Commission file number 1-16455

RRI Energy, Inc.

(Exact Name of Registrant as Specified in Its Charter)

Delaware

76-0655566

(State or Other Jurisdiction of
Incorporation or Organization)

(I.R.S. Employer Identification No.)

**1000 Main Street
Houston, Texas 77002**

(Address of Principal Executive Offices) (Zip Code)

(713) 497-3000

(Registrant's Telephone Number, Including Area Code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer
(Do not check if a smaller
reporting company)

Smaller reporting
company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Edgar Filing: RRI ENERGY INC - Form 10-Q

As of July 28, 2009, the latest practicable date for determination, RRI Energy, Inc. had 351,482,149 shares of common stock outstanding and no shares of treasury stock.

FORWARD-LOOKING INFORMATION

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements are statements that contain projections, assumptions or estimates about our revenues, income, capital structure and other financial items, our plans and objectives for future operations or about our future economic performance, economic and market conditions, possible transactions and dispositions, financings or offerings. In many cases, you can identify forward-looking statements by terminology such as anticipate, estimate, believe, continue, could, intend, may, potential, predict, should, will, expect, objective, projection, forecast, goal, guidance, outlook, similar words. However, the absence of these words does not mean that the statements are not forward-looking. Actual results may differ materially from those expressed or implied by the forward-looking statements as a result of many factors or events, including, but not limited to, the following:

- Demand and market prices for electricity, purchased power and fuel and emission allowances;
- Limitations on our ability to set rates at market prices;
- Legislative, regulatory and/or market developments;
- Our ability to obtain adequate fuel supply and/or transmission and distribution services;
- Interruption or breakdown of our generating equipment and processes;
- Failure of third parties to perform contractual obligations;
- Changes in environmental regulations that constrain our operations or increase our compliance costs;
- Failure by transmission system operators to communicate operating and system information properly and timely;
- Failure to meet our debt service, restrictive covenants or collateral postings;
- Ineffective hedging and other risk management activities;
- Changes in the wholesale energy market or in our evaluation of our generation assets;
- The outcome of pending or threatened lawsuits, regulatory proceedings, tax proceedings and investigations;
- Weather-related events or other events beyond our control;
- The timing and extent of changes in commodity prices or interest rates; and
- Financial and economic market conditions and our access to capital.

Other factors that could cause our actual results to differ from our projected results are discussed or referred to in the Risk Factors section of our most recent Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Each forward-looking statement speaks only as of the date of the particular statement and we undertake no obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. Our filings and other important information are also available on our investor page at www.rrienergy.com.

Table of Contents

RRI ENERGY, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

(1) Background and Basis of Presentation

(a) Background.

RRI Energy refers to RRI Energy, Inc. and we, us and our refer to RRI Energy, Inc. and its consolidated subsidiaries. Our business consists primarily of one business segment, wholesale energy. See note 13. Our consolidated interim financial statements and notes (interim financial statements) are unaudited, omit certain disclosures and should be read in conjunction with our audited consolidated financial statements and notes in our Form 10-K.

On May 1, 2009, we sold our interests in the affiliates that operated our Texas retail business. In connection with this sale, we changed our name to RRI Energy, Inc. from Reliant Energy, Inc. effective May 2, 2009. See note 15.

(b) Basis of Presentation.

Estimates. Management makes estimates and assumptions to prepare financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) that affect:

the reported amounts of assets, liabilities and equity;

the reported amounts of revenues and expenses; and

our disclosure of contingent assets and liabilities at the date of the financial statements.

We evaluate our estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which we believe to be reasonable under the circumstances. We adjust such estimates and assumptions when facts and circumstances dictate. We have evaluated subsequent events for recording and disclosure to August 3, 2009, the date the interim financial statements were issued.

Adjustments and Reclassifications. The interim financial statements reflect all normal recurring adjustments necessary, in management's opinion, to present fairly our financial position and results of operations for the reported periods. Amounts reported for interim periods, however, may not be indicative of a full year period due to seasonal fluctuations in demand for electricity and energy services, changes in commodity prices, and changes in regulations, timing of maintenance and other expenditures, dispositions, changes in interest expense and other factors. We have reclassified certain amounts reported in these interim financial statements from prior periods to conform to the 2009 presentation. We reclassified amounts on our December 31, 2008 consolidated balance sheet relating primarily to continuing versus discontinued margin deposits, which increased our total assets and total liabilities by \$93 million. These reclassifications had no impact on reported earnings/losses.

Deconsolidation of Channelview. On August 20, 2007, four of our wholly-owned subsidiaries, RRI Energy Channelview LP (Channelview LP), RRI Energy Channelview (Texas) LLC, RRI Energy Channelview (Delaware) LLC and RRI Energy Services Channelview LLC (collectively, Channelview), filed for reorganization under Chapter 11 of the Bankruptcy Code. As Channelview is currently subject to the supervision of the bankruptcy court, we deconsolidated Channelview's financial results beginning August 20, 2007 and began reporting our investment in Channelview using the cost method. The Channelview plant was sold on July 1, 2008. See note 14 for further discussion of Channelview.

Inventory. We value fuel inventories at the lower of average cost or market. We reduce these inventories as they are used in the production of electricity or sold. We recorded \$35 million and \$1 million during the three months ended June 30, 2009 and 2008, respectively, for lower of average cost or market adjustments in cost of sales and recorded \$59 million and \$1 million during the six months ended June 30, 2009 and 2008, respectively.

FASB Codification. The Financial Accounting Standards Board's (FASB) Accounting Standards Codification became effective for us in the third quarter of 2009. The Codification brings together in one place all authoritative GAAP and substantially retains existing GAAP. This change will not affect our consolidated financial statements.

Table of Contents

New Accounting Pronouncement Adopted Interim Disclosures about Fair Value of Financial Instruments. The FASB issued FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*, which is effective for our June 30, 2009 interim financial statements. The FSP amends Statement of Financial Accounting Standards (SFAS) No. 107, *Disclosures about Fair Value of Financial Instruments* and requires us to provide information about the fair value of our financial instruments, including methods and significant assumptions used to estimate the fair value, in interim financial statements. See note 3.

New Accounting Pronouncement Adopted Fair Value Measurements. The FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly*, which is effective for our June 30, 2009 interim financial statements. The FSP provides guidance on how to determine the fair value of assets and liabilities under SFAS No. 157, *Fair Value Measurements* when there has been a significant decrease in the volume and level of activity for an asset or liability compared with normal market activity for the asset or liability. This FSP did not have a significant impact on our consolidated financial statements since the markets in which we purchase and sell commodities and derivative instruments are not distressed. See notes 3 and 4.

New Accounting Pronouncement Not Yet Adopted Disclosures about Plan Assets. The FASB issued FSP FAS 132(R)-1, *Employer's Disclosures about Postretirement Benefit Plan Assets*, which is effective for 2009. In addition to enhanced disclosures regarding investment policies and strategies, this FSP will require us to disclose in our 2009 Annual Report on Form 10-K information about fair value measurements of plan assets that would be similar to the disclosures about fair value measurements required by SFAS No. 157, *Fair Value Measurements*.

(2) Stock-based Compensation and Other Employee Matters

Stock-based Compensation. Our compensation expense for our stock-based incentive plans was:

	Three Months Ended		Six Months Ended June 30,	
	June 30,	2008	2009	2008
	2009	2008	2009	2008
	(in millions)			
Stock-based incentive plans compensation expense (pre-tax) ⁽¹⁾	\$ 1	\$ 4	\$ 4	\$ 8

(1) See note 10(a) to our consolidated financial statements in our Form 10-K for information about our stock-based incentive plans compensation expense.

During June 2009, the compensation committee of our board of directors granted 817,030 time-based restricted stock units and 817,030 time-based cash units to employees under our stock and incentive plans. The awards will vest in June 2012. No tax benefits related to stock-based compensation were realized during the three and six months ended June 30, 2009 and 2008 due to our net operating loss carryforwards.

Other Employee Matters. As of June 30, 2009, approximately 45% of our employees are subject to collective bargaining arrangements. Approximately 35% of our employees are subject to collective bargaining arrangements that will expire by June 30, 2010. We intend to negotiate the renewal of these agreements.

(3) Fair Value Measurements

Fair Value Hierarchy and Valuation Techniques. We apply recurring fair value measurements to our financial assets and liabilities. In determining fair value, we generally use the market approach and incorporate assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and/or the risks inherent in the inputs to the valuation techniques. These inputs can be readily observable, market corroborated, or generally unobservable internally-developed inputs. Based on the observability of the inputs used in our valuation techniques, our financial assets and liabilities are classified as follows:

- Level 1:** Level 1 represents unadjusted quoted market prices in active markets for identical assets or liabilities that are accessible at the measurement date. This category primarily includes our energy derivative instruments that are exchange-traded or that are cleared and settled through the exchange. It also includes our available-for-sale and trading securities.
- Level 2:** Level 2 represents quoted market prices for similar assets or liabilities in active markets, quoted market prices in markets that are not active or other inputs that are observable or can be corroborated by observable market data. This category includes emission allowances futures that are exchange-traded and over-the-counter (OTC) derivative instruments such as generic swaps, forwards and options.

Table of Contents

Level 3: This category includes our energy derivative instruments whose fair value is estimated based on internally developed models and methodologies utilizing significant inputs that are generally less readily observable from objective sources (such as implied volatilities and correlations). Our OTC, complex or structured derivative instruments that are transacted in less liquid markets with limited pricing information are included in Level 3. Examples are coal contracts, longer term natural gas contracts and options valued using implied or internally-developed inputs.

We value some of our OTC, complex or structured derivative instruments using valuation models, which utilize inputs that may not be corroborated by market data, such as market prices for power and fuel, price shapes, volatilities and correlations as well as other relevant factors. When such inputs are significant to the fair value measurement, the derivative assets or liabilities are classified as Level 3 when we do not have corroborating market evidence to support significant valuation model inputs and cannot verify the model to market transactions. We believe the transaction price is the best estimate of fair value at inception under the exit price methodology. Accordingly, when a pricing model is used to value such an instrument, the resulting value is adjusted so the model value at inception equals the transaction price. Valuation models are typically impacted by Level 1 or Level 2 inputs that can be observed in the market, as well as unobservable Level 3 inputs. Subsequent to initial recognition, we update Level 1 and Level 2 inputs to reflect observable market changes. Level 3 inputs are updated when corroborated by available market evidence. In the absence of such evidence, management's best estimate is used.

Fair Value of Derivative Instruments and Certain Other Assets. We apply recurring fair value measurements to our financial assets and liabilities. Fair value measurements of our financial assets and liabilities are as follows:

	June 30, 2009				Total
	Level 1	Level 2	Level 3	Reclassification	Fair Value
	(in millions)				
Total derivative assets	\$ 172	\$ 68	\$ 1	\$ (1)	\$ 241
Total derivative liabilities	53	179	118	(1)	350
Other assets ⁽²⁾	32				32

(1) Reclassifications are required to reconcile to our consolidated balance sheet presentation. Amounts are insignificant as of June 30, 2009.

(2) Includes \$12 million in available-for-sale securities (shares in a public exchange) and \$20 million in trading securities

(rabbi trust investments (which is comprised of mutual funds) associated with our non-qualified deferred compensation plans for key and highly compensated employees).

December 31, 2008

	Level 1	Level 2	Level 3 (in millions)	Reclassifications	Total Fair Value
Total derivative assets	\$ 125	\$ 111	\$ 7	\$ (3) ⁽¹⁾	\$ 240
Total derivative liabilities	17	208	121	(3) ⁽¹⁾	343
Other assets ⁽²⁾	29				29

(1) Reclassifications are required to reconcile to our consolidated balance sheet presentation.

(2) Includes \$8 million in available-for-sale securities (shares in a public exchange) and \$21 million in trading securities (rabbi trust investments (which is comprised of mutual funds) associated with our non-qualified deferred compensation plans for key and highly compensated employees).

compensated
employees).

Table of Contents

The fair values of cash and cash equivalents, accounts receivable and payable, margin deposits, available-for-sale securities, trading securities and derivative assets and liabilities approximate their carrying amounts. Values of our debt for continuing operations (see note 7) are:

	June 30, 2009		December 31, 2008	
	Carrying Value	Fair Value⁽¹⁾	Carrying Value	Fair Value⁽¹⁾
	(in millions)			
Fixed rate debt	\$ 2,572	\$ 2,421	\$ 2,623	\$ 2,168
Total debt	\$ 2,572	\$ 2,421	\$ 2,623	\$ 2,168

(1) We based the fair values of our fixed rate debt on market prices and quotes from an investment bank.

The following is a reconciliation of changes in fair value of net derivative assets and liabilities classified as Level 3:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
	Net Derivatives (Level 3)			
	(in millions)			
Balance, beginning of period	\$ (153)	\$ 85	\$ (114)	\$ 21
Total gains (losses) realized/unrealized:				
Included in earnings	(12) ⁽¹⁾	127 ⁽¹⁾	(79) ⁽¹⁾	141 ⁽¹⁾
Purchases, issuances and settlements (net)	48	(36)	76	14
Transfers in and/or out of Level 3 (net)	(2)	(3)	(4)	(5)
Balance, end of period	\$ (117)	\$ 176	\$ (117)	\$ 176
Changes in unrealized gains (losses) relating to derivative assets and liabilities still held at June 30, 2009 and 2008:				
Revenues	\$	\$ (2)	\$ (2)	\$ (1)
Cost of sales	(5)	124	(54)	102
Total	\$ (5)	\$ 122	\$ (56)	\$ 101

- (1) Recorded in revenues and cost of sales.
- (2) Represents fair value as of March 31, 2009.
- (3) Represents fair value as of March 31, 2008.
- (4) Represents fair value as of December 31, 2008.
- (5) Represents fair value as of December 31, 2007.

See note 2(e) to our consolidated financial statements in our Form 10-K for additional information about fair value measurements.

(4) Derivative Instruments and Hedging Activities

We account for our derivative instruments and hedging activities in accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended (SFAS No. 133). Effective January 1, 2009, we adopted SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (SFAS No. 161).

Changes in commodity prices prior to the energy delivery period are inherent in our business. However, we believe the benefits of generally hedging our generation assets do not justify the costs, including collateral postings.

Accordingly, we may enter selective hedges, including originated transactions, based on our assessment of (a) operational and market limitations requiring us to enter into power, fuel, capacity and emissions transactions to manage our generation assets, (b) the near term economic environment and volatile commodity markets and the benefits of hedging some of the downside risk to our earnings and cash flows and (c) market fundamentals and the opportunity to increase the return from our generation assets. For our risk management activities, we use derivative and non-derivative contracts that provide for settlement in cash or by delivery of a commodity. We use derivative instruments such as futures, forwards, swaps and options to execute our wholesale hedge strategy. We may also enter into derivatives to manage our exposure to changes in prices of emission and exchange allowances.

Table of Contents

We account for our derivatives under one of three accounting methods (mark-to-market, accrual (under the normal purchase/normal sale exception to fair value accounting) or cash flow hedge accounting) based on facts and circumstances. The fair values of our derivative activities are determined by (a) prices actively quoted, (b) prices provided by other external sources or (c) prices based on models and other valuation methods. See note 5 for discussion on fair value measurements.

A derivative is recognized at fair value in the balance sheet whether or not it is designated as a hedge, except for derivative contracts designated as normal purchase/normal sale exceptions, which are not in our consolidated balance sheet or results of operations prior to settlement resulting in accrual accounting treatment.

Realized gains and losses on derivative contracts used for risk management purposes and not held for trading purposes are reported either on a net or gross basis based on the relevant facts and circumstances. Hedging transactions that do not physically flow are included in the same caption as the items being hedged.

A summary of our derivative activities and classification in our results of operations is:

Instrument	Primary Risk Exposure	Purpose for Holding or Issuing Instrument ⁽¹⁾	Transactions that Physically Flow/Settle	Transactions Financially Settled
Power futures, forward, swap and option contracts	Price risk	Power sales to customers Power purchases related to operations Power purchases/sales related to legacy trading and non-core asset management positions ⁽³⁾	Revenues Cost of sales Revenues	Revenues Revenues Revenues
Natural gas and fuel futures, forward, swap and option contracts	Price risk	Natural gas and fuel sales related to operations Natural gas sales related to power generation ⁽⁴⁾ Natural gas and fuel purchases related to operations Natural gas and fuel purchases/sales related to legacy trading and non-core asset management positions ⁽³⁾	Revenues/Cost of sales N/A ⁽⁵⁾ Cost of sales Cost of sales	Cost of sales Revenues Cost of sales Cost of sales
Emission and exchange allowances futures ⁽⁶⁾	Price risk	Purchases/sales of emission and exchange allowances	N/A ⁽⁵⁾	Revenues/Cost sales

(1) The purpose for holding or issuing does not impact the accounting method elected

for each instrument.

- (2) Includes classification for mark-to-market derivatives and amounts reclassified from accumulated other comprehensive income (loss) related to cash flow hedges.
- (3) See discussion below regarding trading activities.
- (4) Natural gas financial swaps and options transacted to economically hedge generation in the PJM region.
- (5) N/A is not applicable.
- (6) Includes emission and exchange allowances futures for sulfur dioxide (SO₂), nitrogen oxide (NO_x) and carbon dioxide (CO₂).

In addition to market risk, we are exposed to credit and operational risk. We have a risk control framework to manage these risks, which include: (a) measuring and monitoring these risks, (b) review and approval of new transactions relative to these risks, (c) transaction validation and (d) portfolio valuation and reporting. We use mark-to-market valuation, value-at-risk and other metrics in monitoring and measuring risk. Our risk control framework includes a variety of separate but complementary processes, which involve commercial and senior management and our Board of Directors. See note 5 for further discussion of our credit policy.

Earnings Volatility from Derivative Instruments. We procure natural gas, coal, oil, natural gas transportation and storage capacity and other energy-related commodities to support our business. Some types of transactions may cause us to experience volatility in our earnings due to natural gas inventory related to transportation and storage generally receiving accrual treatment while the related derivative instruments are marked to market through earnings.

Table of Contents

Unrealized gains and losses on energy derivatives consist of both gains and losses on energy derivatives during the current reporting period for derivative assets or liabilities that have not settled as of the balance sheet date and the reversal of unrealized gains and losses from prior periods for derivative assets or liabilities that settled prior to the balance sheet date but during the current reporting period.

Cash Flow Hedges. If certain conditions are met, a derivative instrument may be designated as a cash flow hedge. Derivatives designated as cash flow hedges must have a high correlation between price movements in the derivative and the hedged item. The changes in fair value of cash flow hedges are deferred in accumulated other comprehensive income (loss), net of tax, to the extent the contracts are, or have been, effective as hedges, until the forecasted transactions affect earnings. At the time the forecasted transactions affect earnings, we reclassify the amounts in accumulated other comprehensive income (loss) into earnings. We record the ineffective portion of changes in fair value of cash flow hedges immediately into earnings. For all other derivatives, changes in fair value are recorded as unrealized gains or losses in our results of operations.

If and when an acceptable level of correlation no longer exists, hedge accounting ceases and changes in fair value are recognized in our results of operations. If it becomes probable that a forecasted transaction will not occur, we immediately recognize the related deferred gains or losses in our results of operations. The associated hedging instrument is then marked to market through our results of operations for the remainder of the contract term unless a new hedging relationship is redesignated.

Over the past several years, we have substantially decreased derivatives accounted for as cash flow hedges, in favor of utilizing the mark-to-market method of accounting or the normal purchase/normal sale exception for these derivatives. During the first quarter of 2007, we de-designated our remaining cash flow hedges; therefore, as of June 30, 2009 and December 31, 2008, we do not have any designated cash flow hedges.

Presentation of Derivative Assets and Liabilities. We present our derivative assets and liabilities on a gross basis (regardless of master netting arrangements with the same counterparty). Cash collateral amounts are also presented on a gross basis.

As of June 30, 2009, our commodity derivative assets and liabilities include amounts for non-trading and trading activities as follows:

	Derivative Assets		Derivative Liabilities		Net Derivative Assets (Liabilities)
	Current	Long-Term	Current	Long-Term	
	(in millions)				
Non-trading	\$ 95	\$ 64	\$ (194)	\$ (102)	\$ (137)
Trading	62	20	(41)	(13)	28
Total derivatives	\$ 157	\$ 84	\$ (235)	\$ (115)	\$ (109)

We have the following derivative commodity contracts outstanding as of June 30, 2009:

Commodity	Unit	Notional Volumes	
		Current	Long-term
		(in millions)	
Power	MWh ⁽¹⁾	(3) ⁽²⁾	(5) ⁽²⁾
Natural gas	MMBTU ⁽³⁾	7	25
Natural gas basis	MMBTU ⁽³⁾		1
Coal	MMBTU ⁽³⁾	109	235

(1) MWh is megawatt hours.

- (2) Negative amounts indicate net forward sales.
- (3) MMBTU is million British thermal units.

Table of Contents

The income (loss) associated with our energy derivatives is:

Derivatives Not Designated as Hedging Instruments Under SFAS No. 133⁽¹⁾	Three Months Ended June 30, 2009	
	Revenues	Cost of Sales
	(in millions)	
Non-Trading Commodity Contracts:		
Unrealized ⁽²⁾	\$ (22)	\$ 31
Realized ⁽³⁾⁽⁴⁾⁽⁵⁾	81	(66)
Total non-trading	\$ 59	\$ (35)
Trading Commodity Contracts:		
Unrealized	\$	\$ (2)
Realized ⁽³⁾		1
Total trading	\$	\$ (1)
Derivatives Not Designated as Hedging Instruments Under SFAS No. 133⁽¹⁾	Six Months Ended June 30, 2009	
	Revenues	Cost of Sales
	(in millions)	
Non-Trading Commodity Contracts:		
Unrealized ⁽²⁾	\$ (26)	\$ (9)
Realized ⁽³⁾⁽⁴⁾⁽⁵⁾	187	(74)
Total non-trading	\$ 161	\$ (83)
Trading Commodity Contracts:		
Unrealized	\$	\$ (2)
Realized ⁽³⁾		20
Total trading	\$	\$ 18

(1) Interest rate swap instruments were liquidated in 2002 and the related deferred losses in accumulated other

comprehensive loss are being amortized into interest expense through 2012. An immaterial amount was amortized during the three and six months ended June 30, 2009 and 2008, which was included in interest expense under other operations.

- (2) During 2007, we de-designated our remaining cash flow hedges. During the three and six months ended June 30, 2009, previously measured ineffectiveness gains (losses) reversing due to settlement of the derivative contracts was insignificant.
- (3) Does not include realized gains or losses associated with cash month transactions, non-derivative transactions or derivative transactions that qualify for the normal purchase/normal sale exception.
- (4) Excludes settlement value of fuel contracts

classified as inventory upon settlement.

- (5) Includes gains or losses from de-designated cash flow hedges reclassified from accumulated other comprehensive loss due to settlement of the derivative contracts. See note 6.

As of June 30, 2009 and December 31, 2008, we do not have any designated cash flow hedges. Amounts included in accumulated other comprehensive loss are:

	June 30, 2009	
	Expected to be Reclassified into Results of	
	At the End of the Period	Operations in Next 12 Months
	(in millions)	
De-designated cash flow hedges ⁽¹⁾⁽²⁾⁽³⁾	\$ 41	\$ 15

- (1) No component of the derivatives gain or loss was excluded from the assessment of effectiveness.

- (2) During the three and six months ended June 30, 2008, previously measured ineffectiveness gains (losses) in revenues of \$1 million and

\$0, respectively, reversed due to settlement of the derivative contracts.

- (3) During the three and six months ended June 30, 2009 and 2008, \$0 was recognized in our results of operations as a result of the discontinuance of cash flow hedges because it was probable that the forecasted transaction would not occur.

Table of Contents

Trading Activities. Prior to March 2003, we engaged in proprietary trading activities. Trading positions entered into prior to our decision to exit this business are being closed on economical terms or are being retained and settled over the contract terms. In addition, we have current transactions relating to non-core asset management, such as gas storage and transportation contracts not tied to generation assets, which are classified as trading activities. The income (loss) associated with these transactions is:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
	(in millions)			
Revenues	\$	\$	\$	\$
Cost of sales		5	(13)	16
		(17)		(17)
Total ⁽¹⁾	\$	5	\$	(13)
			\$	16
			\$	(17)

(1) Includes realized and unrealized gains and losses on both derivative instruments and non-derivative instruments.

(5) Credit Risk

We have a credit policy that governs the management of credit risk, including the establishment of counterparty credit limits and specific transaction approvals. Credit risk is monitored daily and the financial condition of our counterparties is reviewed periodically. We try to mitigate credit risk by entering into contracts that permit netting and allow us to terminate upon the occurrence of certain events of default. We measure credit risk as the replacement cost for our derivative positions plus amounts owed for settled transactions.

Our credit exposure is based on our derivative assets and accounts receivable from our wholesale energy counterparties, after taking into consideration netting within each contract and any master netting contracts with counterparties. We believe this represents the maximum potential loss we would incur if our counterparties failed to perform according to their contract terms. In determining the fair value of our derivative assets, we include assumptions for counterparty non-performance risk. See note 3 above and note 2(e) to our consolidated financial statements in our Form 10-K for additional information about fair value measurements. Additionally, we provide an allowance for doubtful accounts for outstanding receivable balances.

As of June 30, 2009, our derivative assets and accounts receivable from our wholesale energy counterparties, after taking into consideration netting within each contract and any master netting contracts with counterparties, are:

	Exposure Before Collateral ⁽¹⁾	Credit Collateral Held ⁽³⁾	Exposure Net of Collateral (dollars in millions)	Number of Counterparties	Net Exposure of Counterparties
Credit Rating Equivalent	(2)			>10%	>10%

Edgar Filing: RRI ENERGY INC - Form 10-Q

Investment grade	\$	224	\$	45	\$	179	2 ⁽⁴⁾	\$	145
Non-investment grade		2				2			
No external ratings:									
Internally rated Investment grade		66				66	1 ⁽⁵⁾		65
Internally rated Non-investment grade		7		6		1			
Total	\$	299	\$	51	\$	248	3	\$	210

(1) The table includes amounts related to certain contracts classified as discontinued operations in our consolidated balance sheets. These contracts settle through the expiration date in 2010.

(2) The table excludes amounts related to contracts classified as normal purchase/normal sale and non-derivative contractual commitments that are not recorded in our consolidated balance sheets, except for any related accounts receivable. Such contractual commitments contain credit and economic risk if a counterparty

does not perform.
Nonperformance
could have a
material adverse
impact on our
future results of
operations,
financial
condition and
cash flows.

- (3) Collateral
consists of cash,
standby letters of
credit and other
forms approved
by management.
- (4) These
counterparties
are a power grid
operator and an
energy merchant.
- (5) This counterparty
is a financial
institution.

As of December 31, 2008, three investment grade counterparties (a financial institution and two power grid operators) represented 63% (\$156 million) of our credit exposure.

Based on our current credit ratings, any additional collateral postings that would be required from us due to a credit downgrade would be immaterial. As of June 30, 2009 and December 31, 2008, we have posted cash margin deposits of \$122 million and \$70 million, respectively, as collateral for our derivative liabilities receiving mark-to-market accounting treatment and our accounts payable (classified either as continuing or discontinued operations).

Additionally, as of June 30, 2009 and December 31, 2008, we have \$95 million and \$103 million, respectively, in letters of credit issued as collateral for our derivative liabilities receiving mark-to-market accounting treatment and our accounts payable (classified either as continuing or discontinued operations). See note 7.

Table of Contents**(6) Comprehensive Income**

The components of total comprehensive income are:

	Three Months Ended June		Six Months Ended June 30,	
	2009	30, 2008	2009	2008
	(in millions)			
Net income	\$ 803	\$ 359	\$ 652	\$ 736
Other comprehensive income, net of tax:				
Reclassification of net deferred loss from cash flow hedges realized into net income/loss (net of tax)	3	6	8	16
Unrealized gain on available-for-sale securities (net of tax) ⁽¹⁾	2		3	
Reclassification of benefits actuarial net loss into net income/loss (net of tax)	1		1	
Comprehensive income	\$ 809	\$ 365	\$ 664	\$ 752

(1) As of June 30, 2009 and December 31, 2008, \$12 million and \$8 million, respectively, of unrealized net gains (excluding taxes) are included in accumulated other comprehensive loss for available-for-sale securities.

(7) Debt

Weighted Average Stated Interest Rate⁽¹⁾	June 30, 2009		December 31, 2008	
	Long-term	Current	Weighted Average Stated Interest Rate⁽¹⁾	Long-term Current

Total other debt						11			4	13	
Total debt ⁽⁷⁾		\$	2,161	\$	411			\$	2,610	\$	13

(1) The weighted average stated interest rates are as of June 30, 2009 or December 31, 2008.

(2) We repurchased \$45 million during the three months ended June 30, 2009. See note 15.

(3) Excludes \$22 million and \$169 million classified as discontinued operations as of

June 30, 2009
and
December 31,
2008,
respectively.
See note 15.

- (4) PEDFA is the Pennsylvania Economic Development Financing Authority. These bonds were issued for our Seward plant.
- (5) Excludes \$14 million and \$92 million classified as discontinued operations as of June 30, 2009 and December 31, 2008, respectively. See note 15.
- (6) Debt acquired in the Orion Power acquisition was adjusted to fair value as of the acquisition date. Included in interest expense is amortization of \$3 million and \$3 million for valuation adjustments for debt during the three months ended June 30, 2009 and 2008, respectively, and \$6 million and \$6 million

during the six months ended June 30, 2009 and 2008, respectively.

- (7) Excludes \$36 million and \$261 million classified as discontinued operations as of June 30, 2009 and December 31, 2008, respectively. See note 15.

Table of Contents

Amounts borrowed and available for borrowing under our revolving credit agreements as of June 30, 2009 are:

	Total Committed Credit	Drawn Amount	Letters of Credit	Unused Amount
	(in millions)			
RRI Energy senior secured revolver due 2012	\$ 500	\$	\$ 39	\$ 461
RRI Energy letter of credit facility due 2014	250		250	
Total	\$ 750	\$	\$ 289	\$ 461

(8) Earnings (Loss) Per Share

The amounts used in the basic and diluted earnings (loss) per common share computations are the same.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
	(in millions)			
Income (loss) from continuing operations (basic and diluted)	\$ (103)	\$ 82	\$ (209)	\$ 95

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
	(shares in thousands)			
Diluted Weighted Average Shares Calculation:				
Weighted average shares outstanding (basic)	350,665	346,616	350,577	346,017
Plus: Incremental shares from assumed conversions:				
Stock options	(1)	4,317	(1)	4,285
Restricted stock	(1)	575	(1)	559
Employee stock purchase plan	(1)	47	(1)	23
5.00% convertible senior subordinated notes	N/A ⁽²⁾	18	N/A ⁽²⁾	115
Warrants	N/A ⁽³⁾	2,481	N/A ⁽³⁾	3,079
Weighted average shares outstanding assuming conversion (diluted)	350,665	354,054	350,577	354,078

(1) As we incurred a loss from continuing operations for this period,

diluted loss per share is calculated the same as basic loss per share.

(2) In December 2006, we converted 99.2% of our convertible senior subordinated notes to common stock. During 2008, the remaining outstanding notes were converted to common stock.

(3) All unexercised warrants expired in August 2008.

We excluded the following items from diluted earnings (loss) per common share due to the anti-dilutive effect:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2009	2008	2009	2008
	(shares in thousands, dollars in millions)			
Shares excluded from the calculation of diluted earnings (loss) per share	438 ⁽¹⁾	N/A ⁽²⁾	442 ⁽¹⁾	N/A ⁽²⁾
Shares excluded from the calculation of diluted earnings (loss) per share because the exercise price exceeded the average market price	6,217 ⁽³⁾	1,833 ⁽³⁾	7,086 ⁽³⁾	1,849 ⁽³⁾

(1) Potential shares excluded consist of stock options, restricted stock and shares related to the employee stock purchase plan.

(2) Not applicable as we included the item in the

calculation of
diluted
earnings/loss
per share.

- (3) Includes stock options.

Table of Contents**(9) Income Taxes****(a) Tax Rate Reconciliation.**

A reconciliation of the federal statutory income tax rate to the effective income tax rate for our continuing operations is:

	Three Months Ended June		Six Months Ended June	
	2009	30, 2008	2009	30, 2008
Federal statutory rate	(35)%	35%	(35)%	35%
Additions (reductions) resulting from:				
Federal valuation allowance	(8)			
State income taxes, net of federal income taxes	(1) ⁽¹⁾	5 ⁽²⁾	(1) ⁽³⁾	6 ⁽⁴⁾
Other		3		2
Effective rate	(44)%	43%	(36)%	43%

(1) Of this percentage, \$9 million relates to additional valuation allowance.

(2) Of this percentage, \$3 million relates to additional valuation allowance.

(3) Of this percentage, \$15 million relates to additional valuation allowance.

(4) Of this percentage, \$4 million relates to additional valuation allowance.

allowance.

(b) Tax Attributes Carryovers.

Our tax attributes carryovers were substantially not affected by the Texas retail sale to the subsidiary of NRG Energy, Inc. See note 15.

(c) Valuation Allowances.

We assess our future ability to use federal, state and foreign net operating loss carryforwards, capital loss carryforwards and other deferred tax assets using the more-likely-than-not criteria. These assessments include an evaluation of our recent history of earnings and losses, future reversals of temporary differences and identification of other sources of future taxable income, including the identification of tax planning strategies in certain situations. Our valuation allowances for continuing deferred tax assets are:

	Federal	State	Capital, Foreign and Other, Net
	(in millions)		
As of December 31, 2008	\$ 49	\$ 103	\$ 14
Changes in valuation allowance	16	6	
As of March 31, 2009	65	109	14
Changes in valuation allowance	(16)	9	1
As of June 30, 2009	\$ 49	\$ 118	\$ 15

(d) FIN 48 and Income Tax Uncertainties.

We may only recognize the tax benefit for financial reporting purposes from an uncertain tax position when it is more-likely-than-not that, based on the technical merits, the position will be sustained by taxing authorities or the courts. The recognized tax benefits are measured as the largest benefit having a greater than fifty percent likelihood of being realized upon settlement with a taxing authority. We classify accrued interest and penalties related to uncertain income tax positions in income tax expense/benefit.

Table of Contents

Our unrecognized federal and state tax benefits did not change significantly during the three and six months ended June 30, 2009 and 2008.

We expect to continue discussions with taxing authorities regarding tax positions related to the following, and believe it is reasonably possible some of these matters could be resolved in the next 12 months; however, we cannot estimate the range of changes that might occur:

- \$177 million payment to CenterPoint during 2004 related to our residential customers;
- \$351 million charge during 2005 to settle certain civil litigation and claims relating to the Western states energy crisis; and
- the timing of tax deductions as a result of negotiations with respect to California-related revenue, depreciation, emission allowances and certain employee benefits.

We are in ongoing discussions with the Internal Revenue Service (IRS) regarding the timing of revenue recognition and tax deductions with respect to certain California-related items in our 2002 short taxable period return (subsequent to our separation from CenterPoint Energy, Inc.). The IRS has informed us it expects to issue a notice of denial of our administrative claim for refund involving these California-related items and we expect to institute refund litigation with respect to this claim in the U.S. District Court or U.S. Court of Federal Claims. In order to set a jurisdictional prerequisite to institute such a refund suit, we expect to make a payment of approximately \$60 million to \$65 million (which includes an asserted tax liability of \$38 million plus interest) some time during 2009. If the IRS were to ultimately prevail in this matter, there would be no impact on the effective tax rate except for interest. The payment is refundable with interest if we are successful in the litigation.

(10) Guarantees and Indemnifications

We have guaranteed some non-qualified benefits of CenterPoint's existing retirees at September 20, 2002. The estimated maximum potential amount of future payments under the guarantee is approximately \$53 million as of June 30, 2009 and no liability is recorded in our consolidated balance sheet for this item.

We also guarantee the \$500 million PEDFA bonds, which are included in our consolidated balance sheet as either outstanding debt or liabilities of discontinued operations (\$422 million and \$500 million are in our consolidated balance sheet as of June 30, 2009 and December 31, 2008, respectively). Our guarantees are secured by the same collateral as our 6.75% senior secured notes. The guarantees require us to comply with covenants similar to those in the 6.75% senior secured notes indenture. The PEDFA bonds will become secured by certain assets of our Seward power plant if the collateral supporting both the 6.75% senior secured notes and our guarantees are released. Our maximum potential obligation under the guarantees is for payment of the principal of \$500 million and related interest charges at a fixed rate of 6.75%. During June and July 2009, we purchased \$78 million and \$14 million, respectively, of the PEDFA bonds and are the holder of these repurchased bonds. Therefore, the net amount payable by us would not exceed the amount of PEDFA bonds outstanding, excluding the PEDFA bonds we hold.

We have guaranteed payments to a third party relating to energy sales from El Dorado Energy, LLC, a former investment. The estimated maximum potential amount of future payments under this guarantee is approximately \$21 million as of June 30, 2009 and no liability is recorded in our consolidated balance sheet for this item.

We enter into contracts that include indemnification and guarantee provisions. In general, we enter into contracts with indemnities for matters such as breaches of representations and warranties and covenants contained in the contract and/or against certain specified liabilities. Examples of these contracts include asset purchase and sales agreements, service agreements and procurement agreements.

In our debt agreements, we typically indemnify against liabilities that arise from the preparation, entry into, administration or enforcement of the agreement.

Except as otherwise noted, we are unable to estimate our maximum potential exposure under these agreements until an event triggering payment occurs. We do not expect to make any material payments under these agreements.

Table of Contents**(11) Contingencies**

We are party to many legal proceedings, some of which may involve substantial amounts. Unless otherwise noted, we cannot predict the outcome of the matters described below.

(a) Pending Natural Gas Litigation.

The following proceedings relate to alleged conduct in the natural gas markets. We have settled a number of proceedings that were pending in California and other Western states; however, some other proceedings remain pending.

We are party to 13 lawsuits, several of which are class action lawsuits, in state and federal courts in California, Kansas, Missouri, Nevada, Tennessee and Wisconsin. These lawsuits relate to alleged conduct to increase natural gas prices in violation of antitrust and similar laws. The lawsuits seek treble or punitive damages, restitution and/or expenses. The lawsuits also name a number of unaffiliated energy companies as parties.

Recent developments in these cases include:

In January 2009, we reached an agreement to settle the five California-related cases pending in federal court in Nevada. The settlement is subject to approval of the court. The charges anticipated to be incurred in connection with the settlement were expensed in the third quarter of 2008. This settlement will resolve all of the remaining California gas cases.

In January 2009, the Circuit Court of Jackson County, Missouri dismissed the case filed by the Missouri Public Service Commission for lack of standing to bring the action. An appeal was filed in February 2009.

(b) Merrill Lynch Action.

In December 2008, we terminated our \$300 million retail working capital facility agreement with Merrill Lynch in order to address any issue that might be asserted regarding the minimum adjusted retail EBITDA covenant in that facility. On December 24, 2008, Merrill Lynch filed an action in the Supreme Court of the State of New York seeking a judgment declaring that under our credit sleeve and reimbursement agreement (the agreement), we did not have the right to terminate the working capital facility without their consent and that such termination is an event of default under the agreement. On May 1, 2009, we and Merrill Lynch filed to dismiss this lawsuit and the agreement was transferred in connection with the closing of the sale of our Texas retail business. The Court granted an order dismissing the action with prejudice on May 4, 2009. See note 15.

(c) Environmental Matters.

New Source Review Matters. The United States Environmental Protection Agency (EPA) and various states are investigating compliance of coal-fueled electric generating stations with the pre-construction permitting requirements of the Clean Air Act known as New Source Review. In 2000 and 2001, we responded to the EPA's information requests related to five of our stations, and in December 2007, we received supplemental requests for two of those stations. In September 2008, we received an EPA request for information related to two additional stations. The EPA agreed to share information relating to its investigations with state environmental agencies. In January 2009, we received a Notice of Violation (NOV) from the EPA alleging that past work at our Shawville, Portland and Keystone generation facilities violated the agency's regulations regarding New Source Review. We believe that the projects listed by the EPA were conducted in compliance with applicable regulations.

In December 2007, the New Jersey Department of Environmental Protection (NJDEP) filed suit against us in the United States District Court in Pennsylvania, alleging that New Source Review violations occurred at one of our power plants located in Pennsylvania. The suit seeks installation of best available control technologies for each pollutant, to enjoin us from operating the plant if it is not in compliance with the Clean Air Act and civil penalties. The suit also names three past owners of the plant as defendants. In March 2009, the Connecticut Department of Environmental Protection became an intervening party to the suit.

We are unable to predict the ultimate outcome of the EPA's NOV or the NJDEP's suit, but a final finding that we violated the New Source Review requirements could result in significant capital expenditures associated with the implementation of emissions reductions on an accelerated basis and possible penalties. Most of these work projects were undertaken before our ownership of those facilities. We believe we are indemnified by or have the right to seek indemnification from the prior owners for certain losses and expenses that we may incur from activities occurring

prior to our ownership.

Table of Contents

Ash Disposal Landfill Closures. We are responsible for environmental costs related to the future closures of seven ash disposal landfills. We recorded the estimated discounted costs (\$12 million as of June 30, 2009 and December 31, 2008) associated with these environmental liabilities as part of our asset retirement obligations. See note 2(q) to our consolidated financial statements in our Form 10-K.

Remediation Obligations. We are responsible for environmental costs related to site contamination investigations and remediation requirements at four power plants in New Jersey. We recorded the estimated long-term liability for the remediation costs of \$8 million as of June 30, 2009 and December 31, 2008.

Conemaugh Action. In April 2007, PennEnvironment and the Sierra Club filed a citizens suit against us in the United States District Court, Western District of Pennsylvania to enforce provisions of the water discharge permit for the Conemaugh plant, of which we are the operator and have a 16.45% interest. PennEnvironment and the Sierra Club seek civil penalties, remediation and an injunction against further violations. We are confident that the Conemaugh plant has operated and will continue to operate in material compliance with its water discharge permit, its consent order agreement with the Pennsylvania Department of Environmental Protection, and related state and federal laws. However, if PennEnvironment and the Sierra Club are successful, we could incur additional capital expenditures associated with the implementation of discharge reductions and penalties, which we do not believe would be material.

Mandalay Notice of Violation. In November 2008, the California State Water Resources Control Board Los Angeles Region proposed a settlement payment in the amount of \$192,000 relating to alleged violations of our wastewater discharge permit for our Mandalay plant. We are reviewing the Board's proposal and we believe that there are reasonable grounds for reduction of the amount of the settlement proposed by the Board.

Global Warming. In February 2008, the Native Village of Kivalina and the City of Kivalina filed a suit in the United States District Court for the Northern District of California against us and 23 other electric generating and oil and gas companies. The lawsuit seeks damages of up to \$400 million for the cost of relocating the village allegedly because of global warming caused by the greenhouse gas emissions of the defendants. We believe this claim lacks legal merit.

(d) Other.

Excess Mitigation Credits. From January 2002 to April 2005, CenterPoint applied excess mitigation credits (EMCs) to its monthly charges to retail energy providers. The PUCT imposed these credits to facilitate the transition to competition in Texas, which had the effect of lowering the retail energy providers' monthly charges payable to CenterPoint. CenterPoint represents that the portion of those EMCs credited to our Texas retail business totaled \$385 million. In its stranded cost case, CenterPoint sought recovery of all EMCs credited to all retail electric providers, including our Texas retail business, and the PUCT ordered that relief. On appeal, the Texas Third Court of Appeals ruled that CenterPoint's stranded cost recovery should exclude EMCs credited to our Texas retail business for price-to-beat customers. The case is now before the Texas Supreme Court. In November 2008, CenterPoint asked us to agree to suspend any limitations periods that might exist for possible claims against us or our Texas retail business if it is ultimately not allowed to include in its stranded cost calculation EMCs credited to our Texas retail business. We agreed to suspend only unexpired deadlines, if any, that may apply to a CenterPoint claim relating to EMCs credited to our Texas retail business. Regardless of the outcome of the Texas Supreme Court proceeding, we believe that any claim by CenterPoint that we are liable to it for any EMCs credited to our Texas retail business lacks legal merit and is unsupported by our Master Separation Agreement with CenterPoint. In addition, CenterPoint has publicly stated that it has no legal recourse against us or our Texas retail business for any reduction in the amount of its recoverable stranded costs should EMCs credited to our Texas retail business be excluded.

CenterPoint Indemnity. We have agreed to indemnify CenterPoint against certain losses relating to the lawsuits described in note 11(a) under Pending Natural Gas Litigation.

Texas Franchise Audit. The state of Texas has issued assessment orders indicating an estimated tax liability of approximately \$58 million (including interest and penalties of \$20 million) relating primarily to the sourcing of receipts for 2000 through 2005. We are contesting the audit assessments related to this issue.

Sales Tax Contingencies. Some of our sales tax computations are subject to challenge under audit. As of June 30, 2009 and December 31, 2008, we have \$13 million accrued in current and long-term liabilities relating to these contingencies.

Table of Contents

Refund Contingency Related to Transportation Rates. In September 2008, Kern River Gas Transmission Company (Kern), a natural gas pipeline company, and certain of its shippers entered into a settlement agreement to which we were a party. The agreement set Kern's transportation rates as of November 2004 at 12.5% return on equity, which resulted in a refund to us of \$30 million during the fourth quarter of 2008 (recorded as a current liability). In January 2009, FERC rejected the settlement and directed Kern to recalculate the refunds based on a rate of 11.55% return on equity. Accordingly, we expect to receive an additional approximately \$4 million in 2009. If the settlement is appealed, that amount may be subject to adjustment on resolution of the appeal.

(12) Supplemental Guarantor Information

Our wholly-owned subsidiaries are either (a) full and unconditional guarantors, jointly and severally, or (b) non-guarantors of the senior secured notes.

(14) Sale of Channelview's Plant and the Bankruptcy Filings

On August 20, 2007, Channelview filed voluntary petitions in the United States Bankruptcy Court for the District of Delaware for reorganization under Chapter 11 of the Bankruptcy Code. Channelview filed for bankruptcy protection to prevent the lenders from exercising their remedies, including foreclosing on the project. The bankruptcy cases have been jointly administered, with Channelview managing its business in the ordinary course as debtors-in-possession subject to the supervision of the bankruptcy court.

In July 2008, Channelview sold its plant and related contracts for \$500 million and paid off its secured lenders. During 2008, we recognized a \$6 million gain relating to our net investment in and receivables from Channelview and incurrence of sale-related costs (classified in gains (losses) on sales of assets and emission and exchange allowances, net). As of June 30, 2009 and December 31, 2008, our net investment in and receivables from Channelview was \$25 million and \$59 million, respectively, classified as a current asset.

Channelview expects to distribute funds to us relating primarily to net proceeds from the sale, pre-petition sales of fuel to Channelview, funds from operations and funds escrowed for potential indemnification claims of approximately \$60 million to \$70 million in the aggregate through 2009. Of this amount, \$25 million was distributed to us during 2008 and \$35 million was distributed to us during the second quarter of 2009.

As a result of the bankruptcies, we deconsolidated Channelview's financial results beginning August 20, 2007, and began reporting our investment in Channelview using the cost method. We will continue to account for Channelview as a cost method investment until it emerges from bankruptcy, which is expected later in 2009. The following table

describes the assets we expect to consolidate upon the emergence from bankruptcy of Channelview:

	June 30, 2009 (in millions)
Cash	\$ 7
Deferred tax assets relating to federal and state net operating loss carryforwards	18

Table of Contents**(15) Discontinued Operations*****(a) Retail Energy Segment.***

General. On May 1, 2009, we sold our Texas retail business to a subsidiary (the buyer) of NRG Energy, Inc. (NRG) for \$287.5 million in cash plus the value of the net working capital. We currently estimate the net working capital to be \$78 million. We estimate our net proceeds will be \$312 million after certain expenses. In connection with the sale, we received net proceeds of \$297 million during primarily the second quarter of 2009 and expect to receive an additional \$15 million later in 2009. This sale also included the rights to the Reliant Energy name. Accordingly, we changed our name to RRI Energy, Inc. on May 2, 2009. In connection with the sale, the lawsuit against our former retail affiliates related to the termination of the retail working capital facility has been dismissed. See note 11(b). In connection with the sale transaction, we entered into a two-year sublease on our corporate office building with the buyer, with sublease rental income totaling \$17 million over that period. We also entered a one-year transition services agreement with the buyer, which includes terms and conditions for information technology services, accounting services and human resources.

Estimated Pre-Tax Gain on Sale. We currently estimate and recognized a pre-tax gain on this sale of \$1.2 billion, which is primarily due to the net derivative liability balance of \$1.1 billion included in the transaction. This amount is subject to change due to various factors, such as the estimated net working capital.

Federal Valuation Allowance. As a result of the sale, we released \$50 million of our discontinued federal valuation allowance for deferred tax assets in discontinued operations during the three months ended June 30, 2009.

Use of Proceeds and Assumptions Related to Debt, Deferred Financing Costs and Interest Expense on Discontinued Operations. As required by our debt agreements, offers to purchase secured notes and PEDFA bonds at par were made with a portion of the net proceeds. We purchased \$225 million of the outstanding debt (\$147 million of the secured notes and \$78 million of the PEDFA bonds) in June 2009 and an additional \$36 million (\$22 million of the secured notes and \$14 million of PEDFA bonds) in July 2009. These amounts and activity have been classified in discontinued operations. See note 7. We have also classified as discontinued operations the related deferred financing costs and interest expense on this debt. We allocated \$4 million of related interest expense during the three months ended June 30, 2009 and 2008 to discontinued operations. We allocated \$8 million of related interest expense during the six months ended June 30, 2009 and 2008 to discontinued operations.

Other Retail Energy Segment Discontinued Operations. We sold our C&I contracts in the PJM (excluding Illinois) and New York areas (collectively, Northeast) in December 2008. As this was a part of our retail energy segment, we have included this activity in our discontinued operations. We have also included our Illinois C&I activity in discontinued operations as it was a part of our retail energy segment and is held-for-sale.

(b) Other Discontinued Operations.

Subsequent to the sale of our New York plants in February 2006, we continue to have (a) insignificant settlements with the independent system operator and (b) property tax and sales and use tax settlements. In addition, we periodically record amounts for contingent consideration received for the 2003 sale of our European energy operations. These amounts are classified as discontinued operations in our results of operations and balance sheets, as applicable.

Table of Contents**(c) All Discontinued Operations.**

The following summarizes certain financial information of the businesses reported as discontinued operations:

	Retail Energy Segment	New York Plants	European Energy	Total
	(in millions)			
Three Months Ended June 30, 2009

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our Form 10-K. This includes non-GAAP financial measures, which are not standardized; therefore it may not be possible to compare these financial measures with other companies' non-GAAP financial measures having the same or similar names. These non-GAAP financial measures, which are discussed further in Consolidated Results of Operations, reflect an additional way of viewing aspects of our operations that, when viewed with our GAAP results, may provide a more complete understanding of factors and trends affecting our business. Investors should review our consolidated financial statements and publicly filed reports in their entirety and not rely on any single financial measure.

Business Overview

We provide electricity and energy services to wholesale customers in competitive power generation energy markets in the United States through our ownership and operation of and contracting for power generation capacity. We have over 14,000 MW of power generation capacity.

We believe the power generation industry is deeply cyclical and capital intensive. Given the nature of the industry, we believe scale and diversity are important long term. Given these beliefs, our strategy is to:

- Maintain a capital structure that positions us to manage through the cycles
- Intensely focus on operational excellence
- Employ a flexible operating model through the cycle
- Utilize a disciplined capital investment approach
- Create value from industry consolidation

The current market environment is challenging given the ongoing turmoil in the financial markets, uncertainty in the direction of the overall economy and declining power demand. Additionally, current commodity prices and spreads are near trough levels. While we believe these conditions will improve, the timing is uncertain.

We have taken a number of actions to navigate the current market challenges and position us for the longer term market recovery, with a focus on maximizing cash flow and building ample liquidity. Some of these actions include:

- Selling the Texas retail business
- Implementing a modest hedging program to achieve a high probability of achieving free cash flow breakeven or better even if market conditions deteriorate further
- Intensely focusing on operating efficiency and effectiveness
- Implementing flexible plant-specific operating models
- Realigning corporate support costs

We are regularly assessing the impact on our business of a wide variety of economic and commodity price scenarios, and believe we have the ability to operate through a significant downturn.

Key Earnings Drivers. Our earnings are significantly impacted by supply and demand fundamentals in the regions in which we operate as well as the spread between gas and coal prices. Our margins are driven by a number of factors, including the prices of power, capacity, natural gas, coal and fuel oil, the cost of emissions and transmission, as well as weather and global macro-economic factors, many of which are volatile. Our ability to control these factors is limited, and in most instances, the factors are beyond our control. We have the most control over the percentage of time that our generating assets are available to run when it is economical for them to do so (commercial capacity factor). Our key earnings drivers and various factors that affect these earnings drivers include:

Economic generation (amount of time our plants are economical to operate)

- Supply and demand fundamentals
- Generation asset fuel type and efficiency
- Absolute and relative cost of fuels used in power generation

Commercial capacity factor (generation as a percentage of economic generation)

- Operations excellence effectiveness
- Maintenance practices
- Planned and unplanned outages

Flexible Plant-Specific Operating Model. We have different operating approaches for our power generation facilities. These operating approaches are determined by each facility's condition, environmental controls, profitability, market rules, upside availability and value drivers. We have separated our facilities into four general groups for the purposes of developing an operating model.

Long-term value This part of our fleet is well positioned to generate revenue for the foreseeable future, and we would expect that little environmental investments will be needed in future years. We plan to invest and manage these plants, representing approximately 2,500 MW, for current and long-term profitability for both capacity and energy revenues.

Long-term capacity resource These plants, representing approximately 4,400 MW, are also well positioned to generate revenue for the foreseeable future, and we expect little future environmental investment. We plan to invest in this part of our fleet for long-term profitability from capacity and/or power purchase and sale agreements.

Near-term profit/controls These plants, representing approximately 5,400 MW, are well positioned to generate revenue in the current environment but do not have SO₂, NO_x or mercury emission controls. We expect to maintain near-term profitability and preserve the option for supply/demand recovery and/or improved gas-coal spreads in this group of plants. We may install emission controls in the future depending on environmental regulations and market conditions. See "—Recent Events."

Restore profit This part of our fleet, representing approximately 1,600 MW, faces lower levels of profitability in the current environment. We will minimize spending, improve profitability and preserve our options for supply/demand recovery and/or improved gas-coal spreads in these plants.

Table of Contents**Recent Events**

In this section, we present recent and potential events that have impacted or could in the future impact our results of operations, financial condition or liquidity. In addition to the events described below, a number of other factors could affect our future results of operations, financial condition or liquidity, including changes in natural gas prices, plant availability, weather and other factors (see Risk Factors in Item 1A of our Form 10-K).

Review of Strategic Alternatives Lead to Exit of Retail Business. In October 2008, our Board of Directors initiated a process to review strategic alternatives and formed a special committee to oversee this process. In late 2008, we sold our Northeast retail C&I contracts. On May 1, 2009, we sold our Texas retail business. The sale of the retail business achieved a number of important strategic objectives for us:

- eliminated the need for approximately \$2.0 billion of credit support and removed capital requirements associated with contingent collateral requirements, which lowered our overall risk profile; and
- enhanced our consolidated balance sheet and improved our liquidity position.

In connection with the sale, the lawsuit related to the termination of the retail working capital facility has been dismissed. Our Board of Directors has concluded its review of strategic alternatives. See Liquidity and Capital Resources and notes 11(b) and 15 to our interim financial statements.

Environmental Matters- Near-term profit/controls group. In April 2009, the New Jersey Department of Environmental Protection finalized a regulation requiring a two-phase reduction in NO_x emissions from industrial sources, including combustion turbines in New Jersey. Phase I requires reductions during high electricity demand days and runs from May 2009 through 2014. Under our initial filed compliance plan, we are installing improved NO_x controls at one of our Pennsylvania facilities (upwind from New Jersey) and modifying dispatch practices as necessary at our New Jersey facilities by October 2009. Phase II requires the installation of emission controls on nearly all of our New Jersey combustion turbines by May 1, 2015. If we elect to install these controls, we could incur capital expenditures of up to approximately \$157 million primarily during 2013 to 2015. Our initial Phase II control plan must be filed by May 1, 2010.

The Pennsylvania mercury rule generally requires mercury reductions on a facility basis in two phases, with 80% reductions by 2010 and 90% reductions by 2015. In January 2009, following a court decision overturning the less-stringent federal mercury rule, a Pennsylvania state court declared the Pennsylvania rule unlawful. The Pennsylvania Department of Environmental Protection appealed to the Pennsylvania Supreme Court, which held in June 2009 that the state rule would continue to be invalid throughout the appeal. Our capital investment plan was based on compliance with the state rule and our estimate of capital expenditures to comply primarily with the first phase of the rule was \$53 million. In light of the Pennsylvania Supreme Court ruling, we have suspended work on mercury-specific control installations, except at our Shawville facility. We are continuing to evaluate our plan given that regulation of mercury at both federal and state levels is uncertain.

As we reported in our Form 10-K, the EPA is required to modify the Clean Air Act (CAIR) to cure defects in the rule identified by the District of Columbia Circuit Court of Appeals. We do not expect CAIR to be finalized until 2012 or 2013. Any spending for SO₂ or NO_x would occur over several years following finalization of these rules and would depend on market conditions.

For a discussion of other existing environmental regulations impacting our fleet, see “Business — Regulation — Environmental Matters” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources” in Items 1 and 7, respectively, of our Form 10-K. For a discussion of pending and contingent matters related to environmental regulations, see note 11(c) to our interim financial statements.

Table of Contents**Consolidated Results of Operations****Three Months Ended June 30, 2009 Compared to Three Months Ended June 30, 2008**

We reported \$803 million consolidated net income, or \$2.29 income per share, for the three months ended June 30, 2009 compared to \$359 million consolidated net income, or \$1.01 income per diluted share, for the same period in 2008. We reported \$103 million consolidated net loss from continuing operations, or \$0.30 loss per share, for the three months ended June 30, 2009 compared to \$82 million consolidated net income from continuing operations, or \$0.23 income per diluted share, for the same period in 2008.

	Three Months Ended June 30,

Income from discontinued operations	906	277	629
Net income	\$ 803	\$ 359	\$ 444

(1) Relates primarily to general costs, which historically were allocated to our discontinued retail energy segment.

Wholesale Energy Segment.

In analyzing the results of our wholesale energy segment and in communications with investors, analysts, rating agencies, banks and other parties, we use the non-GAAP financial measures open energy gross margin, open wholesale gross margin and open wholesale contribution margin, which exclude the items described below, as well as our wholesale energy segment profit and loss measure, contribution margin, including wholesale hedges and unrealized gains/losses on energy derivatives. Open wholesale contribution margin excludes severance charges incurred due to repositioning the company in connection with the sale of our retail business. Because the level of these costs is not representative of our ongoing business operations, our management believes that excluding these costs is useful in that it provides a more meaningful representation of our results of operations on an ongoing basis. Open

energy gross margin, open wholesale gross margin and open wholesale contribution margin should not be relied upon without considering the GAAP financial measures.

Wholesale Hedges. We exclude the recurring effect of certain wholesale hedges that were entered into primarily to mitigate (a) certain operational and market risks at our generation assets and (b) some of the downside risk to our earnings and cash flow. These amounts primarily relate to settlements of power and fuel hedges, long-term natural gas transportation contracts and storage contracts. The wholesale hedges described above are derived based on methodology consistent with the calculation of open energy gross margin. We also exclude the recurring effect of certain historical wholesale hedges that were entered into in order to hedge the economics of a portion of our wholesale operations. These amounts primarily relate to settlements of forward power hedges, long-term tolling purchases, long-term natural gas transportation contracts not serving our generation assets and our legacy energy trading. We believe that it is useful to us, investors, analysts and others to show our results in the absence of hedges. The impact of these hedges on our financial results is not a function of the operating performance of our generation assets, and excluding the impact better reflects the potential operating performance of our generation assets based on prevailing market conditions.

Table of Contents

Unrealized Gains/Losses on Energy Derivatives. We use derivative instruments to manage operational or market constraints and to increase the return on our generation assets. We are required to record in our consolidated statement of operations non-cash gains/losses related to future periods based on current changes in forward commodity prices for derivative instruments receiving mark-to-market accounting treatment. We refer to these gains and losses prior to settlement, as well as ineffectiveness on cash flow hedges, as unrealized gains/losses on energy derivatives. In some cases, the underlying transactions being hedged receive accrual accounting treatment, resulting in a mismatch of accounting treatments. Since the application of mark-to-market accounting has the effect of pulling forward into current periods non-cash gains/losses relating to and reversing in future delivery periods, analysis of results of operations from one period to another can be difficult. We believe that excluding these unrealized gains/losses on energy derivatives provides a more meaningful representation of our economic performance in the reporting period and is therefore useful to us, investors, analysts and others in facilitating the analysis of our results of operations from one period to another. These gains/losses are also not a function of the operating performance of our generation assets, and excluding their impact helps isolate the operating performance of our generation assets under prevailing market conditions.

Our wholesale energy segment's contribution margin, including wholesale hedges and unrealized gains/losses on energy derivatives was \$(48) million during the three months ended June 30, 2009 compared to \$279 million in the same period of 2008. The \$327 million decrease was primarily due to (a) \$162 million decrease in open wholesale gross margin due to lower spark and dark spreads as a result of lower power prices, (b) \$114 million change in wholesale hedges primarily due to \$100 million decline on fuel hedges and (c) \$61 million net change in unrealized gains/losses on energy derivatives. Our margins are significantly impacted by coal prices and related spreads. See Wholesale Energy Margins below for further explanations.

West	82.47		NM ⁽⁶⁾	
Total weighted average	\$ 10.53		\$ 35.37	

(1) Represents economic

generation
(hours) divided
by maximum
generation hours
(maximum plant
capacity
multiplied by
8,760 hours).

(2) Estimated
generation at
100% plant
availability
based on an
hourly analysis
of when it is
economical to
generate based
on the price of
power, fuel,
emission
allowances and
variable
operating costs.

(3) Excludes
generation
related to power
purchase
agreements,
including tolling
agreements.

(4) Generation
divided by
economic
generation.

(5) Represents open
energy gross
margin divided
by generation.

(6) NM is not
meaningful.

Wholesale Energy Revenues.

Operation and maintenance severance	(3)		(3)
Total wholesale energy contribution margin, including wholesale hedges and unrealized gains/losses on energy derivatives ⁽¹¹⁾	\$ (48)	\$ 279	\$ (327)

(1) Open energy gross margin is calculated using the power sales prices received by the plants less delivered spot fuel prices. This

figure excludes the effects of other margin, our wholesale hedges and unrealized gains/losses on energy derivatives.

- (2) Decrease primarily due to lower unit margins (lower power prices partially offset by lower fuel costs).
- (3) Increase primarily due to higher unit margins (lower fuel expense and higher power prices). This increase was partially offset by a decrease in economic generation.
- (4) Other margin represents power purchase agreements, capacity payments, ancillary services revenues and selective commercial hedge strategies.
- (5) Increase primarily due to higher RPM capacity payments. This increase was

partially offset
by lower
ancillary
payments. RPM
is the model
utilized by the
PJM
Interconnection,
LLC to meet
load serving
entities
forecasted
capacity
obligations via a
forward-looking
commitment of
capacity
resources.

(6) Increase
primarily due to
higher RPM
capacity
payments.

(7) Decrease
primarily due to
reduced
selective
commercial
hedge activities.

(8) Decrease
primarily due to
(a) \$5 million
decrease in
planned outages
and maintenance
spending, (b)
\$5 million
decrease in
services and
support, (c)
\$4 million
decrease from
reduced
operations
activity and (d)
\$4 million
decrease due to
the sale of

Bighorn in
October 2008.

- (9) Decrease primarily due to (a) \$100 million decline on fuel hedges and (b) \$35 million loss on market adjustments to inventory. These decreases were partially offset by (a) \$28 million gain on a hedge of generation.

- (10) Decrease primarily due to \$100 million in losses from changes in prices on our energy derivatives marked to market partially offset by \$39 million in gains due to reversal of previously recognized unrealized losses on energy derivatives which settled during the period.

- (11) Wholesale energy segment profit and loss measure.

(1) Relates primarily to general costs, which historically were allocated to our discontinued retail energy segment.

Table of Contents**Wholesale Energy Segment.**

Our wholesale energy segment's contribution margin, including wholesale hedges and unrealized gains/losses on energy derivatives was \$(63) million during the six months ended June 30, 2009 compared to \$496 million in the same period of 2008. The \$559 million decrease was primarily due to (a) \$278 million decrease in open wholesale gross margin due to lower spark and dark spreads as a result of lower power prices, (b) \$153 million change in wholesale hedges primarily due to \$149 million decline on fuel hedges and (c) \$135 million net change in unrealized gains/losses on energy derivatives. Our margins are significantly impacted by coal prices and related spreads. See Wholesale Energy Margins below for further explanations.

Liquidity and Capital Resources

Our goal of establishing and maintaining financial flexibility remains unchanged. We are committed to a strong balance sheet and ample liquidity that will enable us to avoid distress in cyclical troughs and to access capital markets throughout the cycle for value-creation opportunities.

We believe our liquidity exceeds the level required to achieve this goal. Therefore, we expect to use some of our cash and cash equivalents to reduce debt. Our goal for gross debt (total GAAP debt plus our RRI Energy Mid-Atlantic Power Holdings, LLC (REMA) operating leases) is \$1.25 billion to \$1.75 billion. The comparable target for total GAAP debt, based on the current balance for our REMA leases of \$443 million, is approximately \$800 million to \$1.3 billion. We believe that the non-GAAP measure gross debt is a useful and relevant measure of our financial obligations and the strength and flexibility of our capital structure.

On May 1, 2009, we sold our Texas retail business for \$287.5 million in cash plus the value of the net working capital (currently estimated at \$78 million). We offered a portion of the net proceeds to holders of our senior secured notes and PEDFA bonds and purchased \$261 million at par in the second and third quarters of 2009. See *Recent Events* and notes 11(b) and 15 to our interim financial statements. During the second quarter of 2009, we also purchased \$45 million of our senior secured notes at a discount. In the future, we could use a variety of means to achieve our gross debt goal, including the retirement of Orion Power Holdings, Inc.'s \$400 million senior unsecured notes due in May 2010.

As of July 28, 2009, we had total available liquidity of \$1.9 billion, comprised of unused borrowing capacity, letters of credit capacity and cash and cash equivalents. During the six months ended June 30, 2009, we used \$96 million in operating cash flows from continuing operations, including the changes in margin deposits of \$50 million (cash outflow). See *Historical Cash Flows* for further detail of our cash flows from operating activities and explanation of our \$64 million and \$43 million use of cash from investing activities from continuing operations and use of cash from financing activities from continuing operations, respectively, during the six months ended June 30, 2009.

Table of Contents

See note 9 to our interim financial statements regarding an expected income tax cash payment of approximately \$60 to \$65 million relating to California-related matters.

Based on our assessment of the economic environment and volatility in commodity markets, we have hedged approximately 25% of our estimated power generation for 2010 and 2011 (based on MWh). We expect these hedges will reduce the effect of commodity volatility on our 2010 and 2011 cash flows. We continue to monitor our business and hedging with the goal of providing adequate cash flows in the event of a sustained depressed environment.

See Risk Factors in Item 1A and Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources in Item 7 of our Form 10-K, notes 6 and 12(a) to our consolidated financial statements in our Form 10-K and note 7 to our interim financial statements.

Credit Risk

By extending credit to our counterparties, we are exposed to credit risk. For discussion of our credit risk policy and exposures, see note 5 to our interim financial statements.

Off-Balance Sheet Arrangements

As of June 30, 2009, we have no off-balance sheet arrangements.

New Accounting Pronouncements, Significant Accounting Policies and Critical Accounting Estimates**New Accounting Pronouncements**

See notes 1 and 3 to our interim financial statements.

Significant Accounting Policies

See note 2 to our consolidated financial statements in our Form 10-K.

Critical Accounting Estimates

See Management's Discussion and Analysis of Financial Condition and Results of Operations Accounting Estimates New Accounting Pronouncements, Significant Accounting Policies and Critical Accounting Estimates Critical Accounting Estimates in Item 7 in our Form 10-K and note 2 to our consolidated financial statements in our Form 10-K.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK****Market Risks and Risk Management**

Our primary market risk exposure relates to fluctuations in commodity prices. See **Quantitative and Qualitative Disclosures About Market Risk** in Item 7A of our Form 10-K and notes 3 and 4 to our interim financial statements.

Non-Trading Market Risks**Commodity Price Risk**

As of June 30, 2009, the fair values of the contracts related to our net non-trading derivative assets and liabilities are:

Source of Fair Value	Twelve Months Ending June 30, 2010	Remainder of 2010	2011	2012	2013	2014 and thereafter	Total fair value
	(in millions)						
Prices actively quoted (Level 1)	\$ 55	\$ 5	\$ 27	\$	\$	\$	\$ 87
Prices provided by other external sources (Level 2)	(44)	(18)	(37)	(13)			(112)
Prices based on models and other valuation methods (Level 3)	(110)	(2)					(112)
Total mark-to-market non-trading derivatives	\$ (99)	\$ (15)	\$ (10)	\$ (13)	\$	\$	\$ (137)

The fair values shown in the table above are subject to significant changes due to fluctuating commodity forward market prices, volatility and credit risk. Market prices assume a functioning market with an adequate number of buyers and sellers to provide liquidity. Insufficient market liquidity could significantly affect the values that could be obtained for these contracts, as well as the costs at which these contracts could be hedged. In addition, we have committed volumes under some coal contracts through 2010 and 2011 for which the contract prices are subject to negotiation prior to the beginning of each year. For further discussion of how we arrive at these fair values, see note 2(d) to our consolidated financial statements in our Form 10-K, note 3 to our interim financial statements and

Management's Discussion and Analysis of Financial Condition and Results of Operations **New Accounting Pronouncements, Significant Accounting Policies and Critical Accounting Estimates** **Critical Accounting Estimates** in Item 7 of our Form 10-K.

A hypothetical 10% movement in the underlying energy prices would have the following potential loss impacts on our non-trading derivatives:

As of	Market Prices	Earnings Impact (in millions)	Fair Value Impact
June 30, 2009	10% increase	\$ (45)	\$ (45)
December 31, 2008	10% decrease	(5)	(5)

Interest Rate Risk

As of June 30, 2009 and December 31, 2008, we have no variable rate debt outstanding. We earn interest income, for which the interest rates vary, on our cash and cash equivalents and net margin deposits. During the six months ended June 30, 2009 and twelve months ended December 31, 2008, we had no variable rate interest expense and our interest income was \$2 million and \$20 million, respectively.

If interest rates decreased by one percentage point from their June 30, 2009 and December 31, 2008 levels, the fair values of our fixed rate debt from continuing operations would have increased by \$134 million and \$110 million, respectively.

Table of Contents**Trading Market Risks**

As of June 30, 2009, the fair values of the contracts related to our legacy trading and non-core asset management positions and recorded as net derivative assets and liabilities are:

Source of Fair Value	Twelve Months Ending June 30, 2010					2014 and thereafter	Total fair value
	Twelve Months Ending June 30, 2010	Remainder of 2010	2011	2012	2013		
Prices actively quoted (Level 1)	\$ 24	\$ 8	\$	\$	\$	\$	\$ 32
Prices provided by other external sources (Level 2)	1						1
Prices based on models and other valuation methods (Level 3)	(4)	(1)					(5)
Total	\$ 21	\$ 7	\$	\$	\$	\$	\$ 28

The fair values in the above table are subject to significant changes based on fluctuating market prices and conditions. See the discussion above related to non-trading derivative assets and liabilities for further information on items that impact our portfolio of trading contracts.

Our consolidated realized and unrealized margins relating to trading activities, including both derivative and non-derivative instruments, are (income (loss)):

	Three Months Ended June 30, 2009		Six Months Ended June 30, 2008	
	2009	2008	2009	2008
Realized	\$ 7	\$ 2	\$ 18	\$ 9
Unrealized	(2)	(15)	(2)	(26)
Total	\$ 5	\$ (13)	\$ 16	\$ (17)

An analysis of these net derivative assets and liabilities is:

	Six Months Ended June 30, 2009		Six Months Ended June 30, 2008	
	2009	2008	2009	2008
Fair value of contracts outstanding, beginning of period	\$ 30	\$ 19	\$ 30	\$ 19
Contracts realized or settled	(18) ⁽¹⁾	(15) ⁽²⁾	(18) ⁽¹⁾	(15) ⁽²⁾
Changes in fair values attributable to market price and other market changes	16	(6)	16	(6)
Fair value of contracts outstanding, end of period	\$ 28	\$ (2)	\$ 28	\$ (2)

- (1) Amount includes realized gain of \$18 million.
- (2) Amount includes realized gain of \$10 million and deferred settlements of \$5 million.

Table of Contents

The daily value-at-risk for our legacy trading and non-core asset management positions is:

	2009 ⁽¹⁾	2008
	(in millions)	
As of June 30	\$ 1	\$ 11
Three months ended June 30:		
Average	2	5
High	2	13
Low	1	1
Six months ended June 30:		
Average	2	3
High	4	13
Low	1	

- (1) The major parameters for calculating daily value-at-risk remain the same during 2009 as disclosed in Quantitative and Qualitative Disclosures About Market Risk in Item 7A of our Form 10-K.

Fair Value Measurements

We apply recurring fair value measurements to our derivatives assets and liabilities. See note 3 to our interim financial statements. Derivative instruments classified as Level 2 primarily include over-the-counter (OTC) derivative instruments such as generic swaps and forwards. The fair value measurements of these derivative assets and liabilities are based largely on unadjusted indicative quoted prices from independent brokers in active markets. An active market is considered to have transactions with sufficient frequency and volume to provide pricing information on an ongoing basis. Derivative instruments for which fair value is calculated using quoted prices that are deemed not active or that have been extrapolated from quoted prices in active markets are classified as Level 3. For certain natural gas and power contracts, we adjust seasonal or calendar year quoted prices based on historical observations to represent fair value for each month in the season or calendar year, such that the average of all months is equal to the quoted price. A derivative instrument that has a tenor that does not span the quoted period is considered an unobservable Level 3 measurement.

We evaluate and validate the inputs we use to estimate fair value by a number of methods, including validating against market published prices and daily broker quotes obtainable from multiple pricing services. For OTC derivative instruments classified as Level 2, indicative quotes obtained from brokers in liquid markets generally represent fair value of these instruments. Adjustments to the quotes are adjustments to the bid or ask price depending on the nature of the position to appropriately reflect exit pricing and are considered a Level 3 input to the fair value measurement. In less liquid markets such as coal, in which a single broker's view of the market is used to estimate fair value, we consider such inputs to be unobservable Level 3 inputs.

Fair value for energy derivatives is further derived from credit adjustments. Derivative assets are discounted using a yield curve representative of the counterparty's probability of default. The counterparty's default probability is based on a modified version of published default rates, taking 20-year historical default rates from Standard & Poor's and Moody's and adjusting them to reflect a rolling five-year average. For derivative liabilities, fair value measurement reflects the nonperformance risk related to that liability, which is our own credit risk. We derive our nonperformance risk by applying our credit default swap spread against the respective derivative liability.

To determine the fair value for Level 3 energy derivatives where there are no market quotes or external valuation services, we rely on various modeling techniques. We use a variety of valuation models, which vary in complexity depending on the contractual terms of, and inherent risks in, the instrument being valued. We use both industry-standard models as well as internally developed proprietary valuation models that consider various assumptions such as market prices for power and fuel, price shapes, volatilities and correlations as well as other relevant factors as may be deemed appropriate. There is inherent risk in valuation modeling given the complexity and volatility of energy markets. Therefore, it is possible that results in future periods may be materially different as contracts are ultimately settled.

Table of Contents**ITEM 4. CONTROLS AND PROCEDURES****Evaluation of Disclosure Controls and Procedures**

Our management, with the participation of our chief executive officer and chief financial officer, have evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (1934 Act)) as of June 30, 2009, the end of the period covered by this Form 10-Q. Based on this evaluation, our chief executive officer and chief financial officer concluded that, as of June 30, 2009, our disclosure controls and procedures were effective.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the 1934 Act) during the period ended June 30, 2009, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II.**OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

See note 11 to our interim financial statements in this Form 10-Q.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

We held our annual meeting of stockholders on June 18, 2009. Our stockholders voted on the following proposals:

1. To elect the five directors nominated by our Nominating & Governance Committee to our Board of Directors to serve until the next annual meeting of stockholders; and
2. To ratify the Audit Committee's selection of KPMG LLP as our independent auditors for fiscal year 2009.

The voting results were:

E. William Barnett was re-elected to serve as a director:

For	Against	Abstain
267,014,517	26,030,276	879,019

Mark M. Jacobs was re-elected to serve as a director:

For	Against	Abstain
266,634,744	26,269,718	1,019,349

Steven L. Miller was re-elected to serve as a director:

For	Against	Abstain
262,503,102	30,520,129	900,580

Laree E. Perez was re-elected to serve as a director:

For	Against	Abstain
267,217,045	25,730,457	976,310

Evan J. Silverstein was re-elected to serve as a director:

For	Against	Abstain
273,366,731	19,616,453	940,627

Table of Contents

The Audit Committee's selection of KPMG LLP as our independent auditors for the fiscal year ended December 31, 2009 was ratified:

For	Against	Abstain
288,939,553	4,073,259	911,000

We did not receive any broker non-votes on the proposals.

ITEM 6. EXHIBITS

Exhibits.

See Index of Exhibits.
