(Registrant's Address)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F	(18)	-----
Movement in net debt in the year	(917)	1,246
Net debt at start of year	(12,632)	(13,878)
Net debt at end of year	(13,549)	(12,632)
	=====	=====

During the year ended 31 March 2004 certain cross-currency swaps were terminated and £209m of cash was received. £61m of this cash flow was reported in the cash flow statement within the total of net cash outflow for returns on investments and servicing of finance amounting to £(692)m and £148m was reported within net cash inflow from financing. Termination of these cross-currency swaps also necessitated a retranslation of Euro denominated debt at new swapped rates amounting to £(140)m, which was reported within the exchange adjustments of £534m reported above.

10. Net debt

12. Differences between UK and US Generally Accepted Accounting Principles ("GAAP")

Summarised financial statements on a US GAAP basis are set out in the Annual Report and Accounts. Details of the principal differences between UK and US GAAP are shown below.

a) Reconciliation of net income to US GAAP

The following is a summary of the material adjustments to net income that would have been required if US GAAP had been applied instead of UK GAAP:

Years ended 31 March	2005	2004
		(restated) (i)
	£m	£m
	=====	=====

**12. Differences between
UK and US Generally
Accepted Accounting
Principles ("GAAP")**
(continued)
19.78p

Underlying business results exclude goodwill amortisation and exceptional items. For notes A, B and C - see REVIEW OF GROUP RESULTS below. * Statutory EPS last year included a 7.4p exceptional gain related to the Energis EPICs bond.

Sir John Parker, Chairman, said:

"Once again the Group has had a good year. This set of financial results demonstrates the strength of the Group's strategy aimed at delivering premium returns. The business is performing well. Our safety record has improved on our already very high standards and we were pleased to be ranked 2nd in the prestigious Business in the Community's 2004 Corporate Responsibility Index.

"Investment in our businesses, including acquisitions, has reached £3.0bn this year. Our organic and strategic investments are set to deliver further significant medium-term growth for shareholders. The process to obtain the final regulatory approvals required to complete the planned sales of four of our UK gas distribution networks is nearing completion, enabling us to return £2bn to shareholders.

All of these achievements are to the credit of our management and employees.

"The Board is recommending a 28% increase in the final dividend, leading to a 20% increase in the full year dividend and an almost 40% increase in the last 2 years. Reflecting the Group's financial strength and future prospects, we are also retaining our 7% per annum dividend growth target for the three years to March 2008."

**National Grid Transco
2004/05 Full Year Results**

OVERVIEW

The Group's strategy is based on driving strong operational performance, effective management of regulation and disciplined capital management. This strategy has delivered another good set of financial

results, with underlying earnings per share increasing 6% since last year, resulting in a total increase of 32% since the merger of National Grid Group and Lattice Group.

Underlying operating profit on a constant currency basis was up 3%. This primarily reflected the increases in underlying operating profit from Transmission and US Distribution, and the contribution from Crown Castle UK. These factors have more than offset the expected reduction in profits from UK Gas Distribution, caused largely by the planned increase in expenditure in the iron mains replacement programme (£86m) and the year-on-year reduction in transportation prices.

The Group is making good progress towards obtaining the required regulatory approvals to complete the sales of four of its UK gas networks, which are now expected to complete on 1 June 2005. With cash proceeds of £5.8bn, the sales represent a major step in value creation. Completion will enable both a £2.0bn return of value to the Group's shareholders and the repayment of around £2.3bn of debt.

The return of value will be by way of a B share scheme under which shareholders may opt to receive the return either as income or capital. It is planned that the Extraordinary General Meeting seeking shareholder approval for the B share scheme and the associated ordinary share capital consolidation will be held on the same day as the Annual General Meeting, 25 July 2005, with the return of value occurring during August.

REVIEW OF GROUP RESULTS

Turnover from continuing activities was £8.5bn, up £0.1bn, on a constant currency basis.

Underlying operating profit was £2,212m, up £64m from £2,148m, on a constant currency basis.

Despite the increases in interest rates during the year, the Group's net interest expense decreased by £7m to £783m on a constant currency basis.

Underlying profit before tax was up 5% from £1,358m to £1,429m on a constant currency basis.

The tax charge on underlying profit for the year was £324m and includes a credit in respect of prior years of £30m. The effective tax rate on underlying profits before the prior year tax credit was 25% while the effective tax rate, including the credit in respect of prior years, was 23%.

The weaker US dollar reduced underlying operating profit by £65m but, the net exchange rate impact on underlying earnings, after interest, tax, and minority interests, was £21m.

Underlying earnings and underlying earnings per share were both up 6% from last year, underlying earnings to £1,106m, up from £1,039m last year, and underlying earnings per share to 35.9p, up from 33.9p last year.

There were net exceptional charges (including both operating and non-operating exceptional items) totalling £168m before tax, comprising:

- Restructuring costs of £210m (£158m after tax), primarily in UK gas distribution, relating to both planned cost reduction programmes and the gas distribution network sales process
- Environmental charges of £41m (£26m after tax)
- Gains on sales of tangible fixed assets and businesses of £83m (£82m after tax)

After exceptional items and goodwill amortisation, basic earnings per share were 29.5p, down from 35.0p last year, when the Group had a significant net exceptional gain arising from the settlement of the Energis-related EPICs bond, which enhanced last year's earnings per share by 7.4p.

The Group generates strong cash flows and underlying cash flow from operations of £3.1bn was over £3bn for the third consecutive year since the completion of the merger between National Grid Group and Lattice Group.

The Group maintained its high levels of investment, with capital expenditure for the year of £1.4bn, including £187m relating to the Isle of Grain and Basslink projects. In addition, the Group invested £474m in replacement expenditure in UK gas distribution. With the Group's acquisition of the UK operations of Crown Castle International Corp. of £1.1bn, total investment was £3.0bn for the year.

Group net debt was up £0.9bn to £13.5bn at 31 March 2005. This mainly reflects the £1.1bn acquisition of the UK operations of Crown Castle International Corp.

A final dividend of 15.2p per ordinary share (\$1.3869 per American Depositary Share (ADS)) will be paid on 24 August 2005 to shareholders on the register as at 10 June 2005.

Note A: During 2004/05 the Group implemented FRS 20 (Share-based Payment). The figures for 2003/04 shown in the table have been restated for the impact of FRS 20.

Note B: "Underlying business results" represent the primary measures used by the Board and are presented before goodwill amortisation and exceptional items. The Board believes that exclusion of these items provides a better comparison of results from year face="Arial">

(b) Reconciliation of equity shareholders' funds to US GAAP

The following is a summary of the material adjustments to equity shareholders' funds that would have been required if US GAAP had been applied instead of UK GAAP:

At 31 March	2005	2004 (restated) (i)
	£m	£m
	=====	=====
Equity shareholders' funds under UK GAAP	1,359	1,221
	-----	-----
<i>Adjustments to conform with US GAAP</i>		
Fixed assets - impact of Lattice purchase accounting and replacement expenditure	7,421	7,318
Goodwill - purchase of Lattice	3,820	3,820
Pensions and other post-retirement benefits	(1,001)	(1,069)
Financial instruments	117	(285)
Severance and integration liabilities	65	3
Recognition of income	(21)	(35)
Goodwill - other acquisitions	233	245
Intangibles - other acquisitions	212	-

Restructuring - purchase of Lattice

(2)

Note C: "Constant currency basis" refers to the reporting of the actual current year results against the prior year analogous results which, in respect of any US\$ currency denominated activity, have been retranslated using the average US\$ exchange rate for the year ended 31 March 2005, which was \$1.87 to £1.00. The average rate for the year ended 31 March 2004 was \$1.68 to £1.00.

REVIEW OF OPERATIONS

TRANSMISSION

Year ended 31 March	2005 (£m)	2004 (£m) (restated)	% Change
Underlying operating profit			
UK electricity transmission	538	478	13
UK gas transmission	271	281	(4)
UK electricity and gas transmission	809	759	7
US electricity transmission			
- constant currency basis	123	119	3
- actual exchange rate	123	133	(8)

Underlying operating profit from UK electricity and gas transmission was up 7% at £809m compared with £759m last year. This reflected the beneficial timing impacts from the connections charging reform

("Plugs") of £54m and the collection of the under-recovery of electricity transmission owner revenue of £26m. These increases were partially offset by pension deficit charges, higher by £11m, and incentive profits, lower by £16m, against the backdrop of tougher regulatory targets in both the electricity and gas system operator incentive schemes. Transmission operator controllable costs, which exclude increases in ongoing pension costs, were reduced by 1% in real terms during the year.

The British Electricity Transmission and Trading Arrangements were successfully introduced on 1 April 2005. These extend the Group's System Operator role into Scotland. A new incentive scheme for network reliability was introduced on 1 January 2005, the initial period of which covers the 15 months through to 31 March 2006. Reliability performance since this scheme began has been encouraging.

The Group is working closely with Ofgem on the mini-review to extend the electricity transmission price control by one year to April 2007, with final proposals expected this autumn. It is anticipated that this review and the main 5-year review next year, will recognise the increased levels of investment that have already been committed and which will be necessary in the future on both asset replacement and new infrastructure. The Group also anticipates gas transmission investment rising sharply, with several major gas transmission pipelines over the next few years, reflecting required infrastructure changes as the UK increases imports of gas.

In the US, underlying operating profit from US electricity transmission was up £4m to £123m on a constant currency basis. This was primarily due to reduced costs.

The Group continues to be

Ordinary dividends	469	366
Tangible fixed assets - reversal of partial release of impairment provision	(29)	(32)
Regulatory assets	162	128
Deferred taxation	(2,224)	(1,876)
Other	10	21
	-----	-----
Total US GAAP adjustments	9,232	8,600
	-----	-----
Equity shareholders' funds under US GAAP	10,591	9,821
	=====	=====

i) During the year ended 31 March 2005, the Group adopted FRS 20 "Share-based Payment". As a result prior year UK GAAP comparatives have been restated - see note 1.

Appendix A - Impact of conversion from UK GAAP to IFRS

A summary of the changes in operating profit, earnings (or net income), EPS and net assets from UK GAAP to IFRS for the year ended 31 March 2005 is provided on a summarised basis in the tables below:

(a) Unaudited operating profit reconciliation from UK GAAP to IFRS

For the year ended 31 March 2005	Underlying (i)	Goodwill amortisation and exceptional items	Statutory
	£m	£m	£m
Year ended 31 March	2005 (£m)	2004 (£m) (restated)	% Change
Underlying operating profit	570	716	(20)
Replacement expenditure	474	388	22

Underlying operating profit from UK gas distribution was down £146m at £570m compared with £716m last year. Formula income declined £53m, primarily from reduced transportation prices, due to the timing of allowed revenue recoveries, exacerbated by a very mild winter. Revenues would have been some £70m higher if seasonal normal temperatures had occurred. The planned increase of replacement expenditure (repex), which is fully expensed, was £86m. The remainder of the year-on-year variance was due to a £17m increase in charges relating to gas commodity prices and a reduction in pension costs of £9m primarily due to deficit charges.

Further cost efficiencies have been achieved against the backdrop of substantial organisational change and the significant volume of work required to design and implement a new industry structure as a result of the planned network sales. Controllable costs, which exclude increases in ongoing pension costs and shrinkage gas commodity prices, decreased by 3% in real terms during the year and have now decreased 23% in real terms since March 2002.

The restructuring programme in the four retained networks is well advanced. This centralises many business processes on two key centres in the Midlands and is intended to facilitate improvements in efficiency and reduce controllable costs. This is particularly focused on bringing overheads into line with the smaller size of the retained business. The Group has also entered into 8-year alliances with key contractors to enhance the safe, efficient and sustainable delivery of the repex programme.

US DISTRIBUTION

Year ended 31 March	2005 (£m)	2004 (£m) (restated)	% Change
------------------------	-----------	-------------------------	----------

Underlying operating profit (constant currency basis)

US electricity and gas distribution	374	325	15
US stranded cost recoveries	121	121	-
	495	446	11

Operating profit - UK GAAP	2,212	(360)	1,852
<i>IFRS adjustments:</i>			
Replacement expenditure	336	-	336
Regulatory assets	269	(60)	209
Pensions and other	6	15	21

post-retirement
benefits

Goodwill amortisation	-	109	109
Profits on disposal of properties	62	-	62
Reclassification of share of JVs	(7)	-	(7)
Other	(12)	-	(12)
	-----	-----	-----
Operating profit - IFRS	2,866	(296)	2,570
	=====	=====	=====

(b) Unaudited pre-tax profit reconciliation from UK GAAP to IFRS

For the year ending 31 March 2005
(actual exchange rate)

US electricity and gas distribution	374	362	3
US stranded cost recoveries	121	134	(10)
	495	496	-

The performance of US electricity and gas distribution was particularly strong. Underlying operating profit was up 15% at £374m on a constant currency basis compared with £325m last year.

Electricity delivery volumes increased 0.5% compared to the prior year. On a weather adjusted basis, total electricity delivery volumes increased by 1.4% and by 1.7% in the important domestic sales category, adding £17m to underlying operating profit. The year-on-year weather effect reduced underlying operating profit by some £9m, primarily due to a cooler than normal summer.

US controllable costs have been reduced by 20% in real terms since 2001/02, including a £35m reduction since last year, due primarily to staffing reductions and the improved management of bad debts.

Good progress has been made on implementing a new contract reached last autumn with the labour union in New York. Together with the 2003 agreement with the New England unions, this will enable the business to increase productivity still further through more efficient working practices alongside additional benefits in terms of safety and service standards.

The Group's US operations generated very strong cash flow of £902m, almost £300m more than in 2003/04 due to lower pension and post retirement funding and the recovery of commodity costs.

WIRELESS INFRASTRUCTURE

Year ended 31 March	2005 (£m)	2004 (£m) (restated)	% Change
---------------------	-----------	----------------------	----------

Underlying operating profit	46	6	667
------------------------------------	----	---	-----

Underlying operating profit for the Group's Wireless Infrastructure business was up £40m at £46m due to the acquisition of the UK operations of Crown Castle International Corp. on 31 August 2004. The business is performing in line with the Group's expectations and the integration with the Group's existing business, Gridcom UK, is on schedule. More than half of the £18m annualised cash savings targeted for March 2006 have already been realised. With continued demand for new mobile tenancies and attractive prospects in broadcast, the business is on track to deliver strong profit growth.

OTHER ACTIVITIES

Year ended 31 March	2005 (£m)	2004 (£m) (restated)	% Change
Underlying operating profit	169	103	64

Underlying operating profit from the Group's Other activities (including joint ventures), was up £66m at £169m compared with £103m last year. This reflects increased property stock sales by Sear ended 31 March 2005

The first phase of the Group's Liquefied Natural Gas (LNG) import terminal at the Isle of Grain is targeted to commence commissioning next month. Cumulative investment has now reached £111m. In March, the Group announced a £355m investment to expand the terminal. This will see capacity triple by the end of 2008, providing around 12% of the UK's expected annual gas demand. These investments are underpinned by 20-year contracts signed with BP, Centrica, Gaz de France and Sonatrach. Completion of the Group's Basslink project in Australia, supported by a long term contract with Hydro Tasmania, has been delayed due to several transformers being damaged en route to Australia. Commissioning is now expected in the second quarter of 2006, but this delay will not impact the expected returns of the project.

INTERNATIONAL FINANCIAL REPORTING STANDARDS

These are the final set of results the Group will report under UK GAAP as next year's results will be reported under International Financial Reporting Standards (IFRS). To aid understanding of the Group's transition to IFRS, summary results under UK GAAP and IFRS are presented here. The IFRS figures are unaudited and may change as the Group finalises its analysis of the effects of IFRS.

The adoption of IFRS in the Group accounts represents an accounting change only, and will not affect the operations, cash flows or distributable reserves of the Group. Similarly, there will be no impact on the regulatory asset values or regulatory agreements of any of the Group's businesses.

The Group has adopted IAS 39 (Financial Instruments: Recognition and Measurement) from 1 April 2005 and therefore, the results presented under IFRS do not include any effects of that standard.

			=====

(i) The Group will report 'underlying' and 'statutory' performance measures under IFRS, in order to continue to provide a better illustration of the underlying business performance of the Group. Under UK GAAP, 'underlying' results exclude goodwill amortisation and exceptional items. Under IFRS, there is no goodwill amortisation and hence no need to exclude it for the purposes of showing 'underlying' results. IFRS 'underlying' results include profits or losses arising on the disposal of properties by SecondSite, the Group's property management business, which is considered to be part of the normal recurring operating activities of the Group. IFRS 'underlying' results exclude other material and significant non-recurring items or transactions that are similar in concept to exceptional items under UK GAAP. The impact of adjusting for goodwill amortisation and other material and significant non-recurring items is shown in the tables reconciling from UK GAAP to their equivalent IFRS measures.

Appendix A - Impact of conversion from UK GAAP to IFRS (continued)**(c) Unaudited earnings reconciliation from UK GAAP to IFRS**

For the year ended 31 March 2005	Underlying (i)	Goodwill amortisation and exceptional items	Statutory		
	£m	£m	£m		
	=====	=====	=====		
Earnings - UK GAAP	1,106	(198)	908		
<i>IFRS adjustments:</i>					
Replacement expenditure	236	-	236		
Regulatory assets	187	Earnings per share	29.5p	46.2p	57

As set out in the Group's presentation and announcement earlier this year, the most significant impacts from the adoption of IFRS arise from the change in accounting treatments for repex and regulatory assets. Other key areas that are affected include the treatment of pensions and other post-retirement benefits, profits on disposals of properties, deferred taxation and goodwill. These adjustments would have resulted in a higher underlying operating profit than that reported under UK GAAP in 2004/05 by some £654m and higher underlying earnings per share by around 16.0p.

The underlying effective tax rate under IFRS in 2004/05 would have been 27%. Going forward, the increase in underlying pre-tax profit from IFRS and the change in the mix of Group pre-tax profits following the sales of the gas distribution networks will result in an increase to the Group's underlying effective tax rate to around 30%. Draft legislation proposed by the UK government before the election but not due to be enacted until July may further impact the Group's effective tax rate.

Further detail on the Group's 2004/05 results under IFRS is included in appendix A to this release.

BOARD CHANGES

Following James Ross's retirement on 21 October 2004, the Board is delighted to welcome John Allan, Chief Executive of Exel plc, who has been appointed to the Board as a Non-Executive Director with effect from 1 May 2005.

OUTLOOK AND DIVIDEND POLICY

The Board remains confident in the Group's future prospects based upon the fundamental strengths of its businesses and the delivery of value from its strategy. The Group has strong medium term prospects with specific growth factors in each of the businesses, including revenue growth, capital investment opportunities and continued cost efficiencies. The Group will continue to maintain its disciplined approach to both organic and strategic investment.

With this confidence in future growth prospects, coupled with the Group's strong financial position and the planned network sales, the Board is recommending a 28% increase in the final dividend to 15.2p per ordinary share, (\$1.3869 per American Depositary Share (ADS)). The final dividend will be paid on 24 August 2005 to shareholders on the register as at 10 June 2005. Looking ahead, the Group retains its target to increase dividends per ordinary share expressed in sterling by 7% in each financial year up to 31 March 2008.

Cautionary statement

This announcement contains certain statements that are neither reported financial results nor other historical information. These statements are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Because these forward-looking statements are subject to assumptions, risks and uncertainties, actual future results may differ materially from those expressed in or implied by such statements. Many of these assumptions, risks and uncertainties relate to factors that are beyond National Grid Transco's ability to control or estimate precisely, such as delays in obtaining, or adverse conditions contained in, regulatory approvals, competition and industry restructuring, changes in economic conditions, currency fluctuations, changes in interest and tax rates, changes in energy market prices, changes in historical weather patterns, changes in laws, regulations or regulatory policies, developments in legal or public policy doctrines, the impact of changes to accounting standards, technological developments, the failure to retain key management, the availability of new acquisition opportunities or the timing and success of future acquisition opportunities. Other factors that could cause actual results to differ materially from those described in this announcement include the ability to continue to integrate the US and UK businesses acquired by or merged with National Grid Transco, the failure for any reason to achieve reductions in costs or to achieve operational efficiencies, unseasonable weather impacting on demand for electricity and gas, the behaviour of UK electricity market participants on system balancing, the timing of amendments in prices to shippers in the UK gas market, the performance of National Grid Transco's pension schemes and the regulatory treatment of pension costs, the impact of the separation and planned sales by National Grid Transco of four of its UK gas distribution networks and any adverse consequences arising from outages on or otherwise affecting energy networks owned and/or operated by National Grid Transco. For a more detailed description of these assumptions, risks and uncertainties, together with any other risk factors, please see National Grid Transco's filings with the US Securities and Exchange Commission (and in particular the "Risk Factors" and "Operating and Financial Review" sections in its most recent annual report on Form 20-F). Recipients are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this announcement. National Grid Transco does not undertake any obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date of this announcement.

(i) The Group will report 'underlying' and 'statutory' performance measures under IFRS, in order to continue to provide a better illustration of the underlying business performance of the Group. Under UK GAAP, 'underlying' results exclude goodwill amortisation and exceptional items. Under IFRS, there is no goodwill amortisation and hence no need to exclude it for the purposes of showing 'underlying' results. IFRS 'underlying' results include profits or losses arising on the disposal of properties by SecondSite, the Group's property management business, which is considered to be part of the normal recurring operating activities of the Group. IFRS 'underlying' results exclude other material and significant non-recurring items or transactions that are similar in concept to exceptional items under UK GAAP. - Before exceptional items and goodwill amortisation		1,429	2,095
			=====

The adjustments to net assets as summarised above are 'measurement' adjustments only. These are not intended to represent adjustments relating to balance sheet reclassifications, which will arise as a result of conversion to IFRS.

The unaudited differences between UK GAAP and IFRS as at 31 March 2005 set out above, do not reflect the impact of IAS39 which is being adopted by the Group with effect from 1 April 2005.

(ii) Business combinations - IFRS3 requires fair values to be attributed to certain items (e.g. intangibles) on a business combination, which are not recognised under UK GAAP. A corresponding reduction in goodwill (net of any deferred tax) arises as a result of this. The acquisition of the UK operations of Crown Castle International Corp. (Crown Castle UK) has resulted in recognition of certain intangibles, amounting to £188m at the date of acquisition, which are being amortised over the weighted average related assets useful lives of 17 years. In accordance with IFRS1, the Group has not restated any business combinations that occurred prior to 31 March 2004.
