Risk Factors

Edgar Filing: DEUTSCHE BANK AKTIENGESELLSCHAFT - Form FWP

Please see the Preliminary Offering Documents for a description of certain risks related to this investment, including, but not limited to, the following:

If the notes are not automatically called prior to maturity, your investment may result in a loss; there is no guaranteed return of principal.

Payments on the notes, including any repayment of principal, are subject to the credit risk of Deutsche Bank and any resolution measure imposed by the competent resolution authority, and any actual or perceived changes in its creditworthiness are expected to affect the value of the notes. If Deutsche Bank becomes insolvent, is unable to pay its obligations or any resolution measure becomes applicable to it, you may lose your entire investment.

The initial estimated value of the notes on the pricing date will be less than their public offering price.

If you attempt to sell the notes prior to maturity, their market value may be lower than both the public offering price and the initial estimated value of the notes on the pricing date.

· If the notes are called, your investment return is limited to the return represented by the applicable call premium.

You will have no rights of a holder of the securities represented by the Market Measure, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.

Final terms will be set on the pricing date within the given range for the specified Market-Linked Investment. Please see the Preliminary Offering Documents for complete product disclosure, including related risks and tax disclosure.
