**PRESS RELEASE**

**Veolia Environnement announces sale of Culligan for \$610 million**

**North American disposal program announced in September 2003 completed totaling \$1.9 billion**

Paris, July 22<sup>nd</sup>, 2004

Veolia Environnement (Euronext: VIE and NYSE: VE), announces today it has entered into a definitive agreement for the sale of its Culligan business to private equity firm Clayton Dubilier & Rice, for total consideration of \$610 million in cash. The transaction, which is expected to be completed in the fourth quarter of 2004, is subject only to applicable regulatory approvals and other customary closing conditions.

The sale represents the final step in the implementation of the strategic refocusing of Veolia Environnement's water operations in North America, which was originally announced in September 2003. The disposal of Culligan (following the sale of Everpure in late 2003 to Pentair, the sale of farmlands held by USFilter in California in the first half of 2004, and the sale USFilter's systems and services businesses to Siemens announced in the first half of 2004) reflects Veolia Environnement's strategy to focus its development on outsourcing services and long-term contracts for both municipalities and industrial companies. The total proceeds generated from these sales, including \$215 million for the disposal of Everpure that was completed in 2003, amount to approximately \$1.9 billion.

Veolia Environnement will remain an important player in environmental services in North America. It currently anticipates that it may generate 2004 revenue in North America of approximately \$2.5 billion after those disposals, including approximately \$1.4 billion in Waste Management, \$0.7 billion in Water and \$0.4 billion in Transportation.

Veolia Environnement (Paris Euronext: VIE et NYSE: VE), is the leading provider of environmental services to municipalities and industrial companies worldwide. The company has global operations in four core business areas: Water, Waste, Energy Services and Transportation. In 2003, Veolia Environnement generated consolidated revenue of 28.6 billion euros (\$36.1 billion).
