Item 2. Acquisition or Disposition of Assets.

Pursuant to an Agreement and Plan of Merger dated as of October 14, 2003, as amended February 26, 2004 (the Merger Agreement), Fentura Financial, Inc. (Fentura) acquired West Michigan Financial Corporation, the bank holding company for West Michigan Community Bank. West Michigan Community Bank is a Michigan banking corporation headquartered in Hudsonville, Michigan. WMFC Acquisition Subsidiary, Inc., a newly formed subsidiary of Fentura, was merged into West Michigan Financial Corporation as of March 15, 2004 (the Merger). As a result of the Merger, all of the common stock of West Michigan Financial Corporation was converted into the right to receive cash. Following the Merger, West Michigan Financial Corporation will be merged into Fentura. As a result of the Merger, Fentura now owns West Michigan Community Bank and its subsidiaries.

The total consideration paid by Fentura to the shareholders and option holders of West Michigan Financial Corporation consisted of \$12,922,950 in cash. The source of these funds was cash and cash equivalents of Fentura, including the proceeds from the \$12 million private placement of floating rate trust preferred securities by Fentura Financial Capital Trust I which was completed in the fourth quarter of 2003.

Pursuant to the Merger Agreement, each share of West Michigan Financial Corporation common stock, \$1.00 par value per share that was outstanding immediately before the effective time of the Merger was converted into the right to receive \$336 per share in cash, without interest. Each outstanding stock option of West Michigan Financial Corporation was converted into the right to receive cash in an amount equal to the difference between \$336 and the exercise price per share under the option, multiplied by the total number of shares of West Michigan Financial Corporation that could be acquired upon exercise of such option. The consideration paid by Fentura was determined by the boards of directors of the parties through arms-length negotiations. Each share of Fentura common stock that was outstanding immediately before the effective time of the Merger remains outstanding after the Merger.

The transaction was accounted for as a purchase.

99.2-1

Edgar Filing: FENTURA FINANCIAL INC - Form 8-K/A

Independent Auditor's Report

Board of Directors
West Michigan Financial Corporation

We have audited the accompanying consolidated balance sheet of West Michigan Financial Corporation and Subsidiary as of December 31, 2003 and 2002, and the related consolidated statement of operations, statements of changes in stockholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of West Michigan Financial Corporation and Subsidiary as of December 31, 2003 and 2002, and the consolidated statement of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

99.2-7

Note 1 Summary of Significant Accounting Policies

Basis of Presentation and Consolidation The consolidated financial statements include the accounts of West Michigan Financial Corporation (the Corporation) and its wholly owned subsidiary, West Michigan Community Bank (the Bank).

The Bank owns two subsidiaries, Community Insurance Services (the Services Corporation), which offers mutual fund products, securities brokerage services, retirement planning services, insurance products, investment management and advisory services, and West Michigan Mortgage, LLC (the Mortgage Company). The Mortgage Company was formed in 2002 and manages the residential loan portfolio, including origination and loan sales to the secondary market. The Services Corporation has a minority interest in a limited liability company formed through the Michigan Bankers Association along with other community financial institutions of Michigan. The limited liability company allows the Corporation to participate in title and other insurance premiums in an agency capacity. All significant intercompany transactions have been eliminated in consolidation.

Use of Estimates in the Preparation of Financial Statements The accounting and reporting policies of the Corporation and its subsidiary conform to accounting principles generally accepted in the United States of America. Management is required to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates and assumptions. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses and deferred tax assets.

Notes to Consolidated Financial Statements
December 31, 2003 and 2002

Nature of Operations The Corporation provides a variety of financial products and services through branch offices to the Michigan communities in Kent and Ottawa Counties. It offers a wide variety of deposits products and its primary lending products are residential mortgages and commercial loans.

Significant Group Concentrations of Credit Risk The Corporation's activities are with customers located within Michigan. Note 3 discusses the types of securities the Corporation invests in; Note 4 discusses the types of lending that the Corporation engages in. The Corporation does not have any significant concentrations with any one industry or customer.

99.2-9

Note 1 Summary of Significant Accounting Policies (Continued)

Cash and Cash Equivalents For purposes of the consolidated statement of cash flows, cash and cash equivalents include cash, balances due from banks, and federal funds sold, all of which mature within ninety days.

Securities Debt securities that management has the positive intent and ability to hold to maturity are classified as held to maturity and recorded at amortized cost. Securities not classified as held to maturity, including equity securities with readily determinable fair values, are classified as available for sale and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income, net of income taxes.

Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Declines in the fair value of securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses. Gains and losses on the sale of securities are recorded on the trade date and are determined using the specific identification method.

Loans Held For Sale Loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated fair value in the aggregate. Net unrealized losses, if any, are recognized in a valuation allowance by charges to income.

Loans The Corporation grants mortgage, commercial, and consumer loans to customers. A substantial portion of the loan portfolio is represented by commercial real estate loans throughout West Michigan. The ability of the Corporation's debtors to honor their contracts is dependent upon the real estate and general economic conditions in this area.

**Notes to Consolidated Financial Statements
December 31, 2003 and 2002**

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are reported at their outstanding unpaid principal balances adjusted for charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method.

99.2-11

Note 1 Summary of Significant Accounting Policies (Continued)

The accrual of interest on loans is discontinued at the time the loan is 90 days delinquent unless the credit is well-secured and in process of collection. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful. All interest accrued but not collected for loans that are placed on nonaccrual or charged off is reversed against interest income. The interest on these loans is accounted for on the cash basis or cost-recovery method, until qualifying for return for accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

**Notes to Consolidated Financial Statements
December 31, 2003 and 2002**

The allowance consists of specific, general and unallocated components. The specific components relate to loans that are classified as either doubtful, substandard or special mention. For such loans that are also classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers non-classified loans and is based on historical loss experience adjusted for qualitative factors. An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

99.2-13

Note 1 Summary of Significant Accounting Policies (Continued)

A loan is considered impaired when, based on current information and events, it is probable that the Corporation will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial, commercial real estate and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the liquidated fair value of the collateral if the loan is collateral dependent.

Large groups of homogeneous loans are collectively evaluated for impairment. Accordingly, the Corporation does not separately identify individual consumer and residential loans for impairment disclosures.

Credit-related Financial Instruments In the ordinary course of business, the Bank has entered into commitments to extend credit, including commercial letters of credit. Such financial instruments are recorded when they are funded.

Notes to Consolidated Financial Statements
December 31, 2003 and 2002

Bank Premises and Equipment Land is carried at cost. Bank premises and equipment are stated at cost, less depreciation computed using straight-line and declining balance methods over the estimated useful lives of the assets.

Income Taxes Deferred income tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the various temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws.

Stock Compensation Plans As permitted by SFAS No. 148, the Corporation will continue to apply the provisions of APB Opinion No. 25, Accounting for Stock-Based Compensation, for all employee stock option grants and has elected to disclose pro forma net income and earnings per share amounts as if the fair-value based method has been applied in measuring compensation costs.

West Michigan Financial Corporation and Subsidiary

Notes to Consolidated Financial Statements
December 31, 2003 and 2002

Note 1 Summary of Significant Accounting Policies (Continued)

The Corporation's as reported and the pro forma information for the years ended December 31:

	<u>2003</u>	<u>2002</u>
Net Income (loss)		
As reported net income (loss) available to common shareholders	\$ (401,660)	\$ 57,839
Less: stock-based compensation expense determined under fair value method, net of tax	-	18,104
Pro forma net income (loss)	\$ (401,660)	\$ 39,735
Earnings (loss) Per Share		
As reported earnings (loss) per share	\$ (10.56)	\$ 1.52
Pro forma earnings (loss) per share	\$ (10.56)	\$ 1.04
As reported earnings (loss) per diluted share	\$ (10.56)	\$ 1.52
Pro forma earnings (loss) per diluted share	\$ (10.56)	\$ 1.04

Compensation expense in the pro forma disclosures is not indicative of future amounts, as additional grants are generally made each year. No options were granted during 2003. The fair value of each option grant is estimated on the date of the grant using the Black-Scholes option pricing model with the following weighted average assumptions for December 31, 2002:

Dividend yield	0.47%
Expected life	10.0 Yrs
Expected volatility	4.74%
Risk-free interest rate	4.00%
Weighted average fair value of options granted during the year	\$ 46.04

99.2-16

Earnings (Loss) per Share Basic earnings (loss) per share represents income available to common stockholders divided by the weighted average number of common shares outstanding during the period.

99.2-17

Note 1 Summary of Significant Accounting Policies (Continued)

Diluted earnings (loss) per share reflects additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustments to income that would result from the assumed issuance. Potential common shares that may be issued by the Corporation relate solely to outstanding stock options and are determined using the treasury stock method. There were no dilutive stock options as of December 31, 2003 and 2002.

Comprehensive Income (Loss) Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net income. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the equity section of the balance sheet, such items, along with net income, are components of comprehensive income.

The components of other comprehensive income (loss) and related tax effects are as follows for the years ended December 31:

	<u>2003</u>	<u>2002</u>

Note 10 Employee Benefit Plans

Retirement Plan The Corporation has a defined contribution retirement plan that covers all employees with more than six months and 1,000 hours of service annually. Contributions by the Corporation to the plan are discretionary and totaled \$38,446 for 2003 and \$39,108 for 2002.

Deferred Compensation The Corporation sponsors deferred compensation agreements for certain employees and officers. The cost of the agreements was approximately \$30,000 and \$70,000 in 2003 and 2002, respectively and is included in compensation expense. The accrued liability for these agreements was \$329,926 and \$299,627 as of December 31, 2003 and 2002, respectively. The accrued liability is included in other liabilities on the accompanying balance sheets. The Corporation has purchased life insurance policies on the participating employees and officers, the cash surrender values of which are included in other assets.

Note 11 Related Parties

In the ordinary course of business, the Bank has granted loans to principal officers and directors and their affiliates of approximately \$610,000 and \$1,663,000 as of December 31, 2003 and 2002, respectively.

At December 31, 2003, the Corporation had commitments to advance an additional \$1,170,000 to these related parties under line-of-credit and similar arrangements.

Note 12 Financial Instruments

The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Corporation's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. SFAS 107 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Corporation.

The following methods and assumptions were used by the Corporation in estimating fair value disclosures for financial instruments:

99.2-31

Cash and cash equivalents The carrying amounts of cash and short-term instruments approximate fair values.

Securities Fair values for securities, excluding restricted use stocks, are based on quoted market prices. The carrying value of Federal Home Loan Bank stock approximates fair value based on the redemption provisions of the Federal Home Loan Bank.

Mortgage loans held for sale Fair values of mortgage loans held for sale are based on commitments on hand from investors or prevailing market prices.

Accrued interest The carrying amounts of accrued interest approximate fair value.

Note 12 Financial Instruments (Continued)

Loans receivable For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for certain mortgage loans (e.g., one-to-four family residential), and other consumer loans are based on quoted market prices of similar loans sold in conjunction with securitization transactions, adjusted for differences in loan characteristics. Fair values for other loans (e.g., commercial real estate and investment property mortgage loans, commercial and industrial loans) are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair values for non-performing loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Deposit liabilities The fair values disclosed for demand deposits (e.g., interest and non-interest checking, passbook savings, and certain types of money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The carrying amounts of variable-rate, fixed term money market accounts and certificates of deposit approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Federal Funds Purchased The carrying amounts of federal funds purchased approximate their fair values.

**Notes to Consolidated Financial Statements
December 31, 2003 and 2002**

Notes payable and FHLB advances payable The fair values of the Corporation's long-term borrowings are estimated using discounted cash flow analyses based on the Corporation's current incremental borrowing rates for similar types of borrowing arrangements.

The Corporation has disclosed the following fair values of its financial instruments in accordance with Statement of Financial Accounting Standards No. 107, Disclosures About Fair Value of Financial Instruments :

Note 12 Financial Instruments (Continued)

Off-Balance-Sheet Risk The Corporation is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to extend credit and financial guarantees. These instruments involve, to varying degrees, elements of credit and interest rate risk that are not recognized in the balance sheet.

Commitments to extend credit are agreements to lend to a customer as long as there are no violations of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require a payment of a fee. Fees from issuing these commitments to extend credit are recognized over the period to maturity. Since a portion of the commitments are expected to expire without being drawn upon, the total commitments do not necessarily represent future cash requirements. The Corporation evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained upon extension of credit is based on management's credit evaluation of the customer.

Exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and financial guarantees written is represented by the contractual notional amount of those items. The Corporation generally requires collateral to support such financial instruments in excess of the contractual notional amount of those instruments.

99.2-36

**Notes to Consolidated Financial Statements
December 31, 2003 and 2002**

At December 31, 2003, and 2002, the following financial instruments were outstanding whose contract amounts represent credit risk:

	Contract Amount	
	2003	2002
Commitments to grant loans	\$ 19,717,000	\$ 12,669,000
Unfunded commitments under lines of credit	6,731,000	5,381,000
Letters of credit	153,000	481,000

99.2-37

Note 13 Restrictions on Dividends, Advances, and Loans

Banking regulations place certain restrictions on dividends paid and loans or advances made by the Bank to the Corporation. The total amount of dividends which may be paid at any date is generally limited to the retained earnings of the Bank. However, dividends paid by the Bank would be prohibited if the effect thereof would cause the Bank's capital to be reduced below applicable minimum standards. At December 31, 2003, the Bank's primary regulator has required the Bank to obtain regulatory approval for any dividends other than dividends to the Corporation for payment on debt service or director fees.

Loans or advances made by the Bank to the Corporation are generally limited to 10 percent of the Bank's capital stock and surplus. Accordingly, at December 31, 2003, Bank funds available for loans or advances to the Corporation amounted to \$720,000.

Note 14 Stock-Based Compensation

The Corporation has stock option plans under which options may be granted to certain officers, employees and directors at not less than the market price of the Corporation's stock on the date of the grant. The plan was established in 2000 and authorized up to 1,000 options. The options are immediately vested when granted. Options expire within ten years of the date of the grant, subject to certain cancellation provisions related to employment.

The following tables summarize information about stock option transactions:

	2003		2002	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price

Note 15 Regulatory Matters

The Bank is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts, and ratios (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of December 31, 2003, and 2002, that the Bank met all capital adequacy requirements to which it is subject.

The most recent notification from the Federal Deposit Insurance Corporation as of December 31, 2003, categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. As of December 31, 2003, management believes that the Bank is categorized as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following tables. The Bank's actual capital amounts and ratios as of December 31, 2003 and 2002 are also presented in the table.

In addition to the minimum capital amounts and ratios outlined by the regulatory framework for prompt corrective action, the Bank has been required by the Office of Financial and Insurance Services (OFIS) and the Federal Deposit Insurance Corporation (FDIC) (collectively the regulators) to maintain a Tier I Capital to average assets ratio of 7.00%. As of December 31, 2003, the Bank is in compliance with all capital requirements.

Note 16 Plan of Merger

On October 14, 2003, the Corporation signed an Agreement and Plan of Merger with Fentura Financial, Inc. The Plan calls for the conversion of all outstanding common stock of the Corporation to cash in the amount of \$336.00 per share.

Certain financial requirements were outlined in the agreement, including a minimum net worth requirement to be maintained through the closing date. As of the closing date, the Corporation must have a minimum calculation of net book value of \$5,200,000 exclusive of certain allowable adjustments as outlined in the Plan. As of December 31, 2003, the Corporation has not reached the adjusted net book value. Management expects to reach adjusted net book value requirement by the closing date. The schedule of the adjusted net book value for the year ended December 31, 2003 is as follows:

	<u>Common Stock</u>	<u>Surplus</u>	<u>Retained Earnings</u>	<u>Accumulated Other Comprehensive Loss</u>	<u>Total</u>

Adjustment for costs expensed in accordance with the Plan of Merger, net of tax					68,220
Realized gains on the sale of securities recorded after October 1, 2003, net of tax					-
Unrealized losses on available for sale securities, net of tax					70,866
Total adjusted book value as of December 31, 2003					<u>\$ 5,172,541</u>
Required book value (per section 6.3 (i) of Plan of Merger)					\$ 5,200,000
Excess (Deficiency)					\$ (27,459)

Notes to Consolidated Financial Statements
December 31, 2003 and 2002

The Corporation has certain severance agreements which call for payments to certain officers and senior management of the Corporation upon termination resulting from a change in control. Liabilities related to these agreements have not been included in the Consolidated Balance Sheet at December 31, 2003.

Unaudited Pro Forma Condensed Combined Financial Statements

The following unaudited pro forma condensed combined balance sheet as of December 31, 2003, and the unaudited pro forma condensed combined statement of income for the year ended December 31, 2003, give effect to the Merger. This pro forma financial information is based on the historical consolidated financial statements of Fentura Financial, Inc. (Fentura) and West Michigan Financial Corporation (WMFC) and their subsidiaries under the assumptions and adjustments set forth in the accompanying notes to the unaudited pro forma condensed combined financial statements. The unaudited pro forma condensed combined balance sheet assumes the Merger was consummated on December 31, 2003. The unaudited pro forma condensed combined statement of income give effect to the Merger as if the Merger occurred at the beginning of 2003.

The unaudited pro forma condensed combined financial statements do not reflect restructuring and other Merger related expenses expected to be incurred by Fentura and WMFC, or the anticipated cost savings. As a result, the pro forma combined financial condition and results of operations of Fentura as of and after the Effective Time of the Merger may not be indicative of the results that actually would have occurred if the Merger had been in effect during the periods presented or of the results that may be attained in the future.
