NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Business and Significant Accounting Policies

Business and company formation

Solitario Zinc Corp. (“Solitario” or the “Company”) is an exploration stage company as defined in Industry Guide 7, as issued by the United States Securities and Exchange Commission (“SEC”). Solitario was incorporated in the state of Colorado on November 15, 1984 as a wholly-owned subsidiary of Crown Resources Corporation (“Crown”). In July 1994, Solitario became a publicly traded company on the Toronto Stock Exchange (the “TSX”) through its initial public offering. Solitario has been actively involved in mineral exploration since 1993. Solitario’s primary business is to acquire exploration mineral properties or royalties and/or discover economic deposits on its mineral properties and advance these deposits, either on its own or through joint ventures, up to the development stage. At that point, or sometime prior to that point, Solitario would likely attempt to sell its mineral properties, pursue their development either on its own, or through a joint venture with a partner that has expertise in mining operations, or create a royalty with a third party that continues to advance the property. Although Solitario has owned exploration projects in both precious and base metals in the past, Solitario has shifted its primary focus to the acquisition and exploration of zinc-related exploration mineral properties since the Acquisition (defined below). However, Solitario may still evaluate and / or acquire other precious metal projects as part of its overall mineral property activity. In addition to focusing on its mineral exploration properties and the evaluation of mineral properties for acquisition or purchase of royalty interests, Solitario also evaluates potential strategic transactions for the acquisition of new precious and base metal properties and assets with exploration potential or business combinations that Solitario determines to be favorable to Solitario.

Solitario has recorded revenue from the sale of mineral property, including the sale on April 26, 2018 of its interest in the royalty on the Yanacocha property (discussed below) and the sale in 2015 of its former interest in Mount Hamilton LLC (“MH-LLC”) the owner of its former Mt. Hamilton project (the “Mt. Hamilton Transaction”), and joint venture property payments and the sale of a royalty on its former Mt. Hamilton project. Revenues from the sale or joint venture of properties or assets, although significant when they occur, have not been a consistent annual source of revenue and would only occur in the future, if at all, on an infrequent basis.

Solitario currently considers its carried interest in the Florida Canyon project and its interest in the Lik project to be its core mineral property assets. Solitario’s joint venture partner is expected to continue the development and furtherance of the Florida Canyon project and Solitario is monitoring progress at Florida Canyon. Solitario is working with its 50% joint venture partner, Teck American Incorporated, a wholly-owned subsidiary of Teck Resources Limited (both

companies referred to as “Teck”), in the Lik deposit to further the exploration and evaluate potential development plans for the Lik project.

As of June 30, 2018, Solitario has significant balances of cash and short-term investments that Solitario anticipates using, in part, to further the development of the Florida Canyon and Lik projects and to potentially acquire additional mineral property assets. The fluctuations in precious metal and other commodity prices contribute to a challenging environment for mineral exploration and development, which has created opportunities as well as challenges for the potential acquisition of early-stage and advanced mineral exploration projects or other related assets at potentially attractive terms.

The accompanying interim condensed consolidated financial statements of Solitario for the three and six months ended June 30, 2018 are unaudited and are prepared in accordance with accounting principles generally accepted in the United States of America (“generally accepted accounting principles”). They do not include all disclosures required by generally accepted accounting principles for annual financial statements, but in the opinion of management, include all adjustments, consisting only of normal recurring items, necessary for a fair presentation. Interim results are not necessarily indicative of results, which may be achieved in the future or for the full year ending December 31, 2018.

These financial statements should be read in conjunction with the financial statements and notes thereto which are included in Solitario’s Annual Report on Form 10-K for the year ended December 31, 2017. The accounting policies set forth in those annual financial statements are the same as the accounting policies utilized in the preparation of these financial statements, except as modified for appropriate interim financial statement presentation.

Table of Contents

Recent Developments

Sale of the Yanacocha Royalty

On April 26, 2018 Solitario sold its royalty interest in the non-producing Yanacocha property (the “Yanacocha Royalty”) to a wholly owned subsidiary of Newmont Mining Corporation (“Newmont”) for approximately US\$502,000 in cash. The Yanacocha Royalty covered 43 concessions totaling 36,052 hectares. Newmont owns the underlying mineral concessions covered by the Yanacocha Royalty. None of the concessions covered by the Yanacocha Royalty have any reported reserves or resources. Solitario had no mineral property capitalized cost in the Yanacocha Royalty and recorded Mineral Property Revenue of \$502,000 during the three and six months ended June 30, 2018.

Purchase of Zazu

On July 12, 2017, Solitario completed the acquisition of Zazu Metals Corp. (“Zazu”) pursuant to a definitive arrangement agreement between Solitario and Zazu whereby Solitario agreed to acquire all the issued and outstanding common shares of Zazu (the “Zazu Shares”) by way of a statutory plan of arrangement (the “Arrangement”) under the *Canada Business Corporations Act* (the “Acquisition”). The Arrangement was approved by the Ontario (Canada) Superior Court of Justice on July 7, 2017. Per the Arrangement, Solitario issued 19,788,177 shares of its common stock on July 12, 2017 in exchange for all of the issued and outstanding Zazu Shares, which represented 0.3572 shares of Solitario common stock for each outstanding Zazu Share. Zazu had one primary asset, its interest in the Lik project, and the Acquisition was treated as an asset purchase in accordance with Financial Accounting Standard Board (“FASB”) Accounting Standards Update (“ASU”) No. 2017-01 “Business Combinations.” Solitario granted stock options to acquire an aggregate of 1,782,428 shares of Solitario common stock to Zazu option holders the (“Replacement Options”) in connection with the Acquisition. The total purchase price of \$16,110,000 was recorded during the year ended December 31, 2017.

Financial reporting

The condensed consolidated financial statements include the accounts of Solitario and its wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation. The consolidated financial statements are prepared in accordance with generally accepted accounting principles and are expressed in U.S. dollars.

Revenue recognition

Solitario adopted ASU 2014-09 (defined below under “Recent accounting pronouncements”) on January 1, 2018. ASU 2014-09 primarily impacts revenue recognition based upon the timing of transfer of control of goods and services sold. Solitario’s recorded the revenue of \$502,000 from the sale of the Yanacocha Royalty in accordance with ASU 2014-09. Payments received for the sale of property interests are recorded as a reduction of the related property's capitalized cost. Proceeds from the sale of properties which exceed the capitalized cost of the property without reserves are recognized as revenue. Payments received on the sale of properties with reserves are recognized as revenue to the extent the proceeds exceed the proportionate basis in the assets sold. Solitario records delay rental payments as revenue in the period received. There were no delay rentals in the periods presented.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Some of the more significant estimates included in the preparation of Solitario's financial statements pertain to: (i) Solitario’s carrying value of short-term investments; (ii) the recoverability of mineral properties related to its mineral exploration properties and their future exploration potential; (iii) the fair value of stock option grants to employees, to officers and directors and to others; (iv) the ability of Solitario to realize its deferred tax assets; and (v) Solitario's investment in marketable equity securities.

Table of Contents

In performing its activities, Solitario has incurred certain costs for mineral properties. The recovery of these costs is ultimately dependent upon the sale of mineral property interests or the development of economically recoverable ore reserves, the ability of Solitario or its joint venture partners to obtain the necessary permits and financing to successfully place the properties into production, and upon future profitable operations, none of which is assured.

Cash equivalents

Cash equivalents include investments in highly liquid money-market securities with original maturities of three months or less when purchased. As of June 30, 2018, a portion of Solitario's cash and cash equivalents are held in brokerage accounts and foreign banks, which are not covered under the Federal Deposit Insurance Corporation ("FDIC") rules for the United States.

Short-term investments

As of June 30, 2018, Solitario has \$9,424,000 of its current assets in USTS with maturities ranging from 15 days to 22 months. The USTS are recorded at their fair value, based upon quoted market prices. As of June 30, 2018, Solitario has \$1,247,000 in separate bank certificates of deposit ("CDs") each with a maximum value of \$250,000, and each of which are covered by FDIC insurance to the full-face value of the CDs. At June 30, 2018, these CDs have maturities of between one and nine months. At June 30, 2018 Solitario has \$450,000 in two CD's with a Peruvian bank with a maturity of two and three months, respectively. Solitario's short-term investments are recorded at their fair value, based upon quoted market prices. The short-term investments are highly liquid and may be sold in their entirety at any time at their quoted market price and are classified as a current asset.

Mineral properties

Solitario expenses all exploration costs incurred on its mineral properties prior to the establishment of proven and probable reserves through the completion of a feasibility study. Initial acquisition costs of Solitario's mineral properties are capitalized. Solitario capitalizes all of its development expenditures on its projects, subsequent to the completion of a feasibility study. Solitario regularly performs evaluations of its investment in mineral properties to assess the recoverability and/or the residual value of its investments in these assets. All long-lived assets are reviewed for impairment whenever events or circumstances change which indicate the carrying amount of an asset may not be recoverable, utilizing established guidelines based upon undiscounted future net cash flows from the asset or upon the determination that certain exploration properties do not have sufficient potential for economic mineralization.

Derivative instruments

Solitario accounts for its derivative instruments in accordance with Accounting Standards Codification (“ASC”) No. 815, "Accounting for Derivative Instruments and Hedging Activities" (“ASC 815”). Solitario has entered into covered calls from time to time on its investment in Kinross Gold Corporation (“Kinross”) marketable equity securities. In addition, during 2017, Solitario owned warrants exercisable to acquire shares of Vendetta Mining Corp. (“Vendetta”) common stock (the “Vendetta Warrants”). Each Vendetta Warrant allowed Solitario to purchase one share of Vendetta common stock at a price of Cdn\$0.10 per share for a period of two years. At June 30, 2018, Solitario no longer owned any Vendetta Warrants. Solitario has not designated its covered calls as hedging instruments and any changes in the fair value of the covered calls and the Vendetta Warrants are recognized in the statement of operations in the period of the change as gain or loss on derivative instruments.

Fair value

FASB ASC 820, “Fair Value Measurements and Disclosures” (“ASC 820”), establishes a framework for measuring fair value and requires enhanced disclosures about fair value measurements. ASC 820 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. For certain of Solitario's financial instruments, including cash and cash equivalents and accounts payable, the carrying amounts approximate fair value due to their short-term maturities. Solitario's short-term investments in USTS and CDs, its marketable equity securities and any covered call options against those marketable equity securities are carried at their estimated fair value based on quoted market prices.

Table of Contents

Marketable equity securities

Solitario's investments in marketable equity securities are classified as available-for-sale and are carried at fair value, which is based upon quoted prices of the securities owned. Solitario records investments in marketable equity securities as available-for-sale for investments in publicly traded marketable equity securities for which it does not exercise significant control and where Solitario has no representation on the board of directors of those companies and exercises no control over the management of those companies. The cost of marketable equity securities sold is determined by the specific identification method. During the first six months of 2018 Solitario adopted ASU 2016-01, "Financial Instruments – Recognition and Measurement of Financial Assets and Financial Liabilities (Topic 825)" ("ASU 2016-01"). In accordance with ASU 2016-01, changes in fair value are recorded in the consolidated statement of operations during the period of the change. During the first six months of 2018 Solitario recorded a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption of ASU 2016-01. See Note 9, "Shareholders' Equity and Other Comprehensive Income", below.

Foreign exchange

The United States dollar is the functional currency for all of Solitario's foreign subsidiaries. Although Solitario's South American exploration activities during 2017 and the first half of 2018 have been conducted primarily in Peru, a portion of the payments under the land, leasehold and exploration agreements of Solitario are denominated in United States dollars. Realized foreign currency gains and losses are included in the results of operations in the period in which they occur.

Income taxes

Solitario accounts for income taxes in accordance with ASC 740, "Accounting for Income Taxes" ("ASC 740"). Under ASC 740, income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes related to certain income and expenses recognized in different periods for financial and income tax reporting purposes. Deferred tax assets and liabilities represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Deferred taxes are also recognized for operating losses and tax credits that are available to offset future taxable income and income taxes, respectively. A valuation allowance is provided if it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Accounting for uncertainty in income taxes

ASC 740 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements. ASC 740 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. ASC 740 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. ASC 740 provides that a company's tax position will be considered settled if the taxing authority has completed its examination, the company does not plan to appeal, and it is remote that the taxing authority would reexamine the tax position in the future. The provisions of ASC 740 had no effect on Solitario's financial position or results of operations.

Earnings per share

The calculation of basic and diluted earnings (loss) per share is based on the weighted average number of shares of common stock outstanding during the three and six months ended June 30, 2018 and 2017. Potentially dilutive shares related to outstanding common stock options exercisable to acquire 4,025,228 Solitario common shares for the three and six months ended June 30, 2018 were excluded from the calculation of diluted earnings (loss) per share because the effects were anti-dilutive. There were no similar potentially dilutive securities outstanding during the three and six months ended June 30, 2017.

Table of Contents

Employee stock compensation and incentive plans

Solitario classifies all of its stock options as equity options in accordance with the provisions of ASC 718, “Compensation – Stock Compensation.”

Recent accounting pronouncements

In May 2014, the FASB issued Accounting Standards Update ("ASU") 2014-09, *Revenue from Contracts with Customers (Topic 606)*, (“ASU 2014-09”), which amended the existing accounting standards for revenue recognition. ASU No. 2014-09 establishes principles for recognizing revenue upon an entity’s determination for the transfer of promised goods or services to customers, in an amount that reflects the expected consideration received in exchange for those goods or services. ASU 2014-09 is effective for annual reporting periods beginning after December 15, 2017. ASU 2014-09 also requires additional disclosure about the nature, timing and uncertainty of revenue and cash flow arising from customer contracts. The amendments may be applied retrospectively to each prior period (full retrospective) or retrospectively with the cumulative effect recognized as of the date of initial application (modified retrospective). Solitario adopted ASU 2014-09 on January 1, 2018. Solitario applied the full retrospective approach in the adoption of ASU 2014-09, which had no impact on its previously issued consolidated financial statements as Solitario had no recorded revenue or pending contracts for the sale of property, goods or services for the comparative prior periods presented as of January 1, 2018.

In February 2016, the FASB issued ASU 2016-02, “Leases” (“ASU 2016-02”), which will require lessees to recognize a right-of-use asset and a lease liability for all leases that are not short-term in nature. For a lessor, the accounting applied is also largely unchanged from previous guidance. The new rules will be effective for Solitario in the first quarter of 2019. Solitario does not anticipate early adoption. Solitario does not expect the adoption of ASU 2016-02 to materially change its current accounting methods and therefore it does not expect the adoption to have a material impact on its consolidated financial position or results of operations.

In January 2016 the FASB issued ASU 2016-01, “Financial Instruments – Overall (subtopic 825-10) Recognition and Measurement of Financial Assets and Liabilities,” (“ASU 2016-01”). ASU 2016-01 revises the classification and measurement of investment in certain equity investments and the presentation of certain fair value changes for certain financial liabilities measured at fair value. ASU 2016-01 requires the change in fair value of many equity investments to be recognized in net income. ASU 2016-01 is effective for interim and annual periods beginning after December 15, 2017, with early adoption permitted. Solitario adopted ASU 2016-01 in the first quarter of 2018. Solitario recorded a cumulative-effect adjustment for the change in accounting principle to retained earnings of \$576,000 related to the adoption of ASU 2016-01. See Note 9, “Shareholders’ Equity and Accumulated Other Comprehensive Income,” below.

In February 2018, the FASB issued ASU 2018-02, “Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income” (ASU 2018-02), which allows for a reclassification from accumulated other comprehensive income or loss to retained earnings or accumulated deficit for stranded tax effects resulting from the Tax Cuts and

Jobs Act of 2017 (“TCJA”). ASU 2018-02 also requires certain related disclosures. ASU 2018-02 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2018 and should be applied either in the period of adoption or retrospectively to each period in which the effect of the change in the U.S. federal corporate income tax rate in the TCJA is recognized. Early adoption is permitted. Solitario is currently evaluating the impact of ASU 2018-02 but does not believe it will have a material effect on Solitario’s financial position or results of operations.

Table of Contents**2. Mineral Property**

The following table details Solitario's investment in Mineral Property:

(in thousands)	June 30, 2018	December 31, 2017
Exploration		
Lik project (Alaska – US)	\$15,611	\$15,611
La Promesa (Peru)	6	6
Montana Royalty property (US)	40	40
Total exploration mineral property	\$15,657	\$15,657

All exploration costs on our exploration properties, none of which have proven and probable reserves, including any additional costs incurred for subsequent lease payments or exploration activities related to our projects are expensed as incurred.

Exploration expense

The following items comprised exploration expense:

(in thousands)	Three months ended June 30, 2018 2017		Six months ended June 30, 2018 2017	
Geologic and field expenses	\$21	\$99	\$45	\$121
Administrative	141	89	297	218
Total exploration costs	\$162	\$188	\$342	\$339

Asset Retirement Obligation

In connection with the Acquisition, Solitario recorded an asset retirement obligation of \$125,000 for Solitario's estimated reclamation cost of the existing disturbance at the Lik project. This disturbance consists of an exploration camp including certain drill sites and access roads at the camp. The estimate was based upon estimated cash costs for reclamation as determined by the permitting bond required by the State of Alaska, for which Solitario has purchased a reclamation bond insurance policy in the event Solitario or its 50% joint venture partner, Teck, does not complete

required reclamation.

Solitario has not applied a discount rate to the recorded asset retirement obligation as the estimated time frame for reclamation is not currently known, as reclamation is not expected to occur until the end of the Lik project life, which would follow future development and operations, the start of which cannot be estimated or assured at this time. Additionally, no depreciation will be recorded on the related asset for the asset retirement obligation until the Lik project goes into operation, which cannot be assured.

3. Marketable Equity Securities

Solitario's investments in marketable equity securities are classified as available-for-sale and are carried at fair value, which is based upon quoted prices of the securities owned. The cost of marketable equity securities sold is determined by the specific identification method. Changes in market value are recorded in the consolidated statement of operations. During the three and six months ended June 30, 2018, Solitario recorded an unrealized loss on marketable equity securities of \$222,000 and \$663,000, respectively. During the three and six months ended June 30, 2017, Solitario recorded an unrealized gain on marketable equity securities of \$333,000 and \$461,000, respectively.

On May 2, 2016 Solitario purchased 7,240,000 units of Vendetta for aggregate consideration of \$289,000. Each unit included one common share of Vendetta and one Vendetta Warrant. The total purchase price for the units of \$289,000 was allocated between the Vendetta common shares and the Vendetta Warrants based upon total fair values on the date of purchase. The Vendetta common shares were allocated a purchase cost of \$186,000 and the Vendetta Warrants were allocated a purchase cost of \$103,000. During the six months ended June 30, 2017, Solitario sold 1,480,000 common shares of Vendetta for proceeds of \$259,000, and a recorded cost of \$38,000. In addition, during the six months ended June 30, 2017 Solitario exercised 2,240,000 of the Vendetta Warrants it held and received 2,240,000 Vendetta common shares, by paying \$167,000 (Cdn\$224,000) to Vendetta. The cost of the common shares received from the exercise of the Vendetta Warrants was recorded based upon the total of the (i) exercise price of the Vendetta Warrants exercised, \$167,000, and (ii) the fair value of the Vendetta Warrants on the date of exercise, which equaled their intrinsic value, \$309,000, for a total value of \$476,000. During 2017, subsequent to June 30, 2017, Solitario exercised its remaining 5,000,000 Vendetta Warrants by paying \$441,000 and owns 11,000,000 common shares of Vendetta and no Vendetta Warrants as of June 30, 2018 and December 31, 2017.

Table of Contents

The following tables summarize Solitario's marketable equity securities and adjustments to fair value:

(in thousands)	June 30, 2018	December 31, 2017
Marketable equity at cost	\$1,714	\$ 1,714
Unrealized gain on marketable equity securities	266	929
Marketable equity securities at fair value	\$1,980	\$ 2,643

The following table represents changes, including sales, in marketable equity securities during the three and six months ended June 30, 2018 and 2017:

(in thousands)	Three months ended June 30, 2018		Six months ended June 30, 2017	
Cost of marketable equity securities sold	\$—	\$—	\$—	\$38
Realized gain on marketable equity securities sold	—	—	—	221
Proceeds from the sale of marketable equity securities sold	—	—	—	(259)
Purchase of marketable equity securities	—	—	—	477
Gross unrealized (loss) gain recorded in the statement of operations	(222)	333	(663)	461
Change in marketable equity securities at fair value	\$(222)	\$333	\$(663)	\$679

4. Other Assets

The following items comprised other assets:

(in thousands)	June 30, 2018	December 31, 2017
Furniture and fixtures, net of accumulated depreciation	\$37	\$ 31
Lik project equipment, net of accumulated depreciation	80	90
Exploration bonds and other assets	4	4
Total other assets	\$121	\$ 125

5. Derivative Instruments

Vendetta Warrants

During the six months ended June 30, 2017, Solitario exercised 2,240,000 of the Vendetta Warrants it held and received 2,240,000 Vendetta common shares, by paying \$167,000 (Cdn\$224,000) to Vendetta. As a result, as of June 30, 2017, Solitario owned 5,000,000 Vendetta Warrants, which were carried at fair value, based upon a Black-Scholes model. During the three and six months ended June 30, 2017, Solitario recorded a gain on derivative instruments of \$99,000 and \$247,000, respectively, related to the Vendetta Warrants. Solitario owned no Vendetta Warrants during the three and six months ended June 30, 2018. See Note 3, “Marketable equity securities,” above.

Covered Call Options

From time to time Solitario has sold covered call options against its holdings of Kinross. The business purpose of selling covered calls is to provide additional liquidity on a limited portion of shares of Kinross that Solitario may sell in the near term, which is generally defined as less than one year. Solitario has not designated its covered calls as hedging instruments and records gains or loss on the covered call in the period of the change.

Table of Contents

Solitario recorded the following gain on derivative instruments:

(in thousands)	Three months ended June 30, 2018	Six months ended June 30, 2017
Gain on Kinross calls	\$— \$14	\$— \$38
Gain on Vendetta Warrants	— 99	— 247
	\$— \$113	\$— \$285

6. Fair Value

For certain of Solitario's financial instruments, including cash and cash equivalents and payables, the carrying amounts approximate fair value due to their short-term maturities. Solitario's short-term investments in CDs and USTS, Kinross covered calls and marketable equity securities are carried at their estimated fair value primarily based on quoted market prices.

Solitario accounts for its financial instruments under ASC 820. ASC 820 establishes a framework for measuring fair value and requires enhanced disclosures about fair value measurements. ASC 820 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. ASC 820 also requires disclosure about how fair value is determined for assets and liabilities and establishes a hierarchy for which these assets and liabilities must be grouped, based on significant levels of inputs as follows:

Level 1: quoted prices in active markets for identical assets or liabilities;

Level 2: quoted prices in active markets for similar assets and liabilities and inputs that are observable for the asset or liability; or

Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

The determination of where assets and liabilities fall within this hierarchy is based upon the lowest level of input that is significant to the fair value measurement. During the three and six months ended June 30, 2018 there were no reclassifications in financial assets or liabilities between Level 1, 2 or 3 categories.

Edgar Filing: SOLITARIO ZINC CORP. - Form 10-Q

The following is a listing of Solitario's financial assets and liabilities required to be measured at fair value on a recurring basis and where they are classified within the hierarchy as of June 30, 2018:

(in thousands)	Level 1	Level 2	Level 3	Total
Assets				
Marketable equity securities	\$ 1,980	\$ —	\$ —	\$ 1,980
United States Treasury securities	9,424	—	—	9,424
Bank Certificates of Deposit	1,697	—	—	1,697

The following is a listing of Solitario's financial assets and liabilities required to be measured at fair value on a recurring basis and where they are classified within the hierarchy as of December 31, 2017:

(in thousands)	Level 1	Level 2	Level 3	Total
Assets				
Marketable equity securities	\$2,643	\$ —	\$ —	\$2,643
United States Treasury securities	10,395	—	—	10,395
Bank Certificates of Deposit	1,247	—	—	1,247

Table of Contents

7. Income Taxes

Solitario accounts for income taxes in accordance with ASC 740. Under ASC 740, income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes related to certain income and expenses recognized in different periods for financial and income tax reporting purposes. Deferred tax assets and liabilities represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled. Deferred taxes are also recognized for operating losses and tax credits that are available to offset future taxable income and income taxes, respectively. A valuation allowance is provided if it is more likely than not that some portion or all of the deferred tax assets will not be realized.

At June 30, 2018 and December 31, 2017, a valuation allowance has been recorded, which fully offsets Solitario's net deferred tax assets, because it is more likely than not that the Company will not realize some portion or all of its deferred tax assets. The Company continually assesses both positive and negative evidence to determine whether it is more likely than not that the deferred tax assets can be realized prior to their expiration.

During the three and six months ended June 30, 2018 and 2017, Solitario recorded no deferred tax expense.

8. Employee Stock Compensation Plans

On June 18, 2013, Solitario's shareholders approved the 2013 Solitario Exploration & Royalty Corp. Omnibus Stock and Incentive Plan (the "2013 Plan"). Under the terms of the 2013 Plan, a total of 1,750,000 shares of Solitario common stock were reserved for awards to directors, officers, employees and consultants. On June 29, 2017, Solitario shareholders approved an amendment to the 2013 Plan, which increased the number of shares of common stock available for issuance under the 2013 Plan from 1,750,000 to 5,750,000. Awards granted under the 2013 Plan may take the form of stock options, stock appreciation rights, restricted stock, and restricted stock units. The terms and conditions of the awards are pursuant to the 2013 Plan and are granted by the Board of Directors or a committee appointed by the Board of Directors.

As of June 30, 2018, and December 31, 2017, there were options outstanding that are exercisable to acquire 4,025,228 and 1,928,428 shares of Solitario common stock, respectively. These options have exercise prices between \$0.62 per share and \$1.96 per share. Of these, 1,425,228 options are Replacement Options granted in connection with the Acquisition. During the three and six months ended June 30, 2018, 357,200 Replacement Options with an exercise price of \$2.24 per share expired unexercised. During the six months ended June 30, 2018, Solitario granted options exercisable to acquire 100,000 shares to a consultant, with an exercise price of \$0.62 per share, a term of seven months and having a grant date fair value of \$12,000 based upon a Black-Scholes model with a 66% volatility and a 1% risk-free interest rate. There were no stock grants during the three and six months ended June 30, 2017. There

were no exercises of options under the 2013 Plan during the three and six months ended June 30, 2018 and 2017. During the three and six months ended June 30, 2018, Solitario recorded non-cash stock option compensation expense of \$432,000 and \$442,000, respectively. Solitario had no stock options outstanding and recorded no stock option compensation expense during the three and six months ended June 30, 2017.

On September 1, 2017, the Board of Directors granted, subject to shareholder approval at the next meeting of shareholders, 2,300,000 stock options under the 2013 Plan to officers and members of the Board of Directors (the “Conditional Options”). The Conditional Options were approved at Solitario’s annual meeting on June 19, 2018. The Conditional Options have a five-year life, an exercise price of \$0.77 per share, and a grant date fair value of \$970,000, based upon a Black-Scholes model with a volatility of 64%, and a risk-free interest rate of 1.70%. The Conditional Options vest on the schedule of 25% on date of approval of the grant (June 19, 2018) and 25% on each of the next three anniversary dates of the date of grant (September 1, 2018, 2019 and 2020). Included in the stock options compensation expense during the three and six months ended June 30, 2018, discussed above, Solitario recorded stock option compensation expense of \$422,000 for the vested portion of the Conditional Options approved during the period.

Table of Contents**9. Shareholders' Equity and Accumulated Other Comprehensive Income**

(in thousands, except Share amounts)	Common Stock Shares	Common Stock Amount	Additional Paid-in Capital	Accumulated Deficit	Accumulated Other Comprehensive Income	Total Shareholders' Equity
Balance at December 31, 2017	58,434,566	584	\$ 69,312	\$ (40,343)	\$ 576	\$ 30,129

Solitario adopted ASU 2016-01 in the first quarter of 2018. Solitario recorded a cumulative-effect adjustment for the change in accounting principle to retained earnings of \$576,000 on January 1, 2018 related to the adoption of ASU 2016-01. In addition, as a result of the adoption of ASU 2016-01, Solitario (i) eliminated its previously recorded gain on sale of marketable equity securities of nil and \$221,000, respectively, in its consolidated statement of operations for the three months and six months ended June 30, 2017, and (ii) eliminated its previously recorded income tax benefit of \$89,000 for the three and six months ended June 30, 2017, which resulted in an adjusted unrealized gain on marketable equity securities of \$333,000 and \$461,000, respectively, for the three and six months ended June 30, 2017. These changes reduced the net loss for the three months ended June 30, 2017 from \$517,000 to \$273,000 and reduced the net loss for the six months ended June 30, 2017 to \$379,000 from \$530,000. These changes as a result of the adoption of ASU 2016-01 were similarly reflected in the adjustments to net income and marketable equity securities in the statement of cash flows for the three and six months ended June 30, 2017.

Share Repurchase Program

On October 28, 2015, Solitario's Board of Directors approved a share repurchase program that authorized Solitario to purchase up to two million shares of its outstanding common stock. During 2017, Solitario's Board of Directors extended the expiration date of the share repurchase program through December 31, 2018. During the three months ended June 30, 2018 and 2017, Solitario purchased 92,586 and 30,300 shares of Solitario common stock, respectively, for an aggregate purchase price of \$39,000 and \$22,000, respectively. During the six months ended June 30, 2018 and

2017, Solitario purchased 145,200 and 39,700 shares of Solitario common stock, respectively, for an aggregate purchase price of \$65,000 and \$28,000, respectively. As of June 30, 2018, Solitario has purchased a total of 813,000 shares for an aggregate purchase price of \$413,000 under the share repurchase program since its inception.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the information contained in the consolidated financial statements of Solitario for the years ended December 31, 2017 and 2016, and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Solitario's Annual Report on Form 10-K for the year ended December 31, 2017. Solitario's financial condition and results of operations are not necessarily indicative of what may be expected in future periods. Unless otherwise indicated, all references to dollars are to U.S. dollars.

(a) Business Overview and Summary

We are an exploration stage company under Industry Guide 7, as issued by the SEC with a focus of the acquisition of precious and base metal properties with exploration potential and the development or purchase of royalty interests. Upon the completion of the Acquisition, we have shifted our primary focus toward the acquisition and exploration of zinc-related exploration mineral properties. However, we will continue to evaluate other mineral properties for acquisition and hold a portfolio of mineral exploration properties and assets for future sale, joint venture or to create a royalty prior to the establishment of proven and probable reserves. Although our mineral properties may be developed in the future by us, through a joint venture or by a third party, we have never developed a mineral property. In addition to focusing our mineral exploration properties and the evaluation of mineral properties for acquisition or purchase of royalty interests, we also evaluate strategic transactions for the acquisition of new precious and base metal properties and assets with exploration potential.

We have recorded revenue in the past from the sale of mineral properties, including the sale of our Yanacocha Royalty on April 26, 2018 for \$502,000, and the sale of our interest in MH-LLC during 2015, and from joint venture property payments and the sale of a royalty on our former Mt. Hamilton property. Proceeds from the sale or joint venture of our properties, although significant, have not historically been a consistent source of cash or revenue and would occur, if at all, on an infrequent basis in the future. We have reduced our exposure to the costs of our exploration activities in the past through the use of joint ventures. Although we anticipate the use of joint venture funding for some of our exploration activities will continue for the foreseeable future, we can provide no assurance that these or other sources of capital will be available in sufficient amounts to meet our needs, if at all.

We currently consider our carried interest in our Florida Canyon project in Peru and our interest in the Lik project in Alaska to be our core mineral property assets. We expect our joint venture partner will continue the exploration development and furtherance of the Florida Canyon project and we are monitoring progress at the Florida Canyon project. We are planning a joint 2018 exploration program at the Lik project with Teck, our 50% partner at Lik. In addition, at June 30, 2018, we have one exploration property in Peru, and one non-producing royalty property in each of Brazil, United States and Mexico. We are conducting independent exploration activities in Peru and through joint ventures operated by our partners in Peru and the United States. We conduct potential acquisition evaluations in other

countries of both South and North America.

As of June 30, 2018, we have significant balances of cash and short-term investments that we anticipate using, in part, to further the development of the Lik and Florida Canyon projects and to potentially acquire additional mineral property assets. The fluctuations in precious metal and other commodity prices contribute to a challenging environment for mineral exploration and development, which has created opportunities as well as challenges for the potential acquisition of advanced mineral exploration projects or other related assets at potentially attractive terms.

Table of Contents

(b) Results of Operations

Comparison of the quarter ended June 30, 2018 to the quarter ended June 30, 2017

We had a net loss of \$613,000 or \$0.01 per basic and diluted share for the three months ended June 30, 2018 compared to a net loss of \$273,000 or \$0.01 per basic and diluted share for the three months ended June 30, 2017. As explained in more detail below, the primary reasons for the increase in the net loss in the three months ended June 30, 2018 compared to the net loss in the three months ended June 30, 2017 were (i) an increase in general and administrative expenses to \$761,000 during the three months ended June 30, 2018 compared to general and administrative costs of \$560,000 during the three months ended June 30, 2017; (ii) the recording of a non-cash unrealized loss on marketable equity securities of \$223,000 during the three months ended June 30, 2018 compared to a non-cash unrealized gain on marketable equity securities of \$333,000 during the three months ended June 30, 2017; and (iii) a decrease to no gain on derivative instruments in the three months ended June 30, 2018 compared to a gain on derivative instruments of \$113,000 during the three months ended June 30, 2017. These increases in the net loss during the three months ended June 30, 2018 were partially offset by (i) the recording of mineral property sale revenue of \$502,000 from the sale of the Yanacocha Royalty during the three months ended June 30, 2018, with no similar revenue amount during the same period of 2017 and (ii) a decrease in exploration expense to \$162,000 during the three months ended June 30, 2018 compared to exploration expense of \$188,000 during the three months ended June 30, 2017. Each of the major components of these items is discussed in more detail below.

Our net exploration expense decreased to \$162,000 during the three months ended June 30, 2018 compared to exploration expense of \$188,000 during the three months ended June 30, 2017. We decreased our direct exploration expenditures at our Florida Canyon project during 2018 compared to 2017 as we were completing our pre-feasibility economic analysis during 2017, with no similar activity during the three months ended June 30, 2018. During the three months ended June 30, 2018, we were primarily focused on the planning of exploration activities with our joint owner Teck at our Lik project in Alaska and working on exploration plans with our joint venture partner Nexa Resources, Ltd. at our Florida Canyon project in Peru in anticipation of the 2018 exploration season in the second half of 2018. Our reconnaissance exploration activities primarily related to the evaluation of mineral properties and / or entities for potential acquisition or other strategic transactions during the three months ended June 30, 2018 and 2017 and the expenditures were comparable during the second quarter of 2018 and the second quarter of 2017. We anticipate a significant increase in our exploration activities and expense during the second half of 2018 as the weather conditions are more conducive to exploration activities at both Lik and Florida Canyon. During the three months ended June 30, 2018 we had three contract geologists in Peru, and our Denver personnel spent a majority of their time on reconnaissance and exploration planning activities described above and related matters. We have budgeted additional exploration expenditures related to our Lik project and our Florida Canyon project during the remainder of 2018 and to the extent we acquire any new exploration projects, to expand those activities further. As a result, we expect our full-year exploration expenditures for 2018 to exceed the expenditures for full-year 2017.

Exploration expense (in thousands) by project for the three and six months ended June 30, 2018 and 2017 consisted of the following:

Project Name	Three months ended June 30,		Six months ended June 30,	
	2018	2017	2018	2017
Florida Canyon	\$7	\$68	\$21	\$88
Lik	10	—	25	—
La Promesa	23	11	52	16
Reconnaissance	122	109	244	235
Total exploration expense	\$162	\$188	\$342	\$339

General and administrative costs, excluding stock option compensation costs, discussed below, were \$330,000 during the three months ended June 30, 2018 compared to \$559,000 during the three months ended June 30, 2017. The major components of these costs were related to (i) salaries and benefit expense of \$162,000 during the three months ended June 30, 2018 compared to salary and benefit costs of \$158,000 during the three months ended June 30, 2017; (ii) legal and accounting expenditures of \$85,000 during the three months ended June 30, 2018 compared to \$304,000 during the three months ended June 30, 2017, when we were negotiating the terms and preparing the merger documents for the acquisition of Zazu, which was completed in July of 2017; (iii) office rent and expenses of \$35,000 during the three months ended June 30, 2018, compared to \$34,000 during the three months ended June 30, 2017; and (iv) travel and shareholder relation costs of \$47,000 during the three months ended June 30, 2018, compared to \$64,000 during the three months ended June 30, 2017 when we incurred additional investor relations expense for investor presentations and providing investors with information regarding the Acquisition. We anticipate the general and administrative costs will be incurred at comparable quarterly amounts for the remainder of 2018.

Table of Contents

We recorded \$432,000 of stock option expense during the three months ended June 30, 2018, which included \$422,000 for the amortization of vested grant date fair value for the Conditional Options which were granted on September 1, 2017, but were subject to shareholder approval, which was received on June 19, 2018 as discussed in Note 8, "Employee Stock Compensation Plans," above. There was no comparable stock option expense during the three months ended June 30, 2017 as we had granted no options and had no options outstanding during the three months ended June 30, 2017.

We recorded an unrealized loss on marketable equity securities of \$223,000 during the three months ended June 30, 2018 compared to an unrealized gain on marketable equity securities of \$333,000 during the three months ended June 30, 2017. The loss during the three months ended June 30, 2018 was primarily related to a decrease in the value of our holdings of 11,000,000 shares of Vendetta common stock which decreased from a fair value of \$1,792,000 at March 31, 2018 to a fair value of \$1,589,000 at June 30, 2018 based on quoted market prices. We adopted ASU 2016-01 in the first quarter of 2018. We recorded a cumulative-effect adjustment for the change in accounting principle to retained earnings of \$576,000 related to the adoption of ASU 2016-01. In addition, as a result of the adoption of ASU 2016-01, we (i) eliminated the previously recorded gain on sale of marketable equity securities of nil and \$221,000, respectively, in our consolidated statement of operations for the three months and six months ended June 30, 2017, and (ii) eliminated our previously recorded income tax benefit of \$89,000 for the three and six months ended June 30, 2017, which resulted in an adjusted unrealized gain on marketable equity securities of \$333,000 and \$461,000, respectively, for the three and six months ended June 30, 2017. These changes reduced the net loss for the three months ended June 30, 2017 from \$517,000 to \$273,000 and reduced the net loss for the six months ended June 30, 2017 to \$379,000 from \$530,000. See Note 9, "Shareholders' Equity and Other Comprehensive Income" in the unaudited consolidated financial statements, above.

We recorded a gain on derivative instruments of \$113,000, during the three months ended June 30, 2017, with no similar item during the three months ended June 30, 2018. The gain during the three months ended June 30, 2017 was primarily related to a \$99,000 gain on our Vendetta Warrants primarily as a result of an increase in the price of Vendetta common shares as quoted on the TSX Venture Exchange during the three months ended June 30, 2017, which positively affected the fair value of the Vendetta Warrants based upon a Black-Scholes model. In addition, during the three months ended June 30, 2017 we recorded a gain on derivative instruments related to the change in value of Kinross covered calls of \$14,000 during the three months ended June 30, 2017 related to changes in the value of Kinross calls owned during the three months ended June 30, 2017. At June 30, 2018 we no longer own any Vendetta Warrants and or Kinross calls, and we do not manage or control our derivative instruments for gain or loss and we do not anticipate significant income or loss as a result of changes in the value of derivative instruments during the remainder of 2018.

We regularly perform evaluations of our mineral property assets to assess the recoverability of our investments in these assets. All long-lived assets are reviewed for impairment whenever events or circumstances change which indicate the carrying amount of an asset may not be recoverable utilizing guidelines based upon future net cash flows from the asset as well as our estimates of the geological potential of an early stage mineral property and its related value for future sale, joint venture or development by us or others. During the three and six months ended June 30, 2018 and 2017, we recorded no property impairments.

At June 30, 2018 and 2017, our net operating loss carry-forwards exceed our built-in gains on marketable equity securities resulting in a net tax asset position for which we provide a valuation allowance for all net deferred tax assets. We recorded no income tax expense or benefit during the three and six months ended June 30, 2018 or 2017. As a result of our exploration activities, we anticipate we will not have currently payable income taxes during 2018. In addition to the valuation allowance discussed above, we provide a valuation allowance for our foreign net operating losses, which are primarily related to our exploration activities in Peru. We anticipate we will continue to provide a valuation allowance for these net operating losses until we are in a net tax liability position with regards to those countries where we operate or until it is more likely than not that we will be able to realize those net operating losses in the future.

Table of Contents

Comparison of the six months ended June 30, 2018 to the six months ended June 30, 2017

We had a net loss of \$1,617,000 or \$0.03 per basic and diluted share for the six months ended June 30, 2018 compared to a net loss of \$379,000 or \$0.01 per basic and diluted share for the six months ended June 30, 2017. As explained in more detail below, the primary reasons for the increase in our net loss were (i) an increase in general and administrative costs to \$1,165,000 during the six months ended June 30, 2018, including \$442,000 of non-cash stock option compensation expense, compared to \$860,000 of general and administrative costs during the six months ended June 30, 2017; (ii) an unrealized loss on marketable equity securities of \$663,000 during the six months ended June 30, 2018 compared to an unrealized gain on marketable equity securities of \$461,000 during the six months ended June 30, 2017; (iii) an increase in exploration expense to \$342,000 during the six months ended June 30, 2018 compared to exploration expense of \$339,000 during the six months ended June 30, 2017; and (iv) a decrease in interest income to \$63,000 during the six months ended June 30, 2018 compared to interest income of \$76,000 during the six months ended June 30, 2017. These causes of the increase in our net loss were partially offset by the recording of mineral property sale revenue of \$502,000 from the sale of the Yanacocha Royalty during the three months ended June 30, 2018, with no similar revenue amount during the three months ended June 30, 2017. The significant changes for these items are discussed in more detail below.

Our net exploration expense increased to \$342,000 during the six months ended June 30, 2018 compared to \$339,000 in the comparable period of 2017. During the six months ended June 30, 2018 we performed initial exploration work on our Lik project, which we acquired during 2017. In addition, we increased reconnaissance of new projects during the six months ended June 30, 2018 compared to the six months ended June 30, 2017 and we were working with the local community on our La Promesa project in Peru to obtain approvals for drilling permits which increased our exploration costs during the first six months of 2018 compared to the six months ended June 30, 2017. Partially offsetting these increased costs during the six months ended June 30, 2018 compared to the six months ended June 30, 2017 we initiated a preliminary economic assessment on our Florida Canyon project during the six months ended June 30, 2017 with no similar project at Florida Canyon during the six months ended June 30, 2018.

General and administrative costs, excluding stock option compensation costs discussed below, were \$723,000 during the six months ended June 30, 2018 compared to \$860,000 during the six months ended June 30, 2017. The major components of the costs were (i) salaries and benefit expense during the six months ended June 30, 2018 of \$319,000 compared to salaries and benefit expense of \$316,000 in the same period of 2017; (ii) legal and accounting expenditures of \$127,000 in the six months ended June 30, 2018, compared to \$334,000 during the six months ended June 30, 2017, which were in large part related to the Acquisition; (iii) other costs of \$76,000 during the six months ended June 30, 2018 compared to \$74,000 in the same period of 2017; and (iv) travel and shareholder relation costs of \$201,000 during the six months ended June 30, 2018 compared to \$136,000 in the same period of 2017. During the six months ended June 30, 2018, Solitario recorded \$442,000 of stock option expense for the amortization of unvested grant date fair value with a credit to additional paid-in capital, with no stock option expense during the six months ended June 30, 2017, as discussed above.

We recorded an unrealized loss on marketable equity securities of \$663,000 during the six months ended June 30, 2018 compared to an unrealized gain on marketable equity securities of \$461,000 during the six months ended June 30, 2017. The non-cash unrealized loss during the six months ended June 30, 2018 was primarily related to a decrease in the value of our holdings of 11,000,000 shares of Vendetta common stock which decreased from a fair value of \$2,191,000 at December 31, 2017 to a fair value of \$1,589,000 at June 30, 2018 based on quoted market prices. During the six months ended June 30, 2017 the fair value of our holdings of Vendetta marketable equity securities increased from a fair value of \$1,021,000 at December 31, 2016 to a fair value of \$1,597,000 at June 30, 2017, which, when aggregated with non-cash unrealized losses from holdings of other marketable equity securities, accounted for the non-cash unrealized gain of \$461,000 during the six months ended June 30, 2017. We may look to reduce our holdings of marketable equity securities as a source of cash flow over the next year, which may reduce the volatility of the changes in unrealized gains and losses in marketable equity securities during the remainder of 2018.

During the six months ended June 30, 2018 our interest income on short-term investments decreased to \$63,000 compared to interest income of \$76,000 for the six months ended June 30, 2017 primarily as a result of a lower invested balance in short-term investments during the first six months of 2018 compared to 2017, which was partially offset by a slightly increased average interest rate received on USTS invested during 2018. We anticipate as we utilize our invested funds for exploration and general and administrative cost our interest income will reduce during the remainder of 2018.

Table of Contents

(c) Liquidity and Capital Resources

Cash and Short-term Investments

As of June 30, 2018, we have \$11,331,000 in cash and short-term investments. As of June 30, 2018, we have invested \$9,424,000 of our current assets in USTS with maturities ranging from 15 days to 21 months. The USTS are recorded at their fair value, based upon quoted market prices. As of June 30, 2018, we have invested \$1,247,000 in separate CDs with maximum values of \$250,000, each of which is covered by FDIC insurance to the full-face value of the CDs. At June 30, 2018, the CDs have maturities of between 1 and 9 months. The CDs are recorded at their fair value, based upon quoted market prices. We anticipate we will roll over that portion of our USTS and CDs not used for exploration expenditures, operating costs or mineral property acquisitions as they become due during the remainder of 2018.

We intend to utilize a portion of our cash and short-term investments in our exploration activities and the potential acquisition of mineral assets over the next several years. We also expect to use a portion of our cash to repurchase shares of our common stock pursuant to the terms of a stock buy-back program announced on October 28, 2015, and discussed above in Note 9, "Shareholders' Equity and Accumulated Other Comprehensive Income" to the unaudited consolidated financial statements. The stock buy-back program may be terminated at any time and does not require Solitario to purchase a minimum number of shares.

Investment in Marketable Equity Securities

Our marketable equity securities are classified as available-for-sale and are carried at fair value, which is based upon market quotes of the underlying securities. At June 30, 2018 we own 11,000,000 shares of Vendetta common stock and 100,000 shares of Kinross common stock. The Vendetta shares are recorded at their fair market value of \$1,589,000 and the Kinross shares are recorded at their fair value of \$376,000 at June 30, 2018. In addition, we own other marketable equity securities with a fair market value of \$15,000 at June 30, 2018. We did not sell any of our marketable equity securities during the three and six months ended June 30, 2018. During the six months ended June 30, 2017, we sold 1,480,000 common shares of Vendetta for proceeds of \$259,000, and we exercised 2,240,000 of our Vendetta Warrants and received 2,240,000 Vendetta common shares, by paying \$167,000 (Cdn\$224,000) to Vendetta. The cost of the shares received from the exercise of the Vendetta Warrants was recorded based upon the total of the (i) exercise price of the Vendetta Warrants exercised, \$167,000, and (ii) the fair value of the Vendetta Warrants on the date of exercise, which equaled their intrinsic value, \$309,000, for a total value of \$476,000.

Working Capital

We had working capital of \$13,236,000 at June 30, 2018 compared to working capital of \$14,472,000 as of December 31, 2017. Our working capital at June 30, 2018 consists primarily of our cash and cash equivalents, our investment in USTS and CDs, discussed above, and our investment in marketable equity securities of \$1,980,000, less our accounts payable of \$153,000. As of June 30, 2018, our cash balances along with our short-term investments and marketable equity securities are adequate to fund our expected expenditures over the next year.

The nature of the mineral exploration business requires significant sources of capital to fund exploration, development and operation of mining projects. We will need additional capital if we decide to develop or operate any of our current exploration projects or any projects or assets we may acquire. We anticipate we would finance any such development through the use of our cash reserves, short-term investments, joint ventures, issuance of debt or equity, or the sale of other exploration projects or assets.

Stock-Based Compensation Plans

As of June 30, 2018, and December 31, 2017 there were options outstanding that are exercisable to acquire 4,025,228 and 1,982,428 shares of Solitario common stock, respectively, with exercise prices between \$0.62 per share and \$1.96 per share. During the three and six months ended June 30, 2018, 2,300,000 Conditional Options, granted on September 1, 2017, subject to shareholder approval, were approved, and are included in our outstanding options. In addition, at June 30, 2018 we have options outstanding for 1,371,228 shares from Replacement Options granted in connection with the Acquisition. See additional discussion of our stock-based compensation plan in Note 8, "Employee Stock Compensation Plans" to our condensed consolidated financial statements above. We do not anticipate the exercise of any options during the remainder of 2018.

Table of Contents

Share Repurchase Program

On October 28, 2015, our Board of Directors approved a share repurchase program that authorized us to purchase up to two million shares of our outstanding common stock. During 2017, our Board of Directors extended the term of the share repurchase program until December 31, 2018. All shares purchased to date have been cancelled and reduced the number of shares of outstanding common stock. The amount and timing of any shares purchased has been and will be determined by our management and the purchases will be effected in the open market or in privately negotiated transactions based upon market conditions and other factors, including price, regulatory requirements and capital availability and in compliance with applicable state and federal securities laws. Purchases may also be made in accordance with Rule 10b-18 of the Securities Exchange Act of 1934, as amended (the “1934 Act”). The repurchase program does not require the purchase of any minimum number of shares of common stock by the Company, and may be suspended, modified or discontinued at any time without prior notice. No purchases will be made outside of the United States, including on the TSX. Payments for shares of common stock repurchased under the program have been funded using the Company’s working capital. As of June 30, 2018, Solitario has purchased a total of 813,000 shares for an aggregate purchase price of \$413,000 under the share repurchase program since its inception and these shares are no longer included in our issued and outstanding shares. We anticipate we will continue to purchase a limited number of shares under the share repurchase plan during 2018 as determined by management.

(d) Cash Flows

Net cash used in operations during the six months ended June 30, 2018 decreased to \$440,000 compared to \$1,053,000 for the six months ended June 30, 2017 primarily as a result of (i) the sale of our Yanacocha Royalty for \$502,000 in cash; and (ii) a decrease in general and administrative expense, excluding non-cash option compensation expense, to \$733,000 during the six months ended June 30, 2018 compared to \$860,000 during the six months ended June 30, 2017. These reductions in the use of cash were partially offset by (i) an increase in exploration expenses to \$342,000 during the six months ended June 30, 2018 compared to \$339,000 during the six months ended June 30, 2017; and (ii) a decrease in interest income during the six months ended June 30, 2018 to \$63,000 compared to \$76,000 during the three months ended June 30, 2017. Based upon projected expenditures in our 2018 budget, we anticipate continued use of funds from operations through the remainder of 2018, primarily for exploration related to our Florida Canyon project, our Lik project and reconnaissance exploration. See “Results of Operations” discussed above for further explanation of some of these variances.

During the six months ended June 30, 2018, we provided \$501,000 in cash from investing activities compared to the provision of \$1,131,000 of cash from investing activities during the six months ended June 30, 2017. The primary sources of cash related to (i) the net proceeds from short-term investment sales and purchases of \$509,000 and \$2,496,000, respectively, during the six months ended June 30, 2018 and 2017; (ii) the provision of \$1,500,000 to Zazu in the form of a convertible debenture prior to and in anticipation of the Acquisition during the six months ended June 30, 2017; (iii) the sale of Vendetta shares for proceeds of \$259,000 during the six months ended June 30, 2017, with no similar sale during the six months ended June 30, 2018 and (iv) the sale of Kinross calls of \$43,000 during the

six months ended June 30, 2017, with no similar sale during the six months ended June 30, 2018. During the six months ended June 30, 2018 we purchased \$8,000 of office equipment. During the six months ended June 30, 2017 we used \$167,000 of cash for the purchase of the Vendetta shares discussed above. We do not anticipate significant sales of marketable equity securities during the remainder of 2018, however we will continue to liquidate a portion of our investments in USTS and CDs as needed to fund our operations and or potential mineral property acquisitions during the remainder of 2018. Any potential mineral property acquisition or strategic corporate investment during the remainder of 2018, discussed above under “Business Overview and Summary,” could involve a significant change in our cash provided or used for investing activities, depending on the structure of any potential transaction.

We used \$65,000 and \$28,000, respectively, for the purchase of our common stock during the six months ended June 30, 2018 and 2017, as discussed above under “Share Repurchase Program” in “Liquidity and Capital Resources.” We anticipate the use of funds for additional purchases of our common stock during the remainder of 2018, however, this will be limited to the maximum number of shares permissible under the share repurchase program.

Table of Contents

(e) Off-balance sheet arrangements

As of June 30, 2018, and December 31, 2017 we have no off-balance sheet obligations.

(f) Development Activities, Exploration Activities, Environmental Compliance and Contractual Obligations

We are not involved in any development activities, nor do we have any contractual obligations related to any potential development activities as of June 30, 2018. As of June 30, 2018, there have been no changes to our exploration activities, environmental compliance or other contractual obligations from those disclosed in our Management's Discussion and Analysis included in our Annual Report on Form 10-K for the year ended December 31, 2017.

(g) Discontinued Projects

With the exception of the sale of the Yanacocha Royalty, discussed above, we had no discontinued projects and did not record any mineral property write-downs during the three and six months ended June 30, 2018 and 2017.

(h) Critical Accounting Estimates

Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 1 to the Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2017, describe the significant accounting estimates and policies used in preparation of our consolidated financial statements. Actual results in these areas could differ from management's estimates. During the six months ended June 30, 2018, Solitario adopted ASU 2016-01. Solitario recorded a cumulative effect of the change in accounting principle to retained earnings of \$576,000 related to the adoption of ASU 2016-01. See Note 9, "Shareholders' Equity and Accumulated Other Comprehensive Income" to the unaudited consolidated financial statements, for a discussion of ASU 2016-01.

(i) Related Party Transactions

As of June 30, 2018, and for the three and six months ended June 30, 2018, we have no related party transactions or balances.

(j) Recent Accounting Pronouncements

See Note 1, “Business and Summary of Significant Accounting Policies,” to the unaudited consolidated financial statements under *Recent Accounting Pronouncements*” above for a discussion of our significant accounting policies.

(k) Forward Looking Statements

This Form 10-Q contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the 1934 Act with respect to our financial condition, results of operations, business prospects, plans, objectives, goals, strategies, future events, capital expenditures, and exploration and development efforts. Words such as “anticipates,” “expects,” “intends,” “forecasts,” “plans,” “believes,” “seeks,” “estimates,” “will,” and similar expressions identify forward-looking statements. These forward-looking statements are based on our current expectations and assumptions about future events and are based on currently available information as to the outcome and timing of future events. When considering forward-looking statements, you should keep in mind the risk factors and other cautionary statements described under the heading “Risk Factors” included in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2017. These forward-looking statements appear in a number of places in this report and include statements with respect to, among other things:

Table of Contents

- Our estimates of the value and recovery of our short-term investments;
- Our estimates of future exploration, development, general and administrative and other costs;
- Our ability to realize a return on our investment in the Lik project acquired in the Acquisition;
- Our ability to successfully identify, and execute on transactions to acquire new mineral exploration properties and other related assets;
- Our estimates of fair value of our investment in shares of Vendetta and Kinross;
- Our expectations regarding development and exploration of our properties, including those subject to joint venture and shareholder agreements;
- The impact of political and regulatory developments;
- Our future financial condition or results of operations and our future revenues and expenses; and
- Our business strategy and other plans and objectives for future operations.

Although we have attempted to identify important factors that could cause actual results to differ materially from those described in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that these statements will prove to be accurate as actual results and future events could differ materially from those anticipated in the statements. Except as required by law, we assume no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Smaller Reporting Companies are not required to provide the information required by this item.

Item 4. Controls and Procedures

Disclosure Controls and Procedures

As required by Rule 13a-15 under the 1934 Act, as of June 30, 2018, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. This evaluation was carried out under the supervision and with the participation of our Chief Executive Officer (our principal executive officer) and our Chief Financial Officer (our principal financial officer). Based upon and as of the date of that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2018.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the 1934 Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the 1934 Act is accumulated and communicated to our management, including our principal executive officer and our principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) promulgated under the 1934 Act) during the quarter ended June 30, 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1.

Legal Proceedings

None

Item 1A.

Risk Factors

There are no material changes to the Risk Factors associated with our business disclosed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2017.

Table of ContentsItem 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information about our purchase of our common shares under the share repurchase program during the three months ended June 30, 2018.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum number of Shares that May Yet Be Purchased Under the Plans or Programs (1)
April 1, 2018- April 30, 2018	46,896	\$ 0.42	46,896	1,232,690
May 1, 2018 – May 31, 2018	17,690	\$ 0.42	17,690	1,215,000
June 1, 2018 – June 30, 2018	28,000	\$ 0.42	28,000	1,187,000

(1) As of June 30, 2018, we have purchased a total of 813,000 shares for an aggregate purchase price of \$413,000 under the share repurchase program and these shares are no longer included in our issued and outstanding shares.
