Forward-Looking Statements

In addition to historical information, this Annual Report on Form 10-K contains forward-looking statements, including statements regarding product plans, future growth, market opportunities, strategic initiatives, industry positioning, revenue growth, customer acquisition, the amount of recurring revenue and revenue growth, each of which involve risks and uncertainties that could cause actual results to differ materially from these forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in the section entitled “Risk Factors” in Part I, Item 1A of this report. You should carefully review the risks described herein and in other documents we file from time to time with the U.S. Securities and Exchange Commission (“the SEC”), including our Quarterly Reports on Form 10-Q to be filed in 2015. When used in this report, the words “will,” “expects,” “could,” “would,” “may,” “anticipates,” “intends,” “plans,” “believes,” “seeks,” “targets,” “estimates,” “looks for,” “continues” and similar expressions, as well as statements regarding our focus for the future, are generally intended to identify forward-looking statements. You should not place undue reliance on these forward-looking statements which speak only as of the date of this Annual Report on Form 10-K. We undertake no obligation to publicly release any revisions to the forward-looking statements or reflect events or circumstances after the date of this document, except as required by law.

PART I

ITEM 1. BUSINESS

Founded in 1982, Adobe Systems Incorporated is one of the largest and most diversified software companies in the world. We offer a line of products and services used by creative professionals, marketers, knowledge workers, application developers, enterprises and consumers for creating, managing, delivering, measuring, optimizing and engaging with compelling content and experiences across multiple operating systems, devices and media. We market and license our products and services directly to enterprise customers through our sales force and to end-users through app stores and our own website at www.adobe.com. We offer many of our products via a Software-as-a-Service (“SaaS”) model or a managed services model (both of which are referred to as a hosted or cloud-based model) as well as through term subscription and pay-per-use models. We also distribute certain products and services through a network of distributors, value-added resellers (“VARs”), systems integrators, independent software vendors (“ISVs”), retailers and original equipment manufacturers (“OEMs”). In addition, we license our technology to hardware manufacturers, software developers and service providers for use in their products and solutions. Our products run on personal and server-based computers, as well as on smartphones, tablets and other devices, depending on the product. We have operations in the Americas, Europe, Middle East and Africa (“EMEA”) and Asia-Pacific (“APAC”). See Note 18 of our Notes to Consolidated Financial Statements for further geographical information.

Adobe was originally incorporated in California in October 1983 and was reincorporated in Delaware in May 1997. We maintain executive offices and principal facilities at 345 Park Avenue, San Jose, California 95110-2704. Our telephone number is 408-536-6000 and our website is www.adobe.com. Investors can obtain copies of our SEC filings from this site free of charge, as well as from the SEC website at www.sec.gov. The information posted to our website is not incorporated into this Annual Report on Form 10-K.

BUSINESS OVERVIEW

For over 30 years, Adobe’s innovations have transformed how individuals, businesses and governments communicate and interact. Across these markets, we help our customers create and deliver the most compelling content and interactive experiences in a streamlined workflow, and optimize those experiences and marketing activities for greater return on investment. Our solutions turn ordinary interactions into valuable digital experiences, across media and devices, anywhere, anytime.

While we continue to market and license a broad portfolio of products and solutions, we focus our investments in two strategic growth areas:

Digital Media—providing tools, services and solutions that enable individuals, small and medium businesses and enterprises to create, publish and promote their content anywhere. Our customers include content creators, web designers, app developers and digital media professionals, as well as management in marketing departments and

agencies, companies and publishers. This is the core of what we have delivered for over 20 years, and we have evolved our business model rapidly to provide these customers with a more complete and integrated workflow across the variety of new devices, formats and business models that continue to emerge.

Digital Marketing—providing solutions and services for creating, managing, executing, measuring and optimizing digital advertising and marketing campaigns across multiple channels. Our customers include marketers, advertisers, agencies, publishers, merchandisers, web analysts, marketing executives, information management executives, and sales and support executives. We process over twenty-five trillion data transactions a year via our SaaS products, providing our customers with analytics, social,

Table of Contents

targeting, media optimization, digital experience management, cross-channel campaign management, and video solutions. This complements our digital media franchise, bringing together the art of creating and managing content with the science of measuring and optimizing it, enabling our customers to achieve their optimal business outcomes. We believe we are uniquely positioned to be a leader in both the Digital Media and Digital Marketing categories, where our mission is to change the world through digital experiences. By integrating products from each of these two areas of Adobe's business, our customers are able to utilize a comprehensive suite of solutions and services that no other entity currently offers. In addition, our ability to deliver innovation and productivity improvements across customer workflows involving the creation, management, delivery, measurement and optimization of rich and engaging content favorably positions Adobe as our customers invest more to engage their constituents digitally.

SEGMENTS

Our business is organized into three reportable segments: Digital Marketing, Digital Media and Print and Publishing. These segments provide Adobe's senior management with a comprehensive financial view of our key businesses. Our segments are aligned around the company's two strategic growth opportunities described above, placing our Print and Publishing business in a third segment that contains many of our mature products and solutions.

This overview provides an explanation of our market opportunities and a discussion of our strategies to address our market opportunities in fiscal 2015 and beyond for each of our segments. See Note 18 of our Notes to Consolidated Financial Statements for further segment information.

PRODUCTS AND SERVICES OVERVIEW

Digital Media

Digital Media Opportunity

Recent trends in digital communications, including ever increasing data speeds that enable greater usage by consumers of mobile devices and tablets to access online content and services, continue to provide a significant market opportunity for Adobe in digital media. Due to the increase in rich media consumed in digital environments and the rise of online social communities, the demand for digital media tools and solutions to create engaging online experiences is higher than ever. Adobe is in a unique position to capitalize on this opportunity by delivering rapid innovation to increase our customer reach, deepen engagement with communities and accelerate long-term revenue growth by focusing on a cloud-based model where our products and solutions are licensed on a subscription basis. The flagship of our Digital Media business is Creative Cloud—a subscription service that allows members to download and install the latest versions of our creative products such as Adobe Photoshop, Adobe Illustrator, Adobe Premiere Pro, Adobe Photoshop Lightroom and Adobe InDesign, as well as utilize other tools such as Adobe Acrobat. Creative Cloud members can also access online services to sync, store, and share files, participate in our Behance community of more than four million creative professionals, publish and deliver digital content via app stores, develop mobile apps, and create and manage websites. Adobe is redefining the creative process with Creative Cloud so that our customers can obtain everything they need to create, collaborate and deliver engaging digital content. Creative Cloud addresses the needs of creative professionals including graphic designers, production artists, web designers and developers, user interface designers, videographers, motion graphic artists, prepress professionals, video game developers, mobile application developers, students and administrators. They rely on our solutions for publishing, web design and development, video and animation production, mobile app and gaming development and document creation and collaboration. End users of our creative tools work in businesses ranging from large publishers, media companies and global enterprises, to smaller design agencies, small and medium-sized businesses and individual freelancers. Moreover, our creative products are used to create much of the printed and online information people see, read and interact with every day, including video, animation, mobile and advertising content. Knowledge workers, educators, hobbyists and high-end consumers also use our products to create and deliver creative content. In addition to Creative Cloud, our Digital Media business offers many of the products included in Creative Cloud on a standalone basis, including subscriptions to the Creative Cloud version of certain point products, and also offers a range of other creative tools and services, including our hobbyist products such as Adobe Photoshop Elements and Adobe Premiere Elements, Adobe Digital Publishing Suite, Adobe PhoneGap, Adobe Typekit and mobile apps such as Adobe Photoshop Mix, Adobe Photoshop Sketch and Adobe Premiere Clip that run on tablets and mobile devices. Further descriptions of our Digital Media products are included below under "Principal Products and Services".

Table of Contents

Adobe's Digital Media segment also includes our Document Services business, built around our Acrobat family of products, the Adobe Reader and a set of integrated cloud-based document services. For over two decades Adobe Acrobat has provided for the reliable creation and exchange of electronic documents, regardless of platform or application source type. Users can collaborate on documents with electronic comments and tailor the security of a file in order to distribute reliable Adobe PDF documents that can be viewed, printed or filled out utilizing our free Adobe Reader. Acrobat provides essential electronic document capabilities and services to help knowledge workers accomplish a wide range of tasks ranging from simple publications and forms to mission-critical engineering and architectural plans. With our Acrobat XI product and its innovative cloud services, we have extended the capabilities of our solution. Users can take advantage of electronic document signing with Adobe EchoSign, complete form management with Adobe FormsCentral, and utilize other features such as Adobe CreatePDF, ExportPDF and Acrobat.com.

Digital Media Strategy

Our goal is to be the leading provider of tools and services that allow individuals, small and medium businesses and enterprises to create, publish and monetize their content anywhere.

Creative Cloud, a subscription service with attractive monthly pricing, will be a catalyst for revenue growth in the coming years. The monthly subscription pricing model is attractive to users of older versions of our products who desire to use our latest releases and services, but who in the past have been unwilling to upgrade to newer versions due to price sensitivity. Similarly, we are gaining new customers and expect to continue to drive new user adoption of our creative tools business over the next several years outside of our core creative professional targeted market because of the attractive monthly subscription pricing combined with the strong brand of our creative tools and the broad value proposition provided by Creative Cloud. We anticipate that our sustained focus on a subscription model will continue to increase the amount of our recurring revenue that is ratably reported, driven by broader Creative Cloud adoption over the next several years.

To accelerate the adoption of Creative Cloud, we have focused on migrating existing users of our creative products from perpetual licenses to the subscription offering, as well as driving new customer adoption. Aspects of this strategy include: focusing future innovation by our engineering teams on delivering new cloud-based functionality, such as Creative Cloud Libraries, Adobe Shape CC and Adobe Brush CC, to enable our customers to use our creative tools and services across a variety of devices in ways that are not possible with previous desktop versions; increasing the value of Creative Cloud by delivering frequent product updates and enhancements to subscribers to address their content creation challenges; using promotions to attract customers to the offering; expanding our go-to-market reach through channel partners to reach new customers; and utilizing Creative Cloud for teams and Creative Cloud for enterprise offerings to drive broad adoption with customers who license our products in volume.

As part of our Creative Cloud strategy, we plan to utilize our digital marketing solutions to drive customer awareness of our creative products and improve conversion on our website and across other channels. Adobe.com is increasingly becoming the destination site where we engage individual and small business customers to sign up for and renew Creative Cloud subscriptions. We utilize affiliate and channel partners to target mid-size creative customers with our Creative Cloud for teams offering. Our direct sales force is focused on building relationships with our largest customers and driving adoption of our Creative Cloud for enterprise offering.

In our Document Services business, although Acrobat has achieved strong market adoption in document-intensive industries such as government, financial services, pharmaceutical, legal, aerospace, insurance and technical publishing, we believe there are tens of millions of users who still need the capabilities provided by Acrobat. We plan to continue to market the benefits of our Document Services solutions to small and medium-sized businesses, large enterprises and government institutions around the world and increase our seat penetration in these markets through the utilization of our corporate and volume licensing programs. We also intend to increase our focus on marketing and licensing Acrobat in targeted vertical markets such as education, financial services, telecommunications and government, as well as expanding into emerging markets, while simultaneously enhancing and building out the delivery of cloud-based document services to our Acrobat and Adobe Reader users. We intend to continue to promote the capabilities of our cloud-based EchoSign solution to millions of Acrobat users and hundreds of millions of Adobe Reader users. EchoSign provides a green alternative to costly paper-based solutions, and is an easier way for

customers to manage their contract workflows. We believe that by growing the awareness of EchoSign in the broader contract delivery and signing market, we can help our customers migrate away from paper-based express mailing and adopt our solution, growing our revenue with this business in the process.

Digital Marketing

Digital Marketing Opportunity

Consumers today increasingly demand personalized content and experiences in their online interactions, across multiple channels and devices. As a result, businesses or any entity with an online presence must figure out how to best attract, engage, acquire and retain customers in a world where the reach and quality of experiences directly impacts success. Delivering the best

Table of Contents

experience to a consumer at a given moment requires the right combination of data, insights and content. Marketing executives are increasingly demanding solutions that optimize their consumers' experiences and deliver the greatest return on their marketing spend so they can demonstrate the success of their programs using objective metrics. We believe there is a significant opportunity to address these challenges and help customers transform their businesses. Chief Marketing Officers ("CMOs"), digital marketers, advertisers and publishers are increasingly steering their marketing and advertising budgets toward digital media. As they make this move to digital, our market opportunity is accelerating as customers look for vendors to help them navigate this transition. However, marketing in a digital world is not simply about executing campaigns in each digital channel. Marketers, and entire enterprises, also need to ensure they deliver meaningful experiences to their consumers across both digital and traditional channels and in areas such as sales, support, and product interactions where consumers expect experiences to be personalized. Our Digital Marketing business targets this large and growing opportunity by providing comprehensive solutions that include analytics, social marketing, targeting, media optimization, digital experience management and cross-channel campaign management, as well as premium video delivery and monetization. We deliver these capabilities through our Adobe Marketing Cloud, an integrated offering enabling marketers to measure, personalize and optimize marketing campaigns and digital experiences across channels for optimal marketing performance. With its broad set of solutions, including Adobe Analytics, Adobe Target, Adobe Social, Adobe Media Optimizer, Adobe Experience Manager and Adobe Campaign, as well as real-time dashboards and a collaborative interface, customers of Adobe Marketing Cloud are able to combine data, insights and digital content to deliver a personalized brand experience to their consumers.

With the increase in the number of consumers that watch premium video content via the web on PC, tablet and mobile devices, the monetization of video delivery is an emerging opportunity within Adobe Marketing Cloud. To address this opportunity, we have worked closely with video content owners and distributors to develop and deliver Adobe Primetime, a modular platform that enables a more complete workflow to meet our customers' needs in areas such as video publishing, advertising and analytics. We believe customers using our Primetime solution can drive greater audience engagement, resulting in increased revenue from ad sales and subscriptions, while lowering operating costs. In addition to CMOs and digital marketers, users of our Adobe Marketing Cloud solutions include marketing professionals such as search engine marketers, media managers, media buyers and marketing research analysts. Customers also include web content editors, web analysts and web marketing managers. These customers often are involved in workflows that utilize other Adobe products, such as our Digital Media offerings and our video workflow and delivery technologies. By combining the creativity of our Digital Media business with the science of our Digital Marketing business, we help our customers to more efficiently and effectively make, manage, measure and monetize their content across every channel with an end-to-end workflow and feedback loop.

Our Digital Marketing segment also contains two legacy enterprise software offerings: our Adobe Connect web conferencing platform and Adobe LiveCycle, an enterprise document and forms platform. At the beginning of fiscal year 2012 we narrowed the focus of marketing and licensing of these products to financial services and government markets, driven by a subset of our enterprise sales force.

Digital Marketing Strategy

Our goal is to be the leading provider of marketing solutions and a standard for the way digital advertising and marketing is measured, managed, executed and optimized.

We believe that our success will be driven by focusing our efforts on making the Adobe Marketing Cloud the most comprehensive and integrated marketing solution available. Adobe Marketing Cloud consists of six key solutions-Adobe Analytics, Adobe Target, Adobe Social, Adobe Media Optimizer, Adobe Experience Manager and Adobe Campaign-as well as Adobe Primetime, the industry's leading online TV delivery platform. Adobe Marketing Cloud provides marketers with key capabilities, such as the ability to:

- Combine data across the Adobe Marketing Cloud solutions and third-party data sources, such as customer relationship management, point of sale, email, and survey, to create a single view of the consumer;
- Deliver personalized customer experiences across channels and on any device;
- Use predictive analytics to enable marketers to utilize past marketing program data and success to predict and drive their future success with digital marketing programs;

- Access all Adobe Marketing Cloud solutions from one centralized platform and visualize, socialize, and collaborate across teams with the interface;

Table of Contents

- Interact with creatives through integration with Creative Cloud, enabling content creators and marketers to collaborate and communicate in real time within a cloud-based platform;
- Accurately forecast and continually optimize their mix of campaigns across digital media;
- Provide robust cross-channel campaign management capabilities utilizing real-time insights, rich customer data and a sophisticated automation and execution platform;
- Manage, publish, track, and monetize social programs;
- Store, assemble, and distribute digital assets to deliver high-quality brand, campaign, and content experiences;
- Easily add, alter, and deploy marketing tags on websites, resulting in consistent page performance and accurate data collection; and

- Integrate with over 200-plus partners in 20-plus countries, covering the expansive digital marketing ecosystem.

To drive growth of Adobe Marketing Cloud, we also intend to streamline how customers learn about, acquire and deploy Adobe Marketing Cloud solutions. We believe we can accelerate the growth of our business by continuing to build out more direct sales capacity, as well as continuing to enable a rich ecosystem of agencies and systems-integrators who sell and service our solutions. We believe these investments will result in continued growth in revenue in our Digital Marketing segment in fiscal 2015 and beyond.

Print and Publishing

Our Print and Publishing segment contains legacy products and services that address diverse market opportunities including eLearning solutions, technical document publishing, web application development and high-end printing. Graphics professionals and professional publishers continue to require quality, reliability and efficiency in production printing, and our Adobe PostScript and Adobe PDF printing technologies provide advanced functionality to meet the sophisticated requirements of this marketplace. As high-end printing systems evolve and transition to fully digital, composite workflows, we believe we are uniquely positioned to be a supplier of software and technology based on the PostScript and Adobe PDF standards for use by this industry.

We generate revenue by licensing our technology to OEMs that manufacture workflow software, printers and other output devices. In fiscal 2014, we maintained a consistent quarterly revenue run-rate with the mature products we market and license in our Print and Publishing business.

PRINCIPAL PRODUCTS AND SERVICES

Digital Media Products

Creative Cloud

Creative Cloud is a subscription offering which significantly improves how creative professionals create rich and engaging content. It leverages shifts in the industry so that users can easily explore, create, publish and share their work across devices, the desktop and the web. With Creative Cloud membership, users have access to a vibrant global creative community, publishing services to deliver apps and websites, cloud storage to easily access their work, the ability to sync their files to virtually any device, collaboration capabilities with team members, and new products and exclusive updates as they are developed.

Creative Cloud members can build a Creative Profile which persists wherever they are. A user's Creative Profile moves with them via Creative Cloud services from app-to-app and device-to-device, giving them immediate access to their personal files, photos, graphics, colors, fonts, text styles, desktop setting customizations and other important assets.

New Creative Cloud services have been developed and delivered to subscribers to increase the utilization of Creative Cloud capabilities beyond the use of our desktop applications. New services include: Content, which provides users easy access to stock content; Libraries, an asset management service; and Creative Talent Search, connecting users with job opportunities and hiring managers. We believe services such as these will drive higher user interaction with Creative Cloud and create upsell opportunities as users increasingly utilize higher-tiered versions of such services. New mobile apps which run on tablets and smartphones enable connections between essential Creative Cloud desktop tools and a new family of mobile apps that extend the capabilities of Photoshop, Illustrator, Premiere Pro and Lightroom onto mobile devices. A new category of "capture" apps was also delivered, enabling users to create designs with tablets and bring them into their creative workflows.

Table of Contents

We license Creative Cloud to individuals and teams of users through Adobe.com either on a monthly subscription basis or as an annual subscription. Channel partners also license Creative Cloud with annual team subscriptions to small or medium-sized businesses, or to workgroups in enterprises. With larger enterprise customers, our direct sales force utilizes enterprise term license agreements (“ETLAs”), for volume-based agreements often for multi-year terms.

Photoshop

Photoshop is the world’s most advanced digital imaging software. It is used by photographers, designers, web professionals, and video professionals, and is available to Creative Cloud subscribers. Customers can also subscribe to Photoshop CC as an individual subscription product, or through our Creative Cloud Photography Plan which is an offer targeted at photographers and photo hobbyists and includes our popular Photoshop Lightroom product as a companion tool to Photoshop. We also offer Photoshop Elements separately, which is targeted at consumers who desire the brand and power of Photoshop through an easy-to-use interface. For tablet and phone users, we offer several mobile apps including Photoshop Sketch, Photoshop Mix, Lightroom Mobile and more—all of which enable sophisticated photo editing and content creation using a touch-based interface on tablet and mobile devices.

Illustrator

Illustrator is our industry-standard vector graphics software used worldwide by designers of all types who want to create digital graphics and illustrations for all kinds of media: print, web, interactive, video, and mobile. Illustrator is available to Creative Cloud subscribers, and customers can also subscribe to use it as an individual subscription product. Users can also utilize mobile apps such as Illustrator Draw (formerly Adobe Ideas) and Illustrator Line to gain access to Illustrator capabilities on their tablets and mobile devices, and sync their work through Creative Cloud services for use with Illustrator on their desktop.

InDesign

InDesign is the leading professional page layout software for print and digital publishing. Our customers use it to design, preflight, and publish a broad range of content including newspapers and magazines for print, online, and tablet app delivery. Customers can create simple or complex layouts quickly and efficiently with precise control over typography, built-in creative tools, and an intuitive design environment. Tight integration with other Adobe software such as Photoshop, Illustrator, Acrobat, and Adobe Flash Professional enables customers to work productively in print and digital workflows. Customers can also access Adobe Digital Publishing Suite from within InDesign to create and publish engaging apps for a broad range of devices, including iOS, Android and Amazon-based devices.

InDesign is built for designers, prepress and production professionals, and print service providers who work for magazines, design firms, advertising agencies, newspapers, book publishers, and retail/catalog companies, as well as in corporate design, commercial printing, and other leading-edge publishing environments. Customers using InDesign often use Adobe InCopy, a companion product used for professional writing and editing to enable an efficient collaborative workflow between design and editorial staff. InDesign and InCopy are available to Creative Cloud subscribers, and customers can also subscribe to use InDesign as an individual subscription product.

Adobe Premiere

Adobe Premiere is our powerful, customizable, nonlinear video editing tool used by video professionals. Customers can import and combine virtually any type of media, from video shot on a phone to raw 5K and higher resolution footage, and then edit in its native format without transcoding. The user interface includes a customizable timeline and numerous editing shortcuts which enable faster, keyboard-driven editing.

With the demands of shorter production schedules and high-resolution digital media formats, real-time performance is crucial to videographers. Premiere utilizes our Mercury Playback Engine to provide the fastest performance solution in the industry. It also supports a vast majority of formats, and customers can now use multiple GPU cards to accelerate render and export times. As part of Creative Cloud, Premiere tightly integrates with other Adobe creative applications. Customers can also subscribe to use it as an individual subscription product.

To address the increase in use of video capture and sharing on mobile devices, we offer Premiere Clip, which provides users with easy-to-use features to quickly edit and enhance video. We also offer an Elements version of Premiere, which is a powerful yet easy-to-use video-editing software for home video editing. Premiere Elements provides tools for hobbyists to quickly edit and enhance video footage with fun effects and transitions and create custom DVDs for sharing video with friends and family.

Table of Contents

After Effects

After Effects is our industry-leading animation and creative compositing software used by a wide variety of motion graphics and visual effects artists. It offers superior control, a wealth of creative options, and integration with other post-production applications. After Effects is available to Creative Cloud subscribers, and customers can also subscribe to use it as an individual subscription product.

Dreamweaver

Adobe Dreamweaver is our professional web development software development application used by designers and developers to create and edit HTML websites and mobile apps. Dreamweaver provides a broad range of capabilities for web publishing, enabling online commerce, and providing online customer service and educational content, and includes capabilities for visually designing HTML5 pages, coding HTML5 and application logic. As part of Creative Cloud, Dreamweaver tightly integrates with other Adobe creative applications. Customers can also subscribe to use it as an individual subscription product.

Flash Professional

Adobe Flash Professional provides an advanced development environment for creating interactive content which integrates animations, motion graphics, sound, text and additional video functionality. Content built with Flash Professional is deployed via the web to browsers that run Adobe Flash Player. Flash Professional is available to Creative Cloud subscribers, and customers can also subscribe to use it as an individual subscription product.

Adobe Muse

Adobe Muse is built for designers who want to create and publish HTML websites without writing code. Muse is available to Creative Cloud subscribers, or customers can subscribe to use it as an individual subscription product.

Edge Tools & Services

Our Edge web tools and services include: Edge Animate, a web motion and interaction design tool that allows designers to create animated content for websites, using web standards like HTML5, JavaScript and CSS3; Edge Inspect, an inspection and preview tool that allows front-end web developers and designers to efficiently preview and debug HTML content on mobile devices; Edge Code, a code editor, built on the Brackets open source project, optimized for web designers and developers working with HTML, CSS and JavaScript; Edge Reflow, a web design tool to help users create responsive layouts and visual designs with CSS; Edge Web Fonts, a free web font service for using a growing library of open source fonts on websites and in apps; Typekit, a service that gives designers and developers access to a library of hosted, high-quality fonts to use on their websites; and Adobe PhoneGap Build, a service for packaging mobile apps built with HTML, CSS and JavaScript for popular mobile platforms. Our Edge tools and services are available to Creative Cloud subscribers.

Digital Publishing Suite

Adobe Digital Publishing Suite is a complete solution that enables individual designers, traditional media publishers, large brand organizations, enterprise customers and ad agencies to transform their print publications into interactive digital reading experiences for tablet devices and phones. Consisting of hosted services and viewer technology, Digital Publishing Suite tightly integrates with our Creative Cloud applications for efficient design, distribution, and monetization of a new class of innovative magazines, newspapers, brand loyalty materials, merchandising content, marketing communications, and more. A wide range of media publishers have used Digital Publishing Suite to produce well-known titles. Businesses are also using Digital Publishing Suite to produce corporate publications. Digital Publishing Suite is offered to enterprise customers, and we also offer the Professional Edition and Single Edition to smaller organizations and individuals.

Typekit

Adobe Typekit is a subscription font service that brings thousands of fonts from foundry partners into one library for quick browsing, easy use on the web or on the user's desktop, and endless typographic inspiration.

Behance

Behance is the leading free online platform to showcase and discover creative work. Behance ProSite is a personal portfolio site builder that stays in sync with the user's projects on Behance and transforms a public Behance portfolio into a fully customized personal portfolio on the user's URL.

Table of Contents

Creative Talent Search

Adobe Creative Talent Search is a service that connects creatives across the globe with job opportunities from top brands and companies. Creative companies and hiring managers have access to powerful new tools to discover and engage with the talent they need.

Acrobat and Document Services

Adobe's Acrobat line of products is headlined by Adobe Acrobat Pro, which is the industry standard for PDF creation and conversion. Acrobat enables users to create secure, reliable and compact Adobe PDF documents from desktop authoring applications such as Microsoft Office software, graphics applications and more. Use of Acrobat enables automated collaborative workflows with a rich set of commenting tools and review tracking features; includes everything needed to create and distribute rich, secure electronic documents that can be viewed easily within leading web browsers or on computer desktops via the free Adobe Reader.

Acrobat Pro is available to Creative Cloud subscribers. Customers can also license Acrobat Pro or Acrobat Standard (which has a subset of Acrobat Pro features) as individual point products, either on a subscription or perpetual license, as well as other offerings from our Document Services business.

Through Acrobat.com we also offer a set of a cloud-based document and collaboration subscription services which provide simple PDF creation, centralized online file sharing and storage capabilities, and document/contract signing solutions. These services include Adobe CreatePDF, Adobe ExportPDF and Adobe EchoSign for safe electronic signatures.

All of our document service solutions utilize Adobe Reader, which is our free software for reliable viewing, searching, reviewing and printing of Adobe PDF documents on a variety of hardware and operating system platforms.

Adobe Marketing Cloud Solutions

Adobe Analytics

Adobe Analytics helps our customers create a holistic view of their business by turning consumer interactions into actionable insights. With intuitive and interactive dashboards and reports, our customers can sift, sort, and share real-time information to provide insights that can be used to identify problems and opportunities and to drive conversion and relevant consumer experiences. Adobe Analytics enables web, social, video and mobile analytics across online and offline channels to continuously improve the performance of marketing activities. It also provides the ability to perform advanced ad-hoc segmentation and to integrate data from offline and third-party sources.

Adobe Target

Adobe Target lets our customers test, target and personalize content across multiple devices. With Adobe Target, our customers have the tools they need to quickly discover what gets noticed, what increases conversion, and what keeps consumers coming back for more. Adobe Target paves a path from simple testing to targeting to true segmentation and optimization through A/B and multivariate testing, rules-based targeting and automated decision-making.

Adobe Social

Adobe Social provides marketers a comprehensive solution to build stronger connections through content guided by tangible data. Customers can create more relevant posts, monitor and respond to conversations, measure results, and connect social activities to business results. With Adobe Social, our customers can: manage social content and activities across multiple social networks and profile pages; listen and respond to consumer conversations in real time; create social campaigns; and track performance with integrated analytics.

Adobe Media Optimizer

Adobe Media Optimizer is a powerful ad management platform. Customers get a consolidated view of how their media is performing, along with tools to both accurately forecast and continually optimize their mix of paid campaigns across digital media. Media Optimizer includes cross-channel optimization capabilities, search engine marketing management, and display and social advertising management.

Adobe Experience Manager

Adobe Experience Manager helps customers organize, create, and manage the delivery of creative assets and other content across digital marketing channels, including web, mobile, email, communities and video. It enables customers to manage content

Table of Contents

on premise or host it in the cloud, delivering agile and rapid deployment. With this ultimate control of content and campaigns, customers are able to deliver relevant experiences to consumers that help build the customers' brand, drive demand and extend reach. Adobe Experience Manager includes digital asset management, web content management, integrated mobile app development, enterprise-level forms management, and social capabilities, providing customers with tools enabling users to improve their market and brand perception and provide a personalized experience to their consumers.

Adobe Campaign

Adobe Campaign enables marketers to orchestrate personalized experiences determined by each consumer's behaviors and preferences. As part of its feature set, it provides visual campaign orchestration, allowing for intuitive design and automated consumer experiences across channels, from one-off campaigns to triggered messages, with a graphically rich interface. Marketers can also integrate consumer data from across marketing channels to develop and deliver more relevant marketing experiences to their consumers. Features also included targeted segmentation, email execution, real-time interaction, and operational reporting to easily see how well campaigns are performing.

Emerging Digital Marketing Solution

Adobe Primetime

Adobe Primetime is a modular platform for video publishing, advertising, and analytics, enabling content programmers and distributors to profit from their video content by making every screen a TV—including PC, smartphone and tablet screens. Primetime consists of the following components: PayTV Pass, a universal system for validating access to pay TV content; DRM, which is digital rights management technology to protect video content from unauthorized copying or access; Ad Insertion, providing for the seamless insertion of ads into live and video-on-demand content; Ad Serving, the ability to determine which ads should be published; Video Analytics, which gives programmers and distributors the ability to measure, analyze and optimize online video delivery; and Audience Management, a data management platform that consolidates audience information to make it actionable from an ad or targeting perspective.

Other Digital Enterprise Solutions

Adobe Connect

Adobe Connect is a web conferencing platform for web meetings, eLearning, and webinars. It powers mission critical web conferencing solutions end-to-end, on virtually any device, and enables organizations from leading corporations to large governmental agencies to fundamentally improve productivity.

LiveCycle

Adobe LiveCycle Enterprise Suite is an enterprise document and form platform that helps enterprises capture and process information, deliver personalized communications, and protect and track sensitive information. Targeted at the financial services and government markets, LiveCycle extends business processes to an enterprise's mobile workforce and clients, increasing productivity while broadening service access to any user equipped with a desktop, smartphone, or tablet.

Other Products and Solutions

We offer a broad range of other digital media products and solutions. Information about other products not referenced here can be found on our corporate website, www.adobe.com, under the "Products" tab available in the "Menu".

COMPETITION

The markets for our products and services are characterized by intense competition, new industry standards, evolving business and distribution models, disruptive software and hardware technology developments, frequent new product introductions, short product life cycles, price cutting with resulting downward pressure on gross margins and price sensitivity on the part of consumers. Our future success will depend on our ability to enhance and better integrate our existing products, introduce new products on a timely and cost-effective basis, meet changing customer needs, provide best-in-class information security to build customer confidence and combat cyber-attacks, extend our core technology into new applications and anticipate and respond to emerging standards, business models, software delivery methods and other technological changes.

Digital Media

No single company has offerings identical to our Creative Cloud products and services, but we face collective competition from a variety of point offerings, free products and downloadable apps. Our competitors include offerings from companies such as Apple, Autodesk, Avid, Corel, Microsoft, Quark and others, as well as from many lower-end offerings available on touch-

Table of Contents

enabled devices via app stores, and from various open source initiatives. We believe our greatest advantage in this market is the scope of our integrated solutions, which work together as part of Creative Cloud. With Creative Cloud we also compete favorably on the basis of features and functionality, ease of use, product reliability, value and performance characteristics.

Professional digital imaging, drawing and illustration products are characterized by feature-rich competition, brand awareness and price sensitivity. Competition in this market is also emerging with drawing and illustration applications on tablet and smartphone platforms. The demand for professional web page layout and professional web content creation tools is constantly evolving and highly volatile. In this area we face direct and indirect competition from desktop software companies and various proprietary and open source web-authoring tools. Our Flash technologies face competition from alternative approaches to building rich content and web applications such as JavaFX, HTML5, native OS application programming environments and Unity.

The needs of digital imaging and video editing software users are constantly evolving due to rapid technology and hardware advancements in digital cameras, digital video cameras, printers, PCs, tablets, mobile phones and other new devices. Our imaging and video software offerings, including Photoshop, Lightroom, After Effects and Premiere, face competition from established and emerging companies offering similar products. We also continue to face competition from new and free products, including web services and mobile/tablet applications that compete directly with our Aviary offerings.

New image editing applications for mobile devices and tablets with features that compete with our professional products are also emerging as adoption of these devices grows. Our consumer digital imaging and video editing offerings are subject to intense competition, including customer price sensitivity, competitor brand awareness and competitor strength in OEM bundling and retail distribution. We face direct and indirect competition in the consumer digital imaging market from a number of companies that market software that competes with ours.

In addition, we face competition from device, hardware and camera manufacturers as they try to differentiate their offerings by bundling, for free, their own digital imaging software, or those of our competitors. Similarly, we face potential competition from operating system manufacturers as they integrate or offer hobbyist-level digital imaging and image management features with their operating systems. We also face competition from smartphone and tablet manufacturers that integrate imaging and video software into their devices to work with cameras that come as part of their smartphone and tablet offerings. In addition, new social networking platforms such as Facebook (including Instagram) and portal sites such as Google and Yahoo! are becoming a direct means to post, edit and share images, bypassing the step of using image editing and sharing software. Online storage and synchronization are becoming free and ubiquitous. Consumers in particular will be encouraged to use the image/video editing software associated with those sync/store products, thus competing with our software.

Competition is also emerging with imaging and video applications on smartphone and tablet platforms. Competitors are extending their products and feature sets to platforms such as Apple's iPhone and iPad, and other smartphone and tablet devices. Similarly, new cloud-based offerings continue to emerge which offer image editing and video-editing capabilities, as well as social and sharing features.

As customers such as publishers and media companies increase their desire to deliver their assets to new platforms such as mobile devices and tablets, we expect new and existing companies to continue to offer solutions that address these challenges that are competitive with our Digital Publishing Suite. Many design agencies are building capabilities to offer such solutions, and companies such as Amazon, Apple and Google offer an alternative format and business model for the delivery of newspaper and magazine content to mobile devices.

The nature of traditional digital document creation, storage, and collaboration has been rapidly evolving as knowledge workers and consumers shift their behavior increasingly to non-desktop workflows. Competitors like Microsoft, Google, Box and Dropbox all offer competitive alternatives to our Acrobat business for creating and managing PDFs. In addition, other PDF creation solutions can be found at a low cost, or for free, on the web. To address these competitive threats, we are working to ensure our Adobe Acrobat applications stay at the forefront of innovation in emerging opportunities such as PDF document generation, document collaboration and document security.

As electronic signatures with EchoSign are quickly becoming a core element of digital documents, competitors have been jumping in to take advantage of the growing space. DocuSign, Citrix, and others are incorporating competitive

e-signature technology into their platforms.

Digital Marketing

The markets in which our Digital Marketing business unit competes are growing rapidly and characterized by intense competition. Our Adobe Marketing Cloud solutions face competition from large companies such as Google, IBM, Oracle, salesforce.com, SAP, SAS, Teradata and others, in addition to point product solutions and focused competitors. Additionally, new competitors are constantly entering these markets. Some of these competitors provide SaaS solutions to customers, generally

Table of Contents

through a web browser, while others provide software that is installed by customers directly on their servers. In addition, we compete at times with our customers' or potential customers' internally developed applications. Of the competitors listed, no single company has products identical to our Adobe Marketing Cloud offerings. Adobe Marketing Cloud competes in a variety of areas, including: reporting and analytics; cross-channel marketing and optimization; online and social marketing; web experience management and others.

Many of the companies with which we compete offer a variety of products or services and as a result could also bundle their products or services, which may result in these companies effectively selling their products or services at or below market prices for individual products. In addition, large software, internet and database management companies have expanded their offerings in the digital marketing area, either by developing competing services or by acquiring existing competitors or strategic partners of ours. We believe competitive factors in our markets include the proven performance, security, scalability, flexibility and reliability of services; the strategic relationships and integration with third-party applications; the intuitiveness and visual appeal of user interfaces; demonstrable cost-effective benefits to customers; pricing; the flexibility of services to match changing business demands; enterprise-level customer service and training; perceived market leadership; the usability of services; real-time data and reporting; independence from portals and search engines; the ability to deploy the services globally; and success in educating customers in how to utilize services effectively. We believe we compete favorably with both the enterprise and low-cost alternatives based on many of these competitive factors including our strong feature set, the breadth of our offerings, our focus on global, multi-brand companies, our superior user experience, tools for building multi-screen, cross-channel applications, standards-based architecture, scalability and performance and leadership in industry standards efforts.

Creative and digital agencies are increasingly investing in acquiring their own digital marketing technology platforms to complement their creative services offerings. Adobe may face competition from these agencies as they come to market with best-of-breed offerings in one or more digital marketing capabilities, or if agencies attempt to create a more complete technology platform offering. We believe our creative tools heritage differentiates us from our competitors. We have worked closely with marketing and creative customers for over thirty years. We also believe we have leadership in this market, with current customers representing leading global brands. Our comprehensive solutions extend more broadly than any other company in serving the needs of marketers and addressing this market opportunity; we integrate content and data, analytics, personalization, web experience management, cross-channel campaign management and social capabilities in our Adobe Marketing Cloud, surpassing the reach of any competitor. Most importantly, we provide a vision for our digital marketing customers as we engage with them across the important aspects of their business, extending from their use of Creative Cloud, to how they manage, deliver, measure and monetize their content with our Adobe Marketing Cloud.

Print and Publishing

Our Print and Publishing product offerings face competition from large-scale electronic and web publishing systems, XML-based publishing companies as well as lower-end desktop publishing products. Depending on the product line, competition is based on a number of factors, including: the quality and features of products, ease-of-use, printer service support, the level of customization and integration with other publishing system components, the number of hardware platforms supported, service and price. We believe we can successfully compete based upon the quality and features of our products, our strong brand among users, the widespread adoption of our products among printer service bureaus, and our extensive application programming interface.

In printing technologies, we believe the principal competitive factors for OEMs in selecting a page description language or a printing technology are product capabilities, market leadership, reliability, price, support and engineering development assistance. We believe that our competitive advantages include our technology competency, OEM customer relationships and our intellectual property portfolio.

OPERATIONS

Marketing and Sales

We market and license our products directly using our sales force and through our own website at www.adobe.com. We also market and distribute our products through sales channels, which include distributors, retailers, software developers, systems integrators, ISVs and VARs, as well as through OEM and hardware bundle customers.

We support our end users through local field offices and our worldwide distribution network, which includes locations in Australia, Austria, Belgium, Brazil, Canada, Czech Republic, Denmark, Finland, France, Germany, India, Ireland, Italy, Japan, Korea, Mexico, Moldova, the Netherlands, Norway, Poland, Portugal, Romania, Singapore, South Africa, Spain, Sweden, Switzerland, Taiwan, Turkey, the United Kingdom and the United States.

We sell the majority of our products through a software subscription model where our customers purchase access to a product for a specific period of time and during which they always have rights to use the most recent version of that product. We

Table of Contents

also license perpetual versions of our software with maintenance and support, which includes rights to upgrades, when and if available, support, updates and enhancements.

For fiscal 2014 and 2013, there were no customers that represented at least 10% of net revenue. For fiscal 2012, Ingram Micro accounted for 11% of net revenue. Ingram Micro is a distributor who sells products across our various segments. We have multiple non-exclusive, independently negotiated distribution agreements with Ingram Micro and its subsidiaries covering our arrangements in specified countries and regions. Each of these contracts has an independent duration, is independent of any other agreement (such as a master distribution agreement) and any termination of one agreement does not affect the status of any of the other agreements.

In fiscal 2014 and 2013, no single customer was responsible for over 10% of our trade receivables.

Order Fulfillment Distribution

The procurement of the various components of packaged products, including DVDs and printed materials, and the assembly of packages for retail and other applications products is controlled by our product delivery operations organization. We outsource our procurement, production, inventory and fulfillment activities to third parties in the United States, EMEA and APAC.

To date, we have not experienced significant difficulties in obtaining raw materials for the manufacture of our products or in the replication of DVDs, printing and assembly of components.

Our evolution to a services and subscription-based business model has decreased the need to produce and distribute physical products. We still produce packaged products for a subset of our business, but that percentage is declining as the digital delivery of our services and subscriptions continues to grow.

Services and Support

We provide professional services, technical support and customer service across all our customer segments, including enterprises, small/medium businesses, creative professionals, and consumers. Our service and support revenue consists primarily of consulting fees, software maintenance and support fees and training fees.

Services

We have a global professional services team dedicated to designing, developing and implementing solutions for enterprise customers in key vertical markets and to transfer technical expertise to our solution partners. The professional services team uses a comprehensive, customer-focused methodology to develop high-quality solutions, which in turn deliver a competitive advantage to our enterprise customers. This methodology has been developed by capturing best practices from numerous client engagements across a diverse mix of solutions, industries, and customer preferences. Based on this methodology, our teams are able to accelerate the time to value and maximize the return our clients earn on their investment in Adobe solutions.

In addition, Adobe has also created a large and vibrant partner ecosystem that includes a mix of global System Integrators (“SIs”), regional SIs, VARs, Digital Agencies, and solution partners. Adobe invests to enable this ecosystem with the right skills and knowledge about our technologies and best practices. Consequently, this ecosystem provides our clients several different choices of partners, and a large accessible pool of skilled resources that can help deploy and manage Adobe solutions. This approach not only creates value for our customers and partners, but also creates a large and productive go-to-market channel for our sales teams.

Support

A portion of our support revenue is composed of our enterprise maintenance and support offerings. These offerings entitle customers to:

- the right to receive technical support on the technology they have purchased from Adobe;
- the right to receive basic “how to” help in using our products; and
- the right to receive product upgrades and enhancements during the term of the maintenance and support period, which is typically one year.

We offer a range of support programs, from fee-based incidents to annual support contracts. Additionally, we provide extensive self-help and online technical support capabilities via the web and through social media channels allowing customers

Table of Contents

quick and easy access to possible solutions. As a registered owner of the current version of an Adobe desktop product, customers are eligible to receive Getting Started support on certain matters. Support for some products and in some countries may vary.

We provide product support through a combination of outsourced vendors and internal support centers, and through multiple channels including phone, chat, web, social media, and email. These support services are delivered by a global support organization that includes several regional and global support centers. These teams are responsible for providing timely, high-quality technical expertise on all our products as well as providing proactive risk mitigation services.

We also offer delivery assurance and enablement services to partners and developer organizations. The Adobe Partner Connection Program focuses on providing developers with high-quality tools, software development kits, information and services.

Training

We offer a comprehensive portfolio of training options to enable our customer and partner teams in the use of our products. Our training portfolio includes free on-line informational services on www.adobe.com and a growing series of how-to books published by Adobe Press pursuant to a joint publishing agreement with Peachpit Press. We sponsor workshops, work with professional associations and user groups, and conduct regular beta testing programs. We also provide fee-based education services to enhance our customers' use of our solutions, including a wide range of traditional and online training and certifications delivered by our team of training professionals. Adobe's portfolio of technical training courses covers our Digital Media, Digital Marketing and other mature products and solutions.

Investments

We make direct investments in privately held companies. We enter into these investments with the intent of securing financial returns as well as for strategic purposes as they often increase our knowledge of emerging markets and technologies, as well as expand our opportunities to provide Adobe products and services.

PRODUCT DEVELOPMENT

As the software industry is characterized by rapid technological change, a continuous high level of investment is required for the enhancement of existing products and services and the development of new products and services. We develop our software internally as well as acquire products or technology developed by others by purchasing the stock or assets of the business entity that owned the technology. In other instances, we have licensed or purchased the intellectual property ownership rights of programs developed by others with license or technology transfer agreements that may obligate us to pay a flat license fee or royalties, typically based on a dollar amount per unit shipped or a percentage of the revenue generated by those programs.

During fiscal 2014, 2013 and 2012, our research and development expenses were \$844.4 million, \$826.6 million and \$742.8 million, respectively.

PRODUCT PROTECTION

We regard our software as proprietary and protect it under the laws of copyrights, patents, trademarks and trade secrets. We have a number of domestic and foreign patents and pending applications that relate to various aspects of our products and technology. While we believe our patents have value, no single patent is material to us or to any of our reporting segments. We protect the source code of our software programs as trade secrets and make source code available to third parties only under limited circumstances and subject to specific security and confidentiality constraints. From time to time, we secure rights to third-party intellectual property if beneficial to our business.

Our products are generally licensed to end users under one of the following two methods:

- We offer products on a "right to use" basis pursuant to a license that restricts the use of the products to a designated number of devices, users or both. We also rely on copyright laws and on "shrink wrap" and electronic licenses that (1) are not physically signed by the end user. Copyright protection may be unavailable under the laws of certain countries and the enforceability of "shrink wrap" and electronic licenses has not been conclusively determined in all jurisdictions.
- (2) We offer products under a SaaS or on-demand model, where hosted software is provided on demand to customers, generally through a web browser. The use of these products is governed by either the online terms of use or an

enterprise licensing agreement associated with the product.

Policing unauthorized use of computer software is difficult and software piracy is a persistent problem for the software industry. This problem is particularly acute in international markets. We conduct piracy conversion and prevention programs

Table of Contents

directly and through certain external software associations. In addition, we have activation technology in certain products to guard against illegal use and will continue to do so in certain future products.

EMPLOYEES

As of November 28, 2014, we employed 12,499 people. We have not experienced work stoppages and believe our employee relations are good.

AVAILABLE INFORMATION

Our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to reports filed or furnished pursuant to Sections 13(a) and 15(d) of the Securities Exchange Act of 1934, as amended, are available free of charge on our Investor Relations website at www.adobe.com/adbe as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. The information posted on our website is not incorporated into this report.

EXECUTIVE OFFICERS

Adobe's executive officers as of January 16, 2015 are as follows:

Name	Age	Positions
		President and Chief Executive Officer
Shantanu Narayen	51	Mr. Narayen currently serves as Adobe's President and Chief Executive Officer. Mr. Narayen joined Adobe in January 1998 as Vice President and General Manager of Adobe's engineering technology group. In January 1999, he was promoted to Senior Vice President, Worldwide Products and in March 2001 he was promoted to Executive Vice President, Worldwide Product Marketing and Development. In January 2005, Mr. Narayen was promoted to President and Chief Operating Officer and in December 2007, he was appointed Chief Executive Officer of Adobe and joined the Adobe Board of Directors. Prior to joining Adobe, Mr. Narayen co-founded Pictra Inc., a digital photo sharing software company, in 1996. He was Director of Desktop and Collaboration products at Silicon Graphics Inc. before founding Pictra. Mr. Narayen is also a director of Pfizer Inc. Executive Vice President, Chief Financial Officer
Mark Garrett	57	Mr. Garrett joined Adobe in February 2007 as Executive Vice President and Chief Financial Officer. Mr. Garrett served as Senior Vice President and Chief Financial Officer of the Software Group of EMC Corporation, a products, services and solutions provider for information management and storage, from June 2004 to January 2007, his most recent position since EMC's acquisition of Documentum, Inc., an enterprise content management company, in December 2003. Mr. Garrett first joined Documentum as Executive Vice President and Chief Financial Officer in 1997, holding that position through October 1999 and then re-joining Documentum as Executive Vice President and Chief Financial Officer in 2002. Mr. Garrett is also a director of Informatica Corporation and Model N, Inc.
Matthew Thompson	56	Executive Vice President, Worldwide Field Operations Mr. Thompson currently serves as Executive Vice President, Worldwide Field Operations. Mr. Thompson joined Adobe in January 2007 as Senior Vice President, Worldwide Field Operations. In January 2013, he was promoted to Executive Vice President, Worldwide Field Operations. Prior to joining Adobe, Mr. Thompson served as Senior Vice President of Worldwide Sales at Borland Software Corporation, a software delivery optimization solutions provider, from October 2003 to December 2006. Prior to joining Borland, Mr. Thompson was Vice President of Worldwide Sales and Field Operations for Marimba, Inc., a provider of products and services for software

change and configuration management, from February 2001 to January 2003. From July 2000 to January 2001, Mr. Thompson was Vice President of Worldwide Sales for Calico Commerce, Inc., a provider of eBusiness applications. Prior to joining Calico, Mr. Thompson spent six years at Cadence Design Systems, Inc., a provider of electronic design technologies. While at Cadence, from January 1998 to June 2000, Mr. Thompson served as Senior Vice President, Worldwide Sales and Field Operations and from April 1994 to January 1998 as Vice President, Worldwide Professional Services.

Table of Contents

Name	Age	Positions
		Senior Vice President, General Counsel and Corporate Secretary

Name	Age	Positions
		Senior Vice President and General Manager, Digital Media
David Wadhwani	43	Mr. Wadhwani serves as Senior Vice President and General Manager of Adobe's Digital Media business unit. Prior to June 2010, Mr. Wadhwani was Vice President and General Manager of Adobe's Platform business unit. He joined Adobe in 2005 through the acquisition of Macromedia. Prior to his time at Macromedia, Mr. Wadhwani founded and was VP of Engineering at iHarvest, a content management company that was acquired by Interwoven and worked at Oracle in their database tools division.
		Vice President, Corporate Controller and Chief Accounting Officer
Richard T. Rowley	58	Mr. Rowley joined Adobe in November 2006 as Vice President, Corporate Controller and Principal Accounting Officer. Prior to joining Adobe, Mr. Rowley served as Vice President, Corporate Controller, Treasurer and Principal Accounting Officer at Synopsys, Inc., a semiconductor design software company, from December 2002 to September 2005 and from 1999 to December 2002, Mr. Rowley served as Vice President, Corporate Controller and Principal Accounting Officer. From 1994 to 1999, Mr. Rowley served in several finance-related positions at Synopsys. Mr. Rowley is a certified public accountant.

ITEM 1A. RISK FACTORS

As previously discussed, our actual results could differ materially from our forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed below. These and many other factors described in this report could adversely affect our operations, performance and financial condition.

If we cannot continue to develop, market and offer new products and services or enhancements to existing products and services that meet customer requirements, our operating results could suffer.

The process of developing new high technology products and services and enhancing existing products and services is complex, costly and uncertain. If we fail to anticipate customers' changing needs and emerging technological trends, our market share and results of operations could suffer. We must make long-term investments, develop or obtain appropriate intellectual property and commit significant resources before knowing whether our predictions will accurately reflect customer demand for our products and services. If we are unable to extend our core technologies into new applications and new platforms and to anticipate or respond to technological changes, the market's acceptance of our products and services could decline and our results would suffer. Additionally, any delay in the development, production, marketing or offering of a new product or service or enhancement to an existing product or service could result in customer attrition or impede our ability to attract new customers, causing a decline in our revenues, earnings or stock price and weakening our competitive position. We maintain strategic relationships with third parties to market certain of our products and support certain product functionality. If we are unsuccessful in establishing or maintaining our strategic relationships with these third parties, our ability to compete in the marketplace, to reach new customers and geographies or to grow our revenues would be impaired and our operating results would suffer.

We offer our products on a variety of PC, tablet and mobile devices. Recent trends have shown a technological shift from personal computers to tablet and mobile devices. If we cannot continue to adapt our products to tablet and mobile devices our business could be harmed. To the extent that consumer purchases of these devices slow down, or to the extent that significant demand arises for our products or competitive products on other platforms before we offer our products on those platforms, our business could be harmed. Releases of new devices or operating systems may make it more difficult for our products to perform or may require significant costs in order for us to adapt our solutions to such devices or operating systems. These potential costs and delays could harm our business.

Introduction of new products, services and business models by existing and new competitors could harm our competitive position and results of operations.

The markets for our products and services are characterized by intense competition, evolving industry standards, emerging business and distribution models, disruptive technology developments, short product and service life cycles,

price sensitivity on the part of customers, and frequent new product introductions, including alternatives with limited functionality available at lower costs or free of charge. Any of these factors could create downward pressure on pricing and gross margins and could adversely affect our renewal and upgrade rates, as well as our ability to attract new customers. Our future success will depend on our ability to enhance our existing products and services, introduce new products and services on a timely and cost-effective basis, meet changing customer needs, extend our core technology into new applications, and anticipate and respond to emerging standards, business models, software delivery methods and other technological developments, such as the evolution and emergence of digital application marketplaces as a direct sales and software delivery environment. These digital application marketplaces often have

Table of Contents

exclusive distribution for certain platforms, which may make it more difficult for us to compete in these markets. If any competing products, services or operating systems (that don't support our solutions) achieve widespread acceptance, our operating results could suffer. In addition, consolidation has occurred among some of the competitors in the markets in which we compete. Further consolidations in these markets may subject us to increased competitive pressures and may therefore harm our results of operations.

For additional information regarding our competition and the risks arising out of the competitive environment in which we operate, see the section entitled "Competition" contained in Item 1 of this report.

If we fail to successfully manage transitions to new business models and markets, our results of operations could suffer.

We often release new offerings and employ new software and services delivery methods in connection with our diversification into new business models and markets. It is uncertain whether these strategies will prove successful or whether we will be able to develop the necessary infrastructure and business models more quickly than our competitors. Market acceptance of new product and service offerings will be dependent on our ability (1) to include functionality and usability that address certain customer requirements where our operating history is less extensive, and (2) to optimally price our products in light of marketplace conditions, our costs and customer demand. New product and service offerings could subject us to increased risk of liability related to the provision of services as well as cause us to incur significant technical, legal or other costs. For example, with our cloud-based services and subscription-based licensing models, such as Creative Cloud, we have entered markets that may not be fully accustomed to cloud-based subscription offerings. Market acceptance of such services is affected by a variety of factors, including information security, reliability, performance, social/community engagement, local government regulations regarding online services and user-generated content, the sufficiency of technological infrastructure to support our products in certain geographies, customer concerns with entrusting a third party to store and manage their data, public concerns regarding data privacy and the enactment of laws or regulations that restrict our ability to provide such services to customers in the U.S. or internationally. If we are unable to respond to these threats, our business could be harmed.

From time to time we open-source certain of our technology initiatives, provide broader open access to our technology, license certain of our technology on a royalty-free basis, and release selected technology for industry standardization. Additionally, customer requirements for open standards or open-source products could impact adoption or use of some of our products or services. To the extent we incorrectly predict customer requirements for such products or services, or if there is a delay in market acceptance of such products or services, our business could be harmed.

We also devote significant resources to the development of technologies and service offerings in markets where our operating history is less extensive. These new offerings and markets may require a considerable investment of technical, financial, compliance and sales resources, and a scalable organization. Some of our competitors may have advantages over us due to their larger presence, larger developer network, deeper market experience and larger sales, consulting and marketing resources. If we are unable to successfully establish new offerings in light of the competitive environment, our results of operations could suffer.

The increased emphasis on a cloud strategy may give rise to risks that could harm our business.

Over the past several years, our business has shifted away from pre-packaged creative software to focus on a subscription model that prices and delivers our products in a way that differs from the historical pricing and delivery methods of our creative tools. These changes reflect a significant shift from perpetual license sales and distribution of our software in favor of providing our customers the right to access certain of our software in a hosted environment or use downloaded software for a specified subscription period. This cloud strategy requires continued investment in product development and cloud operations, and may give rise to a number of risks, including the following:

- if customers desire only perpetual licenses or to purchase or renew only point product subscriptions rather than acquire the entire Creative Cloud offering, our subscription sales may lag behind our expectations;
- our cloud strategy may raise concerns among our customer base, including concerns regarding changes to pricing over time, service availability, information security of a cloud solution and access to files while offline or once a subscription has expired;

small businesses and hobbyists may turn to competitive or open-source offerings;

we may be unsuccessful in maintaining our target pricing, new seat adoption and projected renewal rates; we may select a target price that is not optimal and could negatively affect our sales or earnings; or we may have to rely heavily on promotional rates to achieve target seat adoption, which could reduce average revenue per user;

Table of Contents

the removal of general availability of Creative Suite 6 on a perpetual licensing basis from legacy shrinkwrap and volume licensing channels, which we announced during our second quarter of fiscal 2014, could further reduce our revenues in the short term as our business shifts to subscription revenue that is recognized ratably; and we may incur costs at a higher than forecasted rate as we expand our cloud operations.

Subscription offerings and ETLAs create risks related to the timing of revenue recognition.

Although the subscription model is designed to increase the number of customers who purchase our products and services and create a recurring revenue stream that is more predictable, it creates certain risks related to the timing of revenue recognition and potential reductions in cash flows.

A portion of the subscription-based revenue we report each quarter results from the recognition of deferred revenue relating to subscription agreements entered into during previous quarters. A decline in new or renewed subscriptions in any period may not be immediately reflected in our reported financial results for that period, but may result in a decline in our revenue in future quarters. If we were to experience significant downturns in subscription sales and renewal rates, our reported financial results might not reflect such downturns until future periods. Our subscription model could also make it difficult for us to rapidly increase our revenues from subscription-based or hosted services through additional sales in any period, as revenue from new customers will be recognized over the applicable subscription term. Further, any increases in sales under our subscription sales model could result in decreased revenues over the short term if they are offset by a decline in sales from perpetual license customers.

Additionally, in connection with our sales efforts to enterprise customers and our use of ETLAs, a number of factors could affect our revenues, including longer than expected sales and implementation cycles, potential deferral of revenue due to multiple-element revenue arrangements and alternate licensing arrangements. If any of our assumptions about revenue from our new businesses or our addition of a subscription-based model prove incorrect, our actual results may vary materially from those anticipated, estimated or projected.

We may be unable to predict subscription renewal rates and the impact these rates may have on our future revenue and operating results.

The hosted business model we utilize in our Adobe Marketing Cloud offerings typically involves selling services on a subscription basis pursuant to service agreements that are generally one to three years in length. Our individual Creative Cloud subscription agreements are generally month-to-month or one year in length, ETLAs for our Digital Media products and services are generally three years in length, and subscription agreements for other products and services may provide for shorter or longer terms. Although many of our service and subscription agreements contain automatic renewal terms, our customers have no obligation to renew their subscriptions for our services after the expiration of their initial subscription period, and some customers elect not to renew. We cannot provide assurance that these subscriptions will be renewed at the same or higher level of service, for the same number of seats/licenses or for the same duration of time, if at all. Moreover, under certain circumstances, some of our customers have the right to cancel their service agreements prior to the expiration of the terms of their agreements. We cannot be assured that we will be able to accurately predict future customer renewal rates. Our customers' renewal rates may decline or fluctuate as a result of a number of factors, including their level of satisfaction with our services, the reliability (including uptime) of our subscription services, the prices of our services, the perceived information security of our systems and services, the prices of services offered by our competitors, mergers and acquisitions affecting our customer base, reductions in our customers' spending levels, or declines in customer activity as a result of economic downturns or uncertainty in financial markets. If our customers do not renew their subscriptions for our services or if they renew on less favorable terms to us, our revenues may decline.

Our future growth is also affected by our ability to sell additional features and services to our current customers, which depends on a number of factors, including customers' satisfaction with our products and services, the prices of our offerings and general economic conditions. If our efforts to cross-sell and upsell to our customers are unsuccessful, the rate at which our business grows might decline.

Security vulnerabilities in our products and systems could lead to reduced revenues or to liability claims.

Maintaining the security of our products, computers and networks is a critical issue for us and our customers. Security researchers, criminal hackers and other third parties regularly develop new techniques to penetrate computer and network security measures and, as we have previously disclosed, certain parties have in the past managed to breach

certain of our data-security systems and misused certain of our systems and software in order to access our end users' authentication and payment information. In addition, cyber-attackers also develop and deploy viruses, worms and other malicious software programs, some of which may be specifically designed to attack our products, systems, computers or networks. Sophisticated hardware and operating system applications that we produce or procure from third parties may contain defects in design or manufacture, including bugs and other problems that could unexpectedly compromise the security of the system. The costs to eliminate or alleviate cyber or other security

Table of Contents

problems, bugs, viruses, worms, malicious software programs and security vulnerabilities are significant, and our efforts to address these problems may not be successful and could result in interruptions, delays, cessation of service and loss of existing or potential customers that may impede our sales, manufacturing, distribution or other critical functions, as well as potential liability to the company.

Outside parties have in the past and may in the future attempt to fraudulently induce our employees or users of our services to disclose sensitive information via illegal electronic spamming, phishing or other tactics. Unauthorized parties may also attempt to gain physical access to one of our facilities in order to infiltrate our information systems. These actual and potential breaches of our security measures and the accidental loss, inadvertent disclosure or unauthorized dissemination of proprietary information or sensitive, personal or confidential data about us, our employees or our customers, including the potential loss or disclosure of such information or data as a result of hacking, fraud, trickery or other forms of deception, could expose us, our employees, our customers or the individuals affected to a risk of loss or misuse of this information. This may result in litigation and potential liability or fines for us, or governmental inquiry and oversight, any of which could damage our brand and reputation, possibly impeding our present and future success in retaining and attracting new customers and thereby requiring time and resources to repair our brand image.

These problems affect our products and services in particular because cyber-attackers tend to focus their efforts on the most popular offerings (such as those with large bases of users), and we expect them to continue to do so. Critical vulnerabilities may be identified in certain of our applications. These vulnerabilities could cause such applications to crash and could allow an attacker to take control of the affected system, which could result in liability to us or limit our ability to conduct our business and deliver our products and services to customers. We devote significant resources to address security vulnerabilities through engineering more secure products, enhancing security and reliability features in our products and systems, code hardening, conducting rigorous penetration tests, deploying security updates to address security vulnerabilities and improving our incident response time, but these security vulnerabilities cannot be totally eliminated. The cost of these steps could reduce our operating margins, and we may be unable to implement these measures quickly enough to prevent cyber-attackers from gaining unauthorized access into our systems and products. Despite our preventative efforts, actual or perceived security vulnerabilities in our products and systems may harm our reputation or lead to claims against us (and have in the past lead to such claims), and could lead some customers to seek to return products, to stop using certain services, to reduce or delay future purchases of products or services, or to use competing products or services. If we do not make the appropriate level of investment in our technology systems or if our systems become out-of-date or obsolete and we are not able to deliver the quality of data security customers require, our business could be adversely affected. Customers may also increase their expenditures on security measures designed to protect their existing computer systems from attack, which could delay adoption of new technologies. Further, if we or our customers are subject to a future attack, or our technology is utilized in a third-party attack, it may be necessary for us to take additional extraordinary measures and make additional expenditures to take appropriate responsive and preventative steps. Any of these events could adversely affect our revenues or margins. Moreover, delayed sales, lower margins or lost customers resulting from the disruptions of cyber-attacks or preventative measures could adversely affect our financial results, stock price and reputation.

Some of our lines of business rely on us or our third-party service providers to host and deliver services and data, and any interruptions or delays in these hosted services, security or privacy breaches, or failures in data collection could expose us to liability and harm our business and reputation.

Some of our lines of business and services, including our online store at adobe.com, Creative Cloud, other hosted Digital Media offerings and our Adobe Marketing Cloud solutions, rely on hardware and services hosted and controlled directly by us or by our third-party service providers. We do not have redundancy for all of our systems, many of our critical applications reside in only one of our data centers, and our disaster recovery planning may not account for all eventualities. If our business relationship with a third-party provider of hosting or content delivery services is negatively affected, or if one of our content delivery suppliers were to terminate their agreement with us, we might not be able to deliver the corresponding hosted offerings to our customers, which could subject us to reputational harm and cause us to lose customers and future business, reducing our revenues.

We hold large amounts of customer data, some of which is hosted in third-party facilities. A security incident at those facilities or ours may compromise the confidentiality, integrity or availability of customer data. Unauthorized access to customer data stored on our computers or networks may be obtained through break-ins, breach of our secure network by an unauthorized party, employee theft or misuse, or other misconduct. It is also possible that unauthorized access to customer data may be obtained through inadequate use of security controls by customers. While our products and services provide and support strong password controls, IP restriction and account controls, their use is controlled by the customer. Accounts created with weak passwords could allow cyber-attackers to gain access to customer data. Additionally, failure by customers to remove accounts of their own employees, or granting of accounts by the customer in an uncontrolled manner, may allow for access by former or unauthorized customer representatives. If there were an inadvertent disclosure of personal information, or if a third party were to gain unauthorized access to the personal information we possess on behalf of our customers, our operations could be disrupted, our reputation could be damaged and we could be subject to claims or other liabilities. In addition, such perceived or actual unauthorized disclosure of

Table of Contents

the information we collect or breach of our security could damage our reputation, result in the loss of customers and harm our business.

Because of the large amount of data that we collect and manage on behalf of our customers, it is possible that hardware or software failures or errors in our systems (or those of our third-party service providers) could result in data loss or corruption or cause the information that we collect to be incomplete or contain inaccuracies that our customers regard as significant. Furthermore, our ability to collect and report data may be delayed or interrupted by a number of factors, including access to the internet, the failure of our network or software systems, security breaches or significant variability in visitor traffic on customer websites. In addition, computer viruses may harm our systems causing us to lose data, and the transmission of computer viruses could expose us to litigation. We may also find, on occasion, that we cannot deliver data and reports to our customers in near real time because of a number of factors, including significant spikes in customer activity on their websites or failures of our network or software. If we supply inaccurate information or experience interruptions in our ability to capture, store and supply information in near real time or at all, our reputation could be harmed and we could lose customers, or we could be found liable for damages or incur other losses.

Uncertainty about current and future economic conditions and other adverse changes in general political conditions in any of the major countries in which we do business could adversely affect our operating results.

As our business has grown, we have become increasingly subject to the risks arising from adverse changes in economic and political conditions, both domestically and globally. Uncertainty about current and future economic and political conditions on us, our customers, suppliers and partners, makes it difficult for us to forecast operating results and to make decisions about future investments. If economic growth in countries where we do business slows, customers may delay or reduce technology purchases, advertising spending or marketing spending. This could result in reductions in sales of our products and services, longer sales cycles, slower adoption of new technologies and increased price competition. Our customers include government entities, including the U.S. federal government, and if spending cuts impede the government's ability to purchase our products and solutions, our revenues could decline. Deterioration in economic conditions in any of the countries in which we do business could also cause slower or impaired collections on accounts receivable, which may adversely impact our liquidity and financial condition.

There could be a number of effects from a financial institution credit crisis on our business, which could include impaired credit availability and financial stability of our customers, including our distribution partners and channels. A disruption in the financial markets may also have an effect on our derivative counterparties and could also impair our banking partners on which we rely for operating cash management. Any of these events would likely harm our business, results of operations and financial condition.

Political instability in or around any of the major countries in which we do business would also likely harm our business, results of operations and financial condition.

We may not realize the anticipated benefits of past or future acquisitions, and integration of these acquisitions may disrupt our business and management.

We may not realize the anticipated benefits of an acquisition of a company, division, product or technology, each of which involves numerous risks. These risks include:

- difficulty in integrating the operations and personnel of the acquired company;
- difficulty in effectively integrating the acquired technologies, products or services with our current technologies, products or services;
- difficulty in maintaining controls, procedures and policies during the transition and integration;
- entry into markets in which we have minimal prior experience and where competitors in such markets have stronger market positions;
- disruption of our ongoing business and distraction of our management and other employees from other opportunities and challenges;
- inability to retain personnel of the acquired business;
- inability to retain key customers, distributors, vendors and other business partners of the acquired business;
- inability to achieve the financial and strategic goals for the acquired and combined businesses;
- inability to take advantage of anticipated tax benefits as a result of unforeseen difficulties in our integration activities;

Table of Contents

incurring acquisition-related costs or amortization costs for acquired intangible assets that could impact our operating results;

- potential additional exposure to fluctuations in currency exchange rates;

potential additional costs of bringing acquired companies into compliance with laws and regulations applicable to us as a multi-national corporation;

potential impairment of our relationships with employees, customers, partners, distributors or third-party providers of our technologies, products or services;

potential failure of the due diligence processes to identify significant problems, liabilities or other challenges of an acquired company or technology, including but not limited to, issues with the acquired company's intellectual property, product quality or product architecture, data back-up and security (including security from cyber-attacks), privacy practices, revenue recognition or other accounting practices, employee, customer or partner issues or legal and financial contingencies;

exposure to litigation or other claims in connection with, or inheritance of claims or litigation risk as a result of, an acquisition, including but not limited to claims from terminated employees, customers, former stockholders or other third parties;

incurring significant exit charges if products or services acquired in business combinations are unsuccessful;

potential inability to assert that internal controls over financial reporting are effective;

potential inability to obtain, or obtain in a timely manner, approvals from governmental authorities, which could delay or prevent such acquisitions;

potential delay in customer and distributor purchasing decisions due to uncertainty about the direction of our product and service offerings; and

potential incompatibility of business cultures.

Mergers and acquisitions of high technology companies are inherently risky. If we do not complete an announced acquisition transaction or integrate an acquired business successfully and in a timely manner, we may not realize the benefits of the acquisition to the extent anticipated, and in certain circumstances an acquisition could harm our financial position.

We may incur substantial costs enforcing or acquiring intellectual property rights and defending against third-party claims as a result of litigation or other proceedings.

In connection with the enforcement of our own intellectual property rights, the acquisition of third-party intellectual property rights, or disputes relating to the validity or alleged infringement of third-party intellectual property rights, including patent rights, we have been, are currently and may in the future be subject to claims, negotiations or complex, protracted litigation. Intellectual property disputes and litigation are typically costly and can be disruptive to our business operations by diverting the attention and energies of management and key technical personnel. Although we have successfully defended or resolved many past lawsuits and other disputes, we may not prevail in the future. Third-party intellectual property disputes, including those initiated by patent assertion entities, could subject us to significant liabilities, require us to enter into royalty and licensing arrangements on unfavorable terms, prevent us from licensing certain of our products or offering certain of our services, subject us to injunctions restricting our sale of products or services, cause severe disruptions to our operations or the markets in which we compete, or require us to satisfy indemnification commitments with our customers, including contractual provisions under various license arrangements and service agreements. In addition, we may incur significant costs in acquiring the necessary third-party intellectual property rights for use in our products, in some cases to fulfill contractual obligations with our customers. Any of these occurrences could significantly harm our business.

We may not be able to protect our intellectual property rights, including our source code, from third-party infringers or unauthorized copying, use or disclosure.

Although we vigorously defend our intellectual property rights and attempt to combat unlicensed copying, access and use of software and intellectual property through a variety of techniques, preventing unauthorized use or infringement of our rights is inherently difficult. We actively combat software piracy as we enforce our intellectual property rights, but we nonetheless lose significant revenue due to illegal use of our software. If piracy activities continue at historical

levels or increase, they may further harm our business.

23

Table of Contents

Additionally, we take significant measures to protect the secrecy of our confidential information and trade secrets, including our source code. Despite these measures, as we have previously disclosed, hackers have managed to access certain of our source code and may obtain access in the future. If unauthorized disclosure of our source code occurs through security breach, cyber-attack or otherwise, we could potentially lose future trade secret protection for that source code. The loss of future trade secret protection could make it easier for third parties to compete with our products by copying functionality, which could cause us to lose customers and could adversely affect our revenue and operating margins. We also seek to protect our confidential information and trade secrets through the use of non-disclosure agreements with our customers, contractors, vendors and partners. However, there is a risk that our confidential information and trade secrets may be disclosed or published without our authorization, and in these situations enforcing our rights may be difficult or costly.

Increasing regulatory focus on privacy issues and expanding laws and regulations could impact our new business models and expose us to increased liability.

Our industry is highly regulated, including for privacy and data security. We are also expanding our business in countries that have more stringent data protection laws than those in the U.S. Privacy laws globally are changing and evolving. Governments, privacy advocates and class action attorneys are increasingly scrutinizing how companies collect, process, use, store, share or transmit personal data. New laws and industry self-regulatory codes have been enacted and more are being considered that may affect our ability to reach current and prospective customers, to understand how our products and services are being used, to respond to customer requests allowed under the laws, and to implement our new business models effectively. These new laws and regulations would similarly affect our competitors as well as our customers. Any perception of our practices or products as an invasion of privacy, whether or not consistent with current regulations and industry practices, may subject us to public criticism, class action lawsuits, reputational harm or claims by regulators, industry groups or other third parties, all of which could disrupt our business and expose us to increased liability. Additionally, both laws regulating privacy, as well as third-party products addressing perceived privacy concerns, could affect the functionality of and demand for our products, thereby harming our revenues.

On behalf of certain customers, we collect and store anonymous and personal information derived from the activities of end users with various channels, including traditional websites, mobile websites and applications, email interactions, direct mail, point of sale, text messaging and call centers (collectively, “channels”). This enables us to provide such customers with reports on aggregated anonymous or personal information from and about end-user interactions with various channels in the manner specifically directed by each such individual customer. Federal, state and foreign governments and agencies have adopted or are considering adopting laws regarding the collection, use and disclosure of this information. Our compliance with privacy laws and regulations and our reputation among the public body of end users depend in part on such customers’ adherence to privacy laws and regulations and their use of our services in ways consistent with such end users’ expectations. We also rely on representations made to us by customers that their own use of our services and the information they provide to us via our services do not violate any applicable privacy laws, rules and regulations or their own privacy policies. We ask customers to represent to us that they provide their end users the opportunity to “opt-out” of the information collection associated with our services, as applicable. We do not formally audit such customers to confirm compliance with these representations. If these representations are false or if such customers do not otherwise comply with applicable privacy laws, we could face adverse publicity and possible legal or other regulatory action. In addition, some countries are considering enacting laws that would expand the scope of privacy-related obligations required of service providers, such as Adobe, that would require additional compliance expense and increased liability.

If we fail to process transactions effectively or fail to adequately protect against disputed or potential fraudulent activities, our revenue and earnings may be harmed.

We process a significant volume of transactions on a daily basis in both our Digital Marketing and Digital Media businesses. Due to the size and volume of transactions that we handle, effective processing systems and controls are essential; but even the most sophisticated systems and processes may not be effective in preventing all errors. The systems supporting our business are comprised of multiple technology platforms that may be difficult to scale. If we are unable to effectively manage these systems and processes, we may be unable to process customer data in an

accurate, reliable and timely manner, which may harm our customer relationships or results of operations.

Failure to manage our sales and distribution channels and third-party customer service and technical support providers effectively could result in a loss of revenue and harm to our business.

We contract with a number of software distributors, none of which is individually responsible for a material amount of our total net revenue for any recent period. If any single agreement with one of our distributors were terminated, we believe we could make arrangements with new or existing distributors to distribute our products without a substantial disruption to our business; however, any prolonged delay in securing a replacement distributor could have a negative short-term impact on our results of operations.

Table of Contents

Successfully managing our indirect channel efforts to reach various customer segments for our products and services is a complex process across the broad range of geographies where we do business or plan to do business. Our distributors and other channel partners are independent businesses that we do not control. Notwithstanding the independence of our channel partners, we face potential legal risk and reputational harm from the activities of these third parties including, but not limited to, export control violations, workplace conditions, corruption and anti-competitive behavior. Although we have undertaken efforts to reduce these third-party risks, they remain present. We cannot be certain that our distribution channel will continue to market or sell our products effectively. If our distribution channel is not successful, we may lose sales opportunities, customers and revenues.

Our distributors also sell our competitors' products, and if they favor our competitors' products for any reason, they may fail to market our products as effectively or to devote resources necessary to provide effective sales, which would cause our results to suffer. We also distribute some products through our OEM channel, and if our OEMs decide not to bundle our applications on their devices, our results could suffer.

In addition, the financial health of our distributors and our continuing relationships with them are important to our success. Some of these distributors may be adversely impacted by changes to our business model or unable to withstand adverse changes in current economic conditions, which could result in insolvency and/or the inability of such distributors to obtain credit to finance purchases of our products. In addition, weakness in the end-user market could negatively affect the cash flows of our distributors who could, in turn, delay paying their obligations to us, which would increase our credit risk exposure. Our business could be harmed if the financial condition of some of these distributors substantially weakened and we were unable to timely secure replacement distributors.

We also sell certain of our products and services through our direct sales force. Risks associated with this sales channel include longer sales and collection cycles associated with direct sales efforts, challenges related to hiring, retaining and motivating our direct sales force, and substantial amounts of training for sales representatives, including regular updates to cover new and upgraded systems, products and services. Moreover, recent hires may not become as productive as we would like, as in most cases it takes a significant period of time before they achieve full productivity. Our business could be seriously harmed if these expansion efforts do not generate a corresponding significant increase in revenues and we are unable to achieve the efficiencies we anticipate. In addition, the loss of key sales employees could impact our customer relationships and future ability to sell to certain accounts covered by such employees.

We also provide products and services, directly and indirectly, to a variety of governmental entities, both domestically and internationally. Risks associated with licensing and selling products and services to governmental entities include longer sales cycles, varying governmental budgeting processes and adherence to complex procurement regulations and other government-specific contractual requirements. Ineffectively managing these risks could result in various civil and criminal penalties and administrative sanctions, including termination of contracts, payment of fines, and suspension or debarment from future government business, as well as harm to our reputation.

We outsource a substantial portion of our customer service and technical support activities to third-party service providers. We rely heavily on these third-party customer service and technical support representatives working on our behalf, and we expect to continue to rely heavily on third parties in the future. This strategy provides us with lower operating costs and greater flexibility, but also presents risks to our business due to the fact that we may not be able to influence the quality of support as directly as we would be able to do if our own employees performed these activities. Our customers may react negatively to providing information to, and receiving support from, third-party organizations, especially if based overseas. If we encounter problems with our third-party customer service and technical support providers, our reputation may be harmed and we could lose customers and associated revenues.

Certain of our enterprise offerings have long and complex sales cycles.

Sales cycles for some of our enterprise offerings, including our Adobe Marketing Cloud Solutions and ETAs in our Digital Media business, are long and complex. The complexity in these sales cycles is due to a number of factors, including:

- the need for our sales representatives to educate customers about the use and benefit of our large-scale deployments of our products and services, including technical capabilities, security features, potential cost savings and return on investment;

-

the desire of large and medium size organizations to undertake significant evaluation processes to determine their technology requirements prior to making information technology expenditures;
• the need for our representatives to spend a significant amount of time assisting potential customers in their testing and evaluation of our products and services;

Table of Contents

the negotiation of large, complex, enterprise-wide contracts, as often required by our and our customers' business and legal representatives;
 the need for our customers to obtain requisition approvals from various decision makers within their organizations;
 and

- customer budget constraints, economic conditions and unplanned administrative delays.

We spend substantial time and expense on our sales efforts without any assurance that potential customers will ultimately purchase our solutions. As we target our sales efforts at larger enterprise customers, these trends are expected to continue. Additionally, our enterprise sales pattern has historically been uneven, where a higher percentage of a quarter's total sales occur during the final weeks of each quarter, which is common in our industry. Our long sales cycle for these products makes it difficult to predict when a given sales cycle will close.

Catastrophic events may disrupt our business.

We are a highly automated business and rely on our network infrastructure and enterprise applications, internal technology systems and our website for our development, marketing, operational, support, hosted services and sales activities. In addition, some of our businesses rely on third-party hosted services, and we do not control the operation of third-party data center facilities serving our customers from around the world, which increases our vulnerability. A disruption, infiltration or failure of these systems or third-party hosted services in the event of a major earthquake, fire, flood, power loss, telecommunications failure, software or hardware malfunctions, cyber-attack, war, terrorist attack or other catastrophic event could cause system interruptions, reputational harm, loss of intellectual property, delays in our product development, lengthy interruptions in our services, breaches of data security and loss of critical data. Any of these events could prevent us from fulfilling our customers' orders. Our corporate headquarters, a significant portion of our research and development activities, certain of our data centers and certain other critical business operations are located in the San Francisco Bay Area, and additional facilities where we conduct significant operations are located in the Salt Lake Valley Area, both of which are near major earthquake faults. We have developed certain disaster recovery plans and backup systems to reduce the potentially adverse effect of such events, but a catastrophic event that results in the destruction or disruption of any of our data centers or our critical business or information technology systems could severely affect our ability to conduct normal business operations and, as a result, our future operating results could be adversely affected.

Net revenue, margin or earnings shortfalls or the volatility of the market generally may cause the market price of our stock to decline.

The market price for our common stock has in the past experienced significant fluctuations and may fluctuate significantly in the future. A number of factors may affect the market price for our common stock, including:
 shortfalls in our revenue, margins, earnings, the number of paid Creative Cloud subscribers, ARR, bookings within our Adobe Marketing Cloud business or other key performance metrics;

changes in estimates or recommendations by securities analysts;

the announcement of new products, product enhancements or service introductions by us or our competitors;

the loss of a large customer or our inability to increase sales to existing customers or attract new customers;

variations in our or our competitors' results of operations, changes in the competitive landscape generally and developments in our industry; and

unusual events such as significant acquisitions, divestitures, litigation, general socio-economic, regulatory, political or market conditions and other factors, including factors unrelated to our operating performance.

We are subject to risks associated with compliance with laws and regulations globally which may harm our business.

We are a global company subject to varied and complex laws, regulations and customs domestically and internationally. These laws and regulations relate to a number of aspects of our business, including trade protection, import and export control, data and transaction processing security, payment card industry data security standards, records management, user-generated content hosted on websites we operate, privacy practices, corporate governance, employee and third-party complaints, gift policies, conflicts of interest, employment and labor relations laws, securities regulations and other regulatory requirements affecting trade and investment. The application of these laws and regulations to our business is often unclear and may at times conflict. Compliance with these laws and regulations

may involve significant costs or require changes in our business practices that result in reduced revenue and profitability. Non-compliance could also result in fines, damages, criminal sanctions against us, our officers or our

Table of Contents

employees, prohibitions on the conduct of our business, and damage to our reputation. We incur additional legal compliance costs associated with our global operations and could become subject to legal penalties if we fail to comply with local laws and regulations in U.S. jurisdictions or in foreign countries, which laws and regulations may be substantially different from those in the U.S. In many foreign countries, particularly in those with developing economies, it is common to engage in business practices that are prohibited by U.S. regulations applicable to us, including the Foreign Corrupt Practices Act. Although we implement policies and procedures designed to ensure compliance with these laws, there can be no assurance that all of our employees, contractors and agents, as well as those companies to which we outsource certain of our business operations, including those based in or from countries where practices that violate such U.S. laws may be customary, will not take actions in violation of our internal policies. Any such violation, even if prohibited by our internal policies, could have an adverse effect on our business. As a global business that generates approximately 44% of our total revenue from sales to customers outside of the Americas, we are subject to a number of risks, including:

- foreign currency fluctuations;
- changes in government preferences for software procurement;
- international economic, political and labor conditions;
- tax laws (including U.S. taxes on foreign subsidiaries);
- increased financial accounting and reporting burdens and complexities;
- unexpected changes in, or impositions of, legislative or regulatory requirements;
- changes in laws governing the free flow of data across international borders;
- failure of laws to protect our intellectual property rights adequately;
- inadequate local infrastructure and difficulties in managing and staffing international operations;
- delays resulting from difficulty in obtaining export licenses for certain technology, tariffs, quotas and other trade barriers;
- the imposition of governmental economic sanctions on countries in which we do business or where we plan to expand our business;
- transportation delays;
- operating in locations with a higher incidence of corruption and fraudulent business practices; and
- other factors beyond our control, including terrorism, war, natural disasters and pandemics.

If sales to any of our customers outside of the Americas are delayed or canceled because of any of the above factors, our revenues may decline.

In addition, approximately 52% of our employees are located outside the U.S. Accordingly, we are exposed to changes in laws governing our employee relationships in various U.S. and foreign jurisdictions, including laws and regulations regarding wage and hour requirements, fair labor standards, employee data privacy, unemployment tax rates, workers' compensation rates, citizenship requirements and payroll and other taxes, which likely would have a direct impact on our operating costs. We may continue to expand our international operations and international sales and marketing activities. Expansion in international markets has required, and will continue to require, significant management attention and resources. We may be unable to scale our infrastructure effectively or as quickly as our competitors in these markets, and our revenues may not increase to offset these expected increases in costs and operating expenses, which would cause our results to suffer.

We may incur losses associated with currency fluctuations and may not be able to effectively hedge our exposure. Our operating results are subject to fluctuations in foreign currency exchange rates. We attempt to mitigate a portion of these risks through foreign currency hedging, based on our judgment of the appropriate trade-offs among risk, opportunity and expense. We have established a hedging program to partially hedge our exposure to foreign currency exchange rate fluctuations for various currencies. We regularly review our hedging program and make adjustments as necessary based on the factors discussed above. Our hedging activities may not offset more than a portion of the adverse financial impact resulting from unfavorable movement in foreign currency exchange rates, which could adversely affect our financial condition or results of operations.

Table of Contents

We have issued \$1.5 billion of notes in a debt offering and may incur other debt in the future, which may adversely affect our financial condition and future financial results.

We have \$1.5 billion in senior unsecured notes outstanding. We also have a \$1.0 billion revolving credit facility, which is currently undrawn. This debt may adversely affect our financial condition and future financial results by, among other things:

requiring the dedication of a portion of our expected cash from operations to service our indebtedness, thereby reducing the amount of expected cash flow available for other purposes, including capital expenditures and acquisitions; and

limiting our flexibility in planning for, or reacting to, changes in our business and our industry.

Our senior unsecured notes and revolving credit facility impose restrictions on us and require us to maintain compliance with specified covenants. Our ability to comply with these covenants may be affected by events beyond our control. If we breach any of the covenants and do not obtain a waiver from the lenders or noteholders, then, subject to applicable cure periods, any outstanding indebtedness may be declared immediately due and payable.

In addition, changes by any rating agency to our credit rating may negatively impact the value and liquidity of both our debt and equity securities, as well as the potential costs associated with a refinancing of our debt. Under certain circumstances, if our credit ratings are downgraded or other negative action is taken, the interest rate payable by us under our revolving credit facility could increase. Downgrades in our credit ratings could also restrict our ability to obtain additional financing in the future and could affect the terms of any such financing.

Changes in, or interpretations of, accounting principles could have a significant impact on our financial position and results of operations.

We prepare our Consolidated Financial Statements in accordance with accounting principles generally accepted in the United States of America ("GAAP"). These principles are subject to interpretation by the SEC and various bodies formed to interpret and create appropriate accounting principles. A change in these principles can have a significant effect on our reported results and may even retroactively affect previously reported transactions. Additionally, the adoption of new or revised accounting principles may require that we make significant changes to our systems, processes and controls.

For example, the U.S.-based Financial Accounting Standards Board ("FASB") is currently working together with the International Accounting Standards Board ("IASB") on several projects to further align accounting principles and facilitate more comparable financial reporting between companies who are required to follow GAAP under SEC regulations and those who are required to follow International Financial Reporting Standards outside of the U.S. These efforts by the FASB and IASB may result in different accounting principles under GAAP that may result in materially different financial results for us in areas including, but not limited to, principles for recognizing revenue and lease accounting. Additionally, significant changes to GAAP resulting from the FASB's and IASB's efforts may require that we change how we process, analyze and report financial information and that we change financial reporting controls.

If our goodwill or amortizable intangible assets become impaired we could be required to record a significant charge to earnings.

Under GAAP, we review our goodwill and amortizable intangible assets for impairment when events or changes in circumstances indicate the carrying value may not be recoverable. GAAP requires us to test for goodwill impairment at least annually. Factors that may be considered a change in circumstances indicating that the carrying value of our goodwill or amortizable intangible assets may not be recoverable include declines in stock price, market capitalization or cash flows and slower growth rates in our industry. We could be required to record a significant charge to earnings in our financial statements during the period in which any impairment of our goodwill or amortizable intangible assets were determined, negatively impacting our results of operations.

Changes in, or interpretations of, tax rules and regulations may adversely affect our effective tax rates.

We are a United States-based multinational company subject to tax in multiple U.S. and foreign tax jurisdictions. A significant portion of our foreign earnings for the current fiscal year were earned by our Irish subsidiaries. In addition to providing for U.S. income taxes on earnings from the United States, we provide for U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered permanently reinvested outside the

United States. While we do not anticipate changing our intention regarding permanently reinvested earnings, if certain foreign earnings previously treated as permanently reinvested are repatriated, the related U.S. tax liability may be reduced by any foreign income taxes paid on these earnings.

Our income tax expense has differed from the tax computed at the U.S. federal statutory income tax rate due primarily to discrete items and to earnings considered as permanently reinvested in foreign operations. Unanticipated changes in our tax rates could affect our future results of operations. Our future effective tax rates could be unfavorably affected by changes in the tax rates

Table of Contents

in jurisdictions where our income is earned, by changes in, or our interpretation of, tax rules and regulations in the jurisdictions in which we do business, by unanticipated decreases in the amount of earnings in countries with low statutory tax rates, by lapses of the availability of the U.S. research and development tax credit, or by changes in the valuation of our deferred tax assets and liabilities. The United States, countries in the European Union and other countries where we do business have been considering changes in relevant tax, accounting and other laws, regulations and interpretations, including changes to tax laws applicable to corporate multinationals such as Adobe. These potential changes could adversely affect our effective tax rates or result in other costs to us.

In addition, we are subject to the continual examination of our income tax returns by the U.S. Internal Revenue Service ("IRS") and other domestic and foreign tax authorities, including a current examination by the IRS of our fiscal 2010, 2011 and 2012 tax returns. These tax examinations are expected to focus on our intercompany transfer pricing practices as well as other matters. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result from the current examinations. There can be no assurance that the final determination of any of these examinations will not have an adverse effect on our operating results and financial position.

If we are unable to recruit and retain key personnel our business may be harmed.

Much of our future success depends on the continued service and availability of our senior management. These individuals have acquired specialized knowledge and skills with respect to Adobe. The loss of any of these individuals could harm our business, especially in the event that we have not been successful in developing adequate succession plans. Our business is also dependent on our ability to retain, hire and motivate talented, highly skilled personnel across all levels of our organization. Experienced personnel in the information technology industry are in high demand and competition for their talents is intense in many areas where our employees are located. If we are unable to continue to successfully attract and retain key personnel, our business may be harmed. Effective succession planning is also a key factor for our long-term success. Our failure to enable the effective transfer of knowledge and facilitate smooth transitions of our key employees could adversely affect our long-term strategic planning and execution. We believe that a critical contributor to our success to date has been our corporate culture, which we have built to foster innovation, teamwork and employee satisfaction. As we grow, including from the integration of employees and businesses acquired in connection with previous or future acquisitions, we may find it difficult to maintain important aspects of our corporate culture, which could negatively affect our ability to retain and recruit personnel who are essential to our future success.

Our investment portfolio may become impaired by deterioration of the capital markets.

Our cash equivalent and short-term investment portfolio as of November 28, 2014 consisted of corporate bonds and commercial paper, U.S. agency securities and U.S. Treasury securities, money market mutual funds, municipal securities, time deposits and foreign government securities. We follow an established investment policy and set of guidelines to monitor and help mitigate our exposure to interest rate and credit risk. The policy sets forth credit quality standards and limits our exposure to any one issuer, as well as our maximum exposure to various asset classes. Should financial market conditions worsen in the future, investments in some financial instruments may pose risks arising from market liquidity and credit concerns. In addition, any deterioration of the capital markets could cause our other income and expense to vary from expectations. As of November 28, 2014, we had no material impairment charges associated with our short-term investment portfolio, and although we believe our current investment portfolio has little risk of material impairment, we cannot predict future market conditions or market liquidity, or credit availability, and can provide no assurance that our investment portfolio will remain materially unimpaired.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

Table of Contents

ITEM 2. PROPERTIES

The following table sets forth the location, approximate square footage and use of each of the principal properties used by Adobe during fiscal 2014. We lease or sublease all of these properties with the exception of our property in Noida, India where we own the building and lease the land, in Lehi where we own the building and land, in San Francisco at 601 and 625 Townsend Street where we own the building and land, and our corporate offices in San Jose where we own the land and the East and West tower buildings after exercising our option to purchase these buildings in August 2014, and lease the Almaden Tower building. All leased properties are leased under operating leases. Such leases expire at various times through 2028, with the exception of our land lease in Noida, India that expires in 2091. The annual base rent expense (including operating expenses, property taxes and assessments, as applicable) for all leased facilities is currently approximately \$93.3 million and is subject to annual adjustments as well as changes in interest rates.

- (2) The total square footage is 182,000, of which we occupy 162,000 square feet, or approximately 89% of this facility. The remaining square footage is subleased.

- (3) The total square footage is 281,000, of which we occupy 257,000 square feet, or approximately 91% of this facility; 24,000 square feet is unoccupied basement space.

- (4) The total square footage is 34,000, of which we occupy 30,000 square feet, or approximately 88% of this facility. The remaining square footage is subleased.

- (5) The total square footage is 122,000, of which we occupy 59,000 square feet, or approximately 48% of this facility; 6,000 square feet is unoccupied. The remaining square footage is subleased.

In fiscal 2014, we initiated our Fiscal 2014 Restructuring Plan which included a plan to vacate our research and
(6) product development facility in China during fiscal 2015. See Note 10 of our Notes to Consolidated Financial
Statements for further information regarding our restructuring plans.

In general, all facilities are in good condition, suitable for the conduct of our business and are operating at an average capacity of approximately 82%.

ITEM 3. LEGAL PROCEEDINGS

In connection with disputes relating to the validity or alleged infringement of third-party intellectual property rights, including patent rights, we have been, are currently and may in the future be subject to claims, negotiations or complex, protracted litigation. Intellectual property disputes and litigation may be very costly and can be disruptive to our business operations by diverting the attention and energies of management and key technical personnel. Although we have successfully defended or resolved many past disputes, we may not prevail in any ongoing or future litigation. Third-party intellectual property disputes could subject us to significant liabilities, require us to enter into royalty and licensing arrangements on unfavorable terms, prevent us from licensing certain of our products or offering certain of our services, subject us to injunctions restricting our sale of products or services, cause severe disruptions to our operations or the markets in which we compete, or require us to satisfy indemnification commitments with our

customers including contractual provisions under various license arrangements and service agreements.

Between May 4, 2011 and July 14, 2011, five putative class action lawsuits were filed in Santa Clara Superior Court and Alameda Superior Court in California. On September 12, 2011, the cases were consolidated into In Re High-Tech Employee Antitrust Litigation (“HTEAL”) pending in the United States District Court for the Northern District of California, San Jose

Table of Contents

Division. In the consolidated complaint, Plaintiffs alleged that Adobe, along with Apple, Google, Intel, Intuit, Lucasfilm and Pixar, agreed not to recruit each other's employees in violation of Federal and state antitrust laws. Plaintiffs claim the alleged agreements suppressed employee compensation and deprived employees of career opportunities. Plaintiffs seek injunctive relief, monetary damages, treble damages, costs and attorneys fees. All defendants deny the allegations and that they engaged in any wrongdoing of any kind. On October 24, 2013, the court certified a class of all persons who worked in the technical, creative, and/or research and development fields on a salaried basis in the United States for one or more of the following: (a) Apple from March 2005 through December 2009; (b) Adobe from May 2005 through December 2009; (c) Google from March 2005 through December 2009; (d) Intel from March 2005 through December 2009; (e) Intuit from June 2007 through December 2009; (f) Lucasfilm from January 2005 through December 2009; or (g) Pixar from January 2005 through December 2009, excluding retail employees, corporate officers, members of the boards of directors, and senior executives of all defendants. During the second quarter of fiscal 2014, the parties reached a settlement to resolve this lawsuit, subject to the Court's approval. On August 8, 2014, the Court rejected the settlement agreement jointly submitted by the parties. During the first quarter of fiscal 2015, the parties reached another agreement to settle the litigation. On January 15, 2015, the agreement was submitted to the Court seeking preliminary approval of the settlement. The hearing for preliminary approval is set for March 2015. We accrued a loss contingency of \$10.0 million associated with this matter during the first quarter of fiscal 2014.

In addition to intellectual property disputes and the other litigation matter described above, we are subject to legal proceedings, claims and investigations in the ordinary course of business, including claims relating to commercial, employment and other matters. Some of these disputes and legal proceedings may include speculative claims for substantial or indeterminate amounts of damages. We consider all claims on a quarterly basis in accordance with GAAP and based on known facts assess whether potential losses are considered reasonably possible, probable and estimable. Based upon this assessment, we then evaluate disclosure requirements and whether to accrue for such claims in our financial statements. This determination is then reviewed and discussed with our Audit Committee and our independent registered public accounting firm.

We make a provision for a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Unless otherwise specifically disclosed here or in our Notes to Consolidated Financial Statements, we have determined that no provision for liability nor disclosure is required related to any claim against us because: (a) there is not a reasonable possibility that a loss exceeding amounts already recognized (if any) may be incurred with respect to such claim; (b) a reasonably possible loss or range of loss cannot be estimated; or (c) such estimate is immaterial.

All legal costs associated with litigation are expensed as incurred. Litigation is inherently unpredictable. However, we believe that we have valid defenses with respect to the legal matters pending against us. It is possible, nevertheless, that our consolidated financial position, cash flows or results of operations could be negatively affected by an unfavorable resolution of one or more of such proceedings, claims or investigations.

In connection with our anti-piracy efforts, conducted both internally and through organizations such as the Business Software Alliance, from time to time we undertake litigation against alleged copyright infringers. Such lawsuits may lead to counter-claims alleging improper use of litigation or violation of other laws. We believe we have valid defenses with respect to such counter-claims; however, it is possible that our consolidated financial position, cash flows or results of operations could be affected in any particular period by the resolution of one or more of these counter-claims.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information for Common Stock

Our common stock is traded on the NASDAQ Global Select Market under the symbol "ADBE." The following table sets forth the high and low sales price per share of our common stock for the periods indicated.

	Price Range	
	High	Low
Fiscal 2014:		
First Quarter	\$69.92	\$53.99
Second Quarter	\$68.92	\$58.63
Third Quarter	\$73.57	\$64.09
Fourth Quarter	\$73.68	\$60.88
Fiscal Year	\$73.68	\$53.99
Fiscal 2013:		
First Quarter	\$39.83	\$34.70
Second Quarter	\$47.01	\$40.46
Third Quarter	\$48.39	\$42.72
Fourth Quarter	\$57.55	\$45.88
Fiscal Year	\$57.55	\$34.70
Stockholders		

According to the records of our transfer agent, there were 1,294 holders of record of our common stock on January 16, 2015. Because many of such shares are held by brokers and other institutions on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these record holders.

Dividends

We did not declare or pay any cash dividends on our common stock during fiscal 2014 or fiscal 2013. Under the terms of our credit agreement and lease agreements, we are not prohibited from paying cash dividends unless payment would trigger an event of default or one currently exists. We do not anticipate paying any cash dividends in the foreseeable future.

Table of Contents

Issuer Purchases of Equity Securities

Below is a summary of stock repurchases for the three months ended November 28, 2014. See Note 13 of our Notes to Consolidated Financial Statements for information regarding our stock repurchase programs.

Period	Total Number of Shares Repurchased	Average Price Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Approximate Dollar Value that May Yet be Purchased Under the Plan ⁽¹⁾
	(in thousands, except average price per share)			
Beginning repurchase authority August 30—September 26, 2014				367,324
Shares repurchased September 27—October 24, 2014	596	\$71.08	596	\$(42,324)
Shares repurchased October 25—November 28, 2014	643	\$65.86	643	\$(42,373) ⁽²⁾
Shares repurchased	611	\$69.24	611	\$(42,318) ⁽²⁾
Total	1,850		1,850	\$240,309

⁽¹⁾ We currently have authority granted by our Board of Directors to repurchase up to \$2.0 billion in common stock.

In September 2014, as part of our stock repurchase program, we entered into a structured stock repurchase

⁽²⁾ agreement with a large financial institution whereupon we provided them with a prepayment of \$125.0 million. As of November 28, 2014, approximately \$40.3 million of the prepayment remained under this agreement.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our Consolidated Financial Statements and Notes thereto.

ACQUISITIONS

During fiscal 2014, we completed a business acquisition which was not material to our Consolidated Financial Statements.

During fiscal 2013, we completed our acquisitions of privately held Neolane, a leader in cross-channel campaign management technology for \$616.7 million and privately held Behance, an online social media platform to showcase and discover creative work for \$111.1 million. During fiscal 2013, we integrated Neolane and Behance into our Digital Marketing and Digital Media reportable segments, respectively. The impact of these acquisitions was not material to our Consolidated Financial Statements.

During fiscal 2012, we completed the acquisition of privately held Efficient Frontier, a multi-channel digital ad buying and optimization company for \$374.7 million. During fiscal 2012, we began integrating Efficient Frontier into our Digital Marketing segment.

See Note 2 of our Notes to Consolidated Financial Statements for further information regarding these acquisitions.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

In preparing our Consolidated Financial Statements in accordance with GAAP and pursuant to the rules and regulations of the SEC, we make assumptions, judgments and estimates that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosures of contingent assets and liabilities. We base our assumptions, judgments and estimates on historical experience and various other factors that we believe to be reasonable under the circumstances. Actual results could differ materially from these estimates under different assumptions or conditions.

On a regular basis, we evaluate our assumptions, judgments and estimates. We also discuss our critical accounting policies and estimates with the Audit Committee of the Board of Directors.

We believe that the assumptions, judgments and estimates involved in the accounting for revenue recognition, business combinations, goodwill impairment and income taxes have the greatest potential impact on our Consolidated Financial Statements. These areas are key components of our results of operations and are based on complex rules requiring us to make judgments and estimates, so we consider these to be our critical accounting policies. Historically, our assumptions, judgments and estimates relative to our critical accounting policies have not differed materially from actual results.

Revenue Recognition

Our revenue is derived from the licensing of perpetual, time-based and subscription software products, associated software maintenance and support plans, non-software related hosted services, consulting services, training and technical support.

We recognize revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists, we have delivered the product or performed the service, the fee is fixed or determinable and collection is probable. Determining whether and when some of these criteria have been satisfied often involves assumptions and judgments that can have a significant impact on the timing and amount of revenue we report.

We enter into multiple element revenue arrangements in which a customer may purchase a combination of software, upgrades, maintenance and support, hosted services and consulting.

For our software and software-related multiple element arrangements, we must: (1) determine whether and when each element has been delivered; (2) determine whether undelivered products or services are essential to the functionality of the delivered products and services; (3) determine the fair value of each undelivered element using vendor-specific objective evidence ("VSOE"), and (4) allocate the total price among the various elements. VSOE of fair value is used to allocate a portion of the price to the undelivered elements and the residual method is used to allocate the remaining portion to the delivered elements. Absent VSOE, revenue is deferred until the earlier of the point at which VSOE of fair value exists for any undelivered element or until all elements of the arrangement have been delivered. However, if the only undelivered element is maintenance and support, the entire arrangement fee is recognized ratably over the performance period. Changes in assumptions or judgments or changes to the elements in a software arrangement could cause a material increase or decrease in the amount of revenue that we report in a particular period.

Table of Contents

We determine VSOE for each element based on historical stand-alone sales to third parties or from the stated renewal rate for the elements contained in the initial arrangement. In determining VSOE, we require that a substantial majority of the selling prices for a product or service fall within a reasonably narrow pricing range.

We have established VSOE for our software maintenance and support services, custom software development services, consulting services and training, when such services are sold optionally with software licenses.

For multiple-element arrangements containing our non-software services, we must: (1) determine whether and when each element has been delivered; (2) determine the fair value of each element using the selling price hierarchy of VSOE of selling price, third-party evidence (“TPE”) of selling price or best-estimated selling price (“BESP”), as applicable; and (3) allocate the total price among the various elements based on the relative selling price method. For multiple-element arrangements that contain both software and non-software elements, we allocate revenue to software or software-related elements as a group and any non-software elements separately based on the selling price hierarchy. We determine the selling price for each deliverable using VSOE of selling price, if it exists, or TPE of selling price. If neither VSOE nor TPE of selling price exist for a deliverable, we use BESP. Once revenue is allocated to software or software-related elements as a group, we recognize revenue in conformance with software revenue accounting guidance. Revenue is recognized when revenue recognition criteria are met for each element.

We are generally unable to establish VSOE or TPE for non-software elements and as such, we use BESP. BESP is generally used for offerings that are not typically sold on a stand-alone basis or for new or highly customized offerings. We determine BESP for a product or service by considering multiple factors including, but not limited to, major product groupings, geographies, market conditions, competitive landscape, internal costs, gross margin objectives and pricing practices. Pricing practices taken into consideration include historic contractually stated prices, volume discounts where applicable and our price lists. We must estimate certain royalty revenue amounts due to the timing of securing information from our customers. While we believe we can make reliable estimates regarding these matters, these estimates are inherently subjective. Accordingly, our assumptions and judgments regarding future products and services as well as our estimates of royalty revenue could differ from actual events, thus materially impacting our financial position and results of operations.

Product revenue is recognized when the above criteria are met. We reduce the revenue recognized for estimated future returns, price protection and rebates at the time the related revenue is recorded. In determining our estimate for returns and in accordance with our internal policy regarding global channel inventory which is used to determine the level of product held by our distributors on which we have recognized revenue, we rely upon historical data, the estimated amount of product inventory in our distribution channel, the rate at which our product sells through to the end user, product plans and other factors. Our estimated provisions for returns can vary from what actually occurs. Product returns may be more or less than what was estimated. The amount of inventory in the channel could be different than what is estimated. Our estimate of the rate of sell-through for product in the channel could be different than what actually occurs. There could be a delay in the release of our products. These factors and unanticipated changes in the economic and industry environment could make our return estimates differ from actual returns, thus impacting our financial position and results of operations.

In the future, actual returns and price protection may exceed our estimates as unsold products in the distribution channels are exposed to rapid changes in consumer preferences, market conditions or technological obsolescence due to new platforms, product updates or competing products. While we believe we can make reliable estimates regarding these matters, these estimates are inherently subjective. Accordingly, if our estimates change, our returns and price protection reserves would change, which would impact the total net revenue we report.

We recognize revenues for hosted services that are based on a committed number of transactions ratably beginning on the date the customer commences use of our services and continuing through the end of the customer term.

Over-usage fees, and fees billed based on the actual number of transactions from which we capture data, are billed in accordance with contract terms as these fees are incurred. We record amounts that have been invoiced in accounts receivable and in deferred revenue or revenue, depending on whether the revenue recognition criteria have been met.

Our consulting revenue is recognized on a time and materials basis and is measured monthly based on input measures, such as on hours incurred to date compared to total estimated hours to complete, with consideration given to output measures, such as contract milestones, when applicable.

Business Combinations

We allocate the purchase price of acquired companies to the tangible and intangible assets acquired and liabilities assumed, assumed equity awards, as well as to in-process research and development based upon their estimated fair values at the acquisition

Table of Contents

date. The purchase price allocation process requires management to make significant estimates and assumptions, especially at the acquisition date with respect to intangible assets, deferred revenue obligations and equity assumed. Although we believe the assumptions and estimates we have made are reasonable, they are based in part on historical experience and information obtained from the management of the acquired companies and are inherently uncertain. Examples of critical estimates in valuing certain of the intangible assets we have acquired or may acquire in the future include but are not limited to:

- future expected cash flows from software license sales, subscriptions, support agreements, consulting contracts and acquired developed technologies and patents;
- expected costs to develop the in-process research and development into commercially viable products and estimated cash flows from the projects when completed;
- the acquired company's trade name and trademarks as well as assumptions about the period of time the acquired trade name and trademarks will continue to be used in the combined company's product portfolio; and
- discount rates.

In connection with the purchase price allocations for our acquisitions, we estimate the fair value of the deferred revenue obligations assumed. The estimated fair value of the support obligations is determined utilizing a cost build-up approach. The cost build-up approach determines fair value by estimating the costs related to fulfilling the obligations plus a normal profit margin. The estimated costs to fulfill the obligations are based on the historical costs related to fulfilling the obligations.

In connection with the purchase price allocations for our acquisitions, we estimate the fair value of the equity awards assumed. The estimated fair value is determined utilizing a modified binomial option pricing model which assumes employees exercise their stock options when the share price exceeds the strike price by a certain dollar threshold. If the acquired company has significant historical data on their employee's exercise behavior, then this threshold is determined based upon the acquired company's history. Otherwise, our historical exercise experience is used to determine the exercise threshold. Zero coupon yields implied by U.S. Treasury issuances, implied volatility for our common stock and our historical forfeiture rate are other inputs to the binomial model.

Unanticipated events and circumstances may occur which may affect the accuracy or validity of such assumptions, estimates or actual results.

Goodwill Impairment

We complete our goodwill impairment test on an annual basis, during the second quarter of our fiscal year, or more frequently, if changes in facts and circumstances indicate that an impairment in the value of goodwill recorded on our balance sheet may exist. In order to estimate the fair value of goodwill, we typically estimate future revenue, consider market factors and estimate our future cash flows. Based on these key assumptions, judgments and estimates, we determine whether we need to record an impairment charge to reduce the value of the asset carried on our balance sheet to its estimated fair value. Assumptions, judgments and estimates about future values are complex and often subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy or our internal forecasts. Although we believe the assumptions, judgments and estimates we have made in the past have been reasonable and appropriate, different assumptions, judgments and estimates could materially affect our reported financial results.

We completed our annual impairment test in the second quarter of fiscal 2014 and determined there was no impairment. The results of our annual impairment test indicate there is no significant risk of future material goodwill impairment in any of our reporting units.

Accounting for Income Taxes

We use the asset and liability method of accounting for income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. Management must make assumptions, judgments and estimates to determine our current provision for income taxes and also our deferred tax assets and liabilities and any valuation allowance to be recorded against a deferred tax asset.

Our assumptions, judgments and estimates relative to the current provision for income taxes take into account current tax laws, our interpretation of current tax laws and possible outcomes of current and future audits conducted by foreign and domestic

Table of Contents

tax authorities. We have established reserves for income taxes to address potential exposures involving tax positions that could be challenged by tax authorities. In addition, we are subject to the continual examination of our income tax returns by the IRS and other domestic and foreign tax authorities, including a current examination by the IRS of our fiscal 2010, 2011 and 2012 tax returns. We expect future examinations to focus on our intercompany transfer pricing practices as well as other matters. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result from the current examinations. We believe such estimates to be reasonable; however, the final determination of any of these examinations could significantly impact the amounts provided for income taxes in our Consolidated Financial Statements.

Our assumptions, judgments and estimates relative to the value of a deferred tax asset take into account predictions of the amount and category of future taxable income, such as income from operations or capital gains income. Actual operating results and the underlying amount and category of income in future years could render our current assumptions, judgments and estimates of recoverable net deferred taxes inaccurate. Any of the assumptions, judgments and estimates mentioned above could cause our actual income tax obligations to differ from our estimates, thus materially impacting our financial position and results of operations.

We are a United States-based multinational company subject to tax in multiple U.S. and foreign tax jurisdictions. A significant portion of our foreign earnings for the current fiscal year were earned by our Irish subsidiaries. In addition to providing for U.S. income taxes on earnings from the U.S., we provide for U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered permanently reinvested outside the U.S. While we do not anticipate changing our intention regarding permanently reinvested earnings, if certain foreign earnings previously treated as permanently reinvested are repatriated, the related U.S. tax liability may be reduced by any foreign income taxes paid on these earnings.

Our income tax expense has differed from the tax computed at the U.S. federal statutory income tax rate due primarily to discrete items and to earnings considered as permanently reinvested in foreign operations. Unanticipated changes in our tax rates could affect our future results of operations. Our future effective tax rates could be unfavorably affected by changes in the tax rates in jurisdictions where our income is earned, by changes in, or our interpretation of, tax rules and regulations in the jurisdictions in which we do business, by unanticipated decreases in the amount of earnings in countries with low statutory tax rates, by lapses of the availability of the U.S. research and development tax credit, or by changes in the valuation of our deferred tax assets and liabilities. The United States, countries in the European Union and other countries where we do business have been considering changes in relevant tax, accounting and other laws, regulations and interpretations, including changes to tax laws applicable to corporate multinationals such as Adobe. These potential changes could adversely affect our effective tax rates or result in other costs to us.

Recent Accounting Pronouncements Not Yet Effective

On May 28, 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, requiring an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The updated standard will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective and permits the use of either the retrospective or cumulative effect transition method. Early adoption is not permitted. The updated standard becomes effective for us in the first quarter of fiscal 2018. We have not yet selected a transition method and we are currently evaluating the effect that the updated standard will have on our consolidated financial statements and related disclosures.

With the exception of the new revenue standard discussed above, there have been no new accounting pronouncements not yet effective that have significance, or potential significance, to our Consolidated Financial Statements.

RESULTS OF OPERATIONS

Overview of 2014

For fiscal 2014, we reported financial results consistent with the continued execution of our long-term plans for our two strategic growth areas, Digital Media and Digital Marketing, while continuing to market and license a broad portfolio of products and solutions.

In our Digital Media segment, we are a market leader with Creative Cloud, our subscription-based offering for creating and publishing content and applications. Creative Cloud, first delivered in May 2012, is our next-generation

offering that supersedes our historical model of licensing our creative products with perpetual licenses. Creative Cloud delivers value through more frequent product updates, storage and access to user files stored in the cloud with syncing of files across users' machines, community-based features and services through our acquisition of Behance in December 2012, app creation capabilities and lower entry point pricing for cost-sensitive customers. We offer Creative Cloud for individuals and for teams, and we enable larger enterprise customers to acquire Creative Cloud capabilities through Enterprise Term License Agreements ("ETLAs"). The three Creative Cloud offerings address the multiple

Table of Contents

routes to market we use to license our creative software to targeted customers. Adoption of Creative Cloud has transformed our business model and we continue to expect this to drive higher long-term revenue growth through an expansion of our customer base by acquiring new users through a lower cost of entry and delivery of additional features and value, as well as keeping existing customers current on our latest release. This model drives our revenue to be more recurring and predictable as revenue is recognized ratably.

We continue to implement strategies that will accelerate awareness, consideration and purchase of subscriptions to our Creative Cloud offering. These strategies include increasing the value Creative Cloud users receive, as well as targeted promotions and offers that attract past customers and potential users to try out and ultimately subscribe to Creative Cloud. Additionally, in May 2013 we announced we would exclusively deliver new creative product innovations and features to Creative Cloud subscribers, and that Adobe Creative Suite 6 (“CS6”), which was released in May 2012, would be the last major update we provide for perpetual licensees. In the first half of fiscal 2014, we announced the removal of general availability of CS6 on a perpetual licensing basis from legacy shrinkwrap and volume licensing channels. We still offer CS6 through our Adobe.com website and in certain markets.

Because of the shift towards Creative Cloud subscriptions and ETLAs, perpetual revenue for CS6 has declined, and by the fourth quarter of fiscal 2014 revenue from perpetual licensing of our creative professional products was immaterial.

During fiscal 2014, we continued to experience strong adoption of our Creative Cloud subscription offerings which has caused our Creative Cloud subscription revenue to increase as compared to the year-ago period.

To assist with an understanding of this transition, we are using certain performance metrics to assess the health and trajectory of our overall Digital Media segment. These metrics include the total number of current paid subscriptions and Annualized Recurring Revenue (“ARR”). ARR should be viewed independently of revenue, deferred revenue and unbilled deferred revenue as ARR is a performance metric and is not intended to be combined with any of these items. We plan to adjust our reported ARR on an annual basis to reflect any material exchange rates changes.

For our Creative business, we define Creative ARR as the sum of:

- the number of current subscriptions, multiplied by the average subscription price paid per user per month, multiplied by twelve months; plus,
- twelve months of contract value of ETLAs where the revenue is ratably recognized over the life of the contract; plus
- twelve months of Adobe Digital Publishing Suite contract value where the revenue is ratably recognized.

We exited fiscal 2014 with 3.454 million paid Creative Cloud subscriptions, up 140% from 1.439 million at the end of fiscal 2013. Total Creative ARR exiting fiscal 2014 was \$1.68 billion, up from \$801 million at the end of fiscal 2013.

Our Digital Media segment also includes our Document Services products and solutions, including Acrobat, Acrobat cloud services and EchoSign e-signing solution. In fiscal 2014 we continued to drive solid adoption of our Acrobat family of products primarily through license agreements with enterprise customers. We also drove strong adoption of subscription-based services including our Acrobat cloud services. Combined, adoption of Acrobat through ETLAs and our Document Services subscription offerings helped grow Document Services ARR to \$271 million exiting fiscal 2014, up from \$143 million at the end of fiscal 2013.

Total Digital Media ARR, which we define as the sum of Creative ARR and Document Services ARR, grew to \$1.95 billion at the end of fiscal 2014, up from \$944 million at the end of fiscal 2013, demonstrating the progress we have made with the transformation of our business to a more recurring, ratably and predictable revenue model. Our reported ARR results in fiscal 2014 are based on currency rates set at the start of the fiscal year and held constant throughout the year. Revaluing our ending ARR for fiscal 2014 using currency rates at the beginning of fiscal 2015, our Digital Media ARR at the end of fiscal 2014 would be \$1.88 billion or approximately \$72 million lower than ARR reported above.

We are a market leader in the fast-growing category addressed by our Digital Marketing segment. Our Adobe Marketing Cloud includes six solutions addressing the expanding needs of marketers, the newest of which is Adobe Campaign—a cross-channel campaign management tool that we added to our portfolio with the acquisition of Neolane during the third quarter of fiscal 2013.

Revenue from Adobe Marketing Cloud increased 15% during fiscal 2014 compared to the year-ago period. Helping to drive this performance was strong adoption across our portfolio of Adobe Marketing Cloud solutions including solid

growth of our Adobe Experience Manager (“AEM”) and Adobe Campaign offerings.

AEM and Adobe Campaign have historically been licensed by our customers as on premise offerings where license revenue has been recognized at the time of the transactions. During fiscal 2014, we saw increased customer adoption of term-based licensing

Table of Contents

of our AEM and Adobe Campaign solutions where revenue is booked and recognized ratably. We believe this is resulting in larger customer engagements, more predictable revenue as well as higher long-term revenue growth. In evaluating our Adobe Marketing Cloud revenue performance, we believe it is important to understand this licensing and revenue mix shift that is occurring with AEM and Adobe Campaign. In fiscal 2013, approximately 45% of our AEM and Adobe Campaign contracts were term-based. Entering fiscal 2014, based on our goal of migrating more of these solutions to be term-based, we expected a mix of approximately 60% term-based contracts for AEM and Adobe Campaign this fiscal year. Due to strong execution and customer demand, we saw an acceleration of term-based adoption of AEM and Adobe Campaign in fiscal 2014 and these solutions achieved approximately 75% term-based contracts this year.

Financial Performance Summary for Fiscal 2014

Consistent with our strategy, during fiscal 2014, our subscription revenue as a percentage of total revenue increased to 50% from 28% and 15% compared with fiscal 2013 and 2012, respectively, as we have transitioned more of our business to a subscription-based model.

We exited fiscal 2014 with 3.454 million paid Creative Cloud subscriptions, up 140% from 1.439 million at the end of fiscal 2013.

Total Digital Media ARR of approximately \$1.95 billion as of November 28, 2014 increased by \$1.00 billion, or 106%, from \$944 million as of November 29, 2013. The change in our Digital Media ARR was primarily due to increases in the number of paid Creative Cloud individual and team subscriptions and adoption of our enterprise Creative Cloud offering through our ETLAs.

Adobe Marketing Cloud revenue of \$1.17 billion increased by \$154.3 million, or 15%, during fiscal 2014, from \$1.02 billion in fiscal 2013, and \$212.3 million, or 26%, during fiscal 2013 from \$803.7 million in fiscal 2012. The increases were primarily due to strong adoption of our AEM offering and the addition of Neolane which we acquired in the third quarter of fiscal 2013.

Our total deferred revenue of \$1.16 billion as of November 28, 2014 increased by \$326.5 million, or 39% from \$828.8 million as of November 29, 2013, primarily due to increases in Creative Cloud subscriptions and ETLAs. To a lesser extent, new contracts and existing contract renewals for our Adobe Marketing Cloud services contributed to this increase as our retention rates for Adobe Marketing Cloud services have been improving slightly over time.

Cost of revenue of \$622.1 million increased by \$35.5 million, or 6%, during fiscal 2014, from \$586.6 million in fiscal 2013, and \$102.8 million, or 21%, during fiscal 2013 from \$483.8 million in fiscal 2012. These increases were primarily due to increased hosting and server costs associated with our subscription and SaaS offerings, costs associated with compensation and related benefits driven by additional headcount and royalty costs.

Operating expenses of \$3.11 billion increased by \$66.3 million, or 2%, during fiscal 2014, from \$3.05 billion in fiscal 2013, and \$306.3 million, or 11%, in fiscal 2013 from \$2.74 billion in fiscal 2012. These increases were primarily due to increased costs associated with compensation and related benefits.

Net income of \$268.4 million decreased by \$21.6 million, or 7%, during fiscal 2014 from \$290.0 million in fiscal 2013, and \$542.8 million, or 65%, during fiscal 2013 from \$832.8 million in fiscal 2012.

Net cash flow from operations of \$1.29 billion during fiscal 2014 increased by \$135.8 million, or 12%, from \$1.15 billion during fiscal 2013 primarily due to cash inflows associated with the increases in deferred revenue and taxes payable, offset in part by lower net income. Net cash flow from operations during fiscal 2013 decreased by \$347.9 million, or 23%, from \$1.50 billion during fiscal 2012 primarily due to lower net income.

Table of Contents

Revenue (dollars in millions)

	Fiscal 2014		Fiscal 2013		Fiscal 2012	% Change 2014-2013	% Change 2013-2012
Product	\$1,627.8		\$2,470.1		\$3,342.8	(34)%	(26)%
Percentage of total revenue	39	%	61	%	76	%	
Subscription	2,076.6		1,137.9		673.2	82	69
Percentage of total revenue	50	%	28	%	15	%	
Services and support	442.7		447.2		387.7	(1)%	15
Percentage of total revenue	11	%	11	%	9	%	
Total revenue	\$4,147.1		\$4,055.2		\$4,403.7	2	(8)%

Our subscription revenue is comprised primarily of fees we charge for our subscription and hosted service offerings including certain of our Adobe Marketing Cloud services and Creative Cloud. We recognize subscription revenue ratably over the term of agreements with our customers, beginning on the commencement of the service. We expect our subscription revenue will continue to increase as a result of our investments in new SaaS and subscription models. We also expect this to increase the amount of recurring revenue we generate as a percent of our total revenue. We have the following segments—Digital Media, Digital Marketing and Print and Publishing. Subscription revenue by reportable segment for fiscal 2014, 2013 and 2012 is as follows (dollars in millions):

	Fiscal 2014		Fiscal 2013		Fiscal 2012	% Change 2014-2013	% Change 2013-2012
Digital Media	\$1,268.3		\$471.9		\$116.8	169	304
Digital Marketing	797.5		663.1		555.5	20	19
Print and Publishing	10.8		2.9		0.9	*	*
Total subscription revenue	\$2,076.6		\$1,137.9		\$673.2	82	69

(*) Percentage is not meaningful.

Our services and support revenue is comprised of consulting, training and maintenance and support, primarily related to the licensing of our enterprise, developer and platform products and the sale of our Adobe Marketing Cloud services. Our support revenue also includes technical support and developer support to partners and developer organizations related to our desktop products. Our maintenance and support offerings, which entitle customers to receive product upgrades and enhancements or technical support, depending on the offering, are generally recognized ratably over the term of the arrangement.

Segments

In fiscal 2014, we categorized our products into the following segments:

Digital Media—Our Digital Media segment provides tools and solutions that enable individuals, small and medium businesses and enterprises to create, publish, promote and monetize their digital content anywhere. Our customers include traditional content creators, web application developers and digital media professionals, as well as their management in marketing departments and agencies, companies and publishers.

Digital Marketing—Our Digital Marketing segment provides solutions and services for how digital advertising and marketing are created, managed, executed, measured and optimized. Our customers include digital marketers, advertisers, publishers, merchandisers, web analysts, chief marketing officers, chief information officers and chief revenue officers.

Print and Publishing—Our Print and Publishing segment addresses market opportunities ranging from the diverse authoring and publishing needs of technical and business publishing to our legacy type and OEM printing businesses.

Fiscal 2014 Revenue Compared to Fiscal 2013 Revenue

Digital Media

Revenue from Digital Media decreased slightly during fiscal 2014 as compared to fiscal 2013. The slight decrease was primarily driven by declines in revenue associated with distribution of third-party software downloads and Hobbyist products launched in fiscal 2013. With respect to the Hobbyist product revenue decline, we are actively migrating customers to our Creative Cloud Photography Plan for which revenue is recognized ratably. Largely offsetting these decreases were increases in Creative Cloud and Document Services revenue.

Revenue related to our creative professional products, which includes our Creative Cloud, Creative Suite editions and CS point products, increased during fiscal 2014 as compared to fiscal 2013 due to increases in revenue from subscriptions and ETLAs, partially offset by the decrease in revenue from CS point products and Creative Suite editions as we discontinued the general availability of our perpetually licensed CS6 products in the second quarter of 2014.

Revenue associated with our other creative products decreased during fiscal 2014 as compared to fiscal 2013 primarily due to decreases associated with distribution of third-party software downloads and Hobbyist products launched in fiscal 2013. Additionally, actively migrating customers to our Creative Cloud Photography Plan is also contributing to the year-over-year decline in revenue. These decreases were offset in part by increases in revenue associated with our Digital Publishing Suite.

For our creative offerings, the total number of perpetual units licensed decreased while the number of subscription units licensed increased during fiscal 2014 as compared to fiscal 2013. Unit average selling prices for our perpetual units licensed decreased during fiscal 2014 as compared to fiscal 2013.

Document Services revenue, which includes our Acrobat product family, increased during fiscal 2014 as compared with the year-ago period primarily due to increases in our Acrobat Cloud Services revenue. The increases were slightly offset by decreases due to our continued shift to ETLAs.

Within Document Services, excluding large enterprise license agreements, the number of units licensed decreased while the unit average selling prices remained stable during fiscal 2014, as compared with the year-ago period.

Digital Marketing

Revenue from Digital Marketing increased \$126.3 million during fiscal 2014 as compared to fiscal 2013 due to continued revenue growth associated with our Adobe Marketing Cloud, which increased 15% during fiscal 2014 as compared with the year-ago period. Contributing to this increase was Adobe Campaign and the strong adoption of AEM.

Print and Publishing

Revenue from Print and Publishing decreased during fiscal 2014 as compared to fiscal 2013 primarily due to decreases in legacy product revenue and increased ETLAs for certain products in this group.

Fiscal 2013 Revenue Compared to Fiscal 2012 Revenue

Digital Media

Revenue from Digital Media decreased \$476.0 million during fiscal 2013 as compared to fiscal 2012, primarily due to continued strong adoption of Creative Cloud and ETLAs as we continued to transition more of our business to a subscription-based model.

Table of Contents

Revenue related to our creative professional products, which include our Creative Suite editions and CS point products as well as Creative Cloud, decreased during fiscal 2013 as compared to fiscal 2012 due to continued customer adoption of Creative Cloud subscription offerings, released in May 2012, for which revenue is recognized over time.

Revenue associated with our other creative products increased during fiscal 2013 as compared to fiscal 2012, primarily due to increases associated with distribution of third-party software downloads and our Digital Publishing Suite. These increases were partially offset by decreases in revenue associated with our Hobbyist products.

For our creative offerings, the total number of perpetual units licensed decreased while the number of subscription units licensed increased during fiscal 2013 as compared to fiscal 2012. Unit average selling prices for our perpetual units licensed decreased during the year ended fiscal 2013 as compared to fiscal 2012.

Document Services revenue, which includes our Acrobat product family, decreased slightly during fiscal 2013 as compared to fiscal 2012, primarily due to the continued shift to ETLAs offset by increased Acrobat Cloud Services revenue including revenue generated from our EchoSign e-signing service.

Within Document Services, excluding large enterprise license agreements, the number of units licensed decreased while the unit average selling prices increased during fiscal 2013 as compared to fiscal 2012.

Digital Marketing

Revenue from Digital Marketing increased \$143.8 million during fiscal 2013 as compared to fiscal 2012. The increase was primarily due to continued revenue growth associated with our Adobe Marketing Cloud, which increased 26% during fiscal 2013, as compared to the year ago period and includes Adobe Campaign revenue from our acquisition of Neolane in the third quarter of fiscal 2013. The increase noted above was partially offset by expected declines in revenue associated with our legacy products during fiscal 2013.

Print and Publishing

Revenue from Print and Publishing decreased during fiscal 2013 as compared to fiscal 2012, primarily due to increased ETLAs for certain products in this group.

Geographical Information (dollars in millions)

	Fiscal 2014	Fiscal 2013	Fiscal 2012	% Change 2014-2013	% Change 2013-2012
Americas	\$2,314.4	\$2,134.4	\$2,196.4	8	% (3)
Percentage of total revenue	56	% 53	% 50	%	
EMEA	1,179.9	1,129.2	1,294.6	4	% (13)
Percentage of total revenue	28	% 28	% 29	%	
APAC	652.8	791.6	912.7	(18)	% (13)

Total revenue	\$4,147.1	\$4,055.2	\$4,403.7	2	% (8)

Fiscal 2014 Revenue by Geography Compared to Fiscal 2013 Revenue by Geography

Overall revenue during fiscal 2014 as compared to fiscal 2013 increased in the Americas and EMEA. Revenue in the Americas increased during fiscal 2014 as compared to the year-ago period due to increases in Digital Media and Digital Marketing revenue. Revenue in EMEA increased during fiscal 2014 as compared to the year-ago period primarily due to increases in Digital Marketing revenue. Digital Media and Print and Publishing revenue in EMEA remained relatively stable during fiscal 2014 compared to the year-ago period. Despite the strengthening of the U.S. Dollar against the Euro and the British Pound during the latter part of 2014, the overall weakening of the U.S. Dollar against these currencies during fiscal 2014 also caused revenue in EMEA to increase as compared to the year-ago period. Within the Americas and EMEA, the fluctuations in revenue by reportable segment were attributable to the factors noted in the segment information above.

Revenue in APAC decreased during fiscal 2014 as compared to the year-ago period primarily as a result of decreases in Digital Media revenue due to slower adoption of Creative Cloud in Japan compared to other countries and the strengthening of the U.S. Dollar against the Japanese Yen and other Asian currencies during fiscal 2014 as compared to the year-ago period. Digital Marketing and Print and Publishing revenue in APAC remained relatively stable in fiscal 2014 compared to the year-ago period.

Table of Contents

Fiscal 2013 Revenue by Geography Compared to Fiscal 2012 Revenue by Geography

Revenue declined across all geographies during fiscal 2013 as compared to fiscal 2012. Revenue in the Americas and APAC decreased during fiscal 2013 due to decreases in Digital Media and Print and Publishing revenue, offset in part by increases in Digital Marketing revenue. Revenue in EMEA decreased during fiscal 2013 due to decreases in Digital Media revenue, offset in part by increases in Digital Marketing and Print and Publishing revenue. Within each geographical region, the fluctuations in revenue by reportable segment were attributable to the factors noted in the segment information above.

Included in the overall change in revenue for fiscal 2014 and fiscal 2013 were impacts associated with foreign currency as shown below. Our currency hedging program is used to mitigate a portion of the foreign currency impact to revenue.

(in millions)	Fiscal 2014	Fiscal 2013	
Revenue impact:	Increase/(Decrease)		
EMEA:			
Euro	\$12.3	\$9.1	
British Pound	12.9	(3.9)
Other currencies	(0.2) 0.6	
Total EMEA	25.0	5.8	
Japanese Yen	(25.7) (63.6)
Other currencies	(8.9) (5.6)
Total revenue impact	(9.6) (63.4)
Hedging impact:			
EMEA	10.1	3.7	
Japanese Yen	8.6	32.3	
Total hedging impact	18.7	36.0	
Total impact	\$9.1	\$(27.4)

During fiscal 2014, the U.S. Dollar strengthened against the Japanese Yen and other Asian currencies causing revenue in APAC measured in U.S. Dollar equivalents to decrease compared with the year-ago period. This decrease was offset by the favorable impact to revenue measured in EMEA currencies as the U.S. Dollar weakened against the Euro and the British Pound for the majority of fiscal 2014. Our EMEA and Yen currency hedging programs resulted in hedging gains during fiscal 2014.

During fiscal 2013, the U.S. Dollar strengthened against the Japanese Yen and other Asian currencies causing revenue in APAC measured in U.S. Dollar equivalents to decrease compared with the year-ago period. This decrease was partially offset by the favorable impact to revenue measured in EMEA currencies as the U.S. Dollar generally weakened against these currencies. Our EMEA and Yen currency hedging programs resulted in hedging gains during fiscal 2013.

See Note 18 of our Notes to Consolidated Financial Statements for further geographic information.

Product Backlog

The actual amount of product backlog at any particular time may not be a meaningful indicator of future business prospects. Shippable backlog is comprised of unfulfilled orders, excluding those associated with new product releases, those pending credit review and those not shipped due to the application of our global inventory policy. We had minimal shippable backlog at the end of the fourth quarter of fiscal 2014 and fiscal 2013. We expect that our shippable backlog will continue to be insignificant in future periods.

The deferred revenue balance on our consolidated balance sheet does not represent the total contract value of annual or multi-year, non-cancellable subscription agreements. Unbilled deferred revenue represents expected future billings which are contractually committed under our existing subscription, SaaS and managed services agreements that have not been invoiced and are not recorded in deferred revenue within our financial statements. Our presentation of unbilled deferred revenue backlog may differ from that of other companies in the industry. As of November 28, 2014,

we had unbilled deferred revenue backlog of approximately \$1.7 billion of which approximately 60% to 65% is not reasonably expected to be billed during fiscal 2015. As of November 29, 2013, we had unbilled deferred revenue backlog of approximately \$1.0 billion.

Table of Contents

We expect that the amount of unbilled deferred revenue backlog will change from period to period due to certain factors, including the timing and duration of large customer subscription, SaaS and managed service agreements, varying billing cycles of these agreements, the timing of customer renewals, the timing of when unbilled deferred revenue backlog is to be billed, changes in customer financial circumstances and foreign currency fluctuations. Additionally, the unbilled deferred revenue backlog for multi-year subscription agreements that are billed annually is typically higher at the beginning of the contract period, lower prior to renewal and typically increases when the agreement is renewed. Accordingly, fluctuations in unbilled deferred revenue backlog may not be a reliable indicator of future business prospects and the related revenue associated with these contractual commitments.

Cost of Revenue (dollars in millions)

	Fiscal 2014	Fiscal 2013	Fiscal 2012	% Change 2014-2013	% Change 2013-2012
Product	\$97.1	\$138.2	\$121.7	(30)%	14%
Percentage of total revenue	2	% 3	% 3	%	
Subscription	335.5	278.1	219.1	21	% 27
Percentage of total revenue	8	% 7	% 5	%	
Services and support	189.5	170.3	143.0	11	% 19
Percentage of total revenue	5	% 4	% 3	%	
Total cost of revenue	\$622.1	\$586.6	\$483.8	6	% 21
Product					

Cost of product revenue includes product packaging, third-party royalties, excess and obsolete inventory, amortization related to localization costs, purchased intangibles and acquired rights to use technology and the costs associated with the manufacturing of our products.

Fluctuations in cost of product revenue are due to the following:

	% Change 2014-2013	% Change 2013-2012
Amortization of purchased intangibles and technology license arrangements	(20)%	27%
Cost of sales	(4)	(8)
Royalty cost	(2)	—
Excess and obsolete inventory	1	(4)
Various individually insignificant items	(5)	(1)
Total change	(30)%	14%

Cost of product revenue decreased during fiscal 2014 as compared to fiscal 2013 primarily due to decreases in amortization of purchased intangibles and technology license arrangements, cost of sales and royalty costs, slightly offset by an increase in excess and obsolete inventory. Amortization of purchased intangibles and technology license arrangements decreased as compared with the year-ago period as we entered into certain technology licensing arrangements for which payments of \$26.5 million related to historical use of certain technology licensing arrangements were expensed as cost of product revenue during fiscal 2013. Cost of sales decreased as compared with the year-ago period due to decreases in the number of perpetual units sold and associated packaging costs as we continue to focus our development and sales efforts on Creative Cloud. Royalty cost decreased as compared to the year-ago period primarily due to decreases in revenue from our perpetual offerings. Excess and obsolete inventory increased as compared to the year-ago period as a result of changes in reserve requirements for CS6 shrink boxes as we have discontinued the general availability of CS6 on a perpetual licensing basis.

Cost of product revenue increased during fiscal 2013 as compared to fiscal 2012 primarily due to an increase in amortization of purchased intangibles and technology license arrangements offset by decreases in cost of sales and excess and obsolete inventory. Amortization of purchased intangibles and technology license arrangements increased as we entered into certain technology licensing arrangements totaling \$51.8 million in the first quarter of fiscal 2013. Of this cost, an estimated \$25.3 million was related to future licensing rights and was capitalized and is being amortized on a straight-line basis over the estimated useful lives ranging from five to ten years. The remaining cost of approximately \$26.5 million was related to historical use of licensing rights and was expensed as cost of product

revenue in fiscal 2013. In connection with certain of these licensing arrangements, we have the ability to acquire additional rights to use technology in the future. Cost of sales primarily decreased due to a decline in the number of perpetual units sold and packaging costs associated with our CS6 products as we focus our creative development efforts on our Creative Cloud offering. Excess and obsolete inventory decreased due to decreased reserve requirements for CS6 as we continue to transition to more of a subscription-based model.

Table of Contents

Subscription

Cost of subscription revenue consists of third-party royalties and expenses related to operating our network infrastructure, including depreciation expenses and operating lease payments associated with computer equipment, data center costs, salaries and related expenses of network operations, implementation, account management and technical support personnel, amortization of intangible assets and allocated overhead. We enter into contracts with third-parties for the use of their data center facilities and our data center costs largely consist of the amounts we pay to these third parties for rack space, power and similar items.

Cost of subscription revenue increased due to the following:

	% Change 2014-2013	% Change 2013-2012	
Data center cost	10	% 11	%
Compensation cost and related benefits associated with headcount	4	5	
Depreciation expense	3	3	
Royalty cost	3	4	
Amortization of purchased intangibles	—	4	
Various individually insignificant items	1	—	
Total change	21	% 27	%

Cost of subscription revenue increased during fiscal 2014 as compared to fiscal 2013 primarily due to data center costs, compensation cost and related benefits, depreciation expense, and royalty cost. Data center costs increased as compared with the year-ago period primarily due to higher transaction volumes in our Adobe Marketing Cloud and Creative Cloud services. Compensation cost and related benefits increased as compared to the year-ago period primarily due to additional headcount in fiscal 2014, including from our acquisition of Neolane in the third quarter of fiscal 2013. Depreciation expense increased as compared to the year-ago period primarily due to higher capital expenditures in recent periods as we continue to invest in our network and data center infrastructure to support the growth of our business. Royalty cost increased primarily due to increases in subscriptions and downloads of our SaaS offerings.

Cost of subscription revenue increased during fiscal 2013 as compared to fiscal 2012 primarily due to increased hosted server costs and amortization of purchased intangibles. Hosted server costs increased primarily due to increases in data center costs related to higher transaction volumes in our Adobe Marketing Cloud and Creative Cloud services, depreciation expense from higher capital expenditures in prior years and compensation and related benefits driven by additional headcount. Amortization of purchased intangibles increased primarily due to increased amortization of intangible assets purchased associated with our acquisitions of Behance and Neolane in fiscal 2013.

Services and Support

Cost of services and support revenue is primarily comprised of employee-related costs and associated costs incurred to provide consulting services, training and product support.

Cost of services and support revenue increased during fiscal 2014 as compared to fiscal 2013 primarily due to increases in compensation and related benefits driven by additional headcount and third-party fees related to training and consulting services provided to our customers.

Cost of services and support revenue increased during fiscal 2013 as compared to fiscal 2012 primarily due to increases in third-party fees related to training and consulting services provided to our customers and compensation and related benefits driven by additional headcount, including headcount from our acquisition of Neolane in fiscal 2013.

Table of Contents

Operating Expenses (dollars in millions)

	Fiscal 2014		Fiscal 2013		Fiscal 2012	% Change 2014-2013	% Change 2013-2012

(*) Percentage is greater than 100%.

Research and Development, Sales and Marketing and General and Administrative Expenses

The increase in research and development and general and administrative expenses during fiscal 2014 as compared to fiscal 2013 is primarily due to increases in cash incentive and stock-based compensation. The increase in stock-based compensation was driven by a change in the vesting term for stock awards granted as part of our annual review process beginning in fiscal 2013, which decreased the term from four years to three years. The increase in sales and marketing expense during fiscal 2014 as compared to fiscal 2013 is primarily due to compensation and related benefits associated with additional headcount.

The increase in research and development, sales and marketing and general and administrative expenses during fiscal 2013 as compared to fiscal 2012 is primarily due to higher cash incentive compensation program achievement in fiscal 2013, increases in stock-based compensation expense due to higher share prices during fiscal 2013 as compared to fiscal 2012 as well as a shorter vesting term which decreased from four years to three years for stock awards granted as part of our annual review process during fiscal 2013.

Research and Development

Research and development expenses consist primarily of salary and benefit expenses for software developers, contracted development efforts, related facilities costs and expenses associated with computer equipment used in software development.

Research and development expenses increased due to the following:

	% Change 2014-2013	% Change 2013-2012	
Compensation associated with cash and stock-based incentives	2	% 7	%
Compensation and related benefits associated with headcount	—	3	
Various individually insignificant items	—	1	
Total change	2	% 11	%

We believe that investments in research and development, including the recruiting and hiring of software developers, are critical to remain competitive in the marketplace and are directly related to continued timely development of new and enhanced products. We will continue to focus on long-term opportunities available in our end markets and make significant investments in the development of our application, tool and service offerings.

Sales and Marketing

Sales and marketing expenses consist primarily of salary and benefit expenses, sales commissions, travel expenses and related facilities costs for our sales, marketing, order management and global supply chain management personnel.

Sales and marketing expenses also include the costs of programs aimed at increasing revenue, such as advertising, trade shows, public relations and other market development programs. Sales and marketing expenses for fiscal 2014 are lower than what was reported in our December 11, 2014 earnings press release by \$19.5 million reflecting an

update to our sales commission expense based on information received following the date of our press release.

Table of Contents

Sales and marketing expenses increased due to the following:

	% Change 2014-2013	% Change 2013-2012	
Compensation and related benefits associated with headcount	1	% 4	%
Compensation associated with cash and stock-based incentives	—	4	
Various individually insignificant items	1	(1)
Total change	2	% 7	%

General and Administrative

General and administrative expenses consist primarily of compensation and benefit expenses, travel expenses and related facilities costs for our finance, facilities, human resources, legal, information services and executive personnel. General and administrative expenses also include outside legal and accounting fees, provision for bad debts, expenses associated with computer equipment and software used in the administration of the business, charitable contributions and various forms of insurance.

General and administrative expenses increased due to the following:

	% Change 2014-2013	% Change 2013-2012	
Compensation associated with cash and stock-based incentives	3	% 4	%
Compensation and related benefits associated with headcount growth	—	4	
Loss contingency	2	—	
Professional and consulting fees	(2) 7	
Charitable contributions	—	2	
Various individually insignificant items	1	3	
Total change	4	% 20	%

See Note 15 of our Notes to the Consolidated Financial Statements for further information regarding the loss contingency.

Professional and consulting fees increased during fiscal 2013 as compared to fiscal 2012 primarily due to increased professional and legal fees including those associated with the attacks on our network discovered in September 2013.

Restructuring and Other Charges

During the past several years, we have initiated various restructuring plans. During fiscal 2014, in connection with our recent Fiscal 2014 Restructuring Plan, we recorded \$19.4 million associated with termination benefits and closing redundant facilities. In connection with our Other Restructuring Plans, we recorded insignificant charges associated with closing redundant facilities. We also recorded minor adjustments for changes in previous estimates during the fiscal year.

During fiscal 2013, management approved a plan to sell land, building and other assets located in Waltham, Massachusetts (the "Waltham property assets") with a total carrying amount of \$47.4 million. As of May 31, 2013, we classified the Waltham property assets as held for sale at \$23.6 million representing their fair value, net of estimated costs to sell which was the lesser of the fair value less cost to sell or carrying amount of the assets. As a result, we recorded a write-down of \$23.8 million during fiscal 2013. In September 2013, we finalized the sale of the Waltham property assets for net proceeds of \$24.3 million which approximated the carrying value of the assets at the time of sale.

Also during fiscal 2013, in connection with our Fiscal 2011 Restructuring Plan and Other Restructuring Plans, we recorded \$6.3 million associated with termination benefits and closing redundant facilities. We also recorded \$3.0 million in net favorable employee termination and facility related adjustments for changes in previous estimates during the fiscal year.

During fiscal 2012, in connection with our Fiscal 2011 Restructuring Plan and Other Restructuring Plans, we recorded \$17.4 million associated with termination benefits and closing redundant facilities. We also recorded \$20.3 million in net favorable employee termination and facility related adjustments for changes in previous estimates during the fiscal year.

See Note 10 of our Notes to Consolidated Financial Statements for further information regarding our restructuring plans.

Table of Contents

Amortization of Purchased Intangibles

During the last several years, we have completed a number of business combinations and asset acquisitions. As a result of these acquisitions, we purchased intangible assets that are being amortized over their estimated useful lives ranging from one to fourteen years.

Amortization expense remained stable during fiscal 2014 as compared to fiscal 2013.

Amortization expense increased 7% during fiscal 2013 as compared to fiscal 2012 primarily due to amortization expense associated with intangible assets purchased through our acquisitions of Behance and Neolane in fiscal 2013.

Non-Operating Income (Expense), Net (dollars in millions)

	Fiscal 2014	Fiscal 2013	Fiscal 2012	% Change 2014-2013	% Change 2013-2012
Interest and other income (expense), net	\$7.3	\$4.9	\$(3.4)	49	% *
Percentage of total revenue	**	**	**		
Interest expense	(59.7)	(67.5)	(67.5)	(12))% — %
Percentage of total revenue	(1)	(2)	(2))%)%
Investment gains (losses), net	1.1	(4.0)	9.5	*	*
Percentage of total revenue	**	**	**		
Total non-operating income (expense), net	\$(51.3)	\$(66.6)	\$(61.4)	(23))% 8 %

(*) Percentage is not meaningful.

(**) Percentage is less than 1%.

Interest and Other Income (Expense), Net

Interest and other income (expense), net consists primarily of interest earned on cash, cash equivalents and short-term fixed income investments. Interest and other income (expense), net also includes gains and losses on fixed income investments and foreign exchange gains and losses other than any gains recorded to revenue from hedging Euros, British Pounds and Yen currencies.

Interest and other income (expense), net increased in fiscal 2014 as compared to fiscal 2013 primarily due to decreased foreign currency losses and increased realized gains on fixed income investments. The increases were partially offset by decreased interest income on our investment in lease receivable due to the purchase of the East and West Towers during fiscal 2014. See Note 15 of our Notes to Consolidated Financial Statements for further details regarding our investment in lease receivables.

Interest and other income (expense), net increased in fiscal 2013 as compared to fiscal 2012 primarily due to decreased foreign exchange losses.

Interest Expense

Interest expense primarily represents interest associated with our senior notes and interest rate swaps. Interest on our senior notes is payable semi-annually, in arrears, on February 1 and August 1. Floating interest payments on the interest rate swaps are paid monthly. The fixed-rate interest receivable on the swaps is received semi-annually concurrent with the senior notes interest payments.

Interest expense decreased during fiscal 2014 as compared to fiscal 2013 due to the favorable impact of the interest rate swaps. See Notes 5 and 13 of our Notes to Consolidated Financial Statements for further details regarding our interest rate swaps.

Interest expense remained relatively stable during fiscal 2013 as compared to fiscal 2012.

Investment Gains (Losses), Net

Investment gains (losses), net consists principally of realized gains or losses from the sale of marketable equity investments, other-than-temporary declines in the value of marketable and non-marketable equity securities and unrealized holding gains and losses associated with our deferred compensation plan assets (classified as trading securities) and gains and losses associated with our direct and indirect investments in privately held companies.

Table of Contents

Investment gains (losses), net fluctuated due to the following (in millions):

	Fiscal 2014	Fiscal 2013	Fiscal 2012
Net gains related to our trading securities	\$1.9	\$3.0	\$1.6
Net losses related to our direct and indirect investments in privately held companies	(0.8)) —	(0.2)
Write-downs due to other-than-temporary declines in value of our marketable and non-marketable equity securities	—	(7.0)) (0.1)
Gains from sale of marketable equity securities	—	—	8.2
Total investment gains (losses), net	\$1.1	\$ (4.0)) \$9.5

During fiscal 2014, total investment gains (losses), net increased to net gains primarily due to write-downs for other-than-temporary declines in value of our direct investments in privately held companies in fiscal 2013 that did not recur in fiscal 2014, offset in part by a decrease in net gains related to our trading securities.

During fiscal 2013, total investment gains (losses), net decreased to net losses primarily due to a decrease in net realized gains from the sale of marketable equity securities and an increase in write-downs for other-than-temporary declines in value of our direct investments in privately held companies.

Provision for Income Taxes (dollars in millions)

	Fiscal 2014	Fiscal 2013	Fiscal 2012	% Change 2014-2013	% Change 2013-2012
Provision	\$93.0	\$66.2	\$286.0	40	% (77)
Percentage of total revenue	2	% 2	% 6	%	
Effective tax rate	26	% 19	% 26	%	

Our effective tax rate increased by approximately seven percentage points during fiscal 2014 as compared to fiscal 2013. The increase was primarily due to the expiration of the federal research and development tax credit in December 2013 and stronger domestic profits for fiscal 2014.

Our effective tax rate decreased by approximately seven percentage points during fiscal 2013 as compared to fiscal 2012. The decrease is primarily related to the reinstatement of the U.S. research and development credit and tax benefits recognized as a result of the completion of certain income tax examinations.

In December 2014, the United States Congress passed an extension of the federal research and development tax credit through December 31, 2014. As a result, we expect that our income tax provision for the first quarter of fiscal 2015 will include a discrete tax benefit which will reduce our effective tax rate for the quarter and to a lesser extent the effective annual tax rate.

We are a United States-based multinational company subject to tax in multiple U.S. and foreign tax jurisdictions. A significant portion of our foreign earnings for the current fiscal year were earned by our Irish subsidiaries. In addition to providing for U.S. income taxes on earnings from the U.S., we provide for U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered permanently reinvested outside the U.S. While we do not anticipate changing our intention regarding permanently reinvested earnings, if certain foreign earnings previously treated as permanently reinvested are repatriated, the related U.S. tax liability may be reduced by any foreign income taxes paid on these earnings. Currently, there are a significant amount of foreign earnings upon which U.S. income taxes have not been provided. See Note 9 of our Notes to the Consolidated Financial Statements for further information on our provision for income taxes.

Accounting for Uncertainty in Income Taxes

The gross liability for unrecognized tax benefits at November 28, 2014 was \$148.8 million, exclusive of interest and penalties. If the total unrecognized tax benefits at November 28, 2014 were recognized in the future, \$136.2 million of unrecognized tax benefits would decrease the effective tax rate, which is net of an estimated \$12.6 million federal benefit related to deducting certain payments on future state tax returns.

As of November 28, 2014, the combined amount of accrued interest and penalties related to tax positions taken on our tax returns was approximately \$14.6 million. This amount is included in non-current income taxes payable. The timing of the resolution of income tax examinations is highly uncertain as are the amounts and timing of tax payments that are part of any audit settlement process. These events could cause large fluctuations in the balance sheet classification of

Table of Contents

current and non-current assets and liabilities. We believe that within the next 12 months, it is reasonably possible that either certain audits will conclude or statutes of limitations on certain income tax examination periods will expire, or both. Given the uncertainties described above, we can only determine a range of estimated potential decreases in underlying unrecognized tax benefits ranging from \$0 to approximately \$5 million.

In July 2013, a U.S. income tax examination covering fiscal 2008 and 2009 was completed. Our accrued tax and interest related to these years was \$48.4 million and was previously reported in long-term income taxes payable. We settled the tax obligation resulting from this examination with cash and income tax assets totaling \$41.2 million, and the resulting \$7.2 million income tax benefit was recorded in the third quarter of fiscal 2013.

LIQUIDITY AND CAPITAL RESOURCES

This data should be read in conjunction with our Consolidated Statements of Cash Flows.

(in millions)	As of	
	November 28, 2014	November 29, 2013
Cash and cash equivalents	\$1,117.4	\$834.6
Short-term investments	\$2,622.1	\$2,339.2
Working capital	\$2,107.9	\$2,520.3
Stockholders' equity	\$6,775.9	\$6,724.6

A summary of our cash flows is as follows:

(in millions)	Fiscal 2014	Fiscal 2013	Fiscal 2012
Net cash provided by operating activities	\$1,287.5	\$1,151.7	\$1,499.6
Net cash used for investing activities	(490.7)	(1,177.8)	(834.7)
Net cash used for financing activities	(507.3)	(559.1)	(234.7)
Effect of foreign currency exchange rates on cash and cash equivalents	(6.7)	(5.2)	5.4
Net increase (decrease) in cash and cash equivalents	\$282.8	\$(590.4)	\$435.6

Our primary source of cash is receipts from revenue. The primary uses of cash are payroll related expenses, general operating expenses including marketing, travel and office rent, and cost of revenue. Other sources of cash are proceeds from the exercise of employee options and participation in the employee stock purchase plan. Other uses of cash include our stock repurchase program, which is described below, business acquisitions and purchases of property and equipment.

Cash Flows from Operating Activities

For fiscal 2014, net cash provided by operating activities of \$1.3 billion was primarily comprised of net income plus the net effect of non-cash items. The primary working capital sources of cash were net income coupled with increases in deferred revenue and accrued expenses. The increase in deferred revenue is primarily due to increased subscription and ETLA activity for our individual, team and enterprise Creative Cloud offerings and increases in Digital Marketing and Digital Publishing hosted services, offset in part by decreases in billings for our maintenance and Creative product software upgrade plans which we discontinued in January 2013. Accrued expenses increased primarily due to accruals for contract terminations and employee transition payments associated with business realignment initiatives implemented in the fourth quarter of fiscal 2014.

For fiscal 2013, net cash provided by operating activities of \$1.2 billion was primarily comprised of net income plus the net effect of non-cash items. The primary working capital sources of cash were net income coupled with increases in deferred revenue and accrued expenses and decreases in trade receivables. Deferred revenue increased primarily due to increased subscription and ETLA activity for our Creative Cloud offering and increases in Digital Marketing hosted services, offset in part by decreases in billings for our maintenance and Creative product software upgrade plans which we discontinued in January 2013. Accrued expenses increased primarily due to amounts due under our fiscal 2013 annual incentive plan and sales commission accruals associated with higher achievement levels. Trade receivables declined primarily due to lower perpetual license revenue levels and improved collections compared to the

fourth quarter of fiscal 2012.

The primary working capital uses of cash were decreases in taxes payable and increases in prepaid expenses and other assets. The decrease in taxes payable is largely attributed to tax payments made combined with audit settlement adjustments, offset in part by tax expense and other adjustments during fiscal 2013. Prepaid expenses and other assets increased primarily due to

Table of Contents

increases in short-term income tax receivables related to the carryback of R&D and foreign tax credits in the fourth quarter of fiscal 2013.

For fiscal 2012, net cash provided by operating activities of \$1.5 billion was primarily comprised of net income plus the net effect of non-cash items. The primary working capital sources of cash were net income coupled with increases in deferred revenue and decreases in trade receivables. Deferred revenue increased primarily due to an increase in activity for both upgrade plans with support and site and term licenses largely associated with our Digital Media and Digital Marketing enterprise license agreements. The decrease in trade receivables is primarily related to an increase in revenue linearity and improved collections in our Digital Marketing portfolio offset in part by higher revenue levels due to the CS6 product release which occurred late in the second quarter of fiscal 2012.

The primary working capital uses of cash were decreases in accrued restructuring and trade payables. Decreases in accrued restructuring primarily related to payments and adjustments for employee terminations and facility exit costs associated with the Fiscal 2011 Restructuring Plan, a significant portion of which were paid and adjusted in the first and second quarters of fiscal 2012. Trade payables decreased primarily due to the timing of payments as a greater number of invoices were paid prior to the fiscal year end in fiscal 2012 as compared to fiscal 2011.

Cash Flows from Investing Activities

For fiscal 2014, net cash used for investing activities of \$490.7 million was primarily due to purchases of short-term investments, purchases of property and equipment and a business acquisition. These cash outflows were offset in part by sales and maturities of short-term investments.

For fiscal 2013, net cash used for investing activities of \$1,177.8 million was primarily due to our acquisitions of Neolane and Behance. Other uses of cash during fiscal 2013 represented purchases of short-term investments, purchases of property and equipment associated with our construction projects in Oregon and India and purchases of long-term technology licenses. These cash outflows were offset in part by sales and maturities of short-term investments and the sale of the Waltham Property. See Note 2 of our Notes to the Consolidated Financial Statements for further information regarding our acquisitions of Neolane and Behance.

For fiscal 2012, net cash used for investing activities of \$834.7 million was primarily due to our acquisition of Efficient Frontier in the first quarter of fiscal 2012. Other uses of cash during fiscal 2012 represented purchases of short-term investments and property and equipment, offset in part by sales and maturities of short-term investments. See Note 2 of our Notes to the Consolidated Financial Statements for further information regarding our acquisition of Efficient Frontier.

Cash Flows from Financing Activities

For fiscal 2014, fiscal 2013 and fiscal 2012, net cash used for financing activities of \$507.3 million, \$559.1 million and \$234.7 million, respectively, was primarily due to payments for our treasury stock repurchases and costs associated with the issuance of treasury stock, offset in part by proceeds from the issuance of treasury stock and excess tax benefits from stock-based compensation. See the section titled “Stock Repurchase Program” discussed below. We expect to continue our investing activities, including short-term and long-term investments, venture capital, facilities expansion and purchases of computer systems for research and development, sales and marketing, product support and administrative staff. Furthermore, cash reserves may be used to repurchase stock under our stock repurchase program and to strategically acquire companies, products or technologies that are complementary to our business.

In December 2014, we entered into a definitive agreement under which we expect to acquire Fotolia for approximately \$800 million in cash. We expect to finance the acquisition using existing cash, cash equivalents and short-term investment balances, newly issued debt or drawings from our existing revolving credit agreement. We believe that these resources, in addition to cash generated from operations, will be sufficient to fund the acquisition. See Note 2 of our Notes to the Consolidated Financial Statements for further information regarding our acquisition of Fotolia.

Restructuring

During the past several years, we have initiated various restructuring plans. Currently, the Fiscal 2014 Restructuring Plan is the only plan of significance to us as we consider our restructuring plans initiated in prior years to be substantially complete.

As of November 28, 2014, we have accrued total restructuring charges of \$22.3 million of which approximately \$15.0 million relates to ongoing termination benefits that are expected to be paid during fiscal 2015. The remaining \$7.3 million relates to the cost of closing redundant facilities and are expected to be paid under contract through fiscal 2021 of which approximately 45% will be paid through 2016. During fiscal 2014, we made payments related to our restructuring plans totaling \$11.0 million

Table of Contents

which consisted of \$5.7 million and \$5.3 million in payments related to termination benefits and contract terminations and the closing of redundant facilities, respectively.

As of November 29, 2013, we accrued total restructuring charges of \$13.9 million of which approximately \$11.7 million related to cost of closing redundant facilities. The remaining accrued restructuring charges of \$2.2 million related to the cost of termination benefits and contract terminations. During fiscal 2013, we made payments related to the above restructuring plans totaling \$10.3 million which consisted of \$1.3 million and \$9.0 million in payments related to termination benefits and contract terminations and the closing of redundant facilities, respectively.

As of November 30, 2012, we accrued total restructuring charges of \$21.6 million of which \$2.3 million related to ongoing termination benefits and contract terminations. The remaining accrued restructuring charges of \$19.3 million related to the cost of closing redundant facilities. During fiscal 2012, we made payments related to restructuring plans totaling \$63.1 million which consisted of \$50.5 million and \$12.6 million in payments related to termination benefits and contract terminations and the closing of redundant facilities, respectively.

We believe that our existing cash and cash equivalents, short-term investments and cash generated from operations will be sufficient to meet the cash outlays for the restructuring actions described above.

See Note 10 of our Notes to Consolidated Financial Statements for additional information regarding our restructuring plans.

Other Liquidity and Capital Resources Considerations

Our existing cash, cash equivalents and investment balances may fluctuate during fiscal 2015 due to changes in our planned cash outlay, including changes in incremental costs such as direct and integration costs related to our acquisitions. Our cash and investments totaled \$3.7 billion as of November 28, 2014. Of this amount, approximately 80% was held by our foreign subsidiaries and subject to material repatriation tax effects. Our intent is to permanently reinvest a significant portion of our earnings from foreign operations, and current plans do not anticipate that we will need funds generated from foreign operations to fund our domestic operations. In the event funds from foreign operations are needed to fund operations in the United States and if U.S. tax has not already been previously provided, we would provide for and pay additional U.S. taxes in connection with repatriating these funds.

Cash from operations could also be affected by various risks and uncertainties, including, but not limited to the risks detailed in Part I, Item 1A titled “Risk Factors”. However, based on our current business plan and revenue prospects, we believe that our existing cash, cash equivalents and investment balances, our anticipated cash flows from operations and our available credit facility will be sufficient to meet our working capital and operating resource expenditure requirements for the next twelve months.

On March 2, 2012, we entered into a five-year \$1.0 billion senior unsecured revolving credit agreement (the “Credit Agreement”), providing for loans to us and certain of our subsidiaries. On March 1, 2013, we exercised our option under the Credit Agreement to extend the maturity date of the Credit Agreement by one year to March 2, 2018. As of November 28, 2014, there were no outstanding borrowings under this Credit Agreement and the entire \$1.0 billion credit line remains available for borrowing.

As of November 28, 2014, the amount outstanding under our senior notes was \$1.5 billion, consisting of \$600 million of 3.25% senior notes due February 1, 2015 (the “2015 Notes”) and \$900 million of 4.75% senior notes due February 1, 2020 (the “2020 Notes”). During the first quarter of fiscal 2014, we reclassified \$599.8 million as current debt on our Consolidated Balance Sheets, which represented the 2015 Notes, net of unamortized original issuance discount. We intend to refinance the current portion of our debt on or before the due date using either newly issued debt or drawings from our existing revolving credit agreement.

In anticipation of this refinancing, we entered into an interest rate lock agreement with a large financial institution subsequent to November 28, 2014, which fixed a benchmark U.S. Treasury rate for an aggregate notional amount of \$600.0 million. This derivative agreement hedges the impact on future interest payments attributable to changes in the benchmark interest rate and will be terminated upon the debt issuance.

We use professional investment management firms to manage a large portion of our invested cash. External investment firms managed, on average, 82% of our consolidated invested balances during fiscal 2014. The fixed income portfolio is primarily invested in corporate bonds and commercial paper, foreign government securities,

money market mutual funds, municipal securities, U.S. agency securities and U.S. Treasury securities.

Table of Contents**Stock Repurchase Program**

We are currently repurchasing common stock under our \$2.0 billion authority granted by our Board of Directors in April 2012.

Subsequent to November 28, 2014, as part of our \$2.0 billion stock repurchase program, we entered into a structured stock repurchase agreement with a large financial institution whereupon we provided them with a prepayment of \$200.0 million. This amount will be classified as treasury stock on our Consolidated Balance Sheets. Upon completion of the \$200.0 million stock repurchase agreement, there is no remaining balance under our current authority.

Subsequent to November 28, 2014, the Board of Directors approved a new stock repurchase program granting the company authority to repurchase up to \$2.0 billion in common stock through the end of fiscal 2017. The new stock repurchase program approved by our Board of Directors is similar to our previous \$2.0 billion stock repurchase program.

During fiscal 2014, 2013 and 2012, we entered into structured stock repurchase agreements with large financial institutions, whereupon we provided them with prepayments totaling \$600.0 million, \$1.1 billion and \$405.0 million, respectively. The \$600.0 million and \$1.1 billion prepayments during fiscal 2014 and 2013, respectively, were under the \$2.0 billion stock repurchase authority. Of the \$405.0 million of prepayments during fiscal 2012, \$100.0 million were under the \$2.0 billion stock repurchase program and the remaining \$305.0 million were under our previous \$1.6 billion stock repurchase authority. We enter into these agreements in order to take advantage of repurchasing shares at a guaranteed discount to the Volume Weighted Average Price ("VWAP") of our common stock over a specified period of time. We only enter into such transactions when the discount that we receive is higher than the foregone return on our cash prepayments to the financial institutions. There were no explicit commissions or fees on these structured repurchases. Under the terms of the agreements, there is no requirement for the financial institutions to return any portion of the prepayment to us.

The financial institutions agree to deliver shares to us at monthly intervals during the contract term. The parameters used to calculate the number of shares deliverable are: the total notional amount of the contract, the number of trading days in the contract, the number of trading days in the interval and the average VWAP of our stock during the interval less the agreed upon discount. During fiscal 2014, we repurchased approximately 10.9 million shares at an average price of \$63.48 through structured repurchase agreements entered into during fiscal 2014. During fiscal 2013, we repurchased approximately 21.6 million shares at an average price of \$46.47 through structured repurchase agreements entered into during fiscal 2013 and fiscal 2012. During fiscal 2012, we repurchased approximately 11.5 million shares at an average price per share of \$32.29 through structured repurchase agreements entered into during fiscal 2012.

For fiscal 2014, 2013 and 2012, the prepayments were classified as treasury stock on our Consolidated Balance Sheets at the payment date, though only shares physically delivered to us by November 28, 2014, November 29, 2013 and November 30, 2012 were excluded from the computation of earnings per share. As of November 28, 2014, \$40.3 million of prepayments remained under the agreement. See Note 13 of our Notes to Consolidated Financial Statements for further discussion of our stock repurchase programs.

See Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities for share repurchases during the quarter ended November 28, 2014.

Summary of Stock Repurchases for Fiscal 2014, 2013 and 2012

(in thousands, except average amounts)

Board Approval Date	Repurchases Under the Plan	2014 Shares	Average	2013 Shares	Average	2012 Shares	Average
June 2010	Structured repurchases ⁽¹⁾	—	\$—	—	\$—	9,482	\$32.17
April 2012	Structured repurchases ⁽¹⁾	10,852	\$63.48	21,603	\$46.47	2,038	\$32.87
Total shares		10,852	\$63.48	21,603	\$46.47	11,520	\$32.29
Total cost		\$688,902		\$1,003,794		\$371,995	

⁽¹⁾ Stock repurchase agreements executed with large financial institutions. See Stock Repurchase Program above.

Off-Balance Sheet Arrangements and Aggregate Contractual Obligations

Our principal commitments as of November 28, 2014 consist of obligations under operating leases, capital leases, royalty agreements and various service agreements. See Note 15 of our Notes to Consolidated Financial Statements for additional information regarding our contractual commitments.

Table of Contents

Contractual Obligations

The following table summarizes our contractual obligations as of November 28, 2014 (in millions):

	Payment Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Notes	\$1,744.9	\$652.5	\$85.5	\$85.5	\$921.4
Operating lease obligations	202.6	42.6	67.4	46.8	45.8
Capital lease obligations	3.3	3.3	—	—	—
Purchase obligations	288.9	227.9	42.2	18.8	—
Total	\$2,239.7	\$926.3	\$195.1	\$151.1	\$967.2

Senior Notes

In February 2010, we issued \$600.0 million of 3.25% senior notes due February 1, 2015 and \$900.0 million of 4.75% senior notes due February 1, 2020. Interest on our senior notes is payable semi-annually, in arrears on February 1 and August 1. At November 28, 2014, our maximum commitment for interest payments under the senior notes was \$244.9 million for the remaining duration of our senior notes. In June of fiscal 2014, we entered into interest rate swaps that effectively converted the fixed interest rate on our 2020 Notes to a floating interest rate based on the London Interbank Offered Rate (“LIBOR”) plus a fixed number of basis points through February 1, 2020.

Capital Lease Obligation

In January 2013, we entered into a sale-leaseback agreement to sell equipment totaling \$25.7 million and leaseback the same equipment over a period of 24 months. This transaction was classified as a capital lease obligation and was recorded at fair value.

Covenants

Our credit facility contains a financial covenant requiring us not to exceed a maximum leverage ratio. Our Almaden Tower lease includes certain financial ratios as defined in the lease agreements that are reported to the lessors quarterly. As of November 28, 2014, we were in compliance with all of our covenants. We believe these covenants will not impact our credit or cash in the coming fiscal year or restrict our ability to execute our business plan. Our senior notes do not contain any financial covenants.

Under the terms of our credit agreement and lease agreements, we are not prohibited from paying cash dividends unless payment would trigger an event of default or one currently exists. We do not anticipate paying any cash dividends in the foreseeable future.

Accounting for Uncertainty in Income Taxes

The gross liability for unrecognized tax benefits at November 28, 2014 was \$148.8 million, exclusive of interest and penalties.

The timing of the resolution of income tax examinations is highly uncertain as are the amounts and timing of tax payments that are part of any audit settlement process. These events could cause large fluctuations in the balance sheet classification of current and non-current assets and liabilities. We believe that within the next 12 months, it is reasonably possible that either certain audits will conclude or statutes of limitations on certain income tax examination periods will expire, or both. Given the uncertainties described above, we can only determine a range of estimated potential decreases in underlying unrecognized tax benefits ranging from \$0 to approximately \$5 million.

Royalties

We have certain royalty commitments associated with the shipment and licensing of certain products. Royalty expense is generally based on a dollar amount per unit shipped or a percentage of the underlying revenue.

Indemnifications

In the normal course of business, we provide indemnifications of varying scope to customers against claims of intellectual property infringement made by third parties arising from the use of our products and from time to time, we are subject to claims by our customers under these indemnification provisions. Historically, costs related to these indemnification provisions have not

Table of Contents

been significant and we are unable to estimate the maximum potential impact of these indemnification provisions on our future results of operations.

To the extent permitted under Delaware law, we have agreements whereby we indemnify our directors and officers for certain events or occurrences while the director or officer is or was serving at our request in such capacity. The indemnification period covers all pertinent events and occurrences during the director's or officer's lifetime. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited; however, we have director and officer insurance coverage that limits our exposure and enables us to recover a portion of any future amounts paid.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

All market risk sensitive instruments were entered into for non-trading purposes.

Foreign Currency Risk**Foreign Currency Exposures and Hedging Instruments**

In countries outside the U.S., we transact business in U.S. Dollars and various other currencies which subject us to exposure from movements in exchange rates. We may use foreign exchange purchased options or forward contracts to hedge our foreign currency revenue denominated in Euro, British Pounds and Yen. Additionally, we hedge our net recognized foreign currency assets and liabilities with foreign exchange forward contracts. We hedge these exposures to reduce the risk that our earnings and cash flows will be adversely affected by changes in exchange rates.

Our revenue exposures for fiscal 2014, 2013 and 2012 were as follows (in millions, except Yen):

	Fiscal 2014	Fiscal 2013	Fiscal 2012
Euro	€455.5	€434.7	€530.7
Yen (in billions)	¥28	¥32.5	¥34.8
British Pounds	£159.1	£145.3	£145.1

As of November 28, 2014, the total absolute value of all outstanding foreign exchange contracts, including options and forwards, was \$672.9 million which included the notional equivalent of \$359.5 million in Euros, \$104.7 million in British Pounds, \$159.5 million in Yen and \$49.2 million in other foreign currencies. As of November 28, 2014, all contracts were set to expire at various dates through June 2015. The bank counterparties in these contracts expose us to credit-related losses in the event of their nonperformance. However, to mitigate that risk, we only contract with counterparties who meet our minimum requirements under our counterparty risk assessment process. In addition, our hedging policy establishes maximum limits for each counterparty.

A sensitivity analysis was performed on all of our foreign exchange derivatives as of November 28, 2014. This sensitivity analysis measures the hypothetical market value resulting from a 10% shift in the value of exchange rates relative to the U.S. Dollar. For option contracts, the Black-Scholes option pricing model was used. A 10% increase in the value of the U.S. Dollar and a corresponding decrease in the value of the hedged foreign currency asset would lead to an increase in the fair value of our financial hedging instruments by \$40.9 million. Conversely, a 10% decrease in the value of the U.S. Dollar would result in a decrease in the fair value of these financial instruments by \$28.9 million. As a general rule, we do not use foreign exchange contracts to hedge local currency denominated operating expenses in countries where a natural hedge exists. For example, in many countries, revenue in the local currencies substantially offsets the local currency denominated operating expenses.

We also have long-term investment exposures consisting of the capitalization and retained earnings in our non-U.S. Dollar functional currency foreign subsidiaries. As of November 28, 2014 and November 29, 2013, this long-term investment exposure totaled a notional equivalent of \$161.7 million and \$355.6 million, respectively. At this time, we do not hedge these long-term investment exposures.

We do not use foreign exchange contracts for speculative trading purposes, nor do we hedge our foreign currency exposure in a manner that entirely offsets the effects of changes in foreign exchange rates. We regularly review our hedging program and assess the need to utilize financial instruments to hedge currency exposures on an ongoing basis.

Table of Contents**Economic Hedging—Hedges of Forecasted Transactions**

We may use foreign exchange purchased options or forward contracts to hedge foreign currency revenue denominated in Euros, British Pounds and Yen. We hedge these cash flow exposures to reduce the risk that our earnings and cash flows will be adversely affected by changes in exchange rates. These foreign exchange contracts, carried at fair value, may have maturities between one and twelve months. We enter into these foreign exchange contracts to hedge forecasted revenue in the normal course of business and accordingly, they are not speculative in nature.

We record changes in the intrinsic value of these cash flow hedges in accumulated other comprehensive income, until the forecasted transaction occurs. When the forecasted transaction occurs, we reclassify the related gain or loss on the cash flow hedge to revenue. In the event the underlying forecasted transaction does not occur, or it becomes probable that it will not occur, we reclassify the gain or loss on the related cash flow hedge from accumulated other comprehensive income to interest and other income, net on our Consolidated Statements of Income at that time. For the fiscal year ended November 28, 2014, net gains or losses recognized in other income relating to hedges of forecasted transactions that did not occur were insignificant.

See Note 5 of our Notes to Consolidated Financial Statements for information regarding our hedging activities.

Balance Sheet Hedging—Hedging of Foreign Currency Assets and Liabilities

We hedge exposures related to our net recognized foreign currency assets and liabilities with foreign exchange forward contracts to reduce the risk that our earnings and cash flows will be adversely affected by changes in foreign currency exchange rates. These foreign exchange contracts are carried at fair value with changes in the fair value recorded as interest and other income, net. These foreign exchange contracts do not subject us to material balance sheet risk due to exchange rate movements because gains and losses on these contracts are intended to offset gains and losses on the assets and liabilities being hedged. At November 28, 2014, the outstanding balance sheet hedging derivatives had maturities of 180 days or less.

See Note 5 of our Notes to Consolidated Financial Statements for information regarding our hedging activities.

Interest Rate Risk**Short-Term Investments and Fixed Income Securities**

At November 28, 2014, we had debt securities classified as short-term investments of \$2.6 billion. Changes in interest rates could adversely affect the market value of these investments. The following table separates these investments, based on stated maturities, to show the approximate exposure to interest rates (in millions):

Due within one year	\$607.2
Due within two years	904.9
Due within three years	834.2
Due after three years	275.3
Total	\$2,621.6

A sensitivity analysis was performed on our investment portfolio as of November 28, 2014. The analysis is based on an estimate of the hypothetical changes in market value of the portfolio that would result from an immediate parallel shift in the yield curve of various magnitudes.

The following tables present the hypothetical fair values of our debt securities classified as short-term investments assuming immediate parallel shifts in the yield curve of 50 basis points (“BPS”), 100 BPS and 150 BPS. The analysis is shown as of November 28, 2014 and November 29, 2013 (dollars in millions):

-150 BPS	-100 BPS	-50 BPS	Fair Value 11/28/14	+50 BPS	+100 BPS	+150 BPS
2,663.3	2,656.3	2,641.9	2,621.6	2,599.8	2,578.0	2,556.2
-150 BPS	-100 BPS	-50 BPS	Fair Value 11/29/13	+50 BPS	+100 BPS	+150 BPS
2,363.7	2,360.9	2,353.8	2,338.5	2,320.5	2,302.5	2,284.5

Senior Notes

As of November 28, 2014, the amount outstanding under our senior notes was \$1.5 billion, consisting of \$600 million of 3.25% senior notes due February 1, 2015 (the “2015 Notes”) and \$900 million of 4.75% senior notes due February 1,

2020 (the

58

Table of Contents

“2020 Notes” and, together with the 2015 Notes, the “Notes”). In June 2014, we entered into interest rate swaps that effectively converted the fixed interest rate on our 2020 Notes to a floating interest rate based on the LIBOR plus a fixed number of basis points through February 1, 2020. Accordingly, our exposure to fluctuations in market interest rates is on the hedged fixed-rate debt of \$900 million. An immediate hypothetical 50 basis points increase or decrease in market interest rates would not have a significant impact on our results of operations.

As of November 28, 2014, the total carrying amount of the Notes was \$1.5 billion and the related fair value based on inactive market prices was \$1.6 billion.

Other Market Risk

Privately Held Long-Term Investments

The privately held companies in which we invest can still be considered in the start-up or development stages which are inherently risky. The technologies or products these companies have under development are typically in the early stages and may never materialize, which could result in a loss of a substantial part of our initial investment in these companies. The evaluation of privately held companies is based on information that we request from these companies, which is not subject to the same disclosure regulations as U.S. publicly traded companies, and as such, the basis for these evaluations is subject to the timing and accuracy of the data received from these companies.

Marketable Equity Securities

We have minimal exposure to equity price risk on our portfolio of marketable equity securities. As of November 28, 2014 and November 29, 2013, our total equity holdings in publicly traded companies were insignificant.

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

Operations

Founded in 1982, Adobe Systems Incorporated is one of the largest and most diversified software companies in the world. We offer a line of products and services used by creative professionals, marketers, knowledge workers, application developers, enterprises and consumers for creating, managing, delivering, measuring, optimizing and engaging with compelling content and experiences across multiple operating systems, devices and media. We market and license our products and services directly to enterprise customers through our sales force and to end-users through app stores and our own website at www.adobe.com. We offer many of our products via a Software-as-a-Service (“SaaS”) model or a managed services model (both of which are referred to as a hosted or cloud-based model) as well as through term subscription and pay-per-use models. We also distribute certain products and services through a network of distributors, value-added resellers, systems integrators, independent software vendors, retailers and original equipment manufacturers (“OEMs”). In addition, we license our technology to hardware manufacturers, software developers and service providers for use in their products and solutions. Our products run on personal and server-based computers, as well as on smartphones, tablets and other devices, depending on the product. We have operations in the Americas, Europe, Middle East and Africa (“EMEA”) and Asia-Pacific (“APAC”).

Basis of Presentation

The accompanying Consolidated Financial Statements include those of Adobe and its subsidiaries, after elimination of all intercompany accounts and transactions. We have prepared the accompanying Consolidated Financial Statements in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and pursuant to the rules and regulations of the United States Securities and Exchange Commission (the “SEC”).

Use of Estimates

In preparing Consolidated Financial Statements and related disclosures in conformity with GAAP and pursuant to the rules and regulations of the SEC, we must make estimates and judgments that affect the amounts reported in the Consolidated Financial Statements and accompanying notes. Estimates are used for, but not limited to, sales allowances and programs, bad debts, stock-based compensation, determining the fair value of acquired assets and assumed liabilities, excess inventory and purchase commitments, restructuring charges, facilities lease losses, impairment of goodwill and intangible assets, litigation, income taxes and investments. Actual results may differ materially from these estimates.

Fiscal Year

Our fiscal year is a 52- or 53-week year that ends on the Friday closest to November 30. Fiscal 2014, 2013 and 2012 were 52-week years.

Reclassification

Certain prior year amounts have been reclassified to conform to current year presentation in the Consolidated Statements of Cash Flows.

Significant Accounting Policies

Revenue Recognition

Our revenue is derived from the licensing of perpetual, time-based, and subscription software products, associated software maintenance and support plans, non-software related hosted services, consulting services, training and technical support.

We recognize revenue when all four revenue recognition criteria have been met: persuasive evidence of an arrangement exists, we have delivered the product or performed the service, the fee is fixed or determinable and collection is probable. Determining whether and when some of these criteria have been satisfied often involves assumptions and judgments that can have a significant impact on the timing and amount of revenue we report.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Multiple Element Arrangements

We enter into multiple element revenue arrangements in which a customer may purchase a combination of software, upgrades, maintenance and support, hosted services, and consulting.

For our software and software-related multiple element arrangements, we must: (1) determine whether and when each element has been delivered; (2) determine whether undelivered products or services are essential to the functionality of the delivered products and services; (3) determine the fair value of each undelivered element using vendor-specific objective evidence (“VSOE”), and (4) allocate the total price among the various elements. VSOE of fair value is used to allocate a portion of the price to the undelivered elements and the residual method is used to allocate the remaining portion to the delivered elements. Absent VSOE, revenue is deferred until the earlier of the point at which VSOE of fair value exists for any undelivered element or until all elements of the arrangement have been delivered. However, if the only undelivered element is maintenance and support, the entire arrangement fee is recognized ratably over the performance period. Changes in assumptions or judgments or changes to the elements in a software arrangement could cause a material increase or decrease in the amount of revenue that we report in a particular period.

We determine VSOE for each element based on historical stand-alone sales to third parties or from the stated renewal rate for the elements contained in the initial arrangement. In determining VSOE, we require that a substantial majority of the selling prices for a product or service fall within a reasonably narrow pricing range.

We have established VSOE for our software maintenance and support services, custom software development services, consulting services and training, when such services are sold optionally with software licenses.

For multiple-element arrangements containing our non-software services, we must: (1) determine whether and when each element has been delivered; (2) determine the fair value of each element using the selling price hierarchy of VSOE of selling price, third-party evidence (“TPE”) of selling price or best-estimated selling price (“BESP”), as applicable; and (3) allocate the total price among the various elements based on the relative selling price method.

For multiple-element arrangements that contain both software and non-software elements, we allocate revenue to software or software-related elements as a group and any non-software elements separately based on the selling price hierarchy. We determine the selling price for each deliverable using VSOE of selling price, if it exists, or TPE of selling price. If neither VSOE nor TPE of selling price exist for a deliverable, we use BESP. Once revenue is allocated to software or software-related elements as a group, we recognize revenue in conformance with software revenue accounting guidance. Revenue is recognized when revenue recognition criteria are met for each element.

We are generally unable to establish VSOE or TPE for non-software elements and as such, we use BESP. BESP is generally used for offerings that are not typically sold on a stand-alone basis or for new or highly customized offerings. We determine BESP for a product or service by considering multiple factors including, but not limited to major product groupings, geographies, market conditions, competitive landscape, internal costs, gross margin objectives and pricing practices. Pricing practices taken into consideration include historic contractually stated prices, volume discounts where applicable and our price lists. We must estimate certain royalty revenue amounts due to the timing of securing information from our customers. While we believe we can make reliable estimates regarding these matters, these estimates are inherently subjective. Accordingly, our assumptions and judgments regarding future products and services as well as our estimates of royalty revenue could differ from actual events, thus materially impacting our financial position and results of operations.

Product Revenue

We recognize our product revenue upon shipment, provided all other revenue recognition criteria have been met. Our desktop application product revenue from distributors is subject to agreements allowing limited rights of return, rebates and price protection. Our direct sales and OEM sales are also subject to limited rights of return. Accordingly,

we reduce revenue recognized for estimated future returns, price protection and rebates at the time the related revenue is recorded. The estimates for returns are adjusted periodically based upon historical rates of returns, inventory levels in the distribution channel and other related factors.

We recognize OEM licensing revenue, primarily royalties, when OEMs ship products incorporating our software, provided collection of such revenue is deemed probable. For certain OEM customers, we must estimate royalty revenue due to the timing of securing customer information. This estimate is based on a combination of our generated forecasts and actual historical reporting

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

by our OEM customers. To substantiate our ability to estimate revenue, we review license royalty revenue reports ultimately received from our significant OEM customers in comparison to the amounts estimated in the prior period. Our product-related deferred revenue includes maintenance upgrade revenue and customer advances under OEM license agreements. Our maintenance upgrade revenue for our desktop application products is included in our product revenue line item as the maintenance primarily entitles customers to receive product upgrades. In cases where we provide a specified free upgrade to an existing product, we defer the fair value for the specified upgrade right until the future obligation is fulfilled or when the right to the specified free upgrade expires.

Subscription and Services and Support Revenue

We recognize revenue for hosted services that are based on a committed number of transactions, ratably beginning on the date the customer commences use of our services and continuing through the end of the customer term.

Over-usage fees, and fees billed based on the actual number of transactions from which we capture data, are billed in accordance with contract terms as these fees are incurred. We record amounts that have been invoiced in accounts receivable and in deferred revenue or revenue, depending on whether all revenue recognition criteria have been met. Our services and support revenue is composed of consulting, training and maintenance and support, primarily related to the licensing of our Enterprise and Mobile and Device Solutions products. Our support revenue also includes technical support and developer support to partners and developer organizations related to our desktop products. Our consulting revenue is recognized using a time and materials basis and is measured monthly based on input measures, such as hours incurred to date, with consideration given to output measures, such as contract milestones when applicable.

Our maintenance and support offerings, which entitle customers to receive product upgrades and enhancements on a when and if available basis or technical support, depending on the offering, are recognized ratably over the performance period of the arrangement.

Our software subscription offerings, which may include product upgrades and enhancements on a when and if available basis, hosted services, and online storage are generally offered to our customers over a specified period of time and we recognize revenue associated with these arrangements ratably over the subscription period.

Rights of Return, Rebates and Price Protection

As discussed above, we offer limited rights of return, rebates and price protection of our products under various policies and programs with our distributors, resellers and/or end-user customers. We estimate and record reserves for these programs as an offset to revenue and accounts receivable. Below is a summary of each of the general provisions in our contracts:

Distributors are allowed limited rights of return of products purchased during the previous quarter. In addition, distributors are allowed to return products that have reached the end of their lives, as defined by us, and products that are being replaced by new versions.

We offer rebates to our distributors, resellers and/or end user customers. The amount of revenue that is reduced for distributor and reseller rebates is based on actual performance against objectives set forth by us for a particular reporting period (volume, timely reporting, etc.). If mail-in or other promotional rebates are offered, the amount of revenue reduced is based on the dollar amount of the rebate, taking into consideration an estimated redemption rate calculated using historical trends.

From time to time, we may offer price protection to our distributors that allow for the right to a credit if we permanently reduce the price of a software product. The amount of revenue that is reduced for price protection is calculated as the difference between the old and new price of a software product on inventory held by the distributor immediately prior to the effective date of the decrease.

Although our subscription contracts are generally non-cancellable, a limited number of customers have the right to cancel their contracts by providing prior written notice to us of their intent to cancel the remainder of the contract

term. In the event a customer cancels its contract, they are not entitled to a refund for prior services we have provided to them.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

On a quarterly basis, the amount of revenue that is reserved for future returns is calculated based on our historical trends and data specific to each reporting period. We review the actual returns evidenced in prior quarters as a percent of revenue to determine a historical returns rate. We then apply the historical rate to the current period revenue as a basis for estimating future returns. When necessary, we also provide a specific returns reserve for product in the distribution channel in excess of estimated requirements. This estimate can be affected by the amount of a particular product in the channel, the rate of sell-through, product plans and other factors.

Revenue Reserve

Revenue reserve rollforward (in thousands):

	2014	2013	2012
Beginning balance	\$28,664	\$57,058	\$60,887
Amount charged to revenue	45,550	74,031	170,839
Actual returns	(56,812)	(102,425)	(174,668)
Ending balance	\$17,402	\$28,664	\$57,058

Deferred Revenue

Deferred revenue consists substantially of payments received in advance of revenue recognition for our products and services described above. We recognize deferred revenue as revenue only when the revenue recognition criteria are met.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts which reflects our best estimate of potentially uncollectible trade receivables. The allowance is based on both specific and general reserves. We regularly review our trade receivables allowances by considering such factors as historical experience, credit-worthiness, the age of the trade receivable balances and current economic conditions that may affect a customer's ability to pay and we specifically reserve for those deemed uncollectible.

(in thousands)	2014	2013	2012
Beginning balance	\$10,228	\$12,643	\$15,080
Increase due to acquisition	51	1,038	325
Charged to operating expenses	603	933	3,356
Deductions ⁽¹⁾	(3,015)	(4,386)	(6,118)
Ending balance	\$7,867	\$10,228	\$12,643

(1) Deductions related to the allowance for doubtful accounts represent amounts written off against the allowance, less recoveries.

Property and Equipment

We record property and equipment at cost less accumulated depreciation and amortization. Property and equipment are depreciated using the straight-line method over their estimated useful lives ranging from 1 to 5 years for computers and equipment as well as server hardware under capital leases, 1 to 6 years for furniture and fixtures, and up to 40 years for buildings. Leasehold improvements are amortized using the straight-line method over the lesser of the remaining respective lease term or estimated useful lives ranging from 1 to 15 years.

Goodwill, Purchased Intangibles and Other Long-Lived Assets

Goodwill is assigned to one or more reporting segments on the date of acquisition. We evaluate goodwill for impairment by comparing the fair value of each of our reporting segments to its carrying value, including the associated goodwill. To determine the fair values, we use the equal weighting of the market approach based on comparable publicly traded companies in similar lines of businesses and the income approach based on estimated discounted future cash flows. Our cash flow assumptions consider historical and forecasted revenue, operating costs and other relevant factors.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

We review our goodwill for impairment annually, or more frequently, if facts and circumstances warrant a review. We completed our annual impairment test in the second quarter of fiscal 2014. We elected to use the Step 1 quantitative assessment for our reporting units and determined that there was no impairment of goodwill. There is no significant risk of material goodwill impairment in any of our reporting units, based upon the results of our annual goodwill impairment test.

We amortize intangible assets with finite lives over their estimated useful lives and review them for impairment whenever an impairment indicator exists. We continually monitor events and changes in circumstances that could indicate carrying amounts of our long-lived assets, including our intangible assets may not be recoverable. When such events or changes in circumstances occur, we assess recoverability by determining whether the carrying value of such assets will be recovered through the undiscounted expected future cash flows. If the future undiscounted cash flows are less than the carrying amount of these assets, we recognize an impairment loss based on any excess of the carrying amount over the fair value of the assets. We did not recognize any intangible asset impairment charges in fiscal 2014, 2013 or 2012.

Our intangible assets are amortized over their estimated useful lives of 1 to 14 years. Amortization is based on the pattern in which the economic benefits of the intangible asset will be consumed or on a straight-line basis when the consumption pattern is not apparent. The weighted average useful lives of our intangible assets were as follows:

	Weighted Average Useful Life (years)
Purchased technology	6
Customer contracts and relationships	10
Trademarks	8
Acquired rights to use technology	8
Localization	1
Other intangibles	3

Software Development Costs

Capitalization of software development costs for software to be sold, leased, or otherwise marketed begins upon the establishment of technological feasibility, which is generally the completion of a working prototype that has been certified as having no critical bugs and is a release candidate. Amortization begins once the software is ready for its intended use, generally based on the pattern in which the economic benefits will be consumed. To date, software development costs incurred between completion of a working prototype and general availability of the related product have not been material.

Internal Use Software

We capitalize costs associated with customized internal-use software systems that have reached the application development stage. Such capitalized costs include external direct costs utilized in developing or obtaining the applications and payroll and payroll-related expenses for employees, who are directly associated with the development of the applications. Capitalization of such costs begins when the preliminary project stage is complete and ceases at the point in which the project is substantially complete and is ready for its intended purpose.

Income Taxes

We use the asset and liability method of accounting for income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. We record a

valuation allowance to reduce deferred tax assets to an amount for which realization is more likely than not.

Taxes Collected from Customers

We net taxes collected from customers against those remitted to government authorities in our financial statements. Accordingly, taxes collected from customers are not reported as revenue.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Treasury Stock

We account for treasury stock under the cost method. When treasury stock is re-issued at a price higher than its cost, the difference is recorded as a component of additional paid-in-capital in our Consolidated Balance Sheets. When treasury stock is re-issued at a price lower than its cost, the difference is recorded as a component of additional paid-in-capital to the extent that there are previously recorded gains to offset the losses. If there are no treasury stock gains in additional paid-in-capital, the losses upon re-issuance of treasury stock are recorded as a component of retained earnings in our Consolidated Balance Sheets.

Advertising Expenses

Advertising costs are expensed as incurred. Advertising expenses for fiscal 2014, 2013 and 2012 were \$87.9 million, \$88.5 million and \$99.4 million, respectively.

Foreign Currency Translation

We translate assets and liabilities of foreign subsidiaries, whose functional currency is their local currency, at exchange rates in effect at the balance sheet date. We translate revenue and expenses at the monthly average exchange rates. We include accumulated net translation adjustments in stockholders' equity as a component of accumulated other comprehensive income.

Foreign Currency and Other Hedging Instruments

In countries outside the United States ("U.S."), we transact business in U.S. Dollars and in various other currencies. In Europe and Japan, transactions that are denominated in Euros, Yen and British Pounds are subject to exposure from movements in exchange rates. We hedge our net recognized foreign currency assets and liabilities with foreign exchange forward contracts to reduce the risk that our earnings and cash flows will be adversely affected by changes in exchange rates. We use foreign exchange option and forward contracts for revenue denominated in Euros, British Pounds and Yen.

We account for our foreign currency hedging instruments as either assets or liabilities on the balance sheet and measure them at fair value. Gains and losses resulting from changes in fair value are accounted for depending on the use of the derivative and whether it is designated and qualifies for hedge accounting. Contracts that do not qualify for hedge accounting are adjusted to fair value through earnings. See Note 5 for information regarding our hedging activities.

Gains and losses from foreign exchange forward contracts which hedge certain balance sheet positions, primarily non-functional currency denominated assets and liabilities (e.g., trade receivables and accounts payable) are recorded each period as a component of interest and other income, net in our Consolidated Statements of Income. Foreign exchange option contracts hedging forecasted foreign currency revenue are designated as cash flow hedges under accounting for derivative instruments and hedging activities, with gains and losses recorded net of tax, as a component of other comprehensive income ("OCI") in stockholders' equity and reclassified into revenue at the time the forecasted transactions occur.

Concentration of Risk

Financial instruments that potentially subject us to concentrations of credit risk are short-term fixed-income investments, structured repurchase transactions, contracts hedging foreign currency risk, and trade receivables. Our investment portfolio consists of investment-grade securities diversified among security types, industries and issuers. Our cash and investments are held and managed by recognized financial institutions that follow our investment policy. Our policy limits the amount of credit exposure to any one security issue or issuer and we believe no significant concentration of credit risk exists with respect to these investments.

We mitigate concentration of risk related to foreign currency hedges through a policy that establishes counterparty limits. The bank counterparties in these contracts expose us to credit-related losses in the event of their nonperformance. However, to mitigate that risk, we only contract with counterparties who meet our minimum requirements under our counterparty risk assessment process. In addition, our hedging policy establishes maximum

limits for each counterparty. We monitor ratings, credit spreads and potential downgrades on at least a quarterly basis. Based on our on-going assessment of counterparty risk, we will adjust our exposure to various counterparties.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The aggregate fair value of foreign currency contracts in net asset positions as of November 28, 2014 and November 29, 2013 was \$33.0 million and \$11.9 million, respectively. These amounts represent the maximum exposure to loss at the reporting date as a result of all of the counterparties failing to perform as contracted. These exposures could be reduced by up to \$0.7 million and \$1.1 million, respectively from liabilities included in master netting arrangements with those same counterparties.

Credit risk in receivables is limited to OEMs, dealers and distributors of hardware and software products to the retail market, customers to whom we license software directly and our SaaS offerings. We are also experiencing elevated delinquency and bad debt write-offs related to our receivables assumed in business combinations. A credit review is completed for our new distributors, dealers and OEMs. We also perform ongoing credit evaluations of our customers' financial condition and require letters of credit or other guarantees, whenever deemed necessary. The credit limit given to the customer is based on our risk assessment of their ability to pay, country risk and other factors and is not contingent on the resale of the product or on the collection of payments from their customers. We also purchase credit insurance to mitigate credit risk in some foreign markets where we believe it is warranted. If we license our software or provide SaaS services to a customer where we have a reason to believe the customer's ability to pay is not probable, due to country risk or credit risk, we will not recognize the revenue. We will revert to recognizing the revenue on a cash basis, assuming all other criteria for revenue recognition has been met.

See Note 18 for information regarding our significant customers.

We derive a significant portion of our OEM PostScript and Other licensing revenue from a small number of OEMs. Our OEMs on occasion seek to renegotiate their royalty arrangements. We evaluate these requests on a case-by-case basis. If an agreement is not reached, a customer may decide to pursue other options, which could result in lower licensing revenue for us.

Recent Accounting Pronouncements Not Yet Effective

On May 28, 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, requiring an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The updated standard will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective and permits the use of either the retrospective or cumulative effect transition method. Early adoption is not permitted. The updated standard becomes effective for us in the first quarter of fiscal 2018. We have not yet selected a transition method and we are currently evaluating the effect that the updated standard will have on our consolidated financial statements and related disclosures.

With the exception of the new revenue standard discussed above, there have been no new accounting pronouncements not yet effective that have significance, or potential significance, to our Consolidated Financial Statements.

NOTE 2. ACQUISITIONS

Fiscal 2014 Acquisition

During fiscal 2014, we completed a business acquisition which was not material to our Consolidated Financial Statements.

Subsequent to November 28, 2014, we entered into a definitive agreement to acquire privately-held Fotolia, a leading marketplace for royalty-free photos, images, graphics and HD video, for approximately \$800 million in cash. The transaction is subject to customary regulatory approvals and closing conditions and is expected to close in the first quarter of our fiscal 2015. Following the closing, we intend to integrate Fotolia into our Digital Media reportable segment for financial reporting purposes.

Fiscal 2013 Acquisitions

Neolane

On July 22, 2013, we completed our acquisition of privately held Neolane, a leader in cross-channel campaign management technology. During the third quarter of fiscal 2013, we began integrating Neolane into our Digital Marketing reportable segment. Neolane brings a platform for automation and execution of marketing campaigns

across the web, e-mail, social, mobile, call center, direct mail, point of sale and other emerging channels which will drive consistent brand experiences and personalized campaigns for our customers.

Under the acquisition method of accounting, the total final purchase price was allocated to Neolane's net tangible and intangible assets based upon their estimated fair values as of July 22, 2013. The total final purchase price for Neolane was \$616.7

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

million of which \$515.2 million was allocated to goodwill that was non-deductible for tax purposes, \$115.0 million to identifiable intangible assets and \$13.5 million to net liabilities assumed. The impact of this acquisition was not material to our Consolidated Financial Statements.

Behance

On December 20, 2012, we completed our acquisition of privately held Behance, an online social media platform to showcase and discover creative work. During the first quarter of fiscal 2013, we began integrating Behance into our Digital Media reportable segment. Behance's community and portfolio capabilities will accelerate our strategy to bring additional community features to Creative Cloud. We have included the financial results of Behance in our Consolidated Financial Statements beginning on the acquisition date.

Under the acquisition method of accounting, the total purchase price was allocated to Behance's net tangible and intangible assets based upon their estimated fair values as of December 20, 2012. The total final purchase price for Behance was approximately \$111.1 million of which \$91.4 million was allocated to goodwill, \$28.5 million to identifiable intangible assets and \$8.8 million to net liabilities assumed. The impact of this acquisition was not material to our Consolidated Financial Statements.

Fiscal 2012 Acquisition

Efficient Frontier

On January 13, 2012, we completed our acquisition of privately held Efficient Frontier, a multi-channel digital ad buying and optimization company. During the first quarter of fiscal 2012, we began integrating Efficient Frontier into our Digital Marketing segment. The Efficient Frontier business adds cross-channel digital ad campaign forecasting, execution and optimization capabilities to our Adobe Marketing Cloud, along with a social marketing engagement platform and social ad buying capabilities. We have included the financial results of Efficient Frontier in our Consolidated Financial Statements beginning on the acquisition date.

Under the acquisition method of accounting, the total purchase price was allocated to Efficient Frontier's net tangible and intangible assets based upon their estimated fair values as of January 13, 2012. During fiscal 2012, we made adjustments to the preliminary purchase price allocation. The total final purchase price for Efficient Frontier was \$374.7 million of which \$291.4 million was allocated to goodwill, \$122.7 million to identifiable intangible assets and \$39.4 million to net liabilities assumed. The impact of this acquisition was not material to our Consolidated Financial Statements.

NOTE 3. CASH, CASH EQUIVALENTS AND SHORT-TERM INVESTMENTS

Cash equivalents consist of instruments with remaining maturities of three months or less at the date of purchase. We classify all of our cash equivalents and short-term investments as "available-for-sale." In general, these investments are free of trading restrictions. We carry these investments at fair value, based on quoted market prices or other readily available market information. Unrealized gains and losses, net of taxes, are included in accumulated other comprehensive income, which is reflected as a separate component of stockholders' equity in our Consolidated Balance Sheets. Gains and losses are recognized when realized in our Consolidated Statements of Income. When we have determined that an other-than-temporary decline in fair value has occurred, the amount of the decline that is related to a credit loss is recognized in income. Gains and losses are determined using the specific identification method.

See Note 4 for further information regarding the fair value of our financial instruments.

The following table summarizes the fair value and gross unrealized losses related to available-for-sale securities, aggregated by investment category, that have been in an unrealized loss position for less than twelve months, as of November 28, 2014 and November 29, 2013 (in thousands):

	2014		2013	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
Corporate bonds and commercial paper	\$291,890	\$(443)) \$225,759	\$(631)
Municipal securities	21,759	(12)) 13,522	(24)
U.S. Treasury and agency securities	43,507	(64)) 105,278	(283)
Total	\$357,156	\$(519)) \$344,559	\$(938)

There were 213 securities and 177 securities in an unrealized loss position for less than twelve months at November 28, 2014 and at November 29, 2013, respectively.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table summarizes the fair value and gross unrealized losses related to available-for-sale securities, aggregated by investment category, that were in a continuous unrealized loss position for more than twelve months, as of November 28, 2014 (in thousands):

	2014	
	Fair Value	Gross Unrealized Losses
Corporate bonds and commercial paper	\$8,636	\$(66)
U.S. Treasury and agency securities	5,884	(28)
Total	\$14,520	\$(94)

As of November 28, 2014, there were eight securities in an unrealized loss position for more than twelve months. As of November 29, 2013 there were no securities in an unrealized loss position for more than twelve months.

The following table summarizes the cost and estimated fair value of short-term fixed income securities classified as short-term investments based on stated effective maturities as of November 28, 2014 (in thousands):

	Amortized Cost	Estimated Fair Value
Due within one year	\$606,090	\$607,222
Due between one and two years	901,940	904,938
Due between two and three years	831,932	834,148
Due after three years	274,173	275,292
Total	\$2,614,135	\$2,621,600

We review our debt and marketable equity securities classified as short-term investments on a regular basis to evaluate whether or not any security has experienced an other-than-temporary decline in fair value. We consider factors such as the length of time and extent to which the market value has been less than the cost, the financial condition and near-term prospects of the issuer and our intent to sell, or whether it is more likely than not we will be required to sell the investment before recovery of the investment's amortized cost basis. If we believe that an other-than-temporary decline exists in one of these securities, we write down these investments to fair value. For debt securities, the portion of the write-down related to credit loss would be recorded to interest and other income, net in our Consolidated Statements of Income. Any portion not related to credit loss would be recorded to accumulated other comprehensive income, which is reflected as a separate component of stockholders' equity in our Consolidated Balance Sheets. For equity securities, the write-down would be recorded to investment gains (losses), net in our Consolidated Statements of Income. During fiscal 2014 and 2013, we did not consider any of our investments to be other-than-temporarily impaired. During fiscal 2012, we recorded immaterial other-than-temporary impairment losses associated with our marketable equity securities and did not consider any of our debt securities to be other-than-temporarily impaired.

See Note 3 for further information regarding the fair value of our financial instruments.

Our fixed income available-for-sale securities consist of high quality, investment grade securities from diverse issuers with a minimum credit rating of BBB and a weighted average credit rating of AA-. We value these securities based on pricing from pricing vendors who may use quoted prices in active markets for identical assets (Level 1 inputs) or inputs other than quoted prices that are observable either directly or indirectly (Level 2 inputs) in determining fair value. However, we classify all of our fixed income available-for-sale securities as having Level 2 inputs. The valuation techniques used to measure the fair value of our financial instruments and derivatives having Level 2 inputs were derived from non-binding market consensus prices that are corroborated by observable market data, quoted market prices for similar instruments, or pricing models such as discounted cash flow techniques. Our procedures include controls to ensure that appropriate fair values are recorded such as comparing prices obtained from multiple independent sources.

Our deferred compensation plan assets consist of prime money market funds and mutual funds.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

We also have direct investments in privately held companies accounted for under the cost method, which are periodically assessed for other-than-temporary impairment. If we determine that an other-than-temporary impairment has occurred, we write

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

down the investment to its fair value. We estimate fair value of our cost method investments considering available information such as pricing in recent rounds of financing, current cash positions, earnings and cash flow forecasts, recent operational performance and any other readily available market data. During fiscal 2014, we determined there were no other-than-temporary impairments on our cost method investments. During fiscal 2013, we determined there were other-than-temporary impairments of \$7.0 million on certain of our cost method investments which were written down to fair value.

As of November 28, 2014, the carrying value of our lease receivables approximated fair value, based on Level 2 valuation inputs which include Treasury rates, London Interbank Offered Rates ("LIBOR") and applicable credit spreads. See Note 15 for further details regarding our investment in lease receivables.

The fair value of our senior notes was \$1.6 billion as of November 28, 2014, based on observable market prices in less active market and categorized as Level 2. See Note 16 for further details regarding our debt.

NOTE 5. DERIVATIVES AND HEDGING ACTIVITIES**Hedge Accounting**

We recognize derivative instruments and hedging activities as either assets or liabilities in our Consolidated Balance Sheets and measure them at fair value. Gains and losses resulting from changes in fair value are accounted for depending on the use of the derivative and whether it is designated and qualifies for hedge accounting.

Fair Value Hedging—Interest Rate Swap

During the third quarter of fiscal 2014, we entered into interest rate swaps designated as a fair value hedge related to our \$900 million of 4.75% fixed interest rate senior notes due February 1, 2020 (the "2020 Notes"). In effect, the interest rate swaps convert the fixed interest rate on our 2020 Notes to a floating interest rate based on the LIBOR. Under the terms of the swaps, we will pay monthly interest at the one-month LIBOR rate plus a fixed number of basis points on the \$900 million notional amount through February 1, 2020. In exchange, we will receive 4.75% fixed rate interest from the swap counterparties. See Note 16 for further details regarding our debt.

The interest rate swaps are accounted for as fair value hedges and substantially offset the changes in fair value of the hedged portion of the underlying debt that are attributable to the changes in market risk. Therefore, the gains and losses related to changes in the fair value of the interest rate swaps are included in interest and other income (expense), net in our Consolidated Statements of Income. The fair value of the interest rate swaps is reflected in other assets in our Consolidated Balance Sheets.

Economic Hedging—Hedges of Forecasted Transactions

In countries outside the U.S., we transact business in U.S. Dollars and in various other currencies. We may use foreign exchange option contracts or forward contracts to hedge certain cash flow exposures resulting from changes in these foreign currency exchange rates. These foreign exchange contracts, carried at fair value, have maturities of up to twelve months. We enter into these foreign exchange contracts to hedge a portion of our forecasted foreign currency denominated revenue in the normal course of business and accordingly, they are not speculative in nature.

We recognize these contracts as derivative instruments and they are classified as either assets or liabilities on the balance sheet and measured on a recurring basis at fair value. Gains and losses resulting from changes in fair value are accounted for depending on the use of the contract and whether it is designated and qualifies for hedge accounting. To receive hedge accounting treatment, all hedging relationships are formally documented at the inception of the hedge, and the hedges must be highly effective in offsetting changes to future cash flows on hedged transactions. We record changes in the intrinsic value of these cash flow hedges in accumulated other comprehensive income in our Consolidated Balance Sheets, until the forecasted transaction occurs. When the forecasted transaction occurs, we reclassify the related gain or loss on the cash flow hedge to revenue. In the event the underlying forecasted transaction does not occur, or it becomes probable that it will not occur, we reclassify the gain or loss on the related cash flow hedge from accumulated other comprehensive income to interest and other income (expense), net in our Consolidated Statements of Income at that time. If we do not elect hedge accounting, or the contract does not qualify for hedge

accounting treatment, the changes in fair market value from period to period are recorded in interest and other income (expense), net in our Consolidated Statements of Income. For fiscal 2014 and 2013, net gains or losses recognized in other income relating

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

to hedges of forecasted transactions that did not occur were insignificant. For fiscal 2012, there were no such gains or losses recognized in interest and other income, net relating to hedges of forecasted transactions that did not occur.

We evaluate hedge effectiveness at the inception of the hedge prospectively as well as retrospectively and record any ineffective portion of the hedging instruments in interest and other income, net on our Consolidated Statements of Income. The net gain (loss) recognized in interest and other income (expense), net for cash flow hedges due to hedge ineffectiveness was insignificant for all fiscal years presented. The time value of purchased contracts is recorded in interest and other income (expense), net in our Consolidated Statements of Income.

Balance Sheet Hedging—Hedging of Foreign Currency Assets and Liabilities

We also hedge our net recognized foreign currency denominated assets and liabilities with foreign exchange forward contracts to reduce the risk that the value of these assets and liabilities will be adversely affected by changes in exchange rates. These contracts hedge assets and liabilities that are denominated in foreign currencies and are carried at fair value with changes in the fair value recorded to interest and other income (expense), net in our Consolidated Statements of Income. These contracts do not subject us to material balance sheet risk due to exchange rate movements because gains and losses on these derivatives are intended to offset gains and losses on the assets and liabilities being hedged. As of November 28, 2014, total notional amounts of outstanding contracts were \$235.5 million which included the notional equivalent of \$137.2 million in Euros, \$30.9 million in British Pounds and \$67.4 million in other foreign currencies. As of November 29, 2013, total notional amounts of outstanding contracts were \$282.8 million which included the notional equivalent of \$99.0 million in Euros, \$33.8 million in British Pounds and \$150.0 million in other foreign currencies. At November 28, 2014 and November 29, 2013, the outstanding balance sheet hedging derivatives had maturities of 180 days or less.

The fair value of derivative instruments on our Consolidated Balance Sheets as of November 28, 2014 and November 29, 2013 were as follows (in thousands):

	2014 Fair Value Asset Derivatives	Fair Value Liability Derivatives	2013 Fair Value Asset Derivatives	Fair Value Liability Derivatives
Derivatives designated as hedging instruments:				
Foreign exchange option contracts ⁽¹⁾⁽³⁾	\$31,275	\$—	\$8,913	\$—
Interest rate swap ⁽²⁾	14,268	—	—	—
Derivatives not designated as hedging instruments:				
Foreign exchange forward contracts ⁽¹⁾	1,716	663	2,978	1,067
Total derivatives	\$47,259	\$663	\$11,891	\$1,067

(1) Included in prepaid expenses and other current assets and accrued expenses for asset derivatives and liability derivatives, respectively, on our Consolidated Balance Sheets.

(2) Included in other assets on our Consolidated Balance Sheets.

(3) Hedging effectiveness expected to be recognized to income within the next twelve months.

The aggregate fair value of derivative instruments in net asset positions represent the maximum exposure to loss at the reporting date as a result of all of the counterparties failing to perform as contracted. This exposure could be reduced by the fair value of liabilities included in master netting arrangements with those same counterparties.

NOTE 6. PROPERTY AND EQUIPMENT

Property and equipment, net consisted of the following as of November 28, 2014 and November 29, 2013 (in thousands):

	2014	2013
Computers and equipment	\$855,218	\$731,767
Furniture and fixtures	82,385	82,904
Server hardware under capital lease	25,703	61,007
Capital projects in-progress	68,652	54,593
Leasehold improvements	240,506	235,859
Land	106,283	106,283
Buildings	320,410	175,325
Total	1,699,157	1,447,738
Less accumulated depreciation and amortization	(914,034)	(787,964)
Property and equipment, net	\$785,123	\$659,774

Depreciation and amortization expense of property and equipment for fiscal 2014, 2013 and 2012 was \$144.2 million, \$144.7 million and \$134.4 million, respectively.

In August 2014, we exercised our option to purchase the East and West Towers for a total purchase price of \$143.2 million. We capitalized the East and West Towers as property and equipment on our Consolidated Balance Sheets at \$144.1 million, the lesser of cost or fair value, which represented the total purchase price plus other direct costs associated with the purchase. These buildings will be depreciated over their useful life of 40 years on a straight-line basis. See Note 15 for discussion of our option to purchase the East and West Towers.

In May 2013, management approved a plan to sell land, building and other assets located in Waltham, Massachusetts (the "Waltham property assets") with a total carrying amount of \$47.4 million. The decision to sell the Waltham property assets was largely based upon lack of operational needs for a facility of this size, in combination with recent improvements in market conditions for commercial real estate in the area. During May 2013, we began to actively market the Waltham property assets and we expected to sell the property within one year from management's approval of the plan and classified the Waltham property assets as held for sale at \$23.6 million representing their fair value, net of estimated costs to sell which was the lesser of the fair value less cost to sell or carrying amount of the assets. The fair value, net of estimated cost to sell was measured with the assistance of third-party valuation models which used inputs such as market comparable data for similar properties to be purchased by other operating and investing entities and discounted cash flow techniques as part of the analysis. The fair value measurement was categorized as Level 3 as significant unobservable inputs were used in the valuation analysis. We ceased recognizing depreciation expense on the Waltham property assets upon reclassification. As a result, we recorded a write-down of \$23.8 million during fiscal 2013. These charges are included in restructuring and other related charges in our Consolidated Statements of Income for fiscal 2013. In September 2013, we finalized the sale of the Waltham property assets for net proceeds of \$24.3 million which approximated the carrying value of the assets at the time of sale.

NOTE 7. GOODWILL AND PURCHASED AND OTHER INTANGIBLES

Goodwill by reportable segment and activity for the years ended November 28, 2014 and November 29, 2013 was as follows (in thousands):

	2012	Acquisitions	Other ⁽¹⁾	2013	Acquisitions	Other ⁽¹⁾	2014
Digital Media	\$1,958,330	\$91,355	\$41	\$2,049,726	\$12,510	\$(4,838)	\$2,057,398
Digital Marketing	1,916,468	526,739	20,621	2,463,828	—	(57,687)	2,406,141
Print and Publishing	258,461	—	(34)	258,427	—	(4)	258,423
Goodwill	\$4,133,259	\$618,094	\$20,628	\$4,771,981	\$12,510	\$(62,529)	\$4,721,962

⁽¹⁾ Amounts primarily consist of foreign currency translation adjustments.

Purchased and other intangible assets by reportable segment as of November 28, 2014 and November 29, 2013 were as follows (in thousands):

	2014	2013
Digital Media	\$147,182	\$170,213
Digital Marketing	321,086	433,245
Print and Publishing	1,394	1,796
Purchased and other intangible assets, net	\$469,662	\$605,254

Purchased and other intangible assets subject to amortization as of November 28, 2014 and November 29, 2013 were as follows (in thousands):

	2014			2013		
	Cost	Accumulated Amortization	Net	Cost	Accumulated Amortization	Net
Purchased technology	\$405,208	\$(264,697)	\$140,511	\$423,237	\$(220,414)	\$202,823
Customer contracts and relationships	\$376,994	\$(143,330)	\$233,664	\$389,800	\$(111,416)	\$278,384
Trademarks	67,268	(36,516)	30,752	67,546	(27,933)	39,613
Acquired rights to use technology	148,836	(86,258)	62,578	155,322	(76,740)	78,582
Localization	549	(382)	167	3,404	(2,172)	1,232
Other intangibles	3,163	(1,173)	1,990	16,447	(11,827)	4,620
Total other intangible assets	\$596,810	\$(267,659)	\$329,151	\$632,519	\$(230,088)	\$402,431
Purchased and other intangible assets, net	\$1,002,018	\$(532,356)	\$469,662	\$1,055,756	\$(450,502)	\$605,254

In fiscal 2013, we acquired rights to use certain technology for \$51.8 million. Of this cost, an estimated \$25.3 million was related to future licensing rights and has been capitalized and is being amortized on a straight-line basis over the estimated useful lives ranging from five to ten years. We estimated that the remaining cost of \$26.5 million was related to historical use of licensing rights and was expensed as cost of product revenue.

In fiscal 2014, certain purchased intangibles associated with our acquisitions of Efficient Frontier and Day Software Holding AG became fully amortized and were removed from the Consolidated Balance Sheets. Amortization expense related to purchased and other intangible assets was \$152.7 million for fiscal 2014. Excluding the expense associated with historical use of the acquired rights to use the technology discussed in the paragraph above, amortization expense was \$156.9 million for fiscal 2013. Amortization expense related to purchased and other intangible assets was \$146.2 million for fiscal 2012. Of these amounts, for fiscal 2014, 2013 and 2012, \$100.2 million, \$105.7 million and \$100.8 million, respectively, were included in cost of sales.

Deferred Tax Assets and Liabilities

The tax effects of the temporary differences that gave rise to significant portions of the deferred tax assets and liabilities as of November 28, 2014 and November 29, 2013 are presented below (in thousands):

	2014	2013
Deferred tax assets:		
Acquired technology	\$9,477	\$14,379
Reserves and accruals	56,109	67,753
Deferred revenue	16,311	10,218
Unrealized losses on investments	6,723	9,793
Stock-based compensation	58,501	64,244
Net operating loss carryforwards of acquired companies	9,082	9,222
Credit carryforwards	41,419	43,175
Capitalized expenses	—	188
Other	10,974	6,788
Total gross deferred tax assets	208,596	225,760
Deferred tax asset valuation allowance	(22,100)	(21,493)
Total deferred tax assets	186,496	204,267
Deferred tax liabilities:		
Depreciation and amortization	73,295	89,611
Undistributed earnings of foreign subsidiaries	221,845	211,417
Acquired intangible assets	138,392	176,626
Total deferred tax liabilities	433,532	477,654
Net deferred tax liabilities	\$247,036	\$273,387

The deferred tax assets and liabilities for fiscal 2014 and 2013 include amounts related to various acquisitions. The total change in deferred tax assets and liabilities includes changes that are recorded to OCI, additional paid-in capital, goodwill, unrecognized tax benefits and retained earnings.

We provide U.S. income taxes on the earnings of foreign subsidiaries unless the subsidiaries' earnings are considered permanently reinvested outside the U.S. To the extent that the foreign earnings previously treated as permanently reinvested are repatriated, the related U.S. tax liability may be reduced by any foreign income taxes paid on these earnings. As of November 28, 2014, the cumulative amount of earnings upon which U.S. income taxes have not been provided is approximately \$3.3 billion. The unrecognized deferred tax liability for these earnings is approximately \$0.9 billion.

As of November 28, 2014, we have net operating loss carryforwards of approximately \$22.6 million for federal and \$3.4 million for foreign. We also have federal, state and foreign tax credit carryforwards of approximately \$1.6 million, \$26.7 million and \$22.4 million, respectively. The net operating loss carryforward assets, federal tax credits and foreign tax credits will expire in various years from fiscal 2015 through 2033. The state tax credit carryforwards can be carried forward indefinitely. The net operating loss carryforward assets and certain credits are subject to an annual limitation under Internal Revenue Code Section 382, but are expected to be fully realized.

In addition, we have been tracking certain deferred tax attributes of \$49.2 million which have not been recorded in the financial statements pursuant to accounting standards related to stock-based compensation. These amounts are no longer included in our gross or net deferred tax assets. Pursuant to these standards, the benefit of these deferred tax assets will be recorded to equity if and when they reduce taxes payable.

As of November 28, 2014, a valuation allowance of \$22.1 million has been established for certain deferred tax assets related to the impairment of investments and certain state and foreign assets. For fiscal 2014, the total change in the valuation allowance was \$0.6 million.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Accounting for Uncertainty in Income Taxes

During fiscal 2014 and 2013, our aggregate changes in our total gross amount of unrecognized tax benefits are summarized as follows (in thousands):

	2014	2013
Beginning balance	\$136,098	\$160,468
Gross increases in unrecognized tax benefits – prior year tax positions	144	20,244
Gross increases in unrecognized tax benefits – current year tax positions	18,877	16,777
Settlements with taxing authorities	(995)	(55,851)
Lapse of statute of limitations	(1,630)	(4,066)
Foreign exchange gains and losses	(3,646)	(1,474)
Ending balance	\$148,848	\$136,098

As of November 28, 2014, the combined amount of accrued interest and penalties related to tax positions taken on our tax returns and included in non-current income taxes payable was approximately \$14.6 million.

We file income tax returns in the U.S. on a federal basis and in many U.S. state and foreign jurisdictions. We are subject to the continual examination of our income tax returns by the IRS and other domestic and foreign tax authorities. Our major tax jurisdictions are Ireland, California and the U.S. For Ireland, California and the U.S., the earliest fiscal years open for examination are 2008, 2008 and 2010, respectively. We regularly assess the likelihood of outcomes resulting from these examinations to determine the adequacy of our provision for income taxes and have reserved for potential adjustments that may result from the current examinations. We believe such estimates to be reasonable; however, there can be no assurance that the final determination of any of these examinations will not have an adverse effect on our operating results and financial position.

In July 2013, a U.S. income tax examination covering fiscal 2008 and 2009 was completed. Our accrued tax and interest related to these years was \$48.4 million and was previously reported in long-term income taxes payable. We settled the tax obligation resulting from this examination with cash and income tax assets totaling \$41.2 million, and the resulting \$7.2 million income tax benefit was recorded in the third quarter of fiscal 2013.

The timing of the resolution of income tax examinations is highly uncertain as are the amounts and timing of tax payments that are part of any audit settlement process. These events could cause large fluctuations in the balance sheet classification of current and non-current assets and liabilities. We believe that within the next 12 months, it is reasonably possible that either certain audits will conclude or statutes of limitations on certain income tax examination periods will expire, or both. Given the uncertainties described above, we can only determine a range of estimated potential decreases in underlying unrecognized tax benefits ranging from \$0 to approximately \$5 million.

NOTE 10. RESTRUCTURING

Fiscal 2014 Restructuring Plan

In the fourth quarter of fiscal 2014, in order to better align our global resources for Digital Media and Digital Marketing, we initiated a restructuring plan to vacate our Research and Development facility in China and our Sales and Marketing facility in Russia. This plan consisted of reductions of approximately 350 full-time positions and we recorded restructuring charges of approximately \$18.8 million related to ongoing termination benefits for the positions eliminated. During fiscal 2015, we intend to vacate both of these facilities. The amount accrued for the fair value of future contractual obligations under these operating leases was insignificant.

Other Restructuring Plans

During the past several years, we have implemented Other Restructuring Plans consisting of reductions in workforce and the consolidation of facilities to better align our resources around our business strategies. As of November 28, 2014, we considered our Other Restructuring Plans to be substantially complete. We continue to make cash outlays to settle obligations under these plans, however the current impact to our Consolidated Financial Statements is not significant.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Summary of Restructuring Plans

The following table sets forth a summary of restructuring activities related to all of our restructuring plans described above during fiscal 2014 (in thousands):

	November 29, 2013	Costs Incurred	Cash Payments	Other Adjustments	November 28, 2014
Fiscal 2014 Restructuring Plan:					
Termination benefits	\$—	\$18,823	\$(4,382)) \$20	\$14,461
Cost of closing redundant facilities	—	557	(57)) (28)) 472
Other Restructuring Plans:					
Termination benefits	2,233	—	(1,357)) (339)) 537
Cost of closing redundant facilities	11,655	528	(5,215)) (124)) 6,844
Total restructuring plans	\$13,888	\$19,908	\$(11,011)) \$(471)) \$22,314

Accrued restructuring charges of \$22.3 million as of November 28, 2014 include \$17.1 million recorded in accrued restructuring, current and \$5.2 million related to long-term facilities obligations recorded in accrued restructuring, non-current on our Consolidated Balance Sheets. We expect to pay accrued termination benefits through fiscal 2015 and facilities-related liabilities under contract through fiscal 2021 of which approximately 45% will be paid through 2016.

NOTE 11. BENEFIT PLANS

Retirement Savings Plan

In 1987, we adopted an Employee Investment Plan, qualified under Section 401(k) of the Internal Revenue Code, which is a retirement savings plan covering substantially all of our U.S. employees, now referred to as the Adobe 401(k) Retirement Savings Plan. Under the plan, eligible employees may contribute up to 65% of their pretax or after-tax salary, subject to the Internal Revenue Service annual contribution limits. In fiscal 2014, we matched 50% of the first 6% of the employee's eligible compensation. We contributed \$24.8 million, \$22.3 million and \$19.4 million in fiscal 2014, 2013 and 2012, respectively. Adobe is under no obligation to continue matching future employee contributions and at the Company's discretion may change its practices at any time.

Deferred Compensation Plan

On September 21, 2006, the Board of Directors approved the Adobe Systems Incorporated Deferred Compensation Plan, effective December 2, 2006 (the "Deferred Compensation Plan"). The Deferred Compensation Plan is an unfunded, non-qualified, deferred compensation arrangement under which certain executives and members of the Board of Directors are able to defer a portion of their annual compensation. Participants may elect to contribute up to 75% of their base salary and 100% of other specified compensation, including commissions, bonuses, performance-based and time-based restricted stock units, and directors' fees. Participants are able to elect the payment of benefits to begin on a specified date at least three years after the end of the plan year in which the election is made in the form of a lump sum or annual installments over five, ten or fifteen years. Upon termination of a participant's employment with Adobe, such participant will receive a distribution in the form of a lump sum payment. All distributions will be made in cash, except for deferred performance-based and time-based restricted stock units which will be settled in stock. As of November 28, 2014 and November 29, 2013, the invested amounts under the Deferred Compensation Plan total \$25.7 million and \$19.8 million, respectively and were recorded as other assets on our Consolidated Balance Sheets. As of November 28, 2014 and November 29, 2013, \$31.0 million and \$22.0 million, respectively, was recorded as long-term liabilities to recognize undistributed deferred compensation due to employees.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 12. STOCK-BASED COMPENSATION

Our stock-based compensation programs are long-term retention programs that are intended to attract, retain and provide incentives for talented employees, officers and directors, and to align stockholder and employee interests. We have the following stock-based compensation plans and programs:

Restricted Stock Unit Plans

We grant restricted stock units to all eligible employees under our 2003 Equity Incentive Plan, as amended (“2003 Plan”), and our 2005 Equity Incentive Assumption Plan (“2005 Assumption Plan”). Restricted stock units granted under these plans as part of our annual review process vest annually over three years. Other restricted stock units granted under these plans generally vest over four years, the majority of which vest 25% annually. Certain grants have other vesting periods approved by our Board of Directors or an authorized committee of the Board of Directors.

We grant performance awards to officers and key employees under our 2003 Plan. Performance awards granted under these plans from fiscal 2009 to fiscal 2012 vest annually over three years, and performance awards granted in fiscal 2013 and 2014 cliff-vest after three years. Performance awards granted prior to fiscal 2009 vest annually over four years.

As of November 28, 2014, we had reserved 163.2 million and 5.7 million shares of common stock for issuance under our 2003 Plan and 2005 Assumption Plan, respectively, and had 45.7 million and 28.6 million shares available for grant under our 2003 Plan and 2005 Assumption Plan, respectively.

Employee Stock Purchase Plan

Our 1997 Employee Stock Purchase Plan (“ESPP”) allows eligible employee participants to purchase shares of our common stock at a discount through payroll deductions. The ESPP consists of a twenty-four month offering period with four six-month purchase periods in each offering period. Employees purchase shares in each purchase period at 85% of the market value of our common stock at either the beginning of the offering period or the end of the purchase period, whichever price is lower. The ESPP will continue until the earlier of (i) termination by the Board or (ii) the date on which all of the shares available for issuance under the plan have been issued.

As of November 28, 2014, we had reserved 93.0 million shares of our common stock for issuance under the ESPP and approximately 12.9 million shares remain available for future issuance.

Stock Option Plans

The 2003 Plan and the 2005 Assumption Plan allows us to grant options to all employees, including executive officers, outside consultants and non-employee directors. These plans will continue until the earlier of (i) termination by the Board or (ii) the date on which all of the shares available for issuance under the plan have been issued and restrictions on issued shares have lapsed. Option vesting periods are generally four years for all of these plans. Options granted under these plans generally expire seven years from the effective date of grant.

The Executive Compensation Committee of Adobe’s Board of Directors eliminated the use of stock option grants for all employees in fiscal 2012. Stock option grants to non-employee directors were minimal in fiscal 2013, and in December 2013 the Board of Directors eliminated the use of options for directors going forward.

Performance Share Programs

On January 24, 2014, our Executive Compensation Committee approved the 2014 Performance Share Program, including the award calculation methodology, under the terms of our 2003 Equity Incentive Plan. Under our 2014 Performance Share Program (“2014 Program”), shares may be earned based on the achievement of an objective relative total stockholder return measured over a three-year performance period. The purpose of the 2014 Program is to help focus key employees on building stockholder value, provide significant award potential for achieving outstanding company performance and enhance the ability of Adobe to attract and retain highly talented and competent individuals. Performance share awards will be awarded and fully vest upon the Executive Compensation Committee’s certification of the level of achievement following the three-year anniversary of the grant date on January 24, 2017. Participants in the 2014 Program generally have the ability to receive up to 200% of the target number of shares

originally granted.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Issuance of Shares

Upon exercise of stock options, vesting of restricted stock and performance shares, and purchases of shares under the ESPP, we will issue treasury stock. If treasury stock is not available, common stock will be issued. In order to minimize the impact of on-going dilution from exercises of stock options and vesting of restricted stock and performance shares, we instituted a stock repurchase program. See Note 13 for information regarding our stock repurchase programs.

Valuation of Stock-Based Compensation

Stock-based compensation cost is measured at the grant date based on the fair value of the award. We use the Black-Scholes option pricing model to determine the fair value of stock options and ESPP shares. The determination of the fair value of stock-based payment awards on the date of grant using an option pricing model is affected by our stock price as well as assumptions regarding a number of complex and subjective variables. These variables include our expected stock price volatility over the expected term of the awards, actual and projected employee stock option exercise behaviors, a risk-free interest rate and any expected dividends.

We estimate the expected term of options granted by calculating the average term from our historical stock option exercise experience. We estimate the volatility of our common stock by using implied volatility in market traded options. Our decision to use implied volatility was based upon the availability of actively traded options on our common stock and our assessment that implied volatility is more representative of future stock price trends than historical volatility. We base the risk-free interest rate that we use in the option valuation model on zero-coupon yields implied by U.S. Treasury issues with remaining terms similar to the expected term on the options. We do not anticipate paying any cash dividends in the foreseeable future and therefore use an expected dividend yield of zero in the option valuation model. We are required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. We use historical data to estimate pre-vesting option forfeitures and record stock-based compensation expense only for those awards that are expected to vest. We eliminated the use of stock option grants for all employees effective fiscal 2012, and for all of the non-employee directors effective fiscal 2014. The assumptions used to value our option grants prior to fiscal 2014 were as follows:

	Fiscal Years	
	2013	2012
Expected life (in years)	3.2	3.9 - 4.2
Volatility	27	% 31 - 34%
Risk free interest rate	0.36	% 0.54 - 0.71%

The expected term of ESPP shares is the average of the remaining purchase periods under each offering period. The assumptions used to value employee stock purchase rights were as follows:

	Fiscal Years		
	2014	2013	2012
Expected life (in years)	0.5 - 2.0	0.5 - 2.0	0.5 - 2.0
Volatility	26 - 28%	26 - 30%	30 - 36%
Risk free interest rate	0.06 - 0.47%	0.09 - 0.34%	0.06 - 0.30%

We recognize the estimated compensation cost of restricted stock awards and restricted stock units, net of estimated forfeitures, over the vesting term. The estimated compensation cost is based on the fair value of our common stock on the date of grant.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

We recognize the estimated compensation cost of performance shares, net of estimated forfeitures. The fiscal 2014 and 2013 awards are earned upon achievement of an objective total stockholder return measure at the end of the three-year performance period, as described above. The fair value of the awards was fixed at grant date and will be amortized over the longer of the remaining performance or service period. In previous years, the awards were earned upon attainment of identified performance goals, some of which contained discretionary metrics. As such, these awards were measured based on our traded stock price at the end of each reporting period until achieved. The fair value of the awards were based on the achievement date and amortized over the longer of the remaining performance or service period.

Summary of Restricted Stock Units

Restricted stock unit activity for fiscal 2014, 2013 and 2012 was as follows (in thousands):

	2014	2013	2012
Beginning outstanding balance	17,948	18,415	16,871
Awarded	4,413	7,236	9,431
Released	(7,502)) (6,224) (5,854
Forfeited	(1,295)) (1,479) (2,147
Increase due to acquisition	—	—	114
Ending outstanding balance	13,564	17,948	18,415

The weighted average grant date fair values of restricted stock units granted during fiscal 2014, 2013 and 2012 were \$61.16, \$39.87 and \$31.36, respectively. The total fair value of restricted stock units vested during fiscal 2014, 2013 and 2012 was \$457.3 million, \$249.5 million and \$180.1 million, respectively.

Information regarding restricted stock units outstanding at November 28, 2014, November 29, 2013 and November 30, 2012 is summarized below:

	Number of Shares (thousands)	Weighted Average Remaining Contractual Life (years)	Aggregate Intrinsic Value(*) (millions)
2014			
Restricted stock units outstanding	13,564	0.94	\$999.4
Restricted stock units vested and expected to vest	12,352	0.87	\$903.1
2013			
Restricted stock units outstanding	17,948	1.09	\$1,019.1
Restricted stock units vested and expected to vest	16,265	1.02	\$920.5
2012			
Restricted stock units outstanding	18,415	1.37	\$637.3
Restricted stock units vested and expected to vest	16,289	1.26	\$562.8

The intrinsic value is calculated as the market value as of the end of the fiscal period. As reported by the NASDAQ (*) Global Select Market, the market values as of November 28, 2014, November 29, 2013 and November 30, 2012 were \$73.68, \$56.78 and \$34.61, respectively.

Summary of Performance Shares

As of November 28, 2014, the shares awarded under our 2013 and 2014 Performance Share Programs are yet to be achieved. The following table sets forth the summary of performance share activity under our 2013 and 2014 Performance Share Programs for the fiscal year ended November 28, 2014 (in thousands):

	2014		2013	
	Shares Granted	Maximum Shares Eligible to Receive	Shares Granted	Maximum Shares Eligible to Receive
Beginning outstanding balance	854	1,707	—	—
Awarded	709	1,417	946	1,891
Forfeited	(46)	(90)	(92)	(184)
Ending outstanding balance	1,517	3,034	854	1,707

In the first quarter of fiscal 2013, the Executive Compensation Committee certified the actual performance achievement of participants in the 2012 Performance Share Program (the “2012 Program”). Based upon the achievement of specific and/or market-based performance goals outlined in the 2012 Program, participants had the ability to receive up to 150% of the target number of shares originally granted. Actual performance resulted in participants achieving 116% of target or approximately 1.3 million shares for the 2012 Program. One third of the shares under the 2012 Program vested in the first quarter of fiscal 2013 and the remaining two thirds vest evenly on the following two anniversaries of the grant, contingent upon the recipient’s continued service to Adobe.

In the first quarter of fiscal 2012, the Executive Compensation Committee certified the actual performance achievement of participants in the 2011 Performance Share Program (the “2011 Program”). Based upon the achievement of goals outlined in the 2011 Program, participants had the ability to receive up to 150% of the target number of shares originally granted. Actual performance resulted in participants achieving 130% of target or approximately 0.5 million shares for the 2011 Program. One-third of the shares under the 2011 Program vested in the first quarter of fiscal 2012 and the remaining two-thirds vest evenly on the following two annual anniversary dates of the grant, contingent upon the recipient’s continued service to Adobe.

The following table sets forth the summary of performance share activity under our 2010, 2011 and 2012 programs, based upon share awards actually achieved, for the fiscal years ended November 28, 2014, November 29, 2013 and November 30, 2012 (in thousands):

	2014	2013	2012
Beginning outstanding balance	861	388	405
Achieved	—	1,279	492
Released	(486)	(665)	(464)
Forfeited	(21)	(141)	(45)
Ending outstanding balance	354	861	388

The total fair value of performance awards vested during fiscal 2014, 2013 and 2012 was \$28.7 million, \$25.4 million and \$14.4 million, respectively.

Information regarding performance shares outstanding at November 28, 2014, November 29, 2013 and November 30, 2012 is summarized below:

	Number of Shares (thousands)	Weighted Average Remaining Contractual Life (years)	Aggregate Intrinsic Value ^(*) (millions)
2014			
Performance shares outstanding	354	0.16	\$26.1
Performance shares vested and expected to vest	348	0.16	\$25.5
2013			
Performance shares units outstanding	861	0.58	\$48.9
Performance shares vested and expected to vest	817	0.56	\$46.3
2012			
Performance shares units outstanding	388	0.54	\$13.4
Performance shares vested and expected to vest	369	0.51	\$12.7

The intrinsic value is calculated as the market value as of the end of the fiscal period. As reported by the NASDAQ Global Select Market, the market values as of November 28, 2014, November 29, 2013 and November 30, 2012 were \$73.68, \$56.78 and \$34.61, respectively.

Summary of Employee Stock Purchase Plan Shares

The weighted average subscription date fair value of shares under the ESPP during fiscal 2014, 2013 and 2012 were \$17.02, \$11.40 and \$9.09, respectively. Employees purchased 2.9 million shares at an average price of \$34.76, 3.4 million shares at an average price of \$25.71, and 3.2 million shares at an average price of \$23.81, respectively, for fiscal 2014, 2013 and 2012. The intrinsic value of shares purchased during fiscal 2014, 2013 and 2012 was \$93.4 million, \$58.5 million and \$22.8 million, respectively. The intrinsic value is calculated as the difference between the market value on the date of purchase and the purchase price of the shares.

Options exercisable	20,668	\$33.06	2.27	\$73.6

The intrinsic value is calculated as the difference between the market value as of the end of the fiscal period and ^(*) the exercise price of the shares. As reported by the NASDAQ Global Select Market, the market values as of November 28, 2014, November 29, 2013 and November 30, 2012 were \$73.68, \$56.78 and \$34.61, respectively.

All equity awards granted to current executive officers are made after a review by and with the approval of the Executive Compensation Committee of the Board of Directors.

Grants to Non-Employee Directors

The 2003 Plan (and prior to fiscal 2008, the Directors Plan) provides for the granting of non-qualified stock options and restricted stock units to non-employee directors. The initial equity grant to a new non-employee director is a restricted stock unit award having an aggregate value of \$0.5 million based on the average stock price over the 30 calendar days ending on the day before the date of grant. The initial equity award vests annually over 2 years. Non-employee directors receiving initial equity grants will not be eligible to receive annual equity grants until the second annual meeting after joining the Board of Directors.

Annual equity grants to non-employee directors shall have an aggregate value of \$0.3 million as based on the average stock price over the 30 calendar days ending on the day before the date of grant and vest 100% on the day preceding the next annual meeting. Starting in fiscal 2014, we eliminated the use of non-qualified stock options for our non-employee directors and restricted stock units became the primary form of their annual equity grants. Prior to fiscal 2014, a non-employee director could elect to receive the annual equity grant as either 100% options, 100% restricted stock units or 50% of each. The target grant value converted to stock options was based on a 1:3 conversion of restricted stock units to stock options.

Restricted stock units granted to directors for fiscal 2014, 2013 and 2012 were as follows (in thousands):

	2014	2013	2012
Restricted stock units granted to existing directors	48	36	42
Restricted stock units granted to new directors	—	14	41

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Non-employee director options granted in fiscal 2013 and 2012 as part of the annual equity awards process vested 100% on the day preceding the fiscal 2014 and fiscal 2013 annual meeting, respectively, and had a seven-year term. The exercise price of the options issued were equal to the fair market value of our common stock on the date of grant. Options granted to directors for fiscal 2013 and 2012 were as follows (shares in thousands):

	2013	2012
Options granted to existing directors	25	43
Exercise price	\$45.03	\$33.18

Compensation Costs

With the exception of performance shares, stock-based compensation expense is recognized on a straight-line basis over the requisite service period of the entire award, which is generally the vesting period. For performance shares, expense is recognized on a straight-line basis over the requisite service period for each vesting tranche of the award. As of November 28, 2014, there was \$414.5 million of unrecognized compensation cost, adjusted for estimated forfeitures, related to non-vested stock-based awards which will be recognized over a weighted average period of 1.6 years. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures.

Total stock-based compensation costs that have been included in our Consolidated Statements of Income for fiscal 2014, 2013 and 2012 were as follows (in thousands):

	Income Statement Classifications					
	Cost of Revenue— Subscription	Cost of Revenue— Services and Support	Research and Development	Sales and Marketing	General and Administrative	Total ⁽¹⁾
Option Grants and Stock Purchase Rights						
2014	\$1,855	\$4,000	\$ 15,125	\$17,706	\$ 6,476	\$45,162
2013	\$2,059	\$3,413	\$ 18,188	\$21,283	\$ 8,410	\$53,353
2012	\$2,840	\$4,130	\$ 24,823	\$31,379	\$ 15,455	\$78,627
Restricted Stock and Performance Share Awards						
2014	\$5,878	\$6,619	\$ 107,029	\$102,909	\$ 66,104	\$288,539
2013	\$5,052	\$6,961	\$ 102,464	\$101,423	\$ 59,734	\$275,634
2012	\$3,100	\$9,461	\$ 83,349	\$76,359	\$ 47,606	\$219,875

(1) During fiscal 2014, 2013 and 2012, we recorded tax benefits of \$72.4 million, \$70.7 million and \$61.5 million, respectively.

(*) Taxes related to derivative instruments were zero for all fiscal years based on the tax jurisdiction where the derivative instruments were executed.

Stock Repurchase Program

We are currently repurchasing common stock under our \$2.0 billion authority granted by our Board of Directors in April 2012.

Subsequent to November 28, 2014, as part of our \$2.0 billion stock repurchase program, we entered into a structured stock repurchase agreement with a large financial institution whereupon we provided them with a prepayment of \$200.0 million. This amount will be classified as treasury stock on our Consolidated Balance Sheets. Upon completion of the \$200.0 million stock repurchase agreement, there is no remaining balance under our current authority.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Subsequent to November 28, 2014, the Board of Directors approved a new stock repurchase program granting the company authority to repurchase up to \$2.0 billion in common stock through the end of fiscal 2017. The new stock repurchase program approved by our Board of Directors is similar to our previous \$2.0 billion stock repurchase program.

During fiscal 2014, 2013 and 2012, we entered into several structured stock repurchase agreements with large financial institutions, whereupon we provided them with prepayments totaling \$600.0 million, \$1.1 billion and \$405.0 million, respectively. The \$600.0 million and \$1.1 billion prepayments during fiscal 2014 and 2013 were under the \$2.0 billion stock repurchase authority. Of the \$405.0 million of prepayments during fiscal 2012, \$100.0 million were under the \$2.0 billion stock repurchase program and the remaining \$305.0 million were under our previous \$1.6 billion stock repurchase authority. We enter into these agreements in order to take advantage of repurchasing shares at a guaranteed discount to the Volume Weighted Average Price ("VWAP") of our common stock over a specified period of time. We only enter into such transactions when the discount that we receive is higher than the foregone return on our cash prepayments to the financial institutions. There were no explicit commissions or fees on these structured repurchases. Under the terms of the agreements, there is no requirement for the financial institutions to return any portion of the prepayment to us.

The financial institutions agree to deliver shares to us at monthly intervals during the contract term. The parameters used to calculate the number of shares deliverable are: the total notional amount of the contract, the number of trading days in the contract, the number of trading days in the interval and the average VWAP of our stock during the interval less the agreed upon discount. During fiscal 2014, we repurchased approximately 10.9 million shares at an average price of \$63.48 through structured repurchase agreements entered into during fiscal 2014 and fiscal 2013. During fiscal 2013, we repurchased approximately 21.6 million shares at an average price of \$46.47 through structured repurchase agreements entered into during fiscal 2013 and fiscal 2012. During fiscal 2012, we repurchased approximately 11.5 million shares at an average price per share of \$32.29 through structured repurchase agreements entered into during fiscal 2012.

For fiscal 2014, 2013 and 2012, the prepayments were classified as treasury stock on our Consolidated Balance Sheets at the payment date, though only shares physically delivered to us by November 28, 2014, November 29, 2013 and November 30, 2012 were excluded from the computation of earnings per share. As of November 28, 2014, \$40.3 million of prepayments remained under the agreement.

NOTE 14. NET INCOME PER SHARE

Basic net income per share is computed using the weighted average number of common shares outstanding for the period, excluding unvested restricted stock. Diluted net income per share is based upon the weighted average common shares outstanding for the period plus dilutive potential common shares, including unvested restricted stock and stock options using the treasury stock method.

The following table sets forth the computation of basic and diluted net income per share for fiscal 2014, 2013 and 2012 (in thousands, except per share data):

	2014	2013	2012
Net income	\$268,395	\$289,985	\$832,775
Shares used to compute basic net income per share	497,867	501,372	494,731
Dilutive potential common shares:			
Unvested restricted stock and performance share awards	8,586	8,736	7,624
Stock options	2,027	3,368	366
Shares used to compute diluted net income per share	508,480	513,476	502,721
Basic net income per share	\$0.54	\$0.58	\$1.68
Diluted net income per share	\$0.53	\$0.56	\$1.66

For fiscal 2014 and 2013, options to purchase shares of common stock with exercise prices greater than the average fair market value of our stock of \$65.93 and \$45.08, respectively, were not included in the calculation because the effect would have been anti-dilutive. The number of shares of common stock under these options was immaterial. For fiscal 2012, options to purchase approximately 19.4 million shares of common stock with exercise prices greater than the annual average fair market value of our stock of \$31.98 were not included in the calculation because the effect would have been anti-dilutive.

NOTE 15. COMMITMENTS AND CONTINGENCIES

Lease Commitments

We lease certain of our facilities and some of our equipment under non-cancellable operating lease arrangements that expire at various dates through 2028. We also have one land lease that expires in 2091. Rent expense includes base contractual rent and variable costs such as building expenses, utilities, taxes, insurance and equipment rental. Rent expense and sublease income for these leases for fiscal 2014, 2013 and 2012 were as follows (in thousands):

	2014	2013	2012
Rent expense	\$111,149	\$118,976	\$105,809
Less: sublease income	1,412	3,057	2,330
Net rent expense	\$109,737	\$115,919	\$103,479

We occupy three office buildings in San Jose, California where our corporate headquarters are located. We reference these office buildings as the Almaden Tower and the East and West Towers.

In August 2014, we exercised our option to purchase the East and West Towers for a total purchase price of \$143.2 million. Upon purchase, our investment in the lease receivable of \$126.8 million was credited against the total purchase price and we were no longer required to maintain a standby letter of credit as stipulated in the East and West Towers lease agreement. We capitalized the East and West Towers as property and equipment on our Consolidated Balance Sheets at \$144.1 million, the lesser of cost or fair value, which represented the total purchase price plus other direct costs associated with the purchase. See Note 6 for discussion of our East and West Towers purchase.

The lease agreement for the Almaden Tower is effective through March 2017. We are the investors in the lease receivable related to the Almaden Tower lease in the amount of \$80.4 million, which is recorded as investment in lease receivable on our Consolidated Balance Sheets. As of November 28, 2014, the carrying value of the lease receivable related to the Almaden Tower approximated fair value. Under the agreement for the Almaden Tower, we have the option to purchase the building at any time during the lease term for \$103.6 million. If we purchase the building, the investment in the lease receivable may be credited against the purchase price. The residual value guarantee under the Almaden Tower obligation is \$89.4 million.

The Almaden Tower lease is subject to standard covenants including certain financial ratios that are reported to the lessor quarterly. As of November 28, 2014, we were in compliance with all of the covenants. In the case of a default, the lessor may demand we purchase the building for an amount equal to the lease balance, or require that we remarket or relinquish the building. If we choose to remarket or are required to do so upon relinquishing the building, we are bound to arrange the sale of the building to an unrelated party and will be required to pay the lessor any shortfall between the net remarketing proceeds and the lease balance, up to the residual value guarantee amount less our investment in lease receivable. The Almaden Tower lease qualifies for operating lease accounting treatment and, as such, the building and the related obligation are not included in our Consolidated Balance Sheets. See Note 16 for discussion of our capital lease obligation.

Unconditional Purchase Obligations

Our purchase obligations consist of agreements to purchase goods and services entered into in the ordinary course of business.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table summarizes our non-cancellable unconditional purchase obligations, operating leases and capital leases for each of the next five years and thereafter as of November 28, 2014 (in thousands):

Fiscal Year	Purchase Obligations	Operating Leases		Capital Leases
		Future Minimum Lease Payments	Future Minimum Sublease Income	Future Minimum Lease Payments
2015	\$227,910	\$44,769	\$2,140	\$3,280
2016	28,588	40,676	2,102	—
2017	13,641	30,943	2,068	—
2018	14,285	26,547	1,705	—
2019	4,492	23,774	1,776	—
Thereafter	—	48,644	2,966	—
Total	\$288,916	\$215,353	\$12,757	\$3,280
Less: interest				(11)
Total				\$3,269

The table above includes operating lease commitments related to our restructured facilities. See Note 10 for information regarding our restructuring charges.

Guarantees

The Almaden Tower lease provides for a residual value guarantee as noted above. The fair value of a residual value guarantee in lease agreements entered into after December 31, 2002, must be recognized as a liability on our Consolidated Balance Sheets. As such, we recognized \$3.0 million in liabilities, related to the extended Almaden Tower lease. This liability was recorded in other long-term liabilities with the offsetting entry recorded as prepaid rent in other assets. The balance was amortized to our Consolidated Statements of Income over the life of the original lease. As of November 28, 2014 there was no remaining balance of the unamortized portion of the fair value of the residual value guarantee remaining on our Consolidated Balance Sheets.

Royalties

We have royalty commitments associated with the shipment and licensing of certain products. Royalty expense is generally based on a dollar amount per unit shipped or a percentage of the underlying revenue. Royalty expense, which was recorded under our cost of revenue on our Consolidated Statements of Income, was approximately \$45.2 million, \$40.2 million and \$29.6 million in fiscal 2014, 2013 and 2012, respectively.

Indemnifications

In the ordinary course of business, we provide indemnifications of varying scope to customers against claims of intellectual property infringement made by third parties arising from the use of our products and from time to time, we are subject to claims by our customers under these indemnification provisions. Historically, costs related to these indemnification provisions have not been significant and we are unable to estimate the maximum potential impact of these indemnification provisions on our future results of operations.

To the extent permitted under Delaware law, we have agreements whereby we indemnify our officers and directors for certain events or occurrences while the officer or director is or was serving at our request in such capacity. The indemnification period covers all pertinent events and occurrences during the officer's or director's lifetime. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited; however, we have director and officer insurance coverage that reduces our exposure and enables us to recover a portion of any future amounts paid. We believe the estimated fair value of these indemnification agreements in excess of applicable insurance coverage is minimal.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Legal Proceedings

In connection with disputes relating to the validity or alleged infringement of third-party intellectual property rights, including patent rights, we have been, are currently and may in the future be subject to claims, negotiations or complex, protracted litigation. Intellectual property disputes and litigation may be very costly and can be disruptive to our business operations by diverting the attention and energies of management and key technical personnel. Although we have successfully defended or resolved past litigation and disputes, we may not prevail in any ongoing or future litigation and disputes. Third-party intellectual property disputes could subject us to significant liabilities, require us to enter into royalty and licensing arrangements on unfavorable terms, prevent us from licensing certain of our products or offering certain of our services, subject us to injunctions restricting our sale of products or services, cause severe disruptions to our operations or the markets in which we compete, or require us to satisfy indemnification commitments with our customers including contractual provisions under various license arrangements and service agreements.

Between May 4, 2011 and July 14, 2011, five putative class action lawsuits were filed in Santa Clara Superior Court and Alameda Superior Court in California. On September 12, 2011, the cases were consolidated into In Re High-Tech Employee Antitrust Litigation (“HTEAL”) pending in the United States District Court for the Northern District of California, San Jose Division. In the consolidated complaint, Plaintiffs alleged that Adobe, along with Apple, Google, Intel, Intuit, Lucasfilm and Pixar, agreed not to recruit each other’s employees in violation of Federal and state antitrust laws. Plaintiffs claim the alleged agreements suppressed employee compensation and deprived employees of career opportunities. Plaintiffs seek injunctive relief, monetary damages, treble damages, costs and attorneys fees.

All defendants deny the allegations and that they engaged in any wrongdoing of any kind. On October 24, 2013, the court certified a class of all persons who worked in the technical, creative, and/or research and development fields on a salaried basis in the United States for one or more of the following: (a) Apple from March 2005 through December 2009; (b) Adobe from May 2005 through December 2009; (c) Google from March 2005 through December 2009; (d) Intel from March 2005 through December 2009; (e) Intuit from June 2007 through December 2009; (f) Lucasfilm from January 2005 through December 2009; or (g) Pixar from January 2005 through December 2009, excluding retail employees, corporate officers, members of the boards of directors, and senior executives of all defendants. During the second quarter of fiscal 2014, the parties reached a settlement to resolve this lawsuit, subject to the Court’s approval.

On August 8, 2014, the Court rejected the settlement agreement jointly submitted by the parties. During the first quarter of fiscal 2015, the parties reached another agreement to settle the litigation. On January 15, 2015, the agreement was submitted to the Court seeking preliminary approval of the settlement. The hearing for preliminary approval is set for March 2015. We accrued a loss contingency of \$10.0 million associated with this matter during the first quarter of fiscal 2014.

In addition to intellectual property disputes and the other litigation matter described above, we are subject to legal proceedings, claims and investigations in the ordinary course of business, including claims relating to commercial, employment and other matters. Some of these disputes and legal proceedings may include speculative claims for substantial or indeterminate amounts of damages. We consider all claims on a quarterly basis in accordance with GAAP and based on known facts assess whether potential losses are considered reasonably possible, probable and estimable. Based upon this assessment, we then evaluate disclosure requirements and whether to accrue for such claims in our financial statements. This determination is then reviewed and discussed with our Audit Committee and our independent registered public accounting firm.

We make a provision for a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular case. Unless otherwise specifically disclosed here or in our Notes to Consolidated Financial Statements, we have determined that no provision for liability nor disclosure is required related to any claim against us because: (a) there is

not a reasonable possibility that a loss exceeding amounts already recognized (if any) may be incurred with respect to such claim; (b) a reasonably possible loss or range of loss cannot be estimated; or (c) such estimate is immaterial.

All legal costs associated with litigation are expensed as incurred. Litigation is inherently unpredictable. However, we believe that we have valid defenses with respect to the legal matters pending against us. It is possible, nevertheless, that our consolidated financial position, cash flows or results of operations could be negatively affected by an unfavorable resolution of one or more of such proceedings, claims or investigations.

In connection with our anti-piracy efforts, conducted both internally and through organizations such as the Business Software Alliance, from time to time we undertake litigation against alleged copyright infringers. Such lawsuits may lead to counter-claims alleging improper use of litigation or violation of other laws. We believe we have valid defenses with respect to such counter-

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

claims; however, it is possible that our consolidated financial position, cash flows or results of operations could be affected in any particular period by the resolution of one or more of these counter-claims.

NOTE 16. DEBT

Our debt as of November 28, 2014 and November 29, 2013 consisted of the following (in thousands):

	2014	2013
Notes	\$1,496,778	\$1,496,028
Fair value of interest rate swap	14,268	—
Adjusted carrying value of Notes	1,511,046	1,496,028
Capital lease obligations	3,269	17,945
Total debt and capital lease obligations	1,514,315	1,513,973
Less: current portion	603,229	14,676
Debt and capital lease obligations	\$911,086	\$1,499,297

Notes

In February 2010, we issued \$600 million of 3.25% senior notes due February 1, 2015 (the “2015 Notes”) and \$900 million of 4.75% senior notes due February 1, 2020 (the “2020 Notes” and, together with the 2015 Notes, the “Notes”). Our proceeds were \$1.5 billion and were net of an issuance discount of \$6.6 million. The Notes rank equally with our other unsecured and unsubordinated indebtedness. In addition, we incurred issuance costs of \$10.7 million. Both the discount and issuance costs are being amortized to interest expense over the respective terms of the Notes using the effective interest method.

The effective interest rate including the discount and issuance costs is 3.45% for the 2015 Notes and 4.92% for the 2020 Notes. Interest is payable semi-annually, in arrears, on February 1 and August 1, commencing on August 1, 2010. During fiscal 2014, we made both semi-annual interest payments on our Notes totaling \$62.2 million. In June 2014, we entered into interest rate swaps with a total notional amount of \$900 million designated as a fair value hedge related to our 2020 Notes. The effect of such interest rate swaps is to effectively convert the fixed interest rate on our 2020 Notes to a floating interest rate based on the LIBOR plus a fixed number of basis points. Under the terms of the swap, we will pay monthly interest at the one-month LIBOR floating interest plus a spread of a fixed number of basis points on the \$900 million notional amount. In exchange, we will receive 4.75% fixed rate interest from the swap counterparties. See Note 5 for further details regarding our interest rate swap derivatives.

The gains and losses related to changes in the fair value of the interest rate swaps are included in interest and other income (expense), net in our Consolidated Statement of Income and substantially offset the changes in the fair value of the hedged portion of the underlying debt that are attributable to the changes in market risk. The fair value of the interest rate swaps is reflected in other assets in our Consolidated Balance Sheets. The carrying value of the 2020 Notes was adjusted by an amount that is equal and offsetting to the fair value of the swaps. The interest receivable from the swaps based on the fixed interest rate and the interest payable based on the effective interest rates are recorded at gross in the prepaid expenses and other current assets account and accrued expenses account, respectively, in our Consolidated Balance Sheets.

Based on quoted prices in inactive markets, the fair value of the Notes was \$1.6 billion as of November 28, 2014. The total fair value of \$1.6 billion excludes the effect of fair value hedge of the 2020 Notes for which we entered into interest rate swaps for the total notional amount \$900 million.

We may redeem the Notes at any time, subject to a make whole premium. In addition, upon the occurrence of certain change of control triggering events, we may be required to repurchase the Notes, at a price equal to 101% of their principal amount, plus accrued and unpaid interest to the date of repurchase. The Notes also include covenants that limit our ability to grant liens on assets and to enter into sale and leaseback transactions, subject to significant allowances. As of November 28, 2014, we were in compliance with all of the covenants.

During the first quarter of fiscal 2014, we reclassified \$599.8 million as current debt on our Consolidated Balance Sheets, which represented the 2015 Notes, net of unamortized original issuance discount. We intend to refinance the current portion of our debt on or before the due date using either newly issued debt or drawings from our existing revolving credit agreement.

Table of Contents

ADOBE SYSTEMS INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Credit Agreement

On March 2, 2012, we entered into a five-year \$1.0 billion senior unsecured revolving credit agreement (the “Credit Agreement”), providing for loans to us and certain of our subsidiaries. Pursuant to the terms of the Credit Agreement, we may, subject to the agreement of the applicable lenders, request up to an additional \$500.0 million in commitments, for a maximum aggregate commitment of \$1.5 billion. Loans under the Credit Agreement will bear interest at either (i) LIBOR plus a margin, based on our debt ratings, ranging from 0.795% and 1.30% or (ii) the base rate, which is defined as the highest of (a) the agent’s prime rate, (b) the federal funds effective rate plus 0.50% or (c) LIBOR plus 1.00% plus a margin, based on our debt ratings, ranging from 0.00% to 0.30%. Commitment fees are payable quarterly at rates between 0.08% and 0.20% per year also based on our public debt ratings. Subject to certain conditions stated in the Credit Agreement, we and any of our subsidiaries designated as additional borrowers may borrow, prepay and re-borrow amounts under the revolving credit facility at any time during the term of the Credit Agreement.

The Credit Agreement contains customary representations, warranties, affirmative and negative covenants, including a financial covenant, events of default and indemnification provisions in favor of the lenders. The negative covenants include restrictions regarding the incurrence of liens and indebtedness, certain merger and acquisition transactions, dispositions and other matters, all subject to certain exceptions. The financial covenant, based on a quarterly financial test, requires us not to exceed a maximum leverage ratio.

On March 1, 2013, we exercised an option under the Credit Agreement to extend the maturity date of the Credit Agreement by one year to March 2, 2018. The facility will terminate and all amounts owing thereunder will be due and payable on the maturity date unless (a) the commitments are terminated earlier upon the occurrence of certain events, including an event of default, or (b) the maturity date is further extended upon our request, subject to the agreement of the lenders.

As of November 28, 2014, there were no outstanding borrowings under this Credit Agreement and we were in compliance with all covenants.

Capital Lease Obligation

In fiscal 2013, we entered into a sale-leaseback agreement totaling \$25.7 million over a period of 24 months. This transaction was classified as a capital lease obligation and was recorded at fair value. As of November 28, 2014, our capital lease obligations of \$3.3 million are presented as current debt in our Consolidated Balance Sheets.

NOTE 18. INDUSTRY SEGMENT, GEOGRAPHIC INFORMATION AND SIGNIFICANT CUSTOMERS

We report segment information based on the “management” approach. The management approach designates the internal reporting used by management for making decisions and assessing performance as the source of our reportable segments.

Our CEO, the chief operating decision maker, reviews revenue and gross margin information for each of our reportable segments, but does not review operating expenses on a segment by segment basis. In addition, with the exception of goodwill and intangible assets, we do not identify or allocate our assets by the reportable segments. We have the following reportable segments:

Digital Media—Our Digital Media segment provides tools and solutions that enable individuals, small and medium businesses and enterprises to create, publish, promote and monetize their digital content anywhere. Our customers include traditional content creators, web application developers and digital media professionals, as well as their management in marketing departments and agencies, companies and publishers.

Digital Marketing—Our Digital Marketing segment provides solutions and services for how digital advertising and marketing are created, managed, executed, measured and optimized. Our customers include digital marketers, advertisers, publishers, merchandisers, web analysts, chief marketing officers, chief information officer and chief revenue officers.

Print and Publishing—Our Print and Publishing segment addresses market opportunities ranging from the diverse authoring and publishing needs of technical and business publishing to our legacy type and OEM printing businesses.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders

Adobe Systems Incorporated:

We have audited the accompanying consolidated balance sheets of Adobe Systems Incorporated and subsidiaries as of November 28, 2014 and November 29, 2013, and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the years in the three-year period ended November 28, 2014. We also have audited Adobe Systems Incorporated's internal control over financial reporting as of November 28, 2014, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Adobe Systems Incorporated's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express an opinion on these consolidated financial statements and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Adobe Systems Incorporated and subsidiaries as of November 28, 2014 and November 29, 2013, and the results of its operations and its cash flows for each of the years in the three-year period ended November 28, 2014, in conformity with U.S. generally accepted accounting principles. Also in our opinion, Adobe Systems Incorporated maintained, in all material respects, effective internal control over financial reporting as of November 28, 2014, based on criteria established in Internal Control - Integrated Framework (1992) issued by COSO.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our management has evaluated, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of November 28, 2014. Based on their evaluation as of November 28, 2014, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) were effective at the reasonable assurance level to ensure that the information required to be disclosed by us in this Annual Report on Form 10-K was (i) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and regulations and (ii) accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures or our internal controls over financial reporting will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within Adobe have been detected.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). Our management assessed the effectiveness of our internal control over financial reporting as of November 28, 2014. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in Internal Control-Integrated Framework (1992). Our management has concluded that, as of November 28, 2014, our internal control over financial reporting is effective based on these criteria.

KPMG LLP, the independent registered public accounting firm that audited our financial statements included in this Annual Report on Form 10-K, has issued an attestation report on our internal control over financial reporting, which is included herein.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended November 28, 2014 that have materially affected, or are reasonably likely to materially affect our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

On January 14, 2015, Adobe issued a press release announcing that its Board of Directors has approved a new stock repurchase program granting the Company authority to repurchase up to \$2.0 billion in common stock through the end of fiscal 2017.

Under our new stock repurchase program, which is designed to return value to our stockholders and minimize dilution from stock issuances, we repurchase shares in the open market and also enter into structured repurchase agreements with third parties. The new stock repurchase program approved by our Board of Directors is substantially similar to our previous program authorizing the repurchase of up to \$2.0 billion in common stock through fiscal 2015, which authority has been exhausted.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by this Item 10 of Form 10-K that is found in our 2015 Proxy Statement to be filed with the SEC in connection with the solicitation of proxies for the Company's 2015 Annual Meeting of Stockholders ("2015 Proxy Statement") is incorporated herein by reference to our 2015 Proxy Statement. The 2015 Proxy Statement will be

filed with the SEC within 120 days after the end of the fiscal year to which this report relates. For information with respect to our executive officers, see “Executive Officers” at the end of Part I, Item 1 of this report.
