FORM 10-Q/A

Rayonier Inc. (the Company) is amending its 2002 quarterly Form 10-Q reports following the consolidation of two third-party wood chip manufacturers previously accounted for as unconsolidated suppliers, as disclosed in Note 20-Restatements in the Company's Form 10-K filed on March 21, 2003. The restatement for the quarter ended September 30, 2002, as disclosed in Note 2-Restatements herein, involved reclassifying \$0.3 million from cost of sales to interest expense and adding \$12.8 million to assets and debt. Net income and earnings per share for the periods have not changed due to the restatements. The Condensed Consolidated Financial Statements for the three and nine months ended September 30, 2002 and 2001 and as of September 30, 2002 and December 31, 2001 are restated herein.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(Dollars in thousands unless otherwise stated)

1. BASIS OF PRESENTATION

The unaudited condensed consolidated financial statements reflect, in the opinion of Rayonier Inc. and its subsidiaries (collectively "Rayonier" or the Company), all adjustments (which include normal recurring adjustments) necessary for a fair presentation of the results of operations, the financial position and the cash flows for the periods presented. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the use of certain estimates by management in determining the amount of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. There are risks inherent in estimating, and therefore, actual results could differ from those estimates. For a full description of the Company's significant accounting policies, please refer to the Notes to Consolidated Financial Statements in the 2001 Annual Report on Form 10-K.

New Accounting Standards

In June 2002, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. This Statement nullifies Emerging Issues Task Force No. 94-3 and requires that a liability for a cost associated with an exit or disposal activity be recognized only when the liability is incurred. SFAS No. 146 is effective for exit or disposal activities that are initiated after December 31, 2002. The Company will adopt the standard effective January 1, 2003.

Reclassifications

Certain items in prior years' condensed consolidated financial statements have been reclassified to conform to the current year presentation.

2. RESTATEMENTS

Subsequent to the issuance of the Company's condensed consolidated financial statements for the three and nine months ended September 30, 2002, the Company's management determined that two third-party wood chip manufacturers, Georgia Chips and Fulghum Fibres Collins, Inc., originally accounted for since 1995 as unconsolidated suppliers of wood chips, should be consolidated within the Company's Financial Statements. The Company had entered into agreements with these two third parties whereby they would construct and operate these wood chip processing facilities on property owned by the Company. The Company guaranteed 85% of the notes payable used to finance the construction of these facilities. This guarantee has always been disclosed in the Company's Form 10-K filings in the Notes to Consolidated Financial Statements.

Edgar Filing: RAYONIER INC - Form 10-Q/A

Although these wood chip manufacturers have the ability and capacity to process chips for other customers, the Company has historically purchased all of the wood chips from these processing facilities.

As a result, the Condensed Consolidated Financial Statements as of September 30, 2002 and December 31, 2001 and for the three and nine months ended September 30, 2002 and 2001 have been restated from the amounts previously reported to consolidate these two wood chip manufacturers. Net income and earnings per share for the three and nine months ended September 30, 2002 and 2001 have not changed due to the restatement, as the wood chip costs had been included in cost of sales for those periods. Operating income for three and nine months ended September 30, 2002 and 2001 has changed to reflect a portion of the facilities' wood chip costs pertaining to an imputed interest charge being reclassified out of cost of sales into interest expense. Interest expense on the construction loans was indirectly passed to Rayonier through invoices for the cost of wood chips it purchased. Property, plant and equipment have been restated for an additional \$13 million and \$15 million, respectively, as of September 30, 2002 and December 31, 2001, with a corresponding increase in debt.

Operating income (loss) as stated in the preceding tables and as presented in the Condensed Statements of Consolidated Income is equal to Segment income (loss). The income (loss) items below Operating income in the Condensed Statements of Consolidated Income are not allocated to segments. These items, which include interest (expense) income, miscellaneous income (expense) and income tax (expense) benefit, are not considered by Company management to be part of segment operations.

6. DISCONTINUED OPERATIONS

During the second quarter of 2002, the Company sold its New Zealand East Coast timber operations and associated assets for \$64.4 million. In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, the sale and results of operations were

Edgar Filing: RAYONIER INC - Form 10-Q/A

recorded as discontinued operations. The agreement called for an initial down payment with the balance to be paid in monthly installments by December 30, 2002. As of September 30, 2002, the Company received \$17.9 million from the sale, while cash flow from the operation totaled \$6.1 million for the first nine months of 2002 and \$2.5 million for the same period in 2001. The Company recorded an after-tax loss from discontinued operations of approximately \$0.8 million or \$0.03 per share in the first nine months of 2002, consisting of an after-tax loss of approximately \$1.7 million from the sale, net of after-tax income from East Coast operations of \$0.9 million. The Condensed Statements of Consolidated Income, Condensed Statements of Consolidated Cash Flows and related Notes have been reclassified to present the East Coast operations as a discontinued operation. The East Coast operations and associated assets were previously reported in the Company's Timber and Land and Wood Products and Trading segments.

On October 23, 2002, the purchaser (Huaguang Forests Co. Limited of China, Huaguang) of the New Zealand East Coast timber operations prepaid the outstanding \$46.5 million note receivable.

	2002	2001	2002	2001
Net sales	\$	\$ 11,107	\$ 19,011	\$ 27,957
Operating income	\$ 95	\$ 304	\$ 1,650	\$ 783
Net income from discontinued operations	\$ 66	\$ 27	\$ 882	\$ 119

The Condensed Consolidated Balance Sheets, which have not been reclassified, include assets and liabilities of discontinued operations as follows:

	September 30, 2002	December 31, 2001
Current assets	\$ 62	\$ 4,017
Long-term assets		65,822
Total assets	62	69,839
Current liabilities	161	1,350
Other liabilities		1,366
Net (liabilities) assets of discontinued operations	\$ (99)	\$ 67,123

A provision in the Company's original agreement to purchase the East Coast property from the New Zealand government requires the Company, in the event of a sale, to guarantee five years of Crown Forest license obligations, estimated at \$1.2 million per year. However, Huaguang is the primary obligor and as such, has posted a performance bond with the New Zealand government.

7. FINANCIAL INSTRUMENTS

Edgar Filing: RAYONIER INC - Form 10-Q/A

The Company is exposed to various market risks, including changes in commodity prices, interest rates and foreign exchange rates. The Company's objective is to minimize the economic impact of these market risks. Derivatives are used, as noted below, in accordance with policies and procedures approved by the Finance Committee of the Board of Directors and are managed by a senior executive committee, whose responsibilities include initiating, managing and monitoring resulting exposures. The Company does not enter into such financial instruments for trading purposes.

In our New Zealand timber operations and at our New Zealand medium density fiberboard (MDF) manufacturing facility, certain normal operating expenses, including salaries and wages, wood purchases, contractor and license fees, care and maintenance of timberlands and other production costs incurred in manufacturing MDF, are denominated in New Zealand dollars. Rayonier hedges U.S./New Zealand dollar currency rate-risk with respect to these operating expenditures (cash flow hedging).

In the Company's Condensed Statements of Consolidated Income for the three and nine months ended September 30, 2002, gains of approximately \$0.6 million and \$1.0 million, respectively, were recorded on foreign currency contracts reflecting primarily realized gains on contracts that matured, plus the time value changes for outstanding contracts. The Company had mark to market after-tax gains on foreign currency contracts of approximately \$0.3 million in Accumulated other comprehensive income (loss) (AOCI) in the Condensed Consolidated Balance Sheet recorded as of September 30, 2002. When the forecasted transactions come to fruition and are recorded, the amounts in AOCI are reclassified to the Condensed

Statements of Consolidated Income. The Company expects to reclassify the AOCI amount into earnings during the next ten months.

At September 30, 2002, the Company held foreign currency forward contracts maturing through July 2003 totaling a nominal value of \$8.0 million. The largest nominal amount of contracts outstanding during the first nine months of 2002 totaled \$13.1 million.

In March 2002, the Company entered into an interest rate swap on \$50 million of 6.15% fixed rate notes payable maturing in February 2004. The swap converts interest payments from fixed rates to floating rates and matures in February 2004. The interest rate swap qualifies as a fair value hedge under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*. As such, the net effect from the interest rate swap is recorded as part of interest expense. The swap agreement settles every May 15, and November 15, until maturity. During the three and nine months ended September 30, 2002, this swap agreement reduced the Company's interest expense by \$0.3 million and \$0.5 million, respectively. Based upon current interest rates for similar transactions, the fair value of the interest rate swap agreement resulted in an asset of approximately \$1.6 million and a corresponding increase in debt at September 30, 2002.

On October 15, 2002, the Company paid off the remaining \$78 million of outstanding 7.5% notes utilizing \$63 million in available cash and \$15 million from its credit line. The \$78 million was recorded in Bank loans and current maturities in the September 30, 2002, Condensed Consolidated Balance Sheet. The Company has subsequently repaid the \$15 million in short-term credit line borrowings.

8. LEGAL PROCEEDINGS

Between 1985 and 1995, the Company sent contaminated soil excavated in connection with the cleanup of various closed wood processing sites to a third-party processor for recycling. The processing facility closed in 1995 and is the subject of a variety of environmental related charges by the EPA and the Louisiana Department of Environmental Quality. Also in dispute is disposal liability for approximately 150,000 tons of recycled material from Company sites that are still owned and retained by the processor. A consent decree was entered in 1998 approving sale of the processing facility and assumption by the buyer of responsibility for movement of all remaining recycled material to a landfill. The parties have been unable to complete the sale and the consent decree was vacated in May 2002. As a result, the status of the sale of the facility and ultimate responsibility for removal and disposal of the recycled material on-site are now uncertain. There are numerous possible outcomes, including the purchase of the facility by a third-party recycler, that will determine the Company's ultimate liability, if any. None of these outcomes are considered sufficiently probable at this time to warrant the recognition of a liability in the Company's financial statements. The Company is unable to formulate a range of possible losses. As such, the final outcome could have a material adverse effect on the Company's results of operations.

PART I. FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The Company has restated its Condensed Consolidated Financial Statements as of September 30, 2002 and December 31, 2001 and for the three and nine months ended September 30, 2002 and 2001 related to the consolidation of two-third party wood chip manufacturers as discussed in Note 2-Restatements. The MD&A gives effect to this restatement.

Critical Accounting Policies

The preparation of Rayonier's consolidated financial statements requires estimates, assumptions and judgements that affect the Company's assets, liabilities, revenues and expenses. The Company bases these estimates and assumptions on historical data and trends, current fact patterns, expectations and other sources of information it believes are reasonable. Actual results may differ from these estimates under different conditions. For a full description of the Company's critical accounting policies, see the Management Discussion and Analysis in the 2001 Annual Report on Form 10-K.

Pension Liabilities

The severe decline in the U.S. equity markets has reduced the value of the Company's pension plan assets and lower interest rates have increased the net present value of accumulated benefit obligations. At September 30, 2002, the Company's plans were underfunded (projected benefit obligation in excess of the fair market value of the plan assets) by approximately \$68 million versus \$16 million at December 31, 2001. As a result, assuming plan asset values and interest rates remain at September 30, 2002 levels, the Company would be required at year-end to record a non-cash, after-tax charge to Shareholders' Equity of approximately \$30 to \$35 million for minimum pension fund liabilities. Under such circumstances, and taking into account expected changes in key pension assumptions, pension expense for 2003 would increase approximately \$3 to \$4 million from 2002 and 2001 levels of \$3.4 million. The required cash contribution for plan year 2003 would then be \$10 to \$11 million, which can be funded no later than September 15, 2004, although the Company may elect to contribute such amount in 2003. The Company contributed \$0.6 million during the first nine months of 2002 and \$20.8 million during 2001.

Segment Information

Rayonier operates in three reportable segments: Performance Fibers, Timber and Land, and Wood Products and Trading. Performance Fibers includes two business units, Cellulose Specialties and Absorbent Materials. The Timber and Land segment includes two business units, Timber and Land.

Table of Contents

The amounts and relative contributions to sales and operating income (loss) attributable to each of Rayonier's reportable business segments were as follows (thousands of dollars):

Operating income (loss) as stated in the preceding tables and as presented in the Condensed Statements of Consolidated Income is equal to Segment income (loss). The income (loss) items below Operating income in the Condensed Statements of Consolidated Income are not allocated to segments. These items, which include interest (expense) income, miscellaneous income (expense) and income tax (expense) benefit, are not considered by Company management to be part of segment operations.

Results of Operations

Sales and Operating Income

Sales and operating income for the third quarter of 2002 of \$293 million and \$36 million were \$29 and \$13 million, respectively, above the comparable period in the prior year. The sales increase was primarily due to higher land sales and improved trading activity, partly offset by lower performance fibers and lumber prices. Operating income improved mainly due to higher land sales and lower performance fibers manufacturing costs, partly offset by weaker performance fibers and lumber prices.

Sales and operating income of \$831 million and \$103 million for the nine months ended September 30, 2002 were \$39 million and \$22 million, respectively, below the same period in the prior year. Sales decreased due to lower performance fibers volume and prices, and reduced Southeast U.S. timber volume and land sales. This was partly offset by increased lumber volume and trading activity. Operating income was lower due to weaker performance fibers prices, U.S. timber prices and Southeast U.S. timber volume, partly offset by favorable performance fibers and lumber manufacturing costs.

Table of Contents

Performance Fibers

Sales for the third quarter of 2002 were \$139 million, \$2 million above the prior year third quarter due to higher volumes, partly offset by lower prices. Operating income for the third quarter of 2002 of \$11 million was \$6 million above the prior year third quarter due to reduced manufacturing costs, partly offset by lower prices. Fluff pulp prices during the third quarter of 2002 were 4 percent below the third quarter of 2001.

Sales for the nine months ended September 30, 2002, were \$392 million, \$29 million below the same period in the prior year due to lower volumes and absorbent material prices. Operating income for the nine months ended September 30, 2002, was \$29 million, \$5 million below the same period in the prior year due to lower absorbent materials prices, partly offset by favorable manufacturing costs.

Cellulose Specialties

Sales of \$97 million for the third quarter of 2002 were \$1 million above the prior year third quarter. While prices declined by 2 percent due to a change in product mix, there was a 4 percent increase in volume. Sales of \$275 million for the nine months ended September 30, 2002, were \$7 million below the same period in the prior year, primarily due to a 1 percent decrease in price and volume. Prices for acetate fibers (our principal cellulose specialties product) remained steady; however, prices for other cellulose based products declined slightly.

Absorbent Materials

Sales of \$42 million for the third quarter of 2002 were \$1 million above the prior year third quarter due to an 8 percent increase in volume, partly offset by a 6 percent decline in average fluff pulp prices. Sales of \$118 million for the nine months ended September 30, 2002, were \$22 million below the same period in the prior year as prices declined 14 percent and sales volumes declined 3 percent. Fluff pulp prices are impacted by commodity paper pulp prices, which declined during 2001 and have remained at depressed levels during 2002 due to the sluggish global economy.

Timber and Land

Sales of \$64 million and operating income of \$33 million for the third quarter of 2002 were \$18 million and \$11 million above the prior year third quarter, respectively, due to higher land sales, partly offset by lower timber sales volume.

Sales and operating income of \$183 million and \$94 million for the nine months ended September 30, 2002, were \$34 million and \$20 million, respectively, below the same period in the prior year. These decreases were principally due to lower Southeast U.S. timber volumes and land sales and weaker U.S. timber prices.

Timber

Sales for the third quarter of 2002 were \$36 million, \$3 million below the prior year third quarter due to a 23 percent decrease in timber volume in the Northwest U.S. and a 4 percent reduction in Southeast U.S. pine prices. Operating income of \$14 million for the third quarter of 2002 was \$2 million below the prior year third quarter primarily due to lower U.S. timber volume and Southeast U.S. timber prices, partly offset by higher New Zealand timber prices and the favorable impact of balance sheet related foreign exchange translation. Sales of \$124 million and operating income of \$56 million for the nine months ended September 30, 2002,, were \$23 million and \$17 million below the same period in the prior year, respectively. These decreases were due to price declines in the U.S. and an 18 percent decline in Southeast U.S. timber volume, partly offset by an 11 percent increase in New Zealand timber prices.

Land

Sales for the third quarter of 2002 of \$28 million and operating income of \$19 million increased \$21 million and \$13 million, respectively, from the prior year third quarter primarily due to the timing of sales in 2002. Sales of \$60 million for the nine months ended September 30, 2002, were \$11 million below the same period in the prior year primarily due to the \$59 million major sale that occurred in 2001, partly offset by an increase in higher and better use sales. Operating income of \$38 million for the nine months ended September 30, 2002, was \$3 million below the same period in the prior year due to lower sales. Sales and operating income can fluctuate materially from period to period due to the unpredictability of the closing process of real estate transactions.

Table of Contents

Wood Products and Trading

Sales for the third quarter of 2002 were \$91 million compared to \$83 million in the prior year third quarter. The operating results for the third quarter of 2002 were a loss of \$5 million, compared with a loss of \$2 million in the prior year third quarter. Despite improved sales, the operating loss increased as higher trading activity was more than offset by lower lumber prices. The enactment of a countervailing and anti-dumping duty on Canadian imports in the second quarter of 2002 has not resulted in a decline in Canadian lumber imports and U.S. lumber prices continue to be adversely impacted. The Company does not expect any significant, near-term improvement in lumber markets and profitability.

Sales for the nine months ended September 30, 2002, of \$264 million were \$22 million above the same period in the prior year. The increase was due to a 27 percent increase in lumber volume and higher trading activity, partly offset by a 4 percent decrease in lumber prices. The operating loss of \$7 million for the nine months ended September 30, 2002, was a \$1 million improvement over the loss in the same period in the prior year. This was due to lower lumber manufacturing costs and improved trading margins partly offset by lower lumber prices.

Corporate and Other

Corporate and Other expenses of \$3 million for the third quarter of 2002 were slightly above the third quarter of 2001 due to the unfavorable impact of balance sheet related foreign exchange translation. Corporate and Other expenses for the nine months ended September 30, 2002, were \$12 million, \$2 million below the same period in the prior year. The decrease primarily resulted from the favorable impact of balance sheet related foreign exchange translation partly offset by higher stock-price based incentive compensation.

Other Income / Expense

Interest expense for the third quarter of 2002 was \$15 million, a decrease of \$2 million from the prior year third quarter mainly due to lower debt. Interest expense for the nine months ended September 30, 2002, was \$45 million compared to \$54 million for the same period in the prior year due to lower debt and slightly lower rates.

The effective tax rate for the third quarter of 2002 was 29.1 percent compared to 5.5 percent for the prior year third quarter, which was unusually low primarily due to the positive catch-up effect of re-estimating the annual effective tax rate at that time. The effective tax rate for the nine months ended September 30, 2002, was 28.4 percent compared to 31.1 percent for the same period in the prior year. During the third quarter and the nine months ended September 30, 2002, the Company's effective tax rate continued to be below the U.S. statutory levels primarily due to lower taxes on foreign operations and research and development tax credits.

The following table reconciles the Company's income tax provision at the U.S. statutory tax rate to the reported provision and effective tax rate for the first nine months of 2002 and 2001 (in millions):

Income from Continuing Operations

Income from continuing operations for the third quarter of 2002 was \$15 million, or \$0.55 per diluted common share, compared to \$6 million, or \$0.22 per diluted common share, for the prior year third quarter. The increase is primarily due to higher land sales, reduced performance fibers manufacturing costs and interest expense, partly offset by lower lumber and performance fibers prices. Income from continuing operations of \$42 million, or \$1.49 per diluted common share, for the nine months ended September 30, 2002, was \$8 million, or \$0.31 per share, below the same period in the prior year. The decrease was due to lower performance fibers and timber prices, and reduced timber harvest volume, partly offset by a decline in interest expense.

Income (loss) from Discontinued Operations

The Company had income of \$0.2 million or \$0.01 per share from discontinued operations in the third quarter of 2002, due to post-closing adjustments related to the second quarter sale of the New Zealand East Coast timber operations. For the nine months ended September 30, 2002, the loss from discontinued operations was \$0.8 million or \$0.03 per share.

Other Items

The Company expects fourth quarter 2002 earnings to be lower than third quarter primarily due to the timing of land sales and higher chemical, fuel and other manufacturing costs in our performance fibers segment.

Liquidity and Capital Resources

Cash Flow

Cash flow provided by operating activities from continuing operations of \$204 million for the nine months ended September 30, 2002, was \$11 million below the same period in the prior year, primarily due to lower income and higher working capital requirements. Cash provided by operating activities from continuing operations for the nine months ended September 30, 2002, financed almost all of the Company's capital expenditures of \$57 million, dividends of \$30 million and debt payments of \$125 million (net). Cash flow used for financing activities for the nine months ended September 30, 2002, was slightly less than the prior year period as a result of additional new capital from the exercise of stock options, partly offset by higher debt repayments (net) and share repurchases. The Company repurchased 70,000 of its common shares during the nine months ended September 30, 2002, for \$3 million compared to 52,900 shares repurchased for \$2 million in the first nine months of 2001. Cash from discontinued operations provided an additional \$24 million during the first nine months of 2002 versus \$3 million from the same period in the prior year. On September 30, 2002, the Company had cash investments of \$35 million, an increase of \$28 million from year-end. The cash investments consisted of marketable securities with maturities at date of acquisition of 90 days or less.

Edgar Filing: RAYONIER INC - Form 10-Q/A

On October 23, 2002, the purchaser (Huaguang Forests Co. Limited of China, Huaguang) of the New Zealand East Coast timber operations prepaid the outstanding \$46.5 million note receivable.

The discussion below is presented to enhance the reader's understanding of Rayonier's ability to generate cash, its liquidity and its ability to satisfy rating agency and creditor requirements. This information includes two measures of financial results: EBITDA and Free Cash Flow. EBITDA is defined as earnings from continuing operations before significant non-recurring items, provision for dispositions, interest expense, income taxes, depreciation, depletion, amortization and the non-cash cost of land sales. Free Cash Flow is defined as cash provided by operating activities of continuing operations less net custodial capital spending, dividends at prior year level and the tax benefit on the exercise of stock options. This definition has been modified from prior periods to exclude the change in cash and cash equivalents. These two measures are not defined by Generally Accepted Accounting Principles (GAAP). The discussion of EBITDA and Free Cash Flow is not intended to conflict with or change any of the GAAP disclosures described above, but to provide supplementary information that management deems to be relevant to analysts, investors and creditors. EBITDA and Free Cash Flow as defined may not be comparable to similarly titled measures reported by other companies.

EBITDA for the third quarter of 2002 was \$82 million, \$20 million above the prior year third quarter. The increase was primarily due to higher land sales and lower performance fibers manufacturing costs. EBITDA for the nine months ended September 30, 2002, was \$235 million, \$37 million below the same period in the prior year primarily due to lower land sales, a decline in performance fibers prices and a decrease in U.S. timber volume and prices, partly offset by a reduction in performance fibers manufacturing costs.

Debt

At September 30, 2002, debt was \$742 million, representing a reduction of \$123 million from December 31, 2001. The debt-to-capital ratio was 50.2 percent compared with 55.0 percent at December 31, 2001, while net debt, defined as debt less cash invested, of \$707 million at September 30, 2002, resulted in a net debt-to-capital ratio of 49.0 percent. Although net debt is not a measure defined by GAAP, it is provided as supplementary information relevant to analysts, investors and creditors.

On October 15, 2002, the Company paid off the remaining \$78 million of outstanding 7.5% notes utilizing \$63

million in available cash and \$15 million from its credit lines. The \$78 million was recorded in Bank loans and current maturities in the September 30, 2002, Condensed Consolidated Balance Sheet. The Company subsequently repaid the \$15 million in short-term credit line borrowings. At September 30, 2002, Rayonier had \$275 million available under its committed revolving credit facilities. The Company plans to reduce its revolving credit facilities from \$300 million to \$245 million effective November 18, 2002.

In conjunction with the Company's long-term debt, certain covenant restrictions are required on the ratio of EBITDA to interest expense and EBITDA to total debt. In addition, there are covenant requirements in effect for Rayonier Timberlands Operating Company, L.P. (RTOC) on the ratio of cash flow available for fixed charges to fixed charges and the ratio of debt to cash flow available for fixed charges. The covenants listed below are calculated on a trailing 12-month basis.

Table of Contents

The most restrictive long-term debt covenants in effect for Rayonier as of September 30, 2002, were as follows:

	Covenant Requirement	Actual ratio at September 30, 2002
EBITDA to consolidated interest expense should not be less than	2.50 to 1	4.82 to 1
Total debt to EBITDA should not exceed	4.00 to 1	2.58 to 1
Consolidated cash flow available for fixed charges to consolidated fixed charges should not be less than	1.65 to 1	2.25 to 1
Consolidated debt to consolidated cash flow available for fixed charges may not exceed	4.25 to 1	3.16 to 1

In addition to the covenants listed above, the credit agreements include customary covenants that limit the incurrence of debt, the disposition of assets and the making of certain payments between RTOC and Rayonier. The Company is currently in compliance with all of these covenants.

The Company has on file with the Securities and Exchange Commission shelf registration statements to offer \$150 million of new public debt securities. The Company believes that internally generated funds, combined with available external financing, will enable Rayonier to fund capital expenditures, share repurchases, working capital and other liquidity needs for the foreseeable future.

During the second quarter of 2002, the Company guaranteed five years of Crown forest timberland lease obligations estimated at \$1.2 million per year in conjunction with the sale of its New Zealand East Coast operations. See Note 6 *Discontinued Operations* in the Notes to the Condensed Consolidated Financial Statements for additional information regarding the guarantee. No other material changes in guarantees or financial instruments such as letters of credit and surety bonds occurred during the first nine months of 2002.

New Accounting Standards

In June 2002, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. This Statement nullifies Emerging Issues Task Force No. 94-3 and requires that a liability for a cost associated with an exit or disposal activity be recognized only when the liability is incurred. SFAS No. 146 is effective for exit or disposal activities that are initiated after December 31, 2002. The Company will adopt the standard effective January 1, 2003.

PART I. FINANCIAL INFORMATION**Item 3. Quantitative and Qualitative Disclosures About Market Risk****Market Risk**

Edgar Filing: RAYONIER INC - Form 10-Q/A

The Company is exposed to various market risks, including changes in commodity prices, foreign exchange rates and interest rates. The Company's objective is to minimize the economic impact of these market risks. Derivatives are used in accordance with policies and procedures approved by the Finance Committee of the Board of Directors and are managed by a senior executive committee whose responsibilities include initiating, managing and monitoring resulting exposures. The Company does not enter into financial instruments for trading purposes. See also See Note 7 Financial Instruments included in the Notes to the Condensed Consolidated Financial Statements.

The fair market value of long-term fixed interest rate debt is subject to interest rate risk; however, Rayonier intends to hold most of its debt until maturity. During the first quarter of 2002, the Company entered into an interest rate swap in order to achieve a desired ratio of fixed and floating interest rates in its portfolio. As of September 30, 2002, the interest rate swap's fair market value resulted in an asset of \$1.6 million and a comparable increase in debt. Generally, the fair market value of fixed-interest rate debt will increase as interest rates fall and decrease as interest rates rise.

Circumstances surrounding the Company's exchange rate risk, commodity price risk and interest rate risk remain unchanged from December 31, 2001. For a full description of the Company's market risk, please refer to Item 7, *Management Discussion and Analysis of Financial Condition and Results of Operations*, in the 2001 Annual Report on Form 10-K.

Safe Harbor

Comments about market trends; anticipated earnings, manufacturing costs, pension expenses and funding, timing of land sales and repayment of borrowings are forward-looking and are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. The following important factors, among others, could cause actual results to differ materially from those expressed in the forward-looking statements: changes in global market trends and world events; interest rate and currency movements; changes in capital markets; fluctuations in demand for cellulose specialties, absorbent materials, timber and wood products; adverse weather conditions; changes in production costs for wood products and performance fibers, particularly for raw materials such as wood, energy and chemicals; unexpected delays in the closing of land sale transactions; and implementation or revision of governmental policies and regulations affecting the environment, import and export controls and taxes. For additional factors that could impact future results, please see the Company's 2001 Annual Report on Form 10-K on file with the Securities and Exchange Commission.

Item 4. Controls and Procedures

On November 4, 2002, the Company's disclosure committee met with the Chief Executive Officer and the Chief Financial Officer (the certifying officers) to evaluate the Company's disclosure controls and procedures. Based on such evaluation, the certifying officers concluded that the Company's disclosure controls and procedures are well designed and effective in seeing that material information regarding the Company is promptly made available to senior management, including the certifying officers, in order to allow the Company to meet its reporting requirements under the Securities Exchange Act of 1934 in a timely manner. The Company's disclosure committee met with the Chief Executive Officer and the Chief Financial Officer again on November 13, 2002, to finalize disclosure in this Form 10-Q.

There were no significant changes in the Company's internal controls or in other factors that could significantly affect internal controls subsequent to the date of their most recent evaluation.
