Chairman's  
Letter to Shareholders

Dear Shareholders,

Investors have many reasons to remain cautious. The challenges in the Euro area are casting a shadow over global economies and financial markets. The political support for addressing fiscal issues is eroding as the economic and social impacts become more visible. At the same time, member nations appear unwilling to provide adequate financial support or to surrender sufficient sovereignty to strengthen the banks or unify the Euro area financial system. The gains made in reducing deficits, and the hard-won progress on winning popular acceptance of the need for economic austerity, are at risk. To their credit, European political leaders press on to find compromise solutions, but there is increasing concern that time will begin to run out.

In the U.S., strong corporate earnings have enabled the equity markets to withstand much of the downward pressures coming from weakening job creation, slower economic growth and political uncertainty. The Fed remains committed to low interest rates and announced on September 13, 2012 (after the close of this reporting period) another program of quantitative easing (QE3) to continue until mid-2015. Pre-election maneuvering has added to the already highly partisan atmosphere in Congress. The end of the Bush-era tax cuts and implementation of the spending restrictions of the Budget Control Act of 2011, both scheduled to take place at year-end, loom closer.

During the last year, U.S. based investors have experienced a sharp decline and a strong recovery in the equity markets. The experienced investment teams at Nuveen keep their eye on a longer time horizon and use their practiced investment disciplines to negotiate through market peaks and valleys to achieve long-term goals for investors. Experienced professionals pursue investments that will weather short-term volatility and at the same time, seek opportunities that are created by markets that overreact to negative developments. Monitoring this process is an important consideration for the Fund Board as it oversees your Nuveen Fund on your behalf.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner

Portfolio manager Scott Romans examines key investment strategies and the six-month performance of these Nuveen California Municipal Funds. Scott has managed NCU, NAC, NVX, NZH and NKX since 2003.

## REORGANIZATIONS

Effective before the opening of business on May 7, 2012, the following Acquired Funds were merged into the Acquiring Fund.

Acquired Funds	Acquiring Fund
•Nuveen Insured California Premium Income Municipal Fund, Inc. (NPC)	
•Nuveen Insured California Premium Income Municipal Fund 2, Inc. (NCL)	Nuveen California AMT-Free Municipal Income Fund (NKX)
•Nuveen Insured California Dividend Advantage Municipal Fund (NKL)	

Upon the closing of the reorganizations, the Acquired Funds transferred their assets to the Acquiring Fund in exchange for common and preferred shares of the Acquiring Fund, and the assumption by the Acquiring Fund of the liabilities of the Acquired Funds. The Acquired Funds were then liquidated, dissolved and terminated in accordance with their Declaration of Trust.

What key strategies were used to manage the California Funds during the six-month reporting period ended August 31, 2012?

During this reporting period, municipal bond prices generally rallied, as strong demand and tight supply combined to create favorable market conditions for municipal bonds. Although the availability of tax-exempt supply improved over that of the same six-month period a year earlier, the pattern of new issuance remained light compared with long-term historical trends. This supply/demand dynamic served as a key driver of performance. Concurrent with rising prices, yields continued to decline across most maturities, especially at the longer end of the municipal yield curve, and the yield curve flattened. During this period, we saw an increasing number of borrowers come to market seeking to take advantage of the low rate environment, with

approximately 60% of new municipal paper issued by borrowers that were calling existing debt and refinancing at lower rates.

In this environment, we continued to take a bottom-up approach to discovering sectors that appeared undervalued as well as individual credits that had the potential to perform well over the long term and helped us keep the Funds fully invested. During this period, the Funds found value in several areas of the market, including health care. The Funds also took advantage of opportunities to move out of local general obligation (GO) bonds and into state GOs and, more broadly speaking, away from GO bonds in general and into revenue bonds. These moves were intended to reduce the Funds' exposure to some of the fiscal problems faced by local governments in California, including local real estate valuations and Proposition 13's constraints on property taxes, as well as pension issues. One example of a revenue credit that we purchased during this period were water bonds issued by the San Francisco Public Utilities Commission for water service to the city and Bay Area.

We also continued to add exposure to redevelopment agency (RDA) bonds in the secondary market. Because of recent changes to the RDA program, we remained very selective in our purchases in this area, evaluating issuers on a case by case basis. (In 2011, as part of cost saving measures to close gaps in the California state budget, all 400 RDAs in the state were ordered to dissolve by February 1, 2012, and successor agencies and oversight boards were created to manage obligations that were in place prior to the dissolution and take title to the RDAs' housing and other assets.) In addition to finding opportunities in specific sectors, we also focused on taking advantage of short-term market opportunities created by supply/demand dynamics in the municipal market during this period. While demand for tax exempt paper remained consistently strong throughout the period, supply fluctuated widely. We found that periods of substantial supply provided good short term buying opportunities not only because of the increased number of issues available but also because some investors became more hesitant in their buying as supply grew, causing spreads to widen temporarily.

In general during this period, we focused on bonds with longer maturities. This enabled us to take advantage of attractive yields at the longer end of the municipal yield curve and also provided some protection for the Funds' duration and yield curve positioning. We also purchased lower rated bonds when we found attractive opportunities, as we believed these bonds continued to offer relative value.

Cash for new purchases during this period was generated primarily by the proceeds from a meaningful number of bond calls resulting from the increase in refinancings. During this period, we worked to redeploy these proceeds as well as those from maturing bonds to keep the Funds as fully invested as possible. In addition, as discussed above, the Funds sold some local GOs and appropriation bonds and reinvested the proceeds in state GOs. Overall, selling was minimal because the bonds in our portfolios generally embedded higher yields than those on bonds available in the current marketplace.

As of August 31, 2012, all of these Funds continued to use inverse floating rate securities. We employ inverse floaters for a variety of reasons, including duration management, income enhancement and total return enhancement.

How did the Funds perform?

Individual results for these Nuveen California Funds, as well as relevant index and peer group information, are presented in the accompanying table.

Average Annual Total Returns on Common Share Net Asset Value\*  
For periods ended 8/31/12

Fund	6-Month	1-Year	5-Year	10-Year
NCU	5.99%	18.95%	8.25%	6.75%
NAC	7.51%	19.58%	7.62%	6.74%
NVX	6.48%	18.26%	8.14%	6.95%
NZH	6.46%	18.24%	6.76%	6.23%
NKX	7.14%	16.61%	7.08%	N/A
S&P California Municipal Bond Index**	3.55%	10.79%	6.12%	5.35%
S&P Municipal Bond Index**	3.24%	9.35%	6.00%	5.28%
Lipper California Municipal Debt Funds Classification Average**	6.38%	19.48%	6.76%	6.14%

For the six months ended August 31, 2012, the cumulative returns on common share net asset value (NAV) for all five of these Funds exceeded the returns on the S&P California Municipal Bond Index as well as the S&P Municipal Bond Index. NAC, NVX, NZH and NKX also outperformed the average return for the Lipper California Municipal Debt Funds Classification Average, while NCU underperformed this Lipper average.

Key management factors that influenced the Funds' returns during this period included duration and yield curve positioning, credit exposure and sector allocation. The use of regulatory leverage also was an important positive factor affecting the Funds' performance. Leverage is discussed in more detail later in this report.

In an environment of declining rates and flattening yield curve, municipal bonds with longer maturities generally outperformed those with shorter maturities during this period. Overall, credits at the longest end of the municipal yield curve posted the strongest returns, while bonds at the shortest end produced the weakest results. Among these Funds, NAC was the most advantageously positioned in terms of duration and yield curve, with overweights in the outperforming longer part of the yield curve and underexposure to the shorter end of the curve that produced weaker returns. Overall, duration and yield curve positioning was a positive contributor to the performance of these Funds, although the net impact varied depending upon each

Fund's individual weightings along the yield curve. NCU, NAC, NZH and NKX also benefited from their overweighting in zero coupon bonds, which generally outperformed the market during this period due to their longer durations. NVX was underweight in these bonds.

Credit exposure was another important factor in the Funds' performance during these six months, as lower quality bonds generally outperformed higher quality credits. This outperformance was due in part to the greater demand for lower rated bonds as investors looked for investment vehicles offering higher yields. As investors became more comfortable taking on additional investment risk, credit spreads or the difference in yield spreads between U.S. Treasury securities and comparable investments such as municipal bonds, narrowed through a variety of rating categories. As a result of this spread compression, the Funds generally benefited from their holdings of lower rated credits. This was especially true in NVX and NZH, which had the highest allocations of bonds rated BBB. On the other hand, NCU's higher quality profile, including the largest allocation of AAA bonds among these Funds, detracted from its performance for the period.

During this period, revenue bonds as a whole outperformed the general municipal market. Holdings that generally made positive contributions to the Funds' returns included health care (together with hospitals), education, housing, transportation and redevelopment agency (RDA) credits. All of these Funds benefited from good weightings in the health care sector. Tobacco credits backed by the 1998 master tobacco settlement agreement also performed very well, as these bonds benefited from several market developments, including increased demand for higher yielding investments by investors who had become less risk-averse. In addition, based on recent data showing that cigarette sales had fallen less steeply than anticipated, the 46 states participating in the agreement, including California, stand to receive increased payments from the tobacco companies. As of August 31, 2012, these Funds held tobacco credits, which benefited their performance as tobacco bonds rallied.

In contrast, pre-refunded bonds, which are often backed by U.S. Treasury securities, were the poorest performing market segment during this period. The underperformance of these bonds can be attributed primarily to their shorter effective maturities and higher credit quality. NZH had the largest allocation of these bonds as of August 31, 2012, while NAC held the fewest pre-refunded bonds. General obligation (GO) bonds and utilities credits also lagged the performance of the general municipal market for this period.

In addition, NKX had some exposure to California municipalities that experienced financial difficulties over the past six months, including Stockton and San Bernardino. Shareholders should note that all of these holdings are insured, and the insurer, National Public Finance Guaranty, has stated its intention to make payments on these bonds, if required. During this period, these holdings had no negative impact on NKX's performance.

Fund Leverage and  
Other Information

## IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the return of the Funds relative to their benchmarks was the Funds' use of leverage. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. Leverage had a positive impact on the performance of the Funds over this reporting period.

## RISK CONSIDERATIONS

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

**Investment and Market Risk.** An investment in common shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in common shares represents an indirect investment in the municipal securities owned by the Fund, which generally trade in the over-the-counter markets. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

**Price Risk.** Shares of closed-end investment companies like these Funds frequently trade at a discount to their NAV. Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

**Leverage Risk.** Each Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful.

**Tax Risk.** The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

**Issuer Credit Risk.** This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

**Interest Rate Risk.** Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

**Reinvestment Risk.** If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

**Call Risk or Prepayment Risk.** Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

**Inverse Floater Risk.** The Funds invest in inverse floaters. Due to their leveraged nature, these investments can greatly increase a Fund's exposure to interest rate risk and credit risk. In addition, investments in inverse floaters involve the risk that the Fund could lose more than its original principal investment.

Common Share Dividend  
and Price Information

DIVIDEND INFORMATION

During the six-month reporting period ended August 31, 2012, the monthly dividend of NKX was increased effective July 2012. The dividends of NCU, NAC and NVX remained stable throughout the period, while the dividend of NZH was reduced once during the period.

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of August 31, 2012, all of the Funds in this report had positive UNII balances, based upon our best estimate, for tax purposes and positive UNII balances for financial reporting.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings: Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4)

At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.

- (5) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (6) Variable Rate Demand Preferred Shares, at Liquidation Value as a percentage of Total Investments is 26.3%.
- N/R Not rated.
- (ETM) Escrowed to maturity.
- (IF) Inverse floating rate investment.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Inverse Floating Rate Securities for more information.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings: Using the highest of Standard & Poor’s Group (“Standard & Poor’s”), Moody’s Investors Service, Inc. (“Moody’s”) or Fitch, Inc. (“Fitch”) rating. Ratings below BBB by Standard & Poor’s, Baa by Moody’s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in inverse floating rate transactions.
- (5) At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing security, in the case of a bond, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund’s Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund’s custodian to cease accruing additional income on the Fund’s records.
- (6) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (7) MuniFund Term Preferred Shares, at Liquidation Value as a percentage of Total Investments is 32.0%.
- N/R Not rated.
- (ETM) Escrowed to maturity.
- (IF) Inverse floating rate investment.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Footnote 1 – General Information and Significant Accounting Policies, Inverse Floating Rate Securities for more information.

- (a) The amounts shown are based on Common share equivalents.
- (b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.
- Total Return Based on Common Share Net Asset Value is the combination of changes in Common share net asset value, reinvested dividend income at net asset value and reinvested capital gains

distributions at net asset value, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending net asset value. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its net asset value), and therefore may be different from the price used in the calculation. Total returns are not annualized.
