ITEM 7. EXHIBITS

EXHIBIT 99.1

CONTRACT STATUS SUMMARY AT OCTOBER 1, 2003

ITEM 9. REGULATION FD DISCLOSURE

The ATWOOD EAGLE has completed its contractual work for ExxonMobil and is preparing to commence in early October 2003 a one-well drilling program for CNR Ranger (Angola) Limited. The drilling program is estimated to take between 40 and 106 days to complete, with a dayrate of \$90,000.

At the time that the ATWOOD EAGLE commenced working for ExxonMobil in Angola in March 2003, the Company expected work under that contract to extend

Edgar Filing: ATWOOD OCEANICS INC - Form 8-K

into the second quarter of 2004. Based upon this expectation, the mobilization costs to move the drilling unit from Greece to Angola were being amortized over a one-year period. The Company bid the CNR work as an assignment of the ExxonMobil contract; however, a separate contract was executed with CNR instead of an assignment. Thus, as the ExxonMobil contract was not assigned to CNR, the remaining unamortized balance of the ATWOOD EAGLE mobilization costs (approximately \$2 million) will be expensed in September 2003. With this additional mobilization expense coupled with idle time incurred by the ATWOOD SOUTHERN CROSS and ATWOOD HUNTER during the quarter ending September 30, 2003, we expect to incur a total loss in the fourth quarter of fiscal year 2003 of \$8 to \$9 million.

The ATWOOD HUNTER is expected to complete its one-well program in Israel in early October 2003. Upon completion of this work, the rig may incur some idle time while waiting for its next contract opportunity. Contract opportunities for additional work are being pursued in the Mediterranean area, as well as outside of the Mediterranean.

In September 2003, the RICHMOND commenced a two-well plus one option well contract for Union Oil Company of California. Drilling of the two firm wells is expected to take around 50 days to complete.

Additional information with respect to the Company's Contract Status Summary October 1, 2003 is attached hereto as Exhibit 99.1 which is being furnished in accordance with Rule 101(e)(1) under Regulation FD and should not be deemed to be filed.

Statements contained in this report with respect to the future are forward-looking statements. These statements reflect management's reasonable judgment with respect to future events. Forward-looking statements involve risks and uncertainties. Actual results could differ materially from those anticipated as a result of various factors: the Company's dependence on the oil and gas industry; the risks involved in the construction of a rig; competition; operating risks; risks involved in foreign operations; risks associated with possible disruption in operations due to terrorism; risks associated with a possible disruption in operations due to war; and governmental regulations and environmental matters. A list of additional risk factors can be found in the Company's annual report on Form 10-K for the year ended September 30, 2002, filed with the Securities and Exchange Commission.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
