Restricted Stock Award vesting and exercisable in four equal installments commencing 2/24/2016. The number of Restricted Stock Units ("RSUs") granted are not known at this time. The number of RSUs to be awarded to each individual is a function of base pay, a long-term incentive (LTI) percentage and the fair value of an RSU. The fair value of an RSU is calculated as the stock price as of the effective date

- (1) less the present value of Company stock dividends over the vesting period. This calculation requires the input of certain assumptions, including the risk-free interest rate and the expected Company stock dividends. The formula for determining the number of RSUs granted is: number of RSUs = (base pay x LTI%) / RSU fair value. This Form 4 will be amended to report the number of RSUs granted when the number has been calculated.
  - The number of options granted is not known at this time. The number is calculated as a function of base pay, a long-term incentive (LTI) percentage and the fair value of the option. The Binomial Lattice option valuation model will be used to estimate the fair value of the
- (2) option. This model requires the input of certain assumptions, including risk-free interest rate, volatility, dividend yield, and expected life. The formula for determining the number of options granted is: number of options = (base pay x LTI%)/option fair value. This Form 4 will be amended to report the number of options granted when that number has been calculated.
- (3) Granted under the issuer's 2010 Equity Incentive Plan, exercisable in four equal installments commencing on 2/24/2016.
