<sup>1</sup> Veritas results have been incorporated as of January 12<sup>th</sup> 2007 at the time the merger was effective. For the purpose of providing the best understanding of our performance, all results are second quarter results unless otherwise stated and are compared to pro-forma 2006 figures. 2006 pro-forma figures are pro-forma as if

the merger was effective on January 1st, 2006 and result from the consolidation of former CGG and former Veritas figures. Our consolidated financial statements are presented in euros. Converted US\$ figures are presented only to assist you in understanding our operating revenues are not part of our reported financial statements. The \$ figures are calculated based on second quarter /\$ average exchange rate for the Profit & Loss and Cash Flow Statement and are based on the /\$ closing exchange rate for the Balance Sheet. The comparison in between the CGGVeritas second quarter 2007 results with the second quarter 2006 CGG standalone results is provided on the page after the

balance sheet  
items.

**Operational Highlights:**

26 land seismic crews in operation for the slower spring season, after demobilization of the arctic crews  
Vessel utilization rate was lower at 75% with scheduled dry docks for performance upgrade and maintenance  
The new seismic vessel, CGGVeritas Vision, completed successful sea trials and became active in our fleet in July  
3<sup>rd</sup> Wide Azimuth Acquisition program proceeding well in the deepwater Gulf of Mexico (GoM)  
Multi-Client after-sales of 51 million, (\$69 million) in this typically low quarter  
Multi-Client pre-funding level at 80%  
Successful deepwater implementation of Seabed solution in Asia Pacific  
Sercel continued to see significantly strong sales with especially high land equipment deliveries  
Backlog as of July 1<sup>st</sup> 2007 of \$1.6 billion

**Comments and Perspectives:**

CGGVeritas Chairman & CEO, Robert BRUNCK, commented:

*I am pleased that our performance, in the industry's typically slow seasonal quarter, was inline with our expectations enabling CGGVeritas in our first six months following the merger to reach our mid year goals. Supported by continued superior results from Sercel and robust year on year growth from Services across all of our business lines in the Eastern and Western Hemisphere, it is clear that CGGVeritas is off to a strong start in creating the leading Geophysical company.*

*I was particularly pleased to see the quick take-up and successful results of our high-end innovative products and services, including our industry leading wide-azimuth capabilities offshore Gulf of Mexico and onshore Middle East, our advanced imaging algorithms worldwide and our first wireless equipment sale. Looking forward, with the continued strengthening market conditions, and increasing multi-client sales along with Sercel's continued leadership performance, I am pleased to say that we expect to exceed our previously announced 2007 targets.*

**First Half 2007 Financial Highlights:**

Group Revenues of 1163 million (\$1546 million), up 18% in 2007 and 29% in \$

Group EBITDA of 468 million (\$622 million), and EBITDA margin of 40% compared to 389 million, (\$476 million), and EBITDA margin of 40%

Group Operating Profit, including PPA, of 244 million (\$324 million), a 21% operating margin compared to 180 million (\$220 million), a 18% operating margin

Net Profit of 114 million (\$151 million), 10% percent of revenue compared to 53 million (\$65 million), 5% of revenue

EPS of 4.16 (\$5.53)

**Overview of Operations and Market Outlook:**

**Services:**

**Land Contract Acquisition:** The land market continues to strengthen and during the quarter, we operated 23 crews in average, 9 crews in Western Hemisphere and 14 crews in the Eastern Hemisphere where our high-density wide-azimuth HPVA<sup>tm</sup> continues to gain acceptance. In the third and fourth quarter we expect strong activity especially in Europe Africa and Middle East (EAME) and Asia Pacific.

**Land Multi-Client:** During the quarter, 3 crews shot highly pre-funded Multi-Client programs in North America and data sales continued to be strong especially in the Canadian Foothills.

**Offshore Contract Acquisition:** During the quarter, five 3D vessels were operating in Asia Pacific, one in EAME and one in GoM on a wide-azimuth contract. As anticipated, the 3D vessel utilization rate at 75% was lower than the first quarter mainly based on the scheduled dry docks for performance upgrade and maintenance. The utilization rate will be up again in the third and fourth quarter and two new vessels, the Vision and the Vanquish, join our fleet, respectively in early July and mid October. The Seisquest was decommissioned June 9th. Also during the quarter we successfully implemented a seabed solution offshore Malaysia at a water depth of over 1000 meters.

**Multi-Client Offshore:** Approximately 40% of our 3D vessels during the quarter were dedicated to our Multi-Client library. We operated 5 vessels on highly pre-funded new Multi-Client programs, in GoM, Brazil and North Sea. Demand for recent vintage and well located data, particularly in deep and ultra-deep waters of the GoM, remains robust and we began shooting a highly pre-funded new wide-azimuth program in the GoM. We expect Multi-Client after-sales to strengthen in the second half of the year in line with lease sales and typical seasonal cycles in the industry.

**Processing & Reservoir:** Processing activity continued to increase worldwide driven by marine data volumes especially with the increasing market take-up of wide-azimuth and the high demand for our advanced imaging capabilities. Backlog continues to remain strong.

**Sercel:**

During the quarter, Sercel delivered a significantly large volume of land equipment into an expanding market and increasing demand for higher channel counts to increase seismic resolution. Marine equipment sales continue to be at record levels driven by demand for leading streamer technology and new vessels coming into the market.

**Net Income:**

The net result was a Profit of 45 million (\$60 million) compared to a pro-forma Profit of 18 million (\$23 million)  
EPS was 1.56 (\$2.11)

**Cash Flow:**

During the quarter, we early reimbursed \$100 million of our term loan B senior facility

The industrial Capex for the second quarter 2007 was 47 million (\$64 million) compared to pro-forma 38 million (\$48 million)

The Multi-Client Capex for the second quarter 2007 was 83 million (\$111 million) compared to pro-forma 62 million (\$75 million). The average pre-funding level was 80%

**Balance Sheet items:**

At the end of June 2007, Shareholder's equity was 2.4 billion and net financial debt was 1.2 billion, representing a 50 % net debt to equity ratio
