Chairman's Letter to Shareholders

Dear Shareholders,

A pattern of divergence has emerged in the past year. Steady and moderate growth in the U.S. economy helped sustain the stock market's bull run another year. U.S. bonds also performed well, amid subdued inflation, interest rates that remained unexpectedly low and concerns about the economic well-being of the rest of the world. The stronger domestic economy enabled the U.S. Federal Reserve (Fed) to gradually reduce its large scale bond purchases, known as quantitative easing (QE), without disruption to the markets, as well as beginning to set expectations for a transition into tightening mode.

The economic story outside the U.S. continues to improve. Despite the drama over Greece's debt negotiations, the European economy appears to be stabilizing. Japan is on a moderate recovery path as it emerged from recession late last quarter. China's economy decelerated and, despite running well above the rate of other major global economies, investors feared it looked slow by China's standards. Some areas of concern were a surprisingly steep decline in oil prices, the U.S. dollar's rally and an increase in geopolitical tensions, including the Russia-Ukraine crisis and terrorist attacks across the Middle East and Africa, as well as more recently in Europe.

While a backdrop of healthy economic growth in the U.S. and the continuation of accommodative monetary policy (with the central banks of Japan and Europe stepping in where the Fed has left off) bodes well for the markets, the global outlook has become more uncertain. Indeed, volatility is likely to feature more prominently in the investment landscape going forward. Such conditions underscore the importance of professional investment management. Experienced investment teams have weathered the market's ups and downs in the past and emerged with a better understanding of the sensitivities of their asset class and investment style, particularly in times of turbulence. We recognize the importance of maximizing gains, while striving to minimize volatility.

And, the same is true for investors like you. Maintaining an appropriate time horizon, diversification and relying on practiced investment teams are among your best strategies for achieving your long-term investment objectives. Additionally, I encourage you to communicate with your financial consultant if you have questions about your investment in a Nuveen Fund. On behalf of the other members of the Nuveen Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

William J. Schneider
Chairman of the Board
June 22, 2015

Portfolio Managers' Comments

Nuveen Municipal Value Fund, Inc. (NUV)
Nuveen AMT-Free Municipal Value Fund (NUW)
Nuveen Municipal Income Fund, Inc. (NMI)
Nuveen Enhanced Municipal Value Fund (NEV)

These Funds feature portfolio management by Nuveen Asset Management, LLC, an affiliate of Nuveen Investments, Inc. Portfolio managers Thomas C. Spalding, CFA, Christopher L. Drahn, CFA, and Steven M. Hlavin discuss key investment strategies and the six-month performance of these four Funds. Tom has managed NUV since its inception in 1987, adding NUW at its inception in 2009. Chris assumed portfolio management responsibility for NMI in 2011. Steve has been involved in the management of NEV since its inception in 2009, taking on full portfolio management responsibility in 2010.

What key strategies were used to manage these Funds during the six-month reporting period ended April 30, 2015?

A backdrop of supportive technical and fundamental factors helped the municipal market rally in the first half of the reporting period. However, conditions turned more volatile in the second three months. Disappointing economic data, uncertainty about the timeline for the Federal Reserve's first rate increase, an oversupply of new issuance and seasonal weakness due to tax loss selling led to greater price fluctuations within the municipal market in early 2015. In this environment, interest rates fell through January then plodded upward, ending the reporting period at nearly the same level where they began. Municipal bond prices were up modestly for the overall six-month reporting period. We continued to take a bottom-up approach to identifying sectors that appeared undervalued as well as individual credits that had the potential to perform well over the long term and helped us keep the Funds fully invested.

Much of our trading activity during the reporting period was focused on reinvesting the cash from called bonds. The decline in municipal yields and the flattening of the municipal yield curve relative to the Treasury curve helped to make refunding deals more attractive and we saw an increase in this activity during the reporting period, as bond issuers sought to lower costs through refinancings.

Buying activity in NUV and NUW was relatively muted early in the reporting period then accelerated in the latter half. NUV purchased new issues for Atlanta Georgia Water and Wastewater Revenue Bonds and Indiana Finance Authority for Indiana University Hospital, as well as emphasized other shorter duration credits with ample liquidity to help keep the Fund within its specified duration ranges.

NMI maintained the same overall positioning during this reporting period, as we continued to emphasize the lower investment grade (A- and BBB rated) segments, and sectors such as health care, which represents the Fund's largest exposure. Additionally, NMI kept its underweight allocation to state and local general obligation (GO) bonds, where we've seen relatively fewer attractive buying opportunities. Purchases during the reporting period included such names as Central Texas Turnpike System and Rush University Medical Center.

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements, and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Edgar Filing: Nuveen AMT-Free Municipal Value Fund - Form N-CSRS

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's (S&P), Moody's Investors Service, Inc. (Moody's) or Fitch, Inc. (Fitch) Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Bond insurance guarantees only the payment of principal and interest on the bond when due, and not the value of the bonds themselves, which will fluctuate with the bond market and the financial success of the issuer and the insurer. Insurance relates specifically to the bonds in the portfolio and not to the share prices of a Fund. No representation is made as to the insurers' ability to meet their commitments.

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this section.

Nuveen Investments 5

Portfolio Managers' Comments (continued)

Trading activity was relatively light in NEV, as well. We emphasized credits in the lower investment grade range, with purchases mainly in A- and BBB rated credits. During this reporting period, additions to the Fund represented a diverse group of sectors, including bonds issued for Louisiana Public Facilities Authority Cleco Power LLC, Guam Power Authority, Virgin Islands Gross Tax Receipts and Pennsylvania State Turnpike Commission.

Cash for purchases was generated primarily by proceeds from called and matured bonds, which we worked to redeploy to keep the Funds fully invested and support their income streams. We sold bonds in NEV for the Detroit City School District GOs on concerns about deteriorating credit conditions. The sale of the Detroit City School District bonds also resulted in a decrease in NEV's use of inverse floating rate securities during this reporting period, as these issues were held in a tender option bond trust.

As of April 30, 2015, all of these Funds continued to use inverse floating rate securities. We employ inverse floaters for a variety of reasons, including duration management, income enhancement and total return enhancement. As part of our duration management strategies, NEV also invested in forward interest rates swaps to help reduce price volatility risk to movements in U.S. interest rates relative to the Fund's benchmark. These swaps had a negative impact on performance.

How did the Funds perform during the six-month reporting period ended April 30, 2015?

The tables in each Fund's Performance Overview and Holding Summaries section of this report provide the Funds' total returns for the six-month, one-year, five-year, ten-year and since inception periods ended April 30, 2015. Each Fund's total returns at net asset value (NAV) are compared with the performance of a corresponding market index and Lipper classification average.

For the six months ended April 30, 2015, the total returns at NAV for all four of these Funds exceeded the return for the national S&P Municipal Bond Index. NUV, NUW and NMI outperformed the average return for the Lipper General and Insured Unleveraged Municipal Debt Funds Classification Average, while NEV surpassed the Lipper General & Insured Leveraged Municipal Debt Funds Classification Average return.

Key management factors that influenced the Funds' returns included duration and yield curve positioning, credit exposure and sector allocation. Keeping the Funds fully invested throughout the reporting period also was beneficial for performance. In addition, the use of regulatory leverage was an important positive factor affecting the Funds' performance. Leverage is discussed in more detail later in the Fund Leverage section of this report.

In this reporting period, municipal bonds with intermediate and longer maturities generally outperformed those with shorter maturities. In general, the Funds' durations and yield curve positioning were positive for performance. Consistent with our long term strategy, these Funds tended to have longer durations than the municipal market in general, with overweightings in the longer parts of the yield curve that performed well and underweightings in the underperforming shorter end of the curve. Exposure to zero coupon bonds, which typically have higher durations, was particularly beneficial. Among the four Funds, NUV had the largest weighting in zero coupon bonds, while NEV had the smallest.

During this reporting period, lower rated bonds generally outperformed higher quality bonds, as the municipal market rally continued and investors became more willing to accept risk. These Funds tended to have overweightings in A rated and BBB rated bonds and underweightings in the AAA rated and AA rated categories relative to their benchmark and credit exposure was generally positive for their performance. As with duration, differences in credit allocation accounted for some of the differences in performance. All of these Funds benefited from their lower rated holdings

during this reporting period.

Among the municipal market sectors, tobacco, health care (especially hospitals), industrial development revenue (IDR) and transportation (especially tollroads) were some of the top-performing groups during this reporting period. Tobacco bonds performed well due to their lower credit quality and the broader demand for higher yields. Health care, IDR and transportation bonds also benefited from investor demand for lower rated credits, as well as generally improving credit fundamentals across these sectors.

6 Nuveen Investments

Overweight positions in tobacco, health care and transportation bonds were the main positive drivers of performance for NUV and NUW. Also during this reporting period, Moody's upgraded Harris County-Houston Sports Authority bonds following a successful restructuring in November 2014. NUV held the bonds in its portfolio. NMI's performance benefited from a positive contribution from its broad overweight allocation to revenue (as opposed to tax-supported) bonds, most notably in the health care sector. NEV also saw gains from its overweight exposures to hospital and IDR credits, as well as benefited from an overweight position in land-backed issues and no exposure to state GOs, which was among the weakest-performing sectors during this reporting period.

As noted in the previous Shareholder Fund Report, we continue to monitor two situations in the broader municipal market for any impact on the Funds' holdings and performance: the ongoing economic problems of Puerto Rico and the City of Detroit's bankruptcy case. In terms of Puerto Rico holdings, shareholders should note that NUV and NEV had limited exposure to Puerto Rico debt, 0.34% and 1.02% respectively, while NUW and NMI did not hold any Puerto Rico bonds. The Puerto Rico credits offered higher yields, added diversification and triple exemption (i.e., exemption from most federal, state and local taxes). However, Puerto Rico's continued economic weakening, escalating debt service obligations, and long-standing inability to deliver a balanced budget led to multiple downgrades on its debt over the past two years. Puerto Rico general obligation debt is rated Caa2/CCC+/B (below investment grade) by Moody's, S&P and Fitch, respectively, with negative outlooks.

On February 6, 2015, a federal court found Puerto Rico's Recovery Act to be unconstitutional. Though the Commonwealth is pursuing an appeal of the ruling, the outcome is uncertain. Puerto Rico's non-voting Representative in Congress recently introduced legislation that would make chapter 9 bankruptcy available to the Commonwealth's public corporations. A congressional committee hearing was held on February 26, 2015, but the bill has not advanced out of committee.

In light of the evolving economic situation in Puerto Rico, Nuveen's credit analysis of the Commonwealth had previously considered the possibility of a default and restructuring of public corporations and we adjusted our portfolios to prepare for such an outcome, although no such default or restructuring has occurred to date. The Nuveen complex's entire exposure to obligations of the government of Puerto Rico and other Puerto Rico issuers totaled 0.33% of assets under management as of April 30, 2015. As of April 30, 2015, the Funds' limited exposure to Puerto Rico generally was invested in bonds that were insured, pre-refunded (and therefore backed by securities such as U.S. Treasuries), or tobacco settlement bonds. Overall, the small size of our exposures meant that our Puerto Rico holdings had a negligible impact on performance.

The second situation that we continued to monitor was the City of Detroit's filing for chapter 9 in federal bankruptcy court in July 2013. Burdened by decades of population loss, changes in the auto manufacturing industry and significant tax base deterioration, Detroit had been under severe financial stress for an extended period prior to the filing. Before Detroit could exit bankruptcy, issues surrounding the city's complex debt portfolio, numerous union contracts, significant legal questions and more than 100,000 creditors had to be resolved. By October 2014, all of the major creditors had reached an agreement on the city's plan to restructure its \$18.5 billion of debt and emerge from bankruptcy on November 7, 2014. The U.S. Bankruptcy Court approved the city's bankruptcy exit plan, thereby erasing approximately \$7 billion in debt. The settlement plan also provided for \$1.7 billion to be reinvested in the city for improved public safety, blight removal and upgraded basic services.

In August 2014, Detroit announced a tender offer for the city's water and sewer bonds, aimed at replacing some of the \$5.2 billion of existing debt with lower cost bonds. Approximately \$1.5 billion in existing water and sewer bonds were returned to the city by investors under the tender offer, which enabled Detroit to issue new water and sewer bonds, resulting in savings of \$250 million over the life of the bonds. The city also raised about \$150 million to finance sewer system improvements. As part of the deal, Detroit water and sewer bonds also were permanently removed from the city's bankruptcy case, which led to a rally in the bonds' price. The four Funds continued to hold

Detroit water and sewer bonds, and the small position sizes had an insignificant impact on performance.

Nuveen Investments

7

Fund Leverage

IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of NEV relative to its comparative benchmark was the Fund's use of leverage through its investments in inverse floating rate securities, which represent leveraged investments in underlying bonds. This was also a factor, although less significantly, for NUV, NUW and NMI because their use of leverage is more modest. The Funds use leverage because our research has shown that, over time, leveraging provides opportunities for additional income, particularly in the recent market environment where short-term market rates are at or near historical lows, meaning that the short-term rates the Fund has been paying on its leveraging instruments have been much lower than the interest the Fund has been earning on its portfolio of long-term bonds that it has bought with the proceeds of that leverage. However, use of leverage also can expose the Fund to additional price volatility. When a Fund uses leverage, the Fund will experience a greater increase in its net asset value if the municipal bonds acquired through the use of leverage increase in value, but it will also experience a correspondingly larger decline in its net asset value if the bonds acquired through leverage decline in value, which will make the Fund's net asset value more volatile, and its total return performance more variable over time. In addition, income in levered funds will typically decrease in comparison to unlevered funds when short-term interest rates increase and increase when short-term interest rates decrease. Leverage made a modest positive contribution to the performance of NUV, NUW and NMI and a positive contribution to the performance of NEV over this reporting period.

As of April 30, 2015, the Funds' percentages of leverage are as shown in the accompanying table.

	NUV	NUW	NMI	NEV
Effective Leverage*	1.89%	7.03%	8.93%	31.80%

* Effective Leverage is a Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative and other investments in a Fund's portfolio that increase the Fund's investment exposure. Currently, the leverage effects of Tender Option Bond (TOB) inverse floater holdings are included in effective leverage values.

Share Information

DISTRIBUTION INFORMATION

The following information regarding the Funds' distributions is current as of April 30, 2015. Each Fund's distribution levels may vary over time based on each Fund's investment activity and portfolio investment value changes.

During the current reporting period, each Fund's monthly distributions to shareholders were as shown in the accompanying table.

Ex-Dividend Date	Per Share Amounts								
	NUV		NUW		NMI		NEV		
November 2014	\$	0.0345	\$	0.0670	\$	0.0425	\$	0.0800	
December		0.0345		0.0670		0.0425		0.0800	
January		0.0345		0.0650		0.0425		0.0800	
February		0.0345		0.0650		0.0425		0.0800	
March		0.0345		0.0650		0.0425		0.0800	
April 2015		0.0345		0.0650		0.0425		0.0800	
Ordinary Income Distribution*	\$	0.0009	\$	0.0052	\$	0.0052	\$	0.0060	
Market Yield**		4.19	%	4.46	%	4.19	%	6.13	%
Taxable-Equivalent Yield**		5.82	%	6.19	%	5.82	%	8.51	%

* Distribution paid in December 2014.

** Market Yield is based on the Fund's current annualized monthly dividend divided by the Fund's current market price as of the end of the reporting period. Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a federal income tax rate of 28.0%. When comparing a Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield is lower.

Each Fund in this report seeks to pay regular monthly dividends out of its net investment income at a rate that reflects its past and projected net income performance. To permit each Fund to maintain a more stable monthly dividend, the Fund may pay dividends at a rate that may be more or less than the amount of net income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it will hold the excess in reserve as undistributed net investment income (UNII) as part of the Fund's net asset value. Conversely, if a Fund has cumulatively paid in dividends more than it has earned, the excess will constitute a negative UNII that will likewise be reflected in the Fund's net asset value. Each Fund will, over time, pay all its net investment income as dividends to shareholders.

As of April 30, 2015, the Funds had positive UNII balances, based upon our best estimate, for tax purposes and positive UNII balances for financial reporting purposes.

All monthly dividends paid by each Fund during the current reporting period, were paid from net investment income. If a portion of the Fund's monthly distributions was sourced from or comprised of elements other than net investment income, including capital gains and/or a return of capital, shareholders would have received a notice to that effect. For financial reporting purposes, the composition and per share amounts of each Fund's dividends for the reporting period are presented in this report's Statement of Changes in Net Assets and Financial Highlights, respectively. For income

tax purposes, distribution information for each Fund as of its most recent tax year end is presented in Note 6 — Income Tax Information within the Notes to Financial Statements of this report.

Share Information (continued)

EQUITY SHELF PROGRAMS

During the current reporting period, the following Funds were authorized to issue additional shares through their ongoing equity shelf programs. Under these programs, each Fund, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above the Fund's NAV per share. Under the equity shelf programs, the Funds are authorized to issue the following number of additional shares:

	NUW	NEV
Additional Shares Authorized	1,200,000	5,200,000

During the current reporting period, NUW sold common shares through its equity shelf program at a weighted average premium to its NAV per share as shown in the accompanying table.

	NUW
Shares Sold through Equity Shelf Program	112,069
Weighted Average Premium to NAV per Share Sold	1.35%

As of February 28, 2014, NUW's shelf offering registration statements was no longer current. Therefore, the Fund was unable to issue additional shares under its equity shelf programs until a post-effective amendment to the Fund's registration statement was filed with the Securities and Exchange Commission (the "SEC"). On January 27, 2015, a post-effective amendment to NUW's registration statement was filed with the SEC and therefore, NUW may issue additional shares under its equity shelf program.

SHARE REPURCHASES

During August 2014, the Funds' Board of Directors/Trustees reauthorized an open-market share repurchase program, allowing each Fund to repurchase an aggregate of up to approximately 10% of its outstanding shares.

As of April 30, 2015, and since the inception of the Funds' repurchase programs, the Funds have cumulatively repurchased and retired their outstanding shares as shown in the accompanying table.

	NUV	NUW	NMI	NEV
Shares Cumulatively Repurchased and Retired	0	0	0	0
Shares Authorized for Repurchase	20,565,000	1,320,000	830,000	2,110,000

OTHER SHARE INFORMATION

As of April 30, 2015, and during the current reporting period, the Funds' share prices were trading at a premium/(discount) to their NAVs as shown in the accompanying table.

	NUV		NUW		NMI		NEV	
NAV	\$ 10.20		\$ 17.16		\$ 11.48		\$ 15.62	
Share Price	\$ 9.87		\$ 17.48		\$ 12.18		\$ 15.67	
Premium/(Discount) to NAV	(3.24)%	1.86	%	6.10	%	0.32	%
6-Month Average Premium/(Discount) to NAV	(4.42)%	(0.04)%	2.64	%	(2.30)%

10 Nuveen Investments

Risk Considerations

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund shares are subject to a variety of risks, including:

Investment, Market and Price Risk. An investment in shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in shares represents an indirect investment in the municipal securities owned by the Funds, which generally trade in the over-the-counter markets. Shares of closed-end investment companies like these Funds frequently trade at a discount to their net asset value (NAV). Your shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

Leverage Risk. Each Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful. Certain aspects of the recently adopted Volcker Rule may limit the availability of tender option bonds, which are used by the Funds for leveraging and duration management purposes. The effects of this new Rule, expected to take effect in mid-2015, may make it more difficult for a Fund to maintain current or desired levels of leverage and may cause the Fund to incur additional expenses to maintain its leverage.

Inverse Floater Risk. The Funds may invest in inverse floaters. Due to their leveraged nature, these investments can greatly increase a Fund's exposure to interest rate risk and credit risk. In addition, investments in inverse floaters involve the risk that the Fund could lose more than its original principal investment.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Reinvestment Risk. If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

Call Risk or Prepayment Risk. Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

Derivatives Strategy Risk: Derivative securities, such as calls, puts, warrants, swaps and forwards, carry risks different from, and possibly greater than, the risks associated with the underlying investments.

Municipal Bond Market Liquidity Risk. Inventories of municipal bonds held by brokers and dealers have decreased in recent years, lessening their ability to make a market in these securities. This reduction in market making capacity has the potential to decrease a Fund's ability to buy or sell bonds, and increase bond price volatility and trading costs, particularly during periods of economic or market stress. In addition, recent federal banking regulations may cause certain dealers to reduce their inventories of municipal bonds, which may further decrease a Fund's ability to buy or sell bonds. As a result, the Fund may be forced to accept a lower price to sell a security, to sell other securities to raise cash, or to give up an investment opportunity, any of which could have a negative effect on performance. If the Fund

needed to sell large blocks of bonds, those sales could further reduce the bonds' prices and hurt performance.

NUV

Nuveen Municipal Value Fund, Inc.

Performance Overview and Holding Summaries as of April 30, 2015

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this section.

Average Annual Total Returns as of April 30, 2015

	Cumulative 6-Month	1-Year	Average Annual 5-Year	10-Year
NUV at NAV	1.94%	6.83%	5.92%	4.94%
NUV at Share Price	4.57%	6.36%	4.78%	5.69%
S&P Municipal Bond Index	1.27%	4.86%	4.92%	4.63%
Lipper General & Insured Unleveraged Municipal Debt Funds Classification Average	1.79%	6.76%	5.71%	4.82%

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares. Returns at NAV are net of Fund expenses, and assume reinvestment of distributions. Comparative index and Lipper return information is provided for the Fund's shares at NAV only. Indexes and Lipper averages are not available for direct investment.

NUW

Nuveen AMT-Free Municipal Value Fund
Performance Overview and Holding Summaries as of April 30, 2015

Refer to the Glossary of Terms Used in this Report for further definition of the terms used within this section.

Average Annual Total Returns as of April 30, 2015

	Cumulative		Average Annual	
	6-Month	1-Year	5-Year	Since Inception
NUW at NAV	2.14%	7.26%	6.15%	8.41%
NUW at Share Price	5.89%	11.06%	6.59%	8.02%
S&P Municipal Bond Index	1.27%	4.86%	4.92%	5.92%
Lipper General & Insured Unleveraged Municipal Debt Funds Classification Average	1.79%	6.76%	5.71%	6.36%

Since inception returns are from 2/25/09. Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares. Returns at NAV are net of Fund expenses, and assume reinvestment of distributions. Comparative index and Lipper return information is provided for the Fund's shares at NAV only. Indexes and Lipper averages are not available for direct investment.

Edgar Filing: Nuveen AMT-Free Municipal Value Fund - Form N-CSRS

This data relates to the securities held in the Fund's portfolio of investments as of the end of the reporting period. It should not be construed as a measure of performance for the Fund itself. Holdings are subject to change.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's Group, Moody's Investors Service, Inc. or Fitch, Inc. Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below-investment grade ratings. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.
