SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 20-F

- o** REGISTRATION STATEMENT PURSUANT TO SECTION 12(B) OR (G)
OF THE SECURITIES EXCHANGE ACT OF 1934
OR
- þ** ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(D)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the Fiscal Year Ended December 31, 2007
OR
- o** TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D)
OF THE SECURITIES EXCHANGE ACT OF 1934
OR
- o** SHELL COMPANY REPORT PURSUANT TO SECTION 13 OR 15(D)
OF THE SECURITIES EXCHANGE ACT OF 1934
Date of Event Requiring this Shell Company Report

Commission File Number 001-14622

Compagnie Générale de Géophysique-Veritas
(Exact name of registrant as specified in its charter)
CGG Veritas
(Translation of registrant's name into English)
Republic of France
(Jurisdiction of incorporation or organization)
Tour Maine Montparnasse
33, avenue du Maine
75015 Paris France
(33) 1 64 47 45 00
(Address of principal executive offices)

Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class	Name of each exchange on which registered
American Depositary Receipts representing Ordinary Shares, nominal value 2 per share Securities registered or to be registered pursuant to Section 12(g) of the Act.	New York Stock Exchange
None (Title of class) Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.	
7 1/2% Senior Notes due 2015 7 3/4% Senior Notes 2017 (Title of class)	

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report.

27,450,758 Ordinary Shares, nominal value 2 per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Note checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing: U.S. GAAP

International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow:

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

PRESENTATION OF INFORMATION

On January 12, 2007, CGG merged with Veritas (the merger) in a part cash, part stock transaction and upon completion of the merger, CGG was renamed Compagnie Générale de Géophysique-Veritas (abbreviated as CGG Veritas). Accordingly, where this annual report provides information for dates prior to January 12, 2007, such information relates to CGG only. We have also provided certain information relating to Veritas prior to January 12, 2007. Information in this annual report on or after January 12, 2007 relates to CGG Veritas.

As used in this annual report CGG refers to Compagnie Générale de Géophysique and its subsidiaries, except as otherwise indicated, Veritas refers to Veritas DGC Inc. and its subsidiaries before the merger and to CGG Veritas Services Holding (U.S.) Inc. following the merger. CGG Veritas refers to Compagnie Générale de Géophysique-Veritas, and we, us, our and Group refers to Compagnie Générale de Géophysique-Veritas and its subsidiaries after the merger and Compagnie Générale de Géophysique and its subsidiaries before the merger, except as otherwise indicated.

In this annual report, references to United States or U.S. are to the United States of America, references to U.S. dollars, \$ or U.S.\$ are to United States dollars, references to France are to the Republic of France, references to Norway are to the Kingdom of Norway, references to NOK are to Norwegian kroner and references to euro or the single currency introduced at the start of the third stage of European Economic and Monetary Union pursuant to the Treaty establishing the European Union.

As our shares are listed on the New York Stock Exchange (in the form of American Depositary Shares), we are required to file an annual report on Form 20-F with the SEC. Our annual report includes our annual financial statements prepared in accordance with International Financial Reporting Standards (IFRS) and its interpretations as issued by the International Accounting Standards Board (IASB). These consolidated financial statements were also prepared in accordance with IFRS as adopted by the European Union at December 31, 2007.

Unless otherwise indicated, statements in this annual report relating to market share, ranking and data are derived from management estimates based, in part, on independent industry publications, reports by market research firms or other published independent sources. Any discrepancies in any table between totals and the sums of the amounts listed in such table are due to rounding.

FORWARD-LOOKING STATEMENTS

This annual report includes forward-looking statements within the meaning of the federal securities laws, which involve risks and uncertainties, including, without limitation, certain statements made in the sections entitled Information on the Company and Operating and Financial Review and Prospects. You can identify forward-looking statements because they contain words such as believes, expects, may, should, seeks, approximately, intend, estimates, or anticipates or similar expressions that relate to our strategy, plans or intentions. These forward-looking statements are subject to risks and uncertainties that may change at any time, and, therefore, our actual results may differ materially from those that we expected. We have based these forward-looking statements on our current views and assumptions about future events. While we believe that our assumptions are reasonable, we caution that it is very difficult to predict the impact of known factors, and, of course, it is impossible for us to anticipate all factors that could affect our actual results. All forward-looking statements are based upon information available to us on the date of this annual report.

Important factors that could cause actual results to differ materially from our expectations (cautionary statements) are disclosed under Item 3: Key Information Risk Factors and elsewhere in this annual report, including, without

limitation, in conjunction with the forward-looking statements included in this annual report. Some of the factors that we believe could affect our actual results include:

developments affecting our international operations;

our ability to develop an integrated strategy for CGGVeritas;

difficulties and delays in achieving synergies and cost savings;

our substantial indebtedness;

Table of Contents

changes in international economic and political conditions and, in particular, in oil and gas prices;

exposure to the credit risk of customers;

exposure to the interest rate risk;

exposure to the foreign exchange rate risk;

exposure to credit risk and counter-party risk;

our ability to finance our operations on acceptable terms;

the timely development and acceptance of our new products and services;

the complexity of products sold;

changes in demand for seismic products and services;

the effects of competition;

the social, political and economic risks of our global operations;

the costs and risks associated with pension and post-retirement benefit obligations;

changes to existing regulations or technical standards;

existing or future litigation;

difficulties and costs in protecting intellectual property rights and exposure to infringement claims by others;

the costs of compliance with environmental, health and safety laws;

the timing and extent of changes in currency exchange rates and interest rates;

the accuracy of our assessment of risks related to acquisitions, projects and contracts and whether these risks materialize;

our ability to integrate successfully the businesses or assets we acquire, including Veritas;

our ability to monitor existing and targeted partnerships;

our ability to sell our seismic data library;

our ability to access the debt and equity markets during the periods covered by the forward-looking statements, which will depend on general market conditions and on our credit ratings for our debt obligations; and

our success at managing the risks of the foregoing.

We undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. We caution you that the foregoing list of important factors may not contain all of the material factors that are important to you. In addition, in light of these risks, uncertainties and assumptions, the forward-looking events discussed in this annual report might not occur. When considering forward-looking statements, you should keep in mind the risk factors and other cautionary statements included in this annual report, including those described in Item 3: Key Information Risk Factors of this annual report.

Selected Financial Data

The selected financial data included below should be read in conjunction with, and are qualified in their entirety by reference to, our consolidated financial statements and Item 5: Operating and Financial Review and Prospects included elsewhere in this annual report. The selected financial data included below are for CGG prior to the merger with Veritas, which was completed on January 12, 2007, and for CGG Veritas thereafter. The selected financial data for each of the years in the four-year period ended December 31, 2007 have been derived from our audited consolidated financial statements prepared in accordance with IFRS.

Table of Contents

		At December 31,			
	2007	2007	2006	2005	2004
	(In millions of U.S.\$)⁽¹⁾	(In millions of euros except for number of shares)			
<i>Statement of operations data:</i>

- (1) U.S.\$ amounts have been converted at the average exchange rate of U.S.\$1.369 per for statement of operations data and at the closing exchange rate of U.S.\$1.472 for balance sheet data.
- (2) Basic per share amounts have been calculated on the basis of 26,913,428 issued and outstanding shares in 2007, 17,371,927 issued and outstanding shares in 2006 and 12,095,925 issued and outstanding shares in 2005.
- (3) Diluted per share amounts have been calculated on the basis of 27,215,799 issued and outstanding shares in 2007, 17,731,386 issued and outstanding shares in 2006 and 12,095,925 issued and outstanding shares in 2005.
- (4) Consists of net trade accounts and notes receivable, net inventories and work-in-progress, tax assets, other current assets and assets held for sale less trade accounts and notes payable, accrued payroll costs, income tax payable, advance billings to customers, deferred income, current provisions and other current liabilities.

Table of Contents

- (5) Gross financial debt means financial debt, including current maturities, capital leases, bank overdrafts and accrued interest.
- (6) EBITDAS is defined as earnings before interest, tax, depreciation, amortization and share-based compensation cost. Share-based compensation includes both stock options and shares issued under our three share allocation plans. EBITDAS is presented as additional information because we understand that it is one measure used by certain investors to determine our operating cash flow and historical ability to meet debt service and capital expenditure requirements. However, other companies may present EBITDAS differently than we do. EBITDAS is not a measure of financial performance under IFRS and should not be considered as an alternative to cash flow from operating activities or as a measure of liquidity or an alternative to net income as indicators of our operating performance or any other measures of performance derived in accordance with IFRS. See Item 5: Operating and Financial Review and Prospects Liquidity and Capital Resources EBITDAS for a reconciliation of EBITDAS to net cash provided by operating activities.
- (7) Capital expenditures is defined as purchases of property, plant and equipment plus equipment acquired under capital lease and suppliers of fixed assets.
- (8) Net financial debt means bank overdrafts and financial debt including current portion (including capital lease debt) net of cash and cash equivalents.

Exchange Rates

The following table shows, for the periods indicated, information concerning the exchange rate between the U.S. dollar and the euro. This information is provided solely for your information, and we do not represent that euros could be converted into U.S. dollars at these rates or at any other rate. These rates are not the rates used by us in the preparation of our consolidated financial statements incorporated by reference into this proxy statement/prospectus.

The data provided in the following table is expressed in U.S. dollars per euro and is based on noon buying rates published by the Federal Reserve Bank of New York for the euro. On April [22], 2008, the most recent practicable day prior to the date of this annual report, the exchange rate was 1.00 = \$[1.6010].

	Period-End Rate ⁽¹⁾	Average Rate ⁽²⁾	High	Low
Recent Monthly Data				
April 2008 (through April 22, 2008)	1.6010	1.5785	1.6010	1.5615
March 2008	1.5805	1.5520	1.5805	1.5195
February 2008	1.5187	1.4759	1.5187	1.4495
January 2008	1.4841	1.4728	1.4877	1.4574
December 2007	1.4603	1.4559	1.4759	1.4344
November 2007	1.4688	1.4675	1.4862	1.4435
October 2007	1.4468	1.4237	1.4468	1.4092
Annual Data (Year Ended December 31,)				
2007	1.4603	1.3705	1.4862	1.2904
2006	1.3197	1.2560	1.3327	1.1860
2005	1.1842	1.2400	1.3476	1.1667
2004	1.3538	1.2478	1.3625	1.1801

Edgar Filing: CGG VERITAS - Form 20-F

2003	1.2597	1.1411	1.2597	1.0361
2002	1.0485	0.9495	1.0485	0.8594

- (1) The period-end rate is the noon buying rate on the last business day of the applicable period.
- (2) The average rate for each monthly period was calculated by taking the simple average of the daily noon buying rates, as published by the Federal Reserve Bank of New York. The average rate for each annual period was calculated by taking the simple average of the noon buying rates on the last business day of each month during the relevant period.

Risk Factors

Risks related to our business

We are subject to risks related to our international operations that could harm our business and results of operations.

With operations worldwide, including in emerging markets, our business and results of operations are subject to various risks inherent in international operations. These risks include:

instability of foreign economies and governments;

risks of war, terrorism, civil disturbance, seizure, renegotiation or nullification of existing contracts; and

foreign exchange restrictions, sanctions and other laws and policies affecting taxation, trade and investment.

We are exposed to these risks in all of our foreign operations to some degree, and our exposure could be material to our financial condition and results of operations in emerging markets where the political and legal environment is less stable.

We cannot assure you that we will not be subject to material adverse developments with respect to our international operations or that any insurance coverage we have will be adequate to cover us for any losses arising from such risks.

Revenue generating activities in certain foreign countries may require prior United States government approval in the form of an export license and may otherwise be subject to tariffs and import/export restrictions. These laws can change over time and may result in limitations on our ability to compete globally. In addition, non-U.S. persons employed by our separately incorporated non-U.S. entities may conduct business in some foreign jurisdictions that have been subject to U.S. trade embargoes and sanctions by the U.S. Office of Foreign Assets Control. We have typically generated revenue in these countries through the performance of data processing, reservoir consulting services and the sale of software licenses and software maintenance. We have current and ongoing relations with customers in these countries. We have procedures in place to conduct these operations in compliance with applicable U.S. laws. However, failure to comply with U.S. laws on equipment and services exports could result in material fines and penalties and/or damage to our reputation. In addition, our presence in these countries could reduce demand for our securities among certain investors.

We and certain of our subsidiaries and affiliated entities also conduct business in countries which experience government corruption. We are committed to doing business in accordance with all applicable laws and our codes of ethics, but there is a risk that we, our subsidiaries or affiliated entities or their respective officers, directors, employees and agents may take action in violation of applicable laws, including the Foreign Corrupt Practices Act of 1977. Any such violations could result in substantial civil and/or criminal penalties and might materially adversely affect our

business and results of operations or financial condition.

We are subject to certain risks related to acquisitions, including the merger with Veritas DGC Inc., and these risks may materially adversely affect our revenues, expenses, operating results and financial condition.

The merger with Veritas DGC Inc. involves the integration of two companies, CGG and Veritas, that had previously operated independently and as competitors. CGG and Veritas entered into the merger with the expectation that, among other things, the merger would enable us to achieve expected cost synergies from having one rather than two public companies as well as the redeployment of support resources towards operations and

Table of Contents

premises rationalization. Achieving the benefits of the merger will depend in part upon meeting the challenges inherent in the successful combination and integration of global business enterprises of the size and scope of CGG and Veritas and the possible resulting diversion of management attention for an extended period of time. There can be no assurance that we will meet these challenges and that such diversion will not negatively affect our operations. There can be no assurance that we will actually achieve anticipated synergies or other benefits from the merger.

In addition, in the past we have grown by acquisitions, and we may acquire companies or assets in the future. Such acquisitions, whether completed or in the future, present various financial and management-related risks, such as integration of the acquired businesses in a cost-effective manner; implementation of a combined intended business strategy; diversion of our management's attention; outstanding or unforeseen legal, regulatory, contractual, labor or other issues arising from the acquisitions; additional capital expenditure requirements; retention of customers; combination of different company and management cultures; operations in new geographic markets; the need for more extensive management coordination; and retention, hiring and training of key personnel. Should any of these risks associated with acquisitions materialize, it could have a material adverse effect on our business, financial condition and results of operations.

We invest significant amounts of money in acquiring and processing seismic data for multi-client surveys and for our data library without knowing precisely how much of the data we will be able to sell or when and at what price we will be able to sell the data.

We invest significant amounts of money in acquiring and processing seismic data that we own. By making such investments, we are exposed to risks that:

we may not fully recover the costs of acquiring and processing the data through future sales. The amounts of these data sales are uncertain and depend on a variety of factors, many of which are beyond our control. In addition, the timing of these sales is unpredictable, and sales can vary greatly from period to period. Technological or regulatory changes or other developments could also materially adversely affect the value of the data. Additionally, each of our individual surveys has a limited book life based on its location, so particular surveys may be subject to significant amortization even though sales of licenses associated with that survey are weak or non-existent, thus reducing our profits.

the value of our multi-client data could be significantly adversely affected if any material adverse change occurs in the general prospects for oil and gas exploration, development and production activities in the areas where we acquire multi-client data.

any reduction in the market value of such data will require us to write down its recorded value, which could have a significant material adverse effect on our results of operations.

Our results of operations may be significantly affected by currency fluctuations.

We derive a substantial amount of our revenues from international sales, subjecting us to risks relating to fluctuations in currency exchange rates. Our revenues and expenses are denominated in currencies including the euro, the U.S. dollar, the Canadian dollar and, to a significantly lesser extent, other non-euro Western European currencies, principally the British pound and the Norwegian kroner. Historically, a significant portion of our revenues that were invoiced in euros related to contracts that were effectively priced in U.S. dollars, as the U.S. dollar often serves as the reference currency when bidding for contracts to provide geophysical services.

Fluctuations in the exchange rate of the euro against such other currencies, particularly the U.S. dollar, can have a significant effect upon our results of operations, which are reported in euros. The merger with Veritas very

significantly increased both our dollar-denominated revenues and expenses, as Veritas' revenues and expenses have historically been denominated largely in U.S. dollars. Thus, for financial reporting purposes, depreciation of the U.S. dollar against the euro will negatively affect our reported results of operations since U.S. dollar-denominated earnings that are converted to euros are stated at a decreased value. Moreover and in addition to the impact of the conversion of the U.S. dollar at a decreased value, since we participate in competitive bids for data acquisition contracts that are denominated in U.S. dollars, the depreciation of the U.S. dollar against the euro harms our competitive position against companies whose costs and expenses are denominated to a greater extent in U.S. dollars. While we attempt to reduce the risks associated

Table of Contents

with such exchange rate fluctuations through our hedging policy, we cannot assure that we will maintain our profitability level or that fluctuations in the values of the currencies in which we operate will not materially adversely affect our future results of operations. As of the date of this annual report, our fixed expenses in euros amount to 400 million and as a consequence, any unfavorable variation of U.S.\$0.10 in the exchange rate between the U.S. dollar and the euro would impact negatively our operating income by approximately U.S.\$40 million.

Our working capital needs are difficult to forecast and may vary significantly, which could result in additional financing requirements that we may not be able to meet on satisfactory terms, or at all.

It is difficult for us to predict with certainty our working capital needs. This difficulty is due primarily to working capital requirements related to the marine seismic acquisition business and related to the development and introduction of new lines of geophysical equipment products. For example, under specific circumstances, we may extend the length of payment terms we grant to customers or increase our inventories substantially. We may therefore be subject to significant and rapid increases in our working capital needs that we may have difficulty financing on satisfactory terms, or at all, due notably to limitations in our debt agreements.

Technological changes and new products and services are frequently introduced in the market, and our technology could be rendered obsolete by these introductions, or we may not be able to develop and produce new and enhanced products on a cost-effective and timely basis.

Technology changes rapidly in the seismic industry, and new and enhanced products are frequently introduced in the market for our products and services, particularly in our equipment manufacturing and data processing and geosciences sectors. Our success depends to a significant extent upon our ability to develop and produce new and enhanced products and services on a cost-effective and timely basis in accordance with industry demands. While we commit substantial resources to research and development, we may encounter resource constraints or technical or other difficulties that could delay the introduction of new and enhanced products and services in the future. In addition, the continuing development of new products risks making our older products obsolete. New and enhanced products and services, if introduced, may not gain market acceptance and may be materially adversely affected by technological changes or product or service introductions by one of our competitors.

The nature of our business subjects us to significant ongoing operating risks for which we may not have adequate insurance or for which we may not be able to procure adequate insurance on economical terms, if at all.

Our seismic data acquisition activities, particularly in deepwater marine areas, are often conducted under harsh weather and other hazardous operating conditions. These operations are subject to risks of loss to property and injury to personnel from fires, accidental explosions, ice floes and high seas. These types of events could result in loss from business interruption, delay, equipment destruction or other liability. We carry insurance against the destruction of or damage to our seismic equipment and against business interruption for our data processing activities in amounts we consider appropriate in accordance with industry practice. However, our insurance coverage may not be adequate in all circumstances or against all hazards, and we may not be able to maintain adequate insurance coverage in the future at commercially reasonable rates or on acceptable terms.

We depend on proprietary technology and are exposed to risks associated with the misappropriation or infringement of that technology.

Our results of operations depend in part upon our proprietary technology. We rely on a combination of patents, trademarks and trade secret laws to establish and protect our proprietary technology. We currently hold or have applied for 140 patents in various countries for products and processes. These patents last between four and twenty years, depending on the date of filing and the protection accorded by each country. In addition, we enter into

confidentiality and license agreements with our employees, customers and potential customers and limit access to and distribution of our technology. However, actions that we take to protect our proprietary rights may not be adequate to deter the misappropriation or independent third-party development of our technology. Although we are not involved in any material litigation regarding our intellectual property rights or the possible infringement of intellectual property rights of others, such litigation may be brought in the future. In addition, the laws of certain

Table of Contents

foreign countries do not protect proprietary rights to the same extent as either the laws of France or the laws of the United States, which may limit our ability to pursue third parties that misappropriate our proprietary technology.

Our failure to attract and retain qualified employees may materially adversely affect our future business and operations.

Our future results of operations will depend in part upon our ability to retain our existing highly skilled and qualified employees and to attract new employees. A number of our employees are highly skilled scientists and highly trained technicians, and our failure to continue to retain and attract such individuals could materially adversely affect our ability to compete in the geophysical services industry.

We compete with other seismic products and services companies and, to a lesser extent, companies in the oil industry for skilled geophysical and seismic personnel, particularly in times, such as the present, when demand for seismic services is relatively high. A limited number of such skilled personnel is available, and demand from other companies may limit our ability to fill our human resources needs. If we are unable to hire, train and retain a sufficient number of qualified employees, this could impair our ability to manage and maintain our business and to develop and protect our know-how. Our success also depends to a significant extent upon the abilities and efforts of members of our senior management, the loss of whom could materially adversely affect our business and results of operations.

CGG and Veritas have had losses in the past and we cannot assure that we will be profitable in the future.

We recorded net losses in 2004 and 2005 (attributable to shareholders) of 6.4 million and 7.8 million, respectively, although excluding the accounting impact under IFRS of our 7.75% subordinated convertible bonds due 2012 denominated in U.S. dollars, our net income would have been positive. Veritas recorded a net loss of U.S.\$59.1 million in its fiscal year 2003. We cannot assure you that we will be profitable in the future.

Risks related to our industry:

The volume of our business depends on the level of capital expenditures by the oil and gas industry, and reductions in such expenditures may have a material adverse effect on our business.

Demand for our products and services has historically been dependent upon the level of capital expenditures by oil and gas companies for exploration, production and development activities. These expenditures are significantly influenced by oil and gas prices and by expectations regarding future oil and gas prices. Oil and gas prices may fluctuate based on relatively minor changes in the supply of and demand for oil and gas, expectations regarding future supply of and demand for oil and gas and certain other factors beyond our control. Lower or volatile oil and gas prices tend to limit the demand for seismic services and products.

Factors affecting the prices of oil and gas include:

demand for oil and gas;

worldwide political, military and economic conditions, including political developments in the Middle East, economic growth levels and the ability of OPEC to set and maintain production levels and prices for oil;

levels of oil and gas production;

the price and availability of alternative fuels;

policies of governments regarding the exploration for and production and development of oil and gas reserves in their territories; and

global weather conditions.

Although oil and gas prices are currently high compared with historical values, which generally increases demand for seismic products and services, the markets for oil and gas historically have been volatile and are likely to continue to be so in the future.

Table of Contents

We believe that global geopolitical uncertainty could lead oil companies to suddenly delay or cancel current geophysical projects. Any events that affect worldwide oil and gas supply, demand or prices or that generate uncertainty in the market could reduce exploration and development activities and materially adversely affect our operations. We cannot assure you as to future oil and gas prices or the resulting level of industry spending for exploration, production and development activities.

We are subject to intense competition in the markets where we carry out our operations, which could limit our ability to maintain or increase our market share or to maintain our prices at profitable levels.

Most of our contracts are obtained through a competitive bidding process, which is standard for the seismic services industry in which we operate. Competitive factors in recent years have included price, crew availability, technological expertise and reputation for quality, safety and dependability. While no single company competes with us in all of its segments, we are subject to intense competition in each of our segments. We compete with large, international companies as well as smaller, local companies. In addition, we compete with major service providers and government-sponsored enterprises and affiliates. Some of our competitors operate more data acquisition crews than we do and have greater financial and other resources. These and other competitors may be better positioned to withstand and adjust more quickly to volatile market conditions, such as fluctuations in oil and gas prices and production levels, as well as changes in government regulations. In addition, if geophysical service competitors increase their capacity in the future (or do not reduce capacity if demand decreases), the excess supply in the seismic services market could apply downward pressure on prices. The negative effects of the competitive environment in which we operate could thus have a material adverse effect on our results of operations.

We have high levels of fixed costs that are incurred regardless of our level of business activity.

We have high fixed costs, substantial capital expenditures generated by our data acquisition activities. As a result, downtime or low productivity due to, among other things, reduced demand, weather interruptions, equipment failures or other causes could result in significant operating losses.

The revenues we derived from land and marine seismic data acquisition vary significantly during the year.

Our land and marine seismic data acquisition revenues are partially seasonal in nature. The offshore data acquisition business is, by its nature, exposed to unproductive interim periods due to necessary repairs or transit time from one operational zone to another during which revenue is usually not recognized. Other factors that cause variations from quarter to quarter include the effects of weather conditions in a given operating area, the internal budgeting process of some important clients relative to their exploration expenses, and the time necessary to mobilize production means and/or obtain the administrative authorizations necessary to commence data acquisition contracts.

Our business is subject to governmental regulation, which may adversely affect our future operations.

Our operations are subject to a variety of federal, provincial, state, foreign and local laws and regulations, including environmental, health and safety laws. We need to invest financial and managerial resources to comply with these laws and related permit requirements. Our failure to do so could result in fines or penalties, enforcement actions, claims for personal injury or property damages, or obligations to investigate and/or remediate contamination. Failure to timely obtain the required permits may also result in crew downtime and operating losses. Moreover, if applicable laws and regulations, including environmental, health and safety requirements, or the interpretation or enforcement thereof, become more stringent in the future, we could incur capital or operating costs beyond those currently anticipated. The adoption of laws and regulations that directly or indirectly curtail exploration by oil and gas companies could also materially adversely affect our operations by reducing the demand for our geophysical products and services.

Risks related to our indebtedness

12

Table of Contents

Our substantial debt could adversely affect our financial health and prevent us from fulfilling our obligations.

We have a significant amount of debt. As at December 31, 2007, our net financial debt, total assets and shareholders equity were 1,106.7 million, 4,647.0 million and 2,401.6 million, respectively. We cannot assure you that we will be able to generate sufficient cash to service our debt or sufficient earnings to cover fixed charges in future years.

Our substantial debt could have important consequences. In particular, it could:

increase our vulnerability to general adverse economic and industry conditions;

require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund capital expenditures and other general corporate purposes;

limit our flexibility in planning for, or reacting to, changes in our businesses and the industries in which we operate;

place us at a competitive disadvantage compared to our competitors that have less debt; and

limit, along with the financial and other restrictive covenants of our indebtedness, among other things, our ability to borrow additional funds.

Our debt agreements contain restrictive covenants that may limit our ability to respond to changes in market conditions or pursue business opportunities.

The indentures governing our U.S.\$530 million 7 1/2% senior notes due 2015 and U.S.\$400 million 7 3/4% senior notes due 2017 (hereinafter our Senior Notes) and the agreements governing our credit facilities (including the U.S.\$1.14 billion senior credit facilities dated January 12, 2007 (hereinafter our Senior Facilities) and our U.S.\$200 million French revolving facility dated February 7, 2007 (hereinafter our French revolving facility)) contain restrictive covenants that limit our ability and the ability of certain of our subsidiaries to, among other things:

incur or guarantee additional indebtedness or issue preferred shares;

pay dividends or make other distributions;

purchase equity interests or reimburse subordinated debt;

create or incur certain liens;

enter into transactions with affiliates;

issue or sell capital stock of subsidiaries;

engage in sale-and-leaseback transactions; and

sell assets or merge or consolidate with another company.

Complying with the restrictions contained in some of these covenants requires us to meet certain ratios and tests, notably with respect to consolidated interest coverage, total assets, net debt, equity and net income. The requirement that we comply with these provisions may materially adversely affect our ability to react to changes in market conditions, take advantage of business opportunities we believe to be desirable, obtain future financing, fund needed capital expenditures, or withstand a continuing or future downturn in our business.

If we are unable to comply with the restrictions and covenants in the indentures and agreements governing our Senior Notes and our other current and future debt, there could be a default under the terms of these indentures and agreements, which could result in an acceleration of repayment.

If we are unable to comply with the restrictions and covenants in the indentures governing the Senior Notes or in other current or future debt agreements, including the Senior Facilities and the French revolving facility, there

Table of Contents

could be a default under the terms of these indentures and agreements. Our ability to comply with these restrictions and covenants, including meeting financial ratios and tests, may be affected by events beyond our control. As a result, we cannot assure you that we will be able to comply with these restrictions and covenants or meet such financial ratios and tests. In the event of a default under these agreements, lenders could terminate their commitments to lend or accelerate the loans and declare all amounts borrowed due and payable. Borrowings under other debt instruments that contain cross-acceleration or cross-default provisions may also be accelerated and become due and payable. If any of these events occur, our assets might not be sufficient to repay in full all of our outstanding indebtedness and we may be unable to find alternative financing. Even if we could obtain alternative financing, it might not be on terms that are favorable or acceptable to us.

We and our subsidiaries may incur substantially more debt.

We and our subsidiaries may incur substantial additional debt (including secured debt) in the future. The terms of the indentures governing our Senior Notes and our other existing senior indebtedness limit, but do not prohibit, our subsidiaries and us from doing so. As of the date of this annual report, we have drawn U.S.\$890 million under the Senior Facilities to finance the cash component of the consideration for the merger with Veritas. If new debt is added to our current debt levels and those of our subsidiaries, the related risks for us could intensify.

To service our indebtedness, we require a significant amount of cash, and our ability to generate cash will depend on many factors beyond our control.

Our ability to make payments on and to refinance our indebtedness, and to fund planned capital expenditures depends in part on our ability to generate cash in the future. This ability is, to a certain extent, subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control.

We cannot assure you that we will generate sufficient cash flow from operations, that we will realize operating improvements on schedule or that future borrowings will be available to us in an amount sufficient to enable us to service and repay our indebtedness or to fund our other liquidity needs. If we are unable to satisfy our debt obligations, we may have to undertake alternative financing plans, such as refinancing or restructuring our indebtedness, selling assets, reducing or delaying capital investments or seeking to raise additional capital. We cannot assure you that any refinancing or debt restructuring would be possible, that any assets could be sold or that, if sold, the timing of the sales and the amount of proceeds realized from those sales, or that additional financing could be obtained on acceptable terms.

Our results could be materially adversely affected by changes in interest rates.

Our sources of financing include credit facilities and debt securities that are or may be subject to variable interest rates. In particular, our Senior Facilities are subject to interest based on U.S. dollar LIBOR. As a result, our interest expenses may increase significantly if short-term interest rates increase. Each 50 basis point increase in the U.S. dollar LIBOR would increase our pro forma interest expense by approximately U.S.\$5 million per year.

Item 4: INFORMATION ON THE COMPANY

We were established in 1931 to market geophysical techniques for appraising underground geological resources. Since that time, we have gradually come to specialize in seismic techniques adapted to exploration for and production of oil and gas, while continuing to carry on other geophysical activities. Compagnie Générale de Géophysique-Veritas is the parent company of the Group. We are a *société anonyme* incorporated under the laws of the Republic of France and operating under the French *Code de commerce*. Our registered office is Tour Maine Montparnasse, 33, avenue du Maine, 75015 Paris, France. Our telephone number is (33) 1 64 47 45 00.

Over the course of the last three years, we have completed numerous acquisitions and dispositions which are described in Item 5: Operating and Financial Review and Prospects Acquisitions and Dispositions and elsewhere in this annual report.

Table of Contents

Business Overview

We believe we are a leading international provider of geophysical services and manufacturer of geophysical equipment. We provide geophysical services principally to oil and gas companies that use seismic imaging to help explore for, develop and manage oil and gas reserves by:

- identifying new areas where subsurface conditions are favorable for the accumulation of oil and gas;
- determining the size and structure of previously identified oil and gas fields; and
- optimizing development and production of oil and gas reserves (reservoir management).

We sell our geophysical equipment primarily to other geophysical service companies.

Our operations are organized into two segments: Services and Equipment, in accordance with our internal reporting system, which we use to manage and measure our performance. Services accounted for 71% and Equipment accounted for 29% of CGGVeritas consolidated revenues for the year ended December 31, 2007.

For the year ended December 31, 2007, 30.9% of our consolidated revenues were from North America, 10.3% from South America, 32.3% from Europe, Africa, Middle East, and 26.5% from Asia Pacific.

The Merger

On January 12, 2007, CGG acquired Veritas (the merger) pursuant to an agreement and plan of merger dated September 4, 2006 (the merger agreement). In the merger, CGG issued an aggregate of 46.1 million ADSs and paid an aggregate of U.S.\$1.5 billion in cash to holders of Veritas stock. The merger was completed on January 12, 2007. The combined company was thereafter renamed Compagnie Générale de Géophysique-Veritas, abbreviated as CGG Veritas.

Strengths

We believe a number of strategic factors favor the development of CGG Veritas:

- the business environment in which we operate is strong, as decreasing reserves of oil and gas companies have been coupled with growing energy consumption sustained by long-term demand, particularly in China and India;
- we are a leading, global, pure-play seismic company, offering a broad range of seismic services, and, through Sercel, geophysical equipment to the industry across all markets;
- we have a long tradition of providing seismic services both onshore and offshore with strong technological foundations in the geophysical services and equipment market;
- our fleet of 20 vessels, with 14 high capacity 3D vessels, five mid capacity 3D vessels and one 2D vessel, is the world's leading seismic fleet;
- we own recent vintage and well-positioned multi-client seismic data libraries;

our supply of land seismic acquisition services is geographically and technologically well placed for high-end positioning and further development of local partnerships;

our respective positions in data processing and imaging and the skills and reputation of our experts and geoscientists are an industry reference in this segment, with particular strengths in advanced technologies such as depth imaging, 4D processing and characterization;

with a combined workforce of approximately 8,000 employees operating worldwide, including at Sercel, we are, through continued innovation, an industry leader in seismic technology, services and equipment with a broad base of customers, including independent, international and national oil and gas companies.

Table of Contents

Industry Conditions

Overall demand for geophysical services and equipment is dependent upon spending by oil and gas companies for exploration, production development and field management activities. This spending depends in part on present and expected future oil and gas prices.

We believe that the medium-term outlook for the geophysical services sector, particularly the offshore segment, and the demand for geophysical equipment is fundamentally positive for a number of reasons:

economic growth, particularly in more active regions such as Asia (notably China and India), is generating increased energy demand and leading to higher energy prices and increased exploration efforts;

the need to replace depleting reserves and maximize the recovery of oil in existing reservoirs should encourage capital expenditures by companies engaged in exploration and production, which we expect will benefit the seismic industry;

many developing countries are committed to increasing their energy independence. We expect this goal notably to increase demand for seismic exploration by national oil companies;

the scope of application of geophysical services has considerably increased over the last several years as a result of significant research and development efforts. Geophysical services can now potentially be applied to the entire sequence of exploration, development and production, as opposed to exploration only. This is particularly true with technologies such as wide azimuth and 4D (time lapse seismic data);

Finally, the depth and duration of the contraction in the geophysical sector between 1999 and 2004 may have increased awareness among geophysical service providers of the risks related to market overcapacity.

We believe that CGGVeritas is in a strong position to benefit from these industry conditions.

Our Strategy

We intend to continue to strengthen our competitive position in the global geophysical services and equipment markets by capitalizing on growth opportunities resulting from both the application of new technologies in every sector of the oil and gas business from exploration to production and reservoir management and from our worldwide presence.

To achieve this objective, we have adopted the following strategies:

Focus on Growth Areas for Geophysical Services

We believe that our proprietary equipment and software provide us with a competitive advantage in specific growth markets, such as data acquisition in transition zones and difficult terrain, where recent technological advances have made seismic acquisition more feasible. We intend to focus on developing our technological capabilities in emerging markets for geophysical services, such as reservoir appraisal and production monitoring. We also believe that we have unique experience and expertise in complex land seismic acquisition projects in both desert and arctic regions.

We believe that our geographic footprint will allow us to respond to the growing demand for seismic imaging and reservoir solutions.

We also intend to maintain our position in the marine and land seismic market for multi-client data by developing our multi-client data library. We believe that a strong position in this market segment enhances our global competitive position and may provide opportunities for continuing future sales. In developing our multi-client data library, we carefully select survey opportunities in order to maximize our return on investment. We also intend to apply the latest advances in depth imaging technology to a selected part of our existing library.

Given the growing importance of geophysics in reservoir characterization, we intend to further develop the synergies between our data processing and reservoir services. This approach places us in a better position to meet the requirements of our clients with an extensive range of integrated services. With the increasing market use of wide-azimuth in the Gulf of Mexico and the growing demand for advanced imaging capabilities, we also intend to

Table of Contents

increase our processing capability in developing disciplines, such as reservoir description and monitoring, including wide-azimuth, multi-component and 4D studies. We also plan to continue promoting and developing our dedicated processing centers within our clients' offices and developing our regional centers. We are also actively continuing the convergence of our legacy software technologies in order to achieve full synergy expected in 2009.

Develop Technological Synergies for Products and Capitalize on New Generation Equipment

We believe Sercel is the leading manufacturer of land, marine and subsea geophysical equipment. We plan to continue developing synergies among the technologies available to Sercel and to capitalize fully on our position as a market leader. Through our research and development, we seek to improve existing products and maintain an active new product development program in all segments of the geophysical equipment market (land, marine and ocean-bottom).

Develop and Utilize Innovative Technology

The significant technological developments in seismic services over the last decade have produced a marked change in the sector. The development of 4D and wide-azimuth techniques (providing time lapse views and enhanced illumination of the reservoir as well as improved image resolution) now allows operators to better locate and monitor reservoir performance. This possibility broadens the use of seismic techniques from pure exploration (early cycle) into a tool for reservoir development, management and production (late cycle). Importantly, these techniques require more vessel time than traditional data acquisition. For example, three to six times more vessel time is required to shoot wide azimuth data than traditional 3D.

We believe that growth in demand for geophysical services will continue to be driven in part by the development of new technologies. The industry is increasingly demanding clearer seismic imaging and better visibility, particularly underneath salt layers. We expect multi-azimuth, wide azimuth, multi-component (3C/4C) surveys and time-lapse (4D) surveys to become increasingly important for new production-related applications, particularly in the marine sector, and expect specialized recording equipment for difficult terrain to become more important in land seismic data acquisition, particularly in transition zones, shallow water and arctic areas. We believe that to remain competitive, geophysical services companies will need to combine advanced data acquisition technology with consistently improving processing capacity in order to reduce further delivery times for seismic services.

Our strategy is to continue our high level of research and development investment to reinforce our technological leadership. We also intend to take advantage of our full range of integrated services to enhance our position as a market leader in:

land and transition zone seismic data acquisition systems and know-how;

innovative marine or seabed acquisition systems and services;

seismic data processing and reservoir services; and

manufacturing of land, marine and subsea data acquisition equipment.

Emphasize Client Service

We believe it is important to operate in close proximity to our clients to develop a better understanding of their individual needs and to add measurable value to their business processes. We respond to these needs by creating new products or product enhancements that improve the quality of data and reduce the data delivery time to clients. We believe that our regional multi-client and dedicated data processing centers in our clients' offices provide us with an

advantage in identifying contract opportunities, optimizing service to clients and developing products responsive to new market demands, such as seismic techniques applied to reservoir management. We believe that we are well positioned to benefit from the industry trend towards increased outsourcing. This trend is leading oil and gas companies to place greater emphasis on relationships and service quality (including health, safety and protection of the environment) in their selection of third party service providers, including geophysical services providers.

Table of Contents

Provide Integrated Services

We are committed to providing clients with a full array of seismic data services, from acquisition and processing to data interpretation and management. We believe that integration of compatible technology and equipment increases the accuracy of data acquisition and processing, enhances the quality of our client service and thereby improves productivity in oil and gas exploration and production. Our clients increasingly seek integrated solutions to better evaluate known reserves and improve the ratio of recoverable hydrocarbons from producing fields. We are continuing to develop our ability to provide geosciences solutions through a combination of various exploration and production services, including technical data management, reservoir characterization and interpretation of well information.

Develop Well-positioned Data Libraries

We intend to take advantage of our recent vintage, well-positioned seismic data libraries and will capitalize on our strong experience in the wide azimuth technology. The industry's growing interest in wide-azimuth technology to explore complex geological environments has translated into high pre-funding levels for the Gulf of Mexico. Walker Ridge and Garden Banks surveys may generate interest from deep offshore large oil and gas companies. Onshore, CGGVeritas' land library offers additional potential in North America. Our seismic data library is a strength in a market where a global library portfolio is increasingly attractive to clients.

Develop Reservoir Applications

Seismic data is currently mainly used by oil and gas companies for exploration purposes. However, we are progressively extending our core business towards compiling and analyzing seismic data of existing reservoirs. Through high-resolution images and our expertise in 4D seismic and permanent monitoring, we aim to assist hydrocarbon producers in better characterizing and predicting the static properties and dynamic behavior of their reservoirs.

Combine EM and Seismic Information

Seismic imaging has improved significantly over the past decade as computer processing has enabled the analysis of ever more sophisticated data sets. Yet 3D seismic still only supplies one form of information, namely geological interpretation. Seismic imaging uses an acoustic wave to indicate whether a possible hydrocarbon trap exists within the earth but it is limited in its ability to determine what kind of fluid is in that trap. As the cost of drilling has increased significantly, any technique that can improve drilling success rates is of interest to oil companies.

Electromagnetic (EM) surveying potentially offers a technique for the detection of hydrocarbons that is complementary to traditional seismic. EM uses a low frequency electromagnetic wave and measures resistivity changes within the earth, giving it the potential to provide important information regarding fluid types. Oil companies are in the early adoption phase, largely as a risk reduction measure to determine whether EM can assist in determining whether drilling should go ahead.

We believe that combining different types of information is the key to extracting the greatest value from geophysical data sets. Studies have shown it is possible to predict reservoir properties across the lateral extent of a field by combining EM and seismic measurements, calibrated with well-log data. We believe that EM technology will continue to develop in the coming years as a recognized hydrocarbon presence confirmation tool and become a natural complement to seismic technology. We are confident that the strategic alliance between CGGVeritas and OHM will better serve customers by providing a wide range of imaging technologies, will accelerate market penetration of EM and could improve the exploration and production performance of our clients by combining seismic and EM imaging.

Table of Contents**Operating Revenues Data****Revenues by Business Lines**

The following table sets forth our consolidated operating revenues by activity in millions of euros or dollars, as the case may be, and the percentage of total consolidated operating revenues represented thereby, for the periods indicated:

	2007			2006			2006	
	Historical data		%	Unaudited Pro forma data		Historical data		
	M	MU.S.\$		M	MU.S.\$	M	%	%
Total Land Seismic								
Acquisition	461.5	631.8	19%	365.0	458.4	18%	119.1	9%

Multi-client	134.2	183.8	6%	94.7	119.0	5%		
Total Marine Seismic								
Acquisition	986.4	1,350.5	41%	887.6	1,114.9	45%	533.3	40%
Contract	531.2	727.3	22%	462.2	580.5	23%	315.4	24%
Multi-client	455.2	623.2	19%	425.4	534.4	21%	217.9	16%
Processing and Imaging	263.2	360.5	11%	258.1	324.3	13%	139.7	11%
Total Services	1,711.1	2,342.8	72%	1,510.7	1,897.6	76%	792.1	60%
12 days elimination ⁽¹⁾	(16.5)	(22.6)						
Total Services	1,694.6	2,320.2	71%	1,510.7	1,897.6	76%	792.1	60%
Equipment	679.5	930.5	29%	479.5	602.3	24%	537.5	40%
Total	2,374.1	3,250.7	100%	1,990.2	2,499.9	100%	1,329.6	100%

- (1) The merger with Veritas took effect on January 12, 2007. The 1,711.1 million figure above is composed of Services segment business line revenues for each of CGG and Veritas from and including January 1, 2007. We have consequently eliminated from this figure Veritas revenues in an amount of 16.5 million attributable to 2007 Veritas revenues between January 1 and January 12, 2007, the effective date of the merger of CGG and Veritas. Because our internal reporting systems did not permit us to identify the CGGVeritas Services segment business lines to which such twelve days of Veritas revenues should be allocated, we have eliminated such twelve days of revenues from such 1,711.1 million figure to arrive at total Services revenues (including Veritas revenue after the merger date) of 1,694.6 million for the financial year ended December 31, 2007.

Revenues by Region (by location of customers)

The following table sets forth our consolidated operating revenues by region in millions of euros or dollars, as the case may be, and the percentage of total consolidated operating revenues represented thereby, for the periods indicated:

	2007			2006			2006	
	Historical data		%	Unaudited Pro forma data		Historical data		
	M	MU.S.\$		M	MU.S.\$	M	%	%
North America	734.6	1,005.8	31%	721.7	906.6	36%	344.2	26%

Central and South Americas	244.0	334.2	10%	199.7	250.9	10%	138.3	10%
Europe, Africa and Middle East	767.2	1,050.5	32%	612.2	768.9	30%	472.7	36%
Asia Pacific	628.3	860.2	27%	456.6	573.5	23%	374.4	28%
Total	2,374.1	3,250.7	100%	1,990.2	2,499.9	100%	1,329.6	100%

Services

Our geophysical Services segment is composed of:

land contract: seismic data acquisition for land, transition zones and shallow water undertaken by us on behalf of a specific client;

multi-client land: seismic data acquisition for land, transition zones and shallow water undertaken by us and licensed to a number of clients on a non-exclusive basis;

Table of Contents

marine contract: seismic data acquisition offshore undertaken by us on behalf of a specific client;

multi-client marine: seismic data acquisition offshore undertaken by us and licensed to a number of clients on a non-exclusive basis; and

processing and imaging: processing, imaging and interpretation of geophysical data, data management and reservoir studies for clients.

Our Services segment is organized by region to better promote our entire spectrum of services in our main markets, focusing on providing comprehensive solutions to client problems. We believe that our capacity to provide integrated geophysical services is a significant competitive advantage.

Land Business Line

Land Seismic Acquisition

Land seismic acquisition includes all seismic surveying techniques where the recording sensor is either in direct contact with, or in close proximity to, the ground. Our land business line offers integrated services, including the acquisition and on site processing of seismic data on land, in transition zones and on the ocean floor (seabed surveys). We undertake land surveys with both a contract and multi-client basis.

We are a significant land seismic acquisition contractor worldwide, including in North America, and particularly in difficult terrain. In December 2007, we had 25 active land crews performing specialized 3D and 2D seismic surveys. Total land seismic acquisition activities accounted for 19% of our consolidated operating revenues in 2007. Contracts for land seismic acquisition accounted for 14% and multi-client surveys accounted for 5% of our consolidated operating revenue in 2007.

Our land operations include surveying crews and recording crews. Surveying crews lay out the lines to be recorded and mark the sites for shot-hole placement or equipment location, and recording crews produce acoustic impulses and use recording units to synchronize the shooting and record the seismic signals via geophones. On a land survey where explosives are used as the acoustic source, the recording crew is supported by several drill crews. Drill crews operate in advance of the recording crew and bore shallow holes for explosive charges which, when detonated by the recording crew, produce the necessary acoustic impulse. Seismic surveying in transition zones and on the sea-bed is carried out by laying cables or other stationary measuring devices on the ocean floor.

Land seismic crews are equipped with advanced equipment and software used in each stage of the land seismic acquisition process, including: the Sercel 408UL and 428XL seismic data recorders; the Sercel VE 432 vibrator electronic control system, used to synchronize and verify the emission of acoustical waves by vibrators; and on-site processing software for acquired data.

We believe that our technology and our experience enable us to offer high quality, fully integrated land seismic services. We have pioneered real-time positioning of geophones and seismic sources, quality control of positioning during land surveys, and on-site processing, which together increase the accuracy and efficiency of such surveys.

One of the challenges inherent in land seismic acquisition surveys is gathering data without disrupting the sensitive ecosystems in which such surveys are frequently located. We have developed a strong position in environmentally sensitive zones, such as mountainous regions, tropical forests and swamps, by following a strict policy of preserving the natural environment to the extent possible. We also work in conjunction with the local community at site

locations, hiring local employees and obtaining necessary local authorizations to alleviate potential opposition to our operations.

The difficulty of access to survey sites is a major factor in determining the number of personnel required to carry out a survey and the cost of a survey. A full crew for a land or transition zone survey may range from a total of less than 100 to 3,000 members (principally composed of local employees in the later case), and the cost of a survey can range from several hundred thousand to several million dollars per month, depending on the size of the team and the type and difficulty of the survey.

We work closely with our clients to plan surveys in accordance with their specifications. This provides us with a competitive advantage in being selected to carry out surveys, whether such surveys are awarded based on

Table of Contents

competitive bids or directly negotiated agreements with clients. We regularly conduct land seismic acquisition surveys for national and international oil companies.

We have developed partnerships with local seismic acquisition companies in several countries, including Kazakhstan, Indonesia and Libya. We contribute our international expertise, technical know-how, equipment and experienced key personnel to these partnerships as needed, while local partners provide their logistical resources, equipment and knowledge of the environment and local market.

In Saudi Arabia, our land seismic acquisition activities are conducted through Arabian Geophysical & Surveying Co. (Argas), a joint venture owned 49% by us and 51% by TAQA, our local partner. Since June 2006, in our Middle East operations are conducted through Ardiseis.

On the multi-client acquisition side, in 2007, we invested 102 million (U.S.\$140 million) in multi-client land seismic acquisition, mainly in North America. Total revenues from multi-client land seismic acquisition for 2007 were 134 million (U.S.\$184 million), a strong 54% increase in dollar terms year on year.

Multi-client after-sales were 65 million (U.S.\$89 million) for 2007 driven by strong demand in our Canadian and US lower 48 states data library.

The prefinancing level was high at 68% and as of December 31, 2007, the net book value of our land multi-client library was 140 million (U.S.\$206 million).

Land Seismic Acquisition Business Development Strategy

Land Seismic Acquisition Contract Activity

Our land seismic acquisition services are geographically and technologically well placed for high-end positioning and further development of local partnerships. We have developed a unique expertise in North America's arctic regions. We have developed partnerships with local seismic acquisition companies in several countries, including Saudi Arabia, Kazakhstan, Indonesia and Libya.

The demand for land seismic acquisition services and for technology in particular is increasing and our strategy for the land acquisition business line is to:

- focus our presence in certain geographic markets, such as Europe, Africa and the Middle East, where we believe we have a competitive advantage;

- serve the increasing demand for land seismic acquisition and for high-end technology in particular, through the expansion of our HPVAtm wide azimuth technology and the introduction of Seismovietm for advanced 4D projects;

- further reinforce our presence in arctic North American regions through the introduction during the next two winter seasons of new technology for high resolution acquisition; and

- continue to promote our expertise in harsh environments, sensitive areas (in terms of environmental or community concerns), shallow water and transition zones, and in management of complex projects where barriers to entry are higher and pricing competition less intense.

Multi-client

We also plan to continue investing in non-exclusive land seismic data libraries, especially in the U.S. and in Canada, where we have a strong and recent vintage library.

Marine Business Line

Marine Seismic Acquisition

We provide a full range of 3D marine seismic services, principally in the Gulf of Mexico, the North Sea and off the coasts of West Africa and Brazil, as well as in the Asia-Pacific region.

Table of Contents

Marine seismic surveys are conducted through the deployment of submersible cables (streamers) and acoustic sources (airguns) from marine vessels. Such streamers are each up to 10 kilometers long and carry hydrophone groups normally spaced 12.5 meters apart along the length of the streamer. The recording capacity of a vessel is dependent upon the number of streamers it tows and the number of acoustic sources it carries, as well as the configuration of its data recording system. By increasing the number of streamers and acoustic sources used, a marine seismic operator can perform large surveys more rapidly and efficiently.

We undertake both contract and multi-client marine seismic surveys. When we acquire marine seismic data on a contract basis, the customer contracts to pay for and directs the scope and extent of the survey and retains ownership of the data obtained. In regions where there is extensive petroleum exploration, such as Brazil, the Gulf of Mexico, West Africa, the Mediterranean Sea and the North Sea, we also undertake multi-client surveys, in which we fund the survey ourselves and retain ownership of the seismic data. This enables us to provide multiple companies access to the data by way of license. As a result, we have the potential to obtain multiple and higher revenues, while our customers who license the data have the opportunity to pay lower prices. The capacity to both acquire and process marine seismic data is an important element of our overall strategy to maintain and develop our leading position in marine seismic data acquisition and processing.

We operated 58% of our high-end 3D fleet on contract in 2007, mostly in the Eastern Hemisphere, with half in Asia-Pacific (Malaysia and Vietnam) and half in Europe, Africa and the Middle-East (Norway, Congo and Qatar) on large high resolution and 4D surveys.

Total marine activities accounted for 41% of our consolidated operating revenue in 2007. Marine seismic acquisition contracts accounted for 22% and multi-client marine accounted for 19% of our consolidated operating revenue in 2007.

Marine Seismic Acquisition Contract Activity

We provide a full range of marine seismic services, principally in the Gulf of Mexico, the North Sea and off the coasts of West Africa and Brazil, as well as in the Asia-Pacific region.

We currently operate a combined fleet of 20 vessels, including eight high capacity vessels (8 to 14 streamers), eight mid capacity vessels (6 to 8 streamers) and four small 3D/2D vessels. All vessels are equipped with Sercel's solid or fluid streamers. In 2007, we continued the performance upgrades of our fleet with the launch of the *Vision* at the end of July, the completion of our new *Vanquish* seismic vessel, operational mid-December, and the upgrade of the *Challenger* from a 10 to a 12 streamer configuration before it begins a 3D multi-azimuth contract offshore from Egypt.

We own some of our vessels, we co-own one and we use the others pursuant to time charters. This flexibility allows us to right size our fleet according to market requirements. The 3D vessels we own are the *Amadeus*, the *Symphony*, the *Orion* and the *Search*. The low capacity 3D/2D vessels we own are the *Venturer*, the *Princess* and the *Duke*. We co-own the vessel *Alizé* and charter, with a final purchase option, the following 3D vessels: the *Geo Challenger*, the *Fohn* and the *Harmattan*. The other 3D vessels we charter are the *Vision*, the *Vanquish*, the *Viking*, the *Viking II*, the *Vantage* and the *Laurentian*. The low capacity 3D/2D vessels we charter are the *Voyager*, the *Pacific Titan* and the *Pacific Sword*.

The 2D vessels are used for 2D surveys or, when required, as source vessels for more complex operations, which have higher margins, such as for wide azimuth or complex undershooting surveys.

With more vessels, we increase our geographical coverage and can minimize unproductive time by reducing vessels transit between areas of operation. Each vessel is equipped with geophysical recording instrumentation, digital geophysical streamer cable, cable location and geophysical data location systems, multiple navigation systems, a source control system that controls the synchronization of the energy source, and a firing system that generates the acoustic impulses. Streamer cables contain hydrophones that receive the acoustic impulses reflected by variations in the subsurface strata.

The *Alizé*, the *Viking*, the *Viking II*, the *Vantage*, the *Vision* and the *Vanquish* are each capable of deploying eight to twelve streamers simultaneously. The *Alizé*, the *Viking*, the *Viking II*, the *Vantage*, the *Vision*, the *Vanquish*

Table of Contents

and *Voyager* are equipped with solid streamers, which offer numerous advantages over fluid-filled streamers. The solid streamers allow these vessels to work in rougher seas and record more desirable frequencies with less noise and less downtime than is possible with fluid-filled streamers.

On July 2, 2007, we entered into an agreement, amended on March 14, 2008, with Eidesvik Offshore ASA for the supply of two large seismic vessels to be newly built, with a total contract value of approximately U.S.\$420 million. The two vessels will be of an extremely advanced specification, incorporating many unique features, based on the most recent X-BOW™ design of Ulstein Design AS, and will be delivered in 2010 under 12-year time charter agreements. These two high-capacity, innovative vessels are key components of our strategy of progressive fleet renewal, involving the staged retirement of the former generation of lower capacity vessels in conjunction with the introduction of these new platforms. The new vessels are purpose-designed for the efficient deployment of industry-leading Sercel solid streamer technology and configured for spreads of up to 16 long streamers, or 20 shorter streamers in high-density applications.

The following table provides certain information concerning the seismic vessels we operate.

Vessel name	Year built	Year of upgrade	Year added to fleet	Charter expires	Options to extend	# 2D/3D Streamer	length(m)	Vessel

Marine Multi-client Library

Contract surveys generally provide for us to be paid a fixed fee per square kilometer of data acquired. When we acquire marine seismic data on a contract basis, the customer directs the scope and extent of the survey and retains ownership of the data obtained. In regions where there is extensive petroleum exploration, such as Brazil, the Gulf of Mexico, West Africa, the Mediterranean Sea and the North Sea, we also undertake multi-client surveys whereby we retain ownership of the seismic data. This enables us to provide multiple companies access to the data by way of license. As a result, we have the potential to obtain multiple and higher revenues, while our customers who license the data have the opportunity to pay lower prices.

Our policy is generally to require a minimum share of the estimated cost of each multi-client survey to be covered by pre-commitments from clients prior to commencement. We treat these multi-client projects as investments. In determining whether to undertake multi-client surveys, we consider factors that include the availability of initial participants to underwrite a share of the costs to acquire such data, the location to be surveyed,

Table of Contents

the probability and timing of any future lease concessions and development activity in the area and the availability, quality and price of competing data. Once the surveys are completed, our customers may license the resulting data through after-sales .

Multi-client survey production accounted for more than 40% of our 3D fleet utilization in 2007. See Item 3: Key Information Risk Factors Risks Related to Our Business We invest significant amounts of money in acquiring and processing seismic data for multi-client surveys and for our data library without knowing precisely how much of the data we will be able to sell or when and at what price we will be able to sell the data.

The multi-client libraries provide prospect-ready 3D or 2D data and therefore accelerate the exploration-production process. We believe that having high quality and well located multi-client data library is important for our ability to generate cash flow in the future. In 2007, we expanded the size and the value of our US Gulf of Mexico, Brazilian and North Sea multi-clients dataset by acquiring new blocs in key areas and by imaging the subsurface with our latest processing technology. In particular, we used wide azimuth technology in the deep offshore waters of the Gulf of Mexico.

In 2007, we invested 269 million (U.S.\$368 million) mainly in the Gulf of Mexico but also in Brazil and in the North Sea. Total revenues from multi-client marine seismic acquisition were 455 million (U.S.\$623 million) in 2007, a 17% increase in dollar terms from 2006.

The prefinancing level was strong at 86% while well positioned multi-clients benefited from increased customer interest and as of December 31, 2007, the net book value of our offshore multi-clients library was 296 million (U.S.\$435 million).

In 2007, we benefited from increasing exploration activity enhanced by the quick acceptance of wide azimuth technology which provides better subsalt illumination. While completing the Alaminos Canyon 3D conventional program, we acquired more than 6,500 square kilometers of wide azimuth data in the Walker Ridge area. In early December 2007, we also started the acquisition of our Garden Bank wide azimuth program. This is our fifth wide-azimuth survey in the Gulf of Mexico at present.

Multi-client after-sales in 2007 were 220 million (U.S.\$301 million) driven by strong interest for our Brazil and Gulf of Mexico data library.

Seabed

Our subsidiary Multiwave is a Norwegian seismic company specializing in seabed seismic operations and electromagnetic seabed logging (EM SBL). Seabed seismic collection is a more recent process than towed seismic collection and generally does not compete with towed seismic collection. Seabed seismic operations are most often used in areas where conventional streamer acquisition is impossible. The method can also be more effective in certain types of seismic applications, such as the monitoring of existing production fields to optimize reservoir recovery rates. Seabed seismic collection is based on laying recording cables on the seabed, either permanently or as a mobile system that can be re-used in other areas. The data collection may take place through multiple components (3C) adapted to seabed environments, resulting in greater accuracy than conventional towed seismic collection, or through permanent systems that permit continuous monitoring over time (4C/4D).

With our acquisition of Exploration Resources in 2005, however, we have obtained strong know-how and experience in the fields of seabed seismic collection. We will continue to offer these services under the Multiwave name. Also CGGVeritas successfully implemented in 2007 a seabed solution offshore Malaysia at a water depth of over 1,000 meters.

Marine Seismic Acquisition Business Development Strategy

Marine contract

We believe that marine seismic services constitute one of the essential pillars of a firm presence in the seismic sector and therefore want to maintain a strong position in both the 3D and 2D marine seismic segments in contract and multi-clients surveys. Historically, 2D was typically limited to pre-exploration efforts, as clients wished to have a rudimentary 2D image of an entire area in order to rapidly identify zones that justified 3D imaging. The possession

Table of Contents

of a mixed 2D/3D fleet thus becomes a strategic advantage and an essential factor in a company's credibility with oil company clients.

With Multiwave, we have a significant expertise in the seabed segment, which we believe is in the early stages of development. Multiwave has in recent years developed recognized experience in the engineering and operational management of highly technical projects in the emerging field of subsea geophysics, both seismic and electro-magnetic, covering both the use of permanent instrumentation in production fields and the more traditional method of using recoverable instruments to perform a study.

Marine multi-client

We intend to take advantage of our recent vintage, well positioned seismic data library. We will actively pursue our investment in wide azimuth programs in the Gulf of Mexico.

Processing and Imaging Business Line

Processing and Imaging

Seismic data processing operations transform seismic data acquired in the field into 2D cross-sections, or 3D images of the earth's subsurface or 4D time-lapse seismic data using Geocluster and Hampson-Russell software, our proprietary seismic software, or third party applications. These images are then interpreted by geophysicists and geologists for use by oil and gas companies in evaluating prospective areas, selecting drilling sites and managing producing reservoirs.

We provide seismic data processing and reservoir services through our network of data processing centers and reservoir teams located around the world. We operated 49 worldwide processing and imaging centers, including 14 dedicated client centers at December 31, 2007. Contract revenues from our Processing and Imaging business line accounted for approximately 11% of our consolidated revenues in 2007.

Data Processing Activity

We process seismic data acquired by our land and marine seismic acquisition crews as well as seismic data acquired by non-affiliated third parties. Marine seismic data has been a significant source of the growth in demand for our data processing services. In addition, we reprocess previously processed data using new techniques to improve the quality of seismic images. Demand for processing and imaging remained strong worldwide in 2007, driven by marine data volumes, especially with the increasing market adoption of wide-azimuth in the Gulf of Mexico and the growing demand for our advanced imaging capabilities.

We complement our network of international centers with both regional centers, open to all our customers, and dedicated centers that bring processing facilities within our clients' premises. Fourteen of our data processing centers are dedicated centers that are located in clients' offices. We believe that these dedicated centers are responsive to the trend among oil and gas companies to outsource processing work.

Beyond conventional processing and reprocessing, we are also increasingly involved in reservoir-applied geophysics, an activity that encompasses large integrated reservoir studies from reprocessing to full reservoir simulation. It also includes advanced technology studies such as reservoir characterization, stratigraphic inversion and stochastic reservoir modeling.

Each of the principal computers used at our centers is leased for a period of approximately two years, permitting us to upgrade to more advanced equipment at the time of renewal. Our delivery time has decreased in recent years, enabling delivery of data to clients within the same timeframe as work performed directly onboard marine vessels.

We operate visualization centers in our Houston, London and Singapore hubs which allow teams of our customers geoscientists and engineers to view and interpret large volumes of complex 3D data. The visualization centers have imaging tools used for advanced interpretive techniques that enhance the understanding of regional as well as detailed reservoir geology. These visualization centers allow us to offer our expertise combined with the type

Table of Contents

of collaborative geophysical model building that is enabling oil companies to explore areas of complex geology such as the large sub-salt plays in the deepwater Gulf of Mexico.

We have groups of scientists available to perform advanced geophysical and geological interpretation on a contract basis. These experts work around the world, using third party and our own proprietary software to create subsurface models for our clients and advise them on how best to exploit their reservoirs. Their work is related to exploration as well as production activities. Convergence of our legacy software technology is on track with full synergy expected in 2009.

Additionally, we license our proprietary Hampson-Russell software to companies desiring to do our own geophysical interpretation.

Data Processing Business Development Strategy

Our position in data processing and imaging as well as the skills and reputation of our experts and geoscientists make us the industry reference in this segment. Our strategy for the Processing and Imaging business line is to enhance our particular competences in advanced technologies such as depth imaging, wide azimuth, 4D processing and reservoir characterization as well as to reinforce our close links with clients through dedicated centers.

Equipment

We conduct our equipment development and production operations through Sercel and its subsidiaries. We believe Sercel is the market leader in the development and production of seismic acquisition systems and specialized equipment in the land and offshore seismic markets. Sercel is operated as an independent division and makes most of its sales to purchasers other than CGGVeritas. Sercel currently operates eight seismic equipment manufacturing facilities, located in Nantes and Saint Gaudens in France, Houston, Sydney, Singapore, Alfreton in England, Larbert in Scotland and Calgary. In China, Sercel operates its activities through Sercel-JunFeng Geophysical Equipment Co Ltd, based in Hebei (China), in which Sercel acquired a 51% stake in the capital in 2004 and through Xian-Sercel a manufacturing joint venture with BGP, in which Sercel holds a 40% interest. In addition, two sites in Les Ulis and Brest (France) are dedicated to borehole tools and submarine acoustic instrumentation, respectively.

In 2007, Sercel had revenues of 680 million (U.S.\$1,080 million), a 41% increase in dollar terms over 2006, representing 29% of the Group consolidated revenues.

The overall equipment market increased by more than 35% in 2007 driven principally by the land equipment market. The market share of Sercel in the seismic equipment market is estimated at over 50%. In 2007, Sercel delivered 30% more land channels than in 2006.

Sercel Activity

Sercel offers and supports worldwide a complete range of geophysical equipment for seismic data acquisition, including seismic recording equipment, software and seismic sources, and provides its clients with integrated solutions. Sercel's principal product line is seismic recording equipment, particularly the 400 family of recording systems, including the 408UL and the 428XL.

The 428XL, our new generation of land seismic acquisition systems, was launched on November 2005 as a successor to the 408UL system. We believe that our 400 product series is the market standard. The 428XL continues the characteristics that made the 408 a success such as an evolutive architecture and the option of mixing different communication media (cable, radio, micro-wave, laser, fiber-optic) to form a true network allowing the user to define

data routing and hence avoid obstacles in the field. In addition, the 428 XL offers enhanced possibilities in high density and multi-component land seismic acquisition and is compatible with 408 field equipment.

Like the 408 system, the 428 system can be used with the digital sensor unit (DSU) featuring three component digital sensors based on the MicroElectroMechanicalSystem (MEMS). Sercel enhanced its product range in September 2006 by acquiring Vibration Technology Ltd., a Scottish company specialized in wireless acquisition systems.

Table of Contents

Sercel is also a market leader for vibroseismic vehicles. Sercel's latest vibrator family, called Nomad, offers high reliability and unique ergonomic features. Nomad is available with either normal tires or a tracked drive system. The track drive system allows Nomad vibrators to operate in terrain not accessible to vehicles with tires. In sand dunes or arctic conditions this can improve crew productivity. In particular, the Nomad 90 is capable of exerting a peak force 90,000 pounds and is believed to represent the heaviest vibrator of the market.

In addition to recording systems, Sercel develops and produces a complete range of geophysical equipment for seismic data acquisition and other ancillary geophysical products as geophones, cables and connectors. The acquisition of a 51% stake in Sercel-JunFeng Geophysical Equipment Co Ltd, based in Hebei, China, in January 2004 reinforced our manufacturing capabilities for geophone, cables and connectors, as well as our presence on the Chinese seismic market.

The Seal, our marine seismic data recording system, capitalizes on the 408 architecture and on our many years of experience in streamer manufacturing. The Seal is currently the sole system with integrated electronics. In 2005, Sercel launched the Sentinel solid streamer, a product in its Seal line that is the outcome of the technological synergies realized in recent acquisitions. We believe that Sentinel cables equip a majority of the new seismic vessels in the market. In November 2006, Sercel launched SeaRay[®], an ocean bottom cable offered under several configurations for depth of 100 to 500 meters. This cable is based on the 400 family acquisition systems technology and integrates DSU 3 components.

The marine range of products has been further improved with the launch of SeaProNav[™], a navigation software allowing the real time positioning of streamers and Nautilus[™], a completely integrated system for positioning of seismic streamers and sources.

Sercel significantly expanded its product range and increased its market share in the seismic equipment industry with the acquisitions of GeoScience Corporation in December 1999 and Mark Product in 2000. In October 2003, Sercel acquired Sodera S.A., a leading provider of air gun sources used mainly in marine seismic data acquisition. In January 2004, Sercel acquired a division of Thales Underwater Systems Pty Ltd. that develops and manufactures surface marine seismic acquisition systems, particularly solid streamers, and seabed marine seismic acquisition systems. Both Thales' seismic equipment business and Sercel-JunFeng have been consolidated within the CGG group from January 2004. In addition, through the acquisitions of Createch and Orca in 2004, Sercel is continuing its expansion while strengthening its position in two areas with perceived growth potential: sea-floor seismic systems and borehole seismic tools. In September 2006, Sercel acquired Vibration Technology Ltd, a Scottish company specialized in wireless systems.

As a result of these acquisitions, Sercel is a market leader in the development and production of both marine and land geophysical equipment. It is a global provider for the seismic acquisition industry with a balanced industrial position in terms of both product range and geographical presence.

Equipment Business Development Strategy

Our strategy for the Equipment segment is to:

- use continuous and intensive R&D efforts, combined with dedicated business acquisitions to expand Sercel's range of products and/or improve existing technology and strengthen its leading position in the geophysical equipment market; and

- maintain Sercel's leading position in the seismic data equipment market by capitalizing on growth opportunities resulting from the strength of its current product base, the application of new technologies in all

of its products and its diversified geographical presence including in emerging markets.

Seasonality

Our land and marine seismic acquisition activities are seasonal in nature. We generally experience decreased revenues in the first quarter of each year due to the effects of weather conditions in the Northern Hemisphere and to the fact that our principal clients are generally not prepared to fully commit their annual exploration budget to specific projects during that period.

Table of Contents

We have historically experienced higher levels of activity in our equipment manufacturing operations in the fourth quarter as our clients seek to fully deploy annual budgeted capital.

Intellectual Property

We continually seek the most effective and appropriate protection for our products, processes and software and, as a general rule, will file for patent, copyright or other statutory protection whenever possible. Our patents, trademarks, service marks, copyrights, licenses and technical information collectively represent a material asset to our business. However, no single patent, trademark, copyright, license or piece of technical information is of material importance to our business when taken as a whole. As of December 31, 2007, we held or had applied for 140 patents in respect of different products and processes worldwide. The duration of these patents varies from four to 20 years, depending upon the date filed and the duration of protection granted by each country.

Competition

General

Most contracts are obtained through a competitive bidding process, which is standard for the industry in which we operate. Important factors in awarding contracts include service quality, technological capacity, performance, reputation, experience of personnel, customer relations and long-standing relationships, as well as price. While no single company competes with us in all of our segments, we are subject to intense competition with respect to each of our segments. We compete with large, international companies as well as smaller, local companies. In addition, we compete with major service providers and government-sponsored enterprises and affiliates. Some of our competitors operate more data acquisition crews than we do and have substantially greater financial and other resources.

Land

The land seismic market is extremely fragmented and characterized by intense price competition. The entrance of a significant number of Chinese competitors seeking to expand their international market share beginning in 2000 has driven down prices in this sector and decreased the market share of established participants. In addition, certain very active services markets, such as China and Russia, are not practically accessible to international services providers like us. In addition to CGGVeritas, the other significant service providers in the land seismic market are Western Geco and BGP. We believe that price is the principal basis of competition in this market, although relationships with local service providers are important, as is experience in unusual terrain. Volume in the land seismic market increased by almost 15% in 2007 with a positive, but moderate, impact on market prices.

Marine

The offshore sector has four leading participants: WesternGeco, PGS, Fugro and CGGVeritas. From 1999 to mid-2004, the offshore market experienced excess supply, which put downward pressure on prices. Because of the high fixed costs in this sector, excess supply has not been reduced by operators but rather channeled into multi-client libraries. With supply flat since 2003, however, and demand increasing gradually until mid-2004 and then more rapidly, prices have recovered significantly in this market. The market upturn was confirmed in the second half of 2005 with a continuous increase of exclusive volumes and sales from the multi-client existing libraries. We estimate the number of large 3D vessels (6 or more streamers) at 51 vessels at the end of 2007, which may exceed 60 vessels by the end of 2008 and reach 70 vessels by the end of 2009. Despite this significant increase in supply, we believe that the supply / demand equilibrium should remain largely stable because 70% of the 3D worldwide fleet is concentrated among the four main players. Demand from national oil companies is increasing and new acquisition technologies (such as wide azimuth) are more vessel time intensive. The offshore market increased by more than 25% in 2007

including a positive impact on market price.

Processing

The processing sector is led by Western Geco and CGGVeritas. This market is characterized by greater client loyalty than the acquisition sector, as evidenced by the presence of processing centers on client premises.

Table of Contents

Processing capacity has multiplied in recent years as a result of improvements in computing technology. This increase in computing power has allowed improved processing and the use of more complex and accurate algorithms. The processing market increased by 10% in 2007.

Equipment

Our principal competitor for the manufacture of seismic survey equipment is Input/Output Inc. The market for seismic survey equipment is highly competitive and is characterized by continual and rapid technological change. We believe that technology is the principal basis for competition in this market, as oil and gas companies have increasingly demanded new equipment for activities such as reservoir management and data acquisition in difficult terrain. Oil and gas companies have also become more demanding with regard to the quality of data acquired. Other competitive factors include price and customer support services. The volume of sales in the seismic equipment market increased by around 40% in 2007, mainly driven by the surging demand for land equipment, while demand for marine equipment grew only moderately due to the time frame required by shipyards to build new vessels.

Organizational Structure

We are the parent company of the CGGVeritas group. Our principal subsidiaries are as follows:

Subsidiary	Jurisdiction of Organization	Head office	% of interest
Sercel S.A.	France	Carquefou, France	100.0
CGGVeritas Services SA	France	Massy, France	100.0
CGG Americas, Inc.	United States	Houston, Texas, United States	100.0
CGG Marine Resources Norge A/S	Norway	Hovik, Norway	100.0
Compañía Mexicana de Geofísica	Mexico	Mexico City, Mexico	100.0
CGG do Brasil Participações Ltda.	Brazil	Rio de Janeiro, Brazil	100.0
CGGVeritas Services (Norway) AS	Norway	Oslo, Norway	100.0
Sercel Inc.	United States	Tulsa, Oklahoma, United States	100.0
CGGVeritas Services Holding (U.S.) Inc.	United States	Houston, Texas, United States	100.0

Table of Contents**Property, Plant and Equipment**

The following table sets forth certain information relating to the principal properties of CGGVeritas group :

Location	Type of facilities	Size (m²)	Owned/ Leased	Lease expiration date

	development relating to, and manufacture of, geophysical cables, mechanical equipment and borehole seismic tools			
Houston, Texas, U.S.A.	Offices and manufacturing premises of Sercel	24,154	Owned	
Sydney, Australia	Activities include research and development relating to, and manufacture and marketing of, marine streamers	7,154	Leased	2008
Xu Shui, China	Activities include research and development relating to, and manufacture of, geophones	59,247	Owned	
Calgary, Canada	Manufacture of geophysical cables	8,357	Owned	
Alfreton, England	Manufacture of geophysical cables	5,665	Owned	
Singapore	Manufacture of geophysical cables	5,595	Owned	

We also lease other offices worldwide to support our operations. We believe that our existing facilities are adequate to meet our current requirements.

Information concerning our seismic vessels is set out under Marine Business Line above.

Table of Contents

Environmental Matters and Safety

Our operations are subject to a variety of laws and regulations relating to environmental protection. We invest financial and managerial resources to comply with such laws and regulations. Although such expenditures historically have not been material to us, and we believe that we are in compliance in all material respects with applicable environmental laws and regulations, the fact that such laws and regulations are changed frequently prevents us from predicting the cost of impact of such laws and regulations on our future operations. We are not involved in any legal proceedings concerning environmental matters and are not aware of any claims or potential liability concerning environmental matters that could have a material adverse impact on our business or consolidated financial condition.

Efforts to improve safety and environmental performance over the last few years continued as some procedures were strengthened and others implemented to increase awareness among personnel and subcontractors, including obligatory regular meetings in the field and onboard. A comprehensive Health, Safety and Environment management system, placing particular emphasis on risk management, has been established to cover all activities and is being continuously adapted for each segment.

Legal Proceedings

From time to time we are involved in legal proceedings arising in the normal course of our business. We do not expect that any of these proceedings, either individually or in the aggregate, will result in a material adverse effect on our consolidated financial condition or results of operations.

On September 29, 2006, CGG Veritas, its subsidiary CGG Marine and five directors and officers of these entities were named as defendants before the *Tribunal de Grande Instance* of Evry in a lawsuit brought by one of the main labor unions representing CGG Veritas employees for violation of French labor laws. Procedural hearings were initially scheduled for December 2006 but were delayed several times until February 12, 2008. However, on January 17, 2008, the defendants reached a settlement with the trade union that had brought the claim. The resulting settlement agreement was signed on January 17, 2008, by all trade unions represented in the group. The claim was subsequently withdrawn by the trade union that brought it, and the prosecutor and the court accepted to dismiss the case. This claim and its subsequent settlement has had no impact on our financial position or profitability.

On October 20, 2006, a complaint was filed against CGG's subsidiary, Sercel Inc., in the United States District Court for the Eastern District of Texas. The complaint alleges that several of Sercel Inc.'s seismic data acquisition products that include micro electromechanical systems (MEMS) infringe a U.S. patent allegedly owned by the plaintiffs. The plaintiffs have requested a permanent injunction prohibiting Sercel Inc. from making, using, selling, offering for sale or importing the equipment in question into the United States and have sought an unspecified amount of damages. Sercel is confident that the products in question do not infringe any valid claims of the patent in question and intends to contest this claim vigorously. During 2007, the discovery process took place as did the claims construction portion of the patent litigation procedure. We do not believe this litigation will have a material adverse effect on our financial position or results of operations. Accordingly, no provision has been recorded in our consolidated financial statements, except for the fees related to preparing the defense.

Item 4A: UNRESOLVED STAFF COMMENTS

None.

Item 5: OPERATING AND FINANCIAL REVIEW AND PROSPECTS

Introduction

We report financial information by operating segment in accordance with our internal reporting system and the internal segment information that is used to manage and measure our performance. We divide our business into two operating segments, geophysical services and geophysical equipment.

Table of Contents

Our geophysical services segment comprises:

Land contract: seismic data acquisition for land, transition zones and shallow water undertaken by us on behalf of a specific client;

Marine contract: seismic data acquisition offshore undertaken by us on behalf of a specific client;

Multi-client land and marine: seismic data acquisition undertaken by us and licensed to a number of clients on a non-exclusive basis; and

Processing and Imaging: processing and imaging and interpretation of geophysical data, data management and reservoir studies for clients.

Our equipment segment, which we conduct through Sercel Holding S.A. and its subsidiaries, comprises our manufacturing and sales activities for seismic equipment used for data acquisition, both on land and offshore.

Operating Results

The following operating and financial review and prospects should be read in conjunction with our consolidated annual financial statements and the notes thereto included elsewhere in this annual report, which have been prepared in accordance with IFRS (International Financial Reporting Standards) as issued by the IASB (International Accounting Standards Board) and adopted by the European Union on December 31, 2007. We adopted IFRS as our primary accounting principles from January 1, 2005, and our first consolidated financial statements under IFRS were those for the year ended December 31, 2005.

On January 12, 2007 CGG merged with Veritas in a part cash, part stock transaction to create the combined company Compagnie Générale de Géophysique Veritas or CGG Veritas. The merger has had the effect of significantly increasing the size of our company and has affected the comparability of our financial condition and results of operations as of and for the years ended December 31, 2007 and 2006. For a description of the merger with Veritas and its financing see Factors affecting our results of operations Acquisitions and disposals During 2007 Veritas and Factors affecting our results of operations Financing of the Veritas merger . For a discussion and analysis of our results of operations for the year ended December 31, 2007 compared with our pro forma and historical results of operations for the year ended December 31, 2006, including how such pro forma presentation was derived, why we believe the presentation is useful to investors in our securities and the risks associated with the use of such pro forma information, see Year ended December 31, 2007 compared with year ended December 31, 2006 on pro forma and historical bases .

Factors affecting our results of operations

CGG Veritas operating results are generally affected by a variety of factors, including changes in exchange rates, particularly the value of the euro against the dollar, and changes in oil prices, which are also generally denominated in dollars. See Trend Information and Geophysical market environment herein.

Foreign exchange fluctuations

We face foreign exchange risks because a large percentage of our revenues and cash receipts are denominated in U.S. dollars, while a significant portion of our operating expenses and income taxes accrue in euro and other currencies. Movements between the U.S. dollar and euro or other currencies may adversely affect our business by

negatively impacting our revenues and income.

In order to present trends in our business that may be obscured by currency fluctuations, we have converted certain euro amounts in this Operating and Financial Review and Prospects into U.S. dollars. Converted figures are presented only to assist you in understanding our results and are not part of our reported financial statements and may not be indicative of changes in our actual or anticipated results. See [Trend Information](#) [Currency Fluctuations](#) below.

Table of Contents

Geophysical Market Environment

Overall demand for geophysical services and equipment is dependent upon spending by oil and gas companies for exploration development and production and field management activities. We believe the level of spending of such companies depends on their assessment of their ability to efficiently supply the oil and gas market in the future and the current balance of hydrocarbon supply and demand.

The geophysical market has historically been cyclical, with notably a trough in 1999 following a sharp drop in the price of oil to U.S.\$10 per barrel. We believe many factors contribute to the volatility of this market, such as the geopolitical uncertainties that can harm the confidence and visibility that are essential to our clients' long-term decision-making processes and the expected balance in the mid to long term between supply and demand for hydrocarbons.

For the last three years the geophysical market has enjoyed sustained growth, recovering from a previous period of under-investment. We believe this growth is based on the following solid fundamentals:

Oil and gas companies (including both the international and the national oil companies) and the large oil and gas consuming nations have perceived a growing and potentially lasting imbalance between reserves and future demand for hydrocarbons. A rapid rise in world consumption requirements, particularly in China and India, has resulted in demand for hydrocarbons growing more rapidly than anticipated. At the same time, excess production capacity has appeared to reach historical lows, increasing the focus on existing production capacities and reserves replacement.

The recognition of an imbalance between hydrocarbon supply and demand, combined with low reserve replacement rates, has led the oil and gas industry to significantly increase capital expenditure in exploration and production. The seismic services market generally benefits from this spending since seismic services are an important element in the search for new reserves and optimization of existing reservoirs.

With the oil industry continuing to move into increasingly deeper-water areas in its exploration efforts, we believe that offshore seismic—particularly better-resolution 3D seismic and above all wide-azimuth seismic in the Gulf of Mexico—will be a main driver of seismic demand growth.

In addition, because of the unfavorable oil price environment prevailing at the time, less than 10% of the geographical blocks auctioned in 1995-2000 have been explored. We expect numerous exploration leases to expire in potentially promising hydrocarbon basins through the end of the decade. Approximately 2,500 leases are due to become available in 2007-2008. The next auction of acreage in the highly promising Gulf of Mexico area is due in July 2008 after the latest one held in March 2008.

The rising cost of seismic acquisition has driven a strong rebound in multi-client activity, as it provides oil companies with a relatively low-cost data alternative. This is particularly true in the Gulf of Mexico where recent large oil and gas discoveries have renewed considerable interest in the relevant governments' auctions of available blocks.

The strong technological developments in seismic services over the last decade have prompted an important step-change for the sector. The development of 4D and wide-azimuth techniques, providing time lapse views and enhanced illumination of the reservoir as well as improved image resolution, now allows operators to better locate and monitor reservoir performance, broadening the use of seismic techniques from pure exploration (early cycle) into a tool for reservoir development, management and production (late cycle). Importantly, these techniques require more vessel time than traditional data acquisition. For example, three to six times more vessel time is required to shoot

wide azimuth data than traditional 3D.

Seismic imaging has also improved significantly over the past decade as computer processing has enabled the analysis of ever more sophisticated data sets. Yet 3D seismic still only supplies one form of information, namely geological interpretation. Seismic imaging uses an acoustic wave to indicate whether a possible hydrocarbon trap exists within the earth but it is limited in its ability to determine what kind of fluid is in that trap. As the cost of drilling has increased significantly, any technique that can improve drilling success rates is of interest to oil companies.

Table of Contents

The electromagnetic (EM) surveying potentially offers a technique for the detection of hydrocarbons that is complementary to traditional seismic. EM uses a low frequency electromagnetic wave and measures resistivity changes within the earth, giving it the potential to provide important information regarding fluid types. EM is well established in the academic geophysical world but its commercial application is still in its infancy. Oil companies are in the early adoption phase, largely as a risk reduction measure to determine whether EM can assist in determining whether drilling should go ahead.

We believe that combining different types of information is the key to extracting the greatest value from geophysical data sets. Studies have shown it is possible to predict reservoir properties across the lateral extent of a field by combining EM and seismic measurements, calibrated with well-log data.

Our strong belief that the industry needed to consolidate and our goal of giving our business the critical mass to become an efficient global force in the full service seismic market, led us to merge with Veritas on January 12, 2007 as described below under the heading *Acquisitions and disposals*.

Acquisitions and disposals

Acquisitions and disposals have had a significant impact on our year-on-year revenues. Recent acquisitions and disposals have included:

During 2007

Veritas

On September 4, 2006, CGG entered into a definitive merger agreement with Veritas to acquire Veritas in a part cash, part stock transaction. The merger was completed on January 12, 2007. The combined company was renamed *Compagnie Générale de Géophysique-Veritas*, abbreviated as *CGG Veritas*, and its ordinary shares are listed on both the Euronext Paris and the New York Stock Exchange (in the form of American Depositary Shares (ADSs)). The trading symbol of CGG Veritas ordinary shares on Euronext Paris is *GA* and of its ADSs on the New York Stock Exchange is *CGV*.

At the merger closing date, and according to the formula set out in the merger agreement, the per share cash consideration to holders of Veritas stock was U.S.\$85.50 and the per share stock consideration was 2.0097 CGG Veritas ADSs upon the election of Veritas shareholders.

Of the 40,420,483 shares of Veritas common stock outstanding as of the merger date (January 12, 2007), approximately:

33,004,041 of the shares, or 81.7%, had elected to receive cash,

5,788,701 of the shares, or 14.3%, had elected to receive CGG ADSs; and

1,627,741 of the shares, or 4.0%, did not make a valid election.

Stockholders electing cash received, on average, 0.9446 CGG Veritas ADSs and U.S.\$45.32 in cash per share of Veritas common stock. Stockholders electing ADSs and stockholders making no valid election received 2.0097 CGG Veritas ADSs per share of Veritas common stock. In aggregate, approximately U.S.\$1.5 billion and approximately 46.1 million shares represented by ADSs were paid to Veritas stockholders as merger consideration. Based on a

valuation of CGG Veritas ADS at U.S.\$40.5 on January 12, 2007, the total consideration of the merger amounted to approximately 2.7 billion (U.S.\$3.5 billion).

Total direct transaction costs related to the merger (including advisory fees and legal fees) amounted to 26.3 million (U.S.\$34.6 million) and were recognized as a cost of the acquisition.

Geomar

Geomar is a subsidiary, owned 49% by CGG Veritas and 51% by Louis Dreyfus Armateurs (LDA), that has owned the seismic vessel *Alizé* since March 29, 2007. On April 1, 2007, Geomar entered into a new charter agreement with LDA and LDA entered into a new charter agreement with CGG Services. Additionally, on April 10,

Table of Contents

2007, CGG Services acquired a call right and LDA a put on the 51% stake of Geomar held by LDA. In light of the risks and benefits related to these new agreements for CGG Veritas, Geomar has been fully consolidated in our financial statements since April 1, 2007. Prior to that date, Geomar was accounted for under the equity method.

Cybernetix

On June 27, 2007, Sercel Holding acquired 121,125 Cybernetix shares bringing its total holding to 352,125 shares, representing 32.01% of Cybernetix's share capital and 26.57% of its voting rights. On November 5, 2007, Sercel Holding increased its investment for a total amount of 0.8 million, bringing its total holding to 416,147 shares, representing for 32.20% of Cybernetix's share capital. Since June 30, 2007, Cybernetix has been consolidated under the equity method in our financial statements.

Offshore Hydrocarbon Mapping

On July 17, 2007, we entered into strategic joint operating agreement with Offshore Hydrocarbon Mapping plc (OHM) under which both companies will work together to develop Controlled Source ElectroMagnetic imaging activities (CSEM) and on seismic and CSEM integration opportunities. On August 21, 2007, subsequent to the approval by the shareholders of OHM, we acquired 6,395,571 shares of OHM at a price of 240 GBP pence per share. On October 19, 2007, we acquired an additional 80,695 shares at a price of 240 GBP pence per share. We thus paid in total 22.9 million for 14.99% of OHM's issued share capital.

Eastern Echo Holding Plc

On November 12, 2007, we acquired 30.9 million shares of Eastern Echo Holding plc (ECHO NO) for a total consideration of approximately 55 million (NOK 431 million), representing 12.67% of Eastern Echo's issued share capital. Eastern Echo is a geophysical company specializing in acquisition of high quality 3D seismic data. Our intent, with this minority stake, was to best position ourselves, and especially Sercel, for continuing cooperation with Eastern Echo in the expanding seismic market. On November 23, 2007, further to the cash offer launched by Schlumberger BV on November 16, 2007, we tendered all our shares of Eastern Echo to Schlumberger BV at price of NOK 15 per share. We therefore recognized a gain of 2.8 million.

During 2006

TAQA

On June 24, 2006, Industrialization & Energy Services Company (TAQA), our long term Saudi Partner in Arabian Geophysical and Surveying Company (Argas), acquired, for 16.8 million, 49% of the capital of CGG Ardiseis, a newly formed CGG subsidiary dedicated to land and shallow water seismic data acquisition in the Middle East, and we maintained a 51% interest. CGG Ardiseis, whose headquarters are located in Dubai, provides its clients with the complete range of CGG land and shallow water acquisition services, focusing on Eye-D, the latest CGG technology for full 3D seismic imaging. As part of our agreement with TAQA, CGG Ardiseis activities in the Gulf Cooperation Council countries are operated by Argas.

Cybernetix

On July 10, 2006, Sercel acquired a 20% interest (17% of voting rights) in the French listed company Cybernetix, a specialist in robotics, with the aim of strengthening our technical partnership with Cybernetix in offshore oil equipment, and an additional 1% interest by the end of the year 2006. The aggregate consideration for the transactions was 4.0 million.

Vibtech

On September 28, 2006, Sercel acquired the Scottish company Vibration Technologies Limited (*Vibtech*), pioneer in the use of advanced wireless technologies for seismic recording. The Unite system, and field trials of this new generation equipment, which have attracted interest from both oil companies and seismic contractors, is a unique versatile product capable of recording and transmitting data in a stand alone or real time mode, enabling

Table of Contents

quality control while recording and is capable of handling thousands of channels. Use of new transmission technologies also reduces limitations inherent to radio frequencies. We expect that the combination of Sercel expertise in seismic recording and new skills arising from Vibtech's development group will help expand the capabilities of the Sercel portfolio of products and integrate advanced wireless technology with its latest generation products. The cash consideration was 49.5 million (GBP 33.3 million) and our valuation of the technological assets purchased was 11.6 million more (GBP 7.8 million), which led us to record a goodwill of 35.6 million. The cash acquired was in an amount of 1.3 million (GBP 0.9 million).

During 2005

PT Alico

On February 14, 2005, we ended our cooperation agreements with PT Alico, an Indonesian company. On that date, PT Alico, which was fully consolidated in our accounts until 2004 as a consequence of our contractual relationship with them, was excluded from our scope of consolidation. Under our agreements with PT Alico, we indemnified them against certain specific risks. This liability is limited and was accrued in our financial statements as of December 31, 2004. The liability expired on June 30, 2006, since then we have no further commitment to PT Alico or its shareholders.

CGG Vostok

On July 27, 2005, we established a new company in Russia, CGG Vostok, to perform seismic services. CGG Vostok has been consolidated from the date of its creation.

Exploration Resources

On August 29, 2005, we acquired a controlling stake of approximately 60% of Exploration Resources ASA (Exploration Resources), a Norwegian provider of marine seismic acquisition services (see further description in Item 4). The total cost to us of the acquisition was 303.3 million, including 8.6 million related to acquisition fees and including the price of further shares acquired in October 2005. The reassessment of Exploration Resources' net assets, along with our evaluation of the seismic business's economic prospects, led us primarily to increase the book value of the vessels by 116.5 million at September 1, 2005 and to record corresponding deferred tax liabilities. The vessels were valued using combined valuation methods and, particularly, the present value of cash flows that we expect the vessels to generate. We have consolidated Exploration Resources from September 1, 2005.

Backlog

Backlog estimates are based on a number of assumptions and estimates, including assumptions as to exchange rates between the euro and the U.S. dollar and estimates of the percentage of completion contracts. Contracts for services are occasionally modified by mutual consent and in certain instances are cancelable by the customers on short notice without penalty. Consequently, backlog as of any particular date may not be indicative of actual operating results for any succeeding period.

Backlog for our Services segment represents the revenues it expects to receive from commitments for contract services it has with its customers and, in connection with the acquisition of multi-client data, represents the amount of pre-sale commitments for such data. Backlog for our Equipment segment represents the total value of orders it has received but not yet fulfilled.

Our backlog for our Services and Equipment segments, as of February 1, 2008 was U.S.\$1,780 million (U.S.\$1,345 million for the Services segment and U.S.\$435 million for the Equipment segment excluding intra-group sales with CGGVeritas).

Table of Contents

Financing of the Veritas merger

Bridge loan facility

On November 22, 2006, CGG, as borrower, and certain of its subsidiaries, as guarantors, entered into a U.S.\$1.6 billion senior secured bridge loan facility agreement with Credit Suisse International, as agent and security agent, and the lenders party thereto. On January 12, 2007, CGG borrowed U.S.\$700 million under the bridge loan facility, and the proceeds were used to:

finance a portion of the cash component of the merger consideration;

repay certain existing debt of CGG and Veritas; and

pay fees and expenses incurred in connection with the foregoing.

Upon such borrowing and the concurrent funding of the U.S.\$1.0 billion term loan facility described below, the unused commitments of U.S.\$900 million were terminated.

We used the net proceeds of our Senior Notes offering described below, together with cash on hand, to repay in full the bridge loan facility in February 2007.

Senior Facilities

On January 12, 2007, Volnay Acquisition Co. I (which subsequently changed its name to CGGVeritas Services Holding (U.S.) Inc.), as borrower, and CGG entered into a U.S.\$1.115 billion senior secured credit agreement with Credit Suisse, as administrative agent and collateral agent, and the lenders party thereto, pursuant to which Volnay Acquisition Co. I borrowed a U.S.\$1.0 billion senior secured term loan B and obtained a U.S.\$115 million senior secured U.S. revolving facility (which revolving facility includes letter of credit and swingline subfacilities). Aggregate commitments under the U.S. revolving facility were increased to U.S.\$140 million on January 26, 2007. On June 29, 2007 we prepaid U.S.\$100 million of the term loan B facility.

The proceeds of the term loan B facility were used to:

finance a portion of the cash component of the merger consideration;

repay certain existing debt of CGG and Veritas; and

pay fees and expenses incurred in connection with the foregoing.

Proceeds of loans under the U.S. revolving facility may be used for general corporate purposes by CGGVeritas.

Additional Senior Notes

On February 9, 2007, we issued an additional U.S.\$200 million in aggregate principal amount of 71/2% Senior Notes due 2015 and U.S.\$400 million in aggregate principal amount of 73/4% Senior Notes due 2017. Both series of Senior Notes were guaranteed on a senior basis by certain of our subsidiaries. The Senior Notes are listed on the Euro MTF market of the Luxembourg Stock Exchange. We used the net proceeds from the offering of the Senior Notes plus cash on hand to repay in full the U.S.\$700 million outstanding under the bridge loan facility described above.

Capital increases

In connection with the Veritas merger, we issued a total of 9,215,845 ordinary shares that were deposited with The Bank of New York Trust as ADS depository, which issued 46,079,225 ADSs to be paid as merger consideration to former holders of Veritas stock.

On January 26, 2007, we issued a further 108,723 ordinary shares that were deposited with The Bank of New York as ADS depository, which issued 543,614 ADSs to a holder of U.S.\$6.5 million in principal amount of Veritas convertible senior notes due 2024 that delivered a conversion notice on January 19, 2007.

Table of Contents

On February 27, 2007, we issued a further 301,079 ordinary shares that were deposited with The Bank of New York as ADS depository, which issued 1,505,393 ADSs to a holder of U.S.\$18 million in principal amount of Veritas convertible senior notes due 2024 that delivered a conversion notice on February 23, 2007. No further Veritas convertible notes remain outstanding.

Critical Accounting Policies

Our significant accounting policies, which we have applied consistently, are fully described in note 1 to our consolidated financial statements included elsewhere in this document. However, certain of our accounting policies are particularly important to the portrayal of our financial position and results of operations, and these are described below. As we must exercise significant judgment when we apply these policies, their application is subject to an inherent degree of uncertainty.

Operating revenues

Operating revenues are recognized when they can be measured reliably, and when it is likely that the economic benefits associated with a transaction will flow to the relevant entity, which is at the point that such revenues have been realized or are considered realizable. For contracts where the percentage on completion method of accounting is being applied, revenues are only recognized when the costs incurred for the transaction and the cost to complete the transaction can be measured reliably and such revenues are considered earned and realizable.

Multi-client surveys

Multi-client surveys consist of seismic surveys to be licensed to customers on a non-exclusive basis. All costs directly incurred in acquiring, processing and otherwise completing seismic surveys are capitalized into the multi-client surveys. The value of our multi-client library is stated on our balance sheet at the aggregate of those costs less accumulated amortization or at fair value if lower. We review the library for potential impairment of our independent surveys on an ongoing basis.

Revenues related to multi-client surveys result from (i) pre-commitments and (ii) licenses after completion of the surveys (after-sales).

Pre-commitments Generally, we obtain commitments from a limited number of customers before a seismic project is completed. These pre-commitments cover part or all of the survey area blocks. In return for the commitment, the customer typically gains the right to direct or influence the project specifications, advance access to data as it is being acquired, and favorable pricing. We record payments that we receive during periods of mobilization as advance billing in the balance sheet in the line item Advance billings to customers .

We recognize pre-commitments as revenue when production is begun based on the physical progress of the project.

After sales Generally, we grant a license entitling non-exclusive access to a complete and ready for use, specifically-defined portion of our multi-client data library in exchange for a fixed and determinable payment. We recognize after sales revenue upon the client executing a valid license agreement and having been granted access to the data. Within thirty days of execution and access, the client may exercise our warranty that the medium on which the data is transmitted (a magnetic cartridge) is free from technical defects. If the warranty is exercised, we will provide the same data on a new magnetic cartridge. The cost of providing new magnetic cartridges is negligible.

After sales volume agreements We enter into customer arrangements in which we agree to grant licenses to the customer for access to a specified number of blocks of the multi-client library. These arrangements typically enable

the customer to select and access the specific blocks for a limited period of time. We recognize revenue when the blocks are selected and the client has been granted access to the data. Within thirty days of execution and access, the client may exercise our warranty that the medium on which the data is transmitted (a magnetic cartridge) is free from technical defects. If the warranty is exercised, we will provide the same data on a new magnetic cartridge. The cost of providing new magnetic cartridges is negligible.

Table of Contents

Exclusive surveys

In exclusive surveys, we perform seismic services (acquisition and processing) for a specific customer. We recognize proprietary/contract revenues as the services are rendered. We evaluate the progress to date, in a manner generally consistent with the physical progress of the project, and recognize revenues based on the ratio of the project cost incurred during that period to the total estimated project cost. We believe this ratio to be generally consistent with the physical progress of the project.

The billings and the costs related to the transits of seismic vessels at the beginning of the survey are deferred and recognized over the duration of the contract by reference to the technical stage of completion.

In some exclusive survey contracts and a limited number of multi-client survey contracts, we are required to meet certain milestones. We defer recognition of revenue on such contracts until all milestones that provide the customer a right of cancellation or refund of amounts paid have been met.

Other geophysical services

Revenues from our other geophysical services are recognized as the services are performed and, when related to long-term contracts, using the performance method of recognizing income.

Equipment sales

We recognize revenues on equipment sales upon delivery to the customer. Any advance billings to customers are recorded in current liabilities.

Software and hardware sales

We recognize revenues from the sale of software and hardware products following acceptance of the product by the customer at which time we have no further significant vendor obligations remaining. Any advance billings to customers are recorded in current liabilities.

If an arrangement to deliver software, either alone or together with other products or services, requires significant production, modification, or customization of software, the entire arrangement is accounted for as a production-type contract, i.e. using the percentage of completion method.

If the software arrangement provides for multiple deliverables (e.g. upgrades or enhancements, post-contract customer support such as maintenance, or services), the revenue is allocated to the various elements based on specific objective evidence of fair value, regardless of any separate allocations stated within the contract for each element. Each element is appropriately accounted for under the applicable accounting standard.

Maintenance revenues consist primarily of post contract customer support agreements and are recorded as advance billings to customers and recognized as revenue on a straight-line basis over the contract period.

Multi-client surveys

Multi-client surveys consist of seismic surveys to be licensed to customers on a non-exclusive basis. All costs directly incurred in acquiring, processing and otherwise completing seismic surveys are capitalized into the multi-client surveys (including transit costs when applicable). The value of our multi-client library is stated on our balance sheet at

the aggregate of those costs less accumulated amortization or at fair value if lower. We review the library for potential impairment of our independent surveys on an ongoing basis.

We amortize the multi-client surveys over the period during which the data is expected to be marketed using a pro-rata method based on recognized revenues as a percentage of total estimated sales.

In this respect, we use four amortization rates 50%, 75%, 80% or 83.3% of revenues depending on the category of the surveys. Multi-client surveys are classified into a same category when they are located in the same area with the same estimated sales ratio, such estimates generally relying on historical patterns.

Table of Contents

For all categories of surveys and starting from data delivery, a minimum straight-line depreciation scheme is applied over a five-year period, if total accumulated depreciation from the applicable amortization rate is below this minimum level.

Multi-client surveys acquired as part of the merger with Veritas and which have been valued for purchase price allocation purposes are amortized based on 65% of revenues and an impairment loss is recognized on a survey by survey basis in case of any indication of impairment.

Until December 1, 2006, an amortization rate of 66.6% of revenues with a minimum straight-line depreciation over a three-year period was used instead of 50% over a five-year period. The impact of this change of estimates applied from December 1, 2006 was a reduction in depreciation expenses of 1.2 million over the year ended December 31, 2006 and lower depreciation of 2.7 million over the year ended December 31, 2007.

From January 12, 2007 to October 1, 2007, we applied an amortization rate of 66.6% of revenues instead of 50% for a certain category of surveys. The impact of this change of estimates applied from October 1, 2007 is a reduction in depreciation expenses of 3.1 million for the year ended December 31, 2007.

Development costs

Expenditures on research activities undertaken with the prospect of gaining new scientific or technological knowledge and understanding are recognized in the income statement as expenses as incurred and are presented as Research and development expenses net .

Expenditure on development activities, whereby research findings are applied to a plan or design for the production of new or substantially improved products and processes, are capitalized if:

the project is clearly defined, and costs are separately identified and reliably measured;

the product or process is technically and commercially feasible;

we have sufficient resources to complete development; and

the intangible asset is likely to generate future economic benefits, either because it is useful to us or through an existing market for the intangible asset itself or for its products.

Expenditures capitalized include the cost of materials, direct labor and an appropriate proportion of overhead. Other development expenditures are recognized in the income statement as expenses as incurred and are presented as Research and development expenses net .

Capitalized development expenditures are stated at cost less accumulated amortization and impairment losses.

We amortize capitalized developments costs over 5 years.

Research and development expenses in our income statement represent the net cost of development costs that are not capitalized, of research costs, offset by government grants acquired for research and development.

Impairment

In accordance with IAS 36 Impairment of assets , the carrying amounts of our assets, other than inventories and deferred tax assets, are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, we estimate the asset s recoverable amount. Factors we consider important that could trigger an impairment review include the following:

significant underperformance relative to expected operating results based upon historical and/or projected data;

significant changes in the manner of our use of the acquired assets or the strategy for our overall business; and

significant negative industry or economic trends.

Table of Contents

The recoverable amount of tangible and intangible assets is the greater of their net fair value less costs to sell and value in use.

For cash generating units comprised of goodwill, assets that have an indefinite useful life or intangible assets that are not yet available for use, we estimate the recoverable amount at each balance sheet date.

We determine the recoverable amounts by estimating future cash flows expected from the assets or from the cash generating units, discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

We recognize an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Impairment losses are recognized in the income statement. Impairment losses recognized in respect of a group of non independent assets allocated to a cash-generating unit are allocated first to reduce the carrying amount of any goodwill allocated to cash-generating units (group of units) and then, to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

Onerous contracts

We recognize a provision for onerous contracts corresponding to our estimates of the excess of the unavoidable costs of meeting the obligations under the contract over the economic benefits expected to be received under the contract estimated by the Group.

Convertible bonds

As our U.S.\$85 million 7.75% subordinated bonds due 2012 convertible into new ordinary shares or redeemable into new shares and/or existing shares and/or in cash issued in 2004 were denominated in U.S. dollars and convertible into new ordinary shares denominated in Euros, the embedded conversion option was bifurcated and accounted separately within non-current liabilities. The conversion option and the debt component were initially recognized at fair value on issuance. The amount of the debt component recorded in our financial statements was discounted at the rate of 10.75%, the rate borne by comparable indebtedness without a conversion option. As a result, we bifurcated the embedded conversion option by 10.5 million at the issuance of the bonds as Other non-current assets. The discounting of the bonds at issuance was accounted for as Cost of financial debt until the maturity of the bonds. Those convertible bonds were fully converted at December 31, 2006.

Changes in the fair value of the embedded derivative were recognized in the consolidated income statement in the line item Variance on derivative convertible bonds. The fair value of the embedded derivative was determined using a binomial model.

Year ended December 31, 2007 compared with year ended December 31, 2006 on pro forma and historical bases

Our results of operations and financial condition as of and for the year ended December 31, 2007 have been significantly affected by the merger of CGG and Veritas, which was completed on January 12, 2007. Veritas results of operations and financial condition are consolidated into our consolidated financial statements as from the date of completion of the merger. In order to provide comparable information for the years ended December 31, 2007 and

2006, we have prepared, for the year ended December 31, 2006, an unaudited consolidated pro forma statement of operations in accordance with IFRS as issued by the IASB and as adopted by the European Union on December 31, 2006, as if the merger had occurred on January 1, 2006. The merger is reflected in the unaudited pro forma statement of operations using the purchase method of accounting as described in note 1 Summary of significant accounting policies and note 2 Acquisitions and divestitures to our consolidated financial statements. Our pro forma consolidated statement of operations is set forth immediately below, which contains a column quantifying the principal adjustments to arrive at the pro forma statement of operations, as well as, in the footnotes thereto, a description of such adjustments.

Table of Contents

In addition, we have included in the discussion and analysis of our results of operations for the years ended December 31, 2007 and 2006 a comparison of our 2007 historical statements of operations data to both our historical 2006 statement of operations, as well as, as supplemental information, our 2006 pro forma statement of operations. We have included the discussion comparing our 2007 historical results of operations to our 2006 pro forma statement of operations as supplemental information because we believe that it is useful in analyzing the trends in our business in view of the significant impact of the merger. The 2006 pro forma financial information and related discussion is also included in our *document de référence*, which we have filed with our principal securities regulator, the French *Autorité des Marchés Financiers*.

The unaudited pro forma statement of operations for the year ended December 31, 2006 is presented for illustrative purposes only and is not indicative of the results of operations or the financial condition of CGGVeritas that would have been achieved had the merger and the related financing transactions been completed as of the dates indicated, nor is the unaudited pro forma statement of operations indicative of our future results of operations or financial condition.

The unaudited pro forma statement of operations has been derived from and should be read in conjunction with the respective consolidated financial statements of CGG and Veritas. CGG's historical statement of operations for the fiscal year ended December 31, 2006 is presented in euros and is derived from CGG's audited consolidated financial statements. Veritas' historical statement of operations for the twelve months ended December 31, 2006 is presented in U.S.\$ and is derived from Veritas' audited consolidated financial statements for its fiscal year ended July 31, 2006 included in the Veritas DGC Inc. Annual Report on Form 10-K.

(a) adjustments related to the elimination of the first five months (August 1, to December 31, 2005) of the fiscal year of Veritas ended July 31, 2006 and the addition of the five months from July 31, 2006 to December 31, 2006, and the following restatements, which we do not consider material, to ensure consistency of accounting principles with CGG's historical financial statements under IFRS:

- (i) multi-client amortization;
- (ii) cancellation of deferred charges;

- (iii) cancellation of dry docking provisions;
 - (iv) cancellation of the amortization of actual gains and losses;
 - (v) application of proportional method to two Veritas subsidiaries;
 - (vi) capitalization of development costs; and
 - (vii) cancellation of deferred revenues.
- (2) Corresponds to the elimination of intercompany transactions between CGG and Veritas.
- (3) Corresponds to the sum of the incremental amortization expense related to the fair value of the identifiable assets from the purchase price allocation as described in note 2 Acquisitions and divestitures to our consolidated financial statements.

Table of Contents

- (4) Corresponds to the incremental interest expense related to the financing of the acquisition by a U.S.\$1 billion Senior Facility and the issuance of an aggregate of U.S.\$600 million in 7 1/2% Senior Notes and 7 3/4% Senior Notes as described in note 13 Financial debt to our consolidated financial statements.
- (5) Corresponds to the tax impact of the above adjustments assuming a 35% tax rate.

Operating revenues

The following table sets forth our consolidated operating revenues by business line, and the percentage of total consolidated operating revenues represented thereby, during each of the periods stated.

	Year ended December 31,								
	2007			2006				2006	
	Historical data		%	Unaudited pro forma data		%	Historical data		
U.S.\$ ⁽¹⁾		U.S.\$ ⁽¹⁾			U.S.\$ ⁽¹⁾				
(in millions of euros, except percentages)									
Land	461.3	631.6	19%	365.0	458.4	18%	119.1	9%	
Marine	986.4	1,350.6	41%	887.6	1,114.9	45%	533.3	40%	
Processing and Imaging	263.3	360.5	11%	258.2	324.3	13%	139.7	11%	
Merger adjustment ⁽²⁾	(16.5)	(22.6)

(1) Conversion at the average exchange rate of U.S.\$1.369 per for the year ended December 31, 2007.

(2) The merger with Veritas was effective on January 12, 2007. The revenue figures for the Land, Marine and Processing and Imaging business lines above amount to a total revenue of 1,711.1 million, which is comprised of Services segment business line revenues for each of CGG and Veritas from and including January 1, 2007. We have consequently eliminated from this total Veritas revenues in an amount of 16.5 million attributable to 2007 Veritas revenues between January 1 and January 12, 2007, the effective date of the merger of CGG and Veritas. Because our internal reporting systems did not permit us to identify the CGG/Veritas Services segment business lines to which such twelve days of Veritas revenues should be allocated, we have eliminated such twelve days of revenues from the 1,711.1 million figure to arrive at total Services revenues (including Veritas revenue after the merger date) of 1,694.5 million for the financial year ended December 31, 2007.

Our consolidated operating revenues for the year ended December 31, 2007 increased 19% to 2,374.1 million from 1,990.2 for 2006 on a pro forma basis (1,329.6 million on an historical basis). Expressed in U.S. dollars, our consolidated operating revenues increased 30% to U.S.\$3,250.7 million for the year ended December 31, 2007 from U.S.\$2,499.9 million for 2006 on a pro forma basis. This increase resulted from increases in revenues for all our activities.

Services

Operating revenues for our Services segment, not including 16.5 million in Veritas operating revenues for the first twelve days of January 2007 prior to the merger, increased 12% to 1,694.5 million for the year ended December 31, 2007 from 1,510.7 million for 2006 on a pro forma basis (792 million on an historical basis) and increased 22% in U.S. dollar terms, driven by strengthening market conditions, continued upward price mobility, our 83% vessel utilization rate and growing demand for multi-client data.

Marine

Operating revenues from our Marine business line for the year ended December 31, 2007 increased 11% to 986.4 million from 887.6 million for 2006 on a pro forma basis (533.3 million on an historical basis) and increased 21% in U.S. dollar terms.

Table of Contents

Contract revenues increased 15% to 531.2 million in the year ended December 31, 2007 from 462.2 million for 2006 on a pro forma basis (315.4 million on an historical basis) and increased 25% in U.S. dollar terms. Two large high-capacity 3D seismic vessels joined the fleet, the *Vision* in early July and the *Vanquish* in late November 2007. We upgraded two 2D seismic vessels to 3D (4 streamer configurations) and upgraded the seismic vessel *Geo-Challenger* to 12 streamers. Contract revenues accounted for 54% of marine revenues for the year ended December 31, 2007 compared to 52% for 2006 on a pro forma basis.

Multi-client marine data library revenues increased 7% to 455.2 million for the year ended December 31, 2007 from 425.4 million for 2006 on a pro forma basis (217.8 million on an historical basis) and increased 17% in U.S. dollar terms. Prefunding was 230.2 million for the year ended December 31, 2007 compared to 145.6 million for 2006 on a pro forma basis. Forty percent of our 3D fleet operated on multi-client programs mainly in the Gulf of Mexico and in Brazil. After-sales were 225 million for the year ended December 31, 2007 compared to 279.8 million for 2006 on a pro forma basis.

Land

Operating revenues from our Land business line increased 26% to 461.3 million for the year ended December 31, 2007 from 365.0 million for 2006 on a pro forma basis (119.1 million on an historical basis) and increased 38% in U.S. dollar terms.

Contract revenues increased 21% to 327.1 million in the year ended December 31, 2007 from 270.3 million for 2006 on a pro forma basis (119.1 million on an historical basis) and increased 32% in U.S. dollar terms. We continued to focus on key areas where we believe our local excellence is widely acknowledged. Including Argas, we had an average of 22 crews operating worldwide.

Multi-client land data library revenues increased 42% to 134.2 million for the year ended December 31, 2007 from 94.7 million for the comparable period of 2006 on a pro forma basis and increased 54% in U.S. dollar terms. Prefunding was 69.5 million for the year ended December 31, 2007 compared to 46.1 million for 2006 on a pro forma basis. After-sales were 64.8 million for the year ended December 31, 2007 compared to 48.6 million for 2006 on a pro forma basis.

Processing and Imaging

Operating revenues from our Processing and Imaging business line increased 2% to 262.9 million for the year ended December 31, 2007 from 258.2 million for the comparable period of 2006 on a pro forma basis (139.7 million on an historical basis) and increased 11% in U.S. dollar terms. Global demand for sophisticated imaging services continued to strengthen, driven by growing volume of land and marine data.

Equipment

Operating revenues for our Equipment segment increased 29% to 788.5 million for the year ended December 31, 2007 from 610.1 million for the comparable period of 2006. In U.S. dollar terms, revenues increased 41% to U.S.\$1,079.5 million for the year ended December 31, 2007 from U.S.\$766.3 million for the comparable period of 2006.

Operating revenues (excluding intra-group sales) increased 42% to 679.6 million from 479.5 million for the comparable period in 2006 (and increased 55% in U.S. dollar terms) on a pro forma basis. Sercel sold equipment to Veritas in 2006 that we have eliminated to build our 2006 pro forma figures. Growth was driven by a very strong demand for land seismic equipment and a sustained level of demand for marine equipment.

Operating Expenses

Cost of operations, including depreciation and amortization, increased 17% to 1,622.3 million for the year ended December 31, 2007 from 1,389.2 million for 2006 on a pro forma basis (890.0 million on an historical basis), due to increased activity. As a percentage of operating revenues, cost of operations decreased to 68% for the year ended December 31, 2007 from 70% for 2006 on a pro forma basis. Gross profit increased 25% to

Table of Contents

753.0 million for the year ended December 31, 2007 from 602.9 million for 2006 on a pro forma basis, representing 32% and 30% of operating revenues, respectively.

Research and development expenditures decreased 10% to 51.3 million for the year ended December 31, 2007 from 57.0 for 2006 on a pro forma basis (37.7 million on an historical basis), representing 2% and 3% respectively of operating revenues.

Selling, general and administrative expenses, excluding share-based compensation, increased 12% to 210.4 million for the year ended December 31, 2007 from 188.3 million for 2006 on a pro forma basis (126.4 million on an historical basis). Share based compensation expense increased to 20.6 for the year ended December 31, 2007 from 7.4 for 2006 on a pro forma basis.

As a percentage of operating revenues, selling, general and administrative costs were stable at 10% for the year ended December 31, 2007 and the comparable period of 2006 on a pro forma basis.

Other revenues increased to 18.4 million for the year ended December 31, 2007 from 4.3 million for the comparable period of 2006 on a pro forma basis (11.7 million on an historical basis). Other revenues in 2007 included primarily gains on foreign exchange hedging activities. Other revenues in 2006 included primarily a 5.3 million gain on the sale of 49% of CGG Ardiseis to TAQA.

Operating Income (Loss)

Our operating income increased 38% to 489.1 million for the year ended December 31, 2007 from 354.4 million for 2006 on a pro forma basis (289.0 million on an historical basis) and increased 50% in U.S. dollar terms.

Operating income for our Services segment increased 26% to 304.7 million for the year ended December 31, 2007 from 242.0 million for 2006 on a pro forma basis (150.3 million on an historical basis) and increased 37% in U.S. dollar terms.

Operating income from our Equipment segment increased 53% to 266.2 million for the year ended December 31, 2007 from 174.2 million for 2006 and increased 67% in U.S. dollar terms.

Financial Income and Expenses

Cost of net financial debt decreased 8% to 109.1 million for the year ended December 31, 2007 compared to 118.7 million for 2006 on a pro forma basis (25.4 million on an historical basis). This decrease was due to a favorable effect of the U.S.\$/ exchange rate and a realized gain following the U.S.\$100 million partial prepayment of our term loan B facility on June 29, 2007, offsetting a U.S.\$10 million amortization expense for the issuing fees for our U.S.\$1,700 million bridge loan facility entered into to finance the cash portion of the Veritas merger consideration.

Other financial loss amounted to 5.2 million for the year ended December 31, 2007 compared to a loss of 12.5 million for 2006 on a pro forma basis (8.8 million on an historical basis). This increase was mainly attributable to exchange losses (offset by gains on forward exchange contracts, classified as Other operating income) we experienced in 2006 on a pro forma basis.

Equity in Income (Losses) of Affiliates

Income from investments accounted for under the equity method decreased to 4.2 million for the year ended December 31, 2007 from 10.1 million for 2006 on an historical basis. This item corresponds essentially to our share in

the income of Argas, our joint venture in Saudi Arabia, where, as anticipated, activity declined during the year ended December 31, 2007.

Table of Contents

Income Taxes

Income tax expenses increased 34% to 129.4 million for the year ended December 31, 2007 from 96.5 million for the comparable period of 2006 on a pro forma basis (83.2 million on an historical basis). The effective tax rate amounted to 35% in 2007.

Because we earn a majority of our taxable income outside France, foreign taxation significantly affects our overall income tax expense.

Net Income

Net income increased to 249.6 million for the year ended December 31, 2007 from 116.2 million for 2006 on a pro forma basis (158.7 million on an historical basis) as a result of the factors discussed above.

Year ended December 31, 2006 compared with year ended December 31, 2005

For our financial years ended December 31, 2006 and 2005 we organized our Services segment into three strategic business units, or SBUs:

the Land SBU for land and shallow water seismic acquisition activities;

the Offshore SBU for marine seismic acquisition and multi-client library sales; and

the Processing and Reservoir SBU for seismic data processing, data management and reservoir studies.

The discussion below of our Services segment follows this organization.

In addition, the discussion below regarding the years ended December 31, 2006 and 2005 is for CGG only and is not directly comparable to the results of operations and financial condition of CGGVeritas after the merger on January 12, 2007.

Operating Revenues

Our consolidated operating revenues for the year ended December 31, 2006 increased 53% to 1,329.6 million from 869.9 million for 2005. Expressed in U.S. dollars, our consolidated operating revenues increased 54% to U.S.\$1,669.7 million from U.S.\$1,081.0 million. The increase was attributable to our Services segment, particularly to our Offshore SBU (which included Exploration Resources results for part of 2006) and our Land SBU.

Revenues by Activity

The following table sets forth our consolidated operating revenues by activity (excluding intra-group sales), and the percentage of total consolidated operating revenues represented thereby, during each of the periods indicated:

Year ended December 31,
2006 2005
(in million of euros,
except percentages)

Land SBU	119.1	9%	119.8	14%
Offshore SBU	533.3	40%	319.5	37%
Processing and Reservoir SBU	139.7	11%	113.0	13%
Services	792.1	60%	552.3	64%
Equipment	537.5	40%	317.6	36%
Total	1,329.6	100%	869.9	100%

Services

Operating revenues for our Services segment (excluding intra-group sales) for the year ended December 31, 2006 increased 43% to 792.1 million from 552.3 million for 2005. Expressed in U.S. dollars, operating revenues

Table of Contents

increased 44% to U.S.\$991.3 million from U.S.\$686.2 million. This increase was primarily attributable to our Offshore SBU.

Land SBU. Operating revenues for our Land SBU for the year ended December 31, 2006 decreased 1% to 119.1 million from 119.8 million for 2005. Expressed in U.S. dollars, operating revenues remained constant at U.S.\$148.7 million in 2006 compared to U.S.\$148.8 million in 2005. Eleven crews on average were in operation in both 2005 and 2006.

Offshore SBU. Operating revenues for our Offshore SBU increased 67% to 533.2 million for the year ended December 31, 2006 from 319.5 for 2005. Expressed in U.S. dollars, operating revenues increased 68% to U.S.\$667.2 million from U.S.\$397.1 million. This increase was mainly due to the expansion of our fleet size to nine 3D vessels in operation at December 31, 2006 (from five 3D vessels during the first eight months of 2005) with the Exploration Resources acquisition, as well as price increases in the exclusive marine market, effective use of our seismic vessel capacity and high after-sales of our multi-client surveys.

Exclusive sales increased 69% to 314.3 million for the year ended December 31, 2006 compared to 185.8 million for 2005. Exclusive contracts accounted for 59% of our Offshore sales for the year ended December 31, 2006 compared to 58% for 2005. Multi-client data sales increased 63% to 217.5 million for the year ended December 31, 2006 from 133.7 million for 2005 primarily due to a strong level of pre-commitments. Pre-commitment sales increased 132% to 84.3 million for the year ended December 31, 2006 from 36.3 million for 2005, due to various multi-clients surveys in progress in Brazil and in the Gulf of Mexico. After-sales increased by 37% to 133.2 million for the year ended December 31, 2006 from 97.4 million for 2005. For the year ended December 31, 2006, and particularly in the three months ended March 31, 2006, there was a high demand for data in the Gulf of Mexico, where exploration licenses were allocated in March 2006, and in Brazil, where exploration blocks awarded in 2005 were effectively allocated at the beginning of 2006.

The net book value of our marine multi-clients data library was 71.8 million at December 31, 2006 compared to 93.6 million at December 31, 2005. On March 31, 2006, the Norwegian government decided not to award exploration-production licenses on blocks where one of our surveys (Moere) is located. As this decision changed our previous estimate of future sales, this 4.6 million survey was fully depreciated at March 31, 2006 and remained fully depreciated at December 31, 2006.

Processing and Reservoir SBU. Operating revenues for our Processing and Reservoir SBU increased 24% to 139.7 million for the year ended December 31, 2006 from 113.0 million for 2005. In U.S. dollar terms, operating revenues increased 25% to U.S.\$175.3 million from U.S.\$140.4 million due to a dynamic market with strong demand for high quality imagery.

Equipment

Operating revenues for our Equipment segment for the year ended December 31, 2006 increased 61% to 610.0 million from 378.8 million for 2005. Expressed in U.S. dollar terms, revenues increased 63% to U.S.\$768.0 million for the year ended December 31, 2006 from U.S.\$469.8 million for 2005. This strong increase was due to the successful launch of the *Sentinel*, the new generation of Marine solid streamers, and to the continued strong demand for Land products generally.

Excluding intra-group sales, operating revenues increased 69% to 537.5 million for the year ended December 31, 2006 from 317.6 million for 2005. Expressed in U.S. dollar terms, revenues excluding intra-group sales increased 72% to U.S.\$678.4 million for the year ended December 31, 2006 from U.S.\$394.8 million for 2005.

Operating Expenses

Cost of operations, including depreciation and amortization, increased 33% to 890.0 million for the year ended December 31, 2006 from 670.0 million for 2005. As a percentage of operating revenues, cost of operations decreased to 67% for the year ended December 31, 2006 from 77% for 2005, due to improved productivity in both Services and Equipment segments and to significant after-sales on multi-client surveys that were already fully

Table of Contents

depreciated. As a consequence, gross profit increased 118% to 441.4 million for the year ended December 31, 2006 from 201.8 million for 2005.

Depreciation expense increased for the year ended December 31, 2006 by 39% to 106.0 million from 76.3 million for 2005, due to depreciation of Exploration Resources vessels over 12 months in 2006 and over four months in 2005. Multi-client surveys depreciation was 80.6 million for the year ended December 31, 2006 compared with 69.6 million for 2005.

Research and development expenditures, net of government grants, increased 21% to 37.7 million for the year ended December 31, 2006 from 31.1 million for 2005 due to development efforts in our Product segments and a lower research tax credit granted in 2006 to our Services segment.

Selling, general and administrative expenses increased 39% to 126.4 million for the year ended December 31, 2006 from 91.2 million for 2005, in part as a result of the Exploration Resources integration and the need to support the significant organic growth, and on the other hand as a result of the accounting cost of our stock-options plans and performance shares allocation plan amounting to 7.4 million for the year ended December 31, 2006 compared to 0.4 million for the year ended December 31, 2005. Despite this expense, selling, general and administrative costs, as a percentage of operating revenues remained constant at 10% for both 2006 and 2005.

Other Income (Expenses)

Other income net of other expenses totaled 11.7 million for the year ended December 31, 2006 compared to other expenses net of other income of 4.4 million for 2005.

Other incomes for the year ended December 31, 2006 included primarily:

- a 8.9 million of income related to the application of our hedging policy (a 4.6 million of income in the Services segment and a 4.3 million income in the Equipment segment);

- a 5.3 million of net gain on the sale of 49% of CGG Ardiseis in the Services segment; and

- a 1.9 million net of depreciation of Veritas share in the asset Customer relationships that was recognized in the purchase accounting of Thales Underwater Systems seismic equipment activity in 2004, when CGG merged with Veritas on January 12, 2007.

Other expenses for the year ended December 31, 2005 included primarily:

- a 2.9 million expense related to the application of our hedging policy (a 0.9 million expense in the Services segment, a 3.6 million expense in the Equipment segment and a 1.6 million elimination on hedging on intra-group sales of equipment); and

- a 1.0 million net loss on fixed assets sold or written-off.

Operating Income

Operating income increased to 289.0 million for the year ended December 31, 2006 from 75.1 million for 2005. This increase was due to increases in both our Services and Equipment segments.

Operating income from our Services segment was 150.3 million for the year ended December 31, 2006 compared to a loss of 25.2 million for 2005. This increase was mainly due to a high level of marine multi-client after-sales, high prices in the exclusive marine seismic acquisition sector and improved use of our seismic vessel capacity.

Operating income from our Equipment segment was 174.2 million for the year ended December 31, 2006 compared to 79.8 million for 2005. This increase was primarily due to a higher volume of sales and improved gross margins.

Table of Contents***Cost of Financial Debt, Net***

Net cost of financial debt decreased 40% to 25.4 million for the year ended December 31, 2006 from 42.3 million for 2005. 9.4 million of this 16.9 million decrease was due to the financial cost of the early redemption of our 105/8% bonds due 2007 recognized in 2005.

The remainder of the decrease is due to the changes in the structure of our financial debt mainly as follows:

at December 31, 2005, our U.S.\$165 million 7 1/2% Senior Notes (issued in April 2005), our 7.75% U.S.\$85 million convertible bonds due 2012 (partially converted in November 2005, with the remainder converted in May 2006) and our U.S.\$375 million bridge loan facility put in place at the beginning of September 2005 to acquire Exploration Resources (generating 14.2 million expenses over 2005); and

at December 31, 2006, our U.S.\$165 million 7 1/2% Senior Notes due 2015 issued in April 2005, with a further fungible issuance of U.S.\$165 million in principal amount in January 2006, and a credit facility of U.S.\$70 million to Exploration Resources.

Other Financial Expense

The cost of the conversion option embedded in our U.S.\$85 million 7.75% convertible bonds due 2012 resulted in an expense of 23.0 with respect to those bonds outstanding after November 2005 for the year ended December 31, 2006 and an expense of 24.1 million for the year ended December 31, 2005, accounted for as Derivative and other expenses on convertible bonds in our income statement. The expense was due in 2006 to (i) an increase of 20.7 million in the value of the derivative mainly due to the increase in our share price, (ii) the 1.6 million premium paid for the early conversion of the remaining convertible bonds on May 12, 2006 and (iii) the 0.7 million write-off of issuance costs recognized as an expense at the time of the early conversion.

Other financial expenses increased to 8.8 million for the year ended December 31, 2006 from 1.9 million for 2005, principally as a result of a 4.9 million cost on forward exchange contracts of U.S. dollars. The remaining 3.9 million loss was mainly due to foreign exchange difference losses which were offset by the 8.9 million gain on forward exchange contracts in U.S. dollars that qualified for cash-flow hedge treatment and are presented as Other operating income in the income statement.

Equity in Income of Affiliates

Equity in income of affiliates accounted for under the equity method decreased to 10.1 million for the year ended December 31, 2006 from 13.0 million for 2005. Equity in income from Argas, our joint venture in Saudi Arabia, decreased to 9.5 million for the year ended December 31, 2006 from 12.7 million for 2005.

Income Taxes

Income taxes increased to 83.2 million for the year ended December 31, 2006 from 26.6 million for 2005, in part due to an increase in our U.S. income tax resulting from the high level of Marine products sales and after-sales of multi-clients surveys in the Gulf of Mexico. In addition, a 12.2 million net tax expense on the French tax group occurred because our remaining cumulated French carry-forward losses no longer offset our French net deferred tax liability position at December 31, 2006. A deferred tax income of 16.3 million was recognized for the French tax group for the net deferred tax asset existing at January 1, 2006 and not previously recognized.

We are not subject to a worldwide taxation system, and the income tax paid in foreign countries, primarily based on revenues, does not generate comparable tax credits in France, our country of consolidated taxation.

Net Income (Loss)

For the year ended December 31, 2006 we had a group share of net income of 157.1 million compared to a net loss of 7.8 million for the year ended December 31, 2005.

Table of Contents

Liquidity and Capital Resources

Our principal capital needs are for the funding of ongoing operations, capital expenditures (particularly repairs and improvements to our seismic vessels), investments in our multi-client data library and acquisitions (such as, most recently, Veritas and Exploration Resources).

We intend to fund ongoing operations through cash generated by operations, Senior Notes and borrowings under our U.S. and French facilities. Our Senior Facilities consist of a U.S.\$1 billion term loan B facility with a seven year maturity and a U.S.\$140 million U.S. revolving facility with a five year maturity. The French revolving facility consists of a U.S.\$200 million senior secured revolving facility with a five year maturity.

At our option, borrowings under the term loan B facility bear interest at (i) the rate of adjusted LIBOR plus either 1.75% or 2.00% or (ii) the Alternate Base Rate plus either 0.75% or 1.00%, in each case depending on the corporate rating of CGG Veritas by S&P and the corporate family rating of CGG Veritas by Moody's. At the option of Veritas, borrowings under the U.S. revolving facility bear interest at the rate of adjusted LIBOR plus a range from 1.75% to 2.25% or the Alternate Base Rate plus a range from 0.75% to 1.25%, in each case depending on the corporate rating of CGG Veritas by S&P and the corporate family rating of CGG Veritas by Moody's. The Alternate Base Rate is the higher of Credit Suisse's Prime Rate and the Federal Funds Effective Rate plus 1/2 of 1.0%. The senior credit facilities and the French revolving facility require us to meet minimum ratios of EBITDA (defined as operating income (loss) excluding non-recurring revenues (expenses) plus depreciation, amortization, additions (deductions) to valuation allowances of assets and dividends from companies accounted for under the equity method less capital expenditures to total interest costs and maximum ratios of total net debt to EBITDA. In addition, the Senior Facilities and the French revolving facility contain certain restrictive covenants which, among other things, limit our ability to incur additional indebtedness, pay dividends, make investments, pledge assets, merge or consolidate, change our business and engage in certain other activities customarily restricted in such agreements. They also contain certain customary events of defaults, subject to grace periods, as appropriate.

Future principal debt payments are expected to be paid out of cash flows from operations, borrowings under the U.S. revolving facility and the French revolving facility and future refinancing of our debt. The indentures governing our notes will also contain numerous covenants including, among other things, restrictions on our ability to: incur or guarantee additional indebtedness; pay dividends or make other equity distributions, repurchase or redeem equity interests; make investments or other restricted payments; sell assets or consolidate or merge with or into other companies; create limitations on the ability of our restricted subsidiaries to make dividends or distributions to us; engage in transactions with affiliates; and create liens. Our ability to make scheduled payments of principal, or to pay the interest or additional interest, if any, on, or to refinance our indebtedness, or to fund planned capital expenditures will depend on our future performance, which, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Based upon the current level of operations, we believe that cash flow from operations, available cash and short-term investments, together with borrowings available under the U.S. revolving facility and the French revolving facility, will be adequate to meet our future liquidity needs for the next 12 months. Our assumptions with respect to future costs may not be correct, and funds available to us from the sources discussed above may not be sufficient to enable us to service our indebtedness, including the notes, or cover any shortfall in funding for any unanticipated expenses. In addition, to the extent we make future acquisitions, we may require new sources of funding including additional debt, or equity financing or some combination thereof. We may not be able to secure additional sources of funding on favorable terms.

Cash Flows

Operating Activities

For the year ended December 31, 2007, our net cash provided by operating activities, before changes in working capital, was 845.8 million compared to 405.9 million for 2006 and 204 for 2005 on a historical basis. Both of these increases were primarily due to the increase in our operating income. Changes in working capital for the year ended December 31, 2007 had a negative impact of 198.5 million compared to a negative impact of 58.5 million for 2006 on a historical basis. Changes in working capital for the year ended December 31, 2005 had a negative impact of 21.6 million.

Table of Contents

Investing Activities

During the year ended December 31, 2007, net cash used in investing activities was 1,573.1 million compared with 243.4 million for 2006 and 411.1 million for 2005 on a historical basis.

The total cash requirement related to the merger with Veritas on January 12, 2007 represented an investment, net of cash acquired, of 993 million. We also acquired a 15% stake in Offshore Hydrocarbon Mapping for 23 million in August 2007.

Sercel's acquisition of Vibtech in 2006 represented an investment net of acquired cash of 48.3 million. In 2005, we acquired all of the shares of Exploration Resources for a net investment of 265.8 million corresponding to the price we paid for the shares less the cash held by Exploration Resources at the acquisition date.

In 2007, capital expenditures amounted to 230.5 million primarily due to the upgrade of two of our 2D seismic vessels to 3D, the upgrade of the *Geo Challenger* to twelve streamers and the equipment of land crews.

In 2006, we converted our vessel, the *Geo Challenger* from a cable vessel into a 3D seismic vessel and equipped the *Symphony* with Sentinel streamers. In addition, we entered into 0.1 million of new capital leases in 2006 compared with 17.4 million of new capital leases (primarily related to the vessel *Laurentian*) for 2005.

The increase in 2005 was mainly due to the equipping of two vessels with Sentinel streamers.

Proceeds from sales of assets in 2007 corresponded to the gain on our 12.7% stake in Eastern Echo following the cash offer launched by Schlumberger BV on November 16, 2007.

Proceeds from sales of assets in 2006 corresponded to the sale of 49% of CGG Ardiseis for an amount of 16.8 million before tax.

We also invested 371.4 million in our multi-client library during the year ended December 31, 2007, primarily for Gulf of Mexico. We invested 61.5 million in our multi-client library during the year ended December 31, 2006, primarily for Gulf of Mexico and Brazil, and 32 million during the year ended December 31, 2005. As of December 31, 2007, the net book value of our multi-client data library was 435.4 million compared to 71.8 million at December 31, 2006 and 93.6 million at December 31, 2005.

Financing Activities

Net cash provided by financing activities for the year ended December 31, 2007 was 950.2 million compared to 46.8 million in 2006.

Total cash requirements related to the acquisition of Veritas on January 12, 2007 were financed by U.S.\$700 million drawn under our bridge loan facility, which was repaid with the proceeds of our U.S.\$600 million offering Senior Notes on February 9, 2007 plus cash on hand, and U.S.\$1.0 billion drawn under our term loan B facility with a maturity of 2014, of which U.S.\$100 million was repaid early on June 29, 2007.

Net cash provided by financing activities for the year ended December 31, 2006 was 46.8 million compared to 193.4 million in 2005, as a result of the issuance in February 2006 of an additional U.S.\$165 million principal amount of our dollar-denominated 7 1/2% Senior Notes due 2015 used to repay the remaining U.S.\$140.3 million as of December 31, 2005 under the bridge loan to acquire Exploration Resources.

Net cash provided by financing activities for the year ended December 31, 2005 was 193.4 million, resulting principally from our U.S.\$375 million bridge credit facility entered on September 1, 2005 to acquire Exploration Resources. This bridge facility was drawn in full in October 2005, then partially repaid in December 2005. The bridge facility remained drawn as of December 31, 2005 by 118.9 million (U.S.\$140.3 million). We also redeemed our outstanding 105/8% senior notes due 2007 prior to maturity in aggregate principal amount of U.S.\$225 million (U.S.\$75 million on January 26, 2005 and U.S.\$150 million on May, 31, 2005) and issued U.S.\$165 million in aggregate principal amount of 7 1/2% Senior Notes due 2015 on April 28, 2005.

Table of Contents***Net Debt***

Net debt was 1,106.7 million at December 31, 2007, 153.8 million at December 31, 2006, and 297.2 million at December 31, 2005. The ratio of net debt to equity increased to 46% at December 31, 2007 from 18% at December 31, 2006 and 43% at December 31, 2005.

Net debt is the amount of bank overdrafts, plus current portion of financial debt, plus financial debt, less cash and cash equivalents. Net debt is presented as additional information because we understand that certain investors believe that netting cash against debt provides a clearer picture of the financial liability exposure. However, other companies may present net debt differently than we do. Net debt is not a measure of financial performance under IFRS and should not be considered as an alternative to any other measures of performance derived in accordance with IFRS.

The following table presents a reconciliation of net debt to financing items of the balance sheet at December 31, 2007, 2006 and 2005:

	December 31, 2007	December 31, 2006	December 31, 2005
	(in millions of euros)		
Bank overdrafts	17.5	6.5	9.3
Current portion of financial debt	44.7	38.1	157.9
Financial debt	1,298.8	361.0	242.4
Less cash and cash equivalents	(254.3)	(251.8)	(112.4)
Net debt	1,106.7	153.8	297.2

EBITDAS

EBITDAS for the years ended December 31, 2007, 2006 and 2005 was 997.3 million, 483.0 million and 221.4 million respectively.

EBITDAS is defined as earnings before interest, tax, depreciation, amortization and share-based compensation cost. Share-based compensation includes both stock options and shares issued under our share allocation plans. EBITDAS is presented as additional information because we understand that it is one measure used by certain investors to determine our operating cash flow and historical ability to meet debt service and capital expenditure requirements. However, other companies may present EBITDAS differently than we do. EBITDAS is not a measure of financial performance under IFRS and should not be considered as an alternative to cash flow from operating activities or as a measure of liquidity or an alternative to net income as indicators of our operating performance or any other measures of performance derived in accordance with IFRS.

Table of Contents

The following table presents a reconciliation of EBITDAS to Net cash provided by operating activities, according to our cash-flow statement, for the periods indicated:

	Year ended December 31,		
	2007	2006	2005
	(in millions of euros)		
EBITDAS	997.3	483.0	221.4
Other financial income (loss)	(5.2)	(8.8)	(14.5)
Variance on derivative on convertible bonds		(23.0)	(11.5)
Variance on Provisions	2.0	4.6	6.7
Net gain on disposal of fixed assets	(0.3)	(5.3)	1.6
Dividends received from affiliates	5.3	4.3	4.5
Other non-cash items	(9.2)	31.5	27.5
Income taxes paid	(144.1)	(80.4)	(31.7)
Change in trade accounts receivables	(133.0)	(18.8)	(24.3)
Change in inventories	(41.4)	(40.0)	(45.2)
Change in other current assets	(12.8)	(5.8)	(3.1)
Change in trade accounts payables	(13.3)	5.0	38.8
Change on other current liabilities	22.5	20.1	1.0
Impact of changes in exchange rate	(20.5)	(19.0)	11.2
Net cash provided by operating activities	647.3	347.4	182.4

Contractual obligations

The following table sets forth our contractual obligations as of December 31, 2007:

	Payments due by period				Total
	Less than 1 year	2-3 years	4-5 years	More than 5 years	
	(in millions of euros)				
Long-term debt	28.4	55.2	27.3	1,181.5	1,292.4
Capital Lease Obligations	10.9	10.1	28.0		48.9
Operating Leases	93.0	117.9	76.2	69.2	356.3
Other Long-term Obligations (bond interest)	48.1	96.1	96.1	162.3	402.6
Total Contractual Obligations	180.4	279.2	227.6	1,413.0	2,100.2

Off-Balance Sheet Arrangements

CGGVeritas and Eidesvik Offshore entered into an agreement on July 2, 2007 amended on March 14, 2008, for the supply of two large seismic vessels to be newly built with a total contract value of U.S.\$420 million. These two

vessels are key components of CGGVeritas' strategy of progressive fleet renewal and modernization. These vessels will be delivered in 2010 under 12-year time charter agreements.

We have not entered into any other off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Research and development

Our ability to compete effectively and maintain a significant market position in our industry depends to a substantial extent upon our continued technological innovation. We have focused on rationalizing our research and development activities both to reduce costs and to focus our research and development efforts primarily on reservoir characterization, multi-component seabed seismic processing techniques, structural imaging and advanced seismic recording equipment. Our research and development teams, totaling approximately 541 employees, are divided among operating divisions. Sercel has strong research capabilities, especially in underwater acoustic transmission,

Table of Contents

oceanographic metrology and borehole electronics for area studies. We also access new sources of information or technology by entering into strategic alliances with equipment manufacturers, oil and gas companies, universities, such as Bergen university, or other clients or by acquiring technology under license from others. We have historically entered into and continue to pursue common research programs with the *Institut Français du Pétrole*, an agency of the French government.

While the market for our products and services is subject to continual and rapid technological changes, development cycles from initial conception through introduction can extend over several years. Our efforts have resulted in the development of numerous inventions, new processes and techniques, many of which have been incorporated as improvements to our product lines (as further developed in item 4). During 2007, 2006 and 2005, our research and development expenditures incurred (including capitalized costs and excluding grants received) were 63.0 million, 51.1 million, and 43.5 million, respectively, of which approximately 6.6%, 2.9% and 9.69%, respectively, was funded by French governmental research entities, such as the *Fonds de Soutien aux Hydrocarbures* (which funding is to be repaid to such organizations from sales of products or services developed with such funds).

Trend information

Currency Fluctuations

Certain changes in operating revenues set forth in U.S. dollars in this Annual Report on Form 20-F were derived by converting revenues recorded in euros at the average rate for the relevant period. Such information is presented in light of the fact that most of our revenues are denominated in U.S. dollars while our consolidated financial statements are presented in euros. Converted figures are presented only to assist in an understanding of our operating revenues but are not part of our reported financial statements and may not be indicative of changes in our actual or anticipated operating revenues.

Our business faces foreign exchange risks because a large percentage of our revenues and cash receipts are denominated in U.S. dollars, while a significant portion of our operating expenses and income taxes accrue in euro and other currencies. Movements between the U.S. dollar and euro or other currencies may adversely affect our operating revenues and results. In the years ended December 31, 2007, 2006 and 2005, more than 80% of our operating revenues and approximately two-thirds of our operating expenses were denominated in currencies other than euros. These included U.S. dollars and, to a significantly lesser extent, other non-Euro Western European currencies, principally British pounds and Norwegian kroner. In addition, a significant portion of our revenues that were invoiced in euros related to contracts that were effectively priced in U.S. dollars, as the U.S. dollar often serves as the reference currency when bidding for contracts to provide geophysical services to the oil and gas industry.

Fluctuations in the exchange rate of the euro against such other currencies, particularly the U.S. dollar, have had in the past and can be expected in future periods to have a significant effect upon our results of operations. For financial reporting purposes, such depreciation of the U.S. dollar against the euro negatively affects our reported results of operations since U.S. dollar-denominated earnings that are converted to euros are stated at an reduced value. Since we participate in competitive bids for data acquisition contracts that are denominated in U.S. dollars, such depreciation reduces our competitive position against that of other companies whose costs and expenses are denominated in U.S. dollars. An appreciation of the U.S. dollar against the euro has the opposite effect. As a result, our sales and operating income are exposed to the effects of fluctuations in the value of the euro versus the U.S. dollar. In addition, our exposure to fluctuations in the euro/U.S. dollar exchange rate has considerably increased over the last few years due to increased sales outside Europe.

We attempt to match foreign currency revenues and expenses in order to balance our net position of receivables and payables denominated in foreign currencies. For example, charter costs for our vessels, as well as our most important

computer hardware leases, are denominated in U.S. dollars. Nevertheless, during the past five years such dollar-denominated expenses have not equalled dollar-denominated revenues principally due to personnel costs payable in euros.

In addition, to be protected against the reduction in value of future foreign currency cash flows, we follow a policy of selling U.S. dollars forward at average contract maturity dates that we attempt to match with future net U.S. dollar cash flows (revenues less costs in U.S. dollars) expected from firm contract commitments, generally

Table of Contents

over the ensuing six months. At December 31, 2007, 2006 and 2005, we had U.S.\$280.4 million (with a euro equivalent-value of 190.5 million), U.S.\$327.8 million (with a euro equivalent-value of 248.9 million) and U.S.\$190.1 million (euro equivalent-value of 157.8 million), respectively, of notional amounts outstanding under euro/U.S. dollar forward exchange contracts and other foreign exchange currency hedging instruments.

We do not enter into forward foreign currency exchange contracts for trading purposes.

Inflation

Inflation has not had a material effect on our results of operations during the periods presented. We operate in, and receive payments in the currencies of, certain countries with historically high levels of inflation, such as Mexico, Brazil and Venezuela. We attempt to limit such risk by, for example, indexing payments in the local currency against, principally, the U.S. dollar exchange rate at a certain date to account for inflation during the contract term.

Income Taxes

We conduct the majority of our field activities outside of France and pay taxes on income earned or deemed profits in each foreign country pursuant to local tax rules and regulations.

We had significant tax loss carryforwards that are available to offset future taxation on income earned in certain OECD countries. We recognize tax assets if budget estimates also indicate enough profits for the following years to use carryforward losses.

Seasonality

Our land and marine seismic acquisition activities are usually seasonal in nature as a consequence of weather conditions in the Northern Hemisphere and of the timing chosen by our principal clients to commit their annual exploration budget to specific projects. We have historically experienced higher levels of activity in our equipment manufacturing operations in the fourth quarter as our clients seek to fully deploy annual budgeted capital.

Item 6: DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES

Directors and Senior Management

Board of Directors

Under French law, the Board of Directors determines our business strategy and monitors business implementation. Subject to the specific powers granted by the ordinary general shareholders' meeting, the Board of Directors deals with any issues relating to our affairs. In particular, the Board of Directors prepares and presents our year-end accounts to our ordinary general shareholders' meeting. Our Board of Directors consists of between six and fifteen members elected by our shareholders. Under French law, a director may be an individual or a legal entity for which an individual is appointed as permanent representative.

Our *statuts* (memorandum and articles of association) provide that each director is elected for a six-year term by the ordinary general shareholders' meeting. There is no obligation for directors to be French nationals. According to French corporate law, a physical person may simultaneously hold the office of director in no more than five *sociétés anonymes* whose registered offices are located on French territory, subject to certain exceptions. Pursuant to the Board's internal regulations each director is required to own at least 100 of our shares.

Directors are required to comply with applicable law and our *statuts*. Under French law, directors are responsible for actions taken by them that, *inter alia*, are contrary to the company's interests and may be held liable for such actions both individually and jointly with the other directors.

On January 9, 2007, CGG's extraordinary general meeting of shareholders nominated four Veritas directors (Thierry Pilenko, former chairman and CEO of Veritas, Terence Young, David Work, and Loren Carroll) to the board of directors of CGG Veritas effective January 12, 2007. Each new director will serve for a term of six years.

Table of Contents

The following table sets forth the names of our current directors, their positions, the dates of their initial appointment as directors and the expiration dates of their current term.

Name	Position	Initially appointed	Term expires
Robert Brunck ⁽¹⁾⁽²⁾	Chairman of the Board and Chief Executive Officer	1998	2008
Olivier Appert ⁽¹⁾⁽³⁾	Director	2003	2008
Loren Carroll ⁽⁴⁾ <i>(independent director)</i>	Director	2007	2013
Rémi Dorval ⁽³⁾⁽⁴⁾ <i>(independent director)</i> ⁽⁵⁾	Director	2005	2010
Jean Dunand ⁽⁴⁾ <i>(independent director)</i> ⁽⁵⁾	Director	1999	2013
Yves Lesage ⁽²⁾⁽⁴⁾	Director	1988	2009
Christian Marbach ⁽¹⁾	Director	1995	2013
Thierry Pilenko ⁽²⁾	Director	2007	2013
Robert Semmens ⁽¹⁾⁽³⁾ <i>(independent director)</i> ⁽⁵⁾	Director	1999	2011
Daniel Valot ⁽⁴⁾ <i>(independent director)</i> ⁽⁵⁾	Director	2001	2012
David Work ⁽³⁾ <i>(independent director)</i> ⁽⁵⁾	Director	2007	2013
Terence Young ⁽²⁾ <i>(independent director)</i> ⁽⁵⁾	Director	2007	2013

(1) Member of Strategic Committee.

(2) Member of the Technology Committee.

(3) Member of Appointment-Remuneration Committee.

(4) Member of Audit Committee.

(5) Independent director within the meaning of the report of the working committee of the *Association Française des Entreprises Privées - Mouvement des Entreprises de France*. See Board Practices .

Mr. Brunck, 58, has been our Chairman and Chief Executive Officer since May 1999. Mr. Brunck was our Vice Chairman and President from September 1998 to May 1999 and was our President and Chief Operating Officer from February 1995 to September 1998. Mr. Brunck was Vice President of Administration and Development from 1991 to 1995 and Chief Financial Officer from 1989 to 1991. He is Chairman of the Supervisory Board of Sercel Holding S.A., Chairman of the Board of Directors of CGG Americas, Inc., Director of Thalès, Director of the *Ecole Nationale Supérieure de Géologie*, Director of the Bureau of Geological and Mining Research, Director of the *Conservatoire National des Arts et Métiers*, Director of the *Groupement des Entreprises Parapétrolières et Paragazières*, Chairman of Armines and Director of the *Institut Français du Pétrole*.

Mr. Appert, 58, has been Chairman and Chief Executive Officer of the French Petroleum Institute (*Institut Français du Pétrole*, or IFP) since April 2003. Mr. Appert was President for long-term co-operation and energy policy analysis within the International Energy Agency until October 1999. He is also a Director of Technip and of the *Institut de Physique du Globe de Paris*.

Mr. Carroll, 64, joined our Board of Directors on January 12, 2007. Until that date, Mr. Carroll had been a Director of Veritas since 2003. Mr. Carroll is currently a financial and strategic business consultant. Until his retirement in April 2006, Mr. Carroll was President and Chief Executive Officer of M-I Swaco L.L.C. and was also Executive Vice President of Smith International, Inc. Mr. Carroll also serves as a Director of Smith International, Inc., Fleetwood Enterprises, Inc., Forest Oil Corporation and KBR Inc. Mr. Carroll joined Smith International in December 1984 as Vice President and Chief Financial Officer. In January 1988, he was appointed Executive Vice President and Chief Financial Officer of Smith International and served in that capacity until March 1989. Mr. Carroll then rejoined Smith International in 1992 as Executive Vice President and Chief Financial Officer. Smith International holds a 60% interest in M-I Swaco L.L.C.

Table of Contents

Mr. Dorval, 57, has been Vice-Chairman and Chief Executive Officer of Soletanche-Bachy Entreprise since June 1997. Mr. Dorval is Director, Vice Chairman and President of Solétanche Bachy France, Chairman of Forasol, Chairman of SB 2007, a Director of Solétanche S.A., Solmarine, SHPIC, Sol-Expert International, Sepicos Perfosol, Solétanche Bachy GmbH, Bachy Soletanche Holdings, SBUSA, Soldata Iberia and Nicholson. He is also Director, Chairman and Chief Executive Officer of SolData and permanent representative of Solétanche Bachy France in the economic group SB Mat.

Mr. Dunand, 68, was Financial and Legal Director of ISIS from 1999 to December 2001 and was Deputy General Manager Finance (Russia and CIS) of Total Exploration-Production from 1994 to 1999.

Mr. Lesage, 70, has been our Honorary Chairman since May 1999. Mr. Lesage was Chairman and Chief Executive Officer of CGG from January 1995 to May 1999. He was Chairman, President and Chief Executive Officer of Sogerap from 1994 to 1995.

Mr. Marbach, 70, *Ingénieur Général des Mines*, was Advisor to the General Management of Suez-Lyonnaise des Eaux from 1996 to 2000. Before that time, Mr. Marbach was Chairman and Chief Executive Officer of Coflexip and Coflexip Stena Offshore from 1991 to 1996. Mr. Marbach is a member of the Supervisory Board of Lagardère, Supervisor of Sofinnova.

Mr. Pilenko, 50, joined our Board of Directors on January 12, 2007. He is the Chairman and Chief Executive Officer of Technip since April 27, 2007. From January 15, 2007 until April 2007, he was Deputy General Manager of Technip. Until the merger with Veritas DGC Inc., Mr. Pilenko had been Chairman and Chief Executive Officer and a Director of Veritas since March 2004. Prior to his appointment and since 2001, Mr. Pilenko had served as Managing Director of SchlumbergerSema, a Schlumberger Ltd. company located in Paris. From 1998 to 2001, he was President of Geoquest, another Schlumberger Ltd. company located in Houston, Texas. Mr. Pilenko was employed by Schlumberger Ltd. and its affiliated companies in various parts of the world beginning in 1984 and progressed through a variety of operating positions. Mr. Pilenko is also Chairman of Technip Italy and a Director of Hercules Offshore, Inc. and a Permanent Representative of Technip on the Board of Directors of Technip France.

Mr. Semmens, 50, is an independent consultant and private investor. He was co-founder and General Partner of The Beacon Group LLC from 1993 to 2001. Mr. Semmens is a Member of the Supervisory Board of Sercel Holding S.A a Director of MicroPharma Ltd. and Advisory Director of Mao Networks Inc.

Mr. Valot, 63, was Chairman and Chief Executive Officer of Technip from September 1999 until April 2007. Mr. Valot was President of Total Exploration and Production, and was a member of the Total Group Executive Committee from 1995 to 1999. Mr. Valot is a Director of SCOR and Petrocanada.

Mr. Work, 62, joined our Board of Directors on January 12, 2007. Until that date, Mr. Work had been a Director of Veritas since 2004. Mr. Work is currently an oil and gas industry consultant. From 2001 until October 2003, he served as the Chairman of Energy Virtual Partners, Inc., a privately-held company engaged in the business of managing under-resourced oil and gas properties. For more than five years prior to his retirement from BP Amoco in October 2000, he served in various management capacities with Amoco and BP Amoco, including Group Vice President of exploration and, finally, as Regional President in the United States. Mr. Work currently also serves as a Director of Edge Petroleum Corporation and CrystaTech, Inc.

Mr. Young, 61, joined our Board of Directors on January 12, 2007. Until that date, Mr. Young had been a Director of Veritas since 2005. Mr. Young is currently a professor and head of the Department of Geophysics at the Colorado School of Mines and has served as such since 2000. From 1983 until 2000, Mr. Young was employed by Mobil Research and Development Corporation in a variety of roles, the last of which was as a visiting scholar at the Institute

for Statistics and Its Applications, Carnegie Mellon University. From 1982 to 1983, he served as a research geophysicist with Compagnie Générale de Géophysique, from 1979 to 1982, he served as assistant professor, Colorado School of Mines, and from 1969 to 1974 was a pilot and flight instructor in the United States Navy.

Executive Officers

Under French law and our current *statuts*, the Chairman and Chief Executive Officer has full executive authority to manage our affairs. The Board of Directors has the power to appoint and remove, at any time, the

Table of Contents

Chairman and Chief Executive Officer. Under French law and our current *statuts*, the Chairman and Chief Executive Officer, where those functions are exercised by the same person, has full power to act on our behalf and to represent us in dealings with third parties, subject only to (i) the corporate purpose of the company, (ii) those powers expressly reserved by law to the Board of Directors or our shareholders and (iii) limitations that the Board of Directors may resolve, such limitations not being binding on third parties. The Chairman and Chief Executive Officer determines and is responsible for the implementation of the goals, strategies and budgets for our different businesses, which are reviewed and monitored by the Board of Directors. In accordance with French corporate law, our current *statuts* provide for the election by the Board of Directors of one person to assume the position of Chairman and Chief Executive Officer or the division of such functions between two different persons. In its session of May 15, 2002, the Board of Directors decided that Mr. Brunck would assume the position of Chairman and Chief Executive Officer until the expiry of his term as a director, unless otherwise decided by the Board. Our current *statuts* provide that the Board of Directors may appoint up to five Presidents and Chief Operating Officers (*Directeurs Généraux Délégués*) upon proposal of the Chief Executive Officer, whether or not this person is also the Chairman of the Board. On September 7, 2005, our Board of Directors named Thierry Le Roux and Christophe Pettenati-Auziere to this position. Christophe Pettenati-Auzière left his position on December 6, 2007.

The following table sets forth the names of our current executive officers who serve as members of our Executive Committee, their current positions with us and the first dates as of which they served as our executive officers. We generally employ our executive officers under standard employment services agreements that have no fixed term, but Timothy Wells and Fernando Aguilar's employment services agreement have a term of three years starting from December 27, 2006 and February 1, 2007 respectively.

Name	Current position	Executive officer since
Robert Brunck	Chairman and Chief Executive Officer	1989
Thierry Le Roux	President and Chief Operating Officer	1995
Stephane-Paul Frydman	Chief Financial Officer	2003
Gérard Chambovet	Senior Executive Vice President	1995
Luc Benoît-Cattin	President Corporate Services	2003
Fernando Aguilar	President Eastern Hemisphere	2008
Timothy Wells	President Western Hemisphere	2007
Pascal Rouiller	Chief Executive Officer, Sercel group	1997

Mr. Le Roux, 54, was appointed President and Chief Operating Officer in January 2007. Before that time, he had been Group President and Chief Financial Officer since September 2005 and Senior Executive Vice President of our Equipment segment since October 1998. Mr. Le Roux was Executive Vice President of CGG's Geophysical Equipment operations from March 1995 to October 1998. He was Business Development Manager from 1992 to 1995 and Far East Manager from 1984 to 1992. Mr. Le Roux is Chairman of Sercel S.A., Chairman of the Board of CGG Services SA, Chairman of the Board of Sercel Inc., Chairman of the Board of Hebei Sercel-Jungfeng Geophysical Prospecting Equipment Co. Ltd, Vice-Chairman and member of the Supervisory Board of Sercel Holding, a Director of CGG Americas Inc., Chairman of the Board of Sercel England, a Director of Sercel Singapore Private Ltd., a Director of CGGVeritas Services Holding (U.S.) Inc., a Director of Offshore Hydrocarbon Mapping, INT. Inc., Chairman of the Supervisory Board of Tronic's Microsystems S.A. and a Director of Cybernetix S.A.

Mr. Frydman, 44, was appointed Chief Financial Officer in January 2007. Before that time, he had been Group Controller, Treasurer and Deputy Chief Financial Officer since September 2005, Deputy Chief Financial Officer of the CGG group since January 2004 and Vice President in charge of corporate financial affairs reporting to the Chief

Financial Officer since December 2002. Prior to joining CGG, Mr. Frydman was an Investor Officer of Butler Capital Partners, a private equity firm, from April 2000 to November 2002, and Industrial Advisor to the French Minister of the Economy and Finances from June 1997 to March 2000. Mr. Frydman is a Director of Sercel S.A., CGGVeritas Services Holding (U.S.) Inc., CGGVeritas Services (Norway) AS and CGGVeritas Services. He is a member of the Supervisory Board of Sercel Holding and a member of the Executive Committee of Geomar.

Table of Contents

Mr. Chambovet, 55, is Senior Executive Vice President Human Resources, Communication, HSE and Audit since January 2007. Until that time, he had been Senior Executive Vice President, Technology, Planning & Control and Communication since January 2005 and Senior Executive Vice President of our Services segment since October 1998. Mr. Chambovet was Executive Vice President of our Acquisition Product line from March 1995 to October 1998 and was Manager of our data processing center in Massy, France from 1987 to 1995. Mr. Chambovet is a Director of Argas, Sercel S.A., CGG Americas Inc., CGGVeritas Services, Ardiseis and member of the Supervisory Board of Sercel Holding S.A. He is Chairman of the Board of CGGVeritas International.

Mr. Benoît-Cattin, 44, was appointed President of Eastern Hemisphere Geophysical Services in January 2007. Before that time, he had been Executive Vice President of our Offshore SBU division since January 2005, Deputy Vice President Geophysical Services from January 2004 to December 2004 and Vice President, Services from June 2002 to December 2003. Prior to joining CGG, Mr. Benoit-Cattin was Executive Vice President for oil and heat transfer businesses in the Pechiney Group from January 1998 to May 2002 and Advisor to the French Minister of Industry, in charge of energy and nuclear issues from June 1995 to May 1997. Mr. Benoit-Cattin is general manager of CGG Services and a Director of CGG Marine Resources Norge, CGG offshore UK, Ardiseis FZCO and CGGVeritas Services (Norway) AS.

Mr. Rouiller, 54, was appointed Executive Vice President for Equipment and Chief Executive Officer of Sercel in September 2005 after having served as Chief Operating Officer of the Sercel group since December 1999. Mr. Rouiller was Vice President of our Product segment from October 1995 to December 1999 and Vice President for the Asia-Pacific region from May 1992 to September 1995. Mr. Rouiller is President of the Management Board of Sercel Holding, Chief Executive Officer of Sercel SA, Director and Chief Executive Officer of Sercel Inc., President and Director of Sercel Canada, Director of the Board of Sercel Australia Pty Ltd., Sercel-JunFeng, Sercel Singapore Pte Ltd., Chairman of Sercel (Beijing) Technological Services Co Ltd. and Director of Vibration Technology Ltd. and Xian-Sercel Petroleum Exploration Instrument Limited Liability Company.

Mr. Aguilar, 48, was appointed President of the Eastern Hemisphere of the global organization effective April 1, 2008. His previous position with CGGVeritas was Executive Vice President for Canada Land Processing, Canada Land Library, and Western Hemisphere Land Acquisition, since joining the company in September, 2004. Formerly with Schlumberger, Mr. Aguilar has twenty-six years of worldwide experience on all continents in various technology, business and oilfield sectors.

Mr. Wells, 54, was appointed President of Western Hemisphere Geophysical Services in January 2007. Prior to the merger, Mr. Wells had been President and Chief Operating Officer of Veritas DGC, Inc. since 1999. He had been employed by Veritas for twenty years, having served as president of Veritas Asia Pacific division, regional manager of North and South American processing, manager of research and programming and in various other capacities in North and South America.

Compensation

The aggregate compensation of our executive officers, including the Chairman and Chief Executive Officer and our President and Chief Operating Officer, includes both a fixed element and a bonus element. The bonus due to the general management for a given fiscal year is paid during the first semester of the next fiscal year. With this bonus, the aggregate compensation may substantially vary from one year to another.

The aggregate compensation of our executive officers (including the Chairman and Chief Executive Officer and both Presidents) who were members of the Executive Committee (as described in Item 6 of our 2006 annual report on Form 20-F) paid in fiscal year 2007 was 5,807,202, including the 2007 bonus and benefits in kind but excluding directors' fees. The amount of the bonus paid to the members of the Executive Committee (except for the Chairman

and Chief Executive Officer and the Presidents, for whom additional criteria are also taken into consideration) depends upon the achievement of commercial and financial targets for items such as consolidated net income, operating income, operational cash flow (i.e. EBITDAS less Capital Expenditures) of our various activities and earnings per share. Certain individual qualitative objectives need also to be satisfied.

The aggregate compensation paid to Mr. Brunck, Chairman and Chief Executive Officer, in fiscal year 2007 was 526,860 of fixed compensation and 610,000 representing his 2006 bonus. For fiscal year 2007, the amount of his bonus

Table of Contents

depended upon the achievement of personal objectives (representing one third of the bonus) and financial objectives (representing two thirds of the bonus). The financial objectives included net earnings per share (weighted 25%), Group EBIT (weighted 25%), Group operational cash flow (i.e. EBITDAS less Capital Expenditures) (weighted 35%) and the growth in the Group's year-to-year revenues (weighted 15%). Mr. Brunck was paid his 2007 bonus of 930,057 in March 2008. In addition, Mr. Brunck received 50,038.81 in his capacity as a director in 2007.

The aggregate compensation of Mr. Thierry Le Roux, President and Chief Operating Officer, in fiscal year 2007 was 400,018 plus a bonus of 350,800 for fiscal year 2006 paid during the first semester of 2007. For fiscal year 2007, the amount of his bonus depended upon the achievement of personal objectives (representing one third of the bonus) and financial objectives (representing two thirds of the bonus). The financial objectives included net earnings per share (weighted 25%), Group EBIT (weighted 25%), Group operational cash flow (i.e. EBITDAS less Capital Expenditures) (weighted 35%) and the growth in the Group's year-to-year revenues (weighted 15%). The bonus for fiscal year 2007 was 572,343 and was paid in March 2008.

The aggregate compensation of Mr. Christophe Pettenati-Auziere, former President of Geophysical Services, in fiscal year 2007 was 313,696 plus a bonus of 267,800 for fiscal year 2006 paid during the first semester of 2007. For fiscal year 2007, the bonus of Mr. Pettenati-Auzière depended upon the achievement of personal objectives (representing half of the bonus) and financial objectives (representing half of the bonus). The financial objectives included net earnings per share (weighted 25%), Services EBIT (weighted 25%), Services operational cash flow (i.e. EBITDAS less Capital Expenditures) (weighted 35%) and the growth in the Services' year-to-year revenues (weighted 15%). The bonus for fiscal year 2007 was 176,700 and was paid in March 2008.

On March 8, 2006, the Board of Directors authorized CGG Veritas to enter into an amendment to the employment contracts of Messrs. Brunck, Le Roux and Pettenati-Auzière according to which:

in case of dismissal or change of control, a special severance indemnity representing 250% of their reference annual compensation (gross fixed salary including, if applicable, salaries paid by foreign subsidiaries over the prior 12 months and the average bonuses paid during the prior three years) would be paid; and

should they decide, in case of a change of control, to continue working for CGG Veritas, they would receive a loyalty bonus representing 150% of their reference annual compensation as defined above after the expiry of a 18-month period after change of control.

The above mentioned amendments were applied when Mr. Pettenati-Auzière left us in December 2007. On December 19, 2007, Mr. Pettenati-Auzière received an aggregate gross amount of 1,133,106 as special severance indemnity. The balance of the sums to which he was entitled as a result of the termination of his employment contract including in particular his bonus for fiscal year 2007, i.e. an aggregate gross amount of 338,189.83, was paid in March 2008. In addition, Mr. Pettenati-Auzière will also be entitled to keep the stock-options that he was allocated pursuant to our various stock-options plans currently in force (see below) but he will lose his right to receive the performance shares allocated to him pursuant to our 2006 and 2007 performance share plans.

Pursuant to section L. 225-42-1 of the French Commercial Code as modified by the law n°2007-1223 dated August 21, 2007, the Board of Directors approved on February 27, 2008, an amendment to the provisions approved on March 8, 2006 for Messrs. Brunck and Le Roux. These new provisions were approved in accordance with the procedure applicable to related party transactions and provided for by section L.225-38 and seq. of the French Commercial Code. These further amendments provide that payment of the special severance indemnity mentioned above as well as the early exercise of all stock-options, whether vested or not, that have been allocated to them pursuant to stock-options plans currently in force are heretofore subject to performance conditions assessed in comparison with our performance, on the basis of the fulfillment of at least one of the three following objectives:

a share price performance objective relative to the share price considering the SBF 120 index;

a share price performance objective relative to the ADS price considering the PHLX Oil Service Sectorsm (OSXsm);

a financial indicator objective of EBIT expressed in U.S.\$ and related to the target for the annual variable part of the compensation of Messrs. Brunck and Le Roux.

Table of Contents

Finally, in order to take into account the evolution of practices in comparable companies, the amount of the special severance indemnity noted above has been reduced from 250% to 200% of the annual compensation referenced above.

This special severance indemnity is a ceiling and is a fixed payment paid in lieu of all sums to which Messrs. Brunck and Le Roux may be entitled as a consequence of the severance, including severance payments due by law and under collective bargaining agreements, compensation in lieu of notice and pay in lieu of vacation.

These new provisions will be subject to the approval of the general meeting to be held on April 29, 2008.

A supplemental pension and retirement plan for the members of the Executive Committee and the Management Board of Sercel Holding (hereinafter referred to as the Beneficiaries) was implemented in December 2004. The Chairman and Chief Executive Officer and the Chief Operating Officer benefit from this plan (our former President of Geophysical Services who left us in December 2007 also benefited from this plan). The aggregate present benefit value of this supplemental plan as of December 31, 2007 amounts to 10,200,133 of which 593,102 has been recorded as an expense for fiscal year 2007. Of such amounts, the portions relating to the Chairman and Chief Executive Officer, the Chief Operating Officer and our former President of Geophysical Services are 7,808,882 and 405,587 respectively.

Directors as a group received aggregate compensation of 580,000 in February 2008 for services provided in their capacity as directors during fiscal year 2007. No amounts were set aside or accrued by us or our subsidiaries to provide pension, retirement or similar benefits to directors. Directors' service contracts do not provide for benefits upon termination.

The following table sets forth the amounts CGG Veritas and its subsidiaries paid to directors of CGG Veritas, in their capacity as directors, for the year ended December 31, 2007:

Name	Amount paid to CGG Veritas directors by the company or one of its subsidiaries for fiscal year 2007
Robert Brunck ⁽¹⁾	50,038.81
Olivier Appert	48,889.39
Loren Carroll	55,728.75
Rémi Dorval	52,519.56
Jean Dunand	43,016.40
Yves Lesage	51,753.28
Christian Marbach	33,639.09
	28,659.47
Thierry Pilenko ⁽²⁾	U .S.\$70,000 ⁽²⁾
Robert F. Semmens ⁽³⁾	90,831.80
Daniel Valot	36,876.95
David Work	50,958.32
Terence Young	50,958.32
Gérard Fries ⁽⁴⁾	564.93

John Macwilliams⁽⁴⁾

564.93

- (1) Mr. Brunck does not receive any compensation as member of the Supervisory Board of Sercel Holding or as Chairman of the Board of Directors of CGG Americas.
- (2) Amount paid pursuant to a consulting agreement which came into effect on January 15, 2007 between the Company and Mr. Pilenko and which was terminated on March 27, 2007.
- (3) Includes 75,831.80 paid by CGG Veritas to Mr. Semmens as a director and 15,000 paid by Sercel Holding to Mr. Semmens as a member of the Supervisory Board.
- (4) Resigned from the Board on January 9, 2007.

Table of Contents

As of March 31, 2008, our directors and executive officers held an aggregate of 27,984 ordinary shares of CGGVeritas. As of March 31, 2008, our directors and executive officers held options to purchase an aggregate of 407,025 ordinary shares and a maximum of 37,000 performance shares. As of March 31, 2008, none of our directors and executive officers held, on an individual basis, shares and options representing 1% or more of our outstanding capital.

Board Practices

Pursuant to the standards set forth in the report of the working committee of the *Association française des entreprises privées - Mouvement des entreprises de France*, to promote better corporate governance standards in listed companies (the AFEP-MEDEF Report), we believe that seven of our directors do not have any relationship with CGG Veritas, the Group or its management that could impair their freedom of judgment and thus qualify as independent. Those directors are Mr. Carroll, Mr. Dorval, Mr. Dunand, Mr. Semmens, Mr. Valot, Mr. Work and Mr. Young. We also believe that (i) the position of Mr. Semmens as a member of the Supervisory Board of our subsidiary Sercel Holding S.A. and (ii) the previous position of Mr. Carroll, Mr. Work and Mr. Young as members of the Board of Directors of Veritas do not impair their independence. Our Board of Directors reviews, on an annual basis, the qualification of directors as independent pursuant to the AFEP-MEDEF Report criteria.

The corporate governance rules of the New York Stock Exchange differ from the regulations and recommendations applicable in France, especially those governing the definition of director independence and the role and operation of the Board's committees. As a non-U.S. listed company, we are exempted from many of these corporate governance rules, which are applicable to U.S. listed companies. For example, nothing withstanding our conclusions as to independence under the AFEP-MEDEF Report, our Board has not formally determined which of our directors meet NYSE independence standards, and non-management directors do not meet regularly. Our Appointment-Remuneration Committee is not made up exclusively of independent directors, and the Board's internal charter does not address committee purposes and responsibilities in the manner specified by the NYSE rules applicable to nominating, compensation and audit committees. However, our Audit Committee members meet the independence test for audit committee members established by the SEC, and we believe that they also meet the definition of independence under the NYSE rules.

Strategic Committee

The Strategic Committee's assignment is to study:

business plans and budgets,

strategic options for the Group,

organic development, and

projects related to financial transactions.

This Committee customarily meets before each Board meeting and more often if necessary. During 2007, the Strategic Committee met seven times. The average meeting attendance rate of committee members was close to 93%.

In 2007, the Committee was kept regularly informed of the integration process further to the merger of CGG and Veritas.

The Committee was also consulted regarding (i) issues linked to the Group's indebtedness and its tax location, (ii) the acquisition of a 15% interest in Offshore Hydrocarbon Mapping plc (OHM), (iii) the agreement between us and Eidesvik Offshore for the supply of two high capacity vessels to be newly built and operated by the Group under a twelve-year charter agreement, (iv) investments to be implemented for WAZ surveys, (v) building of the new executive offices of our subsidiary CGG Services, (vi) our seismic fleet renewal plan, (vii) the Group legal organization, and (viii) the draft resolutions to be submitted to the 2008 annual general meeting.

Table of Contents

Audit Committee

The Audit Committee is chaired by Mr. Dunand. The other members are Mr. Carroll, Mr. Dorval, Mr. Lesage, and Mr. Valot. The Audit Committee is responsible for assisting the Board of Directors and undertaking preparatory work for the Board, particularly by reviewing our financial statements with management and our statutory auditors.

Responsibilities

The principal responsibilities of the Audit Committee are as follows:

Reviewing and discussing with management and our statutory auditors the consistency and appropriateness of the accounting methods we adopt to prepare our corporate and consolidated financial statements including:

Reviewing and discussing with management and the statutory auditors the consolidation perimeter and requesting, when necessary, all appropriate explanations;

Reviewing and discussing with management and the statutory auditors our draft annual, semi-annual and quarterly financial statements together with the notes to them, and especially off-balance sheet arrangements;

Reviewing and discussing with management and the statutory auditors the quality, comprehensiveness, accuracy and sincerity of the financial statements;

Receiving reports from the statutory auditors on their review, including any comments and suggestions they may have made in the scope of their audit; and

Raising any financial or accounting question that the Committee deems important.

Reviewing our annual report on Form 20-F and our *Document de Référence* .

In consultation with the statutory auditors, the internal auditors and management, reviewing the structure of our internal control procedures and the way in which they operate, notably those procedures relating to the preparation and treatment of accounting and financial information used to prepare our financial statements, to assess and manage risks and to comply with the principal regulations applicable to us. The Committee reviews the comments and observations made by the statutory auditors on internal control procedures.

With respect to internal audit, reviewing and discussing with management particularly:

its organization and operation, and

its activities and in particular the responsibilities proposed in the scope of the internal audit plan approved by the general management and presented to the Committee.

Reviewing and discussing with management and, when appropriate, the statutory auditors the transactions directly or indirectly binding us and our executive officers.

With respect to external audit:

Reviewing and discussing with the statutory auditors their annual audit plan;

Meeting, if necessary, with the statutory auditors outside the presence of management;

Ensuring the independence of the statutory auditors by managing the procedure for selection of the auditors. The Committee submits its choice to the Board of Directors, which, pursuant to law, must submit appointment of auditors to the vote at a shareholders' meeting;

Discussing as appropriate the extent and results of the audit work with the statutory auditors and management and reviewing the amount of auditors' fees regularly with management. Within the framework of a procedure that it determines annually, the Committee has sole authority to authorize performance by the auditors and/or by the members of their network of non-audit services.

Table of Contents

Overseeing the anonymous handling of any report concerning a possible internal control problem or any problem of an accounting or financial nature.

Finally, our management must report to the Committee any suspected fraud of a significant amount so that the Committee may proceed with any verification that it deems appropriate.

Sessions of the Audit Committee are open to the members of the Executive Committee, including the Chief Financial Officer, the external auditors (in order to report on their audit reviews) and the Senior Vice-President, Corporate Internal Audit (in order to review important assignments).

The Audit Committee meets before each Board meeting. In addition, the members of the Audit Committee are systematically invited to attend Strategic Committee meetings. During 2007, the Audit Committee met eight times. The average meeting attendance rate of committee members was close to 85%.

2007 Activities

In 2007, the Audit Committee reviewed draft versions of the annual consolidated financial statements for 2006, the financial statements for the first quarter, the first semester and the third quarter of 2007 before these were presented to the Board. It reviewed the 2007 forecasts, the 2008 budget and the 2008-2010 business plan. The Audit Committee also provided to the Board its recommendations concerning these financial statements. The audit committee reviewed the annual report on Form 20-F and the *Document de Référence*. Finally, it was also presented with the project to reduce the financial statements closing time-period in 2007.

The Audit Committee also examined the renewal of the term of both external auditors. It examined the work to be performed by the statutory auditors in the scope of their audit on the 2007 financial statements and approved their fee estimates for this work. In compliance with the Audit Committee's procedures providing for its prior approval of non-audit services provided by the members of our auditors' network, the Audit Committee reviewed the services so performed in 2007 and approved them as necessary.

The Audit Committee reviewed the activities of the internal audit team, which acts on the basis of a plan established by the Executive Committee and presented to the Audit Committee. This plan is established in light of perceived operational and financial risks and with the goal of systematically reviewing the major entities of each business division every three years.

The Audit Committee was also kept regularly informed on the development of the assessment of internal control procedures pursuant to section 404 of the Sarbanes-Oxley Act of 2002 and of the results thereof. The external auditors and the internal audit function presented their respective conclusions.

Appointment-Remuneration Committee

The principal responsibilities of the Appointment-Remuneration Committee are as follows:

the compensation to be paid to the Chairman and the President or Presidents, including the procedures for setting the variable part thereof and the grant of possible benefits in kind;

all provisions relative to the retirement of the Chairman and the President or Presidents;

establishment of stock option plans and allocation of performance shares;

realization of capital increases reserved for the employees; and

possible candidacies for filling director's positions, positions as CEO or positions as members of a Board Committee.

In 2007, this Committee met nine times.

The Committee met to decide on (i) the remuneration of the Chairman and Chief Executive Officer and of the two Presidents (ii) the policy governing allocation of performance shares and stock-options within the Group, (iii) the draft resolutions to be submitted to the general annual meeting concerning the allocation of stock options

Table of Contents

and performance shares and the final allocation of these options and shares to the Company's employees and (iv) the implementation of the evaluation process of the Board and of the Chairman and Chief Executive Officer.

Technology Committee

The principal responsibilities of the Technology Committee are to assist the Board of Directors with respect to:

the Group's development strategy in reservoir imaging, seismic and opportunities in other oilfield services and products;

the main development programmes in services and equipment;

the technology offer from competitors and other oil service companies; and

the research and development budgets.

The Technology Committee usually meets twice a year. In 2007, the Technology Committee met twice with an attendance rate of 87.5%. During these meetings, the Committee reviewed the last technological developments of the Services and Equipment segments and the Group research and development plan. Certain specific technological projects were also presented to the Committee.

Employees

As of December 31, 2007, we had 8,109 permanent employees worldwide (excluding 14 temporary staff in France), as well as several thousand auxiliary field personnel on temporary contracts. Of the total, 6,033 were involved in the Services segment and 2,076 in the Equipment segment. CGGVeritas has never experienced a material work stoppage and considers its relations with its employees to be good. CGGVeritas permanently employs more than 5,000 technicians and persons holding engineering degrees and has developed a significant in-house training program.

Our total workforce has increased from 7,338 (pro forma) at December 31, 2006 to 8,109 at December 31, 2007. This increase in the size of our workforce is mainly attributable to the growth of our geophysical product and service activities. We are preparing for the future by improving recruitment programs and our management training program, and by putting increased emphasis on strengthening the technical and personal skills of our employees. On a seasonal basis we experience higher headcount and revenues during the second and third fiscal quarters, coinciding with the winter seismic acquisition seasons in Alaska and Canada. However, performance of large land surveys in South America or other locations can cause a marked shift from this pattern. A total of 31 employees in Singapore are subject to collective bargaining agreements.

In accordance with French law for employees employed under French contracts, we and each of our French subsidiaries have an Employee Representation Committee (*Comité d'Entreprise*) consisting of representatives elected by our employees. The Employee Representation Committee reports regularly to employees, represents employees in relations with management, is consulted on significant matters relating to employee working conditions and is regularly informed of economic developments.

Share Ownership

In accordance with French law, we are authorized annually by our shareholders at the extraordinary general meeting to issue ordinary shares for sale to our employees and employees of our affiliates who elect to participate in our Group Employee Savings Plan (*Plan d'Epargne Entreprise Groupe*) instituted in 1997 (the "Group Plan"). Our shareholders, at

the extraordinary general meeting held on May 10, 2007, renewed our authorization to issue up to 750,000 ordinary shares in sales to employees and affiliates who participate in the Group Plan. We may offer ordinary shares pursuant to the Group Plan at a price neither higher than the average market price for the 20 business days preceding the date on which the Board of Directors set the commencement date for the offering, nor lower than 80% of such average market price. As of December 31, 2007, CGGVeritas group employees held 16,550 shares corresponding to 0.06% of the share capital and 0.12% of the voting rights.

Table of Contents

Pursuant to resolutions adopted by our Board of Directors on March 14, 2001, May 15, 2002, May 15, 2003, May 11, 2006, March 23, 2007 and March 14, 2008, our Board of Directors has granted options to certain of our employees, executive officers and directors to subscribe for an aggregate of 1,265,950 ordinary shares. This total has been adjusted pursuant to French law and the terms of the options to a total of 1,323,762 options. Options with respect to 874,829 ordinary shares remained outstanding as of March 31, 2008. The following table sets forth certain information relating to these stock options plans as of March 31, 2008:

Date of board of directors resolution	Options initially granted	Options exercised (ordinary shares) at March 31, 2008	Options outstanding at March 31, 2008	Exercise price per ordinary share⁽¹⁾	Expiration date
March 14, 2001 ⁽¹⁾⁽⁴⁾	256,000	118,203	70,508 ⁽²⁾	65.39	March 13, 2009
May 15, 2002 ⁽¹⁾⁽⁵⁾	138,100	43,178	52,028 ⁽²⁾	39.92	May 14, 2010
May 15, 2003 ⁽¹⁾⁽⁶⁾	169,900	23,559	72,404 ⁽²⁾	14.53	May 14, 2011
May 11, 2006 ⁽⁷⁾	202,500	2,500	191,739 ⁽²⁾	131.26	May 10, 2014
March 23, 2007 ⁽⁸⁾	261,750	0	250,450 ⁽³⁾	151.98	March 23, 2015
March 14, 2008 ⁽⁹⁾	237,700	0	237,700 ⁽³⁾	162.82	March 14, 2016
Total	1,265,950	187,440	874,829		

- (1) Pursuant to French law and the terms of the stock option plans, the numbers of options granted and the exercise price were adjusted following our share capital increase in December 2005.
- (2) The stock option plans provide for the cancellation of the non vested options if the holder is no longer our employee, director or executive officer.
- (3) The stock option plans provide for the cancellation of the options whether vested or not if the holder is no longer our employee, director or executive officer.
- (4) Options under the 2001 plan vest by one-fifth each year from March 2001 and could not be exercised before March 14, 2004.
- (5) Options under the 2002 plan vest by one-fifth each year from May 2002 and could not be exercised before May 16, 2005.
- (6) Options under the 2003 plan vest by one-fourth each year from May 2003 and could not be exercised before May 16, 2006.
- (7) Options under the 2006 plan vest by one-fourth each year from May 2006 and can be exercised at any time. However the resulting shares cannot be sold before May 12, 2010.

- (8) Options under the 2007 plan vest by one-third each year from March 2007 and can be exercised at any time. However the resulting shares cannot be sold by French tax residents before March 24, 2011.
- (9) Options under the 2008 plan vest by one-third each year from March 2008 and can be exercised at any time. However the resulting shares cannot be sold by French tax residents before March 15, 2012.

At the extraordinary general shareholders meeting held on May 10, 2007, a new stock option plan was approved by shareholders whereby options to purchase up to 5% of our share capital outstanding on the date of allocation may be granted in one or several allocations by the Board of Directors to certain of our employees and executive officers during the 38-month period following the plan's approval. The Board has allocated 237,700 stock options pursuant to such shareholders' resolution on March 14, 2008.

At the extraordinary general shareholders meeting held on May 11, 2006, a performance share plan was approved by shareholders whereby performance shares up to 1% of our share capital outstanding on the date of allocation may be granted in one or several allocations by the Board of Directors to certain of our employees and executive officers during the 38-month period following the plan's approval. The Board has allocated an aggregate of 226,800 performance shares pursuant to such shareholders' resolution on May 11, 2006, March 23, 2007 and March 14, 2008, respectively.

Table of Contents

The stock-options and performance shares allocated to Mr. Brunck, Chairman and Chief Executive Officer, Mr. Le Roux, Chief Operating Officer, and Mr. Pettenati-Auziere, President Geophysical Services, under the plans implemented by the Company over the last three years are set forth below:

For Robert Brunck:

Plans	Stock-options	Performance shares^(*)
Plan dated March 23, 2007	40,000	4,000
Plan dated May 11, 2006	30,000	2,500
2005	N/A	

(*) subject to performance conditions based on objectives of net earning per share and operating income set by the Board of Directors

For Thierry Le Roux:

Plans	Stock-options	Performance shares^(*)
Plan dated March 23, 2007	25,000	2,500
Plan dated May 11, 2006	17,500	1,750
2005	N/A	

(*) subject to performance conditions based on objectives of net earning per share and operating income set by the Board of Directors

For Christophe Pettenati-Auziere:

Plans	Stock-options	Performance shares^(*)
Plan dated March 23, 2007	17,500	1,750
Plan dated May 11, 2006	17,500	1,750
2005	N/A	

(*) subject to performance conditions based on objectives of net earning per share and operating income set by the Board of Directors

Pursuant to article L.225-197-1 of the French Commercial Code, for the stock-options and performance shares plans implemented on March 23, 2007 and March 14, 2008, the Board of Directors set at 10% of each individual allocation (i) the number of shares resulting from the exercise of stock options and (ii) the number of performance shares thus

attributed which they will have to keep in registered form until the end of their respective terms.

Table of Contents**Item 7: PRINCIPAL SHAREHOLDERS****Major Shareholders**

The table below sets forth certain information with respect to entities known to us or ascertained from public filings to beneficially own a significant percentage of our voting securities as at March 31, 2008 and December 31, 2007, 2006 and 2005.

	March 31, 2008		2007		December 31, 2006		2005	
	% of shares	% of voting rights	% of shares	% of voting rights	% of shares	% of voting rights	% of shares	% of voting rights
Identity of Person or Group								
Fidelity International Limited	3.29	3.14	3.30	3.15	10.36	9.59	10.31	9.50
Morgan Stanley	2.72	2.59	2.72	2.59	5.16	4.48		
Institut Français du Pétrole Public	4.76	9.08	4.77	9.10	7.73	14.32	8.21	15.13
	89.23	85.19	89.15	88.19	76.75	71.31	81.48	75.37

Our *statuts* provide that each ordinary share that is fully paid and has been held in registered form by the same shareholder for a period of at least two consecutive years will entitle such shareholder to two votes at meetings of shareholders. As of March 31, 2008, IFP had held 1,308,122 fully paid ordinary shares in registered form for two consecutive years, giving IFP 9.08% of the voting power of the outstanding ordinary shares as at such date. Other than in this respect, our ordinary shares carry identical voting rights. Our *statuts* provide that fully paid ordinary shares may be held in either registered form or bearer form at the option of the shareholder. Substantially all ordinary shares held by shareholders other than IFP are presently held in bearer form.

In connection with the Veritas merger, we issued 9,215,845 ordinary shares (out of which 4,202 shares were subsequently cancelled since they had been issued in excess of merger consideration) that were deposited with The Bank of New York Trust as ADS depository, which issued 46,079,225 ADSs to be paid as merger consideration to former holders of Veritas common stock.

On February 1, 2007, we issued 108,723 ordinary shares that were deposited with The Bank of New York as ADS depository, which issued 543,614 ADSs to a holder of U.S.\$6.5 million in principal amount of Veritas convertible senior notes due 2024 that delivered a conversion notice on January 19, 2007.

On March 1, 2007, we issued 301,079 ordinary shares that were deposited with The Bank of New York as ADS depository, which issued 1,505,393 ADSs to a holder of U.S.\$18 million in principal amount of Veritas convertible senior notes due 2024 that delivered a conversion notice on February 23, 2007.

The terms of our U.S.\$85 million convertible bonds due 2012 were amended by the our general meeting of bondholders held on November 2, 2005, as approved by a general meeting of our shareholders held on November 16, 2005 in order to provide bondholders with the opportunity to redeem their convertible bonds before maturity and

receive an additional cash payment. The early conversion period was open from November 17 to November 18, 2005, inclusive. At the conclusion of the conversion period, 11,475 convertible bonds due 2012 were converted, leading to the issuance of 1,147,500 new shares. 2,525 convertible bonds remain outstanding with a nominal value of U.S.\$15.3 million. We paid a total premium of U.S.\$10.4 million to our bondholders who converted their bonds.

A general meeting of bondholders, held on April 5, 2006, and a general meeting of our shareholders, held on May 11, 2006, approved a change to the terms and conditions of the remaining convertible bonds to grant bondholders a right to receive a cash payment upon immediate conversion of the bonds. The early conversion period was open on May 12, 2006 only. At the conclusion of the conversion period, all the remaining 2,525 convertible bonds were converted, leading us to issue of 274,914 new shares and pay a total premium of U.S.\$2.1 million to the converting bondholders.

On December 16, 2005, we completed a share capital increase by way of preferential subscription rights. We issued 4,099,128 new shares of our common stock bearing rights from January 1, 2005, bringing our total share capital at that date to 17,079,718 ordinary shares, par value 2 per share. We used the net proceeds to repay

Related Party Transactions

Louis Dreyfus Armateurs (LDA) provides ship management services for a portion of our fleet. Charter party contracts associated with these services are concluded at arm's length. Accounts payable to LDA were 0.2 million at December 31, 2007. Total net charges paid during the year for the provision of ship management services amounted to 6.5 million, and the future commitments for such services to LDA were 54.8 million.

LDA is the owner, together with the Group, of Geomar, owner of the seismic vessel *Alizé*. Geomar is fully consolidated. Geomar provides vessel charter services to LDA. Charter party contracts associated with these services are concluded at arm's length. Total net revenues received during the year for the provision of vessel charter services amounted to 8.2 million (2.1 million for the period starting from April 1, 2007 when Geomar was fully consolidated).

For the year ended December 31, 2007, sales of geophysical equipment to Argas, which is 49% owned by the Group, from Sercel amounted to 25.5 million, representing approximately 1% of our revenues.

For the year ended December 31, 2007, sales of geophysical equipment to JV Xian Peic/Sercel Limited, which is 40% owned by the Group, from Sercel amounted to 4.2 million, representing less than 1% of our revenues.

For the year ended December 31, 2007, purchases of geophysical equipment to Tronic s, which is 16% owned by the Group, from Sercel amounted to 8.3 million.

For the year ended December 31, 2007, purchases of geophysical equipment to Cybernetix, which is 32% owned by the Group, from Sercel amounted to 1.1 million.

Consolidated Statements and Other Financial Information

Reference is made to Item 18 for a list of all financial Statements and notes thereto filed as a part of this annual report.

Item 9: THE OFFER AND LISTING

Offer and Listing Details

The trading market for our ordinary shares is Euronext Paris S.A., where the ordinary shares have been listed since 1981. American Depositary Shares, or ADSs, representing ordinary shares have been traded on the New York Stock Exchange since May 1997. Each ADS represents one-fifth of one ordinary share. The ADSs are evidenced by American Depositary Receipts, or ADRs, issued by The Bank of New York, as Depositary, and are traded under the symbol CGV . The Bank of New York has advised us that as of March 31, 2008, there were 15,377,775 ADSs

outstanding, representing 3,075,555 ordinary shares, which are held of record by five registered holders. On the basis of this information, the ADSs held on such date in the United States represented approximately 11.20% of our outstanding ordinary shares. Our by-laws provide that fully paid ordinary shares may be held in either registered or bearer form at the option of the shareholder.

Trading on Euronext Paris

Official trading of listed securities on Euronext Paris is transacted through stockbrokers and other financial intermediaries, and takes place continuously on each business day from 9:00 a.m. through 5:25 p.m., with a pre-opening session from 7:15 a.m. through 9:00 a.m. during which transactions are recorded but not executed. Any trade effected after the close of a stock exchange session is recorded, on the next Euronext Paris trading day, at the closing price for the relevant security at the end of the previous day's session. Euronext Paris publishes a daily Official Price List that includes price information concerning listed securities. Euronext Paris has introduced continuous trading during trading hours by computer for most listed securities. Shares listed on Euronext Paris are

Table of Contents

placed in one of three categories depending on the issuer's market capitalization. Our outstanding ordinary shares are listed on Euronext Paris in the category known as Continu, which includes the most actively traded shares.

Item 10: ADDITIONAL INFORMATION

Share Capital

Not applicable.

Memorandum and By-laws

Our company is a *société anonyme*, a form of limited liability company, established under the laws of France, and we are registered with the Trade Register of Paris, France under the number 969 202 241 RCS Paris. Our financial year begins on January 1 and ends on December 31 of each calendar year. The following paragraphs set forth information concerning our share capital and provide related descriptions of certain provisions of our by-laws (*statuts*), and applicable French law. This information and description do not purport to be complete and are qualified in their entirety by reference to our by-laws.

Object and Purposes

Under Article 2 of our *statuts*, our object is:

to develop and operate, in any form and under any conditions whatsoever, any and all businesses relating to the geophysical surveying of soil and subsoil in any and all countries, on behalf of third parties or ourselves;

to participate directly or indirectly in any business, firm or company whose object would be likely to promote our object; and

generally, to engage in any commercial, industrial, mining, financial, personal or real property activities relating directly or indirectly to the above objects without limitation or reserve.

Directors

For a further description of the Board of Directors powers under French law and our *statuts*, see Item 6: Directors, Senior Management and Employees.

Table of Contents

Transaction with Interested Directors

French corporate law provides for prior approval and control of transactions entered into between, directly or indirectly, us and our directors, Chief Executive Officer, Chief Operating Officer and, or any entity in which any of these persons is at the same time an owner, partner with unlimited liability, managing director, member of the supervisory board or an executive officer, unless the transaction is entered into in the ordinary course of business and under normal terms and conditions. Transactions entered into between us and one of our shareholders who holds, directly or indirectly, more than 10% of our voting rights, or with an entity controlling such a shareholder, are also considered related party transactions requiring the prior approval of our board of directors.

The interested party has the obligation to inform our board of directors as soon as it is aware of the existence of the related party transaction, and a majority of our disinterested directors must approve the transaction.

If a related party transaction is pre-approved by the majority of our disinterested directors, our chairman must then report the authorized transaction to our statutory auditors within one month following the entering into of this transaction. The auditors must then prepare a special report on the transaction to be submitted to our shareholders at their next general meeting, during which our shareholders would consider the transaction for ratification (any interested shareholder would be excluded from voting). If the transaction is not ratified by the shareholders, such absence of ratification would normally and except in the case of fraud have no impact on the validity of the transaction, but the shareholders may in turn hold the board of directors or interested representative of the company liable for any damages suffered as a result thereof.

Any related party transaction concluded without the prior consent of a majority of our disinterested directors can be voided by a court, if we incur a loss as a result. In addition, an interested related party may be held liable on this basis.

Power to Decide Upon the Compensation of Directors, Chairman and Chief Executive Officer

Under our *statuts*, the shareholders' meeting may provide for the payment to the directors of an annual fixed sum for their attendance at board meetings (*jetons de présence*). The amount of such compensation remains unchanged until further decision by the shareholders' meeting. The Board of Directors allocates this amount between its members in the manner it deems appropriate.

Under our *statuts*, the Board of Directors has authority to determine the compensation of its chairman as well as of its Chief Executive Officer, and Chief Operating Officer.

Borrowing Powers Exercisable by the Directors

Under French company law and our *statuts*, directors other than legal entities are forbidden to take out loans from CGG Veritas in any form whatsoever or to have CGG Veritas grant them an overdraft in current account or otherwise. It is also forbidden to have CGG Veritas stand as surety for them or back their commitments in respect of third parties. This prohibition also applies to chief operating officers and to permanent representatives of legal-entity directors. It also applies to the spouses, lineal forebearers or descendants of the persons referred to in this paragraph and also to any trustee.

Also, under article L.225-43 of the French Commercial Code, directors and executive officers may not borrow money or obtain a guarantee from the company. Any such loan or guarantee would be void and may not be relied upon by third parties.

Retirement of Directors Under an Age Limit Requirement

Under our *statuts*, the Chairman of the Board's term of office ends, at the latest, after the annual Ordinary Shareholders Meeting following the date on which he reaches the age of 65. However, the Board of Directors may further extend the office of the Chairman, one or more times for a total period not to exceed three years. Our *statuts* also provide that when the offices of Chairman and Chief Executive Officer are held by the same person, the Chief Executive Officer's term of office ends on the same date as that of the Chairman. In accordance with article L.225-19 of the French Commercial Code, no more than one-third of the members of the Board of Directors may be more than

Table of Contents

70 years old, unless the *statuts* of the company provide otherwise. Our *statuts* do not contain any provisions contrary to this limitation.

Number of Shares Required for a Director's Qualification

Under our *statuts*, throughout his term of office, each director must own at least one share. Nevertheless, the internal regulations of the Board provides that each director owns at least one hundred shares of the company.

Share Capital

As of March 31, 2008, our issued share capital amounts to 54,935,280 divided into 27,467,640 shares of the same class with a nominal value of 2 per share. The shares are fully paid. Pursuant to our *statuts*, fully paid shares may be held either in registered or in bearer form at the option of the shareholder. The *statuts* also allow us to avail ourselves of a procedure known as *titres au porteur identifiables* by which we may request Euroclear France to disclose the name, nationality, address and the number of shares held by the holders of any of our securities which have, or may in the future have, voting rights. See Form, Holding and Transfer of Shares.

Dividend and Liquidation Rights

We may only distribute dividends out of our distributable profits, plus any amounts held in our reserve which the shareholders decide to make available for distribution, other than those reserves which are specifically required by law. Distributable profits consist of our unconsolidated net profit in each fiscal year, as increased or reduced by any profit or loss carried forward from prior years, less any contributions to the reserve accounts pursuant to law.

Under French law, before dividends may be paid with respect to any fiscal year, we must contribute a minimum of 5% of our annual unconsolidated net income to a legal reserve fund, until it reaches an amount equal to 10% of our outstanding share capital. The legal reserve is distributable only upon our liquidation.

Our *statuts* provide that the general shareholders' meeting, either on a recommendation from the board of directors or on its own initiative, may allocate all or part of our distributable profits, if any, to one or more special or general reserves or to keep such profits as retained earnings to be carried forward to the next fiscal year. Any remaining distributable profits are distributed to shareholders as dividends in proportion to their holdings. However, except in the case of a decrease in share capital which aims to offset losses, no distribution may be made to shareholders when the shareholders' equity is or would become, as a result of the distribution, less than the amount of the share capital increased by amounts held in reserve accounts pursuant to law. The methods of payment of dividends are determined by the annual general meeting of shareholders or by the board of directors in the absence of a decision by the shareholders. According to our *statuts*, the general meeting has the power to give each shareholder the option of receiving all or part of its dividend payment in either cash or shares.

If we have earned distributable profits since the end of the preceding fiscal year, as shown on an interim income statement certified by our auditors, the board of directors has the authority, without the approval of shareholders, to distribute interim dividends to the extent of such distributable profits for the period covered by the interim income statement.

Subject to the statement above regarding interim dividends, the payment of dividends is fixed at the ordinary general meeting of shareholders at which the annual accounts are approved, upon the recommendation of the board of directors. Under French law, dividends are normally distributed to shareholders in proportion to their respective holdings. Dividends are payable to all holders of shares, except for treasury stock, issued and outstanding on the date of the shareholders' meeting approving the distribution of dividends or, in the case of interim dividends, on the date of

the board of directors meeting approving the distribution of interim dividends. We must make annual dividend payments within nine months of the end of our fiscal year, unless otherwise authorized by a court order. Dividends not claimed within five years of the date of payment revert to the French State.

Our Board of Directors may, at any time and for any reason, propose to an extraordinary general meeting of shareholders the early dissolution of the company and we may be placed in liquidation in compliance with the relevant provisions of the French company law. If the company is liquidated, those of its assets remaining after payment of our debts, liquidation expenses and all of our remaining obligations will be distributed first to repay in

Table of Contents

full the nominal value of the shares, and the surplus, if any, will be distributed among the shareholders in proportion to the nominal value of their shareholdings.

Changes in Share Capital

Increases in the Share Capital

We may increase our share capital either:

by issuing additional shares (either ordinary or preferred shares) or securities giving access, immediately or in the future, to a portion of our share capital; or

by increasing the nominal value of our existing shares.

We may issue additional shares:

for cash;

for assets contributed in kind;

upon the conversion of preferred shares, debt securities or other debt instruments previously issued;

upon the conversion of ordinary shares into preferred shares;

as a result of a merger or a split;

by the capitalization of reserves, retained earnings or issuance premiums;

for cash credits payable by the company; or

for any combination of the preceding items.

We may increase our share capital only with the approval of the shareholders at an extraordinary general meeting, following a report of the Board of Directors. However, when a capital increase takes place through capitalization of reserves, retained earnings or issuance premiums, the general meeting at which the decision to increase the capital is taken follows the quorum and majority requirements of ordinary general meetings. Increases effected by an increase in the nominal value of shares require unanimous approval of the shareholders, unless effected by capitalization of reserves, retained earnings or issuance premiums. See Attendance and Voting at Shareholders Meetings.

The shareholders may delegate to the Board of Directors (i) the decision to increase the share capital or (ii) after authorizing the increase in share capital, the right to carry out any such increase. The Board of Directors may further delegate this right to the chief executive officer. Each time the shareholders decide on a share capital increase or decide to delegate to the Board of Directors the decision to increase the share capital or the right to carry out a capital increase, they must also determine in a separate resolution whether or not to proceed with a capital increase reserved for employees of the company and its subsidiaries or whether to delegate to the Board of Directors the right to carry out such reserved capital increase.

At a meeting held on May 10, 2007 our shareholders authorized the Board of Directors to increase our share capital, through one or more issuances of securities, by an additional aggregate nominal amount of up to 54,000,000. This

authorization is effective for a period not to exceed 26 months. Our shareholders have preferential rights to subscribe for such the additional securities. (see Item 7: Principal Shareholders Identity of Person or Group).

Decreases in Share Capital

An extraordinary general meeting of shareholders also has the power to authorize and implement a reduction in share capital which may be effected either:

by decreasing the nominal value of our outstanding shares; or

by reducing the number of our outstanding shares.

Table of Contents

The number of outstanding shares may be reduced either by an exchange of shares or by the repurchase and cancellation of shares.

According to French company law, any decrease in our share capital requires approval by the shareholders entitled to vote at an extraordinary general meeting. In the case of a capital reduction, other than a reduction to absorb losses and a reduction pursuant to a program of acquisition of shares, all holders of shares must be offered the possibility to participate in such a reduction. See Acquisition of our own Shares . All holders of shares in a given class of shares must be treated equally unless each affected shareholder agrees otherwise. Our creditors may oppose a capital reduction during the 20-day period following the registration with the Registry of Commerce of the minutes of the shareholders meeting approving the capital reduction. Upon a creditor's request, the *Tribunal de Commerce* may order us to reimburse our creditors or guarantee our debt.

Preferential Rights to Subscribe

According to French law, our current shareholders have preferential rights on a pro rata basis to subscribe (*droit préférentiel de souscription*) for any issue of additional shares to be subscribed in cash or by set-off of cash debts and to subscribe to any issue of other securities which may either directly or indirectly result in, or carry rights to subscribe for, additional shares issued by us. An extraordinary shareholders meeting may decide to withdraw the shareholders preferential right to subscribe, either in respect of any specific issue of securities, or more generally, with respect to an authorization by the extraordinary general meeting, to issue shares or other equity securities, for a duration not to exceed 26 months or 18 months in the case of an authorization given for an issue of securities to identified persons or categories of persons. Shareholders may also individually waive their preferential right to subscribe in respect of any offering. French law requires that the Board of Directors and our independent auditors present reports that specifically address any proposal to waive preferential subscription rights. In the event of a waiver, the issue of securities must be completed within the period prescribed by law. Preferential rights to subscribe, if not previously waived, are tradable during the subscription period relating to a particular offering of shares and may be quoted on Euronext Paris. In the event that the preferential rights of shareholders are withdrawn, the shareholders meeting has the power to grant, or to authorize the Board of Directors to grant, existing shareholders a non-transferable priority right (*délai de priorité*) to subscribe for new shares issued during a minimum period of three trading days.

Attendance and Voting at Shareholders Meetings

General

In accordance with French law, general shareholders meetings may be ordinary or extraordinary. Ordinary general meetings of shareholders are required for matters such as:

the election, replacement and removal of directors;

the appointment of statutory auditors;

the approval of annual accounts;

more generally, all decisions which do not require the approval of the extraordinary general meeting of the shareholders; and

the declaration of dividends or the authorization for dividends to be paid in shares.

Extraordinary general meetings of shareholders are required for approval of all matters and decisions involving:

changes in our *statuts* (including changing our corporate purposes);

increasing or reducing our share capital;

change of nationality of the company, subject to certain conditions as described in article L.225-97 of the French Commercial Code;

extending or abridging the duration of the company;

Table of Contents

mergers and spin-offs;

creation of a new class of shares;

issuance of debt securities;

authorization of notes or other securities giving access, immediately or in the future, to a portion of our share capital;

transformation of our company into another legal form; and

voluntary liquidation of our company before the end of its statutory term.

Annual Ordinary Meetings

Our Board of Directors must convene the annual ordinary general meeting of shareholders each year for approval of the annual accounts. This meeting must be held within six months of the end of our fiscal year, unless such time is extended by an order of the President of the *Tribunal de Commerce* pursuant to a request. Other ordinary or extraordinary meetings may be called at any time during the year. Meetings of shareholders may be convened by the Board of Directors or, in the circumstances prescribed by law, if the Board of Directors fails to call such a meeting, by our statutory auditors or by an administrator appointed by the President of the *Tribunal de Commerce* or by a shareholder holding the majority of the share capital or voting rights following a public offer or the transfer of a block trade. Any of the following may request the President of the *Tribunal de Commerce* to appoint an administrator:

one or several shareholders holding in the aggregate at least 5% of our share capital;

any interested parties in cases of emergency;

the workers' committee in case of emergency; or

an association of holders of shares who have held the shares in registered form held for at least two years and holding, in the aggregate, at least 1% of our voting rights.

Notice of Shareholders' Meetings

French law requires that a preliminary notice (*avis de réunion*) of a general meeting of a listed company be published in the *Bulletin des Annonces Légales Obligatoires* (BALO) at least 35 days before the date set for the meeting. A copy of the preliminary notice must first be sent to the *Autorité des marchés financiers* (the AMF), the self-regulatory organization that has general regulatory authority over the French regulated exchanges, with an indication of the date of its publication in the BALO. The preliminary notice of a general meeting must state the details of the company and information about the voting process and the meeting, the matters to be discussed at the meeting and the draft of the resolutions to be discussed. The agenda of the meeting and the draft of the resolutions to be discussed, such as described in the preliminary notice, may be modified between the date of publication of the preliminary notice and that of the publication of the notice actually calling the general meeting (*avis de convocation*). From the date of publication until 25 days before the date of the general meeting (or within 20 days from the date of publication if publication takes place more than 45 days before the date of the general meeting), additional resolutions to be submitted for approval by the shareholders at the meeting may be proposed to the Board of Directors by:

one or more shareholders holding, in the aggregate, a certain percentage of our share capital (0.5% to 4% determined on the basis of a statutory formula relating to capitalization); or

a duly authorized association of shareholders who have held their shares in registered form for at least two years and holding, in the aggregate, at least 1% of our voting rights.

The Board of Directors must submit these resolutions to a vote of the shareholders.

At least 15 days before the date set for any general meeting on first call, and at least six days before any second call, we must send a notice (*avis de convocation*) by mail to all holders of registered shares who have held such

Table of Contents

shares for more than one month prior to the date of the notice. Notice of the meeting must also be given by publication in a journal authorized to publish legal announcements in the local administrative department (*département*) in which we are registered as well as in the BALO, with prior notice having been given to the AMF. Such a notice must include the details of the company, as well as a description of the type, agenda, place, date and time of the meeting and other information about the voting process. With the sole exception of removal and replacement of directors (which may be discussed at any meeting), any matter which does not appear on the agenda may not be discussed at the meeting.

Attendance and Voting at Shareholders Meetings

Attendance and exercise of voting rights at both ordinary and extraordinary general meetings of shareholders are subject to certain conditions. A shareholder does not need to have a minimum number of shares in order to be able to attend or be represented at an extraordinary general meeting. Any statutory provision to the contrary is null and void. In order to participate in any general meeting, a holder of registered shares must have paid up its shares and have its shares registered in his name or in the name of the accredited financial intermediary referred to in article L. 228-1 of the French Commercial Code in a shareholder account maintained by us or on our behalf three business days prior to the meeting. Similarly, a holder of bearer shares must obtain from the accredited financial intermediary (*intermédiaire financier habilité*) with whom such holder has deposited its shares a statement of holdings and send it to the location specified in the notice of the meeting three business days before the meeting convenes.

Proxies and Votes by Mail

Subject to the foregoing, all shareholders have the right to participate in general meetings, either in person, by a proxy or by mail and, subject only to any applicable laws, may vote according to the number of shares they hold. Proxies may be granted by a shareholder to:

his or her spouse;

another shareholder;

in the case of a non-French resident person, to the relevant intermediary;

in the case of a corporation, to a legal representative;

in the case of an employee, to the representative of the shareholding employees pursuant to article L.225-106 of the French Commercial Code.

Alternatively, the shareholder may send us a blank proxy without nominating any representative.

In the last case, the chairman of the shareholders meeting will vote the shares with respect to which such blank proxy has been given in favor of all resolutions proposed by the board of directors and against all others. We will send proxy forms to any shareholder on request, provided such request is received by the company at least six days before the date of the relevant general meeting. In order to be counted, we must receive proxy forms at our registered office or at such other address indicated in the notice convening the meeting prior to the date of the relevant general meeting. With respect to voting by mail, we must send our shareholders a form of such vote and we must receive the form at least three days prior to the date of the relevant general meeting.

Quorum

Under French law, a quorum requires the presence in person or voting by mail or by proxy of shareholders representing, in the aggregate, not less than:

20% of the shares entitled to vote (in the case of an ordinary general meeting convened on first call, an extraordinary general meeting convened on second call or an extraordinary general meeting convened on first call, if deciding upon any capital increase by capitalization of reserves, retained earnings or share premium); or

25% of the shares entitled to vote (in the case of any other extraordinary general meeting convened on first call).

Table of Contents

No quorum is required in the case of an ordinary general meeting convened on second call or an extraordinary general meeting convened on second call, if deciding upon any capital increase by capitalization of reserves, retained earnings or share premium.

If a quorum is not present at any meeting on first call, the meeting is adjourned and reconvened, and in the case of an extraordinary general meeting, for a date not more than two months later. When a general meeting is reconvened, only questions which were on the agenda of the adjourned meeting may be discussed and voted upon.

Any shareholder may also, if the Board of Directors or its Chairman allows at the time of the convocation to a general meeting, attend the meeting via video-conference or by means of electronic telecommunication or tele-transmission subject to, and in accordance with, the conditions laid down by the legislation or the regulations then in force. This shareholder is then considered to be present at the meeting when calculating the quorum and the majority.

Majority

At an ordinary general meeting or an extraordinary general meeting deciding upon any capital increase by capitalization of reserves, retained earnings or share premium, a simple majority of votes cast by the shareholders present or represented at such meeting is required to pass a resolution. At any other extraordinary general meeting, a two-thirds majority of votes cast is required to pass a resolution. A unanimous vote, however, is required to increase the liabilities of shareholders. Abstention from voting by those present or represented by proxy or voting by mail is viewed as a vote against the resolutions submitted to a vote.

Our *statuts* provide that, as from May 22, 1997, each share that is fully paid and has been held in registered form by the same shareholder for a period of at least two consecutive years will entitle such shareholder to two votes. In the event of capital increases effected by an attribution of new shares, as a result of the incorporation of reserves, retained earnings or issuance premiums, the shares attributed by reason of and proportionately to the ownership of shares holding double voting rights are immediately granted double voting rights as if they themselves had fulfilled the requirements therefore. Under French company law, shares that have to be transferred pursuant to laws and regulations applicable to cross-shareholdings, as well as shares held by entities controlled directly or indirectly by us, are not entitled to voting rights. In the latter case, the shares do not count for quorum or majority purposes.

Acquisition of our own Shares

Under French law, our company may not issue shares to itself either directly or through a financial intermediary acting on our behalf. However, exceptionally, we may, either directly or through a financial intermediary acting on our behalf, purchase our shares:

- (1) to reduce our share capital (albeit not to absorb losses), canceling the shares we purchase, with our shareholders' approval at an extraordinary general meeting;
- (2) to provide shares to our employees under a profit sharing plan or stock option plan; or
- (3) in the context of a share repurchase program that allows us to acquire up to 10% of our share capital for a maximum period of 18 months. To acquire shares in the context of a share repurchase program, we must first obtain our shareholders' approval at an ordinary general meeting and make public a description of such program prior to its launch.

We may not repurchase under either (2) or (3) above an amount of shares that would result in our company holding, directly or through a person acting on our behalf, more than 10% of our outstanding share capital, without canceling the said 10% first. In addition, we may not cancel more than 10% of our outstanding share capital over any 24-month period.

We must hold any shares we repurchase in registered form. These shares also must be fully paid up. Shares repurchased by us are deemed outstanding under French law but are not entitled to dividends or voting rights and we may not ourselves exercise preferential subscription rights. Such shares do not count for quorum or majority purposes. The shareholders, at an extraordinary general meeting, may decide not to take such shares into account in

Table of Contents

determining the preferential rights to subscribe attached to the other shares (if such a decision is not taken, these rights must be either sold on the market before the end of the subscription period or distributed to the other shareholders on a pro rata basis.)

A direct subsidiary is generally prohibited by French law from holding shares in its parent and, in the event it becomes a holder of shares, such subsidiary must transfer such shares within one year following the date on which it becomes the holder thereof. An indirect subsidiary may only acquire shares if such subsidiary demonstrates a business purpose for holding the shares but in no event will it be entitled to vote such shares.

At the shareholders' meeting held on May 10, 2007, our shareholders renewed the existing authorization to acquire up to 10 percent of our share capital through purchases of shares and to resell shares so acquired for the 18 months following the date of such meeting.

Under such authorization, we are allowed to carry out transactions on our shares with the following objectives:

to support liquidity of our shares through a liquidity contract entered into with an investment service provider in compliance with the Code of Practice of the *Association Française des Entreprises d' Investissement*,

to deliver shares in the scope of securities giving access, immediately or in the future, to shares by redemption, conversion, exchange, presentation of a warrant or by any other means,

to deliver, immediately or in the future, shares in exchange in the scope of external growth, in accordance with the conditions to be defined by the AMF,

to allocate bonus shares to employees and officers of the company or affiliated companies within the meaning of article L.225-180 of the French Commercial Code, especially in the scope of options to purchase shares of the company, and

to cancel the shares through a capital reduction, subject to a decision of, or an authorization, by the extraordinary general meeting.

The general meeting approved a maximum purchase price of 250. The maximum number of shares that we are entitled to hold is 10% of our share capital as at the time of the purchase, less any shares acquired under previous authorizations.

The shares may be acquired on one or several occasions, by any method, including by agreement, by stock market purchase, by purchasing blocks of shares or by an offer to buy, which may take place at any time, including during a take-over bid.

This authorization was granted for a period of 18 months from May 10, 2007 and cancelled and replaced the authorization granted to the Board of Directors by the general meeting held on May 11, 2006.

During fiscal year 2007, we implemented the share repurchase plans authorized by our shareholders in May 2007 with the sole aim to support liquidity of our shares through a liquidity contract entered into with an investment service provider in compliance with the Code of Practice of the *Association Française des Entreprises d' Investissement*.

On July 6, 2007, the Company terminated the liquidity contract entered into with Rothschild & Cie Banque since November 1, 2005 and concluded a new liquidity contract with Crédit Agricole Cheuvreux starting from July 9, 2007. This liquidity contract is tacitly renewable and compliant with the Code of Practice of the *Association Française des*

Entreprises d Investissement.

Upon implementation of this contract, the Company allocated 22,000,000 to the liquidity account.

During fiscal year 2007, Rothschild & Cie Banque and Crédit Agricole Cheuvreux have:

purchased, in 2007, 1,492,282 CGG Veritas shares at an average weighed price of 168; and

sold, in 2007, 1,449,513 CGG Veritas shares at an average weighed price of 168.33.

Table of Contents

As of December 31, 2007, the Company held 42,769 shares in relation to this contract, equal to 0.15% of the share capital. The net book value of these shares amounts to 8,373,227.01.

As of December 31, 2007, the Company did not hold any shares directly outside the scope of this liquidity contract.

Trading in Our Own Shares

Under European Commission Regulation Number 2273/2003 of December 22, 2003 applicable in France since October 13, 2004, trades by a company in its own shares are deemed valid when the following conditions are met:

each trade must not be made at a price higher than the higher of the price of the last independent trade and the highest current independent bid on Euronext Paris;

if we carry out the purchase of our own shares through derivative financial instruments, the exercise price of those derivative financial instruments must not be above the higher of the last independent trade and the highest current independent bid; and

the trade must not account for more than 25% of the average daily trading volume on Euronext Paris in the shares during the twenty trading days immediately preceding the trade.

However, there are two periods during which we are not permitted to trade in our own securities: the 15-day period before the date on which we make our consolidated annual accounts public, and the period beginning on the date on which we become aware of information that, if disclosed, would have a significant impact on the market price of our securities and ending on the date this information is made public.

We must file a report with the AMF every six months as well as at entry into force, amendment or termination of the liquidity arrangement containing the assessment of such arrangement. Such report is then posted on our website. In addition, we must also file with the AMF a monthly report containing details of all transactions relating to our shares that we may have carried out during the month.

Form, Holding and Transfer of Shares

Form of Shares. Our *statuts* provides that our fully paid shares may be held in either registered or bearer form at the option of the shareholder. We may avail ourselves of the procedure known as *titres au porteur identifiables*, according to which we are entitled to request Euroclear France to disclose the name, nationality, address and the number of shares held by holders of those securities of ours which have, or which may in the future acquire, voting rights.

Holding of Shares. In accordance with French law concerning dematerialization of securities, the ownership rights of holders of shares are represented by book entries rather than by share certificate. According to our *statuts*, registered shares are entered into an account held by us or by a representative nominated by us, while shares in bearer form are placed in an account held by an accredited financial intermediary (*intermédiaire financier habilité*).

We maintain a share account with Euroclear France in respect of all shares in registered form, which, in France, is administered by BNP Paribas Securities Services, acting on our behalf as our agent. Shares held in registered form are inscribed in the name of each shareholder (either directly, or, at the shareholder's request, through such shareholder's accredited financial intermediary) in separate accounts maintained by BNP Paribas Securities Services on our behalf. Each shareholder account shows the name of the holder and the number of shares held and, in the case of shares inscribed through an accredited financial intermediary, shows that they are so held. BNP Paribas Securities Services,

as a matter of course, issues confirmations to each registered shareholder as to holdings of shares inscribed in the shareholder's accounts, but these confirmations do not constitute documents of title.

Shares held in bearer form are held and inscribed on the shareholder's behalf in an account maintained by an accredited financial intermediary with Euroclear France separately from our share account with Euroclear France. Each accredited financial intermediary maintains a record of shares held through it and will issue certificates of inscription in respect thereof. Shares held in bearer form may only be transferred effected through accredited

Table of Contents

financial intermediaries and Euroclear France. As noted above, our *statuts* allow us to request from Euroclear France details concerning the identity of the holders of shares in bearer form at any time.

Transfer of Shares. Our *statuts* do not contain any restrictions relating to the transfer of shares. An owner of shares resident outside France may trade such shares on Euronext Paris. Should such owner (or the broker or other agent) require assistance in this connection, an accredited financial intermediary should be contacted.

Prior to any transfer of shares held in registered form on Euronext Paris, such shares must be converted into bearer form and, accordingly, must be registered in an account maintained by an accredited financial intermediary. A shareholder may initiate a transfer by giving instructions (through an agent if appropriate) to the relevant accredited financial intermediary.

Requirements for Holdings Exceeding Certain Percentages

French company law provides that any individual or entity, who acting alone or in concert with others, acquires more than 5%, 10%, 15%, 20%, 25%, 33 1/3%, 50%, 66 2/3%, 90% or 95% of our outstanding shares or voting rights thereof or whose shareholding falls below any such percentage must notify us within five (5) trading days of the date such threshold was crossed of the number of shares it holds and of the voting rights attached thereto. Such individual or entity must also notify the AMF within five (5) trading days of the date such threshold was crossed.

In order to permit holders of our shares to give the notice required by law, we must monthly, in accordance with article 221-3 of the *Règlement Général* of the AMF, post (notably on the company website) information with respect to the total outstanding number of voting rights and shares if these have changed and provide the AMF with a written notice.

If any person fails to comply with the legal notification requirement, the shares or voting rights in excess of the relevant threshold will be deprived of voting rights for all shareholders meeting until the end of a two-year period following the date on which the owner thereof complies with the notification requirements. In addition, any shareholder who fails to comply with the above requirements may have all or part of its voting rights (and not only with respect to the shares in excess of the relevant threshold) suspended for up to five years by the *Tribunal de Commerce* at the request of our chairman, any shareholder or the AMF, and may be subject to criminal penalties.

French law imposes additional reporting requirements on persons who acquire more than 10% or 20% of our outstanding shares or voting rights. These persons must file a report with us and the AMF within 10 trading days of the date they cross the threshold. In the report, the acquirer must specify its intentions for the following 12-month period, including whether or not it intends to continue its purchases, to acquire control of our company or to seek nomination to our Board of Directors. The AMF makes the notice public. The acquirer must also publish a press release stating its intentions in a financial newspaper of national circulation in France. The acquirer may only amend its stated intentions in case of significant changes in its own situation or shareholders, or in our situation. Upon any change of intention, it must file a new report. Failure to comply with the notification requirements or to abide by the stated intentions may result in the acquirer being deprived of all or part of its voting rights, for a period of up to five years, by the *Tribunal de Commerce*, at our request or that of the AMF or one of our shareholders.

In addition to the provisions of French company law our *statuts* provide that any shareholder who directly or indirectly acquires ownership or control of shares representing 1% or any multiple thereof of our share capital or voting rights, or whose shareholding falls below any such limit, must inform us within five (5) trading days of the crossing of the relevant threshold, of the number of shares then owned by such shareholder. Failure to comply with these notification requirements may result, at the request, recorded in the minutes of the general meeting, of one or several shareholders holding at least 1% of the capital, in the shares in excess of the relevant threshold being deprived

of voting rights for all shareholder meetings until the end of a two-year period following the date on which the owner thereof has complied with such notification requirements.

Compulsory Tender. General Regulations of the AMF provide that a shareholder, acting alone, or shareholders acting in concert, as these terms are defined in article L.233-10 of the French Commercial Code, who come to own more than one-third of the voting rights or share capital of a French company listed on a regulated securities exchange in France must immediately notify the AMF, and submit a compulsory tender for all the shares of capital and all securities giving access to the share capital or voting rights of such company. The tender must be submitted

Table of Contents

on terms acceptable to the AMF. The acquisition of control of a private company, the principal asset of which is a one-third or more interest in a company listed on a regulated market in France, is treated as a direct acquisition of such interest.

In addition, the same obligation applies to any shareholder acting alone or shareholders acting in concert who, owning between one-third and 50% of the voting rights or share capital of a French company listed on a regulated market in France, increase their interest by more than 2% of the existing total number of shares or voting rights over a maximum period of twelve consecutive months.

The AMF is vested with the power to grant relief from the obligation to tender for all of the shares of the target company and may consider certain exemptions when petitioned for such relief by the acquiring shareholders. These exemptions primarily concern previous control of the target company or a commitment to divest within a given period.

Material Contracts

The following contracts (not being contracts entered into in the ordinary course of business) have been entered into by us or our subsidiaries within the two years immediately preceding the date of this document and are, or may be, material:

Long term facility agreement dated March 29, 2006 by and among Exploration Investment Resources II AS, DnB NOR Bank ASA and certain banks and financial institutions.

On March 29, 2006, we signed a long term facility agreement of up to U.S.\$70,000,000 to finance the acquisition of certain seismic equipment and the conversion of one of our seismic vessel.

Agreement between the Shareholders of CGG Ardiseis, dated June 23, 2006, between Industrialization & Energy Services Company (TAQA) and us.

Pursuant to this agreement, on June 24, 2006, TAQA acquired 49% of the capital of CGG Ardiseis, a newly formed CGG subsidiary dedicated to land and shallow water seismic data acquisition in the Middle East, and CGG kept a 51% interest.

Agreement and Plan of Merger, dated as of September 4, 2006, by and among us, Volnay Acquisition Co. I, Volnay Acquisition Co. II and Veritas DGC Inc.

On September 4, 2006, Veritas DGC Inc., a Delaware corporation, and CGG entered into a merger agreement, by and among Veritas, CGG, Volnay Acquisition Co. I, a Delaware corporation and wholly owned subsidiary of CGG, and Volnay Acquisition Co. II, a Delaware corporation and wholly owned subsidiary of CGG, under which CGG agreed to acquire all of the issued and outstanding shares of common stock, par value U.S.\$0.01 per share, of Veritas. On January 12, 2007, pursuant to the terms of the merger agreement, as approved by the Boards of Directors of both Veritas and CGG and the shareholders of Veritas, Volnay Acquisition Co. I merged with and into Veritas with Veritas continuing as the surviving corporation, and immediately thereafter, Veritas merged with and into Volnay Acquisition Co. II with Volnay Acquisition Co. II continuing as the surviving corporation as a wholly owned subsidiary of CGG. Following the merger, Volnay Acquisition Co. II changed its name to CGGVeritas Services Holding (U.S.) Inc.

U.S.\$1.6 billion Single Currency Term Facility Agreement, dated as of November 22, 2006, among us, certain of our subsidiaries acting as guarantors, the lenders party thereto and Credit Suisse International as Agent and Security Agent.

On January 12, 2007, we borrowed U.S.\$700 million under a bridge loan facility, and the proceeds were used to:

finance a portion of the cash component of the merger consideration;

repay certain existing debt of CGG and Veritas; and

pay the fees and expenses incurred in connection with the foregoing.

Table of Contents

Upon such borrowing and the concurrent funding of the U.S.\$1.0 billion term loan facility (described directly below), the unused commitments of U.S.\$900 million were terminated. We used the net proceeds of our offering of Senior Notes on February 9, 2007, together with cash on hand, to repay in full the bridge loan facility.

U.S.\$1.115 billion Credit Agreement dated as of January 12, 2007, among Volnay Acquisition Co. I, us, certain of our subsidiaries acting as guarantors, the lenders party thereto and Credit Suisse as Administrative Agent and Collateral Agent.

On January 12, 2007, Volnay Acquisition Co. I borrowed a U.S.\$1.0 billion senior secured term loan B and obtained a U.S.\$115 million senior secured U.S. revolving facility (which revolving facility includes letter of credit and swingline subfacilities). Aggregate commitments under the U.S. revolving facility were increased to U.S.\$140 million on January 26, 2007.

The proceeds of the term loan facility were used to finance a portion of the cash component of the Veritas merger consideration.

In addition, proceeds of the term loan facility may be used to repurchase up to 3,000,000 of our common shares (or the corresponding number of our ADSs).

Proceeds of loans under the U.S. revolving facility may be used for the general corporate purposes of CGGVeritas Services Holding (U.S.) Inc. and our other subsidiaries.

Underwriting Agreement, dated February 2, 2007, among us, certain of our subsidiaries acting as guarantors, Credit Suisse Securities (Europe Limited) and the several underwriters party thereto.

In accordance with this agreement, we sold U.S.\$200,000,000 of our 7 1/2% Senior Notes due 2015 and U.S.\$400,000,000 of our 7 3/4% Senior Notes due 2017, both issued on February 9, 2007.

U.S.\$200 million Revolving Credit Agreement, dated as of February 7, 2007, among us, certain of our subsidiaries acting as guarantors, Natixis as Facility Agent, Credit Suisse as Collateral Agent and the lenders party thereto.

This agreement replaces our previous U.S.\$60,000,000 revolving facility made available to CGG, CGG Services and Sercel on March 12, 2004 and cancelled prior to the Veritas merger. A 40,000,000 swingline facility will operate as a sub-limit within the French revolving facility. We intend to use the proceeds of loans under this revolving facility for general corporate purposes.

Exchange Controls

Ownership of ADSs or shares by Non-French Persons

Under French law, there is no limitation on the right of non-resident or foreign shareholders to own or to exercise their voting rights attached to the securities they hold in a French company.

Pursuant to the French Monetary and Financial Code, administrative authorization is no longer required of non-European residents prior to acquiring a controlling interest in a French company, with exceptions regarding sensitive economic areas such as defense, public health, etc. However a notice (*déclaration administrative*) must be filed with the French Ministry of the Economy in certain circumstances and in particular for the acquisition of an

interest in us by any person not residing in France or any foreign controlled resident if such acquisition would result in (i) the acquisition of a controlling interest of more than 33.33% of our share capital or voting rights or (ii) the increase of a controlling interest in us unless such person not residing in France or group of non-French residents already controls more than 50% of our share capital or voting rights prior to such increase. In certain circumstances (depending upon such factors as the percentage and value of the acquired part of our share capital), an additional declaration, for statistical purposes shall be filled with the *Banque de France*.

Table of Contents

Exchange Controls

Under current French exchange control regulations, there are no limitations on the amount of payments that may be remitted by us to non-residents. Laws and regulations concerning foreign exchange control do require, however, that all payments or transfers of funds (including payments of dividends to foreign shareholders) made by a French resident to a non-resident be handled by an accredited intermediary. In France, all registered banks and substantially all credit establishments are accredited intermediaries.

Taxation

The following summarizes the material French tax and U.S. federal income tax consequences to U.S. Holders (as defined below) of the ownership and disposal of ADSs.

For the purposes of this discussion, a U.S. Holder means a beneficial owner of ADSs that is:

- an individual who is a citizen or resident of the United States for U.S. federal income tax purposes;
- a corporation, or other entity treated as a corporation, created or organized in or under the laws of the United States or of any State thereof;
- an estate the income of which is subject to United States federal income taxation regardless of its source; or
- a trust if a court within the United States is able to exercise primary supervision over the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust, or the trust has elected to be treated as a domestic trust for U.S. federal income tax purposes.

This discussion is not a complete description of all of the tax consequences of the ownership or disposition of ADSs. The summary assumes that each obligation in the deposit agreement between The Bank of New York and us (the Deposit Agreement) and any related agreement will be performed in accordance with its terms and is based on the current tax laws of the Republic of France and the United States, including the U.S. Internal Revenue Code of 1986, as amended (the Code), its legislative history, existing and proposed Treasury Regulations, Internal Revenue Service (IRS) rulings and judicial opinions as well as the Convention between the United States and the Republic of France for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income and Capital dated August 31, 1994 (the Treaty), all as currently in effect and all subject to change, possibly with retroactive effect.

Your individual circumstances may affect the tax consequences of the ownership or disposition of ADSs to you, and your particular facts or circumstances are not considered in the discussion below.

For purposes of the Treaty, French tax law and the Code, U.S. Holders of ADSs will be treated as owners of the corresponding number of our shares underlying those ADSs held by The Bank of New York as depositary (the Depositary). There are currently no procedures available for holders that are not U.S. residents to claim tax treaty benefits in respect of dividends received on ADSs or shares registered in the name of a nominee. Such holders should consult their own tax advisor about the consequences of owning and disposing of ADSs.

This discussion summary is not intended to apply to holders of ADSs in particular circumstances, such as:

- investors that own (directly or indirectly) 10% or more of our voting stock;

banks;

dealers in securities or currencies;

traders in securities who elect to apply a mark-to-market method of accounting;

financial institutions;

regulated investment companies;

real estate investment trusts;

tax-exempt organizations;

Table of Contents

insurance companies;

persons holding ADSs as part of a hedging, straddle, conversion or other integrated transaction;

U.S. Holders who hold ADSs other than as capital assets;

persons whose functional currency is not the U.S. dollar;

certain U.S. expatriates;

individual retirement accounts and other tax-deferred accounts;

partners in partnerships;

persons subject to the U.S. alternative minimum tax; and

persons who acquired ADSs pursuant to an employee stock option or otherwise as compensation.

You should consult your own tax advisor regarding the French and United States federal, state and local and other tax consequences of the purchase, ownership and disposition of ADSs in the light of your particular circumstances, including the effect of any state, local or other national laws. In particular, you should confirm whether you are eligible for the benefits of the Treaty with your advisor and should discuss any possible consequences of failing to be so eligible. You should also consult your tax advisor in the event that you become entitled to receive any dividend that is approved to be paid.

The U.S. federal income tax treatment of a partner in a partnership that holds ADSs will depend on the status of the partner and the activities of the partnership. Holders that are partnerships should consult their tax advisers concerning the U.S. federal income tax consequences to their partners of the ownership and disposition of ADSs by the partnership.

French Taxation

The following describes the material French tax consequences of owning and disposing of ADSs relevant to U.S. Holders which do not hold their ADSs in connection with a permanent establishment or fixed base through which a holder carries on business or performs personal services in France. The statements relating to French tax laws set out below are based on the laws in force as at the date hereof, and are subject to any changes in applicable French tax laws or in any applicable double taxation conventions or treaties with France occurring after such date.

This discussion is intended only as a descriptive summary and does not purport to be a complete analysis or list of all potential tax effects of the purchase or ownership of ADSs.

Taxation of Dividends

France generally imposes a 25% withholding tax on dividends distributed in cash or in the form of shares by a French corporation (such as our company) to shareholders who are residents of the United States. However, the Treaty generally reduces the withholding tax rate to 15% on dividends paid in cash or in the form of shares to an Eligible U.S. Holder (as defined below).

Under the Treaty, an Eligible U.S. Holder is a U.S. Holder whose ownership of ADSs is not attributable to a permanent establishment or fixed base in France and who is:

an individual or other non-corporate holder; or

a corporation that does not own, directly or indirectly, 10% or more of the capital of our company,

provided in each case that such holder:

is a resident of the United States under the Treaty;

is entitled to Treaty benefits under the limitation on benefits provisions in Article 30 of the Treaty; and

complies with the procedural rules to obtain Treaty benefits described below under Taxation of Dividends Procedure to Obtain Treaty Benefits .

Table of Contents

Taxation of Dividends Procedure to Obtain Treaty Benefits

Eligible U.S. Holders must follow certain procedures in order to be eligible for the 15% dividend withholding tax under the Treaty.

An Eligible U.S. Holder who wishes to obtain a reduced withholding rate at source must:

complete a certificate (the Certificate) as provided under Schedule III to the administrative instruction of 14 February 2005 referenced BOI 4 J-1-05;

have it certified by the U.S. financial institution that is in charge of the administration of the ADSs of that Eligible U.S. Holder; and

file it with us or the French person in charge of the payment of dividends on our shares underlying the ADSs, such as the French paying agent, in the case of our shares, or with the Depository in the case of ADSs,

before the date of payment of the relevant dividend. However, if an Eligible U.S. Holder is not able to complete, have certified and file the Certificate before the date of payment of the dividend, that Eligible U.S. Holder may still benefit from the reduced 15% withholding tax rate if the U.S. financial institution that is in charge of the administration of that Holder's ADSs or underlying shares provides us or the French paying agent with certain information with respect to that Eligible U.S. Holder and his or her holding of the ADSs or the underlying shares before the date of payment of the relevant dividend.

If either of the procedures described above has not been followed before a dividend payment date or is not available to an Eligible U.S. Holder, our company or the French paying agent will withhold tax from the dividend at the above rate of 25%, and the Eligible U.S. Holder will be entitled to claim a refund of the excess withholding tax by filing a form no. 5001-EN with the Depository or the French paying agent early enough to enable them to forward that application to the French tax authorities before December 31 of the year following the calendar year in which the related dividend was paid.

The Depository will provide to all U.S. Holders of ADSs the applications or certificates, together with instructions, and will arrange for the filing with the French tax authorities of all applications and certificates completed by U.S. Holders of ADSs and returned to the Depository in sufficient time to effect the filing.

The Certificate, the form no. 5001-EN and their respective instructions are available at the *trésorerie des non-résidents* (10, rue du Centre, 93160 Noisy-le-Grand, France).

Taxation on Sale or Disposal of ADSs

Subject to the provisions of any relevant double tax treaty, persons who are not French residents for the purpose of French taxation (as well as, under certain conditions, foreign states, international organizations and certain foreign public bodies) and who have held not more than 25%, directly or indirectly, of the dividend rights (*droits aux bénéfices sociaux*) of our company at any time during the preceding five years, are not generally subject to any French income tax or capital gains tax on any sale or disposal of ADSs.

If a transfer of listed shares is evidenced by a written agreement, such share transfer agreement is, in principle, subject to registration formalities and therefore to a 1.1% registration duty assessed on the higher of the purchase price or the market value of the shares (subject to a maximum assessment of 4,000 per transfer). However, under certain

circumstances, no duty is due if such written share transfer agreement is executed outside France.

French Estate and Gift Taxes

Pursuant to The Convention Between the United States of America and the French Republic for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Estates, Inheritance and Gifts dated November 24, 1978, a transfer of ADSs by gift or by reason of the death of a U.S. Holder will not be subject to French gift or inheritance tax, unless (i) the donor or the transferor is domiciled in France at the time of making the gift or at the time of his or her death, or (ii) the ADSs were used in, or held for use in, the conduct of a business through a permanent establishment or fixed base in France. In such a case, the French gift or inheritance tax

Table of Contents

may be credited against the U.S. gift or inheritance tax. This tax credit is limited to the amount of the U.S. gift or inheritance tax due on the ADSs.

French Wealth Tax

The French wealth tax (*impôt de solidarité sur la fortune*) does not generally apply to a U.S. Holder who is a resident of the United States as defined in the provisions of the Treaty, unless the ADSs form part of the business property of a permanent establishment or fixed base in France.

United States Taxation

The following summary assumes that we are not a passive foreign investment company (a PFIC) for U.S. federal income tax purposes, which we believe to be the case. Our possible status as a PFIC must be determined annually and therefore may be subject to change. If we were to be a PFIC in any year, materially adverse consequences could result for U.S. Holders.

THE SUMMARY OF U.S. FEDERAL INCOME TAX CONSEQUENCES SET OUT BELOW IS FOR GENERAL INFORMATION ONLY. U.S. HOLDERS SHOULD CONSULT THEIR TAX ADVISERS AS TO THE PARTICULAR TAX CONSEQUENCES TO THEM OF OWNING THE ADSs, INCLUDING THEIR ELIGIBILITY FOR THE BENEFITS OF THE TREATY, THE APPLICABILITY AND EFFECT OF STATE, LOCAL, FOREIGN AND OTHER TAX LAWS AND POSSIBLE CHANGES IN TAX LAW.

Dividends

General. Distributions paid on our shares out of current or accumulated earnings and profits (as determined for U.S. federal income tax purposes), before reduction for any French withholding tax paid by us with respect thereto, will generally be taxable to a U.S. Holder as foreign source dividend income in the year in which the distribution is received (which, in the case of a U.S. Holder of ADSs, will be the year of receipt by the Depository), and will not be eligible for the dividends received deduction allowed to corporations. Distributions in excess of current and accumulated earnings and profits will be treated as a non-taxable return of capital to the extent of the U.S. Holder's basis in the ADSs and thereafter as capital gain. However, we do not maintain calculations of our earnings and profits in accordance with U.S. federal income tax accounting principles. U.S. Holders should therefore assume that any distribution by us with respect to our Ordinary Shares will constitute ordinary dividend income. U.S. Holders should consult their own tax advisors with respect to the appropriate U.S. federal income tax treatment of any distribution received from us.

For taxable years that begin before 2011, dividends paid by us will be taxable to a non-corporate U.S. Holder at the special reduced rate normally applicable to capital gains, provided either we qualify for the benefits of the Treaty or the ADSs are considered to be readily tradable on the NYSE. A U.S. Holder will be eligible for this reduced rate only if it has held the ADSs for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date. A U.S. Holder will not be able to claim the reduced rate for any year in which we are treated as a PFIC. See *Passive Foreign Investment Company Status* below.

Foreign Currency Dividends. Dividends paid in euro will be included in income in a U.S. dollar amount calculated by reference to the exchange rate in effect on the day the dividends are received by the Depository, regardless of whether the euro are converted into U.S. dollars at that time. If dividends received in euro are converted into U.S. dollars on the day they are received by the Depository, the U.S. Holder generally will not be required to recognize foreign currency gain or loss in respect of the dividend income.

Effect of French Withholding Taxes

As discussed above under Taxation French Taxation Taxation of Dividends , under French domestic law, dividends paid by us to a United States resident shareholder are subject to a 25% withholding tax. Under the Treaty, however, the rate of withholding tax applicable to Eligible U.S. Holders is reduced to a maximum of 15%. Please see Taxation French Taxation Taxation of Dividends Procedure to Obtain Treaty Benefits for the procedure to claim the reduced rate of withholding tax under the Treaty.

Table of Contents

An Eligible U.S. Holder will generally be entitled, subject to certain limitations, to a credit against its U.S. federal income tax liability, or a deduction in computing its U.S. federal taxable income, for any French tax withheld from a dividend. Eligible U.S. Holders will not be entitled to a foreign tax credit for the amount of any French taxes withheld in excess of the 15% maximum rate, and with respect to which the holder can obtain a refund from the French taxing authorities. For purposes of the foreign tax credit limitation, foreign source income is classified in one of several baskets, and the credit for foreign taxes on income in any basket is limited to U.S. federal income tax allocable to that income. Dividends paid by us generally will constitute foreign source income in the passive income basket. If a U.S. Holder receives a dividend from us that qualifies for the reduced rate described above under United States Taxation Dividends General, the amount of the dividend taken into account in calculating the foreign tax credit limitation will in general be limited to the gross amount of the dividend, multiplied by the reduced rate divided by the highest rate of tax normally applicable to dividends. In certain circumstances, a U.S. Holder may be unable to claim foreign tax credits (and may instead be allowed deductions) for foreign taxes imposed on a dividend if the U.S. Holder has not held the ADSs for at least 16 days in the 31-day period beginning 15 days before the ex dividend date.

U.S. Holders that are accrual basis taxpayers, and who do not otherwise elect, must translate French taxes into U.S. dollars at a rate equal to the average exchange rate for the taxable year in which the taxes accrue, while all U.S. Holders must translate taxable dividend income into U.S. dollars at the spot rate on the date received. This difference in exchange rates may reduce the U.S. dollar value of the credits for French taxes relative to the U.S. Holder's U.S. federal income tax liability attributable to a dividend. However, cash basis and electing accrual basis U.S. Holders may translate French taxes into U.S. dollars using the exchange rate in effect on the day the taxes were paid. Any such election by an accrual basis U.S. Holder will apply for the taxable year in which it is made and all subsequent taxable years, unless revoked with the consent of the IRS.

Exchange of ADSs for Shares

No gain or loss will be recognized upon the exchange of ADSs for the U.S. Holder's proportionate interest in our ordinary shares. A U.S. Holder's tax basis in the withdrawn shares will be the same as the U.S. Holder's tax basis in the ADSs surrendered, and the holding period of the shares will include the holding period of the ADSs.

Sale or other Disposition

Upon a sale or other disposition of ADSs (other than an exchange of ADSs for ordinary shares), a U.S. Holder generally will recognize capital gain or loss for U.S. federal income tax purposes equal to the difference, if any, between the amount realized on the sale or other disposition and the U.S. Holder's adjusted tax basis in the ADSs. This capital gain or loss will be long-term capital gain or loss if the U.S. Holder's holding period in the ADSs exceeds one year. Any gain or loss will generally be U.S. source.

Passive Foreign Investment Company Status

A foreign corporation will be a PFIC in any taxable year in which either (i) 75% or more of its gross income consists of certain specified types of passive income or (ii) the average percentage of its assets (by value) that produce or are held for the production of passive income is at least 50%. We do not expect that we will be a PFIC in 2007, but our possible status as a PFIC must be determined annually and therefore we might become a PFIC in future years.

If we were a PFIC in any taxable year during which a U.S. Holder owned ADSs and the U.S. Holder had not made a mark to market or qualified electing fund election, the U.S. Holder would generally be subject to special rules (regardless of whether we continued to be a PFIC) with respect to (i) any excess distribution (generally, any distributions received by the U.S. Holder on ADSs in a taxable year that are greater than 125% of the average annual distributions received by the U.S. Holder in the three preceding taxable years or, if shorter, the U.S. Holder's holding

period for the ADSs) and (ii) any gain realized on the sale or other disposition of ADSs. Under these rules (a) the excess distribution or gain would be allocated ratably over the U.S. Holder's holding period, (b) the amount allocated to the current taxable year and any taxable year prior to the first taxable year in which we are a PFIC would be taxed as ordinary income, and (c) the amount allocated to each of the other taxable years would be subject to tax

Table of Contents

at the highest rate of tax in effect for the applicable class of taxpayer for that year and an interest charge for the deemed deferral benefit would be imposed with respect to the resulting tax attributable to each such other taxable year. If we were a PFIC, a U.S. Holder of ADSs would generally be subject to similar rules with respect to distributions to us by, and dispositions by us of the stock of, any direct or indirect subsidiaries of ours that were also PFICs. A U.S. Holder who beneficially owns an interest in a PFIC is generally required to file an annual information return on IRS Form 8621 describing the distributions received from and any gain realized upon the disposition of a beneficial interest in the PFIC. Additionally, dividends paid by us would not be eligible for the special reduced rate of tax described above under United States Taxation Dividends General . U.S. Holders should consult their tax advisers regarding the potential application of the PFIC regime.

Backup Withholding and Information Reporting

Payments of dividends and other proceeds with respect to ADSs by a U.S. paying agent or other U.S. intermediary will be reported to the IRS and to the U.S. Holder as may be required under applicable regulations. Backup withholding may apply to these payments if the U.S. Holder fails to provide an accurate taxpayer identification number or certification of exempt status or fails to report all interest and dividends required to be shown on its U.S. federal income tax returns. Certain U.S. Holders (including, among others, corporations) are not subject to backup withholding. U.S. Holders should consult their tax advisers as to their qualification for exemption from backup withholding and the procedure for obtaining an exemption.

Documents on Display

We are subject to the reporting requirements of the Securities Exchange Act of 1934, as amended (the Exchange Act) applicable to foreign private issuers. In accordance with the Exchange Act, we electronically file or submit reports, including annual reports on Form 20-F and interim reports on Form 6-K, and other information with the Securities and Exchange Commission. You may obtain these reports and other information by sending a written request to CGG Veritas, Tour Maine-Montparnasse, 33, avenue du Maine, BP 191, 75755 Paris cedex 15, France, Attention: Investor Relations Officer, Telephone: (33) 1 64 47 4500.

You can inspect and copy these reports, and other information, without charge, at the Public Reference Room of the Commission located at 100 F Street, N.E., Washington, D.C. 20549. You can also obtain copies of these materials at prescribed rates from the Public Reference Room of the Commission at 450 Fifth Street, N.W., Washington, D.C. 20549 or by calling the Commission at 1-800-SEC-0330. The Commission also maintains a web site at <http://www.sec.gov> that contains reports and other information regarding registrants that file electronically with the Commission.

In addition, you can inspect material filed by CGG Veritas at the offices of the New York Stock Exchange, 20 Broad Street, New York, New York 10005, on which American Depositary Shares representing shares of our common stock are listed. As a foreign private issuer, we are not subject to the proxy rules under Section 14 or the short-swing insider profit disclosure rules under Section 16 of the Exchange Act.

On January 12, 2007, following the completion of the merger with CGG, Veritas was delisted from the New York Stock Exchange and filed a Form 15 to terminate its registration and reporting obligations under the Exchange Act.

Table of Contents

Item 11: QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Because we operate internationally, we are exposed to general risks linked to operating abroad. The table below provides information about our market sensitive financial instruments and constitutes a forward-looking statement. Our major market risk exposures are changing interest rates and currency fluctuations.

Interest Rate Risk

Our policy is to manage interest rates through use of a combination of fixed and floating rate debt. Our exposure to interest rate fluctuations is reduced to the extent that the main part of our financial debt at December 31, 2007 consisted of a long-term bond issues maturing in May 2015 and 2017 and bearing a fixed interest rate. However, our sources of liquidity include a Senior Facility with financial institutions charging variable interest rates. We may also use interest rate swaps to adjust interest rate exposures when appropriate based upon market conditions.

Foreign Exchange Rate Risk

As a company that derives a substantial amount of its revenue from sales internationally, we are subject to risks relating to fluctuations in currency exchange rates. In the years ended December 31, 2007, 2006 and 2005, more than 80% of our operating revenues and more than two-thirds of our operating expenses were denominated in currencies other than euros. These included U.S. dollars and, to a significantly lesser extent, other non-Euro Western European currencies, principally British pounds and Norwegian kroner.

We attempt to match foreign currency revenues and expenses in order to balance our net position of receivables and payables denominated in foreign currencies. We also seek to improve the balance of our net position of receivables and payables denominated in U.S. dollars by maintaining a portion of our financing in U.S. dollars. In addition, our policy generally is to hedge major foreign currency cash exposures through foreign exchange forward contracts or other foreign exchange currency hedging instruments. These contracts are entered into with major financial institutions, thereby minimizing the risk of credit loss. All instruments are entered into for non-trading purposes. See Item 5: Operating and Financial Review and Prospects Trend Information Currency Fluctuations above.

Credit Risk and Counter-Party Risk

We seek to minimize our counter-party risk by entering into hedging contracts only with highly rated commercial banks or financial institutions and by distributing the transactions among the selected institutions. Although our credit risk is the replacement cost at the then-estimated fair value of the instrument, we believe that the risk of incurring losses is remote and those losses, if any, would not be material. Our receivables and investments do not represent a significant concentration of credit risk due to the wide variety of customers and markets in which we sell our services and products and our presence in many geographic areas. During 2007, our two largest clients accounted for 4.5% and 2.8% of our operating revenues, respectively. During 2006, our two largest clients accounted for 9.0% and 3.2% of our operating revenues, respectively.

Table of Contents

The table below presents principal amounts and related weighted average interest rates by year of maturity for our debt obligations and our foreign exchange forward contracts, all of which mature in one year or less and their fair value as of December 31, 2007:

Carrying value	2008	2009	2010	2011 (in million)	2012	Thereafter	Total	Fair Value

Item 15: CONTROLS AND PROCEDURES

(a) *Disclosure controls and procedures.* As of the end of the period covered by this report, we carried out an evaluation of the effectiveness of our disclosure controls and procedures (as defined in 17 CFR 240.13a-15(e) and 240.15d-15(e)), under the supervision of our management, including our Chief Executive Officer and our Chief Financial Officer. Based on this evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that such controls and procedures are effective to ensure that information required to be disclosed in reports filed with or submitted to the SEC under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the Exchange Act and its rules and forms.

There has been no change in our internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Pursuant to section L.225-37 of the French Commercial Code, as amended by a French financial law (the *Loi de Sécurité Financière*) enacted on August 1, 2003, our Chairman of the Board must deliver a report to the annual general meeting of our shareholders on the preparation and organization of the meeting of our Board of Directors, on the limitations placed on the authority of the Chief Executive Officer as well as on the internal control procedures put in place by us. This report for 2007 informed our shareholders of the internal control procedures that we have put in place in order to circumvent identified risks resulting from our activities and the risks of errors or fraud, particularly in accounting and finance. It describes the existing control environment, i.e. our values with respect to integrity and ethics, the organization of our corporate governance committees, the functions of our disclosure committee and the way we delegate powers and determine areas of responsibility. It also describes the procedures put in place to identify and assess our major risks, whether internal or external. It gives details on our control procedures, particularly those applied to financial information, so as to ensure reliability of financial reporting. A self-assessment process of internal control procedures currently existing within our Group has been implemented.

(b) *Management annual report on internal control over financial reporting.* We are responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities and Exchange Act of 1934) for CGG Veritas.

Due to its inherent limitations, internal control over financial reporting may not prevent or detect misstatements, and can only provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

We assessed the effectiveness of our internal control over financial reporting as of December 31, 2007, and concluded that our internal control over financial reporting is effective. In making this assessment, we used the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our assessment under these criteria, we concluded that, as of December 31, 2007, our internal control over financial reporting was effective to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and with IFRS as adopted by the European Union as of December 31, 2007.

Table of Contents

The effectiveness of management's internal control over financial reporting has been audited by Ernst & Young and Mazars & Guerard, our independent registered public accounting firms, as stated in their report, which is included herein.

(c) Attestation Report of Independent Registered Public Accounting Firms.

The Board of Directors and Shareholders of Compagnie Générale de Géophysique-Veritas S.A.

We have audited Compagnie Générale de Géophysique-Veritas S.A.'s internal control over financial reporting as of December 31, 2007, based on criteria established in the Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Compagnie Générale de Géophysique-Veritas S.A.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Compagnie Générale de Géophysique-Veritas S.A. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Compagnie Générale de Géophysique-Veritas S.A. and subsidiaries as of December 31, 2007, 2006 and 2005, and the related consolidated statements of income, statement of income and expense recognized directly in equity, and cash flows for each of the three years in the period ended December 31, 2007 and our report dated April 16, 2008 expressed an unqualified opinion thereon.

Item 16A: AUDIT COMMITTEE FINANCIAL EXPERT

Pursuant to section 407 of the Sarbanes Oxley Act of 2002, Mr. Dunand was appointed Financial Expert of the Audit Committee by a Board resolution dated December 10, 2003, as reaffirmed by a board resolution on

Table of Contents

February 20, 2007. Mr. Dunand is independent, as that term is defined by the listing standards of the New York Stock Exchange.

Item 16B: CODE OF ETHICS

The Board of Directors has adopted a code of ethics that applies to our Chief Executive Officer, our Chief Financial Officer, other senior financial officers (including our principal accounting officer), the members of the Group Management Committee and the Disclosure Committee to promote honest and ethical conduct, full, fair, accurate, timely and understandable disclosure in periodic reports required to be filed by us and compliance with applicable governmental rules and regulations. A copy of this code of ethics is filed as an exhibit to this annual report.

Item 16C: PRINCIPAL ACCOUNTANT FEES AND SERVICES

	December 31,			
	2007			2006
	Ernst & Young	Mazars & Guerard	Ernst & Young	Mazars & Guerard
	(in thousand of euros)			
Audit Fees ^(a)	4,020	2,534	1,593	1,234
Audit-Related Fees ^(b)	278		1,288	345
Tax Fees ^(c)	101	6	142	
All Other Fees ^(d)				
Total	4,399	2,540	3,023	1,579

- (a) Audit fees are the aggregate fees billed by our independent auditors for the audit of the individual and consolidated annual and semi-annual financial statements and the provision of services that are normally provided by our independent auditors in connection with statutory and regulatory filings or engagements.
- (b) Audit-related fees are the aggregate fees billed by our independent auditors for services that are reasonably related to the performance of the audit or review of our financial statements and are not reported under audit fees. They include consultations relating to accounting principles and internal controls.
- (c) Tax fees are the aggregate fees billed by our independent auditors for services rendered by our auditors for tax compliance, tax advice, and tax planning. They include assistance when dealing with local authorities, advice regarding tax audit and litigation, expatriate taxation and tax advice relating to mergers and acquisitions.
- (d) All other fees are the aggregate fees billed by our independent auditors other than the services reported in paragraphs (a) through (c) of this item. They include training services as well as general and specific advice.

In December 2003, the Board of Directors and the Audit Committee adopted an audit and non-audit services pre-approval policy. This policy requires the Audit Committee to pre-approve the audit and non-audit services performed by the independent auditors in order to assure that they do not impair the auditors' independence from us.

Pursuant to this policy, a list of proposed services is pre-approved, on an annual basis, without consideration of specific case-by-case services by the Audit Committee. Unless a type of service has received such general pre-approval, it will require specific pre-approval by the Audit Committee or by any person to whom the audit committee has delegated pre-approval authority. In addition, any proposed services exceeding pre-approved cost levels or budgeted amounts will also require specific pre-approval by the Audit Committee. The services list and the cost levels are reviewed annually by the Audit Committee.

The annual audit services engagement terms and fees as defined under paragraph (a) of this item are subject to the specific pre-approval of the Audit Committee.

Item 16D: EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of Compagnie Générale de Géophysique Veritas:

We have audited the accompanying consolidated balance sheets of Company Générale de Géophysique Veritas S.A. and subsidiaries (the Company) as of December 31, 2007, 2006 and 2005, and the related consolidated statements of income, cash flows and statement of income and expenses recognized directly in equity for each of the three years in the period ended December 31, 2007. These consolidated financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company at December 31, 2007, 2006 and 2005, and the consolidated results of its operations and its consolidated cash flows for each of the three years in the period ended December 31, 2007, in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company s internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria) and our report dated April 16, 2008 expressed an unqualified opinion on the effectiveness of the Company s internal control over financial reporting.

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Compagnie Générale de Géophysique Veritas, S.A. (the Company) and its subsidiaries (together, the Group) is a global participant in the geophysical services industry, providing a wide range of seismic data acquisition, processing and interpretation services as well as related processing and interpretation software to clients in the oil and gas exploration and production business. It is also a global manufacturer of geophysical equipment.

Given that the Company is listed on a European Stock Exchange and pursuant to European regulation n°1606/2002 dated July 19, 2002, the accompanying consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and its interpretations as issued by the International Accounting Standards Board (IASB). These consolidated financial statements are also in accordance with IFRS adopted by the European Union at December 31, 2007.

According to the general conditions of the standard IFRS 1, regarding the first adoption of IFRS, the Group elected the following options:

Business combinations (IFRS 3): the Company elected not to restate business combinations consummated prior to January 1, 2004;

Fair value used as assumed cost (IAS 16): the Company did not elect to assess its property, plant and equipment at fair value. Property, plant and equipment are recognized at amortized historical cost;

Actuarial gains (losses) on pension plans (IAS 19): the Company elected to recognize actuarial gains (losses) on pension plans previously unrecognized at January 1, 2004, in retained earnings;

Currency translation adjustments (IAS 21): the Company elected to recognize currency translation adjustments at January 1, 2004 through retained earnings.

Moreover, the Company elected for the early adoption from January 1, 2004 of the following standards:

Financial instruments: the Company early adopted the standards IAS 32 and IAS 39 from January 1, 2004;

Actuarial gains (losses) on pension plans (IAS 19): the Company elected to recognize actuarial gains (losses) on pension plans directly in retained earnings.

The preparation of financial statements in conformity with IFRS requires management to make judgmental estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Critical Accounting Policies

Our significant accounting policies, which we have applied consistently, are fully described below. However, certain of our accounting policies are particularly important to the portrayal of our financial position and results of operations. As we must exercise significant judgment when we apply these policies, their application is subject to an inherent

degree of uncertainty.

The following Standards, Amendments and Interpretations have been effective since January 1, 2007:

Amendment to IAS 1 Presentation of financial statements: Capital disclosures

IFRS 7 Financial instruments Disclosures

IFRIC 7 Applying the restatement approach under IAS 29 Financial reporting in hyperinflationary economies

IFRIC 8 Scope of IFRS 2

IFRIC 9 Reassessment of embedded derivatives

F-6

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

IFRIC 10 Interim Financial Reporting and Impairment

These Standards, Amendments and Interpretations have had no significant impact on our consolidated financial statements at December 31, 2007.

At the date of issuance of these financial statements, the following Standards and Interpretations were issued but not yet effective:

IFRS3 (revised) Business Combinations

IAS 27(revised) Consolidated and Separate Financial Statements

IAS 23 (revised) Borrowing costs

IFRS 8 Operating segments

IFRIC 11 IFRS 2 Group and Treasury Share Transactions

IFRIC 12 Service Concessions Arrangements

IFRIC 13 Customer Loyalty Programs

IFRIC 14 The limit on a defined benefit asset, minimum funding requirements and their interaction

We have not opted for the early adoption of these Standards, Amendments and Interpretations and we are currently reviewing them to measure the potential impact on our consolidated financial statements. At this stage, we do not anticipate any significant impact.

1 Basis of consolidation

Our consolidated financial statements include the accounts of CGG Veritas and all majority-owned subsidiaries.

We use the equity method for investments in which our ownership interest ranges from 20% to 50% and we exercise significant influence over operating and financial policies. We may account for certain investments where the Group's ownership is below 20% using the equity method when we exercise significant influence (Board membership or equivalent) over the business.

All inter-company transactions and accounts are eliminated in consolidation.

Our consolidated financial statements are reported in euros.

2 Foreign currency

The financial statements of all of our French subsidiaries are maintained in euro, with the exception of the financial statements of certain subsidiaries for which the functional currency is the U.S. dollar, the currency in which they primarily conduct their business.

The financial statements of all of our foreign subsidiaries are maintained in the local currency, which is the functional currency, with the exception of the financial statements of historical subsidiaries of CGG operating in Norway (including notably some subsidiaries of Exploration Resources), in Malaysia, Venezuela and historical subsidiaries of

Veritas (excluding Canada). In those subsidiaries, the functional currency is the U.S. dollar, the currency in which they primarily conduct their business. Goodwill attributable to foreign subsidiaries is accounted for in the functional currency of the applicable entities.

When translating the foreign currency financial statements of foreign subsidiaries to euro, year-end exchange rates are applied to balance sheet items, while average annual exchange rates are applied to income statement items. Adjustments resulting from this process are recorded in a separate component of shareholders' equity. With respect to foreign affiliates accounted for using the equity method, the effects of exchange rates changes on the net assets of the affiliate are recorded in a separate component of shareholders' equity.

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Transactions denominated in currencies other than the functional currency of a given entity are recorded at the exchange rate prevailing on the date of the transaction. Monetary assets and liabilities denominated in foreign currencies other than the functional currency are re-evaluated at year-end exchange rates and any resulting unrealized exchange gains and losses are included in income.

3 Business combinations

Business combinations after January 1, 2004 are accounted for in accordance with IFRS 3. Assets and liabilities acquired under a business combination are recognized at their fair value at the date of acquisition. The remaining difference between the fair value of assets and liabilities acquired and the consideration tendered in an acquisition is recorded as goodwill and allocated to the cash generating units.

4 Operating revenues

Operating revenues are recognized when they can be measured reliably, and when it is likely that the economic benefits associated with the transaction will flow to the entity, which is at the point that such revenues have been realized or are considered realizable. For contracts where the percentage of completion method of accounting is being applied, revenues are only recognized when the costs incurred for the transaction and the cost to complete the transaction can be measured reliably and such revenues are considered earned and realizable.

Multi-client surveys

Multi-client surveys consist of seismic surveys to be licensed to customers on a non-exclusive basis. All costs directly incurred in acquiring, processing and otherwise completing seismic surveys are capitalized into the multi-client surveys. The value of our multi-client library is stated on our balance sheet at the aggregate of those costs less accumulated amortization or at fair value if lower. We review the library for potential impairment of our independent surveys on an ongoing basis.

Revenues related to multi-client surveys result from (i) pre-commitments and (ii) licenses after completion of the surveys (after-sales).

Pre-commitments Generally, we obtain commitments from a limited number of customers before a seismic project is completed. These pre-commitments cover part or all of the survey area blocks. In return for the commitment, the customer typically gains the right to direct or influence the project specifications, advance access to data as it is being acquired, and favorable pricing. The Company records payments that it receives during periods of mobilization as advance billing in the balance sheet in the line item Advance billings to customers .

The Company recognizes pre-commitments as revenue when production is begun based on the physical progress of the project.

After sales Generally, we grant a license entitling non-exclusive access to a complete and ready for use, specifically defined portion of our multi-client data library in exchange for a fixed and determinable payment. We recognize after

sales revenue upon the client executing a valid license agreement and having been granted access to the data. Within thirty days of execution and access, the client may exercise our warranty that the medium on which the data is transmitted (a magnetic cartridge) is free from technical defects. If the warranty is exercised, the Company will provide the same data on a new magnetic cartridge. The cost of providing new magnetic cartridges is negligible.

After sales volume agreements We enter into a customer arrangement in which we agree to grant licenses to the customer for access to a specified number of blocks of the multi-client library. These arrangements typically enable the customer to select and access the specific blocks for a limited period of time. We recognize revenue when the blocks are selected and the client has been granted access to the data and if the corresponding revenue can be

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

reliably estimated. Within thirty days of execution and access, the client may exercise our warranty that the medium on which the data is transmitted (a magnetic cartridge) is free from technical defects. If the warranty is exercised, the Company will provide the same data on a new magnetic cartridge. The cost of providing new magnetic cartridges is negligible.

Exclusive surveys

In exclusive surveys, we perform seismic services (acquisition and processing) for a specific customer. We recognize proprietary/contract revenues as the services are rendered. We evaluate the progress to date, in a manner generally consistent with the physical progress of the project, and recognize revenues based on the ratio of the project cost incurred during that period to the total estimated project cost. We believe this ratio to be generally consistent with the physical progress of the project.

The billings and the costs related to the transit of seismic vessels at the beginning of the survey are deferred and recognized over the duration of the contract by reference to the technical stage of completion.

In some exclusive survey contracts and a limited number of multi-client survey contracts, the Company is required to meet certain milestones. The Company defers recognition of revenue on such contracts until all milestones that provide the customer a right of cancellation or refund of amounts paid have been met.

Other geophysical services

Revenues from our other geophysical services are recognized as the services are performed and, when related to long-term contracts, using the proportional performance method of recognizing revenues.

Equipment sales

We recognize revenues on equipment sales upon delivery to the customer. Any advance billings to customers are recorded in current liabilities.

Software and hardware sales

We recognize revenues from the sale of software and hardware products following acceptance of the product by the customer at which time we have no further significant vendor obligations remaining. Any advance billings to customers are recorded in current liabilities.

If an arrangement to deliver software, either alone or together with other products or services, requires significant production, modification, or customization of software, the entire arrangement is accounted for as a production-type contract, i.e. using the percentage of completion method.

If the software arrangement provides for multiple deliverables (e.g. upgrades or enhancements, post-contract customer support such as maintenance, or services), the revenue is allocated to the various elements based on specific objective evidence of fair value, regardless of any separate allocations stated within the contract for each element.

is appropriately accounted for under the applicable accounting standard.

Maintenance revenues consist primarily of post contract customer support agreements and are recorded as advance billings to customers and recognized as revenue on a straight-line basis over the contract period.

5 *Cost of net financial debt*

Cost of financial debt is expensed in the income statement on the period in which it is borne, regardless of the use of funds borrowed.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Cost of net financial debt includes expenses related to financial debt, composed of bonds, the debt component of convertible bonds, bank loans, capital-lease obligations and other financial borrowings, net of income provided by cash and cash equivalents.

6 *Income taxes and deferred taxes*

Income taxes includes all tax based on taxable profit.

Deferred taxes are recognized on all temporary differences between the carrying value and the tax value of assets and liabilities, as well as on carry-forward losses, using the liability method. Deferred tax assets are recognized only when its recovery is probable.

Deferred tax liabilities are recognized on intangibles assets valued in purchase accounting of business combinations (technological assets, customer relationships).

Deferred tax assets and deferred tax liabilities are not discounted.

7 *Intangible and tangible assets*

In accordance with IAS 16 *Property, Plant and equipment* and IAS 38 *Intangible assets* only items for which cost can be reliably measured and for which the future economic benefits are likely to flow to us are recorded in our consolidated financial statements.

Property, plant and equipment

Property, plant and equipment are valued at historical cost less accumulated depreciation and impairment losses. Depreciation is generally calculated over the following useful lives:

equipments and tools	3 to 10 years
vehicles	3 to 5 years
seismic vessels	12 to 30 years
buildings for industrial use	20 years
buildings for administrative and commercial use	20 to 40 years

Starting from September 1, 2005, the date at which we acquired Exploration Resources, we harmonized the useful life of our vessels to 30 years. The impact of this change in estimate for the period through December 31, 2005 was a reduction of depreciation expenses of 0.8 million.

Depreciation expense is determined using the straight-line method.

We include residual value, if significant, when calculating the depreciable amount. We segregate tangible assets into their separate components if there is a significant difference in their expected useful lives, and depreciate them accordingly.

Lease agreements

Assets under a capital lease agreement or a long-term lease agreement that transfers substantially all the risks and rewards incidental to ownership to the Group are accounted for as fixed assets at the commencement of the lease term, at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Minimum lease payments are apportioned between the finance charge and the reduction of the outstanding liability and the finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Assets under capital lease are depreciated over the shorter of its useful life and the lease term, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term.

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Rent payments under operating leases are recognized as operating expenses over the lease term.

Goodwill

Goodwill is determined according to IFRS 3 Business Combinations. Upon transition to IFRS, goodwill is not amortized but subject to an annual impairment test.

Multi-client surveys

Multi-client surveys consist of seismic surveys to be licensed to customers on a non-exclusive basis. All costs directly incurred in acquiring, processing and otherwise completing seismic surveys are capitalized into the multi-client surveys (including transit costs when applicable). The value of our multi-client library is stated on our balance sheet at the aggregate of those costs less accumulated amortization or at fair value if lower. We review the library for potential impairment of our independent surveys on an ongoing basis.

We amortize the multi-client surveys over the period during which the data is expected to be marketed using a pro-rata method based on recognized revenues as a percentage of total estimated sales.

In this respect, we use four amortization rates 50%, 75%, 80% or 83.3% of revenues depending on the category of the surveys. Multi-client surveys are classified into a same category when they are located in the same area with the same estimated sales ratio, such estimates generally relying on the historical patterns.

For all category of surveys and starting from data delivery, a minimum straight-line depreciation scheme is applied over a five-year period, if total accumulated depreciation from the applicable amortization rate is below this minimum level.

Multi-client surveys acquired as part of the business combination with Veritas and which have been valued for purchase price allocation purposes are amortized based on 65% of revenues and an impairment loss is recognized on a survey by survey basis in case of any indication of impairment.

Until December 1, 2006, an amortization rate of 66.6% of revenues with a minimum straight-line depreciation over a three-year period were used instead of 50% over a five-year period. The impact of this change of estimates applied from December 1, 2006 was a reduction in depreciation expenses of 1.2 million over the year ended December 31, 2006 and lower depreciation of 2.7 million over the year ended December 31, 2007.

From January 12, 2007 to October 1, 2007, we applied an amortization rate of 66.6% of revenues instead of 50% for a certain category of surveys. The impact of this change of estimates applied from October 1, 2007 is a reduction in depreciation expenses of 3.1 million for the year ended December 31, 2007.

Development costs

Expenditures on research activities undertaken with the prospect of gaining new scientific or technological knowledge and understanding are recognized in the income statement as expenses as incurred and are presented as Research and development expenses net .

Expenditures on development activities, whereby research findings are applied to a plan or design for the production of new or substantially improved products and processes, are capitalized if:

the project is clearly defined, and costs are separately identified and reliably measured,

the product or process is technically and commercially feasible,

we have sufficient resources to complete development, and

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

the intangible asset is likely to generate future economic benefits, either because it is useful to us or through an existing market for the intangible asset itself or for its products.

The expenditures capitalized include the cost of materials, direct labor and an appropriate proportion of overhead. Other development expenditures are recognized in the income statement as expenses as incurred and are presented as Research and development expenses net .

Capitalized development expenditures are stated at cost less accumulated amortization and impairment losses.

We amortize capitalized developments costs over 5 years.

Research & development expenses in our income statement represent the net cost of development costs that are not capitalized, of research costs, offset by government grants acquired for research and development.

Impairment

In accordance with IAS 36 Impairment of assets , the carrying amounts of our assets, other than inventories and deferred tax assets, are reviewed at each balance sheet date to determine whether there is any indication of impairment. If any such indication exists, we estimate the asset s recoverable amount. Factors we consider important by that could trigger an impairment review include the following:

significant underperformance relative to expected operating results based upon historical and/or projected data,

significant changes in the manner of our use of the acquired assets or the strategy for our overall business, and

significant negative industry or economic trends.

The recoverable amount of tangible and intangible assets is the greater of their net fair value less costs to sell and value in use.

Goodwill, assets that have an indefinite useful life and intangible assets are allocated to cash generating units, for which we estimate the recoverable amount at each balance sheet closing date.

We determine the recoverable amounts by estimating future cash flows expected from the assets or from the cash generating units, discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

We recognize an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Impairment losses are recognized in the income statement. Impairment losses recognized in respect of a group of non independent assets allocated to a cash-generating unit are allocated first to reduce the carrying amount of any goodwill allocated to cash-generating units (group of units) and then, to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

Assets held for sale

Assets classified as assets held for sale correspond to assets for which the net book value will be recovered by a sale rather than by its use in operations. Assets held for sale are valued at the lower of historical cost and net realizable value.

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

8 *Investments and other financial assets*

Investments and other financial assets include investments in non-consolidated entities and loans and non-current receivables.

Investments in non-consolidated entities

In accordance with IAS 39 *Financial instruments*, we classify investments in non-consolidated companies as available-for-sale and therefore present them on the balance sheet at their fair value. The fair value for listed securities is their market price at the balance sheet date. If a reliable fair value cannot be established, securities are valued at historical cost. We account for changes fair value directly in shareholders' equity.

Loans and non-current receivables

Loans and non-current receivables are accounted for at amortized cost.

Impairment

We examine non-consolidated securities and other financial assets at each balance sheet date to detect any objective evidence of impairment. Where this is the case, we record an impairment loss.

Where there is objective evidence of impairment of a financial asset (for instance in case of significant and prolonged decline of the value of the asset) we record an irreversible impairment provision. This provision can only be released upon the sale of the relevant financial asset.

9 *Treasury shares*

We value treasury shares at their cost, as a reduction of shareholders' equity. Proceeds from the sale of treasury shares are included in shareholders' equity and have no impact on the income statement.

10 *Inventories*

We value inventories at the lower of cost (including direct production costs where applicable) and net realizable value.

We calculate the cost of inventories on a weighted average price basis for our Equipment segment and on a first-in first-out basis for our Services segment.

11 *Provisions*

We record a provision when the Group has a present obligation (legal or constructive) as a result of a past event for which it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation.

Onerous contracts

We record a provision for onerous contracts equal to the excess of the unavoidable costs of meeting the obligations under the contract over the economic benefits expected to be received under it, as estimated by the Group.

F-13

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Pension, post-employment benefits and other post-employment benefits

Defined contribution plans

We record obligations for contributions to defined contribution pension plans as an expense in the income statement as incurred.

Defined benefit plans

Our net obligation in respect of defined benefit pension plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value, and the fair value of any plan assets is deducted. We perform the calculation by using the projected unit credit method.

When the benefits of a plan are increased, the portion of the increased benefit relating to past service by employees is recognized as an expense in the income statement on a straight-line basis over the average period until the benefits become vested. To the extent that the benefits vest immediately, the expense is recognized immediately in the income statement.

We record actuarial gains and losses that arise subsequent to the adoption of IAS 19 on January 1, 2004 directly in equity.

12 Financial debt

Financial debt is accounted for:

As at the date of issuance, at the fair value of the consideration received, less issuance fees and/or issuance premium;

subsequently, at amortized cost, corresponding to the fair value at which is initially recognized, less repayments at the nominal amount and increased or decreased for the amortization of all differences between this original fair value recognized and the amount at maturity; differences between the initial fair value recognized and the amount at maturity are amortized using the effective interest rate method.

Convertible bonds

As the US\$85 million 7.75% subordinated bonds due 2012 convertible into new ordinary shares or redeemable into new shares and/or existing shares and/or in cash issued in 2004 were denominated in U.S. dollars and convertible into new ordinary shares denominated in Euros, the embedded conversion option was bifurcated and accounted for separately within non-current liabilities. The conversion option and the debt component were initially recognized at fair value on issuance. The amount of the debt component recorded in our financial statements was discounted at the rate of 10.75%, the rate borne by comparable indebtedness without a conversion option. As a result, we bifurcated the embedded conversion option by 10.5 million at issuance as Other non-current assets. The discounting of the debt at

issuance is accounted for as Cost of financial debt until the maturity of the convertible bonds. Those convertible bonds were fully converted at December 31, 2006.

Changes of the fair value of the embedded derivative were recognized in the consolidated income statement in the line item Variance on derivative convertible bonds . The fair value of the embedded derivative had been determined using a binomial model.

13 Derivative financial instruments

We use derivative financial instruments to hedge our exposure to foreign exchange fluctuations (principally U.S. dollars) from operational, financing and investment activities. In accordance with our treasury policy, we do

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

not hold or issue derivative financial instruments for trading purposes. However, derivatives that do not qualify for hedge accounting are accounted for as trading instruments in Other financial income (loss) .

Exchange gains or losses on foreign currency financial instruments that represent the efficient portion of an economic hedge of a net investment in a foreign subsidiary are reported as translation adjustments in shareholder s equity under the line item Cumulative translation adjustments , the inefficient portion being recognized in the income statement. The cumulative value of foreign exchange gains and losses recognized directly in equity will be transferred to income statement when the net investment is sold or lost.

Derivative financial instruments are stated at fair value.

The gain or loss on reassessment to fair value is recognized immediately in the income statement. However, where derivatives qualify for hedge accounting, recognition of any resulting gain or loss is as follows (cash flow hedges), we account for changes in the fair value of the effective hedged amount in shareholder s equity. The ineffective portion is recorded in Other financial income (loss) .

14 Cash-flow statement

The cash flows of the period are presented in the cash flow statement within three activities: operating, investing and financing activities:

Operating activities

Operating activities are the principal revenue-producing activities of the entity and other activities that are not investing or financing activities.

Investing activities

Investing activities are the acquisition and disposal of long-term assets and other investments not included in cash equivalents. When a subsidiary is acquired, a separate item, corresponding to the consideration paid net of cash and cash equivalents held by the subsidiary at the date of acquisition, provides the cash impact of the acquisition.

Financing activities

Financing activities are activities that result in changes in the size and composition of the contributed equity and borrowings of the entity. They include the cash impact of financial expenses.

Cash and cash equivalents

Cash and cash equivalents are liquid investments that are readily convertible to known amounts of cash in less than three months.

15 Stock-options

We include stock-options granted to employees in the financial statements using the following principles: the stock option's fair value is determined on the grant date and is recognized in personnel costs on a straight-line basis over the period between the grant date and the end of the vesting period. We calculate stock option fair value using the Black-Scholes model.

16 Grants

Government grants, including non-monetary grants at fair value, are not recognized until there is reasonable assurance that the entity will comply with the conditions of the grant and that the grants will be received.

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Government grants are recognized as income over the periods necessary to match them with the related costs which they are intended to compensate. They are presented as a reduction of the corresponding expenses in the item Research and development expenses, net in the income statement.

Refundable grants are presented in the balance sheet as Other non-current liabilities .

17 Earnings per share

Basic per share amounts are calculated by dividing net income for the year attributable to ordinary equity holders of the Company by the weighted average number of ordinary shares outstanding during the year.

Diluted earnings per share amounts are calculated by dividing the net income attributable to ordinary equity holders of the Company (after deducting interest, amortization on deferred expenditures and variance on derivative related to convertible bonds) by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued on the conversion of convertible bonds and the exercise of stock options.

NOTE 2 ACQUISITIONS AND DIVESTITURES

during 2007

Veritas

On September 4, 2006, CGG entered into a definitive merger agreement with Veritas DGC Inc. (Veritas) to acquire Veritas in a part cash, part stock transaction. The merger was completed on January 12, 2007 upon satisfaction of the closing conditions of the merger agreement. The combined company has been renamed Compagnie Générale de Géophysique-Veritas, abbreviated as CGG Veritas , and is listed on both the Euronext Paris and the New York Stock Exchange (in ADS form). The trading symbol of the combined company s ADS on the New York Stock Exchange is CGV .

At the merger closing date, and according to the formula set out in the merger agreement, the per share cash consideration to holders of Veritas stock was US\$85.50 and the per share stock consideration was 2.0097 CGG Veritas ADSs upon the election of Veritas shareholders. Of the 40,420,483 shares of Veritas common stock outstanding as of the merger date (January 12, 2007), approximately:

33,004,041 of the shares, or 81.7%, had elected to receive cash,

5,788,701 of the shares, or 14.3%, had elected to receive CGG ADSs; and

1,627,741 of the shares, or 4.0%, did not make a valid election.

Stockholders electing cash received, on average, 0.9446 CGV ADSs and US\$45.32 in cash per share of Veritas common stock. Stockholders electing ADSs and stockholders making no valid election received 2.0097 CGV ADSs

per share of Veritas common stock. In aggregate, approximately US\$1.5 billion and approximately 46.1 million shares of CGV ADSs were paid to Veritas stockholders as merger consideration. Based on a valuation of CGV's ADS at US\$40.5 on January 12, 2007, the total consideration of the merger amounted to approximately 2.7 billion (US\$3.5 billion).

Total direct transaction costs related to the merger (including advisory fees and legal fees) amounted to 26.3 million (US\$34.6 million) and were recognized as cost of the acquisition.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)***Purchase price allocation*

The purchase price has been allocated to the net assets acquired based upon their estimated fair values as follows:

	(in million of euros)
Fixed assets, net	448
Current assets / (liabilities), net	43
Cash & cash equivalents	97
Net book value of assets acquired	588
Fair Value Adjustments	
Trade name (indefinite life)	23
Technology (useful life of 5 years)	31
Customer relationship (useful life of 20 years)	130
Multi-client seismic library (maximum life of 6 years)	73
Favorable contracts (weighted average remaining life of 5 years)	52
Fixed assets (weighted average remaining life of 3 years)	24
Other intangible assets	23
Contingent liabilities	(40)
Other liabilities	(24)
Deferred taxes on the above adjustments	(106)
Goodwill	1,884
Purchase Price	2,658

The amount allocated to goodwill represents the excess of the purchase price over the fair value of the net assets acquired.

Technology, customer relationships and other intangible assets

Amortization expense related to technologies and customer relationships acquired was 12.0 million (US\$16.4 million) for the year ended December 31, 2007 and is expected to be US\$17.0 million per year over the useful life.

Other intangible assets relate to exploration and appraisal licenses in the U.K. North Sea that were sold in February 2007 for a net amount of US\$27.5 million and an asset sold in Canada for US\$2.3 million. Neither amortization expense nor gain was recognized in the year ended December 31, 2007.

Favorable contracts and fixed assets

The fair values of Veritas' favorable contracts correspond essentially to the difference in economic terms between Veritas' existing vessel charters' conditions and their market value at the date of the acquisition.

Amortization expense related to favorable contracts acquired was 11.5 million (US\$15.7 million) for the year ended December 31, 2007 and is expected to be US\$16.2 million per year over the remaining life.

In determining the fair value of the fixed assets, it was considered that the remaining useful life of the fixed assets acquired exceeded the estimated useful life currently being used for amortization expense. Therefore, the combined effect of the fair value adjustments and the change in estimate of the useful life of the assets resulted in a net reduction of depreciation cost of 3.3 million (US\$4.5 million) for the year ended December 31, 2007.

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Multi-client data library

After consideration of the estimated number of future years that revenues are expected to be generated from the completed surveys of the multi-client data library at the time of the transaction, CGG Veritas concluded that the remaining life of the completed surveys was a maximum of 6 years. The fair value of these surveys was determined by projecting the expected future revenues net of selling costs over the estimated remaining life of the surveys at the date of acquisition.

The US\$285 million of total capitalized multi-client data costs, including a US\$96 million adjustment, will be amortized pro rata the percentage of revenues generated and, in case of any indication of impairment, an impairment loss will be recognized. The net impact of the US\$96 million fair value adjustment combined with the estimated remaining life of the surveys resulted in an additional amortization expense of 27.5 million (US\$37.6 million) for the year ended December 31, 2007.

Contingent liabilities and Other liabilities

Due to the merger and the change of control of Veritas, contractual obligations related to a portion of severance costs for certain Veritas employees have been recognized for an amount of US\$21 million (16 million) as well as success fees for an amount of approximately US\$30 million.

Geomar

Geomar is a subsidiary, owned 49% by CGG Veritas and 51% by Louis Dreyfus Armateurs (LDA), that has owned the seismic vessel Alizé since March 29, 2007. On April 1, 2007, Geomar entered into a new charter agreement with LDA and LDA entered into a new charter agreement with CGG Services. Additionally, on April 10, 2007, CGG Services acquired a call right and LDA a put on the 51% stake of Geomar held by LDA. In light of the risks and benefits related to these new agreements for CGG Veritas, Geomar has been fully consolidated in our financial statements since April 1, 2007. Prior to that date, Geomar was accounted for under the equity method.

Cybernetix

On June 27, 2007, Sercel Holding acquired 121,125 Cybernetix shares bringing its total holding to 352,125 shares, representing voting rights for 32.01% of Cybernetix s share capital and 26.57% of its voting rights. On November 5, 2007, Sercel Holding increased its investment for a total amount of 0.8 million, bringing its total holding to 416,147 shares, representing voting rights for 32.20% . Since June 30, 2007, Cybernetix has been accounted for under the equity method in our financial statements.

Offshore Hydrocarbon Mapping

On July 17, 2007, we entered into strategic joint operating agreement with Offshore Hydrocarbon Mapping plc (OHM) under which both companies will work together to develop the Controlled Source ElectroMagnetic imaging activities (CSEM) and on seismic and CSEM integration opportunities. On August 21, 2007, subsequent to the approval by the shareholders of OHM, we acquired 6,395,571 shares of OHM at a price of 240 GBP pence per share.

On October 19, 2007, we acquired an additional 80,695 shares at a price of 240 GBP pence per share. We thus paid in total 22.9 million for 14.99% of OHM's issued share capital.

Eastern Echo Holding Plc

On November 12, 2007, we acquired 30.9 million shares of Eastern Echo Holding plc (ECHO NO) for a total consideration of approximately 55 million (NOK 431 million), representing 12.67% of Eastern Echo's issued share capital. Eastern Echo is a geophysical company specializing in acquisition of high quality 3D seismic data.

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Our intent, with this minority stake, was to best position ourselves, especially Sercel, for continuing cooperation with Eastern Echo in the expanding seismic market.

On November 23, 2007, further the cash offer launched by Schlumberger BV on November 16, 2007, we tendered our shares of Eastern Echo to Schlumberger BV at price of NOK 15 per share. We therefore recognized a gain of 2.8 million.

during 2006

TAQA

On June 24, 2006, Industrialization & Energy Services Company (TAQA), our long term Saudi 51% Partner in Arabian Geophysical and Surveying Company (Argas), acquired, for 16.8 million, 49% of the capital of CGG Ardiseis, a newly formed CGG subsidiary dedicated to land and shallow water seismic data acquisition in the Middle East, and the company maintained a 51% interest. CGG Ardiseis, whose headquarters are located in Dubai, provides its clients with the complete range of CGG land and shallow water acquisition services, focusing on Eye-D, the latest CGG technology for full 3D seismic imaging. As part of our agreement with TAQA, CGG Ardiseis activities in the Gulf Cooperation Council countries are operated by Argas.

Cybernetix

On July 10 2006, Sercel acquired a 20% interest (17% of voting rights) in the French listed company Cybernetix, a specialist in robotics, with the aim of strengthening our technical partnership with Cybernetix in offshore oil equipment, and an additional 1% by the end of the year 2006. The aggregate consideration for the transactions is 4.0 million.

Vibtech

On September 28, 2006, Sercel acquired the Scottish company Vibration Technologies Limited (Vibtech), pioneer in the use of advanced wireless technologies for seismic recording. The Unite system, and field trials of this new generation equipment, which have attracted interest from both oil companies and seismic contractors, is a unique versatile product capable of recording and transmitting data in a stand alone or real time mode, enabling quality control while recording and is capable of handling thousands of channels. Use of new transmission technologies also reduces limitations inherent to radio frequencies. We expect that the combination of Sercel expertise in seismic recording and new skills arising from Vibtech 's development group will help expand the capabilities of the Sercel portfolio of products and integrate advanced wireless technology with its latest generation products. The cash consideration was 49.5 million (GBP 33.3 million) and our valuation of technological assets purchased of 11.6 million more (GBP 7.8 million), led us to record a goodwill of 35.6 million. The cash acquired was an amount of 1.3 million (GBP 0.9 million).

during 2005

PT Alico

On February 14, 2005, we ended our cooperation agreements with PT Alico, an Indonesian company. On that date, PT Alico, which was fully consolidated in our accounts until 2004 as a consequence of our contractual relationship with them, was excluded from our scope of consolidation. Under our agreements with PT Alico, we indemnified them against certain specific risks. This liability is limited and was accrued in our financial statements as of December 31, 2004. The liability expired on June 30, 2006, since then we have no further commitment to PT Alico or its shareholders.

F-19

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)***CGG Vostok*

On July 27, 2005, we funded a new fully owned company in Russia named CGG Vostok, to perform seismic services. CGG Vostok has been consolidated from the date of its creation.

Exploration Resources

On August 29, 2005, we acquired a controlling stake of approximately 60% of Exploration Resources ASA (Exploration Resources), a Norwegian provider of marine seismic acquisition services, at a purchase price of approximately NOK 340 per share corresponding to a premium of 8.3% over the last stock price of Exploration Resources shares before the notice of the operation (NOK 314).

We continued to acquire shares of Exploration Resources until we acquired 100% of the shares by the end of October 2005 for an average price excluding fees of NOK 338.27 per share: first by acquisitions on the market; then in a combined mandatory offer followed by a squeeze-out; then by mutual agreements with the management of Exploration Resources that held stock-options; eventually in a specific agreement with the minority shareholders of Multiwave Geophysical Company ASA (Multiwave), Exploration Resources s subsidiary focusing on seabed acquisition, as a consequence of the merger of this entity with Exploration Seismic AS, a fully owned subsidiary of Exploration Resources.

The total cost to us of the acquisition was 303.3 million, including 8.6 million related to acquisition fees and including the price of further shares acquired in October 2005. The reassessment of Exploration Resources net assets, along with a seismic business economic perspective, led us to increase the book value of the vessels by 116.5 million at September 1, 2005 and to recognize the corresponding deferred tax liabilities. The vessels were valued using combined valuation methods of which, particularly, the present value of cash flows that will be generated by the vessels.

On the basis of these elements, the purchase accounting for Exploration Resources at historical rates is as follows at December 31, 2006:

	(in million of euros)
Total acquisition of Exploration Resources shares	294.7
Acquisition fees	8.6
Total acquisition price	303.3
Cash and cash equivalents acquired	37.4
Fair value of fixed assets acquired	188.7
Deferred tax liabilities net assumed	(31.9)
Other assets and liabilities acquired	(70.8)
Definitive fair value of net assets acquired	123.4
Definitive goodwill	179.9

The reassessment of Exploration Resources assets resulted in a definitive goodwill of 179.9 million at December 31, 2006.

The results of Exploration Resources are included in our consolidated financial statements from September 1, 2005.

For the year ended December 31, 2005, Exploration Resources contributed 28.8 million to the consolidated operating revenues of the Group and 6.4 millions to the net consolidated income of the Group. If the business combination would have occur at the beginning of the year, the loss for the Group would have been 21.5 million, mainly due to interest expense linked to the financing of the acquisition and the operating revenues would have been 932.1 million.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****NOTE 3 TRADE ACCOUNTS AND NOTES RECEIVABLE**

Analysis of trade accounts and notes receivables by maturity is as follows:

	December 31		
	2007	2006	2005
	(in million of euros)		
Trade accounts and notes receivable gross current portion	409.1	207.5	240.0
Less: allowance for doubtful accounts	(6.8)	(8.3)	(6.2)
Trade accounts and notes receivables net current portion	402.3	199.2	233.8
Trade accounts and notes receivable gross long term portion	3.3	4.3	12.0
Less: allowance for doubtful accounts			
Trade accounts and notes receivables net long term portion	3.3	4.3	12.0
Recoverable costs and accrued profit, not billed	196.3	97.6	51.7
Total accounts and notes receivables	601.9	301.1	297.5

In the geophysical services segment, customers are generally large national or international oil and gas companies, which management believes reduces potential credit risk. In the geophysical equipment segment, a significant portion of sales is paid by irrevocable letters of credit.

The Group maintains an allowance for doubtful accounts based upon factors surrounding the credit risk of specific customers, historical trends and other information. Credit losses have not been material for the periods presented and have consistently been within management's expectations.

Recoverable costs and accrued profit not billed comprise amounts of revenue recognized under the percentage of completion method on contracts for which billings had not been presented to the contract owners. Such unbilled accounts receivable are generally billed over the 30 or 60 days following the project commencement.

The long-term receivables as of December 31, 2007 amounted to 3.3 million for the geophysical equipment segment. The long-term receivables as of December 31, 2006 amounted to 1.4 million for the geophysical services segment and to 2.9 million for the geophysical equipment segment. The long-term receivables as of December 31, 2005 amounted to 11.3 million for the geophysical services segment and to 0.7 million for the geophysical equipment segment.

As of December 31, 2007, the ageing analysis of trade receivables is as follows:

	No past due	< 30 days	Past due but not impaired				> 120 days	Total
			30 - 60 days	60 - 90 days	90 - 120 days			
Trade accounts and notes receivables net	295.0	53.2	18.6	14.2	4.2	20.4	405.6	

(in million of euros)

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****NOTE 4 INVENTORIES AND WORK IN PROGRESS**

Analysis of Inventories and work-in-progress is as follows:

	December 31, 2007			December 31, 2006			December 31, 2005		
	Cost	Valuation Allowance	Net	Cost	Valuation Allowance	Net	Cost	Valuation Allowance	Net
	(in million of euros)								
<i>Geophysical services</i>									
Consumables and spares parts	38.5	(1.0)	37.5	30.3	(1.1)	29.2	23.1	(1.1)	22.0
Work in progress	30.3		30.3	8.0		8.0	7.6		7.6
<i>Geophysical equipment</i>									
Raw materials and spare parts	67.3	(7.9)	59.4	62.6	(8.0)	54.6	45.4	(6.9)	38.5
Work in progress	78.9	(4.1)	74.8	73.8	(4.3)	69.5	51.0	(5.7)	45.3
Finished goods	39.9	(1.7)	38.2	30.3	(2.9)	27.4	30.1	(4.0)	26.1
Inventories and work in progress	254.9	(14.7)	240.2	205.0	(16.3)	188.7	157.2	(17.7)	139.5

The item « Work in progress » for Geophysical Services includes transit costs of seismic vessels that are deferred and recognized over the contract period according to the technical progress ratio.

The variation of inventories and work in progress is as follows:

Variation of the period	December 31,	December 31,	December 31,
	2007	2006	2005
	(in million of euros)		
Balance at beginning of period	188.7	139.5	86.8
Variations	40.3	39.3	46.6
Movements in valuation allowance	1.0	0.7	(1.3)
Change in consolidation scope	18.7	3.1	1.1
Change in exchange rates	(8.7)	(4.6)	4.3
Others	0.2	10.7	2.0
Balance at end of period	240.2	188.7	139.5

The additions and deductions in valuation allowances for inventories and work-in-progress are presented in the statement of operations as Cost of sales .

The change in scope of consolidation in 2007 relates to the acquisition of Veritas.

NOTE 7 INVESTMENTS AND OTHER FINANCIAL ASSETS

Detail of investments and other financial assets is as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
Non-consolidated investments	21.1	8.9	3.7
Loans and advances ^(a)	0.6	6.8	7.3
Other	10.3	3.5	4.3
Total	32.0	19.2	15.3

(a) includes loans and advances to companies accounted for under the equity method, at December 31, 2006 for 6.0 million, and at December 31, 2005 for 6.6 million.

Non-consolidated investments included in «Other financial investments» are presented as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
<i>Assets available for sale</i>			
Offshore Hydrocarbon Mapping ^(a)	16.4		
<i>Other investments in non-consolidated companies</i>			
Cybernetix ^(b)		4.1	
Tronic s Microsystems SÅ)	3.9	3.9	3.5
Other investments in non-consolidated companies	0.8	0.9	0.2
Total non-consolidated investments	21.1	8.9	3.7

- (a) The Group's shareholding in Offshore Hydrocarbon Mapping was 14.99% at December 31, 2007. As it is listed on Alternative Investment Market (London Stock Exchange), Offshore Hydrocarbon Mapping is recognized at the fair value based on closing share price of 185.50 GBP pence as of December 31, 2007. The change in fair value recognized in shareholders' equity is a negative amount of 6.9 million as of December 31, 2007; we have considered that the decrease in value of OHM share price is not reflective of a durable loss in value.

F-24

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

- (b) The Group's shareholding in Cybernetix was 21% interest and 17% of voting rights at December 31, 2006. Since June 30, 2007, Cybernetix has been accounted for under the equity method in our financial statements due to additional 112,125 shares acquired leading to 32.01% voting rights.
- (c) The Group's shareholding in Tronic's Microsystems S.A. was 16.07% at December 31, 2007, 15.90% at December 31, 2006 and 14.70% at December 31, 2005.

NOTE 8 INVESTMENTS IN COMPANIES UNDER EQUITY METHOD

The variation of Investments in companies under equity method is as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
Balance at beginning of period	46.2	43.9	30.8
Change in consolidation scope	2.1		
Investments made during the year	0.9	1.0	
Equity in income	4.2	10.1	13.0
Dividends received during the period, reduction in share capital	(5.3)	(4.3)	(4.5)
Changes in exchange rates	(3.6)	(4.5)	4.6
Balance at end of period	44.5	46.2	43.9

The change in consolidation scope in 2007 corresponds to :

The exit of Geomar which is fully consolidated since April 1, 2007 for 5.4 million;

The entrance of Cybernetix which is accounted for under equity method since June 30, 2007 for 7.5 million (see note 2).

The investments in 2007 correspond to the subscription of the capital increase in Cybernetix.

The investments in 2006 correspond to the subscription of the capital increase in VS Fusion LLC.

Investments in companies accounted for under equity method are comprised of:

	December 31,		
	2007	2006	2005

	(in million of euros)		
Argas	32.8	37.5	36.5
Cybernetix	8.2		
Geomar		5.4	5.5
JV Xian Peic/Sercel Limited	2.4	2.4	2.4
VS Fusion LLC	1.1	0.9	(0.5)
Investments in companies under the equity method	44.5	46.2	43.9

Investments in companies accounted for under the equity method are presented at December 31, 2005 in the balance sheet as Investments in companies under the equity method for 44.4 million in assets and as Provisions non-current portion by 0.5 million in liabilities.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

The net contribution to equity of affiliates accounted for under the equity method is as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
Argas	28.5	33.2	32.2
Cybernetix	(0.3)		
Geomar		(0.2)	(0.2)
JV Xian Peic/Sercel Limited	0.7	0.9	0.8
VS Fusion LLC	0.1	(0.3)	(0.5)
Total	29.0	33.6	32.3

The key figures relating to Argas' s financial statements are as follows:

	2007	2006	2005
	(in million of euros)		
Current assets	45.7	65.5	57.5
Fixed assets	34.1	21.0	33.5
Current liabilities	6.0	3.7	3.5
Non current liabilities	3.4	4.6	8.7
Gross revenue	52.7	81.1	76.3
Operating profit	6.9	15.5	19.6
Income from continuing operations before extraordinary items and cumulative effect of change in accounting principle	10.3	17.1	20.4
Net income	10.3	17.1	20.4

NOTE 9 PROPERTY, PLANT AND EQUIPMENT

Analysis of Property, plant and equipment is as follows:

	December 31					
	2007	2006	Net	2006	Net	2005
Gross	Accumulated depreciation	Gross		Accumulated depreciation		

(amounts in million of euros)

Land	7.7	(0.2)	7.5	4.7	(0.2)	4.5	4.5
Buildings	83.1	(41.1)	42.0	62.2	(31.6)	30.6	30.7
Machinery & equipment	910.8	(547.9)	362.9	447.6	(263.9)	183.7	161.1
Vehicles & vessels	374.4	(148.5)	225.9	322.8	(101.4)	221.4	268.8
Other tangible assets	50.0	(36.8)	13.2	36.4	(26.9)	9.5	9.9
Assets under constructions	8.5		8.5	5.5		5.5	5.1
Total Property, plant and equipment	1,434.5	(774.5)	660.0	879.2	(424.0)	455.2	480.1

In addition, seismic equipments no longer in use and held to be sold are reclassified as Assets held for sale for 0.4 million at December 31, 2006, was sold for 0.4 million in January 2007.

Seismic equipment, no longer in use and held for sale, was reclassified as Assets held for sale for 3.5 million at December 31, 2005. The seismic equipment was sold in February 2006 for 4.6 million.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Property, plant and equipment are land, buildings and geophysical equipment recorded under capital leases are as follows:

	December 31						2005 Net
	2007 Gross	Accumulated depreciation	Net	Gross	2006 Accumulated depreciation	Net	
Land and buildings under capital leases							5.7
Geophysical equipment and vessels under capital leases	56.1	(17.9)	38.2	72.6	(22.1)	50.5	76.2
Other tangible assets under capital leases	0.4	(0.4)		0.5	(0.5)		
Total Property, plant and equipment under capital leases	56.5	(18.3)	38.2	73.1	(22.6)	50.5	81.9

The decrease of gross geophysical equipment and vessels under capital leases in 2007 is due to the termination of a US\$13 million (10 million) lease and impact of changes in exchange rate.

In July 2006, the time charter party agreement of our seismic vessel, the Laurentian, has been renewed with modified contractual conditions and still qualifies as a capital lease. The total lease obligation is approximately US\$20.8 million (16 million) over its three-year term. The net present value of future lease payments under the capital lease was approximately US\$7.8 million (6 million) and the remaining part of the obligation is accounted for as operating expenses over the agreement duration. The capital lease amount is depreciated over the agreement duration, maturing in September 2008.

In 2005, the time charter party agreement of the seismic vessel *Geochallenger* was qualified as a capital lease. The total lease obligation was US\$36.2 million (30.7 million) over 5 years plus a residual value amounting to NOK 230 million (30 million). Part of this lease obligation related to operating expenses and the net present value of the future lease payments under capital lease (including the residual value) amounted to US\$54.8 million (45.6 million).

In April 2005, the time charter party agreement of the seismic vessel *Laurentian* had been renewed with modified contractual conditions. As a result, it had been qualified as a capital lease. The total lease obligation was US\$27.8 million (23.6 million) over 3 years plus a residual value amounting to US\$7.3 million (6.2 million). Part of this lease obligation related to operating expenses and the net present value of the future lease payments under capital lease (including the residual value) amounted to US\$16.8 million (14.2 million).

Depreciation of assets recorded under capital leases is determined on the same basis as owned-assets and is included in depreciation expense.

Included in assets recorded under capital leases are land and buildings of one of the Group's French offices in Massy, which were sold under a sale and leaseback agreement in 1990, which included a purchase option that was exercised in 2006. The assets were maintained at their original cost and the buildings continue to be depreciated over their initial estimated useful lives.

F-27

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

The variation of the period for tangible assets is as follows :

	December 31,		
	2007	2006	2005
	(in million of euros)		
Balance at beginning of period	455.2	480.1	204.1
Acquisitions	214.1	133.3	107.7
Acquisitions through capital lease		0.1	17.4
Depreciation	(142.2)	(92.8)	(67.9)
Disposals	(7.8)	(3.6)	(6.0)
Changes in exchange rates	(64.4)	(41.1)	35.2
Change in consolidation scope	204.0	(6.5)	195.1
Reclassification of seismic equipments as Assets held for sale		(0.4)	(3.5)
Other	1.1	(13.9)	(2.0)
Balance at end of period	660.0	455.2	480.1

The change in consolidation scope in 2007 corresponds to:

the fair value of Veritas tangible assets acquired for 173.3 million;

the consolidation of Geomar, which is the owner of the seismic vessel Alizé for 30.7 million.

The change in consolidation scope in 2006 corresponds to the adjustment in the estimated fair value of assets acquired and liabilities assumed from the acquisition of Exploration Resources.

The change in consolidation scope in 2005 corresponds to the acquisition of Exploration Resources.

Reconciliation of acquisitions with the cash-flow statement and capital expenditures in note 19 is as follows:

	December 31,	December 31,	December 31,
	2007	2006	2005
	(in million of euros)		
Acquisitions of tangible assets (excluding capital lease) see above	214.1	133.3	107.7
Development costs capitalized see note 20	8.2	11.9	8.1
Additions in other tangible assets (excluding non-exclusive surveys) see note 10	3.8	4.1	2.3

Variance of fixed assets suppliers	4.4	(0.1)	(1.0)
Total purchases of tangible and intangible assets according to cash-flow statement	230.5	149.2	117.1
Acquisitions through capital lease see above		0.1	17.4
Increase in multi-client surveys see note 10	371.4	61.5	32.0
Less variance of fixed assets	(4.4)	0.1	1.0
Capital expenditures according to note 19	597.5	210.9	167.5

Repairs and maintenance expenses

Repairs and maintenance expenses included in cost of operations amounted to 68.3 million in 2007, 36.0 million in 2006 and 22.5 million in 2005.

Balance at end of period	680.5	127.6	136.3

The disposals of assets relate mainly to the sale of certain of Veritas North Sea licenses and a Canadian asset (see note 2).

The change in scope of consolidation in 2007 relates to the fair value of Veritas' intangible assets acquired (see note 2)

Change in consolidation scope in 2006 relates to technology acquired in Sercel Vibtech's purchase accounting.

F-29

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****NOTE 11 GOODWILL**

Analysis of goodwill is as follows:

Variation of the period	December 31,		
	2007	2006	2005
	(in million of euros)		
Balance at beginning of period	267.4	252.9	62.5
Additions	1,883.6	35.6	177.1
Adjustments		2.9	
Changes in exchange rates	(223.0)	(24.0)	13.3
Other			
Balance at end of period	1,928.0	267.4	252.9

The additions to goodwill in 2007, correspond to the goodwill arising on the acquisition of Veritas for 1,883.6 million (US\$2,480.7 million) (see note 2).

The additions to goodwill in 2006, corresponded to the goodwill arising on the acquisition of Vibtech (renamed Sercel Vibtech) for 35.6 million (GBP 24.4 million). The goodwill arising on the acquisition of Exploration Resources was adjusted for 2.9 million, according to the adjustment of the fair value of Exploration Resources acquired assets and assumed liabilities, and is presented as Goodwill adjustments. The final goodwill of Exploration Resources amounted to 179.9 million.

The additions to goodwill in 2005, corresponded to the preliminary US\$216 million goodwill of the acquisition of Exploration Resources; this goodwill was initially allocated, based on business plans, to the cash generated units Marine activity and Processing activity for US\$183.6 million and US\$32.4 million respectively.

The result of the different impairment tests performed as of December 31, 2007, 2006 and 2005 is that no impairment charge was recorded in any year.

Key assumptions used in value in the determination of value in use

In 2007, impairment tests were performed for the following cash generating units:

the Equipment segment level: test of the net book value of the goodwill

the Marine business line: test of the goodwill, multi-client library net book value and tangible assets net book value corresponding mainly to the Veritas and Exploration Resources purchase accounting in 2007 and 2005;

the Processing & Imaging business line: test of the goodwill and the net book value of tangible and intangible assets resulting from the Veritas and Exploration Resources purchase accounting in 2007 and 2005;

the Land business line level: test of the goodwill and the net book value of tangible and intangible assets resulting from the Veritas and Exploration Resources purchase accounting in 2007 and 2005.

For the tests performed on the Equipment segment, the Land business line, the Offshore business line and the Processing & Imaging business line, the recoverable value was determined based on discounted expected cash-flows with the following parameters:

forecasted cash-flows estimated in the 5-year business plans deemed on the basis of the average medium term exchange rate 1 equals U.S.\$1.35; and

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

discount ratios corresponding to the respective sector weighted average cost of capital (WACC):

9.3% for the Equipment segment (corresponding to a pre-tax rate of 14.38%);

8.6% for the Marine business line (corresponding to a pre-tax rate of 11.71%); and

8.8% for the Processing & Imaging business line (corresponding to a pre-tax rate of 11.12%)

8.7% for the Land business line (corresponding to a pre-tax rate of 11.15%).

Sensitivity to changes in assumptions

	Goodwill	Excess of the expected future discounted cash-flows over the net book value of assets (in million of euros)	Sensitivity on discount rate	
			Reduction of one point	Increase of one point
Equipment segment	80	1,780	+ 251	(201)
Marine	1,267	767	+ 556	(410)
Processing & Imaging	315	141	+ 107	(79)
Land	272	201	+ 144	(108)

NOTE 12 OTHER CURRENT LIABILITIES

The analysis of other current liabilities is as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
Value added tax and other taxes payable	25.9	15.7	12.9
Deferred income	63.5	7.0	10.6
Fair value of financial instruments (see note 14)	1.1	0.6	4.7

Other liabilities	18.5	8.0	7.0
Other current liabilities	109.0	31.3	35.2

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****NOTE 13 FINANCIAL DEBT**

Analysis of financial debt by type is as follows:

	December 31						2005 Total
	2007 Current	2007 Non- current	Total	2006 Current	2006 Non- current	Total	
	(amounts in million of euros)						
Outstanding bonds		606.6	606.6		245.5	245.5	146.3
Bank loans	28.4	657.4	685.8	26.2	69.0	95.2	164.7
Capital lease debt	8.5	34.8	43.3	9.0	46.5	55.5	87.4
Sub-total	36.9	1,298.8	1,335.7	35.2	361.0	396.2	398.4
Bank overdrafts	17.5		17.5	6.5		6.5	9.3
Accrued interest	7.8		7.8	2.9		2.9	1.9
Total	62.2		1,361.0	44.6		405.6	409.6

Analysis of financial debt by currency is as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
Euro		1.5	11.8
U.S. dollar	1,335.6	394.6	385.6
Other currencies	0.1	0.1	1.0
Total	1,335.7	396.2	398.4

Analysis of financial debt by interest rate is as follows:

December 31,		
2007	2006	2005
(in million of euros)		

Variable rates (average effective rate December 31, 2007: 7.62%, 2006: 6.34%, 2005: 7.60%)	633.5	85.3	156.6
Fixed rates (average effective rate December 31, 2007: 7.65%, 2006: 7.30%, 2005: 7.06%)	702.2	310.9	241.8
Total	1,335.7	396.2	398.4

Variable interest rates generally are based on inter-bank offered rates of the related currency. The weighted average interest rate on bank overdrafts was 11.5%, 9.40% and 7.81% at December 31, 2007, 2006 and 2005 respectively.

The impact of hedging instruments has not been considered in the above two tables.

Outstanding Bonds

High Yield bonds Additional notes (73/4% Senior Notes, maturity 2017)

On February 9, 2007, we issued US\$400 million of 73/4% Senior Notes due 2017. These notes were guaranteed on a senior basis by certain of our subsidiaries. The notes are listed on the Euro MTF market of the Luxembourg

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Stock Exchange. We used the net proceeds from the notes to repay one part of US\$700 million outstanding under the bridge loan facility used to finance Veritas acquisition.

Those bonds include some covenants, specifically on additional indebtedness subscriptions, pledges arrangements, sales and lease-back transactions, issuance and sale of equity instruments and dividends payments by certain subsidiaries of the Group.

In addition, the ratio of EBITDAS to gross interest expenses has to be equals or greater than 3.

All those covenants were complied with at December 31, 2007.

High Yield bonds Additional notes (71/2% Senior Notes, maturity 2015)

On February 9, 2007, we issued an additional US\$200 million in aggregate principal amount of 71/2% senior notes due 2015. These notes were guaranteed on a senior basis by certain of our subsidiaries. The notes are listed on the Euro MTF market of the Luxembourg Stock Exchange. We used the net proceeds from the notes to repay one part of US\$700 million outstanding under the bridge loan facility used to finance Veritas acquisition.

Those bonds include some covenants, specifically on additional indebtedness subscriptions, pledges arrangements, sales and lease-back transactions, issuance and sale of equity instruments and dividends payments by certain subsidiaries of the Group.

In addition, the ratio of EBITDAS to gross interest expenses has to be equal to or greater than 3.

All those covenants were complied with at December 31, 2007.

High Yield bonds Additional notes (71/2% Senior Notes, maturity 2015)

On February 3, 2006, we issued an additional US\$165 million principal amount of our dollar-denominated 71/2% Senior Notes due 2015 issued in April 2005 in a private placement with certain eligible investors. The notes were issued at a price of 1031/4% of their principal amount, resulting in a Yield-to-Worst of 6.9%. The net proceeds from the notes were used on February 10, 2006 to repay the US\$140.3 million remaining outstanding under our US\$375 million bridge credit facility used to finance the acquisition of Exploration Resources. On August 17, 2006, US\$164 million in principal amount of these notes were exchanged for identical notes registered with the SEC.

Those bonds include some covenants, specifically on additional indebtedness subscriptions, pledges arrangements, sales and lease-back transactions, issuance and sale of equity instruments and dividends payments by certain subsidiaries of the Group.

In addition, the ratio of EBITDAS to gross interest expenses has to be equal to or greater than 3.

All those covenants were complied with at December 31, 2007. They were also complied with at December 31, 2006.

High Yield bonds (7 1/2% Senior Notes, maturity 2015)

On April 28, 2005, we issued US\$165 million of 7 1/2% Senior Notes due 2015. The net proceeds were used to redeem and pay accrued interest on all US\$150 million outstanding aggregate principal of our existing 10 5/8% Senior Notes due 2007, on May 31, 2005 (see above).

Those bonds include some covenants, specifically on additional indebtedness subscriptions, pledge arrangements, sale and lease-back transactions, issuance and sale of equity instruments and dividends payments by certain subsidiaries of the Group.

In addition, the ratio of EBITDAS to gross interest expenses has to be equal to or greater than 3.

F-33

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

All those covenants were complied with at December 31, 2007. They were also complied with at December 31, 2006 and at December 31, 2005.

High Yield bonds (105/8% Senior Notes, maturity 2007)

On November 17, 2000, the Company issued US\$170 million aggregate principal amount of 105/8% Senior Notes due 2007 in the international capital markets. The net proceeds (approximately US\$164.9 million) was used to repay a portion of outstanding indebtedness under the existing syndicated credit facility and to fund the cash portion of the purchase price of two marine seismic vessels and certain seismic data from an affiliate of Aker (US\$25 million). A standard covenant package is attached to the bond, with a main incurrence test of coverage of interest expense by cash flow from operations. The Group was in compliance with the bond covenants on the date of issue, and at December 31, 2004.

On February 5, 2002, the Company issued in addition to the bonds issued on November 2000, bonds for a total principal amount of US\$55 million, with a maturity date in 2007 and with an annual fixed rate of 105/8%.

On January 26, 2005, in accordance with Board of Directors' decision of December 8, 2004, the Company partially redeemed its 105/8% Senior Notes, up to a principal amount of US\$75 million. According to the indenture governing those notes, a premium representing 5.3125% of the total redemption amount, (US\$4.0 million) plus accrued interest were paid. The total cost of such redemption for the Company was therefore US\$79 million plus accrued interest of US\$1.3 million.

On May 31, 2005, the Company became liable for the remaining US\$150 million of 105/8% Senior Notes due 2007. According to the indenture governing those notes, a premium representing 5.3125% of the total redemption amount, (US\$8.0 million) was due. The premium and the write-off of the remaining deferred issuance cost linked to this redemption as well as the overlapped interests on the month of May 2005 amounted to 9.4 million and were recognized in the income statement as Cost of financial debt for the year ended December 31, 2005.

Convertible bonds (7.75%, due 2012)

On November 4, 2004 the Company issued 14,000 subordinated bonds in favor of Onex Partners LP, Onex American Holdings II LLC, Onex US Principals LP and CGG Executive Invesco, LLC, with maturity of 2012, in a total nominal amount of US\$84,980,000, convertible into new ordinary shares or redeemable in new shares and/or existing shares and/or in cash (the Bonds), at an interest rate of 7.75%.

The terms of the convertible bonds were amended as approved by the General Meeting of bondholders held on November 2, 2005, and approved by a General Meeting of CGG shareholders held on November 16, 2005. The early conversion period was open from November 17 to November 18 2005, inclusive. At the conclusion of the conversion period, 11,475 convertible bonds due 2012 were converted, leading to the issuance of 1,147,500 new shares. Thereafter 2,525 convertible bonds remained outstanding representing a nominal value of US\$15.3 million. The Group paid a total premium of US\$10.4 million (8.9 million) to the bondholders who converted its bonds. This premium has been recognized as a charge under the line item Other financial income (loss) in the income statement for the year ended December 31, 2005. In addition, the write-off of the deferred issuance costs linked to this

redemption amounted to 3.7 million and has been recognized as a charge under the line item Other financial income (loss) in the income statement for the year ended December 31, 2005 (see note 23).

A component of our convertible bonds due 2012 issued on November 4, 2004 and denominated in US dollars constitutes an embedded derivative as the shares to be issued upon conversion are denominated in Euro. A portion of the issuance proceeds was deemed to relate to the fair value of the derivative on issuance and subsequent changes in fair value of the derivative are recorded through earnings. The allocation of a portion of the proceeds to the derivative created a discount on issuance that is being amortized to earnings over the life of the bonds.

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

The fair value of the embedded derivative has been determined using a binomial model. The fair value increased from 10.4 million at the initial recognition of the debt to 33.9 million at December 31, 2004, then to 11.3 million at December, 31, 2005.

The movement in 2005 fiscal year corresponds, on the one hand, to the increase in the value of the derivative of 11.5 million and, on the other hand, to the reclassification of 34.1 million in reserves for the portion of the derivative related to the bonds that were early converted on November 17, 2005.

The global increase in the fair value of the derivative of 11.5 million comprises of a 6.3 million increase in the fair value of the derivative related to the 11 475 bonds effectively converted in shares in November 2005 and a 5.2 million increase in the fair value of the derivative related to the 2 525 convertible bonds outstanding at December 31, 2005. Those increases in the fair value of the derivative are explained by the strengthening of the US dollar against the Euro and the increase in the CGG share price, acknowledged that, with regards to the derivative related to the bonds effectively converted in November 2005, the fair value was reduced by the time-component as a result of the early conversion in shares, for an amount of 8.9 million.

This resulted in aggregate expense of 11.5 million and 23.5 million in the year ended December 31, 2005 and December 31, 2004 respectively, accounted for as Variance on derivative on convertible bonds in the income statement (see note 23).

The main assumptions used for the year-end valuation are an implicit volatility of 27% and a credit-risk premium of 4.5% at December 31, 2004 and an implicit volatility of 37% and a credit-risk premium of 3.4% at December 31, 2005.

The indenture of the Bonds states that, in case of fundamental change (shares or American depositary shares ceasing to be listed on the New York Stock Exchange, sale of a substantial part of the assets of the Company, liquidation or dissolution of the Company, change of control of the Company), any bondholder may require the Company to redeem its Bonds and to pay, in addition to the principal amount of the Bonds, an amount equal to the amount of basic interest at a rate of 7.75% that would have accrued on the Bonds until maturity for a maximum period of five years. This provision may trigger a payment by the Company of a maximum of U.S.\$6 million in additional interest. At December 31, 2004 and at December 31, 2005, no expense related to this clause was booked since its realization is unlikely.

Approximately US\$70 million of our US\$85 million 7.75% convertible bonds due 2012 were converted in November 2005. A general meeting of bondholders, held on April 5, 2006, and a general meeting of CGG shareholders, held on May 11, 2006, approved a change to the terms and conditions of the remaining convertible bonds to grant bondholders a right to receive a cash payment upon immediate conversion of the bonds. The early conversion period was open on May 12, 2006 only. At the conclusion of the conversion period, all the remaining 2,525 convertible bonds were converted, leading us to issue of 274,914 new shares of CGG and pay a total premium of US\$2.1 million (1.6 million) to the converting bondholders. This premium has been recognized as an expense under the line item Derivative and other expenses on convertible bonds in our income statement for the twelve months period ended December 31, 2006. In addition, we wrote-off the deferred issuance costs attached to the remaining 2,525 convertible bonds in connection with the early conversion, corresponding to a 0.7 million expense under the line item Derivative and other expenses

on convertible bonds in our income statement for the twelve months ended December 31, 2006 (see note 23).

The fair value of the derivative increased from 11.3 million at December 31, 2005 to 32.0 million at May 12, 2006 when the remaining 2,525 convertible bonds due 2012 were converted. At the conversion, the derivative of 32.0 million was reclassified to retained earnings in the balance sheet.

The increase in the value of the derivative of 20.7 million from January 1, 2006 to May 12, 2006 is explained principally by the increase in CGG share price, taking into account that the value was reduced by the time

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

component upon the conversion in shares for an amount of 1.6 million. The corresponding income was accounted under the line item Derivative and other expenses on convertible bonds .

Bank loans

At December 31, 2007, 664.0 million of bank loans were secured by tangible assets and receivables.

At December 31, 2007, the Group had 11.5 million available in unused short-term credit lines and overdraft facilities and 225.8 million in unused long-term credit lines.

U.S.\$1,600 million Bridge Loan

On November 22, 2006, the Group entered into a US\$1.6 billion senior secured bridge loan facility agreement with Credit Suisse International, as agent and security agent, and the lenders party thereto. On January 12, 2007, the Group borrowed US\$700 million under the bridge loan facility, and the proceeds were used to:

finance a portion of the cash component of the merger consideration;

repay certain existing debt of CGG and Veritas; and

pay the fees and expenses incurred in connection with the foregoing.

Upon such borrowing and the concurrent funding of the US\$1.0 billion term loan facility described above, the unused commitments of US\$900 million were terminated.

We used the net proceeds of our February 2007 senior notes offering described above, together with cash on hand, to repay in full the bridge loan facility.

U.S.\$1,140 million Senior Facilities

On January 12, 2007, the Group entered into a US\$1.140 billion senior secured credit agreement with Credit Suisse, as administrative agent and collateral agent, and the lenders party thereto, pursuant to which credit agreement the Group borrowed a US\$1.0 billion senior secured term loan B and obtained a US\$140 million senior secured U.S. revolving facility (which revolving facility includes letter of credit and swingline subfacilities). On June 29, 2007 we repaid US\$100 million of the Term Loan B early.

The proceeds of the term loan facility were used to:

finance a portion of the cash component of the merger consideration;

repay certain existing debt of CGG and Veritas; and

pay the fees and expenses incurred in connection with the foregoing.

Proceeds of loans under the U.S. revolving facility may be used for the general corporate purposes of the borrower and other subsidiaries.

The obligations of CGGVeritas Services Holding (US) under the senior facilities are guaranteed by CGG Veritas and certain subsidiaries including the former Veritas group subsidiaries. Shares of CGGVeritas Services Holding (US) and of certain of its first-tier subsidiaries are pledged as well as those of other first-tier subsidiaries of CGG Veritas. In addition, certain guarantors have provided first-priority security interests in certain of their respective tangible and intangible assets, including (without limitation) certain vessels, real property, mineral rights, deposit accounts and intellectual property. In the case of certain of subsidiaries (most notably CGGVeritas Services Holding (US) and certain U.S. and Canadian subsidiaries), the collateral may comprise substantially all of their respective assets.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

The interest rate applicable to the term loan facility is LIBOR + 200 bps. The interest rate applicable to the U.S. revolving facility of U.S.\$140 million is LIBOR + 225 bps.

Pursuant to this agreement, the group is required to adhere to certain financial covenants including maximum ratio of total net debt to EBITDAS, and minimum ratio of EBITDAS less capital expenditures to total interest costs. Besides, the group is subject to affirmative and negative covenants that affect its ability, among other things, to borrow money, incur liens, dispose of assets and acquisitions and pay dividends or redeem shares.

U.S.\$375 million Bridge Loan (used credit line and presented as bank loans - current portion)

On September 1, 2005, we entered into a single currency US\$375 million term credit facility, which was amended on September 30, 2005, with Crédit Suisse, Paris Branch and BNP Paribas as arrangers, with a maturity date at September 1st, 2006 with the option (upon our request and upon approval of a majority of the lenders) to extend it for a further six months. The use of proceeds for this credit facility was to fund our initial purchase of approximately 60% of Exploration Resources shares, our continuing purchases of Exploration Resources shares, our mandatory offer for the purchase of the remaining Exploration Resources shares and the "squeeze out" of remaining shareholders.

The credit facility bears interest at a graduated rate beginning with a base margin, depending on the credit rating assigned by either Moody's or Standard & Poor's to our outstanding U.S.\$165 million 7 1/2% senior notes due 2015 (4.25% at BB-/Ba3 or higher, 5.25% at B+/B1, 5.75% at B/B2 and 6.25% at B-/B3 or lower), over US\$ LIBOR until March 1st, 2006, plus 0.50% from March 1, 2006 until June 1, 2006, plus 1.00% from June 1, 2006 until September 1st, 2006 plus 2.00% from September 1, 2006 until the repayment. The interest expense represents \$10.4 million for the year ended December 31, 2005.

In order to comply with the conditions of the acquisitions of Exploration Resources shares noted above, we obtained waivers from the lenders under our US\$60 million syndicated credit facility dated March 12, 2004 of the negative pledge and any other relevant provisions hereunder, as well as amendments to the financial covenants (see below).

As a consequence of the capital increase dated December 16, 2005, we repaid, on December 23, 2005, US\$234.7 million of the US\$375 million which had been drawn on this credit facility. The unamortized portion of the deferred expenditures linked to this redemption amounted to \$3.8 million and were recognized in the income statement as "Cost of financial debt" at December 31, 2005. At December 31, 2005, we have drawn down US\$140.3 million (\$118.9 million), which was effectively repaid on February 10, 2006. The net proceeds from the notes issued on February 3, 2006 were used on February 10, 2006 to repay the US\$140.3 million which remained outstanding under our US\$375 million bridge credit facility used to finance the acquisition of Exploration Resources. We agreed to maintain some provisions under the bridge loan agreement: those were respected at December 31, 2005 and were invalid and void from February 10, 2006. The corresponding interest expense amounted to \$2.0 million in 2006.

Additional asset financing agreement

On March 13, 2006, CGG Marine Resources Norge AS concluded an asset financing agreement for US\$26.5 million with a bank. The purpose of this agreement was to finance the acquisition of newly-developed "Sentinel" streamers for the vessel Symphony. This financing agreement is guaranteed by a pledge on the streamers. At December 31, 2006,

this facility was fully drawn.

Additional credit facility

On March 29, 2006, Exploration Resources concluded a credit facility of US\$70 million. The proceeds from this credit facility were used to finance the conversion of the *Geo-Challenger* from a cable laying vessel to a 3D

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

seismic vessel and seismic equipment for the vessels *C-Orion* and *Geo-Challenger*. At December 31, 2006, this facility was fully drawn.

U.S.\$25 million Secured Term Loan Facility

On April 30, 2007, Geomar concluded a credit facility of US\$25 million. The proceeds from this credit facility were used to refinance the seismic vessel *Alizé*. At December 31, 2007, this facility was fully drawn.

U.S.\$200 million Revolving Credit Agreement

On February 7, 2007, CGG Veritas entered into a US\$200 million revolving credit agreement with Natixis as administrative agent and Crédit Suisse as collateral agent. The proceeds of this revolving credit agreement may be used for the general corporate purposes of the borrower. At December 31, 2007, this facility was undrawn.

NOTE 14 FINANCIAL INSTRUMENTS

Because we operate internationally, we are exposed to general risks linked to operating abroad. Our major market risk exposures are changing interest rates and currency fluctuations. We do not enter into or trade financial instruments including derivative financial instruments for speculative purposes.

Foreign currency risk management

As a company that derives a substantial amount of its revenue from sales internationally, we are subject to risks relating to fluctuations in currency exchange rates. In the years ended December 31, 2007, 2006 and 2005, more than 80% of our operating revenues were denominated in U.S. dollar while in the same time the part of our operating expenses denominated in currencies other than euros grew to approximately three-quarters. These included U.S. dollars and, to a significantly lesser extent, other non-Euro Western European currencies, principally British pounds and Norwegian kroner.

Foreign currency sensitivity analysis

The reporting currency for the Group's consolidated financial statements is the euro. As a result, the Group's sales and operating income are exposed to the effects of fluctuations in the exchange rate of the euro against such other currencies, particularly the U.S. dollar. A depreciation of the U.S. dollar against the euro will negatively affect our reported results of operations since U.S. dollar denominated earnings that are converted to euros are stated at a decreased value. Based upon the level of operations we reached in year 2007, and given the current portfolio of currencies, a 10 cents variance of the U.S. dollar against the euro would impact by approximately 40 million dollars our dollar equivalent-value results of operations.

To mitigate the exposure, we attempt to match foreign currency revenues and expenses in order to balance our net position of receivables and payables denominated in foreign currencies. Nevertheless, during the past five years such dollar-denominated expenses have not equaled dollar-denominated revenues principally due to personnel costs payable in euros. In order to improve the balance of our net position of receivables and payables denominated in

foreign currencies, we maintain our financing in U.S. dollars.

Foreign forward exchange contracts

In order to protect the Group against the reduction in the value of future foreign currency cash flows we follow a policy of selling U.S. dollars forward at average contract maturity dates that the Group attempts to match with future net U.S. dollar cash flows (revenues less costs in U.S. dollars) to be generated by firm contract commitments in its backlog generally over the ensuing six months. A similar policy, to a lesser extent, is carried out with respect to

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

contracts denominated in British pounds. This foreign currency risk management strategy has enabled us to reduce, but not eliminate, the positive or negative effects of exchange movements with respect to these currencies.

Details of forward exchange contracts are as follows:

	2007	December 31, 2006	2005
Forward sales of U.S. dollars against euros			
Notional amount (in million of US\$)	255.9	305.9	183.6
<i>of which forward sales qualifying as cash-flow hedges</i>	255.9	305.9	183.6
<i>of which forward sales not qualifying as cash-flow hedges</i>			
Weighted average maturity	70 days	94 days	91 days
Weighted average forward US\$/Euro exchange rate	1.4065	1.2619	1.2048
Forward sales of U.S. dollars against British pounds			
Notional amount (in million of US\$)	15.0	21.9	6.5
<i>of which forward sales qualifying as cash-flow hedges</i>	15.0	21.9	6.5
<i>of which forward sales not qualifying as cash-flow hedges</i>			
Weighted average maturity	26 days	123 days	90 days
Weighted average forward U.S.\$/£ exchange rate	1.9847	1.8956	1.8871
Forward sales of U.S. dollars against Australian dollars			
Notional amount (in million of US\$)	9.5		
<i>of which forward sales qualifying as cash-flow hedges</i>	9.5		
<i>of which forward sales not qualifying as cash-flow hedges</i>			
Weighted average maturity	229 days		
Weighted average forward U.S.\$/AUD\$ exchange rate	0.8383		

Effects of forward exchange contracts on financial statements are as follows:

	2007	December 31, 2006	2005
	(in million of euros)		
Carrying value of forward exchange contracts (see notes 5 and 12)	8.3	8.8	(4.7)
Fair value of forward exchange contracts	8.3	8.8	(4.7)
Gains (losses) recognized in profit and loss (see note 21)	18.7	8.9	(2.9)
Gains (losses) recognized directly in equity	(4.6)	8.7	(5.6)

Moreover, we apply a net investment hedge for a total amount of US\$85 million on the goodwill of Sercel Inc. and two seismic vessels acquired in 2002, hedged by our long-term financing in U.S. dollars (high-yield bond see note 13).

Interest rate risk management

Our policy is to manage interest rates through use of a combination of fixed and floating rate debt. Our exposure to interest rate fluctuations is reduced to the extent that part of our financial debt at December 31, 2007 consists of bond issues maturing in November 2015 and 2017 and bearing a fixed interest rate. However, our sources of liquidity include a Senior Term Loan B credit with financial institutions charging variable interest rates. We may also use interest rate swaps to adjust interest rate exposures when appropriate based upon market conditions.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)*****Interest rate sensitivity analysis***

Our sources of liquidity include credit facilities and debt securities which are or may be subject to variable interest rates. In particular, the Senior Facilities are subject to interest based on U.S. dollar LIBOR. As a result, our interest expenses could increase significantly if short-term interest rates increase. Each 50 basis point increase in the LIBOR will increase our interest expense by approximately \$5 million per year.

Interest rate swap contracts

There are two outstanding agreement at December 31, 2007.

One interest rate swap agreement subscribed by Exploration Resources on a variable rate loan in U.S. dollars to pay the interest at fixed rate of 6.77% and to receive interest at the variable rate of the loan, on the nominal amount of US\$49 millions at December 31, 2007. The maturity date of this agreement is June 30, 2011.

One interest rate swap agreement subscribed by CGG Marine Resources Norge on a variable rate loan in U.S. dollars to pay the interest at fixed rate of 6.03% and to receive interest at the variable rate of the loan, on the nominal amount of US\$12.2 millions December 31, 2007. The maturity date of this agreement is September 30, 2010.

Effects of interest rate swap on financial statements are as follows:

	At December 31,		
	2007	2006	2005
	(in million of euros)		
Carrying value of interest rate swaps (see note 12)	(1.1)	(0.6)	
Fair value of interest rate swaps	(1.1)	(0.6)	
Gains (losses) recognized in profit and loss	(0.5)	(0.6)	
Gains (losses) recognized directly in equity			

Interest rate cap contracts

There is no interest rate cap agreement as at December 31,2007.

Credit risk management

We seek to minimize our counter-party risk by entering into hedging contracts only with highly rated commercial banks or financial institutions and by distributing the transactions among the selected institutions. Although our credit risk is the replacement cost at the then-estimated fair value of the instrument, we believe that the risk of incurring losses is remote and those losses, if any, would not be material. Our receivables and investments do not represent a significant concentration of credit risk due to the wide variety of customers and markets in which we sell our services

and products and our presence in many geographic areas. In 2007, the Group's two most significant customers accounted for 4.5% and 2.8% of the Group's consolidated revenues compared with 9.0% and 3.2% in 2006 and 9.8% and 4.4% in 2005.

Liquidity risk management

Our principal capital needs are for the funding of ongoing operations, capital expenditures (particularly repairs and improvements to our seismic vessels), investments in our multi-client data library and acquisitions (such as, most recently, Exploration Resources and Veritas).

F-40

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

We intend to fund ongoing operations and debt service requirements through cash generated by operations. Our ability to make scheduled payments of principal, or to pay the interest or additional interest, if any, on, or to refinance our indebtedness, or to fund planned capital expenditures will depend on our future performance, which, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Based upon the current level of operations, we believe that cash flow from operations, available cash and short-term investments, together with borrowings available under the U.S. revolving facility and the French revolving facility, will be adequate to meet our future liquidity needs for the next 12 months.

See table note 18

Financial instruments by categories in the Balance sheet

The impact and the breakdown of the Group's financial instruments in the balance sheet at December 31, 2007 are as follows:

	December 31, 2007					Debts at	
	Carrying Amount	Fair Value	Fair value in statement (in million of euros)	available-for-sale assets	Loans, receivables	amortized cost	Derivatives
Non-consolidated investements	21.1	21.1		21.1			
Financial and non-current assets	10.9	10.9			10.9		
Notes receivables	601.9	601.9			601.9		
Financial and current assets	8.3	8.3					8.3
Cash equivalents	85.0	85.0	85.0				
Cash	169.3	169.3	169.3				
Total assets	896.5	896.5	254.3	21.1	612.8		8.3
Financial and non-current liabilities	1.2	1.2			1.2		
Financial debts ^(a)	1,361.0	1,765.7				1,361.0	
Notes payables	256.4	256.4				256.4	
Financial and current liabilities	1.1	1.1					1.1
Total liabilities	1,619.7	2,024.4			1.2	1,617.4	1.1

(a) Financial debts include long term debt, bank overdraft facilities and accrued interest (see note 13)

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****Fair value information**

The carrying amounts and fair values of the Group's financial instruments are as follows:

	2007		2006		2005	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value	Carrying Amount	Fair Value
			(in million of euros)			
Cash and cash equivalents	254.3	254.3	251.8	251.8	112.4	112.4
Bank overdraft facilities	17.5	17.5	6.5	6.5	9.3	9.3
Bank loans, vendor equipment financing and shareholder loans:						
Variable rate	633.5	633.5	85.3	85.3	156.6	156.6
Fixed rate	702.2	1,106.9	310.9	369.2	241.8	244.0
Forward currency exchange contracts	8.3	8.3	8.7	8.7	(4.7)	(4.7)
Interest rate swaps	(1.1)		(0.6)			

The Group considers the carrying value for loans receivable and other investments, trade accounts and notes receivable, other receivables, trade accounts and notes payable and other current liabilities to be the most representative estimate of fair value.

For bank loans with fixed interest rates, the fair values have been estimated using discounted cash flow analysis based on the Group's incremental borrowing rates for similar types of borrowing arrangements. For variable-rate bank loans, vendor equipment financing and the shareholder loans, fair values approximate carrying values.

The market value of forward sales is assessed based on forward rates, available on the financial markets for similar maturities.

NOTE 15 COMMON STOCK AND STOCK OPTION PLANS

The Company's share capital at December 31, 2007 consisted of 27,450,758 shares, each with a nominal value of €2.

Rights and privileges related to ordinary shares

Ordinary shares give right to dividend. Dividends may be distributed from the statutory retained earnings, subject to the requirements of French law and the Company's articles of incorporation. Retained earnings available for distribution amounted to €1,824 million at December 31, 2007.

Ordinary shares registered held for more than two years give a double voting right.

Issued Shares

In 2007, CGG Veritas S.A. issued 9,852,870 fully paid shares related to the following operations:

231,425 fully paid shares related to stock options exercised;

9,215,845 ordinary shares (out of which 4,202 shares were subsequently cancelled since they had been issued in excess of merger consideration) that were deposited with the Bank of New York trust as ADS depository, which issued 46,079,225 ADSs to be delivered as merger consideration to former holders of Veritas stock;

108,723 ordinary shares that were deposited with the Bank of New York as ADS depository, which issued 543,614 ADSs to a holder of U.S.\$6.5 million in principal amount of Veritas convertible senior notes;

F-42

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

301,079 ordinary shares that were deposited with the Bank of New York as ADS depository, which issued 1,505,393 ADSs to a holder of U.S.\$18 million in principal amount of Vertias convertible senior notes.

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

Stock options

Pursuant to various resolutions adopted by the Board of Directors, the Group has granted options to purchase Ordinary Shares to certain employees, executive officers and directors of the Group.

Options granted under the provisions of the 1997 option plan expired on May 4, 2005.

Options granted under the provisions of the 2000 option plan which expires eight years from the date of grant could not generally be exercised before 2003 and for the options to subscribe 1,000 shares or more, the shares resulting from the exercise of those options could not be sold before January 18, 2005.

Options granted under the provisions of the March 2001 option plan, which expires eight years from the date of grant, are vested by one fifth each year from March 2001 and could not generally be exercised before 2004 and for the options to subscribe for 1,000 shares or more, the shares resulting from the exercise of those options could not be sold before January 18, 2005.

Options granted under the May 2002 option plan, which expires eight years from the date of grant, are vested by one fifth each year from May 2002 and could not generally be exercised before 2005. Moreover, for options to subscribe for 1,000 shares or more, the shares resulting from the exercise of those options could not be sold before May 15, 2006.

Options granted under the May 2003 option plan, which expires eight years from the date of grant, are vested by one-fourth each year from May 2003 and could not generally be exercised before May 16, 2006. Moreover, for options to subscribe for 1,000 shares or more, the shares resulting from the exercise of those options could not be sold before May 16, 2007.

Options granted under the May 2006 option plan, which expires eight years from the date of grant, are vested by one fourth each year from May 2006 and could not generally be exercised before May 2010. Moreover, for options to subscribe for 1,000 shares or more, the shares resulting from the exercise of those options could not be sold before May, 2010. Out of the 202,500 options granted in May 2006, 136,000 were granted to the executive managers of the Group.

Options granted under the March 2007 option plan, which expires eight years from the date of grant, are vested by one third each year from March 2007 and, once vested, can be exercised at anytime. For the French tax residents, the shares resulting from the exercise of those options may not be sold before March 24, 2011. Out of the 261,750 options granted in March 2007, 135,000 were granted to the executive officers.

The exercise price of each option is the average market value of the share during the twenty-day period ending the day before the date the option is allocated.

Information related to options outstanding at December 31, 2007 is summarized below:

Date of Board of Directors	Resolution	Options granted	Options outstanding at Dec. 31, 2007	Exercise price per share ()	Expiration date	Remaining duration
January 18, 2000		231.000	7.231	45.83	January 17, 2008	0.5 months
March 14, 2001		256.000	74.800	65.39	March 13, 2009	14.5 months
May 15, 2002		138.100	53.310	39.92	May 14, 2010	28.5 months
May 15, 2003		169.900	80.246	14.53	May 14, 2011	40.5 months
May 11, 2006		202.500	195.163	131.26	May 10, 2014	76.5 months
March 23, 2007		261.750	250.450	151.98	March 23, 2015	86.5 months

		(weighted average exercise price in euro)				
Outstanding-beginning of year	650.797	67.96	691.939	43.63	809.050	48.95
Granted	261.750	151.98	202.500	131.26		
Adjustments following the capital increase					57.917	43.49
Exercised	(231.425)	39.45	(241.294)	51.50	(152.834)	53.86
Forfeited	(19.922)	134.69	(2.348)	48.36	(22.194)	55.61
Outstanding-end of year	661.200	109.19	650.797	67.96	691.939	43.63
Exercisable-end of year	215.587	39.50	379.307	42.21	376.631	58.89

The average price of CGG Veritas share was 180.98 in 2007, 128.00 in 2006 and 71.71 in 2005.

Performance shares

The General Shareholders Meeting dated May, 11, 2006 authorized the Board of Directors to implement a plan of allocation of performance shares. The maximum number of performance shares that may be allocated is 53,200 shares, out of which, 13,100 may be allocated to the executive managers of the Group.

Performance shares are allocated according to the following plan:

Period of acquisition of the rights for allocation and realization of the conditions

Shares will be issued from May 11, 2008 if the realization of the conditions mentioned below has been enacted by the Board of Directors.

General conditions of allocation

The beneficiaries would be allocated the shares, after the two-year acquisition period had expired, only if each beneficiary still has a valid employment contract with CGG or one of its subsidiaries (except specific conditions) at the date the two-year acquisition period expires and if the conditions of allocation are met.

Other conditions of allocations Performance conditions

The Board of Directors also defined two general performance conditions of the Group based on:

the Group average consolidated net income per share over the year ended December 31, 2006 and 2007.

the average yearly return before tax on capital employed over the year ended December 31, 2006 and 2007 of either the Group, the Services segment, or the Equipment segment, according to which segment the beneficiary belongs to.

Performance conditions were met for the years ended December 31, 2007 and 2006.

Holding Period of the allocated shares

Once allocated, the shares may not be sold for two years from the date of the actual allocation.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Additionally to our 2006 performance share allocation plan, the Board of Directors implemented, on March 23, 2007, a performance share allocation plan. The maximum number of performance shares that may be allocated is 81,750 shares, out of which 13,500 may be allocated to the executive officers. Performance shares are allocated according to the following conditions:

If the realization of the performance conditions described below has been enacted by the Board of Directors shares will be issued on the latest of the two following dates : March 23, 2009 or the date of the General Shareholders meeting approving the financial statements for the year ended December 31, 2008.

The beneficiaries would be allocated the shares only if such beneficiary still has a valid employment contract with CGG Veritas or one of its subsidiaries (subject to specific conditions) at the date the two-year acquisition period expires and if the conditions of allocation are met.

The Board of Directors defined two general performance conditions based on the Group's average consolidated net income per share for the year ended December 31, 2007 and 2008 and the average yearly return before tax on capital employed for the year ended December 31, 2007 and 2008 of either CGG Veritas, the Services segment, or the Equipment segment, according to the segment to which the beneficiary belongs.

Once allocated, the shares may not be sold for a two years conservation period from the date of the actual allocation.

Compensation cost on stock-options and performance shares

The following table lists the hypothesis used to value the 2003, 2006 and 2007 options plan and the 2006 and 2007 performance shares allocation plan according to IFRS 2 :

	Options granted	Volatility	Risk-free rate	Fair value per share at the grant date ()
2003 stock options plan	169.900	57%	3.90%	11.13
2006 stock options plan	202.500	35%	3.80%	74.83 ^(a)
2007 stock options plan	261.750	36%	3.95%	63.24 ^(b)

	Performance shares granted	Annual Turnover	Achievement of performance Conditions	Fair value per share at the grant date ()
--	---	----------------------------	--	---

2006 performance shares allocation plan	53.200	2.5%	100%	158.20 _(c)
2007 performance shares allocation plan	81.750	2.5%	75%	155.10 _(c)

- (a) the hypothetical exercise date was estimated at May 11, 2012, corresponding to the mid-term between the last acquisition date (May 11, 2010) and the end of the plan (May 11, 2014);
- (b) the hypothetical exercise date was estimated at September 23, 2012, corresponding to the mid-term between the last acquisition date (March 23, 2010) and the end of the plan (March 23, 2015);
- (c) corresponds to CGG Veritas share price at the date of allocation

F-46

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

According to IFRS 2, fair value of stock-options and performance shares granted since November 7, 2002 must be recognized as an expense over the life of the plan. Detail of this expense is as follows:

	Year		
	2007	2006	2005
	(in million of euros)		
2003 stock options plan ^(a)		0.2	0.4
2006 stock options plan ^(b)	5.6	4.8	
2007 stock options plan ^(c)	8.1		
2006 performance shares plan ^(d)	4.0	2.4	
2007 performance shares plan ^(e)	2.9		
Total recognized expense according to IFRS 2	20.6	7.4	0.4

(a) of which 0.1 million for the executive managers of the Group in 2006 and 0.2 million in 2005;

(b) of which 2.7 million for the executive managers of the Group in 2007, 3.2 million in 2006;

(c) of which 3.9 million for the executive managers of the Group in 2007;

(d) of which 0.7 million for the executive managers of the Group in 2007, 0.6 million in 2006;

(e) of which 1.5 million for the executive managers of the Group in 2007.

NOTE 16 PROVISIONS

Total provisions	35.9	16.2	(20.4)	(0.5)	54.9	86.1

(a) includes the effects of exchange rates changes and acquisitions and divestitures

Customers Guarantee provisions

The increase of Customers Guarantee provisions is related to the warranty given by Sercel to external clients.

F-47

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****Retirement indemnity provisions**

The Group records retirement indemnity provisions based on the following actuarial assumptions:

historical staff turnover and standard mortality schedule;

age of retirement between 60 and 65 years old in France and 67 years old in Norway; and

actuarial rate and average rate of increase in future compensation.

In addition, a supplemental pension and retirement plan was implemented in December 2004 for the members of the Group's Management Committee and members of the management board of Sercel Holding. Contributions of 2.0 million and 2.1 million on this pension plan were paid in 2007 and 2005, respectively. No contribution was paid in 2006.

The status of the retirement indemnity plans is as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
Projected benefit obligation	79.9	21.0	18.2
Unamortized cost of past services ^(a)	(16.4)	(3.2)	(3.7)
Effect of changes in discount rates			
Pension obligation	63.5	17.8	15.0
Service cost	2.5	1.4	1.6
Interest expense	2.9	0.9	0.7
Amortization of cost of past services	0.4	0.6	
Amortization of loss arising from change in discount rate			(0.2)
Net expense of the year	5.8	2.9	2.1
Benefit payments	(0.7)	(0.5)	(0.4)
Actuarial gains and losses directly recognized in equity	6.3	1.1	
Consolidation scope entries & currency translation	34.4	(0.7)	0.1
Net changes	45.8	2.8	1.8
Fair value of plan assets^(b)	37.1	5.2	5.0
Contributions paid	12.6	0.6	2.6
Expected return on plan assets	1.7	0.2	0.2
Consolidation scope entries & currency translation	17.6	(0.6)	

Net changes	31.9	0.2	2.8
Net liability at end of the year	(28.6)	(13.0)	(11.8)
Net asset at end of the year	2.1	0.4	1.8
Key assumptions used in estimating the Group's retirement obligations are:			
Discount rate	5.44%	4.50%	4.25%
Average rate of increase in future compensation	6.15%	3.00%	3.00%
Average expected return on assets	4.15%	4.00%	4.00%

- (a) Corresponds to the supplemental pension and retirement plan for the members of the Group's Management Committee and members of the management board of Sercel Holding. In 2007, this item also includes the impacts of a change in the French pension scheme for (13.5) million.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

(b) The major categories of plan assets as a percentage of the fair value of total plan assets at December 31, 2007 are as follows:

Equity securities	43.0%
Debt securities	22.0%
Real estate	6.0%
Other	28.0%

NOTE 17 OTHER NON-CURRENT LIABILITIES

Detail of other non-current liabilities is as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
Deposit and guarantees	1.2		
Research and development subsidies	5.4	5.5	5.5
Profit sharing scheme	20.4	18.2	15.2
Other non-current liabilities	27.0	23.7	20.7

NOTE 18 CONTRACTUAL OBLIGATIONS, COMMITMENTS AND CONTINGENCIES**Contractual obligations capital leases**

The Group leases primarily land, buildings and geophysical equipment under capital lease agreements expiring at various dates during the next five years.

Capital leases commitments included the sale-leaseback agreement with respect to the Group's head office in Massy, for which we exercised the purchase option in January 2006 (see Note 9).

In addition, the Group operates seismic vessels under charter agreements over one to eight year periods.

Contractual obligations operating leases

Other lease agreements relate primarily to operating leases for offices, computer equipment and other items of personal property.

Rental expense was 236.8 million in 2007, 73.5 million in 2006 and 59.6 million in 2005.

F-49

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

The following table presents payments in future periods relating to contractual obligations as of December 31, 2007:

	Payments due by period				Total
	Less than 1 year	2-3 years	4-5 years	After 5 years	
	(in million of euros)				
Long-term debt obligations:					
Repayments : fixed rates	12.7	24.6	5.0	618.8	661.1
Repayments : variables rates	15.7	30.6	22.3	562.7	631.3
Bonds interests	48.1	96.1	96.1	162.3	402.6
Total Long-term debt flows	76.5	151.3	123.4	1,343.8	1,695.0
Capital Lease Obligations:					
Capital Lease Obligations : fixed rates	9.3	8.5	28.0		45.8
Capital Lease Obligations : variables rates	1.6	1.5			3.1
Total Capital Lease Obligations	10.9	10.0	28.0		48.9
Operating Leases	93.0	117.9	76.2	69.2	356.3
Total Contractual Obligations	180.4	279.2	227.6	1,413.0	2,100.2

The following table presents reconciliation between capital lease obligations and capital lease debts as of December 31, 2007:

	Payments due by period			Total
	Less than 1 year	1-5 years	After 5 years	
	(in million of euros)			
Capital Lease Obligations	10.9	38.0		48.9
Discounting	2.4	3.2		5.6
Capital lease debt (see note 13)	8.5	34.8		43.3

Other commitments

Outstanding commitments at December 31, 2007 include the following:

December 31,		
2007	2006	2005
(in million of euros)		

Guarantees issued in favor of clients ^(a)	338.7	161.6	82.4
Guarantees issued in favor of banks ^(b)	19.4	21.8	26.3
Other guarantees ^(c)	35.4	25.5	14.2
Total	393.5	208.9	122.9

- (a) Guarantees issued in favor of clients relate mainly to guarantees issued by the Company to support bids made at the subsidiaries level.
- (b) Guarantees issued in favor of banks related mainly to guarantees issued by the Company to support credit facilities made at the subsidiaries level.
- (c) Other guarantees relate primarily to guarantees issued by the Company on behalf of subsidiaries and affiliated companies in favor of customs or other governmental administrations.

In 2007, the increase in guarantees issued in favor of clients related mainly to guarantees issued in bids or contracts achievements. This increase is due to the growth in Group activities and the acquisition of Veritas.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

In 2007, CGG Veritas and Eidesvik Offshore entered into agreements for the supply of two large seismic vessels to be newly built with a total contract value of US\$377 million. These vessels will be delivered in 2010 under 12-year time charter agreements.

In 2007, CGG Services entered into an agreement for the supply of a real estate in Massy, along with a concomitant lease agreement. This agreement is for an amount 66 million and the option should be exercised before April 30, 2008.

In 2006, the increase in guarantees issued in favor of clients related mainly to guarantees issued in bids or contracts achievements. This increase is due to the growth in Group activities.

In 2006, other guarantees represent essentially the guarantees given to the Swiss legal authorities for the unemployment funds related to the employees of CGG International based in Geneva for 16.9 million. In 2005, they related essentially to the guarantees given to the Libyan customs authorities for the temporary admission of our seismic vessels in Libyan waters.

In 2005, the increase in guarantees in favor of banks related mainly to new credit facilities.

The Group had no significant commitment for capital expenditures at December 31, 2007.

The duration of the guarantees is as follows:

	Less than 1 year	Due date			Total
		2-3 years	4-5 years	After 5 years	
Guarantees issued in favor of clients	322.3	15.6	0.8		338.7
Guarantees issued in favor of banks	16.7	2.7			19.4
Other guarantees	35.1	0.3			35.4
Total	374.1	18.6	0.8		393.5

(in million of euros)

In addition, the Group's agreements for the disposal of certain activities contain customary, reciprocal warranties and indemnities.

The Group has no off-balance sheet obligations under IFRS that are not described above.

Legal proceedings, claims and other contingencies

The Group is a defendant in a number of legal proceedings arising in the ordinary course of business and has various unresolved claims pending. The outcome of these lawsuits and claims is not known at this time. The Group believes that the resulting liability, if any, net of amounts recoverable from insurance or other sources, will not have a material adverse effect on its consolidated results of operations, financial position or cash flows.

The Company has been sued by Parexpro (Portugal), for termination without cause of employment agreements and solicitation of a significant number of highly qualified staff in the field of reservoir evaluation, misappropriation of confidential information and documentation, clients, and loss of profits resulting there from.

In October 2003, the Lisbon Commercial Court declared itself unqualified to give a decision on this issue. The company Parexpro appeals on this decision.

In June 2005, Lisbon Appeal Court confirmed the decision of Lisbon Commercial Court and, in July 2005, Parexpro introduced a new assignation on the Lisbon Civil Court, targeting the same persons and companies on the same basis.

This new action is currently being processed by Lisbon Civil Court.

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

The Company does not expect this claim to have any material impact on the Group's results of operation, financial position, or cash flows. Thus, no provision was recorded in the consolidated financial statements.

On October 20, 2006, a complaint was filed against CGG's subsidiary, Sercel Inc., in the United States District Court for the Eastern District of Texas. The complaint alleges that several of Sercel Inc.'s seismic data acquisition products that include Micro Electromechanical systems (MEMS) infringe a U.S. patent allegedly owned by the plaintiffs. The plaintiffs have requested a permanent injunction prohibiting Sercel Inc. from making, using, selling, offering for sale or importing the equipment in question into the United States and have sought an unspecified amount of damages. Sercel is confident that the products in question do not infringe any valid claims of the patent at in question and intends to contest this claim vigorously. During 2007, the discovery process took place as did the claims construction portion of the patent litigation procedure. We do not believe this litigation will have a material adverse effect on our financial position or results of operation. Accordingly, no provision has been recorded in our consolidated financial statements, except for the fees related to prepare the defense

NOTE 19 ANALYSIS BY OPERATING SEGMENT AND GEOGRAPHIC ZONE

Financial information by operating segment is reported in accordance with the internal reporting system and shows internal segment information that is used to manage and measure the performance of CGG Veritas. We divide our business into two operating segments, geophysical services and geophysical equipment.

Our geophysical services segment comprises:

Land contract: seismic data acquisition for land, transition zones and shallow water undertaken by us on behalf of a specific client;

Marine contract: seismic data acquisition offshore undertaken by us on behalf of a specific client;

Multi-client land and marine: seismic data acquisition undertaken by us and licensed to a number of clients on a non-exclusive basis; and

Processing & Imaging: processing and imaging and interpretation of geophysical data, data management and reservoir studies for clients.

Our equipment segment, which we conduct through Sercel Holding S.A. and its subsidiaries, is our manufacturing and sales activities for seismic equipment used for data acquisition, both on land and offshore.

Inter-company sales between the two segments are made at prices approximating market prices and relate primarily to equipment sales made by the geophysical equipment segment to the geophysical services segment. These inter-segment sales, the related operating income recognized by the geophysical equipment segment, and the related effect on capital expenditures and depreciation expense of the geophysical services segment are eliminated in consolidation and presented in the column Eliminations and Adjustments in the tables that follow.

Operating income represents operating revenues and other operating income less expenses of the relevant industry segment. It includes non-recurring and unusual items, which are disclosed in the operating segment if material. General corporate expenses, which include Group management, financing, and legal activities, have been included in the column Eliminations and Adjustments in the tables that follow. The Group does not disclose financial expenses or revenues by operating segment because these items are not followed by the segment management and because financing and investment are mainly managed at the corporate level.

Identifiable assets are those used in the operations of each industry segment and geographic zone. Unallocated and corporate assets consist primarily of financial assets, including cash and cash equivalents.

Due to the constant changes in work locations, the group does not track its assets based on country of origin or ownership.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

Identifiable liabilities are those used in the operations of each industry segment and geographic zone. Unallocated and corporate liabilities consist primarily of corporate financial debts.

In 2007, the Group's two most significant customers accounted for 4.5% and 2.8% of the Group's consolidated revenues compared with 9.0% and 3.2% in 2006 and 9.8% and 4.4% in 2005.

Analysis by operating segment

2007	Geophysical services	Geophysical equipment	Eliminations and Adjustments (in million of euros)	Consolidated Total

Exchange gains (losses) on hedging contracts	18.7	8.9	(2.9)
Gains (losses) on sales of assets	0.3	5.3	(1.0)
Other revenues (expenses) net	18.4	11.7	(4.4)

Year ended December 31, 2007

Exchange gains & losses on hedging contracts corresponded to the impact of financial hedging instruments allocated to the operating revenues of the period.

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

The provision for restructuring booked in 2003 was reversed for 0.3 million in 2007 once the restructuring expenses were incurred.

Gain on sale of assets included primarily a gain of 2.8 million on the disposal of Eastern Echo shares and a loss of 1.7 million on damaged seismic recording equipment of the one of our seismic vessel.

Year ended December 31, 2006

The assets depreciation corresponds to the write-off of the share of Customers Relationships related to Veritas recognized as intangible asset in Sercel Australia, Veritas having merged with CGG on January 12, 2007 (see note 2). This intangible asset had been recognized in 2004 when Sercel Australia acquired the seismic equipments activity of Thalès Underwater Systems.

The provision for restructuring booked in 2003 was reversed for 0.1 million in 2006 once the restructuring expenses were incurred. This provision was nevertheless readjusted in 2006 for 0.5 million.

Exchange gains & losses on hedging contracts corresponded to the impact of financial hedging instruments allocated to the operating revenues of the period.

Gain on sale of assets included primarily a gain of 5.3 million on the sale of 49% of CGG Ardiseis.

Year ended December 31, 2005

The provision for restructuring booked in 2003 was reversed for 0.1 million in 2005 once the restructuring expenses were incurred.

Exchange gains & losses on hedging contracts corresponded to the impact of financial hedging instruments allocated to the operating revenues of the period.

Gain (loss) on sale of assets related primarily to a 1.2 million loss on damaged seismic recording equipment of the vessel Amadeus .

NOTE 22 COST OF FINANCIAL DEBT

Cost of financial debt includes expenses related to financial debt, composed of bonds, debt component of convertible bonds, bank loans, capital-lease obligations and other financial borrowings, net of income provided by cash and cash equivalents.

Analysis of cost of financial debt is as follows:

	December 31,	
	2007	2006
		2005

	(in million of euros)		
Current interest expenses related to financial debt	(109.7)	(29.2)	(29.7)
Financial cost on early redemption of bonds			(6.2)
Amortization of deferred expenditures on financial debts	(12.0)	(2.6)	(9.9)
Income provided by cash and cash equivalents	12.6	6.4	3.5
Cost of financial debt, net	(109.1)	(25.4)	(42.3)

As described in note 13, we repaid US\$100 million on the US\$1.000 million Term Loan B senior facility used to finance Veritas acquisition on June 29, 2007. The unamortized portion of the deferred expenditures linked to this redemption amounted to 1.5 million.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

On February 2007, we fully repaid the US\$700 million credit facility used to finance Veritas acquisition and borrowed on January 12, 2007. The unamortized portion of the deferred expenditures linked to this redemption amounted to 7.3 million and was recognized as *Cost of financial debt* .

On February 10, 2006, we repaid the remaining US\$140.3 million on the US\$375 million credit facility used to finance the acquisition of Exploration Resources. The unamortized portion of the deferred expenditures linked to this redemption amounted to 2.0 million.

This repayment of US\$140.3 million follows a first repayment of US\$234.7 million on December 23, 2005. The unamortized portion of the deferred expenditures linked to this redemption amounted to 3.8 million and was recognized as *Cost of financial debt* .

We redeemed and paid accrued interest on all of the remaining outstanding US\$150 million aggregate principal amount of our 105/8% senior notes due 2007 on May 31, 2005. The premium and the unamortized portion of the deferred expenditures linked to this redemption as well as the overlapped interests on the month of May 2005 amounted to 9.4 million and were recognized as *Cost of financial debt* .

This repayment of US\$150 million followed a first repayment of US\$75 million approved by the Board of Directors held on December 8, 2004. According to the indenture, such early redemption implied the payment of a premium representing 5.3125% of the total redemption amount, i.e. US\$4.0 million. The redemption of the Notes actually took place on January 26, 2005. The premium and the unamortized portion of the deferred expenditures linked to this redemption, amounting to 4.3 million, were recognized in the profit and loss as *Cost of financial debt* at December 31, 2004.

NOTE 23 OTHER FINANCIAL INCOME (LOSS)

Analysis of other financial income (loss) is as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
Variance in fair value of conversion option on convertible bonds		(20.7)	(11.5)
Premium paid for the early conversion of the convertible bonds		(1.6)	(8.9)
Write-off of issuance costs on convertible bonds recognized as expense at the time of the early conversion		(0.7)	(3.7)
Derivative and other expenses on convertible bonds		(23.0)	(24.1)
Exchange gains (losses) net	0.7	(4.1)	(1.8)
Other financial income		0.6	1.6
Other financial expenses	(5.9)	(5.3)	(1.7)

Other financial income (loss)	(5.2)	(8.8)	(1.9)
Other financial income (loss) including derivative and other expenses on convertible bonds	(5.2)	(31.8)	(26.0)

At December 31, 2007, 2006 and December 31, 2005, Other financial expenses included mainly the cost of forward related to forward exchange rate hedging instruments.

At December 31, 2005, the premium paid for the early conversion of the convertible bonds and the write-off of issuance costs on convertible bonds were presented as Other financial expenses .

Total Foreign countries	(95.5)	(71.0)	(26.2)
Total income tax expense	(129.4)	(83.2)	(26.6)

(a) includes withholding taxes

(b) correspond in 2006 to the tax audit at CGG Nigeria see below

The Company and its subsidiaries compute income taxes in accordance with the applicable tax rules and regulations of the numerous tax authorities where the Group operates. The tax regimes and income tax rates legislated by these taxing authorities vary substantially. In foreign countries, income taxes are often accrued based on deemed profits calculated as a percentage of sales as defined by local government tax authorities.

Due to the mobile nature of seismic acquisition activities, current relationships between the French and foreign components of such tax items are not reliable indicators of such relationships in future periods.

F-59

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

The reconciliation between income tax expense in the income statement and the theoretical tax charge is detailed below:

	2007	2006	2005
	(in millions of euros)		
Net income (loss)	249.6	158.7	(6.8)
Income tax	(129.4)	(83.2)	(26.6)
Income before tax	379.0	241.9	19.8
<i>Differences on tax basis :</i>			
Equity investment companies income	(4.2)	(10.1)	(13.0)
Theoretical tax basis	374.8	231.8	6.8
Enacted tax rate in France	34.43%	34.43%	34.93%
Theoretical tax	(129.0)	(79.8)	(2.4)
<i>Differences on tax :</i>			
Differences in tax rates between France and foreign countries	1.7	3.2	1.0
Non-deductible part of dividends	(0.2)	(1.0)	
Other permanent differences	(15.4)	(19.5)	
Tax on carry-forward losses net of temporary differences on the French tax group not recognized in the income statement at December 31, 2005 ^(a)		16.3	(26.1)
Other unrecognized deferred tax in income statement on previous years ^(b)	3.2	1.1	6.1
Adjustments on the tax expense recognized in the period for the previous years ^(c)	(0.5)	(1.0)	
Income tax and deferred tax on Argas net income (equity method company) ^(d)	(0.7)	(1.9)	(1.9)
Foreign deferred tax unrecognized on losses of the period	(5.1)	(3.2)	
Deferred tax on currency translation adjustments ^(e)	11.0	2.2	(4.6)
Current and deferred tax on income subject to Norwegian tonnage tax system	7.0	(0.6)	(0.8)
Others ^(f)	(1.4)	1.0	2.1
Income tax	(129.4)	(83.2)	(26.6)

- (a) In 2005, the theoretical deferred tax income related to the loss and the reversal of temporary differences of the French tax group, estimated at 26.1 million was not recognized in the income statement. At December 31, 2005 the tax position of the French tax group was a net future tax benefit basis of 47.5 million corresponding, on one hand, to carry-forward losses of 83.9 million and, on the other hand, to temporary differences liabilities of 36.4 million. This net position was not subject to the recognition of deferred tax since tax perspectives were still unlikely for the French tax group. As soon as the tax perspectives of the French tax group lead to the conclusion in 2006 that the carry forward losses would be used, the deferred tax relating to this position were recognized in the income statement. At December 31, 2006, a 16.3 million deferred tax income relating to the tax position of the French tax group was thus recognized.

- (b) Corresponds in 2005 to 2.4 million on Mexican carry-forward losses and to 3.7 million on Norwegian carry-forward losses.
- (c) Corresponds in 2006 to the tax notification received for CGG Nigeria.
- (d) CGG Veritas, as shareholder of Argas, is directly required to pay income tax for Argas in Saudi Arabia for its share in Argas.
- (e) Corresponds to the currency translation adjustment related to the translation in functional currency (U.S. dollar) of Norwegian and Brazilian entities books in local currency.
- (f) Change in presentation of the tax reconciliation in 2007: the theoretical tax calculation is now based on the Income (loss) of consolidated companies before income taxes as stated in the Consolidated Statement of Operations whereas it was previously based on the Group share of the Income (loss) of consolidated companies before income taxes. The effects of this change in presentation is reported in the item Others for 0.5 million in 2006 and 0.4 million in 2005.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****Net operating loss carried forward**

Net operating loss carried forward available in foreign jurisdictions, and not recognized as deferred tax assets at December 31, 2007, amounted to 78.0 million and are currently scheduled to expire as follows:

	Foreign countries (in million of euros)
2008 and thereafter	15.2
Available indefinitely	62.8
Total	78.0

The Group has recorded valuation allowances to fully provide for the potential tax benefit of carried forward losses by entities that have a recent history of generating losses or for which there is a dispute with tax authorities.

Tax losses carried forward and not recorded as a deferred tax asset mainly relate to United Kingdom tax losses incurred of GBP 26.1 million and to part of Norwegian tax losses incurred for NOK 106.3 million for which we are currently in discussion with Norwegian tax authorities.

Deferred tax assets and liabilities

The reconciliation of net deferred tax are as follows:

	December 31,		
	2007	2006	2005
	(in million of euros)		
Non-deductible provisions (including pensions and profit sharing)	19.7	11.8	3.0
Tangible assets	23.9	3.8	(2.3)
Effect of currency translation adjustment not recognized in income statement	10.5	2.6	0.8
Multi-client surveys (including deferred revenues)	(17.9)	0.8	1.8
Assets reassessed in purchase price allocation of acquisitions	(99.1)	(35.3)	(35.8)
Development costs capitalized	(8.5)	(8.0)	(0.8)
Incomes and losses subject to Norwegian tax tonnage system		(6.8)	(6.9)
Incomes and losses subject to U.S. taxation system	(17.9)		
Other deferred revenues	(0.2)		
Financial instruments	(1.6)	(1.9)	
Others	1.4	0.1	0.3
	(89.7)	(32.9)	(39.9)

Total deferred tax assets net of deferred tax (liabilities) related to timing differences

Tax losses carried forward ^(a)	13.4	9.8	14.6
Total deferred tax assets net of deferred tax (liabilities)	(76.3)	(23.1)	(25.3)

(a) relating to loss carry forwards in United Kingdom, Norway.

With a retroactive effect of January 1st 2007, Exploration Vessel Resources and Exploration Vessel Resources II opted for the new Norwegian tonnage system tax which led to classifying deferred taxes on retained earnings into tax due (over a 10 years period) for an amount of NOK 44.6 million and to reverse the deferred tax liability related to the purchase price allocation of Exploration Resources acquisition of those two companies' vessels for an amount of US\$8.7 million.

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)****Tax position and tax audit**

On March 18, 2005, CGG Americas Inc. received a correspondence from the U.S. Internal Revenue Service regarding an upcoming standard tax audit scheduled for the second quarter of 2005 covering CGG America's 2003 tax return. This tax audit has been finalized in 2007 without any material adjustment.

Several tax audits on the former Veritas perimeter were notified, started, progressed and/or came to an end in 2007. The Group does not expect significant adjustments.

A tax audit of CGG Services 2005 and 2006 accounts has been notified end December 2007 and started early 2008. The process is at a very early stage, hence it is difficult to predict the outcome of this audit, but the Group does not expect significant adjustments.

Effective January 1, 2007, the Group has opted for a new tax amortization method for its multi-client library, based on the Geology & Geophysics method and on the long-term contract method.

NOTE 25 PERSONNEL

The analysis of personnel is as follows:

	Year ended December 31,		
	2007	2006	2005
Personnel employed under French contracts performing Geophysical services	893	863	821
Equipment	765	703	654
Personnel employed under local contracts	6,451	2,934	2,477
Total	8,109	4,500	3,952
Including field staff of:	2,079	739	579

The total cost of personnel employed by consolidated subsidiaries was 528.3 million in 2007, 265.7 million in 2006 and 223.8 million in 2005.

NOTE 26 DIRECTORS AND EXECUTIVE COMMITTEE MEMBERS REMUNERATION

Directors and Executive Committee members' remuneration was as follows:

	Year ended December 31,		
	2007	2006	2005
	(in euros)		

Short-term employee benefit paid ⁽¹⁾	5,807,202	3,590,163	3,026,474
Attendance fees	595,000	365,000	315,000
Long-term employee benefit pension ⁽²⁾	18,314	16,903	26,331
Long-term employee benefit supplemental pension ⁽³⁾	593,102	679,013	321,310
Share-based payments ⁽⁴⁾	8,891,212	3,907,966	170,676

(1) Excludes tax on salary

(2) Cost of services rendered and interest cost

(3) Cost of services rendered and interest cost and amortization of past service cost on the supplemental pension implemented by the end of 2004.

(4) Expense in the income statement related to the stock-options and performance shares plans.

On March 8, 2006, the Board of Directors authorized the Company to enter into an amendment to the employment contract of Mr BRUNCK which is currently suspended and to an amendment to the respective

Table of Contents

COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

employment contract of each President. Such amendment provides that in case of dismissal or change of control, a special severance indemnity representing 250% of their reference annual compensation (gross fixed salary including, if applicable, salaries paid by foreign subsidiaries over the prior 12 months and the average bonuses paid during the prior 3 years) would be paid. In addition, should they decide, in case of a change of control, to continue working for the Company, they would receive a loyalty bonus representing 150% of their reference annual compensation as defined above after the expiry of a 18-month period after change of control.

NOTE 27 RELATED PARTY TRANSACTIONS

Operating transactions

Louis Dreyfus Armateurs (LDA) provides ship management services for a portion of our fleet. Charter party contracts associated with these services are concluded at arm's length. Accounts payable to LDA were 0.2 million at December 31, 2007. Total net charges paid during the year for the provision of ship management services amounted to 6.5 million, and the future commitments for such services to LDA were 54.8 million.

LDA is the owner, together with the Group, of Geomar owner of the seismic vessel Alizé . Geomar is fully consolidated. Geomar provides vessel charter services to LDA. Charter party contracts associated with these services are concluded at arm's length. Total net revenues received during the year for the provision of vessel charter services amounted to 8.2 million (2.1 million for the period starting from April 1, 2007 when Geomar was fully consolidated).

For the year ended December 31, 2007 the sales of geophysical equipment from Sercel to Argas, which is 49% owned by the Group, amounted to 25.5 million, representing approximately 1% of Group revenues.

For the year ended December 31, 2007 the sales of geophysical equipment from Sercel to JV Xian Peic/Sercel Limited, which is 40% owned by the Group, amounted to 4.2 million, representing less than 1% of Group revenues.

For the year ended December 31, 2007 the purchases of geophysical equipment from Sercel to Tronic s, which is 16% owned by the Group, amounted to 8.3 million.

For the year ended December 31, 2007 the purchases of geophysical equipment from Sercel to Cybernetix, which is 32% owned by the Group, amounted to 1.1 million.

Financing

No credit facility or loan was granted to the Company by shareholders during the year ended December 31, 2007 and December 31, 2006.

NOTE 28 SUPPLEMENTARY CASH FLOW INFORMATION

The Financial expenses paid for 2007 included mainly fees and interest related to the US\$1,000 million Term Loan B senior facility, the US\$200 million additional Senior Notes 71/2 and the US\$400 million 73/4% Senior Notes used to finance Veritas acquisition (see note 13).

The Financial expenses paid for 2006 included mainly 2.0 million of fees and interest related to the remaining part of the US\$375 million bridge loan used to acquire Exploration Resources that was eventually repaid on February 2006 and a 1.6 million premium paid to the bondholders on conversion in May 2006 (see note 13). The Financial expenses paid for 2005 included a 3.0 million premium paid for the repayment of the 105/8% bonds maturity 2007 in January 2005, a 4.0 million of issuing fees on the 7 1/2% bonds maturity 2015 issued in April 2005, a 14.2 million of issuing fees and interest expenses related to the bridge loan of US\$375 million used for

F-63

Table of Contents**COMPAGNIE GENERALE DE GEOPHYSIQUE-VERITAS, S.A.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)**

acquisition of Exploration Resources, repaid partially in December 2005 and a 8.9 million of premium paid to the bondholders having converted its bonds in November 2005 (see note 13).

Proceeds from sales of assets in 2007 correspond to the sale of Eastern Echo shares and in 2006 to the sale of 49% of CGG Ardiseis for 16.8 million.

The 1,019.1 million total acquisition in 2007 corresponds to the net investment of 993.1 millions for the acquisition of Veritas (Total consideration less the 97.4 million cash held by Veritas and less the increase in the capital of CGG Veritas for 1,435.8), the acquisition of Offshore Hydrocarbon Mapping plc shares (OHM) for 22.9 million and Cybernetix shares for 3.1 million.

The Sercel Vibtech s acquisition in 2006 represented an investment net of acquired cash of 48.3 million. We acquired all of the shares of Exploration Resources in 2005 for a net investment of 265.8 million corresponding to the price we paid for the shares less the cash held by Exploration Resources at the acquisition date.

In 2006 Other non-cash items include mainly the cancellation of the non-cash expense related to the change in fair value of the derivative on convertible bonds (see note 13) and, in 2005, to the reclassification of the cash-out of the 8.9 million of premium paid to the bondholders upon conversion of bonds in November 2005 from Cash from operations to Financial expenses paid .

The Impact of changes in exchange rate on financial items corresponds notably to the elimination of the unrealized exchange gains (losses) resulting from the gross financial debt in U.S. dollars located in those subsidiaries whose functional currency is euro; this elimination amounted to (47.9) million in 2007, (12.3) million in 2006 and 15.8 million in 2005.

Non-cash investing and financing transactions that are excluded from the consolidated statements of cash flows consisted of the following:

	Year ended December 31,		
	2007	2006	2005
	(in million of euros)		
Equipment acquired under capital leases		0.1	17.4

The cash and cash equivalents are composed as follows:

	Year ended December 31,		
	2007	2006	2005
	(in million of euros)		
Cash	169.3	114.0	70.9

Cash equivalents	85.0	137.8	41.5
Total cash and cash equivalents	254.3	251.8	112.4

F-64

The following reflects the income and the share data used in the basic and diluted earnings per share computations:

	2007	Year 2006	2005
	(in million of euros, excepted per share data)		
Net income attributable to shareholders (a)	245.5	157.1	(7.8)
Effect of dilution			
Ordinary shares outstanding at the beginning of the year (b)	17,597,888	17,081,680	11,682,218
Weighted average number of ordinary shares outstanding during the year (c)	9,315,540	290,247	413,707
Weighted average number of ordinary shares outstanding (d) =(b) +(c)	26,913,428	17,371,927	12,095,925
Dilutive potential shares from 2000 stock options	5,400	25,930	45,915
Dilutive potential shares from 2001 stock options	47,774	71,795	23,189
Dilutive potential shares from 2002 stock options	41,551	66,793	61,052
Dilutive potential shares from 2003 stock options	73,803	145,606	140,633
Dilutive potential shares from 2006 stock options	30,055	(2)	
Dilutive potential shares from 2007 stock options	(2)		
Total dilutive potential shares from stock options ⁽¹⁾	198,583	309,584	270,789
Dilutive potential shares from 2006 performance shares allocation	49,850	49,875	
Dilutive potential shares from 2007 performance shares allocation	53,938		
Total dilutive potential shares from performance shares allocation	103,788	49,875	
Dilutive potential shares from stock convertible bonds ⁽¹⁾			252,500
Dilutive weighted average number of shares outstanding adjusted when dilutive (e)	27,215,799	17,731,586	12,095,925
Earning per share			
Basic (a) / (d)	9.12	9.04	(0.64)
Diluted (a) / (e)	9.02	8.86	(0.64)⁽¹⁾

(1) Stock-options and convertible bonds have an anti-dilutive effect at December 31, 2005; as a consequence, potential shares linked to those instruments are not taken into account in the adjusted dilutive weighted average

number of shares, nor in the calculation of diluted loss per share.

- (2) Exercise price of this stock-options was higher than the average run stock exchange of the share.

NOTE 30 SUBSEQUENT EVENTS

On September 29, 2006, CGG Veritas, its subsidiary CGG Services (ex CGG Marine) and five directors and officers of these entities were named as defendants before the Tribunal de Grande Instance of Evry in a lawsuit brought by one of the main labor unions representing CGG Veritas employees for violation of French labor laws. Procedural hearings were initially scheduled for December 2006 but were delayed several times until February 12, 2008. However, on January 17, 2008, the defendants reached a settlement with the trade union which had brought the claim. The resulting settlement agreement was signed on January 17, 2008, by all trade unions represented in the group. The claim was subsequently withdrawn by the trade union that brought it and the prosecutor and the court accepted to dismiss the case. This claim and its subsequent settlement has had no impact on our financial position or profitability.
