SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE QUARTERLY PERIOD ENDED

For the quarterly period ended **March 31, 2003**

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 FOR THE TRANSITION PERIOD FROM _____ TO _____

Commission File Number **1-13578**

DOWNEY FINANCIAL CORP.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

33-0633413

(I.R.S. Employer Identification No.)

3501 Jamboree Road, Newport Beach, CA

(Address of principal executive office)

92660

(Zip Code)

Registrant's telephone number, including area code

(949) 854-0300

Securities registered pursuant to Section 12(b) of the Act:

Title of each class
Common Stock, \$0.01 Par Value

Name of each exchange
on which registered
**New York Stock Exchange
Pacific Exchange**

Securities registered pursuant to Section 12(g) of the Act:

None

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

At March 31, 2003, 27,928,722 shares of the Registrant's Common Stock, \$0.01 par value were outstanding.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE (1) Basis of Financial Statement Presentation

In the opinion of Downey Financial Corp. and subsidiaries ("Downey," "we," "us" and "our"), the accompanying consolidated financial statements contain all adjustments (consisting of only normal recurring accruals) necessary for a fair presentation of Downey's financial condition as of March 31, 2003, December 31, 2002 and March 31, 2002, and the results of operations, comprehensive income and changes in cash flows for the three months ended March 31, 2003 and 2002. Certain prior period amounts have been reclassified to conform to the current period presentation.

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial statements and are in compliance with the instructions for Form 10-Q and therefore do not include all information and footnotes necessary for a fair presentation of financial condition, results of operations, comprehensive income and cash flows. The following information under the heading Management's Discussion and Analysis of Financial Condition and Results of Operations is written with the presumption that the interim consolidated financial statements will be read in conjunction with Downey's Annual Report on Form 10-K for the year ended December 31, 2002, which contains among other things, a description of the business, the latest audited consolidated financial statements and notes thereto, together with Management's Discussion and Analysis of Financial Condition and Results of Operations as of December 31, 2002 and for the year then ended. Therefore, only material changes in financial condition and results of operations are discussed in the remainder of Part I.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

NOTE (2) Mortgage Servicing Rights

The following table summarizes the activity in mortgage servicing rights and its related allowance for the quarters indicated and other related financial data.

Impairment write-down	(8,589)	(6,435)	(2,579)	(717)	(2,762)
Allowance balance at end of period	35,672	32,855	36,793	21,329	6,333
Total mortgage servicing rights, net	\$ 56,506	\$ 57,729	\$ 46,912	\$ 59,771	\$ 68,581
Estimated fair value ^(a)	\$ 56,506	\$ 57,736	\$ 46,986	\$ 59,771	\$ 70,532
Weighted average expected life (in months)	39	43	39	61	87
Custodial account earnings rate	1.58 %	1.61 %	2.06 %	3.82 %	4.61 %
Weighted average discount rate	7.39	8.35	8.19	9.10	9.13
At period end					
Mortgage loans serviced for others:					
Total	\$ 8,535,480	\$ 8,316,236	\$ 7,502,157	\$ 6,962,403	\$ 6,408,812
With capitalized mortgage servicing rights: ^(a)					
Amount	8,460,152	8,036,393	7,355,700	6,807,306	6,196,137
Weighted average interest rate	6.35 %	6.51 %	6.71 %	6.80 %	6.85 %
Custodial escrow balances	\$ 7,578	\$ 15,243	\$ 21,628	\$ 13,044	\$ 6,103

^(a) The estimated fair value may exceed book value for certain asset strata and excluded loans sold or securitized prior to 1996 and loans temporarily sub-serviced without capitalized mortgage servicing rights.

Key assumptions, which vary due to changes in market interest rates and are used to determine the fair value of mortgage servicing rights, include: expected prepayment speeds, which impact the average life of the portfolio; the earnings rate on custodial accounts, which impact the value of custodial accounts; and the discount rate used in valuing future cash flows. The following table summarizes the estimated changes in the fair value of mortgage servicing rights for changes in those assumptions individually and in combination associated with an immediate 100 basis point increase or decrease in market rates. Also summarized is the earnings impact associated with provisions for or reductions of the valuation allowance for mortgage servicing rights. Impairment is measured on a disaggregated basis based upon the predominant risk characteristics of the underlying mortgage loans such as term and coupon. Certain stratum may have impairment, while other stratum may not. Therefore, changes in overall fair value may not equal provisions for or reductions of the valuation allowance.

The sensitivity analysis in the table below is hypothetical and should be used with caution. As the figures indicate, changes in fair value based on a 100 basis point variation in assumptions generally cannot be easily extrapolated because the relationship of the change in the assumptions to the change in fair value may not be linear. Also, in this table, the effect that a change in a particular assumption may have on the fair value is calculated without changing any other assumptions. In reality, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities.

<i>(Dollars in Thousands)</i>	<i>Expected Prepayment Speeds</i>	<i>Custodial Accounts Rate</i>	<i>Discount Rate</i>	<i>Combination</i>
Increase rates 100 basis points: ^(a)				
Increase (decrease) in fair value	\$ 41,943	\$ 3,771	\$ (1,389)	\$ 39,565
Reduction of (increase in) valuation allowance	32,113	3,381	(1,389)	32,044
Decrease rates 100 basis points: ^(b)				
Increase (decrease) in fair value	(19,916)	(3,598)	1,458	(23,274)
Reduction of (increase in) valuation allowance	(19,916)	(3,598)	1,456	(23,274)

^(a) The weighted-average expected life is 76 months.

^(b) The weighted-average expected life is 24 months.

The following table presents a breakdown of the components of loan servicing loss included in Downey's results of operations for the quarters indicated.

Total loan servicing loss, net	\$ (13,686)	\$ (4,461)	\$ (18,963)	\$ (15,617)	\$ (588)

NOTE (3) Derivatives, Hedging Activities, Off-Balance Sheet Arrangements and Contractual Obligations

Derivatives

Downey offers short-term interest rate lock commitments to help attract potential home loan borrowers. The commitments guarantee a specified interest rate for a loan if underwriting standards are met, but do not obligate the potential borrower. Accordingly, a certain number of commitments never become loans and merely expire. The residential one-to-four unit rate lock commitments Downey ultimately expects to result in loans and sell in the secondary market are treated as derivatives. Consequently, as derivatives, the hedging of the expected rate lock commitments do not qualify for hedge accounting. Associated fair value adjustments to the notional amount of the expected rate lock commitments are recorded in current earnings under net gains (losses) on sales of loans and mortgage-backed securities with an offset to the balance sheet in either other assets, or accounts payable and accrued liabilities. Fair values for the notional amount of expected rate lock commitments are based on observable market prices acquired from third parties. The carrying amount of loans held for sale includes a basis adjustment to the loan balance at funding resulting from the change in fair value of the rate lock derivative from the date of commitment to the date of funding. At March 31, 2003, Downey had a notional amount of expected rate lock commitments identified to sell as part of its secondary marketing activities of \$958 million, with a change in fair value resulting in a gain of \$4.6 million.

Hedging Activities

As part of secondary marketing activities, Downey typically utilizes short-term forward sale and purchase contracts derivatives that mature in less than one year to offset the impact of changes in market interest rates on the value of residential one-to-four unit expected rate lock commitments and loans held for sale. Downey does not generally enter into derivative transactions for purely speculative purposes. Contracts designated as hedges for the forecasted sale of loans from our held for sale portfolio are accounted for as cash flow hedges because these contracts have a high correlation to the price movement of the loans being hedged (within a range of 80% - 125%). The measurement approach for determining the ineffective aspects of the hedge is established at the inception of the hedge. Changes in fair value of the notional amount of forward sale contracts not designated as cash flow hedges and the ineffectiveness of hedge transactions that are not perfectly correlated are recorded in net gains (losses) on sales of loans and mortgage-backed securities. Changes in fair value of the notional amount of forward sale contracts designated as cash flow hedges for loans held for sale are recorded in other comprehensive income, net of tax, provided cash flow hedge requirements are met. The offset to these changes in fair value of the notional amount of forward sale contracts are recorded in the balance sheet as either other assets, or accounts payable and accrued liabilities. The amounts recorded in accumulated other comprehensive income will be recognized in the income statement when the hedged forecasted transactions settle. Downey estimates that all of the related unrealized gains or losses in accumulated other comprehensive income will be reclassified into earnings within the next three months. Fair values for the notional amount of forward sale contracts are based on observable market prices acquired from third parties. At March 31, 2003, the notional amount of forward sale contracts amounted to \$1.5 billion, with a change in fair value resulting in a loss of \$8.8 million, of which \$624 million were designated as cash flow hedges. The notional amount of forward purchase contracts amounted to \$6 million, with an estimated fair value loss of \$14,000.

Downey has not discontinued any designated derivative instruments associated with loans held for sale due to a change in the probability of settling a forecasted transaction.

The following table shows the impact from non-qualifying hedges and the ineffectiveness of cash flow hedges on net gains (losses) on sales of loans and mortgage-backed securities (i.e., SFAS 133 effect), as well as the impact to other comprehensive income (loss) from qualifying cash flow transactions for the periods indicated. Also shown is the notional amount of expected rate lock commitment derivatives for loans originated for sale, loans held for sale and the notional amounts of their associated hedging derivatives (i.e., forward sale contracts).

mortgage-backed securities (SFAS 133 effect)	(139)	4,287	(2,663)	(390)	4,864
Other comprehensive income (loss)	1,591	(1,272)	(840)	(1,138)	1,355

Notional amount at period end

Non-qualifying hedge transactions:

Expected rate lock commitments	\$ 957,549	\$ 614,592	\$ 892,429	\$ 503,359	\$ 235,099
Associated forward sale contracts	913,034	624,062	1,024,586	501,292	230,660
Associated forward purchase contracts	6,000	50,000	165,000	3	-

Qualifying cash flow hedge transactions:

Loans held for sale, at lower of cost or fair value	633,676	652,052	665,587	381,465	388,468
Associated forward sale contracts	624,002	623,975	659,305	378,238	392,099

These forward contracts expose Downey to credit risk in the event of nonperformance to such agreements by the other parties primarily government-sponsored enterprises such as Federal National Mortgage Association. This risk consists primarily of the termination value of agreements where Downey is in an unfavorable position. Downey controls the credit risk associated with its other parties to the various derivative agreements through credit review, exposure limits and monitoring procedures. Downey does not anticipate nonperformance by the other parties.

Financial Instruments with Off-Balance Sheet Risk

Downey utilizes financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers and to reduce its own exposure to fluctuations in interest rates. These financial instruments include commitments to originate fixed and variable rate mortgage loans held for investment, undisbursed loan funds, lines of credit and letters of credit, and commitments to purchase loans and mortgage-backed securities for our portfolio. The contract or notional amounts of those instruments reflect the extent of involvement Downey has in particular classes of financial instruments.

Commitments to originate fixed and variable rate mortgage loans are agreements to lend to a customer as long as there is no violation of any condition established in the commitment. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some commitments expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Undisbursed loan funds and unused lines of credit include funds not disbursed, but committed to construction projects and home equity and commercial lines of credit. Letters of credit are conditional commitments issued by Downey to guarantee the performance of a customer to a third party.

The following is a summary of commitments and contingent liabilities with off-balance sheet risk at the dates indicated.

(In Thousands)	March 31, 2003	December 31, 2002	September 30, 2002	June 30, 2002	March 31, 2002
Commitments to originate loans held for investment:					
Adjustable	\$ 190,737	\$ 249,121	\$ 261,365	\$ 324,686	\$ 375,199
Fixed	117	716	1,459	2,112	224
Undisbursed loan funds and unused lines of credit	178,754	189,283	184,074	188,472	144,607
Letters of credit and other contingent liabilities	6,031	2,662	2,534	2,514	2,652

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

Commitments to purchase loans	5,200	-	294,476	-	-
Commitments to invest in affordable housing funds	2,400	2,400	2,400	2,400	2,400

Downey uses the same credit policies in making commitments to originate loans held for investment, lines of credit and letters of credit as it does for on-balance sheet instruments. For commitments to originate loans held for investment, the contract amounts represent exposure to loss from market fluctuations as well as credit loss. In regard to these commitments, adverse changes from market fluctuations are generally not hedged. Downey controls the credit risk of its commitments to originate loans held for investment through credit approvals, limits and monitoring procedures. The credit risk involved in issuing lines and letters of credit requires the same creditworthiness evaluation as that involved in extending loan facilities to customers. Downey evaluates each customer's creditworthiness.

Downey receives collateral to support commitments for which collateral is deemed necessary. The most significant categories of collateral include real estate properties underlying mortgage loans, liens on personal property and cash on deposit with Downey.

In connection with its interest rate risk management, Downey may enter into interest rate exchange agreements ("swap contracts") with certain national investment banking firms under terms that provide mutual payment of interest on the outstanding notional amount of the swap. These swap contracts reduce Downey's interest rate risk between repricing assets and liabilities. No swap contracts were outstanding at March 31, 2003, December 31, 2002 and March 31, 2002.

Litigation

Downey has been named as a defendant in legal actions arising in the ordinary course of business, none of which, in the opinion of management, is material.

NOTE (4) Income Taxes

Downey and its wholly owned subsidiaries file a consolidated federal income tax return and various state income and franchise tax returns on a calendar year basis. The Internal Revenue Service and state taxing authorities have examined Downey's tax returns for all tax years through 1997. Downey's management believes it has adequately provided for potential exposure to issues that may be raised in the years subsequent to 1997, which remain open to review.

NOTE (5) Employee Stock Option Plans

Downey has a Long Term Incentive Plan (the "LTIP"), which provides for the granting of stock appreciation rights, restricted stock, performance awards and other awards. The LTIP specifies an authorization of 434,110 shares (adjusted for stock dividends and splits) of common stock to be available for issuance. Under the LTIP, options are exercisable over vesting periods specified in each grant and, unless exercised, the options terminate between five or ten years from the date of the grant. Further, under the LTIP, the option price shall at least equal or exceed the fair market value of such shares on the date the options are granted. No shares have been granted under the LTIP since 1998. At March 31, 2003, Downey had 306,300 shares of treasury stock that may be used to satisfy the exercise of options or for payment of other awards. No other stock based plan exists.

Downey measures its employee stock-based compensation arrangements under the provisions of Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"). Accordingly, no compensation expense has been recognized for the stock option plan, as stock options were granted at fair value at the date of grant. Had compensation expense for Downey's stock option plan been determined based on the fair value estimated using the Black-Scholes model at the grant date for previous awards, Downey's net income and income per share would have been reduced to the pro forma amounts indicated for the quarters below:

	December	September	June 30,	March 31,
	March 31,	31,	30,	31,
	2003	2002	2002	2002
(In Thousands, Except Per Share Data)				

Net income:

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

As reported	\$ 30,217	\$ 39,972	\$ 14,568	\$ 20,375	\$ 37,378
Stock-based compensation expense, net of tax	-	(4)	(3)	(3)	(3)
Pro forma	30,217	39,968	14,565	20,372	37,375
Earnings per share Basic:					
As reported	\$ 1.08	\$ 1.43	\$ 0.52	\$ 0.72	\$ 1.32
Pro forma	1.08	1.43	0.52	0.72	1.32

As reported	1.08	1.43	0.52	0.72	1.32
Pro forma	1.08	1.43	0.52	0.72	1.32

As of December 31, 2002, stock-based compensation would have been fully expensed over the expected life of the stock options granted, if Downey had recorded stock-based compensation expense.

NOTE (6) Earnings Per Share

Earnings per share is calculated on both a basic and diluted basis. Basic earnings per share excludes dilution and is computed by dividing income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted from the issuance of common stock that then shared in earnings, excluding common shares in treasury.

The following table presents a reconciliation of the components used to derive basic and diluted earnings per share for the quarters indicated.

	<i>Three Months Ended March 31,</i>					
	<i>2003</i>			<i>2002</i>		
	<i>Net</i>	<i>Weighted Average Shares</i>	<i>Per Share</i>	<i>Net</i>	<i>Weighted Average Shares</i>	<i>Per Share</i>
<i>(Dollars in Thousands, Except Per Share Data)</i>	<i>Income</i>	<i>Outstanding</i>	<i>Amount</i>	<i>Income</i>	<i>Outstanding</i>	<i>Amount</i>

NOTE (8) Current Accounting Issues***Statement of Financial Accounting Standards No. 148.***

Statement of Financial Accounting Standards No. 148, "Accounting for Stock-Based Compensation Transition and Disclosure" ("SFAS 148"), amends Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" ("SFAS 123"), to provide alternative methods of transition for an entity that voluntarily changes to the fair value method of accounting for stock-based employee compensation. SFAS 148 also amends the disclosure provisions of SFAS 123 to require prominent disclosure about the effects on reported net income of Downey's accounting policy decisions with respect to stock-based employee compensation. Finally, SFAS 148 amends APB Opinion No. 28, "Interim Financial Reporting," to require disclosure about those effects in interim financial information. Presently, Downey does not intend to adopt the fair value method. For further information regarding Downey's accounting for stock options, See Note 5 on page 10.

Financial Accounting Standards Board Interpretation 46.

Financial Accounting Standards Board Interpretation 46, "Provides Guidance to Improve Financial Reporting for SPEs, Off-Balance Sheet Structures and Similar Entities" ("FIN 46"), requires a variable interest entity to be consolidated by a company if that company is subject to a majority of the risk of loss from the variable interest entity's activities or is entitled to receive a majority of the entity's residual returns or both. Prior to FIN 46, a company included another entity in its

 Page 11
[Navigation Links](#)

consolidated financial statements only if it controlled the entity through voting interests. FIN 46 also requires disclosures about variable interest entities that the company is not required to consolidate but in which it has a significant variable interest. The consolidated requirements of FIN 46 apply immediately to variable interest entities created after January 31, 2003. The consolidated requirements apply to older entities in the first fiscal year or interim period after June 15, 2003. Certain disclosure requirements apply in all financial statements issued after January 31, 2003, regardless of when the variable interest entity was established. Certain of Downey's real estate joint venture partnerships established prior to January 31, 2003 will likely require consolidation as a result of applying the provisions of FIN 46. There has been no variable interest entities established since January 31, 2003. While consolidation may require reclassification of certain financial statement items, the overall financial impact is considered immaterial.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Certain statements under this caption may constitute "forward-looking statements" under the Private Securities Litigation Reform Act of 1995, which involve risks and uncertainties. Our actual results may differ significantly from the results discussed in such forward-looking statements. Factors that might cause such a difference include, but are not limited to, economic conditions, competition in the geographic and business areas in which we conduct our operations, fluctuations in interest rates, credit quality and government regulation.

OVERVIEW

Our net income for the first quarter of 2003 totaled \$30.2 million or \$1.08 per share on a diluted basis, compared to \$37.4 million or \$1.32 per share in the first quarter of 2002.

The decline in net income between first quarters reflected lower net income from both of our business segments. Net income from our real estate investment activities declined \$1.1 million due primarily to lower gains from sales, while net income from our banking activities was \$6.1 million lower reflecting:

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

- A \$13.1 million increase in the loss from loan servicing activities due primarily to a larger addition to the valuation allowance for mortgage servicing rights; and
- A \$6.9 million increase in general and administrative expense.

Those unfavorable items were partially offset by:

- A \$3.6 million increase in gains from sales of loans and mortgage-backed securities;
- A \$3.1 million favorable change in provision for loan losses, as \$1.7 million was reversed in the current quarter due to a decline in loans and improved credit quality;
- A \$2.5 million litigation award; and
- A \$1.0 million increase in net interest income.

For the first quarter of 2003, our return on average assets was 1.03%, down from 1.37% a year ago, while our return on average equity was 14.41%, down from 19.99% a year ago.

Our single family loan originations, including purchases, totaled \$2.390 billion in the first quarter of 2003, up 5.8% from the \$2.259 billion we originated in the first quarter of 2002 but 29.5% below the record \$3.390 billion we originated in the previous quarter. Of the current quarter total, \$783 million represented originations of loans for portfolio, of which \$76 million were subprime credits. In addition to single family loans, we originated \$51 million of other loans in the quarter.

At quarter end, our assets totaled \$11.4 billion, up 4.8% from a year ago, but down \$540 million from year-end 2002. The decline since year end primarily reflected declines of \$283 million in loans held for investment and \$245 million in securities.

Our deposits totaled \$9.0 billion at March 31, 2003, up 4.6% from the year-ago level, but down 2.6% from year-end 2002. No new branches were opened during the current quarter. At quarter end, our branches totaled 165, of which 93 were in-store. A year ago, branches totaled 144, of which 74 were in-store.

Our non-performing assets declined \$4 million during the quarter to \$75 million or 0.66% of total assets. The decline was primarily in our residential category, of which \$3 million was associated with prime loans and \$1 million with subprime loans.

At March 31, 2003, our primary subsidiary, Downey Savings and Loan Association, F.A. (the "Bank") exceeded all regulatory capital tests, with capital-to-asset ratios of 7.26% for both tangible and core capital and 13.87% for risk-based capital. These capital levels are significantly above the "well capitalized" standards defined by the federal banking regulators of 5% for core and tangible capital and 10% for risk-based capital.

Critical Accounting Policies

We have established various accounting policies which govern the application of accounting principles generally accepted in the United States of America in the preparation of our financial statements. Our significant accounting policies are described in Downey's Annual Report on Form 10-K for the year ended December 31, 2002. Certain accounting policies require us to make significant estimates and assumptions which have a material impact on the carrying value of certain assets and liabilities, and we consider these to be critical accounting policies. The estimates and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Actual results could differ significantly from these estimates and assumptions which could have a material impact on the carrying value of assets and liabilities at the balance sheet dates and our results of operations for the reporting periods. Management has discussed the development and selection of these critical accounting policies with the Audit Committee of our Board of Directors.

We believe the following are critical accounting policies that require the most significant estimates and assumptions, which are particularly susceptible to significant change in the preparation of our financial statements:

- Valuation of mortgage servicing rights. For further information, see Note 2 on page 6 of Notes to Consolidated Financial Statements.
- Valuation of expected rate lock commitments. For further information, see Note 3 on page 7 of Notes to Consolidated Financial Statements.
- Allowance for losses on loans and real estate. For further information, see Financial Condition Problem Loans and Real Estate Allowance for Losses on Loans and Real Estate on page 33.

RESULTS OF OPERATIONS**Net Interest Income**

Net interest income is the difference between the interest and dividends earned on loans, mortgage-backed securities and investment securities ("interest-earning assets") and the interest paid on deposits, borrowings and capital securities ("interest-bearing liabilities"). The spread between the yield on interest-earning assets and the cost of interest-bearing liabilities and the relative dollar amounts of these assets and liabilities principally affects net interest income.

Our net interest income totaled \$81.0 million in the first quarter of 2003, up \$1.0 million or 1.3% from the same period last year. The increase between first quarters reflected higher interest-earning assets. Our interest-earning assets averaged \$11.3 billion during the quarter, up 7.2% from the year-ago level. The effective interest rate spread averaged 2.87% in the current quarter, down from 3.03% a year ago and down from 2.93% in the fourth quarter of 2002, as our yield on interest-earning assets declined faster than the decline in our cost of funds.

The following table presents for the periods indicated the total dollar amount of:

- interest income from average interest-earning assets and the resultant yields; and
- interest expense on average interest-bearing liabilities and the resultant costs, expressed as rates.

The table also sets forth our net interest income, interest rate spread and effective interest rate spread. The effective interest rate spread reflects the relative level of interest-earning assets to interest-bearing liabilities and equals:

- the difference between interest income on interest-earning assets and interest expense on interest-bearing liabilities, divided by
- average interest-earning assets for the period.

The table also sets forth our net interest-earning balance the difference between the average balance of interest-earning assets and the average balance of total deposits, borrowings and capital securities for the quarters indicated. We included non-accrual loans in the average interest-earning assets balance. We included interest from non-accrual loans in interest income only to the extent we received payments and to the extent we believe we will recover the remaining principal balance of the loans. We computed average balances for the quarter using the average of each month's daily average balance during the periods indicated.

^(a) Included amounts swept into money market deposit accounts.

Changes in our net interest income are a function of changes in both rates and volumes of interest-earning assets and interest-bearing liabilities. The following table sets forth information regarding changes in our interest income and expense for the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, we have provided information on changes attributable to:

- changes in volume changes in volume multiplied by comparative period rate;
- changes in rate changes in rate multiplied by comparative period volume; and
- changes in rate/volume changes in rate multiplied by changes in volume.

Interest-earning asset and interest-bearing liability balances used in the calculations represent quarterly average balances computed using the average of each month's daily average balance during the period indicated.

^(a) Included amounts swept into money market deposit accounts.

Provision for Loan Losses

During the current quarter, \$1.7 million of provision for loan losses was reversed, while in the year-ago first quarter provision for loan losses totaled \$1.4 million. The current quarter reversal reflected a decline in the loan portfolio, as well as an improvement in credit quality.

Other Income

Our total other income was \$21.9 million in the first quarter of 2003, compared to \$31.3 million in the year-ago first quarter. The \$9.4 million decline between first quarters primarily reflected:

- a \$13.1 million increase in the loss on our loan servicing activity due primarily to an \$11.4 million addition to the valuation allowance for mortgage servicing rights, as the fair value of those rights dropped in the current quarter due to higher than originally projected loan prepayments and a higher projected rate at which loans we service for others are expected to prepay in the future, thereby shortening their expected average life; and
- a \$2.1 million decline in income from real estate and joint ventures held for investment due primarily to lower gains from sales.

Partially offsetting those items was an increase of \$3.6 million in net gains from sales of loans and mortgage-backed securities and a \$2.5 million litigation award related to an other real estate owned asset that suffered damage from earth movement.

Loan and Deposit Related Fees

Loan and deposit related fees totaled \$12.0 million in the first quarter of 2003, up \$0.5 million from a year ago. Our deposit related fees were up \$1.3 million or 28.4% between first quarters, due to higher fees from both our checking accounts and automated teller machines. This increase was partially offset by a \$0.9 million or 12.6% decrease in our loan related fees, due to a decline in loan prepayment fees.

The following table presents a breakdown of loan and deposit related fees for the quarters indicated.

Real Estate and Joint Ventures Held for Investment

Income from our real estate and joint ventures held for investment totaled \$0.9 million in the first quarter of 2003, down \$2.1 million from the year-ago quarter. The decrease was primarily attributed to the recapture of \$1.3 million of a previously established valuation allowance in the year-ago quarter due to sales activity and to lower gains from sales.

The following table sets forth the key components comprising our income from real estate and joint venture operations for the quarters indicated.

<i>(In Thousands)</i>	<i>Three Months Ended</i>

Secondary Marketing Activities

A loss of \$13.7 million was recorded in loan servicing from our portfolio of loans serviced for others during the first quarter of 2003, \$13.1 million higher than the loss of \$0.6 million in the year-ago period. The higher loss primarily reflected a larger addition to the valuation allowance for mortgage servicing rights, \$11.4 million in the current quarter, compared to \$0.4 million a year ago. The current quarter valuation addition was necessary due to higher than originally projected loan prepayments and a higher projected rate at which loans serviced for others are expected to prepay, thereby shortening their expected average life. Excluding the valuation additions, we incurred a loss of \$2.3 million in the current quarter in the loan servicing category, compared to a loss of \$0.2 million in the year-ago quarter. The higher loss was primarily associated with pay-off and curtailment interest losses. When a loan we service for others prepays, we benefit from the use of those proceeds from the time of repayment until we are required to remit the funds to the investor. That benefit results in a reduction of our borrowing costs within net interest income. Most of our loan servicing agreements, however, require us to pay interest to the investor up to the date we remit funds to them. Therefore, when the loan prepays, we remit to the investor more interest than we collect from the borrower. That additional interest cost, called pay-off and curtailment interest losses, appears as a reduction to income from servicing activities and totaled \$2.5 million in the first quarter of 2003, up from \$0.8 million in the first quarter of 2002. At March 31, 2003, we serviced \$8.5 billion of loans for others, compared to \$8.3 billion at December 31, 2002, and \$6.4 billion at March 31, 2002.

The following table presents a breakdown of the components of our loan servicing loss for the quarters indicated.

For further information regarding mortgage servicing rights, see Notes To Consolidated Financial Statements Note (2) Mortgage Servicing Rights on page 6.

Sales of loans and mortgage-backed securities increased in the first quarter to \$1.624 billion from \$1.381 billion a year ago. Net gains associated with these sales totaled \$19.8 million in the first quarter, up from \$16.2 million a year ago. Net gains included the capitalization of mortgage servicing rights of \$15.0 million in both the current quarter and year-ago quarter. Excluding the impact of SFAS 133, a gain of 1.23% of secondary market sales was realized which compares favorably to 0.82% a year-ago.

The following table presents a breakdown of the components of our net gains (losses) on sales of loans and mortgage-backed securities for the quarters indicated.

Operating Expense

Our operating expense totaled \$52.3 million in the current quarter, up \$7.2 million or 15.9% from a year ago. That increase was due primarily to higher general and administrative costs associated with an increased number of branch locations opened during the last three quarters of 2002 and higher loan origination activity.

The following table presents a breakdown of key components comprising operating expense for the quarters indicated.

Provision for Income Taxes

Income taxes for the first quarter totaled \$22.1 million compared to \$27.4 million a year ago. Both the current quarter and year-ago quarter resulted in an effective tax rate of 42.3%. For further information regarding income taxes, see Notes to Consolidated Financial Statements Note (4) Income Taxes on page 9.

Business Segment Reporting

The previous discussion and analysis of the Results of Operations pertained to our consolidated results. This section discusses and analyzes the results of operations of our two business segments banking and real estate investment. For further information regarding business segments, see Notes To Consolidated Financial Statements Note (7) Business Segment Reporting on page 11.

The following table presents by business segment our net income for the quarters indicated.

(In Thousands)	<i>Three Months Ended</i>				
	<i>March 31,</i> 2003	<i>December 31,</i> 2002	<i>September 30,</i> 2002	<i>June 30,</i> 2002	<i>March 31,</i> 2002

Total net income	\$ 30,217	\$ 39,972	\$ 14,568	\$ 20,375	\$ 37,378

Banking

Net income from our banking operations for the first quarter of 2003 totaled \$29.5 million, down \$6.1 million or 17.2% from \$35.6 million a year ago. The decrease between first quarters primarily reflected:

- A \$13.1 million increase in the loss from loan servicing activities due primarily to a larger addition to the valuation allowance for mortgage servicing rights; and
- A \$6.9 million increase in general and administrative expense.

Those unfavorable items were partially offset by:

- A \$3.6 million increase in gains from sales of loans and mortgage-backed securities;
- A \$3.1 million favorable change in provision for loan losses, as \$1.7 million was reversed in the current quarter due to a decline in loans and improved credit quality;
- A \$2.5 million litigation award; and
- A \$1.0 million increase in net interest income.

The following table sets forth our banking operational results and selected financial data for the quarters indicated.

For information on valuation allowances associated with real estate and joint venture loans, see Financial Condition Problem Loans and Real Estate Allowances for Losses on Loans and Real Estate on page 33.

FINANCIAL CONDITION

Loans and Mortgage-Backed Securities

Total loans and mortgage-backed securities, including those we hold for sale, declined \$301 million during the first quarter to a total of \$10.7 billion or 93.3% of assets at March 31, 2003. The decrease represents a lower level of loans held for investment due to continued high single family loan prepayments as a result of the low interest rate environment and borrower preference for fixed rate loans. Our annualized prepayment speed in the current quarter remained high at 43%, compared to 39% a year ago and 42% during the fourth quarter of 2002.

The following table sets forth loans originated, including purchases, for investment and for sale for the quarters indicated.

^(a) Residential one-to-four unit loans, primarily fixed.

Originations of residential one-to-four unit loans, including loans purchased, totaled \$2.390 billion in the first quarter, 29.5% lower than the record \$3.390 billion we originated in the fourth quarter of 2002, but 5.8% higher than the \$2.259 billion we originated a year ago. Loans originated for sale increased \$341 million from a year ago to \$1.607 billion reflecting continued borrower preference for low fixed rate loans, while loans originated for portfolio declined by \$210 million to \$783 million. Of the current quarter originations for portfolio, \$76 million represented originations of subprime credits as part of our continuing strategy to enhance the portfolio's net yield. During the current quarter, 87% of our residential one-to-four unit originations represented refinancing transactions. This is up from the fourth quarter 2002 level of 84% and the year-ago first quarter level of 80%. In addition to single family loans, we originated \$51 million of other loans in the current quarter.

During the current quarter, loan originations for investment consisted primarily of adjustable rate mortgages which provide for negative amortization and are tied to the Federal Home Loan Bank ("FHLB") Eleventh District Cost of Funds Index ("COFI"), or the 12-month moving average of the annual yields on actively traded U.S. Treasury securities adjusted to a constant maturity of one year ("MTA"), indexes which lag behind the movement in market interest rates. For the quarter, 36% of portfolio originations represented monthly adjusting COFI rate mortgages, 29% represented monthly adjusting MTA rate mortgages, while 28% represented adjustable rate loans where the initial rate is fixed for the first three years.

Our adjustable rate mortgages:

- generally either begin with an incentive interest rate, which is an interest rate below the current market rate, that adjusts to the applicable index plus a defined spread, subject to periodic and lifetime caps, after one, three, six or twelve months, or are fixed for a period of three to five years then adjust semi-annually or annually thereafter;
- generally provide that the maximum interest rate we can charge borrowers cannot exceed the incentive rate by more than six to nine percentage points, depending on the type of loan and the initial rate offered; and
- limit interest rate adjustments, for loans that adjust both the interest rate and payment amount simultaneously, to 1% per adjustment period for those that adjust semi-annually and 2% per adjustment period for those that adjust annually.

Most of our adjustable rate mortgages adjust the interest rate monthly and the payment amount annually. These monthly adjustable rate mortgages:

- have a lifetime interest rate cap, but no specified periodic interest rate adjustment cap;
- have a periodic cap on changes in required monthly payments; and
- allow for negative amortization, which is the addition to loan principal of accrued interest that exceeds the required monthly loan payments.

If a loan incurs significant negative amortization, the loan-to-value ratio could increase which creates an increased risk that the fair value of the underlying collateral could be insufficient to satisfy fully the outstanding principal and interest. A loan-to-value ratio is the ratio of the principal amount of the loan to the lower of the sales price or appraised value of the property securing the loan at origination. We currently impose a limit on the amount of negative amortization. The principal plus the negative amortization cannot exceed 125% of the original loan amount, except for subprime loans and loans with loan-to-value ratios of greater than 80% where the borrower has obtained private mortgage insurance to reduce the effective loan-to-value ratio to between 67% and 80%. In those two instances, the principal plus negative amortization cannot exceed 110% of the original loan amount. At March 31, 2003, loans with the higher 125% limit on negative amortization represented 40% of our adjustable rate one-to-four unit residential portfolio.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

At March 31, 2003, \$7.2 billion or 76% of the adjustable rate mortgages in our loan portfolio were subject to negative amortization, of which \$96 million represented the amount of negative amortization included in the loan balance. The amount of negative amortization is \$15 million or 13.6% below the December 31, 2002 level.

We also continue to originate residential fixed interest rate mortgage loans to meet consumer demand, but we intend to sell the majority of these loans. We sold through our secondary marketing activities \$1.624 billion of loans and mortgage-backed securities in the first quarter, compared to \$2.052 billion in the fourth quarter of 2002 and \$1.381 billion a year ago. All were secured by residential one-to-four unit property, and at March 31, 2003, loans held for sale totaled \$634 million.

At March 31, 2003, our unfunded loan application pipeline totaled \$2.6 billion. Within that pipeline, we had commitments to borrowers for short-term interest rate locks of \$1.4 billion, of which \$1.2 billion were related to residential one-to-four unit loans being originated for sale in the secondary market. Furthermore, at March 31, 2003, we had commitments on undrawn lines and letters of credit of \$116 million, loans in process of \$66 million and commitments to purchase loans of \$5 million. We believe our current sources of funds will enable us to meet these obligations.

^(a) Reflected the change in fair value of the rate lock derivative from the date of commitment to the date of funding.

We carry loans for sale at the lower of cost or fair value. At March 31, 2003, no valuation allowance was required as the fair value exceeded book value on an aggregate basis.

At March 31, 2003, our residential one-to-four units subprime portfolio consisted of approximately 88% "A-" credit, 10% "B" credit and 2% "C" credit loans. The average loan-to-value ratio at origination for these loans was approximately 75%.

We carry mortgage-backed securities available for sale at fair value which, at March 31, 2003, reflected an unrealized gain of \$32,000. The current quarter-end unrealized gain, less the associated tax effect, is reflected within a separate component of other comprehensive income until realized.

Deposits

At March 31, 2003, our deposits totaled \$9.0 billion, up \$399 million or 4.6% from the year-ago level, but down \$241 million or 2.6% from the previous quarter. Compared to the year-ago period, our lower-rate transaction accounts i.e., checking, money market and regular passbook increased \$1.2 billion or 33.7%, which was partially offset by a decrease in our certificates of deposit of \$830 million or 16.8%. As depositors seemed more interested in liquidity given the relatively low level of interest rates, they continued to move monies from certificates of deposit to transaction accounts, primarily regular passbook accounts. At March 31, 2003, the average deposit size of our traditional branches was \$103 million, while the average size of our in-store branches was \$17 million, or \$20 million excluding the 19 new in-store branches opened within the past 12 months.

The following table sets forth information concerning our deposits and weighted average rates paid at the dates indicated.

Capital Securities

On July 23, 1999, we issued \$120 million in capital securities through Downey Financial Capital Trust I. The capital securities pay quarterly cumulative cash distributions at an annual rate of 10.00% of the liquidation value of \$25 per share. Interest expense on our capital securities, including the amortization of deferred issuance costs, was \$3.0 million for the first quarter of both 2003 and 2002. These securities may be called at our option at \$25 per share beginning in July of 2004.

Off-Balance Sheet Arrangements

We consolidate majority-owned subsidiaries that we control. We account for other affiliates, including joint ventures, in which we do not exhibit significant control or have majority ownership, by the equity method of accounting. For those relationships in which we own less than 20%, we generally carry them at cost. In the course of our business, we participate as a partner in real estate joint venture relationships through our wholly-owned subsidiary, DSL Service Company. It is possible that certain of our real estate joint venture partnerships will likely require consolidation as a result of applying the provisions of the recently issued Financial Accounting Standards Board Interpretation 46. The expected financial impact of this interpretation is deemed to be immaterial. For further information, see Note 8 of Notes to the Consolidated Financial Statements on page 11.

We enter into derivative financial instruments as part of our interest rate risk management process, primarily related to our sale of loans in the secondary market. The associated fair value changes to the notional amount of the derivative instrument are recorded on-balance sheet. For further information regarding our derivative instruments, see Asset/Liability Management and Market Risk on page 28, Capital Resources and Liquidity Contractual Obligations and Other Commitments on page 37 and Note 3 of Notes to the Consolidated Financial Statements on page 7.

We also utilize financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our customers. These financial instruments include commitments to originate fixed and variable rate mortgage loans held for investment, undisbursed loan funds, lines of credit and letters of credit, and commitments to purchase loans and mortgage-backed securities for our portfolio. The contract or notional amounts of these instruments reflect the extent of involvement we have in particular classes of financial instruments. For further information regarding these commitments, see Asset/Liability Management and Market Risk on page 28, Capital Resources and Liquidity Contractual Obligations and Other Commitments on page 37 and Note 3 of Notes to the Consolidated Financial Statements on page 7.

We use the same credit policies in making commitments to originate loans, lines of credit and letters of credit as we do for on-balance sheet instruments. For commitments to originate loans held for investment, the contract amounts represent exposure to loss from market fluctuations as well as credit loss. In regard to these commitments, adverse changes from market fluctuations are generally not hedged. We control the credit risk of our commitments to originate loans held for investment through credit approvals, limits and monitoring procedures.

We do not dispose of troubled loans or problem assets by means of unconsolidated special purpose entities.

Transactions with Related Parties

There are no related party transactions required to be disclosed in accordance with FASB Statement No. 57, Related Party Disclosures. Loans to our executive officers and directors were made in the ordinary course of business and were made on substantially the same terms as comparable transactions.

Asset/Liability Management and Market Risk

Market risk is the risk of loss from adverse changes in market prices and interest rates. Our market risk arises primarily from interest rate risk in our lending and deposit taking activities. This interest rate risk primarily occurs to the degree that our interest-bearing liabilities reprice or mature on a different basis generally more rapidly than our interest-earning assets. Since our earnings depend primarily on our net interest income, which is the difference between the interest and dividends earned on interest-earning assets and the interest paid on interest-bearing liabilities, our principal objectives are to actively monitor and manage the effects of adverse changes in interest rates on net interest income while maintaining asset quality. Our primary strategy to manage interest rate risk is to emphasize the origination of adjustable rate mortgages or loans with relatively short maturities. Interest rates on adjustable rate mortgages are primarily tied to COFI and MTA.

In addition to the market risk associated with our lending and deposit taking activities, we also have market risk associated with our secondary marketing activities. Changes in mortgage interest rates, primarily fixed rate mortgages, impact the fair value of loans held for sale as well as our interest rate lock commitment derivatives, where we have committed to an interest rate with a potential borrower for a loan we intend to sell. Our objective is to hedge against fluctuations in interest rates through use of forward sale and purchase contracts with government-sponsored enterprises and whole loan sale contracts with various parties. These contracts are typically obtained at the time the interest rate lock commitments are made. Therefore, as interest rates fluctuate, the changes in the fair value of our interest rate lock commitments and loans held for sale tend to be offset by changes in the fair value of the hedge contracts. The method used for assessing the effectiveness of a hedging derivative, as well as the measurement approach for determining the ineffective aspects of the hedge, is established at the inception of the hedge. Although we continue to hedge as previously done, SFAS 133, as applied to our risk management strategies, may increase or decrease reported net income and stockholders' equity, depending on levels of interest rates and other variables affecting the fair values of derivative instruments and hedged items, but will have no effect on the overall economics of the transactions. We generally do not enter into hedging contracts for speculative purposes.

Changes in mortgage interest rates also impact the value of our mortgage servicing rights. Rising interest rates typically result in slower prepayment speeds on the loans being serviced for others which increase the value of mortgage servicing rights. Declining interest rates typically result in faster prepayment speeds which decrease the value of mortgage servicing rights. Currently, we do not hedge our mortgage servicing rights against that risk.

There has been no significant change in our market risk since December 31, 2002.

One measure of our exposure to differential changes in interest rates between assets and liabilities is shown in the following table which sets forth the repricing frequency of our major asset and liability categories as of March 31, 2003, as well as other information regarding the repricing and maturity differences between our interest-earning assets and total deposits, borrowings and capital securities in future periods. We refer to these differences as "gap." We have determined the repricing frequencies by reference to projected maturities, based upon contractual

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

maturities as adjusted for scheduled repayments and "repricing mechanisms" provisions for changes in the interest and dividend rates of assets and liabilities. We assume prepayment rates on substantially all of our loan portfolio based upon our historical loan prepayment experience and anticipated future prepayments. Repricing mechanisms on a number of our assets are subject to limitations, such as caps on the amount that interest rates and payments on our loans may adjust, and accordingly, these assets do not normally respond to changes in market interest rates as completely or rapidly as our liabilities. The interest rate sensitivity of our assets and liabilities illustrated in the following table would vary substantially if we used different assumptions or if actual experience differed from the assumptions set forth.

^(c) Included amounts swept into money market deposit accounts and is subject to immediate repricing.

^(d) Subject to immediate repricing.

Our six-month gap at March 31, 2003 was a positive 19.10%. This means that more interest-earning assets mature or reprice within six months than total deposits, borrowings and capital securities. This compares to a positive six-month gap of 16.80% at December 31, 2002 and 18.02% a year ago.

We continue to pursue our strategy of emphasizing the origination of adjustable rate mortgages. For the twelve months ended March 31, 2003, we originated and purchased for investment \$4.5 billion of adjustable rate loans which represented approximately 99% of all loans we originated and purchased for investment during the period.

At March 31, 2003 and December 31, 2002, essentially all of our interest-earning assets mature, reprice or are estimated to prepay within five years, compared to 99% at March 31, 2002. At March 31, 2003, loans held for investment and mortgage-backed securities with adjustable interest rates represented 93% of those portfolios. During the first quarter, we continued to offer residential fixed rate loan products to our

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

customers primarily for sale in the secondary market. We price and originate fixed rate mortgage loans for sale into the secondary market to increase opportunities to originate adjustable rate mortgages and to generate fees and servicing income. We also originate fixed rate loans for portfolio to facilitate the sale of real estate acquired in settlement of loans and which meet specific yield and other approved guidelines.

At March 31, 2003, \$9.9 billion or 93% of our total loan portfolio, including mortgage-backed securities, consisted of adjustable rate loans, construction loans, and loans with a due date of five years or less, compared to \$10.2 billion or 92% at December 31, 2002, and \$9.4 billion or 93% a year ago.

The following table sets forth the interest rate spread between our interest-earning assets and interest-bearing liabilities at the dates indicated.

	<i>March 31,</i> 2003	<i>December</i> 31, 2002	<i>September</i> 30, 2002	<i>June 30,</i> 2002	<i>March 31,</i> 2002
Weighted average yield:					
Loans and mortgage-backed securities	5.53 %	5.83 %	6.00 %	6.01 %	6.45 %
Federal Home Loan Bank stock	5.31	5.24	2.87	5.56	5.30
Investment securities	2.34	3.07	3.12	3.44	3.43
<hr/>

<hr/>					
Interest rate spread	3.04 %	3.09 %	3.06 %	2.86 %	3.07 %

The period-end weighted average yield on our loan portfolio declined to 5.53% at March 31, 2003, down from 5.83% at December 31, 2002 and 6.45% at March 31, 2002. At March 31, 2003, our adjustable rate mortgage portfolio of single family residential loans, including mortgage-backed securities, totaled \$9.7 billion with a weighted average rate of 5.44%, compared to \$9.9 billion with a weighted average rate of 5.75% at December 31, 2002, and \$9.1 billion with a weighted average rate of 6.35% at March 31, 2002.

Problem Loans and Real Estate

Non-Performing Assets

Non-performing assets consist of loans on which we have ceased accruing interest (which we refer to as non-accrual loans), loans restructured at a below market rate, real estate acquired in settlement of loans and repossessed automobiles. Our non-performing assets declined \$4 million during the quarter to \$75 million or 0.66% of total assets. The decline was primarily in the residential category, of which \$3 million

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

was associated with prime loans and \$1 million was associated with subprime loans.

The following table summarizes our non-performing assets at the dates indicated.

<i>(Dollars in Thousands)</i>	<i>March 31, 2003</i>	<i>December 31, 2002</i>	<i>September 30, 2002</i>	<i>June 30, 2002</i>	<i>March 31, 2002</i>

Allowance for Losses on Loans and Real Estate

We maintain a valuation allowance for losses on loans and real estate to provide for losses inherent in those portfolios. Management evaluates the adequacy of the allowance quarterly to maintain the allowance at levels sufficient to provide for inherent losses.

We use an internal asset review system and loss allowance methodology to provide for timely recognition of problem assets and adequate general valuation allowances to cover asset losses. The amount of the allowance is based upon the total of general valuation allowances, allocated allowances and an unallocated allowance. General valuation allowances relate to assets with no well-defined deficiency or weakness and takes into consideration loss that is imbedded within the portfolio but has not yet been realized. Allocated allowances relate to assets with well-defined deficiencies or weaknesses. Included in these allowances are those amounts associated with assets where it is probable that the value of the asset has been impaired and the loss can be reasonably estimated. If we determine our carrying value of the asset exceeds the net fair value and no alternative payment source exists, then a specific allowance is recorded for the amount of that difference. The unallocated allowance is more subjective and is reviewed quarterly to take into consideration estimation errors and economic trends that are not necessarily captured in determining the general valuation and allocated allowances.

Allowances for losses on all assets were \$34 million at March 31, 2003, compared to \$36 million at December 31, 2002, and \$38 million a year ago.

In the current quarter, we reversed \$1.7 million of provision for loan losses and net loan charge-offs totaled \$0.2 million, resulting in a decrease in the allowance for loan losses to \$33 million at March 31, 2003. The current quarter decline in the allowance reflected a decrease of \$0.7 million in allocated allowances to \$4.8 million due to declines in various loan categories. General valuation allowances decreased \$1.2 million due to a decline in the loan portfolio and there was no change in our unallocated allowance of \$2.8 million.

The following table summarizes the activity in our allowance for loan losses for the quarters indicated.

Capital Resources and Liquidity

Our sources of funds include deposits, advances from the FHLB and other borrowings; proceeds from the sale of loans, mortgage-backed securities and real estate; payments of loans and mortgage-backed securities and payments for and sales of loan servicing; and income from other investments. Interest rates, real estate sales activity and general economic conditions significantly affect repayments on loans and mortgage-backed securities and deposit inflows and outflows.

Our primary sources of funds generated in the first quarter of 2003 were from:

- principal repayments of \$1.1 billion including prepayments, but excluding refinances of our existing loans on loans and mortgage-backed securities; and
- maturities and sales of U.S. Treasury securities, agency obligations and other investment securities available for sale of \$384 million.

We used these funds for the following purposes:

- to originate and purchase loans held for investment, excluding refinances of our existing loans, of \$772 million;
- to paydown our FHLB advances by \$323 million;
- to fund a net decline in deposits of \$241 million; and
- to purchase U.S. Treasury securities, agency obligations and other investment securities available for sale of \$142 million.

Our principal source of liquidity is our ability to utilize borrowings, as needed. Our primary source of borrowings is the FHLB. At March 31, 2003, our FHLB borrowings totaled \$1.3 billion, representing 11.4% of total assets. We currently are approved by the FHLB to borrow up to 40% of total assets to the extent we provide qualifying collateral and hold sufficient FHLB stock. That approved limit would have permitted us, as of quarter end, to borrow an additional \$3.3 billion. To the extent deposit growth over the remainder of 2003 falls short of satisfying ongoing commitments to fund maturing and withdrawable deposits, repay maturing borrowings, fund existing and future loans, make investments, and continue branch improvement programs, we may utilize our FHLB borrowing arrangement or possibly other sources. As of March 31, 2003, we had commitments to borrowers for short-term rate locks of \$1.4 billion, undisbursed loan funds and unused lines and letters of credit of \$182 million, commitments to purchase loans of \$5 million, other contingent liabilities of \$3 million and commitments to invest in affordable housing funds of \$2 million. We believe our current sources of funds, including repayments of existing loans, enable us to meet our obligations while maintaining liquidity at appropriate levels.

Another measure of liquidity in the savings and loan industry is the ratio of cash and eligible investments to the sum of withdrawable savings and borrowings due within one year. The Bank's ratio was 5.2% at March 31, 2003, 5.4% at December 31, 2002 and 3.9% a year ago.

The holding company currently has adequate liquid assets to meet its obligations and can obtain further funds by means of dividends from subsidiaries, subject to certain limitations, or issuance of further debt or equity. At March 31, 2003, the holding company's liquid assets, including due from Bank interest bearing balances, totaled \$65 million.

On July 24, 2002, the Board of Directors of Downey authorized a share repurchase program of up to \$50 million of our common stock. To fund this program, the Bank paid a special \$50 million dividend during the third quarter of 2002 to the holding company. The shares are being repurchased from time-to-time in open market transactions. The timing, volume and price of purchases will be made at our discretion, and will also be contingent upon our overall financial condition, as well as market conditions in general. To-date, a total of 306,300 shares have been repurchased at an average price of \$39.73. There were no shares repurchased during the first quarter of 2003 and, at March 31, 2003, \$38 million of the original authorization remains available for future purchases.

Stockholders' equity totaled \$852 million at March 31, 2003, up from \$823 million at December 31, 2002 and \$768 million a year ago.

Contractual Obligations and Other Commitments

Through the normal course of operations, we have entered into certain contractual obligations and other commitments. Our obligations generally relate to funding of our operations through deposits and borrowings as well as leases for premises and equipment, and our commitments generally relate to our lending operations.

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

We have obligations under long term operating leases, principally for building space and land. Lease terms generally cover a five-year period, with options to extend, and are non-cancelable.

Our commitments to originate fixed and variable rate mortgage loans are agreements to lend to a customer as long as there is no violation of any condition established in the commitment. Undisbursed loan funds and unused lines of credit include funds not disbursed, but committed to construction projects and home equity and commercial lines of credit. Letters of credit are conditional commitments issued by us to guarantee the performance of a customer to a third party.

Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some commitments expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The credit risk involved in issuing lines and letters of credit requires the same creditworthiness evaluation as that involved in extending loan facilities to customers. We evaluate each customer's creditworthiness.

We receive collateral to support commitments for which collateral is deemed necessary. The most significant categories of collateral include real estate properties underlying mortgage loans, liens on personal property and cash on deposit with us.

We enter into derivative financial instruments as part of our interest rate risk management process, primarily related to our sale of loans in the secondary market. For further information regarding our derivative instruments, see Asset/Liability Management and Market Risk on page 28 and Note 3 of Notes to the Consolidated Financial Statements on page 7.

At March 31, 2003, scheduled maturities of certificates of deposit and FHLB advances, secondary marketing activities, loans held for investment, future operating minimum lease commitments and other contractual obligations were as follows:

<i>(In Thousands)</i>	<i>Within 1 Year</i>	<i>1 - 3 Years</i>	<i>4 - 5 Years</i>	<i>Over 5 Years</i>	<i>Total Balance</i>
Certificates of deposit	\$ 2,909,997	\$ 661,554	\$ 545,409	\$ -	\$ 4,116,960
FHLB advances	90,700	624,850	126,300	459,000	1,300,850
Secondary marketing activities:					
Non-qualifying hedge transactions:					
Expected rate lock commitments	957,549	-	-	-	957,549
Associated forward sale contracts	913,034	-	-	-	913,034
Associated forward purchase contracts	6,000	-	-	-	6,000
Qualifying cash flow hedge transactions:					
Loans held for sale, at lower of cost or fair value	633,676	-	-	-	633,676
Associated forward sale contracts	624,002	-	-	-	624,002
Commitments to originate loans held for investment:					
Adjustable	190,737	-	-	-	190,737
Fixed	117	-	-	-	117
Undisbursed loan funds and unused lines of credit	70,527	2,238	-	105,989	178,754
Operating leases	4,286	7,006	4,047	2,228	17,567
Letters of credit and other contingent liabilities	-	-	-	6,031	6,031
Commitments to purchase loans	5,200	-	-	-	5,200
Commitments to invest in affordable housing funds	-	-	-	2,400	2,400
Total obligations and commitments	\$ 6,405,825	\$ 1,295,648	\$ 675,756	\$ 575,648	\$ 8,952,877

Regulatory Capital Compliance

Our core and tangible capital ratios were both 7.26% and our risk-based capital ratio was 13.87% at March 31, 2003. The Bank's capital ratios exceed the "well capitalized" standards of 5.00% for core capital and 10.00% for risk-based capital, as defined by regulation. As of March 31, 2003, we made the following changes in calculating our regulatory capital ratios as directed by the OTS:

- Deduct from capital the loans the Bank has made to certain joint ventures in which DSL Service Company is a partner. At March 31, 2003, these loans totaled \$37 million; and
- Risk weight our subprime residential loans at 75% instead of 50%.

The following table is a reconciliation of the Bank's stockholder's equity to federal regulatory capital as of March 31, 2003.

<i>(Dollars in Thousands)</i>	<i>Tangible Capital</i>		<i>Core Capital</i>		<i>Risk-Based Capital</i>	
	<i>Amount</i>	<i>Ratio</i>	<i>Amount</i>	<i>Ratio</i>	<i>Amount</i>	<i>Ratio</i>
Stockholder's equity	\$ 901,254		\$ 901,254		\$ 901,254	
Adjustments:						
Deductions:						
Investment in subsidiary, primarily real estate	(33,337)		(33,337)		(33,337)	
Loans to subsidiary joint ventures	(36,605)		(36,605)		(36,605)	
Excess cost over fair value of branch acquisitions	(3,150)		(3,150)		(3,150)	
Non-permitted mortgage servicing rights	(5,651)		(5,651)		(5,651)	
Additions:						
Unrealized losses on securities available for sale	579		579		579	
General loss allowance investment in DSL Service Company	243		243		243	
Allowance for loan losses, net of specific allowances ^(a)	-		-		32,600	
Regulatory capital	823,333	7.26 %	823,333	7.26 %	855,933	13.87 %
Well capitalized requirement	170,221	1.50 ^(b)	567,405	5.00	616,962	10.00 ^(c)
Excess	\$ 653,112	5.76 %	\$ 255,928	2.26 %	\$ 238,971	3.87 %

^(a) Limited to 1.25% of risk-weighted assets.

^(b) Represents the minimum requirement for tangible capital, as no "well capitalized" requirement has been established for this category.

^(c) A third requirement is Tier 1 capital to risk-weighted assets of 6.00%, which the Bank met and exceeded with a ratio of 13.34%.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information regarding quantitative and qualitative disclosures about market risk, see Financial Condition Asset/Liability Management and Market Risk on page 28.

ITEM 4. CONTROLS AND PROCEDURES

Within 90 days of the date of this report, Downey carried out an evaluation, under the supervision and with the participation of Downey's management, including Downey's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of Downey's disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that Downey's disclosure controls and procedures are effective in timely alerting them to material information relating to Downey required to be included in Downey's periodic Securities and Exchange Commission filings. There has been no significant changes in Downey's internal controls or in other factors that could significantly affect these controls subsequent to the evaluation date.

PART II OTHER INFORMATION

ITEM 1 Legal Proceedings

We have been named as a defendant in legal actions arising in the ordinary course of business, none of which, in the opinion of management, is material.

ITEM 2 Changes in Securities and Use of Proceeds

None.

ITEM 3 Defaults Upon Senior Securities

None.

ITEM 4 Submission of Matters to a Vote of Security Holders

None.

ITEM 5 Other Information

None.

CERTIFICATION PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002

I, Daniel D. Rosenthal, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Downey Financial Corp.;

Edgar Filing: DOWNEY FINANCIAL CORP - Form 10-Q

2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
- a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the "Evaluation Date"); and
 - c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors:
- a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
