations are based on internally developed discounted cash flow models (an income approach) that use a market-based discount rate; therefore, we classified these assets as Level 3. The valuation considers recent market transactions, experience with similar assets, current business conditions, and analysis of the underlying collateral, as available. To estimate cash flows, we utilize various significant assumptions, including market observable inputs (e.g., forward interest rates) and internally developed inputs (e.g., prepayment speeds, delinquency levels, and credit losses).

Derivative instruments — We enter into a variety of derivative financial instruments as part of our risk management strategies. Certain of these derivatives are exchange traded, such as Eurodollar futures, options of Eurodollar futures, equity options, and centrally-cleared interest rate swaps. To determine the fair value of these instruments, we utilize the quoted market prices for the particular derivative contracts; therefore, we classified these contracts as Level 1.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

We also execute over-the-counter derivative contracts, such as interest rate swaps, a cross-currency swap, swaptions, forwards, caps, floors, and agency to-be-announced securities. We utilize third-party-developed valuation models that are widely accepted in the market to value these over-the-counter derivative contracts. The specific terms of the contract and market observable inputs (such as interest rate forward curves and interpolated volatility assumptions) are used in the model. We classified these over-the-counter derivative contracts as Level 2 because all significant inputs into these models were market observable. During the three months ended March 31, 2014, we began to value our bilateral interest rate swap and interest rate cap portfolio using Overnight Index Swap discount curves. We previously valued this portfolio using London Interbank Offered Rate (LIBOR) discount curves. Because we continued to use a third-party-developed valuation model in which all significant inputs were market observable, these contracts remained classified as Level 2.

Historically, we had a cross-currency swap and interest rate caps accounted for as derivative instruments that were classified as Level 3. However, at June 30, 2014, we do not have any positions classified as Level 3.

We are required to consider all aspects of nonperformance risk, including our own credit standing, when measuring fair value of a liability. We reduce credit risk on the majority of our derivatives by entering into legally enforceable agreements that enable the posting and receiving of collateral associated with the fair value of our derivative positions on an ongoing basis. In the event that we do not enter into legally enforceable agreements that enable the posting and receiving of collateral, we will consider our credit risk and the credit risk of our counterparties in the valuation of derivative instruments through a credit valuation adjustment (CVA), if warranted. The CVA calculation utilizes our credit default swap spreads and the spreads of the counterparty.

## Recurring Fair Value

The following tables display the assets and liabilities measured at fair value on a recurring basis including financial instruments elected for the fair value option. We often economically hedge the fair value change of our assets or liabilities with derivatives and other financial instruments. The tables below display the hedges separately from the hedged items; therefore, they do not directly display the impact of our risk management activities.

**Nonrecurring Fair Value**

We may be required to measure certain assets and liabilities at fair value from time to time. These periodic fair value measures typically result from the application of lower-of-cost or fair value accounting or certain impairment measures. These items would constitute nonrecurring fair value measures.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

The following tables display the assets and liabilities measured at fair value on a nonrecurring basis.

June 30, 2014 (\$ in millions)	Nonrecurring fair value measurements				Lower-of-cost or fair value or valuation reserve allowance	Total gain included in earnings for the three months ended	Total gain included in earnings for the six months ended

Ally Financial Inc. • Form 10-Q

The following table presents quantitative information regarding the significant unobservable inputs used in significant Level 3 assets measured at fair value on a nonrecurring basis.

June 30, 2014 (\$ in millions)	Level 3		Unobservable input	Range
	nonrecurring measurements	Valuation technique		
Assets				
Commercial finance receivables and loans, net				
Automotive	\$26	Fair value of collateral	Adjusted appraisal value	65.0-95.0%
Other	38	Discounted cash flow	Non-public/non-rated credits	91.0-109.0%

**Fair Value Option for Financial Assets**

We elected the fair value option for conforming and government-insured mortgage loans held-for-sale. We elected the fair value option to mitigate earnings volatility by better matching the accounting for the assets with the related hedges. Our intent in electing fair value measurement was to mitigate a divergence between accounting losses and economic exposure for certain assets and liabilities.

Excluded from the fair value option were conforming and government-insured loans funded on or prior to July 31, 2009, and repurchased or rerecognized. The loans funded on or prior to July 31, 2009, were ineligible because the election must be made at the time of funding. Repurchased and rerecognized conforming and government-insured loans were not elected because the election would not mitigate earning volatility. We repurchase or rerecognize loans due to representation and warranty obligations or conditional repurchase options. Typically, we will be unable to resell these assets through regular channels due to characteristics of the assets. Since the fair value of these assets is influenced by factors that cannot be hedged, we did not elect the fair value option.

We carried the fair value-elected conforming and government-insured loans as loans held-for-sale, net, on the Condensed Consolidated Balance Sheet. Our policy is to separately record interest income on the fair value-elected loans (unless they are placed on nonaccrual status); however, the accrued interest was excluded from the fair value presentation. Upfront fees and costs related to the fair value-elected loans were not deferred or capitalized. The fair value adjustment recorded for these loans was classified as gain (loss) on mortgage loans, net, in the Condensed Consolidated Statement of Comprehensive Income. In accordance with GAAP, the fair value option election is irrevocable once the asset is funded even if it is subsequently determined that a particular loan cannot be sold.

The following tables summarize the fair value option elections and information regarding the amounts recorded as earnings for each fair value option-elected item.

Three months ended June 30, (\$ in millions)	Changes included in the Condensed Consolidated Statement of Comprehensive Income		
	Interest on loans held-for-sale (a)	Gain (loss) on mortgage loans, net	Total included in earnings
2014			
Assets			
Mortgage loans held-for-sale, net	\$—	\$1	\$1
2013			
Assets			
Mortgage loans held-for-sale, net	\$3	\$(8)	\$(5)

- (a) Interest income is measured by multiplying the unpaid principal balance on the loans by the coupon rate and the number of days of interest due.
- (b) The credit impact for loans held-for-sale is assumed to be zero because the loans are either suitable for sale or are covered by a government guarantee.

## Fair Value of Financial Instruments

The following table presents the carrying and estimated fair value of financial instruments, except for those recorded at fair value on a recurring basis presented in the previous section of this note titled Recurring Fair Value. When possible, we use quoted market prices to determine fair value. Where quoted market prices are not available, the fair value is internally derived based on appropriate valuation methodologies with respect to the amount and timing of future cash flows and estimated discount rates. However, considerable judgment is required in interpreting market data to develop estimates of fair value, so the estimates are not necessarily indicative of the amounts that could be realized or would be paid in a current market exchange. The effect of using different market assumptions or estimation methodologies could be material to the estimated fair values. Fair value information presented herein was based on information available at June 30, 2014 and December 31, 2013.

(\$ in millions)	Carrying value	Estimated fair value			
		Level 1	Level 2	Level 3	Total
June 30, 2014					
Financial assets					
Loans held-for-sale, net (a)	\$3	\$—	\$3	\$—	\$3

Financial liabilities					
Deposit liabilities	\$56,091	\$—	\$—	\$56,877	\$56,877
Short-term borrowings	6,369	—	—	6,369	6,369
Long-term debt (a)	67,913	—	26,726	44,763	71,489
December 31, 2013					
Financial assets					
Loans held-for-sale, net (a)	\$35	\$—	\$17	\$18	\$35
Finance receivables and loans, net (a)	99,120	—	—	100,090	100,090
Nonmarketable equity investments	337	—	308	38	346
Financial liabilities					
Deposit liabilities	\$53,350	\$—	\$—	\$54,070	\$54,070
Short-term borrowings	8,545	—	—	8,545	8,545
Long-term debt (a)(b)	69,824	—	31,067	42,297	73,364

Includes financial instruments carried at fair value due to fair value option elections. Refer to the previous section (a) of this note titled Fair Value Option for Financial Assets and Liabilities for further information about the fair value elections.

(b) The carrying value includes deferred interest for zero-coupon bonds of \$359 million at December 31, 2013.

The following describes the methodologies and assumptions used to determine fair value for the significant classes of financial instruments. In addition to the valuation methods discussed below, we also followed guidelines for determining whether a market was not active and a transaction was not distressed. As such, we assumed the price that would be received in an orderly transaction (including a market-based return) and not in forced liquidation or distressed sale.

Cash and cash equivalents — Included in cash and cash equivalents are highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value due to interest rate, quoted price, or penalty on withdrawal. Classified as Level 1 under the fair value hierarchy, cash and cash equivalents generally expose us to limited credit risk and have no stated maturities or have short-term maturities and carry interest rates that approximate market. As such, the carrying value approximates the fair value of these instruments.

Loans held-for-sale, net — Loans held-for-sale classified as Level 2 included all GSE-eligible mortgage loans valued predominantly using published forward agency prices. It also included any domestic loans where recently negotiated market prices for the loan pool existed with a counterparty (which approximated fair value) or quoted market prices for similar loans were available. Loans held-for-sale classified as Level 3 included all loans valued using internally developed valuation models because observable market prices were not available. The loans were priced on a discounted cash flow basis utilizing cash flow projections from internally developed models that utilized prepayment, default, and discount rate assumptions. To the extent available, we utilized market observable inputs such as interest rates and market spreads. If market observable inputs were not available, we were required to utilize internal inputs, such as prepayment speeds, credit losses, and discount rates.

Finance receivables and loans, net — With the exception of mortgage loans held-for-investment, the fair value of finance receivables and loans was based on discounted future cash flows using applicable spreads to approximate current rates applicable to each category of finance receivables and loans (an income approach using Level 3 inputs). The carrying value of commercial

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

receivables in certain markets and certain automotive and other receivables for which interest rates reset on a short-term basis with applicable market indices are assumed to approximate fair value either because of the short-term nature or because of the interest rate adjustment feature. The fair value of commercial receivables in other markets was based on discounted future cash flows using applicable spreads to approximate current rates applicable to similar assets in those markets.

For consumer mortgage loans, we used valuation methods and assumptions similar to those used for mortgage loans held-for-sale. These valuations consider unique attributes of the loans such as geography, delinquency status, product type, and other factors. Refer to the section above titled Loans held-for-sale, net, for a description of methodologies and assumptions used to determine the fair value of mortgage loans held-for-sale.

Deposit liabilities — Deposit liabilities represent certain consumer and brokered bank deposits, mortgage escrow deposits, and dealer deposits. The fair value of deposits at Level 3 were estimated by discounting projected cash flows based on discount factors derived from the forward interest rate swap curve.

Short-term borrowings and Long-term debt — Level 2 debt was valued using quoted market prices for similar instruments, when available, or other means for substantiation with observable inputs. Debt valued using internally derived inputs, such as prepayment speeds and discount rates, was classified as Level 3.

## 23. Offsetting Assets and Liabilities

Our qualifying master netting agreements are written, legally enforceable bilateral agreements that (1) create a single legal obligation for all individual transactions covered by the agreement to the non-defaulting entity upon an event of default of the counterparty, including bankruptcy, insolvency, or similar proceeding, and (2) provide the non-defaulting entity the right to accelerate, terminate, and close-out on a net basis all transactions under the agreement and to liquidate or set off collateral promptly upon an event of default of the counterparty. As it relates to derivative instruments, in certain instances we have the option to report derivatives that are subject to a qualifying master netting agreement on a net basis, we have elected to report these instruments as gross assets and liabilities on the Condensed Consolidated Balance Sheet.

To further mitigate the risk of counterparty default related to derivative instruments, we maintain collateral agreements with certain counterparties. The agreements require both parties to maintain collateral in the event the fair values of the derivative financial instruments meet established thresholds. In the event that either party defaults on the obligation, the secured party may seize the collateral. Generally, our collateral arrangements are bilateral such that we and the counterparty post collateral for the value of our total obligation to each other. Contractual terms provide for standard and customary exchange of collateral based on changes in the market value of the outstanding derivatives. The securing party posts additional collateral when their obligation rises or removes collateral when it falls, such that the net replacement cost of the non-defaulting party is covered in the event of counterparty default.

The composition of offsetting derivative instruments, financial assets, and financial liabilities was as follows.

	Gross Amounts of Recognized Assets/(Liabilities)	Gross Amounts Not Offset				
		Gross Amounts Offset in the Condensed Consolidated Balance Sheet	Net Amounts of Assets/(Liabilities) Presented in the Condensed Consolidated Balance Sheet	in the Condensed Consolidated Balance Sheet		
June 30, 2014 (\$ in millions)		Balance Sheet	Balance Sheet	Financial Instruments	Collateral (a)	Net Amount

#### 24. Segment and Geographic Information

Operating segments are defined as components of an enterprise that engage in business activity from which revenues are earned and expenses incurred for which discrete financial information is available that is evaluated regularly by our chief operating decision maker in deciding how to allocate resources and in assessing performance.

We report our results of operations on a line-of-business basis through three operating segments - Automotive Finance operations, Insurance operations, and Mortgage operations, with the remaining activity reported in Corporate and Other. The operating segments are determined based on the products and services offered, and reflect the manner in which financial information is currently evaluated by management. The following is a description of each of our reportable operating segments.

**Automotive Finance operations** — Provides automotive financing services to consumers and automotive dealers. For consumers, we offer retail automotive financing and leasing for new and used vehicles, and through our commercial automotive financing operations, we fund dealer purchases of new and used vehicles through wholesale or floorplan financing.

**Insurance operations** — Offers both consumer financial and insurance products sold primarily through the automotive dealer channel, and commercial insurance products sold to dealers. As part of our focus on offering dealers a broad range of consumer finance and insurance products, we provide vehicle service contracts, maintenance coverage, and Guaranteed Automobile Protection (GAP) products. We also underwrite selected commercial insurance coverages, which primarily insure dealers' vehicle inventories.

Mortgage operations — Our ongoing Mortgage operations include the management of our held-for-investment mortgage portfolio.

Corporate and Other primarily consists of Corporate Finance, centralized corporate treasury activities, such as management of the cash and corporate investment securities portfolios, short- and long-term debt, retail and brokered deposit liabilities, derivative instruments, the amortization of the discount associated with new debt issuances and bond exchanges, and the residual impacts of our corporate funds-transfer pricing (FTP) and treasury asset liability management (ALM) activities. Corporate and Other also includes certain equity investments, overhead that was previously allocated to operations that have since been sold or classified as discontinued operations, and reclassifications and eliminations between the reportable operating segments.

We utilize an FTP methodology for the majority of our business operations. The FTP methodology assigns charge rates and credit rates to classes of assets and liabilities based on expected duration and the LIBOR swap curve plus an assumed credit spread. Matching duration allocates interest income and interest expense to these reportable segments so their respective results are insulated from interest rate risk. This methodology is consistent with our ALM practices, which includes managing interest rate risk centrally at a corporate level. The net residual impact of the FTP methodology is included within the results of Corporate and Other.

The information presented in our reportable operating segments and geographic areas tables that follow are based in part on internal allocations, which involve management judgment.

(e) Amounts include eliminations between our foreign operations.

## 25. Parent and Guarantor Condensed Consolidating Financial Statements

Certain of our senior notes issued by the parent are guaranteed by 100% directly owned subsidiaries of Ally (the Guarantors). As of June 30, 2014, the Guarantors include Ally US LLC and IB Finance Holding Company, LLC (IB Finance), each of which fully and unconditionally guarantee the senior notes on a joint and several basis.

The following financial statements present condensed consolidating financial data for (i) Ally Financial Inc. (on a parent company-only basis), (ii) the Guarantors, (iii) the nonguarantor subsidiaries (all other subsidiaries), and (iv) an elimination column for adjustments to arrive at (v) the information for the parent company, the Guarantors, and nonguarantors on a consolidated basis. The financial statements have been restated to reflect the dissolution of a former nonguarantor subsidiary, GMAC Mortgage Group LLC.

Investments in subsidiaries are accounted for by the parent company and the Guarantors using the equity-method for this presentation. Results of operations of subsidiaries are therefore classified in the parent company's and the Guarantors' investment in subsidiaries accounts. The elimination entries set forth in the following condensed consolidating financial statements eliminate distributed and undistributed income of subsidiaries, investments in subsidiaries, and intercompany balances and transactions between the parent, the Guarantors, and nonguarantors.

## 26. Contingencies and Other Risks

In the normal course of business, we enter into transactions that expose us to varying degrees of risk. For additional information on contingencies and other risks arising from such transactions, refer to Note 29 to the Consolidated Financial Statements in our 2013 Annual Report on Form 10-K.

#### Legal Proceedings

We are or may be subject to potential liability under various governmental proceedings, claims, and legal actions that are pending or otherwise asserted against us. We are named as defendants in a number of legal actions, and we are involved in governmental proceedings arising in connection with our respective businesses. Some of the pending actions purport to be class actions, and certain legal actions include claims for substantial compensatory and/or punitive damages or claims for indeterminate amounts of damages. We establish reserves for legal claims when payments associated with the claims become probable and the payments can be reasonably estimated. Given the inherent difficulty of predicting the outcome of litigation and regulatory matters, it is generally very difficult to predict what the eventual outcome will be, and when the matter will be resolved. The actual costs of resolving legal claims may be higher or lower than any amounts reserved for the claims.

On the basis of information currently available, advice of counsel, available insurance coverage, and established reserves, it is the opinion of management that the eventual outcome of the current actions against us will not have a material adverse effect on our consolidated financial condition, results of operations, or cash flows. However, it is possible that the ultimate resolution of legal matters, if unfavorable, may be material to our consolidated financial condition, results of operations, or cash flows in a particular period.

Table of Contents

Notes to Condensed Consolidated Financial Statements (unaudited)

Ally Financial Inc. • Form 10-Q

Regulatory Matters

Ally and its subsidiaries, including Ally Bank, are or may become involved from time to time in reviews, investigations, and proceedings (both formal and informal), and information-gathering requests, by government and self-regulatory agencies, including the FRB, FDIC, Utah Department of Financial Institutions (DFI), Consumer Financial Protection Bureau (CFPB), U.S. Department of Justice (DOJ), SEC, and the Federal Trade Commission regarding their respective operations. Such requests currently include subpoenas from each of the SEC and the DOJ. The subpoenas and document requests from the SEC include information covering a wide range of mortgage-related matters, and the subpoenas received from the DOJ include a broad request for documentation and other information in connection with its investigations of potential fraud and other potential legal violations related to mortgage-backed securities, as well as the origination and/or underwriting of mortgage loans.

Further, in December 2013, Ally Financial Inc. and Ally Bank entered into Consent Orders issued by the CFPB and the DOJ pertaining to the allegation of disparate impact in the automotive finance business, which resulted in a \$98 million charge in the fourth quarter of 2013. The Consent Orders require Ally to create a compliance plan addressing, at a minimum, the communication of Ally's expectations of Equal Credit Opportunity Act compliance to dealers, maintenance of Ally's existing limits on dealer finance income for contracts acquired by Ally, and monitoring for potential discrimination both at the dealer level and within our portfolio of contracts acquired across all dealers. Ally formed a compliance committee consisting of certain Ally and Ally Bank directors to oversee Ally's execution of the Consent Orders' terms. Failure to achieve certain remediation targets could result in the payment of additional amounts in the future.

Investigations, proceedings, regulatory actions, or information-gathering requests that Ally is, or may become, involved in may result in material adverse consequences including without limitation, adverse judgments, settlements, fines, penalties, injunctions, or other actions.

Loan Repurchases and Obligations Related to Loan Sales

Representation and Warranty Obligation Reserve

The representation and warranty reserve was \$37 million at June 30, 2014 with respect to our sold and serviced loans for which we have retained representation and warranty obligation, compared to \$45 million at December 31, 2013. The liability for representation and warranty obligations reflects management's best estimate of probable losses with respect to Ally Bank's mortgage loans sold to Freddie Mac and Fannie Mae.

Other Contingencies

We are subject to potential liability under various other exposures including tax, nonrecourse loans, self-insurance, and other miscellaneous contingencies. We establish reserves for these contingencies when the loss becomes probable and the amount can be reasonably estimated. The actual costs of resolving these items may be substantially higher or lower than the amounts reserved for any one item. Based on information currently available, it is the opinion of management that the eventual outcome of these items will not have a material adverse impact on our results of operations, financial position, or cash flows.

27. Subsequent Events

Declaration of Quarterly Dividend Payments

On July 17, 2014, the Ally Board of Directors declared quarterly dividend payments on certain outstanding preferred stock. This included a cash dividend of \$17.50 per share, or a total of \$45 million, on Fixed Rate Cumulative Perpetual Preferred Stock, Series G; and a cash dividend of \$0.53 per share, or a total of \$22 million, on Fixed Rate/Floating Rate Perpetual Preferred Stock, Series A. The dividends are payable to shareholders of record as of August 1, 2014 and are payable on August 15, 2014.

Estimated common equity Tier 1 — Basel III (fully phased-in)	\$12,624		\$12,624		
Risk-weighted assets (h) — Basel I	\$129,241		\$129,241		
Adjustments from Basel I to Basel III	3,847		3,847		
Estimated risk-weighted assets — Basel III (fully phased-in)	\$133,088		\$133,088		
Estimated common equity Tier 1 ratio — Basel III (fully phased-in)	9.49	%	9.49	%	

(a) The ratios were based on average assets and average equity using a combination of monthly and daily average methodologies.

(b)

Return on tangible common equity (ROTCE) represents GAAP net income available to common shareholders divided by a two-period average of tangible common equity, which is total shareholder's equity less preferred stock.

- (c) Net interest spread represents the difference between the rate on total interest-earning assets and the rate on total interest-bearing liabilities, excluding discontinued operations for the periods shown.
- (d) Net yield on interest-earning assets represents net financing revenue as a percentage of total interest-earning assets. Tier 1 capital generally consists of common equity, minority interests, qualifying noncumulative preferred stock,
- (e) and the fixed rate cumulative preferred stock sold to Treasury under the Troubled Asset Relief Program (TARP), less goodwill and other adjustments.

Total risk-based capital is the sum of Tier 1 and Tier 2 capital. Tier 2 capital generally consists of preferred stock (f) not qualifying as Tier 1 capital, limited amounts of subordinated debt and the allowance for loan losses, and other adjustments. The amount of Tier 2 capital may not exceed the amount of Tier 1 capital.

- (g) Tier 1 leverage equals Tier 1 capital divided by adjusted quarterly average total assets (which reflects adjustments for disallowed goodwill and certain intangible assets). The minimum Tier 1 leverage ratio is 3% or 4% depending on factors specified in the regulations.

We define Tier 1 common as Tier 1 capital less noncommon elements, including qualifying perpetual preferred stock, minority interest in subsidiaries, trust preferred securities, and mandatorily convertible preferred securities. Ally considers various measures when evaluating capital utilization and adequacy, including the Tier 1 common equity ratio, in addition to capital ratios defined by banking regulators. This calculation is intended to complement the capital ratios defined by banking regulators for both absolute and comparative purposes. Because GAAP does (h) not include capital ratio measures, Ally believes there are no comparable GAAP financial measures to these ratios.

Tier 1 common equity is not formally defined by GAAP or codified in the federal banking regulations and, therefore, is considered to be a non-GAAP financial measure. Ally believes the Tier 1 common equity ratio is important because we believe analysts and banking regulators may assess our capital adequacy using this ratio.

Additionally, presentation of this measure allows readers to compare certain aspects of our capital adequacy on the same basis to other companies in the industry.

- (i) Risk-weighted assets are defined by regulation and are determined by allocating assets and specified off-balance sheet financial instruments into several broad risk categories.

## Management's Discussion and Analysis

## Ally Financial Inc. • Form 10-Q

## Overview

Ally Financial Inc. (formerly GMAC Inc.) is a leading, independent, financial services firm. Founded in 1919, we are a leading automotive financial services company with approximately 95 years of experience, providing a broad array of financial products and services to automotive dealers and their customers. We operate as a financial holding company and a bank holding company. Our banking subsidiary, Ally Bank, is an indirect wholly owned subsidiary of Ally Financial Inc. and a leading franchise in the growing direct (internet, telephone, mobile, and mail) banking market.

## Initial Public Offering of Common Stock and Stock Split

In April 2014, we completed an initial public offering (IPO) of 95 million shares of common stock at \$25 per share. Proceeds from the offering amounted to \$2.4 billion, which were obtained by the U.S. Department of the Treasury (Treasury) as the single selling stockholder. In May 2014, the underwriters on the IPO elected to partially exercise the over-allotment option to purchase an additional 7,245,670 shares of Ally common stock at the IPO price of \$25 per share. In connection with the IPO, we effected a 310-for-one stock split on shares of our common stock, \$0.01 par value per share. Accordingly, all references in this MD&A and in the Condensed Consolidated Financial Statements to share and per share amounts relating to common stock have been adjusted, on a retroactive basis, to recognize the 310-for-one stock split.

## Discontinued Operations

We committed to dispose of certain operations of our Automotive Finance operations, Insurance operations, Mortgage operations, and Corporate Finance, and have classified these operations as discontinued. For all periods presented, the operating results for these operations have been removed from continuing operations. Refer to Note 2 to the Condensed Consolidated Financial Statements for more details. The MD&A has been adjusted to exclude discontinued operations unless otherwise noted.

## Primary Lines of Business

Dealer Financial Services, which includes our Automotive Finance and Insurance operations, and Mortgage are our primary lines of business. The following table summarizes the operating results excluding discontinued operations of each line of business. Operating results for each of the lines of business are more fully described in the MD&A sections that follow.

(\$ in millions)	Three months ended June 30,			Six months ended June 30,
