The information in this Prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This Prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED AUGUST 22, 2002

PROSPECTUS

1,000,000 Shares

[LOGO] Nuveen Logo

Nuveen Georgia
Dividend Advantage Municipal Fund 2

Common Shares
\$15.00 per share

Investment Objectives. The Fund is a newly organized, non-diversified, closed-end management investment company. The Fund's investment objectives are:

- . to provide current income exempt from regular federal and Georgia income tax; and
- . to enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that the Fund's investment adviser believes are underrated or undervalued or that represent municipal market sectors that are undervalued.

Portfolio Contents. Under normal circumstances, the Fund will invest its net assets in a portfolio of municipal bonds that are exempt from regular federal and Georgia income taxes. Under normal circumstances, the Fund expects to be fully invested in such tax-exempt municipal bonds. Through September 30, 2003, the Fund may invest in municipal bonds that are exempt from regular federal income tax but not from Georgia income tax, provided that no more than 10% of the Fund's investment income during that time may be derived from investments in those bonds. The Fund will invest at least 80% of its net assets in investment grade quality municipal bonds, which may include municipal bonds that are rated investment grade by at least one nationally recognized statistical rating

(continued on following page)

Investing in common shares involves certain risks. See "Risks" beginning on page 18.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

, 2002

organization and lower by another. The Fund may invest up to 20% of its net assets in municipal bonds that are rated Ba/BB or B or that are unrated but judged to be of comparable quality by the Fund's investment adviser. The Fund cannot assure you that it will achieve its investment objectives.

No Prior History. Because the Fund is newly organized, its common shares have no history of public trading. Shares of closed-end investment companies frequently trade at a discount from their net asset value. This risk may be greater for investors expecting to sell their shares in a relatively short period after completion of the public offering. The common shares have been approved for listing on the American Stock Exchange, subject to notice of issuance. The trading or "ticker" symbol of the common shares is "NKG."

You should read this Prospectus, which contains important information about the Fund, before deciding whether to invest and retain it for future reference. A Statement of Additional Information, dated , 2002 and as it may be supplemented, containing additional information about the Fund, has been filed with the Securities and Exchange Commission and is incorporated by reference in its entirety into this Prospectus. You may request a free copy of the Statement of Additional Information, the table of contents of which is on page 40 of this Prospectus, by calling (800) 257-8787 or by writing to the Fund, or you may obtain a copy (and other information regarding the Fund) from the Securities

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

and Exchange Commission web site (<http://www.sec.gov>).

The Fund's common shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

The underwriters named in this Prospectus may purchase up to additional common shares from the Fund under certain circumstances.

Until , 2002 (25 days after the date of this Prospectus), all dealers that buy, sell or trade the common shares, whether or not participating

in this offering, may be required to deliver a Prospectus. This is in addition to the dealers' obligation to deliver a Prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

PROSPECTUS SUMMARY

This is only a summary. You should review the more detailed information contained elsewhere in this Prospectus and in the Statement of Additional Information to understand the offering fully.

The Fund..... Nuveen Georgia Dividend Advantage Municipal Fund 2 (the "Fund") is a newly organized, non-diversified, closed-end management investment company. The Fund is designed to provide tax benefits to investors who are residents of Georgia. See "The Fund."

The Offering..... The Fund is offering common shares of beneficial interest at \$15.00 per share through a group of underwriters (the "Underwriters") led by Salomon Smith Barney Inc., Nuveen Investments ("Nuveen"), A.G. Edwards & Sons, Inc., Prudential Securities Incorporated, UBS Warburg LLC, H&R Block Financial Advisors, Inc., Deutsche Bank Securities Inc., Raymond James & Associates, Inc., SunTrust Capital Markets, Inc. and Wachovia Securities, Inc. The common shares of beneficial interest are called "Common Shares" in the rest of this Prospectus. You must purchase at least 100 Common Shares in this offering. The Fund has given the Underwriters an option to purchase up to additional Common Shares to cover orders in excess of Common Shares. See "Underwriting." Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per Common Share.

Investment Objectives. The Fund's investment objectives are to provide current income exempt from regular federal and Georgia income tax and enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that the Fund's investment adviser believes are underrated or undervalued or that represent municipal market sectors that are undervalued. Under normal circumstances, the Fund will invest its net assets in a portfolio of municipal bonds that are exempt from regular federal and Georgia income taxes. Under normal circumstances, the Fund expects to be fully invested in such tax-exempt municipal bonds. Through September 30, 2003, the Fund may invest in municipal bonds that are exempt from regular federal income tax but not from Georgia income tax ("Out of State Bonds"), provided that no more than 10% of the Fund's investment income during that time may be

derived from Out of State Bonds. The Fund will invest at least 80% of its net assets in municipal bonds that at the time of investment are investment grade quality. Investment grade quality bonds are bonds rated by at least one nationally recognized statistical rating organization ("NRSRO") within the four highest grades (Baa or BBB or better by Moody's Investors Service, Inc. ("Moody's"), Standard & Poor's Corporation, a division of The McGraw-Hill Companies ("S&P") or Fitch Ratings ("Fitch")), or bonds that are unrated but judged to be of comparable

4

quality by the Fund's investment adviser. Investment grade bonds may include bonds that, at the time of investment, are rated below investment grade by Moody's, S & P or Fitch, so long as at least one NRSRO rates such bonds within the four highest grades (such bonds are called "split-rated bonds"). The Fund may invest up to 20% of its net assets in municipal bonds that, at the time of investment, are rated Ba/BB or B by Moody's, S&P or Fitch or that are unrated but judged to be of comparable quality by the Fund's investment adviser. Bonds of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and are commonly referred to as junk bonds. The Fund cannot assure you that it will attain its investment objectives. See "The Fund's Investments."

Special Considerations If the Fund invests in Out of State Bonds, a portion of your dividends will be subject to Georgia income taxes. The Fund expects that a substantial portion of its investments will pay interest that is taxable under the federal alternative minimum tax. If you are, or as a result of investment in the Fund would become, subject to the federal alternative minimum tax, the Fund may not be a suitable investment for you. In addition, distributions of ordinary taxable income (including any net short-term capital gain) will be taxable to shareholders as ordinary income, and capital gain dividends will be subject to capital gains taxes. See "Tax Matters."

Proposed Offering of MuniPreferred(R) Shares Subject to market conditions, approximately one to three months after completion of this offering, the Fund intends to offer preferred shares of beneficial interest ("MuniPreferred Shares") representing approximately 35% of the Fund's capital after their issuance. The issuance of MuniPreferred Shares will leverage your investment in Common Shares. Leverage involves special risks. There is no assurance that the Fund will issue MuniPreferred Shares or that, if issued, the Fund's leveraging strategy will be

successful. See "Risks--Leverage Risk." The money the Fund obtains by selling the MuniPreferred Shares will be invested in long-term municipal bonds, which generally will pay fixed rates of interest over the life of the bond. The MuniPreferred Shares will pay dividends based on shorter-term rates, which will be reset frequently. So long as the rate of return, net of applicable Fund expenses, on the long-term bonds purchased by the Fund exceeds MuniPreferred Share dividend rates as reset periodically, the investment of the proceeds of the MuniPreferred Shares will generate more income than will be needed to pay dividends on the MuniPreferred Shares. If so, the excess will be used to pay higher dividends to holders of Common Shares ("Common Shareholders"). However, the Fund cannot assure you that the issuance of MuniPreferred Shares will result in a higher yield on your Common Shares. Once MuniPreferred Shares are issued, the

5

net asset value and market price of the Common Shares and the yield to Common Shareholders will be more volatile. See "MuniPreferred Shares and Leverage" and "Description of Shares--MuniPreferred Shares."

Investment Adviser.... Nuveen Advisory Corp. ("Nuveen Advisory") will be the Fund's investment adviser. Nuveen Advisory will receive an annual fee, payable monthly, in a maximum amount equal to .65% of the Fund's average daily net assets (including assets attributable to any MuniPreferred Shares that may be outstanding (sometimes referred to herein as "Managed Assets")), with lower fee levels for assets that exceed \$125 million. Nuveen Advisory has contractually agreed to reimburse the Fund for fees and expenses in the amount of .32% of average daily Managed Assets of the Fund for the first five full years of the Fund's operations (through September 30, 2007), and for a declining amount for an additional three years (through September 30, 2010). Nuveen Advisory is a wholly owned subsidiary of The John Nuveen Company. See "Management of the Fund."

Distributions..... Commencing with the Fund's first dividend, the Fund intends to make regular monthly cash distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) based on the projected performance of the Fund. The Fund's ability to maintain a level Common Share dividend rate will depend on a number of factors, including dividends payable on the MuniPreferred Shares. As portfolio and market conditions change, the rate of dividends on the Common Shares and the Fund's dividend policy could

change. Over time, the Fund will distribute all of its net investment income (after it pays accrued dividends on any outstanding MuniPreferred Shares). In addition, at least annually, the Fund intends to distribute net capital gain and taxable ordinary income, if any, to you so long as the net capital gain and taxable ordinary income are not necessary to pay accrued dividends on, or redeem or liquidate, any MuniPreferred Shares. Your initial distribution is expected to be declared approximately 45 days, and paid approximately 60 to 90 days, from the completion of this offering, depending on market conditions. You may elect to automatically reinvest some or all of your distributions in additional Common Shares under the Fund's Dividend Reinvestment Plan. See "Distributions" and "Dividend Reinvestment Plan."

Listing..... The Common Shares have been approved for listing on the American Stock Exchange, subject to notice of issuance. See "Description of Shares--Common Shares." The trading or "ticker" symbol of the Common Shares is "NKG." Because of this exchange listing, the Fund may sometimes be referred to in public communications as a "closed-end exchange-traded fund" or "exchange-traded fund."

Custodian..... State Street Bank and Trust Company will serve as custodian of the Fund's assets. See "Custodian and Transfer Agent."

6

Market Price of Shares Shares of closed-end investment companies frequently trade at prices lower than net asset value. Shares of closed-end investment companies like the Fund that invest predominately in investment grade municipal bonds have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value. The Fund cannot assure you that Common Shares will trade at a price higher than net asset value in the future. Net asset value will be reduced immediately following the offering by the sales load and the amount of organization and offering expenses paid by the Fund. See "Use of Proceeds." In addition to net asset value, market price may be affected by such factors as dividend levels (which are in turn affected by expenses), call protection, dividend stability, portfolio credit quality and liquidity and market supply and demand. See "MuniPreferred Shares and Leverage," "Risks," "Description of Shares," "Repurchase of Fund Shares; Conversion to Open-End Fund" and the Statement of Additional Information under "Repurchase of Fund Shares; Conversion to Open-End Fund." The Common Shares are designed primarily for long-term investors, and you

should not view the Fund as a vehicle for trading purposes.

Special Risk

Considerations..... No Operating History. The Fund is a newly organized, non-diversified, closed-end management investment company with no history of operations.

Interest Rate Risk. Generally, when market interest rates fall, bond prices rise, and vice versa. Interest rate risk is the risk that the municipal bonds in the Fund's portfolio will decline in value because of increases in market interest rates. The prices of longer-term bonds fluctuate more than prices of shorter-term bonds as interest rates change. Conversely, the values of lower-rated and comparable unrated debt securities are less likely than those of investment grade and comparable unrated debt securities to fluctuate inversely with changes in interest rates. Because the Fund will invest primarily in long-term bonds, the Common Share net asset value and market price per share will fluctuate more in response to changes in market interest rates than if the Fund invested primarily in shorter-term bonds. The Fund's use of leverage, as described below, will tend to increase Common Share interest rate risk. See "Risks--Interest Rate Risk."

Credit Risk. Credit risk is the risk that one or more municipal bonds in the Fund's portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the bond experiences a decline in its financial status. The Fund may invest up to 20% (measured at the time of investment) of its net assets in municipal bonds that are rated Ba/BB or B or that are unrated but judged to be

7

of comparable quality by Nuveen Advisory. The prices of these lower grade bonds are more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher grade securities. Municipal bonds of below investment grade quality are predominately speculative with respect to the issuer's capacity to pay interest and repay principal when due, and therefore involve a greater risk of default. See "Risks--Credit Risk."

Concentration in Georgia Issuers. The Fund's policy of investing primarily in municipal obligations of issuers located in Georgia makes the Fund more susceptible to adverse economic, political or regulatory occurrences affecting such issuers. See "Risks--Concentration Risk."

Leverage Risk. The use of leverage through the issuance of MuniPreferred Shares creates an opportunity for increased Common Share net income and returns, but also creates special risks for Common Shareholders. There is no assurance that the Fund's leveraging strategy will be successful. It is anticipated that MuniPreferred dividends will be based on shorter-term municipal bond rates of return (which would be redetermined periodically, pursuant to an auction process), and that the Fund will invest the proceeds of the MuniPreferred Shares offering in long-term, typically fixed rate, municipal bonds. So long as the Fund's municipal bond portfolio provides a higher rate of return (net of Fund expenses) than the MuniPreferred dividend rate, as reset periodically, the leverage will cause Common Shareholders to receive a higher current rate of return than if the Fund were not leveraged. If, however, long and/or short-term rates rise, the MuniPreferred dividend rate could exceed the rate of return on long-term bonds held by the Fund that were acquired during periods of generally lower interest rates, reducing return to Common Shareholders. In addition, the Fund will pay (and Common Shareholders will bear) any costs and expenses relating to the issuance and ongoing maintenance of MuniPreferred Shares (for example, distribution related expenses such as a participation fee paid at what the Fund expects will be an annual rate of 0.25% of MuniPreferred Share liquidation preference to broker-dealers participating in MuniPreferred Share auctions).

Leverage creates two major types of risks for Common Shareholders:

- . the likelihood of greater volatility of net asset value and market price of Common Shares, because changes in the value of the Fund's bond portfolio (including bonds bought with the proceeds of the MuniPreferred Shares offering) are borne entirely by the Common Shareholders; and

8

- . the possibility either that Common Share income will fall if the MuniPreferred dividend rate rises, or that Common Share income will fluctuate because the MuniPreferred dividend rate varies.

See "Risks--Leverage Risk."

Municipal Bond Market Risk. The amount of public information available about the municipal bonds in the Fund's portfolio is generally less than that for corporate equities or bonds, and the investment performance of the Fund may therefore be more

dependent on the analytical abilities of Nuveen Advisory than if the Fund were a stock fund or taxable bond fund. The secondary market for municipal bonds, particularly the below investment grade bonds in which the Fund may invest, also tends to be less well-developed or liquid than many other securities markets, which may adversely affect the Fund's ability to sell its bonds at attractive prices. See "Risks--Municipal Bond Market Risk."

Non-Diversification. Because the Fund is classified as "non-diversified" under the Investment Company Act of 1940, as amended (the "1940 Act"), it can invest a greater portion of its assets in obligations of a single issuer than a "diversified" fund. As a result, the Fund will be more susceptible than a diversified fund to any single corporate, economic, political or regulatory occurrence. See "The Fund's Investments" and "Risks--Non-Diversification."

Anti-Takeover Provisions. The Fund's Declaration of Trust (the "Declaration") includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. The provisions of the Declaration described above could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares. See "Certain Provisions in the Declaration of Trust" and "Risks--Anti-Takeover Provisions."

9

SUMMARY OF FUND EXPENSES

The Annual Expenses table below assumes the issuance of MuniPreferred Shares in an amount equal to 35% of the Fund's capital (after their issuance), and shows Fund expenses as a percentage of net assets attributable to Common Shares.

Shareholder Transaction Expenses

Sales Load Paid by You (as a percentage of offering price).....	4.50%
Offering Expenses Borne by the Fund (as a percentage of offering price)/(1)(2)/	.20%
Dividend Reinvestment Plan Fees.....	None(3)

	Percentage of Net Assets Attributable to Common Shares(4) -----
Annual Expenses	
Management Fees.....	1.00%
Other Expenses.....	.38%

Total Annual Expenses.....	1.38%
Fee and Expense Reimbursement (Years 1-5)	(.49%) / (5) /

Total Net Annual Expenses (Years 1-5)....	.89% / (5) /
	=====

(1) Nuveen has agreed to pay offering costs (other than sales load) that exceed \$0.03 per Common Share.

(2) If the Fund offers MuniPreferred Shares, costs of that offering, estimated to be slightly more than 20% of the total amount of the MuniPreferred Share offering, will effectively be borne by the Common Shareholders and result in the reduction of the paid-in-capital attributable to the Common Shares.

(3) You will be charged a \$2.50 service charge and pay brokerage charges if you direct the Plan Agent to sell your Common Shares held in a dividend reinvestment account.

(4) Stated as percentages of net assets attributable to Common Shares. Assuming no issuance of MuniPreferred Shares, the Fund's expenses would be estimated to be as follows:

	Percentage of Net Assets Attributable to Common Shares -----
Annual Expenses	
Management Fees.....	.65%
Other Expenses.....	.25%

Total Annual Expenses.....	.90%
Fees and Expense Reimbursement (Years 1-5).....	(.32%) / (5) /

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

Total Net Annual Expenses (Years 1-5)..... .58%/ (5) /
=====

(5) Nuveen Advisory has contractually agreed to reimburse the Fund for fees and expenses in the amount of .32% of average daily Managed Assets for the first 5 full years of the Fund's operations, .24% of average daily Managed Assets in year 6, .16% in year 7 and .08% in year 8. Assuming the issuance of MuniPreferred Shares in an amount equal to 35% of the Fund's total assets (including the amount obtained from leverage) and calculated as a percentage of net assets attributable to Common Shares, those amounts would be .49% for the first 5 years, .37% in year 6, .25% in year 7 and .12% in year 8. Without the reimbursement, "Total Net Annual Expenses" would be estimated to be 1.38% of average daily net assets attributable to Common Shares (or, assuming no issuance of MuniPreferred Shares, .90% of average daily net assets).

10

The purpose of the table above is to help you understand all fees and expenses that you, as a Common Shareholder, would bear directly or indirectly. The expenses shown in the table are based on estimated amounts for the Fund's first year of operations and assume that the Fund issues approximately 2,600,000 Common Shares. See "Management of the Fund" and "Dividend Reinvestment Plan."

The following example illustrates the expenses (including the sales load of \$45) that you would pay on a \$1,000 investment in Common Shares, assuming (1) total net annual expenses of .89% of net assets attributable to Common Shares in years 1 through 5, increasing to 1.38% in years 9 and 10 and (2) a 5% annual return: (1)

1 Year	3 Years	5 Years	10 Years (2)
-----	-----	-----	-----
\$54	\$72	\$92	\$172

The example should not be considered a representation of future expenses. Actual expenses may be higher or lower.

(1) The example assumes that the estimated Other Expenses set forth in the Annual Expenses table are accurate, that fees and expenses increase as described in note 2 below and that all dividends and distributions are reinvested at Common Share net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

(2) Assumes reimbursement of fees and expenses of .24% of average daily Managed Assets in year 6, .16% in year 7 and .08% in year 8. Nuveen Advisory has not agreed to reimburse the Fund for any portion of its fees and expenses beyond

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

September 30, 2010. See Footnote 5 above and "Management of the Fund--Investment Management Agreement."

11

THE FUND

The Fund is a newly organized, non-diversified, closed-end management investment company registered under the 1940 Act. The Fund was organized as a Massachusetts business trust on October 26, 2001, pursuant to a Declaration governed by the laws of the Commonwealth of Massachusetts. As a newly organized entity, the Fund has no operating history. The Fund's principal office is located at 333 West Wacker Drive, Chicago, Illinois 60606, and its telephone number is (800) 257-8787. The Fund is designed to provide tax benefits to investors who are residents of Georgia.

USE OF PROCEEDS

The net proceeds of the offering of Common Shares will be approximately \$ (if the Underwriters exercise the over-allotment option in full) after payment of the estimated organization and offering costs. Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per Common Share. The Fund will invest the net proceeds of the offering in accordance with the Fund's investment objectives and policies as stated below. It is presently anticipated that the Fund will be able to invest substantially all of the net proceeds in municipal bonds that meet those investment objectives and policies within three months after the completion of the offering. Pending such investment, it is anticipated that the proceeds will be invested in short-term, tax-exempt securities.

THE FUND'S INVESTMENTS

Investment Objectives and Policies

The Fund's investment objectives are:

- . to provide current income exempt from regular federal and Georgia income tax; and
- . to enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that Nuveen Advisory believes are underrated or undervalued or that represent municipal market sectors that are undervalued.

Underrated municipal bonds are those whose ratings do not, in Nuveen Advisory's opinion, reflect their true creditworthiness. Undervalued municipal bonds are bonds that, in Nuveen Advisory's opinion, are worth more than the value assigned to them in the marketplace. Nuveen Advisory may at times believe that bonds associated with a particular municipal market sector (for example, electric utilities), or issued by a particular municipal issuer, are undervalued. Nuveen Advisory may purchase such a bond for the Fund's portfolio because it represents a market sector or issuer that Nuveen Advisory considers undervalued, even if the value of the particular bond appears to be consistent with the value of similar bonds. Municipal bonds of particular types (e.g., hospital bonds, industrial revenue bonds or bonds issued by a particular municipal issuer) may be undervalued because there is a temporary excess of supply in that market sector, or because of a general decline in the market price of municipal bonds of the market sector for reasons that do not apply to

the particular municipal bonds that are considered undervalued. The Fund's investment in underrated or undervalued municipal bonds will be based on Nuveen Advisory's belief that their yield is higher than that available on bonds bearing equivalent levels of interest rate risk, credit risk and other forms of risk, and that their prices will ultimately rise (relative to the market) to reflect their true value. The Fund attempts to increase its portfolio value relative to the municipal bond market by prudent selection of municipal bonds regardless of the direction the market may move. Any capital appreciation realized by the Fund will generally result in the distribution of taxable capital gains to Common Shareholders.

12

Under normal circumstances, the Fund will invest its net assets in a portfolio of municipal bonds that are exempt from regular federal and Georgia income taxes. Under normal circumstances, the Fund expects to be fully invested (at least 95% of its assets) in such tax-exempt municipal bonds. After the completion of the offering through September 30, 2003, the Fund may invest in Out of State Bonds, provided that no more than 10% of the Fund's investment income during that time may be derived from Out of State Bonds. The Fund will purchase Out of State Bonds if other suitable investments are not available. Investment in Out of State Bonds would result in a portion of your dividends being subject to Georgia income taxes. For more information, see the Statement of Additional Information. The Fund will invest at least 80% of its net assets in investment grade quality municipal bonds. Investment grade quality means that such bonds are rated, at the time of investment, within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or are unrated but judged to be of comparable quality by Nuveen Advisory. Investment grade quality bonds may include split-rated bonds. The Fund may invest up to 20% of its net assets in municipal bonds that are rated, at the time of investment, Ba/BB or B by Moody's, S&P or Fitch or that are unrated but judged to be of comparable quality by Nuveen Advisory. Bonds of below investment grade quality (Ba/BB or below) are commonly referred to as junk bonds. Bonds of below investment grade quality are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal. The foregoing credit quality policies apply only at the time a security is purchased, and the Fund is not required to dispose of a security in the event that a rating agency downgrades its assessment of the credit characteristics of a particular issue. In determining whether to retain or sell such a security, Nuveen Advisory may consider such factors as Nuveen Advisory's assessment of the credit quality of the issuer of such security, the price at which such security could be sold and the rating, if any, assigned to such security by other rating agencies. A general description of Moody's, S&P's and Fitch's ratings of municipal bonds is set forth in Appendix A to the Statement of Additional Information. See "--Municipal Bonds" below for a general description of the economic and credit characteristics of municipal issuers in Georgia. The Fund may also invest in securities of other open- or closed-end investment companies that invest primarily in municipal bonds of the types in which the Fund may invest directly. See "--Other Investment Companies" and "--Initial Portfolio Composition."

The Fund may purchase municipal bonds that are additionally secured by insurance, bank credit agreements, or escrow accounts. The credit quality of companies which provide such credit enhancements will affect the value of those securities. Although the insurance feature reduces certain financial risks, the premiums for insurance and the higher market price paid for insured obligations may reduce the Fund's income. Insurance generally will be obtained from insurers with a claims-paying ability rated Aaa by Moody's or AAA by S&P or

Fitch. The insurance feature does not guarantee the market value of the insured obligations or the net asset value of the Common Shares.

Upon Nuveen Advisory's recommendation, during temporary defensive periods and in order to keep the Fund's cash fully invested, including the period during which the net proceeds of the offering of Common Shares or MuniPreferred Shares are being invested, the Fund may deviate from its investment objectives and invest up to 100% of its net assets in short-term investments including high quality, short-term securities that may be either tax-exempt or taxable. The Fund intends to invest in taxable short-term investments only in the event that suitable tax-exempt short-term investments are not available at reasonable prices and yields. Investment in taxable short-term investments would result in a portion of your dividends being subject to regular federal and Georgia income taxes. For more information, see the Statement of Additional Information.

13

The Fund cannot change its investment objectives without the approval of the holders of a "majority of the outstanding" Common Shares and, if issued, MuniPreferred Shares voting together as a single class, and of the holders of a "majority of the outstanding" MuniPreferred Shares voting as a separate class. When used with respect to particular shares of the Fund, a "majority of the outstanding" shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less. See "Description of Shares--MuniPreferred Shares--Voting Rights" and the Statement of Additional Information under "Description of Shares--MuniPreferred Shares--Voting Rights" for additional information with respect to the voting rights of holders of MuniPreferred Shares.

If you are, or as a result of investment in the Fund would become, subject to the federal alternative minimum tax, the Fund may not be a suitable investment for you because the Fund expects that a substantial portion of its investments will pay interest that is taxable under the federal alternative minimum tax. Special rules apply to corporate holders. In addition, capital gain dividends will be subject to capital gains taxes. See "Tax Matters."

Municipal Bonds

Municipal bonds are either general obligation or revenue bonds and typically are issued to finance public projects (such as roads or public buildings), to pay general operating expenses, or to refinance outstanding debt. Municipal bonds may also be issued for private activities, such as housing, medical and educational facility construction, or for privately owned industrial development and pollution control projects. General obligation bonds are backed by the full faith and credit, or taxing authority, of the issuer and may be repaid from any revenue source; revenue bonds may be repaid only from the revenues of a specific facility or source. The Fund also may purchase municipal bonds that represent lease obligations. These carry special risks because the issuer of the bonds may not be obligated to appropriate money annually to make payments under the lease. In order to reduce this risk, the Fund will only purchase municipal bonds representing lease obligations where Nuveen Advisory believes the issuer has a strong incentive to continue making appropriations until maturity.

The municipal bonds in which the Fund will invest are generally issued by the State of Georgia, a municipality in Georgia, or a political subdivision or agency or instrumentality of such State or municipality ("Georgia municipal bonds"), and pay interest that, in the opinion of bond counsel to the issuer (or on the basis of other authority believed by Nuveen Advisory to be reliable), is exempt from regular federal and Georgia income taxes, although the interest may be subject to the federal alternative minimum tax. The Fund may invest in municipal bonds issued by United States territories (such as Puerto Rico or Guam) that are exempt from regular federal and Georgia income taxes. Through September 30, 2003, the Fund also may invest in Out of State Bonds subject to the limitations described under "--Investment Objectives and Policies."

The yields on municipal bonds depend on a variety of factors, including prevailing interest rates and the condition of the general money market and the municipal bond market, the size of a particular offering, the maturity of the obligation and the rating of the issue. The market value of municipal bonds will vary with changes in interest rate levels and as a result of changing evaluations of the ability of their issuers to meet interest and principal payments.

The Fund will primarily invest in municipal bonds with long-term maturities in order to maintain a weighted average maturity of 15-30 years, but the weighted average maturity of obligations held by the Fund may be shortened, depending on market conditions.

14

When-Issued and Delayed Delivery Transactions

The Fund may buy and sell municipal bonds on a when-issued or delayed delivery basis, making payment or taking delivery at a later date, normally within 15 to 45 days of the trade date. This type of transaction may involve an element of risk because no interest accrues on the bonds prior to settlement and, because bonds are subject to market fluctuations, the value of the bonds at time of delivery may be less (or more) than cost. A separate account of the Fund will be established with its custodian consisting of cash, cash equivalents, or liquid securities having a market value at all times at least equal to the amount of the commitment.

Other Investment Companies

The Fund may invest up to 10% of its net assets in securities of other open- or closed-end investment companies that invest primarily in municipal bonds of the types in which the Fund may invest directly. The Fund generally expects to invest in other investment companies either during periods when it has large amounts of uninvested cash, such as the period shortly after the Fund receives the proceeds of the offering of its Common Shares or MuniPreferred Shares, or during periods when there is a shortage of attractive, high-yielding municipal bonds available in the market. As a stockholder in an investment company, the Fund will bear its ratable share of that investment company's expenses, and would remain subject to payment of the Fund's advisory and administrative fees with respect to assets so invested. Common Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. Nuveen Advisory will take expenses into account when evaluating the investment merits of an investment in the investment company relative to available municipal bond investments. In addition, the securities of other investment companies may also be leveraged and will therefore be

subject to the same leverage risks described herein. As described in the section entitled "Risks," the net asset value and market value of leveraged shares will be more volatile and the yield to Common Shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

Initial Portfolio Composition

If current market conditions persist, the Fund expects that approximately 100% of its initial portfolio will consist of investment grade quality municipal bonds, rated as such at the time of investment, meaning that such bonds are rated by at least one NRSRO within the four highest grades or are unrated but judged to be of comparable quality by Nuveen Advisory (approximately 60% in Aaa/AAA; 10% in Aa/AA; 15% in A; and 15% in Baa/BBB). Investment grade bonds may include split-rated bonds. The Fund will generally select obligations which may not be redeemed at the option of the issuer for approximately seven to nine years from the date of purchase by the Fund. See the Statement of Additional Information under "Other Investment Policies and Techniques--Portfolio Trading and Turnover Rate." The Fund does not intend to invest any amount of its initial portfolio in municipal bonds that are, at the time of investment, either rated below investment grade or that are unrated but judged to be of comparable quality by Nuveen Advisory. See "--Investment Objectives and Policies."

MUNIPREFERRED SHARES AND LEVERAGE

Subject to market conditions, approximately one to three months after the completion of the offering of the Common Shares, the Fund intends to offer MuniPreferred Shares representing approximately 35% of the Fund's capital immediately after the issuance of the MuniPreferred Shares.

15

The MuniPreferred Shares will have complete priority upon distribution of assets over the Common Shares. The issuance of MuniPreferred Shares will leverage the Common Shares. Leverage involves special risks. There is no assurance that the Fund's leveraging strategy will be successful. Although the timing and other terms of the offering of the MuniPreferred Shares will be determined by the Fund's Board of Trustees, the Fund expects to invest the proceeds of the MuniPreferred Shares offering in long-term municipal bonds. The MuniPreferred Shares will pay dividends based on shorter-term rates (which would be redetermined periodically by an auction process). So long as the Fund's portfolio is invested in securities that provide a higher rate of return than the dividend rate of the MuniPreferred Shares (after taking expenses into consideration), the leverage will cause you to receive a higher current rate of return than if the Fund were not leveraged.

Changes in the value of the Fund's bond portfolio (including bonds bought with the proceeds of the MuniPreferred Shares offering) will be borne entirely by the Common Shareholders. If there is a net decrease (or increase) in the value of the Fund's investment portfolio, the leverage will decrease (or increase) the net asset value per Common Share to a greater extent than if the Fund were not leveraged. During periods in which the Fund is using leverage, the fees paid to Nuveen Advisory for advisory services will be higher than if the Fund did not use leverage because the fees paid will be calculated on the basis of the Fund's total net assets, including the proceeds from the issuance of MuniPreferred Shares.

For tax purposes, the Fund is currently required to allocate net capital gain and other taxable income, if any, between the Common Shares and MuniPreferred Shares in proportion to total dividends paid to each class for the year in which the net capital gain or other taxable income is realized. If net capital gain or other taxable income is allocated to MuniPreferred Shares (instead of solely tax-exempt income), the Fund will likely have to pay higher total dividends to MuniPreferred Shareholders or make special payments to MuniPreferred Shareholders to compensate them for the increased tax liability. This would reduce the total amount of dividends paid to the Common Shareholders, but would increase the portion of the dividend that is tax-exempt. On an after-tax basis, Common Shareholders may still be better off than if they had been allocated all of the Fund's net capital gain or other taxable income (resulting in a higher amount of total dividends), but received a lower amount of tax-exempt income. If the increase in dividend payments or the special payments to MuniPreferred Shareholders are not entirely offset by a reduction in the tax liability of, and an increase in the tax-exempt dividends received by, the Common Shareholders, the advantage of the Fund's leveraged structure to Common Shareholders will be reduced.

Under the 1940 Act, the Fund is not permitted to issue preferred shares unless immediately after such issuance, the value of the Fund's asset coverage is at least 200% of the liquidation value of the outstanding preferred shares (i.e., such liquidation value may not exceed 50% of the Fund's asset coverage). In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless, at the time of such declaration, the value of the Fund's asset coverage is at least 200% of such liquidation value. If MuniPreferred Shares are issued, the Fund intends, to the extent possible, to purchase or redeem MuniPreferred Shares from time to time to the extent necessary in order to maintain coverage of any MuniPreferred Shares of at least 200%. If the Fund has MuniPreferred Shares outstanding, two of the Fund's trustees will be elected by the holders of MuniPreferred Shares, voting separately as a class. The remaining trustees of the Fund will be elected by holders of Common

16

Shares and MuniPreferred Shares voting together as a single class. In the event the Fund failed to pay dividends on MuniPreferred Shares for two years, MuniPreferred Shareholders would be entitled to elect a majority of the trustees of the Fund.

The Fund may be subject to certain restrictions imposed by guidelines of one or more rating agencies which may issue ratings for MuniPreferred Shares issued by the Fund. These guidelines may impose asset coverage or portfolio composition requirements that are more stringent than those imposed on the Fund by the 1940 Act. It is not anticipated that these covenants or guidelines will impede Nuveen Advisory from managing the Fund's portfolio in accordance with the Fund's investment objectives and policies.

The Fund may also borrow money for repurchase of its shares or as a temporary measure for extraordinary or emergency purposes, including the payment of dividends and the settlement of securities transactions which otherwise might require untimely dispositions of Fund securities.

Assuming that the MuniPreferred Shares will represent in the aggregate

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

approximately 35% of the Fund's capital and pay dividends at an annual average rate of 2.00%, the incremental income generated by the Fund's portfolio (net of estimated expenses) must exceed .70% in order to cover such dividend payments and other expenses specifically related to the MuniPreferred Shares. Of course, these numbers are merely estimates, used for illustration. Actual MuniPreferred Share dividend rates, interest or payment rates may vary frequently and may be significantly higher or lower than the rate assumed above.

The following table is furnished in response to requirements of the Securities and Exchange Commission. It is designed to illustrate the effect of leverage on Common Share total return, assuming investment portfolio total returns (comprised of income and changes in the value of bonds held in the Fund's portfolio) of -10%, -5%, 0%, 5% and 10%. These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns expected to be experienced by the Fund. The table further reflects the issuance of MuniPreferred Shares representing 35% of the Fund's total capital, and the Fund's currently projected annual MuniPreferred Share dividend rate of 2.00%. See "Risks" and "MuniPreferred Shares and Leverage."

Assumed Portfolio Total Return	(10.00)%	(5.00)%	0.00 %	5.00%	10.00%
Common Share Total Return.....	(16.46)%	(8.77)%	(1.08)%	6.62%	14.31%

Common Share total return is composed of two elements--the Common Share dividends paid by the Fund (the amount of which is largely determined by the net investment income of the Fund after paying dividends on MuniPreferred Shares) and gains or losses on the value of the securities the Fund owns. As required by Securities and Exchange Commission rules, the table assumes that the Fund is more likely to suffer capital losses than to enjoy capital appreciation. For example, to assume a total return of 0%, the Fund must assume that the tax-exempt interest it receives on its municipal bond investments is entirely offset by losses in the value of those bonds.

Unless and until MuniPreferred Shares are issued, the Common Shares will not be leveraged and this section will not apply.

17

RISKS

The net asset value of the Common Shares will fluctuate with and be affected by, among other things, interest rate risk, credit risk, reinvestment risk and leverage risk, and an investment in Common Shares will be subject to market discount risk, concentration risk, inflation risk and municipal bond market risk, each of which is more fully described below.

Newly Organized. The Fund is a newly organized, non-diversified, closed-end management investment company and has no operating history.

Market Discount Risk. Shares of closed-end management investment companies frequently trade at a discount from their net asset value.

Interest Rate Risk. Interest rate risk is the risk that bonds (and the Fund's net assets) will decline in value because of changes in interest rates. Generally, municipal bonds will decrease in value when interest rates rise and increase in value when interest rates decline. This means that the net asset value of the Common Shares will fluctuate with interest rate changes and the corresponding changes in the value of the Fund's municipal bond holdings. The value of the longer-term bonds in which the Fund generally invests fluctuates more in response to changes in interest rates than does the value of shorter-term bonds. Conversely, the values of lower-rated and comparable unrated debt securities are less likely than those of investment grade and comparable unrated debt securities to fluctuate inversely with changes in interest rates. Because the Fund will invest primarily in long-term bonds, the Common Share net asset value and market price per share will fluctuate more in response to changes in market interest rates than if the Fund invested primarily in shorter-term bonds. The Fund's use of leverage, as described below, will tend to increase Common Share interest rate risk.

Credit Risk. Credit risk is the risk that one or more municipal bonds in the Fund's portfolio will decline in price, or fail to pay interest or principal when due, because the issuer of the bond experiences a decline in its financial status. In general, lower-rated municipal bonds carry a greater degree of risk that the issuer will lose its ability to make interest and principal payments, which could have a negative impact on the Fund's net asset value or dividends. The Fund may invest in split-rated bonds. Split-rated bonds are those bonds that, at the time of investment, are rated below investment grade by Moody's, S&P or Fitch, so long as at least one NRSRO rates such bonds within the four highest grades (i.e., investment grade quality). This means that split-rated bonds may be regarded by one NRSRO (but by definition not by all NRSROs or by Nuveen Advisory) as having characteristics of bonds rated Ba/BB or B by Moody's, S&P or Fitch, as discussed below. The Fund may invest up to 20% of its net assets in municipal bonds that are rated Ba/BB or B by Moody's, S&P or Fitch or that are unrated but judged to be of comparable quality by the Fund's investment adviser. Bonds rated Ba/BB or B are regarded as having predominately speculative characteristics with respect to capacity to pay interest and repay principal, and these bonds are commonly referred to as junk bonds. The prices of these lower grade bonds are more sensitive to negative developments, such as a decline in the issuer's revenues or a general economic downturn, than are the prices of higher grade securities.

Concentration Risk. As described above, except to the extent the Fund invests in temporary investments, the Fund will invest substantially all of its net assets in Georgia municipal bonds. The Fund is therefore susceptible to political, economic or regulatory factors affecting issuers of Georgia municipal bonds. The information set forth below and the related information in the Statement of

Additional Information is derived from sources that are generally available to investors. The information is intended to give a recent historical description and is not intended to indicate future or continuing trends in the financial or other positions of Georgia. It should be noted that the creditworthiness of obligations issued by local Georgia issuers may be unrelated to the creditworthiness of obligations issued by the State of Georgia, and that there is no obligation on the part of the State to make payment on such local obligations in the event of default.

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

The Georgia economy slid into recession in the third quarter of 2001 and likely continued through the second quarter of 2002, but a gradual recovery is expected in the second half of 2002. Underlying the recession are the excesses in business investment, staffing levels, and bubbles in the equities markets along with the collapse of consumers' and businesses' confidence. The 2002 forecast anticipates that Georgia's real gross state product ("GSP"), will decrease 0.9% in 2002 after growing 1.6% in 2001. The 2002 anticipated percentage gain is down dramatically from the peak growth of 6.4% in 1998, 5.7% in 1999, and 4.7% in 2000. This decrease in the growth of the GSP is attributed to slowdowns in the national economy as a whole, and also to the effects of the State's recent growth, such as traffic congestion and deteriorating air quality.

In 2002, the State's nonagricultural employment is estimated to decrease by almost 33,000 jobs, or a drop of 0.9%. The percentage loss is only slightly smaller than the 1.2 percent decrease predicted for the nation. Job losses and growth in the number of people in the labor force will create an uncomfortable degree of slack in the State's formerly taut labor market.

The service sector is projected to see the fastest growth at 1.3% by adding 14,500 jobs. Retailers will be thwarted by the 0.1% decline in wholesale and retail employment brought about by a drop in sales of new cars, big-ticket consumer durables, and discretionary goods. Employment in government will expand by 0.1%, or 900 jobs, all of which will be in local and federal government but state government employment is expected to decline due to intense budgetary pressures. Manufacturers will see a sector employment drop of 2.8% or a loss of 15,900 jobs. Employment in finance, insurance and real estate is also expected to decline as is employment in the transportation, communications, and public utilities sector which is expected to lose 8,500 jobs. Due to regulation, technical advances and restructuring, relatively few jobs will be created in the public utilities sector.

Until 2001, Georgia's average annual unemployment rate had decreased every year since 1992. Beginning in early 2001, the seasonally adjusted unemployment rate has slowly risen from approximately 3.6% to over 4.5%. As of June 2002, the seasonally adjusted unemployment rate for Georgia was 4.7%.

Based on preliminary estimates for 2001, Georgia's personal income grew 2.3% to \$238,420,000 in 2001, bringing the per capita income for the state to \$28,438. Nationwide, personal income grew 2.7% to \$8,621,023,000, with per capita income at \$30,271 for the same year. According to the U.S. Department of Commerce Bureau of Economic Analysis, the 2.7% increase was the smallest growth rate since the 1990-91 recession.

The State's annual rate of population growth, after dipping slightly over the past couple of years--from 2.1% in 1996, to 2% in 1997, to 1.9% in 1998 to 1.8% in 2000--rose 2.4% in 2001. According to the U.S. Census Bureau's latest statistics, Georgia's population has reached approximately 8.38 million. The population is expected to grow to 9.2 million by 2010.

For Fiscal Year 2001, Georgia had revenues totaling \$23,350,071,847 with a majority of revenue derived from various taxes, and expenditures totaling \$22,572,870,542.

The Georgia Constitution permits the issuance by the State of general obligation debt and of certain guaranteed revenue debt. The State may incur guaranteed revenue debt by guaranteeing the payment of certain revenue obligations issued by an instrumentality of the State. The Georgia Constitution prohibits the incurring of any general obligation debt or guaranteed revenue debt if the highest aggregate annual debt service requirement for the then current year or any subsequent fiscal year for outstanding debt and guaranteed revenue debt, including the proposed debt, exceeds 10% of the total revenue receipts, less refunds, of the State treasury in the fiscal year immediately preceding the year in which any such debt is to be incurred.

The Georgia Constitution also permits the State to incur public debt to supply a temporary deficit in the State treasury in any fiscal year created by a delay in collecting the taxes of that year. Such debt must not exceed, in the aggregate, 5% of the total revenue receipts, less refunds, of the State treasury in the fiscal year immediately preceding the year in which such debt is incurred. The debt incurred must be repaid on or before the last day of the fiscal year in which it is to be incurred out of the taxes levied for that fiscal year. No such debt may be incurred in any fiscal year if there is then outstanding unpaid debt from any previous fiscal year which was incurred to supply a temporary deficit in the State treasury.

As of June 30, 2001, outstanding general obligation debt issues of the State of Georgia totaled \$5,311,335,000. Outstanding revenue bonds of certain blended and discretely presented component units totaled \$1,160,254,518, of which \$149,555,255 are guaranteed by the State. During fiscal year 2001, general obligation bonds in the amount of \$395,515,000 were retired. General obligation debt issued during fiscal year 2001 totaled \$567,280,000.

Virtually all of the issues of long-term debt obligation issued by or on behalf of the State of Georgia and counties, municipalities, and other political subdivisions and public authorities thereof are required by law to be validated and confirmed in a judicial proceeding prior to issuance. The legal effect of an approved validation in Georgia is to render incontestable the validity of the pertinent bond issue and the security therefor.

Georgia is involved in certain legal proceedings that, if decided against the State, may require the State to make significant future expenditures or may substantially impair revenues. An adverse final decision could materially affect the State's governmental operations and, consequently, its ability to pay debt service on its obligations.

As of August 1, 2002, State of Georgia general obligation bonds were rated as follows: Standard & Poor's AAA (upgraded from AA+ on July 29, 1997); Moody's Aaa; and Fitch, AAA. There can be no assurance that such ratings will be maintained in the future. It should be noted that the creditworthiness of obligations issued by local Georgia issuers may be unrelated to the creditworthiness of obligations issued by the state of Georgia, and that there is no obligation on the part of the State to make payment on such local obligations in the event of default.

The foregoing information constitutes only a brief summary of some of the general factors which may impact certain issuers of municipal bonds and does not purport to be a complete or exhaustive description of all adverse conditions to which the issuers of municipal bonds held by the Fund are subject. Additionally, many factors including national economic, social and environmental policies and conditions, which are not within the control of the

issuers of the municipal bonds, could affect or could

20

have an adverse impact on the financial condition of the issuers. The Fund is unable to predict whether or to what extent such factors or other factors may affect the issuers of the municipal bonds, the market value or marketability of the municipal bonds or the ability of the respective issuers of the municipal bonds acquired by the Fund to pay interest on or principal of the municipal bonds. This information has not been independently verified. See the Statement of Additional Information for a further discussion of factors affecting municipal bonds in Georgia.

Municipal Bond Market Risk. Investing in the municipal bond market involves certain risks. The amount of public information available about the municipal bonds in the Fund's portfolio is generally less than that for corporate equities or bonds, and the investment performance of the Fund may therefore be more dependent on the analytical abilities of Nuveen Advisory than if the Fund were a stock fund or taxable bond fund. The secondary market for municipal bonds, particularly the below investment grade bonds in which the Fund may invest, also tends to be less well-developed or liquid than many other securities markets, which may adversely affect the Fund's ability to sell its bonds at attractive prices or at prices approximating those at which the Fund currently values them.

The ability of municipal issuers to make timely payments of interest and principal may be diminished during general economic downturns and as governmental cost burdens are reallocated among federal, state and local governments. In addition, laws enacted in the future by Congress or state legislatures or referenda could extend the time for payment of principal and/or interest, or impose other constraints on enforcement of such obligations, or on the ability of municipalities to levy taxes. Issuers of municipal securities might seek protection under the bankruptcy laws. In the event of bankruptcy of such an issuer, the Fund could experience delays in collecting principal and interest and the Fund may not, in all circumstances, be able to collect all principal and interest to which it is entitled. To enforce its rights in the event of a default in the payment of interest or repayment of principal, or both, the Fund may take possession of and manage the assets securing the issuer's obligations on such securities, which may increase the Fund's operating expenses. Any income derived from the Fund's ownership or operation of such assets may not be tax-exempt.

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's bond portfolio will decline if and when the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the Common Shares' market price or their overall returns.

Leverage Risk. Leverage risk is the risk associated with the issuance of the MuniPreferred Shares to leverage the Common Shares. There can be no assurance that the Fund's leveraging strategy will be successful. Once the MuniPreferred Shares are issued, the net asset value and market value of Common Shares will be more volatile, and the yield to Common Shareholders will tend to fluctuate with changes in the shorter-term dividend rates on the MuniPreferred Shares. Long-term municipal bond rates of return are typically, although not always, higher than shorter-term municipal bond rates of return. If the dividend rate on the MuniPreferred Shares approaches the net rate of return on the Fund's investment portfolio, the benefit of leverage to Common Shareholders would be reduced. If the dividend rate on the MuniPreferred Shares exceeds the net rate of return on the Fund's portfolio, the leverage will result in a lower rate of

return to Common Shareholders than if the Fund were not leveraged. Because the long-term bonds included in the Fund's portfolio will typically pay fixed rates of interest while the dividend rate on the MuniPreferred Shares will be adjusted periodically, this could occur even when both long-term and short-term municipal rates rise. In addition, the Fund will pay (and Common Shareholders will bear) any costs and expenses relating to the issuance and ongoing maintenance of the MuniPreferred

21

Shares (for example, distribution related expenses such as the participation fee paid at what it expects will be an annual rate of 0.25% of MuniPreferred Share liquidation preference to broker-dealers participating in MuniPreferred Share auctions). Accordingly, the Fund cannot assure you that the issuance of MuniPreferred Shares will result in a higher yield or return to Common Shareholders.

Similarly, any decline in the net asset value of the Fund's investments will be borne entirely by Common Shareholders. Therefore, if the market value of the Fund's portfolio declines, the leverage will result in a greater decrease in net asset value to Common Shareholders than if the Fund were not leveraged. Such greater net asset value decrease will also tend to cause a greater decline in the market price for the Common Shares. The Fund might be in danger of failing to maintain the required 200% asset coverage or of losing its expected AAA/Aaa ratings on the MuniPreferred Shares or, in an extreme case, the Fund's current investment income might not be sufficient to meet the dividend requirements on the MuniPreferred Shares. In order to counteract such an event, the Fund might need to liquidate investments in order to fund a redemption of some or all of the MuniPreferred Shares. Liquidation at times of low municipal bond prices may result in capital loss and may reduce returns to Common Shareholders.

While the Fund may from time to time consider reducing leverage in response to actual or anticipated changes in interest rates in an effort to mitigate the increased volatility of current income and net asset value associated with leverage, there can be no assurance that the Fund will actually reduce leverage in the future or that any reduction, if undertaken, will benefit the Common Shareholders. Changes in the future direction of interest rates are very difficult to predict accurately. If the Fund were to reduce leverage based on a prediction about future changes to interest rates, and that prediction turned out to be incorrect, the reduction in leverage would likely operate to reduce the income and/or total returns to Common Shareholders relative to the circumstance where the Fund had not reduced leverage. The Fund may decide that this risk outweighs the likelihood of achieving the desired reduction to volatility in income and share price if the prediction were to turn out to be correct, and determine not to reduce leverage as described above.

The Fund may invest in the securities of other investment companies. Such securities may also be leveraged and will therefore be subject to the leverage risks described above. Such additional leverage may in certain market conditions serve to reduce the net asset value of the Fund's Common Shares and the returns to Common Shareholders.

Inflation Risk. Inflation risk is the risk that the value of assets or income from investment will be worth less in the future as inflation decreases the value of money. As inflation increases, the real value of the Common Shares and distributions can decline. In addition, during any periods of rising inflation, MuniPreferred Share dividend rates would likely increase, which would tend to further reduce returns to Common Shareholders.

Non-Diversification. Because the Fund is classified as "non-diversified" under the 1940 Act it can invest a greater portion of its assets in obligations of a single issuer. As a result, the Fund will be more susceptible than a diversified fund to any single corporate, economic, political or regulatory occurrence. See "The Fund's Investments."

Anti-Takover Provisions. The Fund's Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or convert the Fund to open-end status. These provisions could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares.

22

HOW THE FUND MANAGES RISK

Investment Limitations

The Fund has adopted certain investment limitations designed to limit investment risk and maintain portfolio diversification. These limitations are fundamental and may not be changed without the approval of the holders of a "majority of the outstanding" Common Shares and, if issued, MuniPreferred Shares voting together as a single class, and the approval of the holders of a "majority of the outstanding" MuniPreferred Shares voting as a separate class. When used with respect to particular shares of the Fund, a "majority of the outstanding" shares means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less. Among other restrictions, the Fund may not invest more than 25% of total Fund assets in securities of issuers in any one industry, except that this limitation does not apply to municipal bonds backed by the assets and revenues of governments or political subdivisions of governments.

The Fund may become subject to guidelines which are more limiting than the investment restriction set forth above in order to obtain and maintain ratings from Moody's or S&P on the MuniPreferred Shares that it intends to issue. The Fund does not anticipate that such guidelines would have a material adverse effect on the Fund's Common Shareholders or the Fund's ability to achieve its investment objectives. See "Investment Objectives" in the Statement of Additional Information for information about these guidelines and a complete list of the fundamental and non-fundamental investment policies of the Fund.

Quality Investments

The Fund will invest at least 80% of its net assets in bonds of investment grade quality at the time of investment. Investment grade quality means that such bonds are rated within the four highest grades by at least one of the NRSROs (Baa or BBB or better by Moody's, S&P or Fitch) or are unrated but judged to be of comparable quality by Nuveen Advisory. Investment grade bonds may include split-rated bonds.

Limited Issuance of MuniPreferred Shares

Under the 1940 Act, the Fund could issue MuniPreferred Shares having a total liquidation value (original purchase price of the shares being liquidated plus any accrued and unpaid dividends) of up to one-half of the value of the asset coverage of the Fund. If the total liquidation value of the MuniPreferred Shares was ever more than one-half of the value of the Fund's asset coverage,

the Fund would not be able to declare dividends on the Common Shares until the liquidation value, as a percentage of the Fund's assets, was reduced. The Fund intends to issue MuniPreferred Shares representing about 35% of the Fund's total capital immediately after the time of issuance. This higher than required margin of net asset value provides a cushion against later fluctuations in the value of the Fund's portfolio and will subject Common Shareholders to less income and net asset value volatility than if the Fund were more leveraged. The Fund intends to purchase or redeem MuniPreferred Shares, if necessary, to keep the liquidation value of the MuniPreferred Shares below one-half of the value of the Fund's asset coverage.

Management of Investment Portfolio and Capital Structure to Limit Leverage Risk

The Fund may take certain actions if short-term interest rates increase or market conditions otherwise change (or the Fund anticipates such an increase or change) and the Fund's leverage begins (or is expected) to adversely affect Common Shareholders. In order to attempt to offset such a negative

23

impact of leverage on Common Shareholders, the Fund may shorten the average maturity of its investment portfolio (by investing in short-term, high quality securities) or may extend the maturity of outstanding MuniPreferred Shares. The Fund may also attempt to reduce the leverage by redeeming or otherwise purchasing MuniPreferred Shares. As explained above under "Risks--Leverage Risk," the success of any such attempt to limit leverage risk depends on Nuveen Advisory's ability to accurately predict interest rate or other market changes. Because of the difficulty of making such predictions, the Fund may never attempt to manage its capital structure in the manner described above.

If market conditions suggest that additional leverage would be beneficial, the Fund may sell previously unissued MuniPreferred Shares or MuniPreferred Shares that the Fund previously issued but later repurchased.

Currently, the Fund may not invest in inverse floating rate securities, which are securities that pay interest at rates that vary inversely with changes in prevailing short-term tax-exempt interest rates and which represent a leveraged investment in an underlying municipal bond. This restriction is a non-fundamental policy of the Fund that may be changed by vote of the Fund's Board of Trustees.

Hedging Strategies

The Fund may use various investment strategies designed to limit the risk of bond price fluctuations and to preserve capital. These hedging strategies include using financial futures contracts, options on financial futures or options based on either an index of long-term municipal securities or on taxable debt securities whose prices, in the opinion of Nuveen Advisory, correlate with the prices of the Fund's investments. Successful implementation of most hedging strategies would generate taxable income, and the Fund has no present intention to use these strategies.

MANAGEMENT OF THE FUND

Trustees and Officers

The Board of Trustees is responsible for the management of the Fund, including supervision of the duties performed by Nuveen Advisory. The names and

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

business addresses of the trustees and officers of the Fund and their principal occupations and other affiliations during the past five years are set forth under "Management of the Fund" in the Statement of Additional Information.

Investment Adviser

Nuveen Advisory, 333 West Wacker Drive, Chicago, Illinois 60606, serves as the investment adviser to the Fund. In this capacity, Nuveen Advisory is responsible for the selection and on-going monitoring of the municipal bonds in the Fund's investment portfolio, managing the Fund's business affairs and providing certain clerical, bookkeeping and administrative services. Nuveen Advisory serves as investment adviser to investment portfolios with more than \$43.1 billion in assets under management. See the Statement of Additional Information under "Investment Adviser."

Nuveen Advisory is responsible for execution of specific investment strategies and day-to-day investment operations. Nuveen Advisory manages the Fund using a team of analysts and portfolio

24

managers that focus on a specific group of funds. Thomas J. O'Shaughnessy is the portfolio manager of the Fund and will provide daily oversight for, and execution of, the Fund's investment activities. Mr. O'Shaughnessy has been a portfolio manager for Nuveen Advisory since 1991 and an Assistant Vice President since 1998. He currently manages investments for 14 Nuveen-sponsored investment companies.

Nuveen Advisory is a wholly owned subsidiary of The John Nuveen Company, 333 West Wacker Drive, Chicago, Illinois 60606. Founded in 1898, The John Nuveen Company and its affiliates had over \$74 billion of net assets under management or surveillance as of July 31, 2002. The John Nuveen Company is a majority-owned subsidiary of The St. Paul Companies, Inc., a publicly-traded company which is principally engaged in providing property-liability insurance through subsidiaries.

Investment Management Agreement

Pursuant to an investment management agreement between Nuveen Advisory and the Fund, the Fund has agreed to pay for the services and facilities provided by Nuveen Advisory an annual management fee, payable on a monthly basis, according to the following schedule:

Average Daily Managed Assets	Management Fee
-----	-----
Up to \$125 million.....	.6500%
\$125 million to \$250 million.....	.6375%
\$250 million to \$500 million.....	.6250%
\$500 million to \$1 billion.....	.6125%
\$1 billion to \$2 billion.....	.6000%

\$2 billion and over..... .5750%

If the Fund utilizes leverage through the issuance of MuniPreferred Shares in an amount equal to 35% of the Fund's total assets (including the amount obtained from leverage), the management fee calculated as a percentage of net assets attributable to Common Shares would be as follows:

Net Assets Attributable to Common Shares -----	Management Fee -----
Up to \$125 million.....	1.0000%
\$125 million to \$250 million.....	.9808%
\$250 million to \$500 million.....	.9615%
\$500 million to \$1 billion.....	.9423%
\$1 billion to \$2 billion.....	.9231%
\$2 billion and over.....	.8846%

In addition to the fee of Nuveen Advisory, the Fund pays all other costs and expenses of its operations, including compensation of its trustees (other than those affiliated with Nuveen Advisory), custodian, transfer agency and dividend disbursing expenses, legal fees, expenses of independent auditors, expenses of repurchasing shares, expenses of issuing any MuniPreferred Shares, expenses of preparing, printing and distributing shareholder reports, notices, proxy statements and reports to governmental agencies, and taxes, if any.

25

For the first eight full years of the Fund's operation, Nuveen Advisory has contractually agreed to reimburse the Fund for fees and expenses in the amounts, and for the time periods, set forth below:

Year Ending September 30 -----	Percentage Reimbursed (as a percentage of Managed Assets) -----	Year Ending September 30 -----	Percentage Reimbursed (as a percentage of Managed Assets) -----
2002/(1)/...	.32%	2007....	.32%
2003.....	.32%	2008....	.24%
2004.....	.32%	2009....	.16%
2005.....	.32%	2010....	.08%
2006.....	.32%		

(1) From the commencement of operations.

Nuveen Advisory has not agreed to reimburse the Fund for any portion of its fees and expenses beyond September 30, 2010.

NET ASSET VALUE

The Fund's net asset value per share is determined as of the close of regular session trading (normally 4:00 p.m. eastern time) on each day the New York Stock Exchange is open for business. Net asset value is calculated by taking the fair value of the Fund's total assets, including interest or dividends accrued but not yet collected, less all liabilities, and dividing by the total number of shares outstanding. The result, rounded to the nearest cent, is the net asset value per share.

In determining net asset value, expenses are accrued and applied daily and securities and other assets for which market quotations are available are valued at market value. The prices of municipal bonds are provided by a pricing service and based on the mean between the bid and asked price. When price quotes are not readily available (which is usually the case for municipal bonds), the pricing service establishes a fair market value based on prices of comparable municipal bonds. All valuations are subject to review by the Fund's Board of Trustees or its delegate, Nuveen Advisory.

DISTRIBUTIONS

Commencing with the first dividend, the Fund intends to make regular monthly cash distributions to Common Shareholders at a level rate (stated in terms of a fixed cents per Common Share dividend rate) that reflects the past and projected performance of the Fund. Distributions can only be made from net investment income after paying any accrued dividends to MuniPreferred Shareholders. The Fund's ability to maintain a level dividend rate will depend on a number of factors, including dividends payable on the MuniPreferred Shares. The net income of the Fund consists of all interest income accrued on portfolio assets less all expenses of the Fund. Expenses of the Fund are accrued each day. Over time, all the net investment income of the Fund will be distributed. At least annually, the Fund also intends to distribute net capital gain and ordinary taxable income, if any, after paying any accrued dividends or making any liquidation payments to MuniPreferred Shareholders. Initial distributions to Common Shareholders are expected to be declared approximately 45 days, and paid approximately 60 to 90 days, from the completion of this offering, depending on market conditions. Although it does not now intend

26

to do so, the Board of Trustees may change the Fund's dividend policy and the amount or timing of the distributions, based on a number of factors, including the amount of the Fund's undistributed net investment income and historical and projected investment income and the amount of the expenses and dividend rates on the outstanding MuniPreferred Shares.

To permit the Fund to maintain a more stable monthly distribution, the Fund will initially distribute less than the entire amount of net investment income earned in a particular period. The undistributed net investment income would be

available to supplement future distributions. As a result, the distributions paid by the Fund for any particular monthly period may be more or less than the amount of net investment income actually earned by the Fund during the period. Undistributed net investment income will be added to the Fund's net asset value and, correspondingly, distributions from undistributed net investment income will be deducted from the Fund's net asset value.

DIVIDEND REINVESTMENT PLAN

You may elect to have all dividends, including any capital gain dividends, on your Common Shares automatically reinvested by State Street Bank and Trust Company, as agent for the Common Shareholders (the "Plan Agent"), in additional Common Shares under the Dividend Reinvestment Plan (the "Plan"). You may elect to participate in the Plan by completing the Dividend Reinvestment Plan Application Form. If you do not participate, you will receive all distributions in cash paid by check mailed directly to you by State Street Bank and Trust Company as dividend paying agent.

If you decide to participate in the Plan, the number of Common Shares you will receive will be determined as follows:

(1) If Common Shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then current market price; or

(2) If Common Shares are trading below net asset value at the time of valuation, the Plan Agent will receive the dividend or distribution in cash and will purchase Common Shares in the open market, on the American Stock Exchange or elsewhere, for the participants' accounts. It is possible that the market price for the Common Shares may increase before the Plan Agent has completed its purchases. Therefore, the average purchase price per share paid by the Plan Agent may exceed the market price at the time of valuation, resulting in the purchase of fewer shares than if the dividend or distribution had been paid in Common Shares issued by the Fund. The Plan Agent will use all dividends and distributions received in cash to purchase Common Shares in the open market within 30 days of the dividend payment date. Interest will not be paid on any uninvested cash payments.

You may withdraw from the Plan at any time by giving written notice to the Plan Agent. If you withdraw or the Plan is terminated, you will receive a certificate for each whole share in your account under the Plan and you will receive a cash payment for any fraction of a share in your account. If you wish, the Plan Agent will sell your shares and send you the proceeds, minus brokerage commissions and a \$2.50 service fee.

The Plan Agent maintains all shareholders' accounts in the Plan and gives written confirmation of all transactions in the accounts, including information you may need for tax records. Common Shares in your account will be held by the Plan Agent in non-certificated form. Any proxy you receive will include all Common Shares you have received under the Plan.

There is no brokerage charge for reinvestment of your dividends or distributions in Common Shares. However, all participants will pay a pro rata share of brokerage commissions incurred by the Plan Agent when it makes open market purchases.

Automatically reinvesting dividends and distributions does not mean that you do not have to pay income taxes due upon receiving dividends and distributions.

The Fund reserves the right to amend or terminate the Plan if in the judgment of the Board of Trustees the change is warranted. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants. Additional information about the Plan may be obtained from State Street Bank and Trust Company, Attn: Equiserve, P.O. Box 43010, Providence, Rhode Island 02940-3010, (800) 290-4390.

DESCRIPTION OF SHARES

Common Shares

The Declaration authorizes the issuance of an unlimited number of Common Shares. The Common Shares being offered have a par value of \$0.01 per share and, subject to the rights of holders of MuniPreferred Shares, if issued, have equal rights to the payment of dividends and the distribution of assets upon liquidation. The Common Shares being offered will, when issued, be fully paid and, subject to matters discussed in "Certain Provisions in the Declaration of Trust," non-assessable, and will have no pre-emptive or conversion rights or rights to cumulative voting. Whenever MuniPreferred Shares are outstanding, Common Shareholders will not be entitled to receive any cash distributions from the Fund unless all accrued dividends on MuniPreferred Shares have been paid, and unless asset coverage (as defined in the 1940 Act) with respect to MuniPreferred Shares would be at least 200% after giving effect to the distributions. See "--MuniPreferred Shares" below.

The Common Shares have been approved for listing on the American Stock Exchange, subject to notice of issuance. The Fund intends to hold annual meetings of shareholders so long as the Common Shares are listed on a national securities exchange and such meetings are required as a condition to such listing.

The Fund's net asset value per share generally increases when interest rates decline, and decreases when interest rates rise, and these changes are likely to be greater because the Fund intends to have a leveraged capital structure. Net asset value will be reduced immediately following the offering by the amount of the sales load and offering expenses paid by the Fund. Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per Common Share. See "Use of Proceeds."

Unlike open-end funds, closed-end funds like the Fund do not continuously offer shares and do not provide daily redemptions. Rather, if a shareholder determines to buy additional Common Shares or sell shares already held, the shareholder may conveniently do so by trading on the exchange through a broker or otherwise. Shares of closed-end investment companies may frequently trade on an exchange at prices lower than net asset value. Shares of closed-end investment companies like the Fund that invest predominately in investment grade municipal bonds have during some periods traded at prices higher than net asset value and have during other periods traded at prices lower than net asset value.

Because the market value of the Common Shares may be influenced by such factors as dividend levels (which are in turn affected by expenses), call protection, dividend stability, portfolio credit quality, net asset value, relative demand for and supply of such shares in the market, general market and economic conditions, and other factors beyond the control of the Fund, the Fund cannot assure you that Common Shares will trade at a price equal to or higher than net asset value in the future. The Common Shares are designed primarily for long-term investors, and investors in the Common Shares should not view the Fund as a vehicle for trading purposes. See "MuniPreferred Shares and Leverage" and the Statement of Additional Information under "Repurchase of Fund Shares; Conversion to Open-End Fund."

MuniPreferred Shares

The Declaration authorizes the issuance of an unlimited number of MuniPreferred Shares in one or more classes or series, with rights as determined by the Board of Trustees, by action of the Board of Trustees without the approval of the Common Shareholders.

The Fund's Board of Trustees has authorized an offering of MuniPreferred Shares (representing approximately 35% of the Fund's capital immediately after the time the MuniPreferred Shares are issued) approximately one to three months after completion of the offering of Common Shares. The Board has determined that the MuniPreferred Shares, at least initially, would pay cumulative dividends at rates determined weekly by providing for the periodic redetermination of the dividend rate through an auction or remarketing procedure. The Board of Trustees has indicated that the preference on distribution, liquidation preference, voting rights and redemption provisions of the MuniPreferred Shares will be as stated below.

Limited Issuance of MuniPreferred Shares. Under the 1940 Act, the Fund could issue MuniPreferred Shares with an aggregate liquidation value of up to one-half of the value of the Fund's total net assets, measured immediately after issuance of the MuniPreferred Shares. "Liquidation value" means the original purchase price of the shares being liquidated plus any accrued and unpaid dividends. In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless the liquidation value of the MuniPreferred Shares is less than one-half of the value of the Fund's total net assets (determined after deducting the amount of such dividend or distribution) immediately after the distribution. If the Fund sells all the Common Shares and MuniPreferred Shares discussed in this Prospectus, the liquidation value of the MuniPreferred Shares is expected to be approximately 35% of the value of the Fund's total net assets. The Fund intends to purchase or redeem MuniPreferred Shares, if necessary, to keep that fraction below one-half.

Distribution Preference. The MuniPreferred Shares have complete priority over the Common Shares as to distribution of assets.

Liquidation Preference. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Fund, holders of MuniPreferred Shares will be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to Common Shareholders.

Voting Rights. MuniPreferred Shares are required to be voting shares and to have equal voting rights with Common Shares. Except as otherwise indicated in this Prospectus or the Statement of Additional Information and except as otherwise required by applicable law, holders of MuniPreferred Shares will vote together with Common Shareholders as a single class.

Holders of MuniPreferred Shares, voting as a separate class, will be entitled to elect two of the Fund's trustees (following the establishment of the Fund by an initial trustee, the Declaration provides for a total of no less than two and no more than twelve trustees). The remaining trustees will be elected by Common Shareholders and holders of MuniPreferred Shares, voting together as a single class. In the unlikely event that two full years of accrued dividends are unpaid on the MuniPreferred Shares, the holders of all outstanding MuniPreferred Shares, voting as a separate class, will be entitled to elect a majority of the Fund's trustees until all dividends in arrears have been paid or declared and set apart for payment. Under the 1940 Act, in order for the Fund to take certain actions or enter into certain transactions (i.e., convert to an open-end investment company or effect a reorganization adversely affecting the MuniPreferred Shares), a separate class vote of holders of MuniPreferred Shares will be required, in addition to the single class vote of the holders of MuniPreferred Shares and Common Shares. See the Statement of Additional Information under "Description of Shares--MuniPreferred Shares--Voting Rights."

Redemption, Purchase and Sale of MuniPreferred Shares. The terms of the MuniPreferred Shares provide that they may be redeemed by the issuer at certain times, in whole or in part, at the original purchase price per share plus accumulated dividends. Any redemption or purchase of MuniPreferred Shares by the Fund will reduce the leverage applicable to Common Shares, while any issuance of shares by the Fund will increase such leverage. See "MuniPreferred Shares and Leverage."

The discussion above describes the Board of Trustees' present intention with respect to an offering of MuniPreferred Shares. The terms of the MuniPreferred Shares may be the same as, or different from, the terms described above, subject to applicable law and the Fund's Declaration.

CERTAIN PROVISIONS IN THE DECLARATION OF TRUST

Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Fund. However, the Declaration contains an express disclaimer of shareholder liability for debts or obligations of the Fund and requires that notice of such limited liability be given in each agreement, obligation or instrument entered into or executed by the Fund or the trustees. The Declaration further provides for indemnification out of the assets and property of the Fund for all loss and expense of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be unable to meet its obligations. The Fund believes that the likelihood of such circumstances is remote.

The Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or to convert the Fund to open-end status. Specifically, the Declaration requires a vote by holders of at least two-thirds of the Common Shares and MuniPreferred Shares, voting together as a single class, except as described below, to authorize (1) a conversion of the Fund from a closed-end to an open-end investment company, (2) a merger or consolidation of the Fund, or a

30

series or class of the Fund, with any corporation, association, trust or other organization or a reorganization or recapitalization of the Fund, or a series or class of the Fund, (3) a sale, lease or transfer of all or substantially all of the Fund's assets (other than in the regular course of the Fund's investment activities), (4) in certain circumstances, a termination of the Fund, or a series or class of the Fund, or (5) a removal of trustees by shareholders, and then only for cause, unless, with respect to (1) through (4), such transaction has already been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-laws, in which case the affirmative vote of the holders of at least a majority of the Fund's Common Shares and MuniPreferred Shares outstanding at the time, voting together as a single class, is required, provided, however, that where only a particular class or series is affected (or, in the case of removing a trustee, when the trustee has been elected by only one class), only the required vote by the applicable class or series will be required. Approval of shareholders is not required, however, for any transaction, whether deemed a merger, consolidation, reorganization or otherwise whereby the Fund issues Shares in connection with the acquisition of assets (including those subject to liabilities) from any other investment company or similar entity. None of the foregoing provisions may be amended except by the vote of at least two-thirds of the Common Shares and MuniPreferred Shares, voting together as a single class. In the case of the conversion of the Fund to an open-end investment company, or in the case of any of the foregoing transactions constituting a plan of reorganization which adversely affects the holders of MuniPreferred Shares, the action in question will also require the affirmative vote of the holders of at least two-thirds of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class, or, if such action has been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-laws, the affirmative vote of the holders of at least a majority of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class. The votes required to approve the conversion of the Fund from a closed-end to an open-end investment company or to approve transactions constituting a plan of reorganization which adversely affects the holders of MuniPreferred Shares are higher than those required by the 1940 Act. The Board of Trustees believes that the provisions of the Declaration relating to such higher votes are in the best interest of the Fund and its shareholders. See the Statement of Additional Information under "Certain Provisions in the Declaration of Trust."

The provisions of the Declaration described above could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over the then current market price of the Common Shares by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a third party. They provide, however, the advantage of potentially requiring persons seeking control of the Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objectives and policies. The Board of Trustees of the Fund has considered the foregoing anti-takeover provisions and concluded that they are

in the best interests of the Fund and its Common Shareholders.

Reference should be made to the Declaration on file with the Securities and Exchange Commission for the full text of these provisions.

REPURCHASE OF FUND SHARES; CONVERSION TO OPEN-END FUND

The Fund is a closed-end investment company and as such its shareholders will not have the right to cause the Fund to redeem their shares. Instead, the Common Shares will trade in the open market at

31

a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), net asset value, call protection, dividend stability, portfolio credit quality, relative demand for and supply of such shares in the market, general market and economic conditions and other factors. Because shares of closed-end investment companies may frequently trade at prices lower than net asset value, the Fund's Board of Trustees has currently determined that, at least annually, it will consider action that might be taken to reduce or eliminate any material discount from net asset value in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares at net asset value, or the conversion of the Fund to an open-end investment company. The Fund cannot assure you that its Board of Trustees will decide to take any of these actions, or that share repurchases or tender offers will actually reduce market discount.

If the Fund converted to an open-end investment company, it would be required to redeem all MuniPreferred Shares then outstanding (requiring in turn that it liquidate a portion of its investment portfolio), and the Common Shares would no longer be listed on the American Stock Exchange. In contrast to a closed-end investment company, shareholders of an open-end investment company may require the company to redeem their shares at any time (except in certain circumstances as authorized by or under the 1940 Act) at their net asset value, less any redemption charge that is in effect at the time of redemption. See the Statement of Additional Information under "Certain Provisions in the Declaration of Trust" for a discussion of the voting requirements applicable to the conversion of the Fund to an open-end investment company.

Before deciding whether to take any action if the Common Shares trade below net asset value, the Board would consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders, and market considerations. Based on these considerations, even if the Fund's shares should trade at a discount, the Board of Trustees may determine that, in the interest of the Fund and its shareholders, no action should be taken. See the Statement of Additional Information under "Repurchase of Fund Shares; Conversion to Open-End Fund" for a further discussion of possible action to reduce or eliminate such discount to net asset value.

TAX MATTERS

Federal Income Tax Matters

The following discussion of federal income tax matters is based on the advice of Bell, Boyd & Lloyd LLC, special counsel to the Fund.

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

The discussions below and in the Statement of Additional Information provide general tax information related to an investment in the Common Shares. Because tax laws are complex and often change, you should consult your tax advisor about the tax consequences of an investment in the Fund.

The Fund intends to elect to be treated and to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"), and intends to distribute substantially all of its net income and gains to its shareholders. Therefore, it is not expected that the Fund will be subject to any federal income tax. The Fund primarily invests in municipal bonds from issuers located in Georgia or in municipal bonds whose income is otherwise exempt from regular

32

federal and Georgia income taxes. Thus, substantially all of the Fund's dividends to you will qualify as "exempt-interest dividends." A shareholder treats an exempt-interest dividend as interest on state and local bonds exempt from regular federal income tax. Some or all of an exempt-interest dividend, however, may be subject to federal alternative minimum tax imposed on the shareholder. Different federal alternative minimum tax rules apply to individuals and to corporations.

Although the Fund does not seek to realize taxable income or capital gains, the Fund may realize and distribute taxable income or capital gains from time to time as a result of the Fund's normal investment activities. The Fund will distribute at least annually any ordinary taxable income or net capital gain. Distributions of net short-term capital gain are taxable as ordinary income. Distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are taxable as long-term capital gains regardless of how long you have owned your investment. The Fund will allocate distributions to shareholders that are treated as tax-exempt interest and as long-term capital gain and ordinary income, if any, among the Common Shares and MuniPreferred Shares in proportion to total dividends paid to each class for the year. As long as the Fund qualifies as a regulated investment company, distributions paid by the Fund generally will not be eligible for the dividends received deduction allowed to corporations.

Each year, you will receive a year-end statement that describes the tax status of dividends paid to you during the preceding year, including the source of investment income by state and the portion of income that is subject to the federal alternative minimum tax. You will receive this statement from the firm where you purchased your Common Shares if you hold your investment in street name; the Fund will send you this statement if you hold your shares in registered form.

The tax status of your dividends is not affected by whether you reinvest your dividends or receive them in cash.

In order to avoid corporate taxation of its earnings and to pay tax-free dividends, the Fund must meet certain Internal Revenue Service ("I.R.S.") requirements that govern the Fund's sources of income, diversification of assets and distribution of earnings to shareholders. The Fund intends to meet these requirements. If the Fund failed to do so, the Fund would be required to pay corporate taxes on its earnings and all your distributions would be taxable as ordinary income to the extent of the Fund's earnings and profits. In particular, in order for the Fund to pay exempt-interest dividends, at least 50% of the value of the Fund's total assets must consist of tax-exempt obligations at the close of each quarter of its taxable year. The Fund intends to meet this requirement. If the Fund failed to do so, it would not be able to

pay exempt-interest dividends and your distributions attributable to interest received by the Fund from any source would be taxable as ordinary income.

The sale or other disposition of Common Shares will result in capital gain or loss to you if you hold such Common Shares as capital assets. Present law taxes both long-term and short-term capital gains of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, however, long-term capital gains are eligible for reduced rates of taxation.

The Fund may be required to withhold a percentage of certain of your dividends if you have not provided the Fund with your correct taxpayer identification number (normally your Social Security number) and certain certifications, or if you are otherwise subject to backup withholding. The backup withholding percentage will be 30% in 2002 and 2003, 29% in 2004 and 2005, and 28% thereafter until

33

2011, when the percentage will revert to 31% unless amended by Congress. If you receive Social Security benefits, you should be aware that exempt-interest dividends are taken into account in calculating the amount of these benefits that may be subject to federal income tax. If you borrow money to buy Fund shares, you may not deduct the interest on that loan. Under I.R.S. rules, Fund shares may be treated as having been bought with borrowed money even if the purchase of the Fund shares cannot be traced directly to borrowed money.

If you are subject to the federal alternative minimum tax, a portion of your regular monthly dividends may be taxable.

Georgia Tax Matters

The following is based upon the advice of Chapman and Cutler, special Georgia counsel to the Fund.

The Fund is designed to provide tax benefits to investors who are residents of Georgia. See "The Fund." Assuming the Fund qualifies as a "regulated investment company" for federal income tax purposes under Subchapter M of the Internal Revenue Code, exempt-interest dividends from the Fund that are excluded from gross income for federal income tax purposes and that are attributable to interest on (i) obligations of the State of Georgia or its political subdivisions and (ii) obligations of possessions of the United States, will be exempt from the income tax imposed by the State of Georgia on individuals and corporations under Chapter 7 of Title 48 of the Georgia Statutes. Other dividends from the Fund may be subject to the Georgia income tax.

Interest on indebtedness incurred or continued to purchase or carry shares of the Fund, if the Fund distributes dividends exempt from the Georgia income tax during a year, is not deductible for purposes of the Georgia income tax. Ownership of shares in the Fund may result in other Georgia tax consequences to certain taxpayers, and prospective investors should consult their tax advisors.

Shareholders are advised to consult with their own tax advisors for more detailed information concerning Georgia state and local tax matters. Please refer to the Statement of Additional Information for more detailed information.

OTHER MATTERS

A lawsuit was brought in June 1996 (Green et al. v. Nuveen Advisory Corp., et al.) by certain individual common shareholders of six leveraged closed-end funds sponsored by Nuveen in the federal district court for the Seventh Circuit Court of Appeals. The suit was originally brought against Nuveen, Nuveen Advisory, six Nuveen investment companies (the "leveraged closed-end funds") managed by Nuveen Advisory and two of the leveraged closed-end funds' former directors seeking unspecified damages, an injunction, and other relief. The suit also sought certification of a defendant class consisting of all Nuveen-managed leveraged funds.

The plaintiffs alleged that the leveraged closed-end funds engaged in certain practices that violated various provisions of the 1940 Act and common law. The plaintiffs also alleged, among other things, breaches of fiduciary duty by the funds' directors and Nuveen Advisory and various misrepresentations and omissions in prospectuses and shareholder reports relating to the use of leverage through the

34

issuance and periodic auctioning of preferred stock and the basis of the calculation and payment of management fees to Nuveen Advisory and Nuveen. Plaintiffs also filed a motion to certify defendant and plaintiff classes.

The defendants filed motions to dismiss the entire lawsuit asserting that the claims are without merit and to oppose certification of any classes. On March 30, 1999, the court entered a memorandum opinion and order (1) granting the defendants' motion to dismiss all of plaintiffs' counts against the defendants other than Nuveen Advisory, (2) granting Nuveen Advisory's motion to dismiss all of plaintiffs' counts against it other than breach of fiduciary duty under Section 36(b) of the 1940 Act, and (3) denying the plaintiffs' motion to certify a plaintiff class and a defendant class. No appeal was made by plaintiffs of this decision, and the remaining Section 36(b) count against Nuveen Advisory is discussed below.

As to alleged damages, plaintiffs have claimed as damages the portion of all advisory compensation received by Nuveen Advisory from the funds during the period from June 21, 1995 to the present that is equal to the proportion of each of such fund's preferred stock to its total assets. The preferred stock constitutes approximately one third of the funds' assets so the amount claimed would equal approximately one third of management fees received by Nuveen Advisory for managing the funds during this period, or more than \$60 million. Nuveen Advisory believes that it has no liability and the plaintiffs have suffered no damages and filed a motion for summary judgment as to both liability and damages.

Plaintiffs filed a partial motion for summary judgment as to liability only. In a memorandum opinion and order dated September 6, 2001, the federal district court granted Nuveen Advisory's motion for summary judgment and denied plaintiffs' motion for partial summary judgment, thereby terminating the litigation before the court. Plaintiffs appealed this decision on October 8, 2001. In an opinion dated July 8, 2002, the Seventh Circuit Court of Appeals affirmed the opinion of the district court dismissing the plaintiffs' lawsuit. Any petition for a writ of certiorari to the United States Supreme Court seeking to appeal the Seventh Circuit's opinion would need to be filed within ninety days of the Seventh Circuit's July 8, 2002 opinion.

UNDERWRITING

Subject to the terms and conditions stated in the underwriting agreement dated the date hereof, each Underwriter named below has severally agreed to purchase, and the Fund has agreed to sell to such Underwriter, the number of Common Shares set forth opposite the name of such Underwriter.

Underwriters	Number of Shares
-----	-----
Salomon Smith Barney Inc.....	
Nuveen Investments.....	
A.G. Edwards & Sons, Inc.....	
Prudential Securities Incorporated.....	
UBS Warburg LLC.....	
H&R Block Financial Advisors, Inc.....	
Deutsche Bank Securities Inc.....	
Raymond James & Associates, Inc.....	
SunTrust Capital Markets, Inc.....	
Wachovia Securities, Inc.....	

Total.....	
	=====

The underwriting agreement provides that the obligations of the several Underwriters to purchase the Common Shares included in this offering are subject to approval of certain legal matters by counsel and to certain other conditions. The Underwriters are obligated to purchase all the Common Shares (other than those covered by the over-allotment option described below) if they purchase any of the Common Shares. The representatives described below have advised the Fund that the Underwriters do not intend to confirm any sales to any accounts over which they exercise discretionary authority.

The Underwriters, for whom Salomon Smith Barney Inc., Nuveen Investments, A.G. Edwards & Sons, Inc., Prudential Securities Incorporated, UBS Warburg LLC, H&R Block Financial Advisors, Inc., Deutsche Bank Securities Inc., Raymond James & Associates, Inc., SunTrust Capital Markets, Inc. and Wachovia Securities, Inc. are acting as representatives, propose to offer some of the Common Shares directly to the public at the public offering price set forth on the cover page of this Prospectus and some of the Common Shares to certain dealers at the public offering price less a concession not in excess of \$0.45 per Common Share. The sales load the Fund will pay of \$0.675 per share is equal to 4.5% of the initial offering price. The Underwriters may allow, and such dealers may reallow, a concession not in excess of \$0.10 per Common Share on

sales to certain other dealers. Certain dealers acting in the capacity of sub-underwriters may receive additional compensation for acting in such a capacity. If all of the Common Shares are not sold at the initial offering price, the representatives may change the public offering price and other selling terms. Investors must pay for any Common Shares purchased on or before , 2002. In connection with this offering, Nuveen may perform clearing services without charge for brokers and dealers for whom it regularly provides clearing services that are participating in the offering as members of the selling group.

The Fund has granted to the Underwriters an option, exercisable for 45 days from the date of this Prospectus, to purchase up to additional Common Shares at the public offering price less the sales load. The Underwriters may exercise such option solely for the purpose of covering over-allotments, if any, in connection with this offering. To the extent such option is exercised, each Underwriter will be obligated, subject to certain conditions, to purchase a number of additional Common Shares approximately proportionate to such Underwriter's initial purchase commitment.

36

The Fund and Nuveen Advisory have agreed that, for a period of 180 days from the date of this Prospectus, they will not, without the prior written consent of Salomon Smith Barney Inc., on behalf of the Underwriters, dispose of or hedge any Common Shares or any securities convertible into or exchangeable for Common Shares. Salomon Smith Barney Inc. in its sole discretion may release any of the securities subject to these agreements at any time without notice.

Prior to the offering, there has been no public market for the Common Shares. Consequently, the initial public offering price for the Common Shares was determined by negotiation among the Fund, Nuveen Advisory and the representatives. There can be no assurance, however, that the price at which the Common Shares will sell in the public market after this offering will not be lower than the price at which they are sold by the Underwriters or that an active trading market in the Common Shares will develop and continue after this offering. The Common Shares have been approved for listing on the American Stock Exchange, subject to official notice of issuance.

The Fund and Nuveen Advisory have each agreed to indemnify the several Underwriters or contribute to losses arising out of certain liabilities, including liabilities under the Securities Act of 1933, as amended.

Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per share.

In addition, the Fund has agreed to reimburse the Underwriters for certain expenses incurred by the Underwriters in the offering.

Certain Underwriters participating in the Common Share offering may be invited, some period of time after completion of this offering, to participate in the offering of the MuniPreferred Shares and will receive compensation for their participation in that MuniPreferred Share offering. The number of Common

Shares purchased by each Underwriter in this offering may be a factor in determining (i) whether that Underwriter is selected to participate in the offering of the MuniPreferred Shares, (ii) the number of MuniPreferred Shares allocated to that Underwriter in that offering, and (iii) the amount of certain additional MuniPreferred Share underwriting compensation available to that Underwriter. The offering costs associated with the issuance of MuniPreferred Shares are currently estimated to be slightly more than 2% of the total amount of the MuniPreferred Share offering. These costs will effectively be borne by the Common Shareholders.

In connection with the requirements for listing the Fund's Common Shares on the American Stock Exchange, the Underwriters have undertaken to sell lots of 100 or more Common Shares to a minimum of 400 beneficial owners in the United States. The minimum investment requirement is 100 Common Shares.

Certain Underwriters may make a market in the Common Shares after trading in the Common Shares has commenced on the American Stock Exchange. No Underwriter is, however, obligated to conduct market-making activities and any such activities may be discontinued at any time without notice, at the sole discretion of the Underwriter. No assurance can be given as to the liquidity of, or the trading market for, the Common Shares as a result of any market-making activities undertaken by any Underwriter. This Prospectus is to be used by any Underwriter in connection with the offering and, during the period in which a prospectus must be delivered, with offers and sales of the Common Shares

37

in market-making transactions in the over-the-counter market at negotiated prices related to prevailing market prices at the time of the sale.

The Underwriters have advised the Fund that, pursuant to Regulation M under the Securities Exchange Act of 1934, as amended, certain persons participating in the offering may engage in transactions, including stabilizing bids, covering transactions or the imposition of penalty bids, which may have the effect of stabilizing or maintaining the market price of the Common Shares on the American Stock Exchange at a level above that which might otherwise prevail in the open market. A "stabilizing bid" is a bid for or purchase of the Common Shares on behalf of an Underwriter for the purpose of fixing or maintaining the price of the Common Shares. A "covering transaction" is a bid for or purchase of the Common Shares on behalf of an Underwriter to reduce a short position incurred by the Underwriters in connection with the offering. A "penalty bid" is a contractual arrangement whereby if, during a specified period after the issuance of the Common Shares, the Underwriters purchase Common Shares in the open market for the account of the underwriting syndicate and the Common Shares purchased can be traced to a particular Underwriter or member of the selling group, the underwriting syndicate may require the Underwriter or selling group member in question to purchase the Common Shares in question at the cost price to the syndicate or may recover from (or decline to pay to) the Underwriter or selling group member in question any or all compensation (including, with respect to a representative, the applicable syndicate management fee) applicable to the Common Shares in question. As a result, an Underwriter or

selling group member and, in turn, brokers may lose the fees that they otherwise would have earned from a sale of the Common Shares if their customer resells the Common Shares while the penalty bid is in effect. The Underwriters are not required to engage in any of these activities, and any such activities, if commenced, may be discontinued at any time.

The underwriting agreement provides that it may be terminated in the absolute discretion of the representatives without liability on the part of the Underwriters to the Fund or Nuveen Advisory if, prior to the delivery of and payment for the Common Shares, (i) trading in the Fund's Common Shares shall have been suspended by the Securities and Exchange Commission or the American Stock Exchange or trading in securities generally on the New York Stock Exchange or the American Stock Exchange shall have been suspended or limited or minimum prices for trading in securities generally shall have been established on either of such Exchanges, (ii) a commercial banking moratorium shall have been declared by either federal or New York state authorities or (iii) there shall have occurred any outbreak or escalation of hostilities, declaration by the United States of a national emergency or war, or other calamity or crisis the effect of which on financial markets in the United States is such as to make it, in the sole judgment of the representatives, impracticable or inadvisable to proceed with the offering or delivery of the Common Shares as contemplated by the Prospectus (exclusive of any supplement thereto).

The Fund anticipates that from time to time the representatives of the Underwriters and certain other Underwriters may act as brokers or dealers in connection with the execution of the Fund's portfolio transactions after they have ceased to be Underwriters and, subject to certain restrictions, may act as brokers while they are Underwriters.

Prior to the public offering of Common Shares, Nuveen Advisory purchased Common Shares from the Fund in an amount satisfying the net worth requirements of Section 14(a) of the 1940 Act. As of the date of this Prospectus, Nuveen Advisory owned 100% of the Fund's outstanding Common Shares. Nuveen Advisory may be deemed to control the Fund until such time as it owns less than 25% of the

38

Fund's outstanding Common Shares which is expected to occur as of the completion of the offering of Common Shares.

Nuveen, 333 West Wacker Drive, Chicago, Illinois, 60606, one of the representatives of the Underwriters, is the parent company of Nuveen Advisory.

The principal business address of Salomon Smith Barney Inc. is 388 Greenwich Street, New York, New York 10013.

CUSTODIAN AND TRANSFER AGENT

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

The custodian of the assets of the Fund is State Street Bank and Trust Company, One Federal Street, Boston, Massachusetts 02110. The Custodian performs custodial, fund accounting and portfolio accounting services. The Fund's transfer, shareholder services and dividend paying agent is also State Street Bank and Trust Company, 225 Franklin Street, Boston, Massachusetts 02110.

LEGAL OPINIONS

Certain legal matters in connection with the Common Shares will be passed upon for the Fund by Bell, Boyd & Lloyd LLC, Chicago, Illinois, and for the Underwriters by Simpson Thacher & Bartlett, New York, New York. Bell, Boyd & Lloyd LLC and Simpson Thacher & Bartlett may rely as to certain matters of Massachusetts law on the opinion of Bingham McCutchen LLP, Boston, Massachusetts.

Nuveen Georgia Dividend Advantage Municipal Fund 2

STATEMENT OF ADDITIONAL INFORMATION

Nuveen Georgia Dividend Advantage Municipal Fund 2 (the "Fund" or the "Georgia Fund") is a newly organized, non-diversified closed-end management investment company.

This Statement of Additional Information relating to common shares of the Fund ("Common Shares") does not constitute a prospectus, but should be read in conjunction with the Fund's Prospectus relating thereto dated , 2002 (the "Prospectus"). This Statement of Additional Information does not include all information that a prospective investor should consider before purchasing Common Shares. Investors should obtain and read the Fund's Prospectus prior to purchasing such shares. A copy of the Fund's Prospectus may be obtained without charge by calling (800) 257-8787. You may also obtain a copy of the Fund's Prospectus on the Securities and Exchange Commission's web site (<http://www.sec.gov>). Capitalized terms used but not defined in this Statement of Additional Information have the meanings ascribed to them in the Prospectus.

2

USE OF PROCEEDS

The net proceeds of the offering of Common Shares of the Fund will be approximately: \$ (\$ if the Underwriters exercise the over-allotment option in full) after payment of organization and offering costs.

3

For the Fund, Nuveen Advisory has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per Common Share.

Pending investment in municipal bonds that meet the Fund's investment objectives and policies, the net proceeds of the offering will be invested in high quality, short-term tax-exempt money market securities or in high quality municipal bonds with relatively low volatility (such as pre-refunded and intermediate-term bonds), to the extent such securities are available. If necessary to invest fully the net proceeds of the offering immediately, the Fund may also purchase, as temporary investments, short-term taxable investments of the type described under "Investment Policies and Techniques--Investment in Municipal Bonds--Portfolio Investments," the income on which is subject to regular federal income tax and securities of other open or closed-end investment companies that invest primarily in municipal bonds of the type in which the Fund may invest directly.

4

INVESTMENT OBJECTIVES

The Fund's investment objective is to provide current income exempt from regular federal and Georgia income tax, and to enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that the Fund's investment adviser believes are underrated or undervalued or that represent municipal market sectors that are undervalued.

5

The Fund's investment in underrated or undervalued municipal bonds will be based on Nuveen Advisory's belief that their yield is higher than that available on bonds bearing equivalent levels of interest rate risk, credit risk and other forms of risk, and that their prices will ultimately rise (relative to the market) to reflect their true value. The Fund attempts to increase its portfolio value relative to the municipal bond market by prudent selection of municipal bonds regardless of the direction the market may move. Any capital appreciation realized by the Fund will

6

generally result in the distribution of taxable capital gains to holders of Common Shares. The Fund's investment objectives are fundamental policies of the Fund.

The Fund has not established any limit on the percentage of its portfolio that may be invested in municipal bonds subject to the alternative minimum tax provisions of federal tax law, and the Fund expects that a substantial portion of the income it produces will be includable in alternative minimum taxable income. Common Shares therefore would not ordinarily be a suitable investment for investors who are subject to the federal alternative minimum tax or who would become subject to such tax by purchasing Common Shares. The suitability of Common Shares as an investment for you will depend upon a comparison of the after-tax yield likely to be provided from the Fund with that from comparable tax-exempt investments not subject to the alternative minimum tax, and from comparable fully taxable investments, in light of your tax position. Special considerations apply to corporate investors. See "Tax Matters."

Investment Restrictions

Except as described below, the Fund, as a fundamental policy, may not, without the approval of the holders of a majority of the outstanding Common Shares and, if issued, MuniPreferred Shares (as hereinafter defined) voting together as a single class, and of the holders of a majority of the outstanding MuniPreferred Shares voting as a separate class:

(1) Under normal circumstances, invest less than 80% of the Fund's net assets (plus any borrowings for investment purposes) in investments the income from which is exempt from both regular federal and Georgia income tax;

(2) Issue senior securities, as defined in the Investment Company Act of 1940, other than MuniPreferred Shares, except to the extent permitted under the Investment Company Act of 1940 and except as otherwise described in the Prospectus;

(3) Borrow money, except from banks for temporary or emergency purposes or for repurchase of its shares, and then only in an amount not exceeding one-third of the value of the Fund's total assets (including the amount borrowed) less the Fund's liabilities (other than borrowings);

(4) Act as underwriter of another issuer's securities, except to the extent that the Fund may be deemed to be an underwriter within the meaning of the Securities Act of 1933 in connection with the purchase and sale of portfolio securities;

(5) Invest more than 25% of its total assets in securities of issuers in any one industry; provided, however, that such limitation shall not apply to municipal bonds other than those municipal bonds backed only by the assets and revenues of non-governmental users;

7

(6) Purchase or sell real estate, but this shall not prevent the Fund from investing in municipal bonds secured by real estate or interests therein or foreclosing upon and selling such security;

(7) Purchase or sell physical commodities unless acquired as a result

of ownership of securities or other instruments (but this shall not prevent the Fund from purchasing or selling options, futures contracts, derivative instruments or from investing in securities or other instruments backed by physical commodities);

(8) Make loans, other than by entering into repurchase agreements and through the purchase of municipal bonds or short-term investments in accordance with its investment objectives, policies and limitations; and

(9) Purchase any securities (other than obligations issued or guaranteed by the United States Government or by its agencies or instrumentalities), if as a result more than 5% of the Fund's total assets would then be invested in securities of a single issuer or if as a result the Fund would hold more than 10% of the outstanding voting securities of any single issuer; provided that, with respect to 50% of the Fund's assets, the Fund may invest up to 25% of its assets in the securities of any one issuer.

For purposes of the foregoing and "Description of Shares--MuniPreferred Shares--Voting Rights" below, "majority of the outstanding," when used with respect to particular shares of the Fund, means (i) 67% or more of the shares present at a meeting, if the holders of more than 50% of the shares are present or represented by proxy, or (ii) more than 50% of the shares, whichever is less.

For the purpose of applying the limitation set forth in subparagraph (9) above, an issuer shall be deemed the sole issuer of a security when its assets and revenues are separate from other governmental entities and its securities are backed only by its assets and revenues. Similarly, in the case of a non-governmental issuer, such as an industrial corporation or a privately owned or operated hospital, if the security is backed only by the assets and revenues of the non-governmental issuer, then such non-governmental issuer would be deemed to be the sole issuer. Where a security is also backed by the enforceable obligation of a superior or unrelated governmental or other entity (other than a bond insurer), it shall also be included in the computation of securities owned that are issued by such governmental or other entity. Where a security is guaranteed by a governmental entity or some other facility, such as a bank guarantee or letter of credit, such a guarantee or letter of credit would be considered a separate security and would be treated as an issue of such government, other entity or bank. When a municipal bond is insured by bond insurance, it shall not be considered a security that is issued or guaranteed by the insurer; instead, the issuer of such municipal bond will be determined in accordance with the principles set forth above. The foregoing restrictions do not limit the percentage of the Fund's assets that may be invested in municipal bonds insured by any given insurer.

Under the Investment Company Act of 1940, the Fund may invest only up to 10% of its Managed Assets in the aggregate in shares of other investment companies and only up to 5% of its Managed Assets in any one investment company, provided the investment does not represent more than 3% of the voting stock of the acquired investment company at the time such shares are purchased. As a stockholder in any investment company, the Fund will bear its ratable share of

that investment company's expenses, and will remain subject to payment of the Fund's management, advisory and administrative fees with respect to assets so invested. Holders of Common Shares would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. In addition, the securities of other investment companies may also be leveraged and

will therefore be subject to the same leverage risks described herein. As described in the Prospectus in the section entitled "Risks", the net asset value and market value of leveraged shares will be more volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

In addition to the foregoing fundamental investment policies, the Fund is also subject to the following non-fundamental restrictions and policies, which may be changed by the Board of Trustees. The Fund may not:

- (1) Sell securities short, unless the Fund owns or has the right to obtain securities equivalent in kind and amount to the securities sold at no added cost, and provided that transactions in options, futures contracts, options on futures contracts, or other derivative instruments are not deemed to constitute selling securities short.
- (2) Purchase securities of open-end or closed-end investment companies except in compliance with the Investment Company Act of 1940 or any exemptive relief obtained thereunder.
- (3) Enter into futures contracts or related options or forward contracts, if more than 30% of the Fund's net assets would be represented by futures contracts or more than 5% of the Fund's net assets would be committed to initial margin deposits and premiums on futures contracts and related options.
- (4) Purchase securities when borrowings exceed 5% of its total assets if and so long as MuniPreferred Shares are outstanding.
- (5) Purchase securities of companies for the purpose of exercising control.
- (6) Invest in inverse floating rate securities (which are securities that pay interest at rates that vary inversely with changes in prevailing short-term tax-exempt interest rates and which represent a leveraged investment in an underlying municipal bond).

The restrictions and other limitations set forth above will apply only at the time of purchase of securities and will not be considered violated unless an excess or deficiency occurs or exists immediately after and as a result of an acquisition of securities.

The Fund intends to apply for ratings for its preferred shares (called "MuniPreferred Shares" herein) from Moody's and/or S&P. In order to obtain and maintain the required ratings, the Fund may be required to comply with investment quality, diversification and other guidelines established by Moody's or S&P. Such guidelines will likely be more restrictive than the restrictions set forth above. The Fund does not anticipate that such guidelines would have a material

adverse effect on its Common Shareholders or its ability to achieve its investment objectives. The Fund presently anticipates that any MuniPreferred Shares that it intends to issue would be initially given the highest ratings by Moody's ("Aaa") or by S&P ("AAA"), but no assurance can be given that such ratings will be obtained. No minimum rating is required for the issuance of MuniPreferred Shares by the Fund. Moody's and S&P receive fees in connection with their ratings issuances.

INVESTMENT POLICIES AND TECHNIQUES

The following information supplements the discussion of the Fund's investment objectives, policies, and techniques that are described in the Fund's Prospectus.

Investment in Municipal Bonds

Portfolio Investments

Under normal circumstances, the Georgia Fund will invest its net assets in a portfolio of municipal bonds that are exempt from regular federal and Georgia income tax.

Under normal circumstances, and except for the temporary investments described below, the Fund expects to be fully invested (at least 95% of its assets) in such tax-exempt municipal bonds described above. After completion of the offering through September 30, 2003, the Fund may invest in municipal bonds that are exempt from regular federal income tax but not from the Fund's particular state income tax ("Out of State Bonds"), provided that no more than 10% of the Fund's investment income during that time may be derived from Out of State Bonds.

The Fund will invest at least 80% of its net assets in municipal bonds that at the time of investment are investment grade quality, which may include split-rated bonds, as defined below. Investment

10

grade quality bonds are bonds rated within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or bonds that are unrated but judged to be of comparable quality by Nuveen Advisory. Investment grade bonds may include bonds that, at the time of investment, are rated below investment grade by Moody's, S&P or Fitch, so long as at least one NRSRO rates such bonds within the four highest grades (such bonds are called "split-rated bonds"). "Split-rated bonds" are those bonds that, at the time of investment, are rated below investment grade by Moody's, S&P or Fitch, so long as at least one NRSRO rates such bonds within the four highest grades (i.e., investment grade quality). This means that split-rated bonds may be regarded by one NRSRO (but by definition not by all NRSROs or by Nuveen Advisory) as having characteristics of bonds rated Ba/BD or B by Moody's, S&P or Fitch, as discussed below. The Fund may invest up to 20% of its net assets in municipal bonds that, at the time of investment, are rated Ba/BB or B by Moody's, S&P or Fitch or unrated but judged to be of comparable quality by Nuveen Advisory. Bonds of below investment grade quality (Ba/BB or below) are commonly referred to as junk bonds. Issuers of bonds rated Ba/BB or B are regarded as having current capacity to make principal and interest payments but are subject to business, financial or economic conditions which could adversely affect such payment capacity. Municipal bonds rated Baa or BBB are considered "investment grade" securities; municipal bonds rated Baa are considered medium grade obligations which lack outstanding investment characteristics and have speculative characteristics, while municipal bonds rated BBB are regarded as having adequate capacity to pay principal and interest. Municipal bonds rated AAA in which the Fund may invest may have been so rated on the basis of the existence of insurance guaranteeing the timely payment, when due, of all principal and interest. Municipal bonds rated below investment grade quality are obligations of issuers that are considered predominately speculative with respect to the issuer's capacity to pay interest and repay principal according to the terms of the obligation and, therefore, carry greater investment risk, including the possibility of issuer default and

bankruptcy and increased market price volatility. Municipal bonds rated below investment grade tend to be less marketable than higher-quality bonds because the market for them is less broad. The market for unrated municipal bonds is even narrower. During periods of thin trading in these markets, the spread between bid and asked prices is likely to increase significantly and the Fund may have greater difficulty selling its portfolio securities. The Fund will be more dependent on Nuveen Advisory's research and analysis when investing in these securities.

A general description of Moody's, S&P's and Fitch's ratings of municipal bonds is set forth in Appendix A hereto. The ratings of Moody's, S&P and Fitch represent their opinions as to the quality of the municipal bonds they rate. It should be emphasized, however, that ratings are general and are not absolute standards of quality. Consequently, municipal bonds with the same maturity, coupon and rating may have different yields while obligations of the same maturity and coupon with different ratings may have the same yield.

11

The Fund will primarily invest in municipal bonds with long-term maturities in order to maintain a weighted average maturity of 15-30 years, but the average weighted maturity of obligations held by the Fund may be shortened, depending on market conditions. As a result, the Fund's portfolio at any given time may include both long-term and intermediate-term municipal bonds. Moreover, during temporary defensive periods (e.g., times when, in Nuveen Advisory's opinion, temporary imbalances of supply and demand or other temporary dislocations in the tax-exempt bond market adversely affect the price at which long-term or intermediate-term municipal bonds are available), and in order to keep the Fund's cash fully invested, including the period during which the net proceeds of the offering are being invested, the Fund may invest any percentage of its net assets in short-term investments including high quality, short-term securities that may be either tax-exempt or taxable and up to 10% of its net assets in securities of other open or closed-end investment companies that invest primarily in municipal bonds of the type in which the Fund may invest directly. The Fund intends to invest in taxable short-term investments only in the event that suitable tax-exempt short-term investments are not available at reasonable prices and yields. Tax-exempt short-term investments include various obligations issued by state and local governmental issuers, such as tax-exempt notes (bond anticipation notes, tax anticipation notes and revenue anticipation notes or other such municipal bonds maturing in three years or less from the date of issuance) and municipal commercial paper. The Fund will invest only in taxable short-term investments which are U.S. Government securities or securities rated within the highest grade by Moody's, S&P or Fitch, and which mature within one year from the date of purchase or carry a variable or floating rate of interest. See Appendix A for a general description of Moody's, S&P's and Fitch's ratings of securities in such categories. Taxable short-term investments of the Fund may include certificates of deposit issued by U.S. banks with assets of at least \$1 billion, or commercial paper or corporate notes, bonds or debentures with a remaining maturity of one year or less, or repurchase agreements. See "Other Investment Policies and Techniques--Repurchase Agreements." To the extent the Fund invests

12

in taxable investments, the Fund will not at such times be in a position to achieve its investment objective of tax-exempt income.

The foregoing policies as to ratings of portfolio investments will apply

only at the time of the purchase of a security, and the Fund will not be required to dispose of securities in the event Moody's, S&P or Fitch downgrades its assessment of the credit characteristics of a particular issuer.

Nuveen Advisory seeks to enhance portfolio value relative to the municipal bond market by investing in tax-exempt municipal bonds that it believes are underrated or undervalued or that represent municipal market sectors that are undervalued. Underrated municipal bonds are those whose ratings do not, in Nuveen Advisory's opinion, reflect their true creditworthiness. Undervalued municipal bonds are bonds that, in Nuveen Advisory's opinion, are worth more than the value assigned to them in the marketplace. Nuveen Advisory may at times believe that bonds associated with a particular municipal market sector (for example, electric utilities), or issued by a particular municipal issuer, are undervalued. Nuveen Advisory may purchase such a bond for the Fund's portfolio because it represents a market sector or issuer that Nuveen Advisory considers undervalued, even if the value of the particular bond is consistent with the value of similar bonds. Municipal bonds of particular types or purposes (e.g., hospital bonds, industrial revenue bonds or bonds issued by a particular municipal issuer) may be undervalued because there is a temporary excess of supply in that market sector, or because of a general decline in the market price of municipal bonds of the market sector for reasons that do not apply to the particular municipal bonds that are considered undervalued. The Fund's investment in underrated or undervalued municipal bonds will be based on Nuveen Advisory's belief that their yield is higher than that available on bonds bearing equivalent levels of interest rate risk, credit risk and other forms of risk, and that their prices will ultimately rise (relative to the market) to reflect their true value.

The Fund has not established any limit on the percentage of its portfolio investments that may be invested in municipal bonds subject to the federal alternative minimum tax provisions of federal tax law, and the Fund expects that a substantial portion of the current income it produces will be includable in alternative minimum taxable income. Special considerations apply to corporate investors. See "Tax Matters."

Also included within the general category of municipal bonds described in the Fund's Prospectus are participations in lease obligations or installment purchase contract obligations (hereinafter collectively called "Municipal Lease Obligations") of municipal authorities or entities. Although a Municipal Lease Obligation does not constitute a general obligation of the municipality for which the municipality's taxing power is pledged, a Municipal Lease Obligation is ordinarily backed by the municipality's covenant to budget for, appropriate and make the payments due under the Municipal Lease Obligation. However, certain Municipal Lease Obligations contain "non-appropriation" clauses which provide that the municipality has no obligation to make lease or installment purchase payments in future years unless money is appropriated for such purpose on a yearly basis. In the case of a "non-appropriation" lease, the Fund's ability to recover under the lease in the event of non-appropriation or default will be limited solely to the repossession of the leased property, without recourse to the general credit of the lessee, and disposition or releasing of the property might prove difficult. In order to reduce this risk, the Fund will only

13

purchase Municipal Lease Obligations where Nuveen Advisory believes the issuer has a strong incentive to continue making appropriations until maturity.

Upon Nuveen Advisory's recommendation, during temporary defensive periods and in order to keep the Fund's cash fully invested, including the period during which the net proceeds of the offering of Common Shares or MuniPreferred Shares

are being invested, the Fund may deviate from its investment objectives and may invest up to 100% of its Managed Assets in short-term investments including high quality, short-term securities that may be either tax-exempt or taxable. To the extent the Fund invests in taxable short-term investments, the Fund will not at such times be in a position to achieve that portion of its investment objective of seeking current income exempt from regular federal income tax. For further information, see, "Short-Term Investments" below.

Obligations of issuers of municipal bonds are subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors, such as the Bankruptcy Reform Act of 1978. In addition, the obligations of such issuers may become subject to the laws enacted in the future by Congress, state legislatures or referenda extending the time for payment of principal or interest, or both, or imposing other constraints upon enforcement of such obligations or upon municipalities to levy taxes. There is also the possibility that, as a result of legislation or other conditions, the power or ability of any issuer to pay, when due, the principal of and interest on its municipal bonds may be materially affected.

The Fund also may invest up to 10% of its net assets in securities of other open or closed-end investment companies that invest primarily in municipal bonds of the type in which the Fund may invest directly. The Fund will generally select obligations which may not be redeemed at the option of the issuer for approximately seven to nine years.

14

Short-Term Investments

Short-Term Taxable Fixed Income Securities

For temporary defensive purposes or to keep cash on hand fully invested, the Fund may invest up to 100% of its net assets in cash equivalents and short-term taxable fixed-income securities, although the Fund intends to invest in taxable short-term investments only in the event that suitable tax-exempt short-term investments are not available at reasonable prices and yields. Short-term taxable fixed income investments are defined to include, without limitation, the following:

(1) U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest that are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities. U.S. government agency securities include securities issued by (a) the Federal Housing Administration, Farmers Home Administration, Export-Import Bank of the United States, Small Business Administration, and the Government National Mortgage Association, whose securities are supported by the full faith and credit of the United States; (b) the Federal Home Loan Banks, Federal Intermediate Credit Banks, and the Tennessee Valley Authority, whose securities are supported by the right of the agency to borrow from the U.S. Treasury; (c) the Federal National Mortgage Association, whose securities are supported by the discretionary authority of the U.S. government to purchase certain obligations of the agency or instrumentality; and (d) the Student Loan Marketing Association, whose securities are supported only by its credit. While the U.S. government provides financial support to such U.S. government-sponsored agencies or instrumentalities, no assurance can be given that it always will do so since it is not so obligated by law. The U.S. government, its agencies, and instrumentalities do not guarantee the market value of their securities. Consequently, the value of such securities may fluctuate.

(2) Certificates of Deposit issued against funds deposited in a bank or a savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return, and are normally negotiable. The issuer of a certificate of deposit agrees to pay the amount deposited plus interest to the bearer of the certificate on the date specified thereon. Under current FDIC regulations, the maximum insurance payable as to any one certificate of deposit is \$100,000; therefore, certificates of deposit purchased by the Fund may not be fully insured.

(3) Repurchase agreements, which involve purchases of debt securities. At the time the Fund purchases securities pursuant to a repurchase agreement, it simultaneously agrees to resell and redeliver such securities to the seller, who also simultaneously agrees to buy back the securities at a fixed price and time. This assures a predetermined yield for the Fund during its holding period, since the resale price is always greater than the purchase price and reflects an agreed-upon market rate. Such actions afford an opportunity for the Fund to invest

15

temporarily available cash. The Fund may enter into repurchase agreements only with respect to obligations of the U.S. government, its agencies or instrumentalities; certificates of deposit; or bankers' acceptances in which the Fund may invest. Repurchase agreements may be considered loans to the seller, collateralized by the underlying securities. The risk to the Fund is limited to the ability of the seller to pay the agreed-upon sum on the repurchase date; in the event of default, the repurchase agreement provides that the Fund is entitled to sell the underlying collateral. If the seller defaults under a repurchase agreement when the value of the underlying collateral is less than the repurchase price, the Fund could incur a loss of both principal and interest. The investment adviser monitors the value of the collateral at the time the action is entered into and at all times during the term of the repurchase agreement. The Fund's investment adviser does so in an effort to determine that the value of the collateral always equals or exceeds the agreed-upon repurchase price to be paid to the Fund. If the seller were to be subject to a federal bankruptcy proceeding, the ability of the Fund to liquidate the collateral could be delayed or impaired because of certain provisions of the bankruptcy laws.

(4) Commercial paper, which consists of short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between the Fund and a corporation. There is no secondary market for such notes. However, they are redeemable by the Fund at any time. Nuveen Advisory will consider the financial condition of the corporation (e.g., earning power, cash flow, and other liquidity measures) and will continuously monitor the corporation's ability to meet all of its financial obligations, because the Fund's liquidity might be impaired if the corporation were unable to pay principal and interest on demand. Investments in commercial paper will be limited to commercial paper rated in the highest categories by a major rating agency and which mature within one year of the date of purchase or carry a variable or floating rate of interest.

Short-Term Tax-Exempt Fixed Income Securities

Short-term tax-exempt fixed-income securities are securities that are exempt from regular federal income tax and mature within three years or less

from the date of issuance. Short-term tax-exempt fixed income securities are defined to include, without limitation, the following:

Bond Anticipation Notes ("BANs") are usually general obligations of state and local governmental issuers which are sold to obtain interim financing for projects that will eventually be funded through the sale of long-term debt obligations or bonds. The ability of an issuer to meet its obligations on its BANs is primarily dependent on the issuer's access to the long-term municipal bond market and the likelihood that the proceeds of such bond sales will be used to pay the principal and interest on the BANs.

16

Tax Anticipation Notes ("TANs") are issued by state and local governments to finance the current operations of such governments. Repayment is generally to be derived from specific future tax revenues. TANs are usually general obligations of the issuer. A weakness in an issuer's capacity to raise taxes due to, among other things, a decline in its tax base or a rise in delinquencies, could adversely affect the issuer's ability to meet its obligations on outstanding TANs.

Revenue Anticipation Notes ("RANs") are issued by governments or governmental bodies with the expectation that future revenues from a designated source will be used to repay the notes. In general, they also constitute general obligations of the issuer. A decline in the receipt of projected revenues, such as anticipated revenues from another level of government, could adversely affect an issuer's ability to meet its obligations on outstanding RANs. In addition, the possibility that the revenues would, when received, be used to meet other obligations could affect the ability of the issuer to pay the principal and interest on RANs.

Construction Loan Notes are issued to provide construction financing for specific projects. Frequently, these notes are redeemed with funds obtained from the Federal Housing Administration.

Bank Notes are notes issued by local government bodies and agencies, such as those described above to commercial banks as evidence of borrowings. The purposes for which the notes are issued are varied but they are frequently issued to meet short-term working capital or capital-project needs. These notes may have risks similar to the risks associated with TANs and RANs.

Tax-Exempt Commercial Paper ("Municipal Paper") represents very short-term unsecured, negotiable promissory notes issued by states, municipalities and their agencies. Payment of principal and interest on issues of municipal paper may be made from various sources, to the extent the funds are available therefrom. Maturities of municipal paper generally will be shorter than the maturities of TANs, BANs or RANs. There is a limited secondary market for issues of Municipal Paper.

Certain municipal bonds may carry variable or floating rates of interest whereby the rate of interest is not fixed but varies with changes in specified market rates or indices, such as a bank prime rate or a tax-exempt money market index.

While the various types of notes described above as a group represent the major portion of the short-term tax-exempt note market, other types of notes are available in the marketplace and the Fund may invest in such other types of notes to the extent permitted under its investment objectives, policies and limitations. Such notes may be issued for different purposes and may be secured differently from those mentioned above.

Hedging Strategies

The Fund may periodically engage in hedging transactions. Hedging is a term used for various methods of seeking to preserve portfolio capital value by offsetting price changes in one investment through making another investment whose price should tend to move in the opposite direction. It may be desirable and possible in various market environments to partially hedge the portfolio against fluctuations in market value due to interest rate fluctuations by investment in

17

financial futures and index futures as well as related put and call options on such instruments. Both parties entering into an index or financial futures contract are required to post an initial deposit of 1% to 5% of the total contract price. Typically, option holders enter into offsetting closing transactions to enable settlement in cash rather than take delivery of the position in the future of the underlying security. The Fund will only sell covered futures contracts, which means that the Fund segregates assets equal to the amount of the obligations.

These transactions present certain risks. In particular, the imperfect correlation between price movements in the futures contract and price movements in the securities being hedged creates the possibility that losses on the hedge by a Fund may be greater than gains in the value of the securities in the Fund's portfolio. In addition, futures and options markets may not be liquid in all circumstances. As a result, in volatile markets, the Fund may not be able to close out the transaction without incurring losses substantially greater than the initial deposit. Finally, the potential deposit requirements in futures contracts create an ongoing greater potential financial risk than do options transactions, where the exposure is limited to the cost of the initial premium. Losses due to hedging transactions will reduce yield. Net gains, if any, from hedging and other portfolio transactions will be distributed as taxable distributions to shareholders. The Fund will not make any investment (whether an initial premium or deposit or a subsequent deposit) other than as necessary to close a prior investment if, immediately after such investment, the sum of the amount of its premiums and deposits would exceed 5% of the Fund's net assets. The Fund will invest in these instruments only in markets believed by Nuveen Advisory to be active and sufficiently liquid. Successful implementation of most hedging strategies would generate taxable income, and the Fund has no present intention to use these strategies. For further information regarding these investment strategies and risks presented thereby, see Appendix C to this Statement of Additional Information.

Factors Pertaining to Georgia

Factors pertaining to Georgia are set forth in Appendix D.

OTHER INVESTMENT POLICIES AND TECHNIQUES

Illiquid Securities

The Fund may invest in illiquid securities (i.e., securities that are not readily marketable), including, but not limited to, restricted securities (securities the disposition of which is restricted under the federal securities laws), securities that may be resold only pursuant to Rule 144A under the Securities Act of 1933, as amended (the "Securities Act"); and repurchase agreements with maturities in excess of seven days.

Restricted securities may be sold only in privately negotiated transactions or in a public offering with respect to which a registration statement is in effect under the Securities Act. Where registration is required, the Fund may be obligated to pay all or part of the registration expenses and a considerable period may elapse between the time of the decision to sell and the time the Fund may be permitted to sell a security under an effective registration statement. If, during such a period, adverse market conditions were to develop, the Fund might obtain a less favorable price than that which prevailed when it decided to sell. Illiquid securities will be priced at a fair value as determined in good faith by the Board of Trustees or its delegate.

Portfolio Trading and Turnover Rate

Portfolio trading may be undertaken to accomplish the investment objectives of the Fund in relation to actual and anticipated movements in interest rates. In addition, a security may be sold and another of comparable quality purchased at approximately the same time to take advantage of what Nuveen Advisory believes to be a temporary price disparity between the two securities. Temporary price disparities between two comparable securities may result from supply and demand imbalances where, for example, a temporary oversupply of certain bonds may cause a temporarily low price for such bonds, as compared with other bonds of like quality and characteristics. The Fund may also engage to a limited extent in short-term trading consistent with its investment objectives. Securities may be sold in anticipation of a market decline (a rise in interest rates) or purchased in anticipation of a market rise (a decline in interest rates) and later sold, but the Fund will not engage in trading solely to recognize a gain.

Subject to the foregoing, the Fund will attempt to achieve its investment objectives by prudent selection of municipal bonds with a view to holding them for investment. While there can be no assurance thereof, the Fund anticipates that its annual portfolio turnover rate will generally not exceed 100%. However, the rate of turnover will not be a limiting factor when the Fund deems it desirable to sell or purchase securities. Therefore, depending upon market conditions, the annual portfolio turnover rate of the Fund may exceed 100% in particular years.

Other Investment Companies

The Fund may invest in securities of other open or closed-end investment companies that invest primarily in municipal bonds of the types in which the Fund may invest directly. The Fund generally expects to invest in other investment companies either during periods when it has large amounts of uninvested cash, such as the period shortly after the Fund receives the proceeds of the offering of its Common Shares or MuniPreferred Shares, or during periods when there is a shortage of attractive, high-yielding municipal bonds available in the market. As a stockholder in an investment company, the Fund will bear its ratable share of that investment company's expenses and would remain subject to payment of the Fund's management, advisory and administrative fees with respect to assets so invested. Common Shareholders would therefore be subject to duplicative expenses to the extent the Fund invests in other investment companies. Nuveen Advisory will take expenses into account when evaluating the investment merits of an investment in the investment company relative to available municipal bond investments. In addition, the securities of other investment companies may also be leveraged and will therefore be subject to the same leverage risks described herein. As described in the Fund's Prospectus in the section entitled "Risks," the net asset value and market value of leveraged shares will be more

volatile and the yield to shareholders will tend to fluctuate more than the yield generated by unleveraged shares.

When-Issued and Delayed Delivery Transactions

The Fund may buy and sell municipal bonds on a when-issued or delayed delivery basis, making payment or taking delivery at a later date, normally within 15-45 days of the trade date. On such transactions the payment obligation and the interest rate are fixed at the time the buyer enters into the commitment. Beginning on the date the Fund enters into a commitment to purchase securities on a when-issued or delayed delivery basis, the Fund is required under rules of the Commission to maintain in a separate account liquid assets, consisting of cash, cash equivalents or liquid securities having a market value at all times of at least equal to the amount of the commitment. Income generated by any such assets which provide taxable income for federal income tax purposes is includable in the taxable income of the Fund. The Fund may enter into contracts to purchase municipal bonds on a forward basis (i.e., where settlement will occur more than 60 days from the date of the transaction) only to the extent that the Fund specifically collateralizes such obligations with a security that is expected to be called or mature within sixty days before or after the settlement date of the forward transaction. The commitment to purchase securities on a when-issued, delayed delivery or forward basis may involve an element of risk because no interest accrues on the bonds prior to settlement and at the time of delivery the market value may be less than cost.

Repurchase Agreements

As temporary investments, the Fund may invest in repurchase agreements. A repurchase agreement is a contractual agreement whereby the seller of securities (U.S. Government securities or municipal bonds) agrees to repurchase the same security at a specified price on a future date agreed upon by the parties. The agreed-upon repurchase price determines the yield during the Fund's holding period. Repurchase agreements are considered to be loans collateralized by the underlying security that is the subject of the repurchase contract. Income generated from transactions in repurchase agreements will be taxable. See "Tax Matters" for information relating to the allocation of taxable income between Common Shares and MuniPreferred Shares, if any. The Fund will only enter into repurchase agreements with registered securities dealers or domestic banks that, in the opinion of Nuveen Advisory, present minimal credit risk. The risk to the Fund is limited to the ability of the issuer to pay the agreed-upon repurchase price on the delivery date; however, although the value of the underlying collateral at the time the transaction is entered into always equals or exceeds the agreed-upon repurchase price, if the value of the collateral declines there is a risk of loss of both principal and interest. In the event of default, the collateral may be sold but the Fund might incur a loss if the value of the collateral declines, and might incur disposition costs or experience delays in connection with liquidating the collateral. In addition, if bankruptcy proceedings are commenced with respect to the seller of the security, realization upon the collateral by the Fund may be delayed or limited. Nuveen Advisory will monitor the value of the collateral at the time the transaction is entered into and at all times subsequent during the term of the repurchase agreement in an effort to determine that such value always equals or exceeds the agreed-upon repurchase price. In the event the value of the collateral declines below the repurchase price, Nuveen Advisory will

demand additional collateral from the issuer to increase the value of the collateral to at least that of the repurchase price, including interest.

Zero Coupon Bonds

The Fund may invest in zero coupon bonds. A zero coupon bond is a bond that does not pay interest for its entire life. When held to its maturity, its return comes from the difference between purchase price and its maturity value. The market prices of zero coupon bonds are affected to a greater extent by changes in prevailing levels of interest rates and thereby tend to be more volatile in price than securities that pay interest periodically and may be more speculative than such securities. In addition, because the Fund accrues income with respect to these securities prior to the receipt of such interest, it may have to dispose of portfolio securities under disadvantageous circumstances in order to obtain cash needed to pay income dividends in amounts necessary to avoid unfavorable tax consequences.

MANAGEMENT OF THE FUND

Trustees and Officers

The management of the Fund, including general supervision of the duties performed for the Fund under the Management Agreement, is the responsibility of the Board of Trustees of the Fund. The number of trustees of the Fund is currently set at seven. None of the trustees who are not "interested" persons of the Fund has ever been a director or employee of, or consultant to, Nuveen or its affiliates. The names and business addresses of the trustees and officers of the Fund, their principal occupations and other affiliations during the past five years, the number of portfolios each oversees and other directorships they hold are set forth below.

Name, Birthdate ----- and Address -----	Positions and ----- Offices with the ----- Fund and Year ----- First Elected ----- or Appointed -----	Principal Occupations ----- Including Other Directorships ----- During Past Five Years -----
Trustee who is an interested person of the Fund: -----		
Timothy R. Schwertfeger* 3/28/49 333 West Wacker Drive Chicago, IL 60606	Chairman of the Board, President and Trustee 2002	Chairman and Director (since 1996) of The John Nuveen Company, Nuveen Investments, Nuveen Advisory Corp. and Nuveen Institutional Advisory Corp.; prior thereto, Executive Vice President and Director of The John Nuveen Company and Nuveen Investments; Director (since 1992) and Chairman (since 1996) of Nuveen Advisory Corp. and Nuveen Institutional

The Board of Trustees has five standing committees: the executive committee, the audit committee, the nominating and governance committee, the dividend committee and the valuation committee. Because the fund is newly organized, none of the committees have met during the Fund's last fiscal year. The executive committee met once prior to the commencement of the Fund's operations.

Peter R. Sawers and Timothy R. Schwertfeger, Chair, serve as members of the executive committee of the Board of Trustees of the Fund. The executive committee, which meets between regular meetings of the Board of Trustees, is authorized to exercise all of the powers of the Board of Trustees.

The audit committee monitors the accounting and reporting policies and practices of the Funds, the quality and integrity of the financial statements of the Funds, compliance by the Funds with legal and regulatory requirements and the independence and performance of the external and internal auditors. The members of the audit committee are William J. Schneider, Chair, Robert P. Bremner, Lawrence H. Brown, Anne E. Impellizzeri, Peter R. Sawers and Judith M. Stockdale.

The nominating and governance committee is responsible for Board selection and tenure; selection and review of committees; and Board education and operations. In addition, the committee monitors performance of legal counsel and other service providers; periodically reviews and makes recommendations about any appropriate changes to trustee compensation; and has the resources and authority to discharge its responsibilities--including retaining special counsel and other experts or consultants at the expense of the Fund. In the event of a vacancy on the Board, the nominating and governance committee receives suggestions from various sources as to suitable candidates. Suggestions should be sent in writing to Lorna Ferguson, Vice President for Board Relations, Nuveen Investments, 333 West Wacker Drive, Chicago, IL 60606. The nominating and governance committee sets appropriate standards and requirements for nominations for new trustees and reserves the right to interview all candidates and to make the final selection of any new trustees. The members of the nominating and governance committee are Anne E. Impellizzeri, Chair, Robert P. Bremner, Lawrence H. Brown, Peter R. Sawers, William J. Schneider and Judith M. Stockdale.

The dividend committee is authorized to declare distributions on the Fund's

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

shares including, but not limited to regular and special dividends, capital gains and ordinary income distributions. The members of the dividend committee are Timothy R. Schwertfeger, Chair, and Lawrence H. Brown.

The valuation committee oversees the Fund's Pricing Procedures including, but not limited to, the review and approval of fair value pricing determinations made by Nuveen's Valuation Group. The members of the valuation committee are Judith M. Stockdale and Lawrence H. Brown.

The trustees of the Fund are also directors or trustees, as the case may be, of 30 Nuveen open-end funds and 82 Nuveen closed-end funds advised by Nuveen Advisory Corp. Mr. Schwertfeger is a director or trustee, as the case may be, of 18 Nuveen open-end and closed-end funds advised by Nuveen Institutional Advisory Corp. None of the independent trustees, nor any of their immediate family members, has ever been a director, officer, or employee of, or a consultant to, Nuveen Advisory, Nuveen or their affiliates.

25

The Common Shareholders of the Fund will elect trustees at the next annual meeting of Common Shareholders, unless any MuniPreferred Shares are outstanding at that time, in which event holders of MuniPreferred Shares, voting as a separate class, will elect two trustees and the remaining trustees shall be elected by Common Shareholders and holders of MuniPreferred Shares, voting together as a single class. Holders of MuniPreferred Shares will be entitled to elect a majority of the Fund's trustees under certain circumstances. See "Description of Shares - MuniPreferred Shares - Voting Rights."

The following table sets forth the dollar range of equity securities beneficially owned by each trustee as of December 31, 2001:

Name of Trustee	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies
Robert P. Bremner	\$ 0	over \$100,000
Lawrence H. Brown	\$ 0	over \$100,000
Anne E. Impellizzeri	\$ 0	over \$100,000
Peter R. Sawers	\$ 0	over \$100,000
William J. Schneider	\$ 0	over \$100,000
Timothy R. Schwertfeger	\$ 0	over \$100,000
Judith M. Stockdale	\$ 0	over \$100,000

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

No trustee who is not an interested person of the Fund owns beneficially or of record, any security of Nuveen Advisory, Nuveen or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with Nuveen Advisory or Nuveen.

The following table sets forth estimated compensation to be paid by the Fund projected during the Fund's first full fiscal year after commencement of operation. The Fund does not have a retirement or pension plan. The officers and trustees affiliated with Nuveen serve without any compensation from the Fund. The Fund has a deferred compensation plan (the "Plan") that permits any trustee who is not an "interested person" of the Fund to elect to defer receipt of all or a portion of his or her compensation as a trustee. The deferred compensation of a participating trustee is credited to a book reserve account of the Trust when the compensation would otherwise have been paid to the trustee. The value of the trustee's deferral account at any time is equal to the value that the account would have had if contributions to the account had been invested and reinvested in shares of one or more of the eligible Nuveen funds. At the time for commencing distributions from a trustee's deferral account, the trustee may elect to receive distributions in a lump sum or over a period of five years. The Fund will not be liable for any other fund's obligations to make distributions under the Plan.

Name of Trustee	Estimated Aggregate Compensation From the Fund*	Total Compensation from Fund and Fund Complex**	Amount of Total Compensation that Has Been Deferred
Robert P. Bremner	\$74	\$ 72,500	\$ 8,280
Lawrence H. Brown	\$76	\$ 78,500	\$ 0
Anne E. Impellizzeri	\$74	\$ 72,500	\$55,200
Peter R. Sawers	\$74	\$ 73,000	\$54,788
William J. Schneider	\$74	\$ 72,500	\$55,200
Judith M. Stockdale	\$74	\$ 72,500	\$13,800

26

* Based on the estimated compensation to be earned by the independent trustees for the period from inception through the end of the Fund's first full fiscal year for services to the Fund.

**Based on the compensation paid to the trustees for the one year period ending 12/31/01 for services to the open-end and closed-end funds advised by Nuveen Advisory.

The Fund has no employees. Its officers are compensated by Nuveen Advisory or The John Nuveen Company.

INVESTMENT ADVISER

Nuveen Advisory acts as investment adviser to the Fund, with responsibility for the overall management of the Fund. Its address is 333 West Wacker Drive, Chicago, Illinois 60606. Nuveen Advisory is also responsible for managing the Fund's business affairs and providing day-to-day administrative services to the Fund. For additional information regarding the management services performed by Nuveen Advisory, see "Management of the Fund" in the Fund's Prospectus.

Nuveen Advisory is a wholly owned subsidiary of The John Nuveen Company. Founded in 1898, The John Nuveen Company brings over a century of expertise to the municipal bond market. According to data from Thomson Wealth Management, Nuveen is the leading sponsor of exchange-traded municipal bond funds as measured by number of funds (87) and fund assets under management (\$33 billion) as of July 31, 2002. Overall, The John Nuveen Company and its affiliates had over \$74 billion in assets under management or surveillance as of July 31, 2002. The John Nuveen Company is approximately 77% owned by The St. Paul Companies, Inc. ("St. Paul"). St. Paul is a publicly-traded company

27

located in St. Paul, Minnesota, and is principally engaged in providing property-liability insurance through subsidiaries.

Nuveen, an operating unit of The John Nuveen Company, provides investment management services for advisors serving high-net-worth clients and institutional clients. Nuveen markets its capabilities -- which include tax-free investing, separately-managed accounts and market-neutral alternative investment portfolios -- under three distinct brands: Nuveen, Rittenhouse, NWQ, and Symphony. In total, Nuveen manages approximately \$76 billion in assets. The John Nuveen Company is listed on The New York Stock Exchange and trades under the symbol "JNC".

Pursuant to an investment management agreement between Nuveen Advisory and the Fund, the Fund has agreed to pay for the services and facilities provided by Nuveen Advisory an annual management fee, payable on a monthly basis, according to the following schedule:

Average Daily Managed Assets	Management Fee
-----	-----
Up to \$125 million.....	.6500%
\$125 million to \$250 million.....	.6375%
\$250 million to \$500 million.....	.6250%
\$500 million to \$1 billion.....	.6125%
\$1 billion to \$2 billion.....	.6000%
\$2 billion and over.....	.5750%

If the Fund utilizes leverage through the issuance of MuniPreferred Shares in an amount equal to 35% of the Fund's total assets (including the amount obtained from leverage), the management fee calculated as a percentage of net

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

assets attributable to Common Shares would be as follows:

Net Assets Attributable to Common Shares -----	Management Fee -----
Up to \$125 million.....	1.0000%
\$125 million to \$250 million.....	.9808%
\$250 million to \$500 million.....	.9615%
\$500 million to \$1 billion.....	.9423%
\$1 billion to \$2 billion.....	.9231%
\$2 billion and over.....	.8846%

In addition to the fee of Nuveen Advisory, the Fund pays all other costs and expenses of its operations, including compensation of its trustees (other than those affiliated with Nuveen Advisory), custodian, transfer agency and dividend disbursing expenses, legal fees, expenses of independent auditors, expenses of repurchasing shares, expenses of issuing MuniPreferred Shares, expenses of preparing, printing and distributing shareholder reports, notices, proxy statements and reports to governmental agencies and taxes, if any. All fees and expenses are accrued daily and deducted before payment of dividends to investors.

For the first eight full years of the Fund's operation, Nuveen Advisory has contractually agreed to reimburse the Fund for fees and expenses in the amounts, and for the time periods, set forth below:

Year Ending September 30	Percentage Reimbursed (as a percentage of Managed Assets)	Year Ending September 30	Percentage Reimbursed (as a percentage of Managed Assets)
2002(1)	.32%	2008	.24%
2003	.32%	2009	.16%
2004	.32%	2010	.08%
2005	.32%		
2006	.32%		
2007	.32%		

(1) From the commencement of operations.

Reducing Fund expenses in this manner will tend to increase the amount of income available for the Common Shareholders. Nuveen Advisory has not agreed to reimburse the Fund for any portion of its fees and expenses beyond September 30, 2010.

Unless earlier terminated as described below, the Fund's investment management agreement with Nuveen Advisory (the "management agreement") will remain in effect until July 1, 2003. The management agreement continues in effect from year to year so long as such continuation is approved at least

annually by (1) the Board of Trustees or the vote of a majority of the outstanding voting securities of the Fund, and (2) a majority of the trustees who are not interested persons of any party to the investment management agreement, cast in person at a meeting called for the purpose of voting on such approval. The investment management agreement may be terminated at any time, without penalty, by either the Fund or Nuveen Advisory upon 60 days written notice, and is automatically terminated in the event of its assignment as defined in the 1940 Act.

The management agreement has been approved by a majority of the independent trustees of the Fund and the sole shareholder of the Fund. The independent trustees have determined that the terms of the Fund's management agreement are fair and reasonable and that the agreement is in the Fund's best interests. The independent trustees believe that the management agreement will enable the Fund to obtain high quality investment management services at a cost that they deem appropriate, reasonable, and in the best interests of the Fund and its shareholders. In making such determination, the independent trustees met independently from the interested trustee of the Fund and any officers of Nuveen Advisory and its affiliates. The independent trustees also relied upon the assistance of counsel to the independent trustees.

In evaluating the investment management agreement, the independent trustees reviewed materials furnished by Nuveen Advisory, including information regarding Nuveen Advisory, its affiliates and its personnel, operations and financial condition. The independent trustees discussed with representatives of Nuveen Advisory the Fund's operations and Nuveen Advisory's ability to provide advisory and other services to the Fund. The independent trustees also reviewed, among other things, the nature and quality of services to be provided by Nuveen Advisory, the proposed fees to be charged by Nuveen Advisory for investment management services, the profitability to Nuveen Advisory of its relationship with the Fund, fall-out benefits to Nuveen Advisory from that relationship, economies of scale achieved by Nuveen Advisory, the experience of the investment advisory and other personnel providing services to the Fund, the historical quality of the services provided by Nuveen Advisory and comparative fees and expense ratios of investment companies with similar objectives and strategies managed by other investment advisers, and other factors that the independent trustees deemed relevant.

The Fund, Nuveen Advisory, Nuveen, Salomon Smith Barney and other related entities have adopted codes of ethics which essentially prohibit certain of their personnel, including the Nuveen fund portfolio manager, from engaging in personal investments which compete or interfere with, or attempt to take advantage of a client's, including the Fund's, anticipated or actual portfolio transactions, and are designed to assure that the interests of clients, including Fund shareholders, are placed before the interests of personnel in connection with personal investment transactions. Text-only versions of the codes of ethics of the Fund, Nuveen Advisory and Nuveen can be viewed online or downloaded from the EDGAR Database on the SEC's internet web site at www.sec.gov. You may also review and copy those documents by visiting the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling the SEC at 202-942-8090. In addition, copies of the codes of ethics may be obtained, after mailing the appropriate duplicating fee, by writing to the SEC's Public Reference Section, 450 5th Street, N.W., Washington, DC 20549-0102 or by e-mail request at publicinfo@sec.gov.

PORTFOLIO TRANSACTIONS

Nuveen Advisory is responsible for decisions to buy and sell securities for the Fund and for the placement of the Fund's securities business, the negotiation of the prices to be paid for principal trades and the allocation of its transactions among various dealer firms. Portfolio securities will normally

be purchased directly from an underwriter or in the over-the-counter market from the principal dealers in such securities, unless it appears that a better price or

28

execution may be obtained through other means. Portfolio securities will not be purchased from Nuveen or its affiliates except in compliance with the 1940 Act.

The Fund expects that substantially all portfolio transactions will be effected on a principal (as opposed to an agency) basis and, accordingly, does not expect to pay any brokerage commissions. Purchases from underwriters will include a commission or concession paid by the issuer to the underwriter, and purchases from dealers will include the spread between the bid and asked price. On occasion, the Fund may clear portfolio transactions through Nuveen. It is the policy of Nuveen Advisory to seek the best execution under the circumstances of each trade. Nuveen Advisory evaluates price as the primary consideration, with the financial condition, reputation and responsiveness of the dealer considered secondary in determining best execution. Given the best execution obtainable, it will be Nuveen Advisory's practice to select dealers which, in addition, furnish research information (primarily credit analyses of issuers and general economic reports) and statistical and other services to Nuveen Advisory. It is not possible to place a dollar value on information and statistical and other services received from dealers. Since it is only supplementary to Nuveen Advisory's own research efforts, the receipt of research information is not expected to reduce significantly Nuveen Advisory's expenses. While Nuveen Advisory will be primarily responsible for the placement of the business of the Fund, the policies and practices of Nuveen Advisory in this regard must be consistent with the foregoing and will, at all times, be subject to review by the Board of Trustees of the Fund.

Nuveen Advisory may manage other investment accounts and investment companies for other clients which have investment objectives similar to those of the Fund. Subject to applicable laws and regulations, Nuveen Advisory seeks to allocate portfolio transactions equitably whenever concurrent decisions are made to purchase or sell securities by the Fund and another advisory account. In making such allocations the main factors to be considered will be the respective investment objectives, the relative size of portfolio holdings of the same or comparable securities, the availability of cash for investment and the size of investment commitments generally held. While this procedure could have a detrimental effect on the price or amount of the securities available to the Fund from time to time, it is the opinion of the Board of Trustees that the benefits available from Nuveen Advisory's organization will outweigh any disadvantage that may arise from exposure to simultaneous transactions.

DISTRIBUTIONS

As described in the Fund's Prospectus, initial distributions to Common Shareholders are expected to be declared approximately 45 days, and paid approximately 60 to 90 days, from the completion of the offering of the Common Shares, depending on market conditions. To permit the Fund to maintain a

29

more stable monthly distribution, the Fund will initially (prior to its first

distribution), and may from time to time thereafter, distribute less than the entire amount of net investment income earned in a particular period. Such undistributed net investment income would be available to supplement future distributions, including distributions that might otherwise have been reduced by a decrease in the Fund's monthly net income due to fluctuations in investment income or expenses, or due to an increase in the dividend rate on the Fund's outstanding MuniPreferred Shares. As a result, the distributions paid by the Fund for any particular period may be more or less than the amount of net investment income actually earned by the Fund during such period. Undistributed net investment income will be added to the Fund's net asset value and, correspondingly, distributions from undistributed net investment income will be deducted from the Fund's net asset value.

For tax purposes, the Fund is currently required to allocate net capital gain and other taxable income, if any, between Common Shares and MuniPreferred Shares in proportion to total dividends paid to each class for the year in which such net capital gain or other taxable income is realized. For information relating to the impact of the issuance of MuniPreferred Shares on the distributions made by a Fund to Common Shareholders, see the Fund's Prospectus under "MuniPreferred Shares and Leverage."

While any MuniPreferred Shares are outstanding, the Fund may not declare any cash dividend or other distribution on its Common Shares unless at the time of such declaration (1) all accumulated dividends on the MuniPreferred Shares have been paid and (2) the net asset value of the Fund's portfolio (determined after deducting the amount of such dividend or other distribution) is at least 200% of the liquidation value of any outstanding MuniPreferred Shares. This latter limitation on the Fund's ability to make distributions on its Common Shares could under certain circumstances impair the ability of the Fund to maintain its qualification for taxation as a regulated investment company. See "Tax Matters."

DESCRIPTION OF SHARES

Common Shares

The Fund's Declaration of Trust (the "Declaration") authorizes the issuance of an unlimited number of Common Shares. The Common Shares being offered have a par value of \$0.01 per share and, subject to the rights of holders of MuniPreferred Shares, if issued, have equal rights as to the payment of dividends and the distribution of assets upon liquidation of the Fund. The Common Shares being offered will, when issued, be fully paid and, subject to matters discussed in "Certain Provisions in the Declaration of Trust," non-assessable, and will have no pre-emptive or conversion rights or rights to cumulative voting. At any time when the Fund's MuniPreferred Shares are outstanding, Common Shareholders will not be entitled to receive any cash distributions from the Fund unless all accrued dividends on MuniPreferred Shares have been paid, and unless asset coverage (as defined in the 1940 Act) with respect to MuniPreferred Shares would be at least 200% after giving effect to such distributions. See "MuniPreferred Shares" below.

The Common Shares have been approved for listing on the American Stock Exchange, subject to notice of issuance. The Fund intends to hold annual meetings of shareholders so long as the Common Shares are listed on a national securities exchange and such meetings are required as a condition to such listing.

Shares of closed-end investment companies may frequently trade at prices lower than net asset value. Shares of closed-end investment companies like the Fund that invest predominately in investment grade municipal bonds have during some periods traded at prices higher than net asset value and during other periods have traded at prices lower than net asset value. There can be no assurance that Common Shares or shares of other municipal funds will trade at a price higher than net asset value in the future. Net asset value will be reduced immediately following the offering after payment of the sales load and organization and offering expenses. Net asset value generally increases when interest rates decline, and decreases when interest rates rise, and these changes are likely to be greater in the case of a fund having a leveraged capital structure. Whether investors will realize gains or losses upon the sale of Common Shares will not depend upon a Fund's net asset value but will depend entirely upon whether the market price of the Common Shares at the time of sale is above or below the original purchase price for the shares. Since the market price of the Fund's Common Shares will be determined by factors beyond the control of the Fund, the Fund cannot predict whether the Common Shares will trade at, below, or above net asset value or at, below or above the initial public offering price. Accordingly, the Common Shares are designed primarily for long-term investors, and investors in the Common Shares should not view the Fund as a vehicle for trading purposes. See "Repurchase of Fund Shares; Conversion to Open-End Fund" and the Fund's Prospectus under "MuniPreferred Shares and Leverage" and "The Fund's Investments--Municipal Bonds."

MuniPreferred Shares

The Declaration authorizes the issuance of an unlimited number of MuniPreferred Shares in one or more classes or series, with rights as determined by the Board of Trustees of the Fund, by action of the Board of Trustees without the approval of the Common Shareholders.

The Fund's Board of Trustees has authorized an offering of MuniPreferred Shares (representing approximately 35% of the Fund's capital immediately after the time the MuniPreferred Shares are issued) within approximately one to three months after completion of the offering of Common Shares. The Board has stated that the initial series of MuniPreferred Shares would pay cumulative dividends at rates determined weekly by providing for the periodic redetermination of the dividend rate through an auction or remarketing procedure. The Board of Trustees of the Fund has indicated that the liquidation preference, preference on distribution, voting rights and redemption provisions of the MuniPreferred Shares will be as stated below.

Limited Issuance of MuniPreferred Shares. Under the 1940 Act, the Fund could issue MuniPreferred Shares with an aggregate liquidation value of up to one-half of the value of the Fund's total net assets, measured immediately after issuance of the MuniPreferred Shares. "Liquidation value" means the original purchase price of the shares being liquidated plus any accrued and unpaid dividends. In addition, the Fund is not permitted to declare any cash dividend or other distribution on its Common Shares unless the liquidation value of the MuniPreferred Shares is less than one-half of the value of the Fund's total net assets (determined after deducting the amount of such dividend or distribution) immediately after the distribution. If the Fund sells all the Common Shares and MuniPreferred Shares discussed in this Prospectus, the liquidation value of the MuniPreferred Shares is expected to be approximately 35% of the value of the Fund's total net assets. The Fund intends to purchase or redeem MuniPreferred Shares, if necessary, to keep that fraction below one-half.

Distribution Preference. The MuniPreferred Shares have complete priority over the Common Shares as to distribution of assets.

31

Liquidation Preference. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the affairs of the Fund, holders of MuniPreferred Shares will be entitled to receive a preferential liquidating distribution (expected to equal the original purchase price per share plus accumulated and unpaid dividends thereon, whether or not earned or declared) before any distribution of assets is made to holders of Common Shares. After payment of the full amount of the liquidating distribution to which they are entitled, holders of MuniPreferred Shares will not be entitled to any further participation in any distribution of assets by the Fund. A consolidation or merger of the Fund with or into any Massachusetts business trust or corporation or a sale of all or substantially all of the assets of the Fund shall not be deemed to be a liquidation, dissolution or winding up of the Fund.

Voting Rights. In connection with any issuance of MuniPreferred Shares, the Fund must comply with Section 18(i) of the 1940 Act which requires, among other things, that MuniPreferred Shares be voting shares and have equal voting rights with Common Shares. Except as otherwise indicated in this Statement of Additional Information and except as otherwise required by applicable law, holders of MuniPreferred Shares will vote together with Common Shareholders as a single class.

In connection with the election of the Fund's trustees, holders of MuniPreferred Shares, voting as a separate class, will be entitled to elect two of the Fund's trustees, and the remaining trustees shall be elected by Common Shareholders and holders of MuniPreferred Shares, voting together as a single class. In addition, if at any time dividends on the Fund's outstanding MuniPreferred Shares shall be unpaid in an amount equal to two full years' dividends thereon, the holders of all outstanding MuniPreferred Shares, voting as a separate class, will be entitled to elect a majority of the Fund's trustees until all dividends in arrears have been paid or declared and set apart for payment.

The affirmative vote of the holders of a majority of the Fund's outstanding MuniPreferred Shares of any class or series, as the case may be, voting as a separate class, will be required to, among other things, (1) take certain actions which would affect the preferences, rights, or powers of such class or series or (2) authorize or issue any class or series ranking prior to the MuniPreferred Shares. Except as may otherwise be required by law, (1) the affirmative vote of the holders of at least two-thirds of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class, will be required to approve any conversion of the Fund from a closed-end to an open-end investment company and (2) the affirmative vote of the holders of at least two-thirds of the outstanding MuniPreferred Shares, voting as a separate class, shall be required to approve any plan of reorganization (as such term is used in the 1940 Act) adversely affecting such shares, provided however, that such separate class vote shall be a majority vote if the action in question has previously been approved, adopted or authorized by the affirmative vote of two-thirds of the total number of Trustees fixed in accordance with the Declaration or the By-laws. The affirmative vote of the holders of a majority of the outstanding MuniPreferred Shares, voting as a separate class, shall be required to approve any action not described in the preceding sentence requiring a vote of security holders under Section 13(a) of the 1940 Act including, among other things, changes in a Fund's investment objectives or changes in the investment restrictions described as fundamental policies under "Investment

Objectives and Policies--Investment Restrictions." The class or series vote of holders of MuniPreferred Shares described

32

above shall in each case be in addition to any separate vote of the requisite percentage of Common Shares and MuniPreferred Shares necessary to authorize the action in question.

The foregoing voting provisions will not apply with respect to the Fund's MuniPreferred Shares if, at or prior to the time when a vote is required, such shares shall have been (1) redeemed or (2) called for redemption and sufficient funds shall have been deposited in trust to effect such redemption.

Redemption, Purchase and Sale of MuniPreferred Shares by the Fund. The terms of the MuniPreferred Shares provide that they are redeemable at certain times, in whole or in part, at the original purchase price per share plus accumulated dividends, that the Fund may tender for or purchase MuniPreferred Shares and that the Fund may subsequently resell any shares so tendered for or purchased. Any redemption or purchase of MuniPreferred Shares by the Fund will reduce the leverage applicable to Common Shares, while any resale of shares by the Fund will increase such leverage.

The discussion above describes the Fund's Board of Trustees' present intention with respect to an offering of MuniPreferred Shares. The terms of the MuniPreferred Shares may be the same as, or different from, the terms described above, subject to applicable law and the Fund's Declaration.

CERTAIN PROVISIONS IN THE DECLARATION OF TRUST

Under Massachusetts law, shareholders could, under certain circumstances, be held personally liable for the obligations of the Fund. However, the Declaration contains an express disclaimer of shareholder liability for debts or obligations of the Fund and requires that notice of such limited liability be given in each agreement, obligation or instrument entered into or executed by the Fund or the trustees. The Declaration further provides for indemnification out of the assets and property of the Fund for all loss and expense of any shareholder held personally liable for the obligations of the Fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which the Fund would be unable to meet its obligations. The Fund believes that the likelihood of such circumstances is remote.

The Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund or to convert the Fund to open-end status. Specifically, the Declaration requires a vote by holders of at least two-thirds of the Common Shares and MuniPreferred Shares, voting together as a single class, except as described below, to authorize (1) a conversion of the Fund from a closed-end to an open-end investment company, (2) a merger or consolidation of the Fund, or a series or class of the Fund, with any corporation, association, trust or other organization or a reorganization or recapitalization of the Fund, or a series or class of the Fund, (3) a sale, lease or transfer of all or substantially all of the Fund's assets (other than in the regular course of the Fund's investment activities), (4) in certain circumstances, a termination of the Fund, or a series or class of the Fund or (5) removal of trustees by shareholders, and then only for cause, unless, with respect to (1) through (4), such transaction has already been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-laws, in which case the affirmative vote of the holders of at least a majority of the Fund's Common Shares and

MuniPreferred Shares

33

outstanding at the time, voting together as a single class, is required, provided, however, that where only a particular class or series is affected (or, in the case of removing a trustee, when the trustee has been elected by only one class), the required vote only by the applicable class or series will be required. Approval of shareholders is not required, however, for any transaction, whether deemed a merger, consolidation, reorganization or otherwise whereby the Fund issues shares in connection with the acquisition of assets (including those subject to liabilities) from any other investment company or similar entity. None of the foregoing provisions may be amended except by the vote of at least two-thirds of the Common Shares and MuniPreferred Shares, voting together as a single class. In the case of the conversion of the Fund to an open-end investment company, or in the case of any of the foregoing transactions constituting a plan of reorganization which adversely affects the holders of MuniPreferred Shares, the action in question will also require the affirmative vote of the holders of at least two-thirds of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class, or, if such action has been authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or the By-laws, the affirmative vote of the holders of at least a majority of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class. The votes required to approve the conversion of the Fund from a closed-end to an open-end investment company or to approve transactions constituting a plan of reorganization which adversely affects the holders of MuniPreferred Shares are higher than those required by the 1940 Act. The Board of Trustees believes that the provisions of the Declaration relating to such higher votes are in the best interest of the Fund and its shareholders.

The provisions of the Declaration described above could have the effect of depriving the Common Shareholders of opportunities to sell their Common Shares at a premium over market value by discouraging a third party from seeking to obtain control of the Fund in a tender offer or similar transaction. The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control by a third party. They provide, however, the advantage of potentially requiring persons seeking control of a Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objectives and policies. The Board of Trustees of the Fund has considered the foregoing anti-takeover provisions and concluded that they are in the best interests of the Fund and its Common Shareholders.

Reference should be made to the Declaration on file with the Securities and Exchange Commission for the full text of these provisions.

The Declaration provides that the obligations of the Fund are not binding upon the trustees of the Fund individually, but only upon the assets and property of the Fund, and that the trustees shall not be liable for errors of judgment or mistakes of fact or law. Nothing in the Declaration, however, protects a trustee against any liability to which he would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office.

REPURCHASE OF FUND SHARES; CONVERSION TO OPEN-END FUND

The Fund is a closed-end investment company and as such its shareholders

will not have the right to cause the Fund to redeem their shares. Instead, the Fund's Common Shares will trade in the open market at a price that will be a function of several factors, including dividend levels (which are in turn affected by expenses), net asset value, call protection, price, dividend stability, relative demand for and supply of such shares in the market, general market and economic

34

conditions and other factors. Because shares of a closed-end investment company may frequently trade at prices lower than net asset value, the Fund's Board of Trustees has currently determined that, at least annually, it will consider action that might be taken to reduce or eliminate any material discount from net asset value in respect of Common Shares, which may include the repurchase of such shares in the open market or in private transactions, the making of a tender offer for such shares at net asset value, or the conversion of the Fund to an open-end investment company. There can be no assurance, however, that the Board of Trustees will decide to take any of these actions, or that share repurchases or tender offers, if undertaken, will reduce market discount.

Notwithstanding the foregoing, at any time when the Fund's MuniPreferred Shares are outstanding, the Fund may not purchase, redeem or otherwise acquire any of its Common Shares unless (1) all accrued MuniPreferred Shares dividends have been paid and (2) at the time of such purchase, redemption or acquisition, the net asset value of the Fund's portfolio (determined after deducting the acquisition price of the Common Shares) is at least 200% of the liquidation value of the outstanding MuniPreferred Shares (expected to equal the original purchase price per share plus any accrued and unpaid dividends thereon). The staff of the Securities and Exchange Commission currently requires that any tender offer made by a closed-end investment company for its shares must be at a price equal to the net asset value of such shares on the close of business on the last day of the tender offer. Any service fees incurred in connection with any tender offer made by the Fund will be borne by the Fund and will not reduce the stated consideration to be paid to tendering shareholders.

Subject to its investment limitations, the Fund may borrow to finance the repurchase of shares or to make a tender offer. Interest on any borrowings to finance share repurchase transactions or the accumulation of cash by the Fund in anticipation of share repurchases or tenders will reduce the Fund's net income. Any share repurchase, tender offer or borrowing that might be approved by the Board of Trustees would have to comply with the Securities Exchange Act of 1934, as amended, and the 1940 Act and the rules and regulations thereunder.

Although the decision to take action in response to a discount from net asset value will be made by the Board of the Fund at the time it considers such issue, it is the Board's present policy, which may be changed by the Board, not to authorize repurchases of Common Shares or a tender offer for such shares if (1) such transactions, if consummated, would (a) result in the delisting of the Common Shares from the American Stock Exchange, or (b) impair the Fund's status as a regulated investment company under the Internal Revenue Code of 1986, as amended (the "Code") (which would make the Fund a taxable entity, causing the Fund's income to be taxed at the corporate level in addition to the taxation of shareholders who receive dividends from the Fund) or as a registered closed-end investment company under the 1940 Act; (2) the Fund would not be able to liquidate portfolio securities in an orderly manner and consistent with the Fund's investment objectives and policies in order to repurchase shares; or (3) there is, in the Board's judgment, any (a) material legal action or proceeding instituted or threatened challenging such transactions or otherwise materially adversely affecting the Fund, (b) general suspension of or limitation on prices

for trading securities on the American Stock Exchange, (c) declaration of a banking moratorium by Federal or state authorities or any suspension of payment by United States or state banks in which the Fund invests, (d) material limitation affecting the Fund or the issuers of its portfolio securities by Federal or state authorities on the extension of credit by lending institutions or on the exchange of

35

foreign currency, (e) commencement of war, armed hostilities or other international or national calamity directly or indirectly involving the United States, or (f) other event or condition which would have a material adverse effect (including any adverse tax effect) on the Fund or its shareholders if shares were repurchased. The Board of Trustees of the Fund may in the future modify these conditions in light of experience.

Conversion to an open-end company would require the approval of the holders of at least two-thirds of the Fund's Common Shares and MuniPreferred Shares outstanding at the time, voting together as a single class, and of the holders of at least two-thirds of the Fund's MuniPreferred Shares outstanding at the time, voting as a separate class, provided however, that such separate class vote shall be a majority vote if the action in question has previously been approved, adopted or authorized by the affirmative vote of two-thirds of the total number of trustees fixed in accordance with the Declaration or By-laws. See the Prospectus under "Certain Provisions in the Declaration of Trust" for a discussion of voting requirements applicable to conversion of the Fund to an open-end company. If the Fund converted to an open-end company, it would be required to redeem all MuniPreferred Shares then outstanding, and the Fund's Common Shares would no longer be listed on the American Stock Exchange. Shareholders of an open-end investment company may require the company to redeem their shares on any business day (except in certain circumstances as authorized by or under the 1940 Act) at their net asset value, less such redemption charge, if any, as might be in effect at the time of redemption. In order to avoid maintaining large cash positions or liquidating favorable investments to meet redemptions, open-end companies typically engage in a continuous offering of their shares. Open-end companies are thus subject to periodic asset in-flows and out-flows that can complicate portfolio management. The Board of Trustees of the Fund may at any time propose conversion of the Fund to an open-end company depending upon their judgment as to the advisability of such action in light of circumstances then prevailing.

The repurchase by the Fund of its shares at prices below net asset value will result in an increase in the net asset value of those shares that remain outstanding. However, there can be no assurance that share repurchases or tenders at or below net asset value will result in the Fund's shares trading at a price equal to their net asset value. Nevertheless, the fact that the Fund's shares may be the subject of repurchase or tender offers at net asset value from time to time, or that the Fund may be converted to an open-end company, may reduce any spread between market price and net asset value that might otherwise exist.

In addition, a purchase by the Fund of its Common Shares will decrease the Fund's total assets which would likely have the effect of increasing the Fund's expense ratio. Any purchase by the Fund of its Common Shares at a time when MuniPreferred Shares are outstanding will increase the leverage applicable to the outstanding Common Shares then remaining. See the Fund's Prospectus under "Risks--Concentration Risk" and "Risks--Leverage Risk."

Before deciding whether to take any action if the Fund's Common Shares trade below net asset value, the Board of the Fund would consider all relevant factors, including the extent and duration of the discount, the liquidity of the Fund's portfolio, the impact of any action that might be taken on the Fund or its shareholders and market considerations. Based on these considerations, even if the Fund's shares should trade at a discount, the Board of Trustees may determine that, in the interest of the Fund and its shareholders, no action should be taken.

36

TAX MATTERS

Federal Income Tax Matters

The following discussion of federal income tax matters is based upon the advice of Bell, Boyd & Lloyd LLC, special counsel to the Fund.

The Fund intends to qualify under Subchapter M of the Code, for tax treatment as a regulated investment company and to satisfy certain conditions which will enable interest from municipal obligations, which is exempt from regular federal income taxes in the hands of the Fund, to qualify as "exempt-interest dividends" when distributed to the Fund's shareholders. In order to qualify for tax treatment as a regulated investment company, the Fund must satisfy certain requirements relating to the source of its income, diversification of its assets, and distributions of its income to shareholders. First, the Fund must derive at least 90% of its annual gross income (including tax-exempt interest) from dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of stock or securities or foreign currencies, or other income (including but not limited to gains from options, futures and forward contracts) derived with respect to its business of investing in such stock, securities or currencies (the "90% gross income test"). Second, the Fund must diversify its holdings so that, at the close of each quarter of its taxable year, (i) at least 50% of the value of its total assets is comprised of cash, cash items, United States Government securities, securities of other regulated investment companies and other securities limited in respect of any one issuer to an amount not greater in value than 5% of the value of the Fund's total assets and to not more than 10% of the outstanding voting securities of such issuer, and (ii) not more than 25% of the value of its total assets is invested in the securities of any one issuer (other than United States Government securities and securities of other regulated investment companies) or two or more issuers controlled by the Fund and engaged in the same, similar or related trades or businesses.

As a regulated investment company, the Fund will not be subject to federal income tax in any taxable year with respect to "net investment income" (i.e., its "investment company taxable income," as that term is defined in the Code, determined without reference to the deduction for dividends paid) and "net capital gain" (i.e., the excess of the Fund's net long-term capital gain over its net short-term capital loss), provided that it distributes at least 90% of the sum of (i) its investment company taxable income (which includes dividends, taxable interest, taxable original issue discount and market discount income, income from securities lending, net short-term capital gain in excess of net long-term capital loss, and any other taxable income other than net capital gain and is reduced by deductible expenses) and (ii) its net tax-exempt interest (the excess of its gross tax-exempt interest income over certain disallowed deductions). The Fund may retain for investment its net capital gain. However, if the Fund retains any net capital gain or any investment company taxable income, it will be subject to tax at regular corporate rates on the amount

retained. If the Fund retains any net capital gain, it may designate the retained amount as undistributed capital gains in a notice to its shareholders who, if subject to federal income tax on long-term capital gains, (i) will be required to include in income for federal income tax purposes, as long-term capital gain, their share of such undistributed amount, and (ii) will be entitled to credit their proportionate shares of the tax paid by the Fund on such undistributed amount against their federal income tax liabilities, if any, and to claim refunds to the extent the credit exceeds such liabilities. For federal income tax purposes, the tax basis of shares owned by a shareholder of the Fund will be increased by an amount equal under current law to the difference between the amount of undistributed capital gains included in the shareholder's gross income and the tax deemed paid by the shareholder under clause (ii) of the preceding sentence. The

37

Fund intends to distribute at least annually to its shareholders all or substantially all of its net tax-exempt interest and any investment company taxable income and net capital gain.

Treasury regulations permit a regulated investment company, in determining its investment company taxable income and net capital gain, to elect (unless it has made a taxable year election for excise tax purposes) to treat all or part of any net capital loss, any net long-term capital loss or any net foreign currency loss incurred after October 31 as if it had been incurred in the succeeding year.

The Fund intends to qualify to pay "exempt-interest dividends" by satisfying the requirement that at the close of each quarter of the Fund's taxable year at least 50% of the value of its total assets consist of tax-exempt municipal obligations. Distributions from the Fund will constitute exempt-interest dividends to the extent of its tax-exempt interest income (net of expenses and amortized bond premium). Exempt-interest dividends distributed to Common Shareholders are excluded from gross income for federal income tax purposes, although they are required to be reported on the Common Shareholders' federal income tax returns. Gain from the sale or redemption of Common Shares, however, will be taxable to the Common Shareholders as capital gain (provided such Common Shares were held as capital assets) even though the increase in value of such Common Shares is attributable to tax-exempt interest income. In addition, gain realized by the Fund from the disposition of a tax-exempt municipal obligation that was purchased at a price less than the principal amount of the bond will be taxable to the Fund's shareholders as ordinary income to the extent of accrued market discount. Under the Code, interest on indebtedness incurred or continued to purchase or carry Common Shares, which interest is deemed to relate to exempt-interest dividends, will not be deductible by Common Shareholders for federal income tax purposes. Moreover, while exempt-interest dividends are excluded from gross income for federal income tax purposes, they may be subject to alternative minimum tax and may have other collateral tax consequences. Taxpayers that may be subject to the alternative minimum tax should consult their advisers before investing in Common Shares.

Distributions by the Fund of net interest received from certain taxable temporary investments (such as certificates of deposit, commercial paper and obligations of the U.S. Government, its agencies and instrumentalities) and net short-term capital gain realized by the Fund, if any, will be taxable to Common Shareholders as ordinary income whether received in cash or additional shares. Any net long-term capital gain realized by the Fund and distributed to Common Shareholders in cash or additional shares will be taxable to Common Shareholders

as long-term capital gain regardless of the length of time investors have owned shares of the Fund. Taxable distributions will not be eligible for the dividends received deduction allowed to corporations. Distributions by the Fund to Common Shareholders that do not constitute ordinary income dividends, capital gain dividends or exempt-interest dividends will be treated as a return of capital to the extent of (and in reduction of) the Common Shareholder's tax basis in his or her shares. Any excess will be treated as gain from the sale of his or her shares, as discussed below.

The Internal Revenue Service's position in a published revenue ruling indicates that the Fund is required to designate distributions paid with respect to its Common Shares and its MuniPreferred Shares as consisting of a portion of each type of income distributed by the Fund. The portion of each type of income deemed received by the holders of each class of shares will be equal to the portion of total Fund dividends received by such class. Thus, the Fund will designate dividends paid as exempt-interest dividends in a manner that allocates such dividends between the holders of the Common Shares and the holders of MuniPreferred Shares, in proportion to the total dividends paid to each such class during or with respect to the taxable year, or otherwise as required by applicable law. Capital gain dividends and ordinary income dividends will similarly be allocated between the two classes.

If the Fund engages in hedging transactions involving financial futures and options, these transactions will be subject to special tax rules, the effect of which may be to accelerate income to the Fund, defer the Fund's losses, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to Common Shareholders.

Prior to purchasing shares in the Fund, an investor should carefully consider the impact of dividends or distributions which are expected to be or have been declared, but not paid. Any dividend or distribution declared shortly after a purchase of such shares prior to the record date will have the effect of reducing the per share net asset value by the per share amount of the dividend or distribution.

Although dividends generally will be treated as distributed when paid, dividends declared in October, November or December, payable to shareholders of record on a specified date in one of those months and paid during the following January, will be treated as having been distributed by the Fund (and received by the shareholders) on December 31.

The sale or exchange of Common Shares normally will result in capital gain or loss to the Common Shareholders who hold their Common Shares as capital assets. However, any loss on the sale or exchange of a Common Share that has been held for six months or less will be disallowed to the extent of any distribution of exempt-interest dividends received with respect to such Common Share. Generally, a Common Shareholder's gain or loss will be long-term gain or loss if the shares have been held for more than one year. If a shareholder sells or otherwise disposes of Common Shares before holding them for more than six months, however, any loss on the sale or other disposition of such Common Shares shall be treated as a long-term capital loss to the extent of any capital gain dividends received by the Common Shareholder (or amounts credited to the Common Shareholder as an undistributed capital gain) with respect to such Common Shares. Present law taxes both long- and short-term capital gains of corporations at the rates applicable to ordinary income. For non-corporate taxpayers, however, net capital gain (i.e., the excess of net long-term capital gain over net short-term capital loss) with respect to securities is taxed at a maximum rate of 20%, while short-term capital gain and other ordinary income is taxed at a maximum

rate of 38.6% in 2002 and 2003, 37.6% in 2004 and 2005, and 35% thereafter until 2011, when the maximum rate on ordinary income will revert to 39.6% unless amended by Congress. The maximum long-term capital gain rate is 18% for capital assets that are held for more than five years and whose holding periods begin after December 31, 2000. Because of the limitations on itemized deductions and the deduction for personal exemptions applicable to higher income taxpayers, the effective tax rate may be higher in certain circumstances.

All or a portion of a sales charge paid in purchasing Common Shares cannot be taken into account for purposes of determining gain or loss on the redemption or exchange of such shares within 90 days after their purchase to the extent shares of the Fund or another fund are subsequently acquired without payment of a sales charge pursuant to a reinvestment right. Any disregarded portion of such charge will result in an increase in the Common Shareholder's tax basis in the shares subsequently acquired. In addition, no loss will be allowed on the redemption or exchange of Common Shares if the Common Shareholder purchases other shares of the Fund (whether through reinvestment of distributions or otherwise) or the Common Shareholder acquires or enters into a contract or option to acquire securities that are substantially identical to shares of the Fund within a period of 61 days beginning 30 days before and ending 30 days after such redemption or exchange. If disallowed, the loss will be reflected in an adjustment to the basis of the shares acquired.

In order to avoid a 4% federal excise tax, the Fund must distribute or be deemed to have distributed by December 31 of each calendar year at least 98% of its taxable ordinary income for such year, at least 98% of its capital gain net income (the excess of its realized capital gains over its realized capital losses, generally computed on the basis of the one-year period ending on October 31 of such year) and 100% of any taxable ordinary income and any excess of realized capital gains over realized capital losses for the prior year that was not distributed during such year and on which the Fund paid no federal income tax. For purposes of the excise tax, a regulated investment company may reduce its capital gain net income (but not below its net capital gain) by the amount of any net ordinary loss for the calendar year. The Fund intends to make timely distributions in compliance with these requirements and consequently it is anticipated that it generally will not be required to pay the excise tax.

If in any year the Fund should fail to qualify under Subchapter M for tax treatment as a regulated investment company, the Fund would incur a regular corporate federal income tax upon its income for that year, and distributions to its Common Shareholders would be taxable to Common Shareholders as ordinary dividend income for federal income tax purposes to the extent of the Fund's earnings and profits.

The Fund is required in certain circumstances to withhold a percentage of taxable dividends and certain other payments paid to non-corporate holders of shares who have not furnished to the Fund their correct taxpayer identification numbers (in the case of individuals, their Social Security number) and certain certifications, or who are otherwise subject to backup withholding. The backup withholding percentage will be 30% in 2002 and 2003, 29% in 2004 and 2005, and 28% thereafter until 2011, when the percentage will revert to 31% unless amended by Congress. Backup withholding is not an additional tax and any amounts withheld may be credited against the shareholder's federal income tax liability.

The foregoing is a general and abbreviated summary of the provisions of the Code and Treasury Regulations presently in effect as they directly govern the taxation of the Fund and its Common Shareholders. For complete provisions,

reference should be made to the pertinent Code sections and Treasury Regulations. The Code and Treasury Regulations are subject to change by legislative or administrative action, and any such change may be retroactive with respect to Fund transactions. Common Shareholders are advised to consult their own tax

39

advisors for more detailed information concerning the federal taxation of the Fund and the income tax consequences to its Common Shareholders.

State Tax Matters

Tax matters pertaining to Georgia are set forth in Appendix D.

40

EXPERTS

The Financial Statements of the Fund as of _____, 2002, appearing in this Statement of Additional Information have been audited by Ernst & Young LLP, 233 South Wacker Drive, Chicago, Illinois 60606, independent auditors, as set forth in their report thereon appearing elsewhere herein, and is included in reliance upon such report given upon the authority of such firm as experts in accounting and auditing. Ernst & Young LLP provides accounting and auditing services to the Fund.

CUSTODIAN

The custodian of the assets of the Fund is State Street Bank and Trust Company, One Federal Street, Boston, Massachusetts, 02110. The custodian performs custodial, fund accounting and portfolio accounting services.

ADDITIONAL INFORMATION

A Registration Statement on Form N-2, including amendments thereto, relating to the shares of the Fund offered hereby, has been filed by the Fund with the Securities and Exchange Commission (the "Commission"), Washington, D.C. The Fund's Prospectus and this Statement of Additional Information do not contain all of the information set forth in the Registration Statement, including any exhibits and schedules thereto. For further information with respect to the Fund and the shares offered hereby, reference is made to the Fund's Registration Statement. Statements contained in the Fund's Prospectus and this Statement of Additional Information as to the contents of any contract or other document referred to are not

41

necessarily complete and in each instance reference is made to the copy of such contract or other document filed as an exhibit to the Registration Statement,

each such statement being qualified in all respects by such reference. Copies of the Registration Statement may be inspected without charge at the Commission's principal office in Washington, D.C., and copies of all or any part thereof may be obtained from the Commission upon the payment of certain fees prescribed by the Commission.

APPENDIX A

Ratings of Investments

Standard & Poor's Corporation--A brief description of the applicable Standard & Poor's Corporation, a division of The McGraw-Hill Companies ("Standard & Poor's" or "S&P") rating symbols and their meanings (as published by S&P) follows:

A Standard & Poor's issue credit rating is a current opinion of the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program. It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation. The issue credit rating is not a recommendation to purchase, sell, or hold a financial obligation, inasmuch as it does not comment as to market price or suitability for a particular investor.

Issue credit ratings are based on current information furnished by the obligors or obtained by Standard & Poor's from other sources it considers reliable. Standard & Poor's does not perform an audit in connection with any credit rating and may, on occasion, rely on unaudited financial information. Credit ratings may be changed, suspended, or withdrawn as a result of changes in, or unavailability of, such information, or based on other circumstances.

Issue credit ratings can be either long-term or short-term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. In the U.S., for example, that means obligations with an original maturity of no more than 365 days - including commercial paper. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. The result is a dual rating, in which the short-term ratings address the put feature, in addition to

the usual long-term rating. Medium-term notes are assigned long-term ratings.

Long-term Issue Credit Ratings

Issue credit ratings are based in varying degrees, on the following considerations:

1. Likelihood of payment - capacity and willingness of the obligor to meet its financial commitment on an obligation in accordance with the terms of the obligation;
2. Nature of and provisions of the obligation; and
3. Protection afforded by, and relative position of, the obligation in the event of bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

The issue ratings definitions are expressed in terms of default risk. As such, they pertain to senior obligations of an entity. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above.

AAA

An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial

A-1

commitment on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest-rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

BB, B, CCC, CC, And C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by

large uncertainties or major exposures to adverse conditions.

BB

An obligation rated `BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions, which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

B

An obligation rated `B' is more vulnerable to nonpayment than obligations rated `BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

CCC

An obligation rated `CCC' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

CC

An obligation rated `CC' is currently highly vulnerable to nonpayment.

A-2

C

The `C' rating may be used to cover a situation where a bankruptcy petition has been filed or similar action has been taken, but payments on this obligation are being continued.

D

An obligation rated `D' is in payment default. The `D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The `D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

Plus (+) or minus (-) The ratings from `AA' to `CCC' may be modified by the addition of a plus or minus sign to show relative standing within the major rating categories.

c The `c' subscript is used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer is below an investment-grade level and/or the issuer's bonds are deemed taxable.

- p The letter 'p' indicates that the rating is provisional. A provisional rating assumes the successful completion of the project financed by the debt being rated and indicates that payment of debt service requirements is largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, makes no comment on the likelihood of or the risk of default upon failure of such completion. The investor should exercise his own judgment with respect to such likelihood and risk.
- * Continuance of the ratings is contingent upon Standard & Poor's receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows.
- r The 'r' highlights derivative, hybrid, and certain other obligations that Standard & Poor's believes may experience high volatility or high variability in expected returns as a result of noncredit risks. Examples of such obligations are securities with principal or interest return indexed to equities, commodities, or currencies; certain swaps and options; and interest-only and principal-only mortgage securities. The absence of an 'r' symbol should not be taken as an indication that an obligation will exhibit no volatility or variability in total return.

N.R. Not rated.

Debt obligations of issuers outside the United States and its territories are rated on the same basis as domestic corporate and municipal issues. The ratings measure the creditworthiness of the obligor but do not take into account currency exchange and related uncertainties.

Bond Investment Quality Standards Under present commercial bank regulations issued by the Comptroller of the Currency, bonds rated in the top four categories ('AAA', 'AA', 'A', 'BBB', commonly known as investment-grade ratings) generally are regarded as eligible for bank investment. Also, the laws of various states governing legal investments impose certain rating or other standards for obligations eligible for investment by savings banks, trust companies, insurance companies, and fiduciaries in general.

Short-Term Issue Credit Ratings

Notes

A Standard & Poor's note ratings reflects the liquidity factors and market access risks unique to notes. Notes due in three years or less will likely receive a note rating. Notes maturing beyond three years will most likely receive a long-term debt rating. The following criteria will be used in making that assessment:

- . Amortization schedule -- the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- . Source of payment -- the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

- SP-1 Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.
- SP-2 Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3 Speculative capacity to pay principal and interest.

A-3

A note rating is not a recommendation to purchase, sell, or hold a security inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished to S&P by the issuer or obtained by S&P from other sources it considers reliable. S&P does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended, or withdrawn as a result of changes in or unavailability of such information or based on other circumstances.

Commercial Paper

An S&P commercial paper rating is a current assessment of the likelihood of timely payment of debt having an original maturity of no more than 365 days.

Ratings are graded into several categories, ranging from 'A-1' for the highest quality obligations to 'D' for the lowest. These categories are as follows:

- A-1 A short-term obligation rated 'A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.
- A-2 A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.
- A-3 A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.
- B A short-term obligation rated 'B' is regarded as having significant speculative characteristics. The obligor currently has the capacity to meet its financial commitment on the obligation; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.
- C A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.
- D A short-term obligation rated 'D' is in payment default. The 'D' rating category is used when payments on an obligation are not made on the date due even if the applicable grace period has not expired, unless Standard & Poor's believes that such payments will be made during such grace period. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action if payments on an obligation are jeopardized.

A commercial rating is not a recommendation to purchase, sell, or hold a security inasmuch as it does not comment as to market price or suitability for a particular investor. The ratings are based on current information furnished to

S&P by the issuer or obtained by S&P from other sources it considers reliable. S&P does not perform an audit in connection with any rating and may, on occasion, rely on unaudited financial information. The ratings may be changed, suspended, or withdrawn as a result of changes in or unavailability of such information or based on other circumstances.

A-4

Moody's Investors Service, Inc.--A brief description of the applicable Moody's Investors Service, Inc. ("Moody's") rating symbols and their meanings (as published by Moody's) follows:

Municipal Bonds

- Aaa Bonds which are rated `Aaa' are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as "gilt edged." Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes as can be visualized are most unlikely to impair the fundamentally strong position of such issues.
- Aa Bonds which are rated `Aa' are judged to be of high quality by all standards. Together with the `Aaa' group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in `Aaa' securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in `Aaa' securities.
- A Bonds which are rated `A' possess many favorable investment attributes and are to be considered as upper medium grade obligations. Factors giving security to principal and interest are considered adequate, but elements may be present which suggest a susceptibility to impairment sometime in the future.
- Baa Bonds which are rated `Baa' are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact have speculative characteristics as well.
- Ba Bonds which are rated `Ba' are judged to have speculative elements; their future cannot be considered as well assured. Often the protection of interest and principal payments may be very moderate and thereby not well safeguarded during both good and bad times over the future. Uncertainty of position characterizes bonds in this class.
- B Bonds which are rated `B' generally lack characteristics of the desirable investment. Assurance of interest and principal payments or of maintenance of other terms of the contract over any long period of time may be small.
- Caa Bonds which are rated `Caa' are of poor standing. Such issues may be in default or there may be present elements of danger with respect to principal or interest.
- Ca Bonds which are rated `Ca' represent obligations which are speculative in a high degree. Such issues are often in default or have other marked shortcomings.

- C Bonds which are rated 'C' are the lowest rated class of bonds, and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

A-5

Issues that are secured by escrowed funds held in trust, reinvested in direct, non-callable U.S. government obligations or non-callable obligations unconditionally guaranteed by the U.S. Government or Resolution Funding Corporation are identified with a # (hatchmark) symbol, e.g., #Aaa.

Con. (...): Bonds for which the security depends upon the completion of some act or the fulfillment of some condition are rated conditionally. These are bonds secured by (a) earnings of projects under construction, (b) earnings of projects unseasoned in operation experience, (c) rentals which begin when facilities are completed, or (d) payments to which some other limiting condition attaches. The parenthetical rating denotes probable credit stature upon completion of construction or elimination of the basis of the condition.

Note: Moody's applies numerical modifiers 1, 2 and 3 in each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Short-Term Loans

- MIG 1/VMIG 1 This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.
- MIG 2/VMIG 2 This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.
- MIG 3/VMIG 3 This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.
- SG This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Commercial Paper

Issuers rated Prime-1 (or related supporting institutions) have a superior ability for repayment of senior short-term debt obligations. Prime-1 repayment ability will normally be evidenced by the following characteristics:

- Leading market positions in well-established industries.
- High rates of return on funds employed.
- Conservative capitalization structures with moderate reliance on debt

and ample asset protection.

- Broad margins in earnings coverage of fixed financial charges and high internal cash generation.

A-6

- Well-established access to a range of financial markets and assured sources of alternate liquidity.

Issuers rated Prime-2 (or related supporting institutions) have a strong ability for repayment of senior short-term debt obligations. This will normally be evidenced by many of the characteristics cited above but to a lesser degree. Earnings trends and coverage ratios, while sound, will be more subject to variation. Capitalization characteristics, while still appropriate, may be more affected by external conditions. Ample alternate liquidity is maintained.

Issuers rated Prime-3 (or related supporting institutions) have an acceptable ability for repayment of senior short-term debt obligations. The effect of industry characteristics and market composition may be more pronounced. Variability in earnings and profitability may result in changes in the level of debt protection measurements and the requirement for relatively high financial leverage. Adequate alternate liquidity is maintained.

Issuers rated Not Prime do not fall within any of the Prime rating categories.

Fitch Ratings--A brief description of the applicable Fitch Ratings ("Fitch") ratings symbols and meanings (as published by Fitch) follows:

Long-Term Credit Ratings

Investment Grade

- AAA Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in case of exceptionally strong capacity for timely payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.
- AA Very high credit quality. 'AA' ratings denote a very low expectation of credit risk. They indicate very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.
- A High credit quality. 'A' ratings denote a low expectation of credit risk. The capacity for timely payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to changes in circumstances or in economic conditions than is the case for higher ratings.
- BBB Good credit quality. 'BBB' ratings indicate that there is currently a low expectation of credit risk. The capacity for timely payment of financial commitments is considered adequate, but adverse changes in circumstances and in economic conditions are more likely to impair this capacity. This is the lowest investment-grade category.

Speculative Grade

- BB Speculative. 'BB' ratings indicate that there is a possibility of credit risk developing, particularly as the result of adverse economic change over time; however, business or

A-7

financial alternatives may be available to allow financial commitments to be met. Securities rated in this category are not investment grade.

- B Highly speculative. 'B' ratings indicate that significant credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is contingent upon a sustained, favorable business and economic environment.
- CCC, CC, C High default risk. Default is a real possibility. Capacity for meeting financial commitments is solely reliant upon sustained, favorable business or economic developments. A 'CC' rating indicates that default of some kind appears probable. 'C' ratings signal imminent default.
- DDD, DD, and D Default. The ratings of obligations in this category are based on their prospects for achieving partial or full recovery in a reorganization or liquidation of the obligor. While expected recovery values are highly speculative and cannot be estimated with any precision, the following serve as general guidelines. 'DDD' obligations have the highest potential for recovery, around 90%-100% of outstanding amounts and accrued interest. 'DD' indicates potential recoveries in the range of 50%-90%, and 'D' the lowest recovery potential, i.e., below 50%. Entities rated in this category have defaulted on some or all of their obligations. Entities rated 'DDD' have the highest prospect for resumption of performance or continued operation with or without a formal reorganization process. Entities rated 'DD' and 'D' are generally undergoing a formal reorganization or liquidation process; those rated 'DD' are likely to satisfy a higher portion of their outstanding obligations, while entities rated 'D' have a poor prospect for repaying all obligations.

Short-Term Credit Ratings

A short-term rating has a time horizon of less than 12 months for most obligations, or up to three years for U.S. public finance securities, and thus places greater emphasis on the liquidity necessary to meet financial commitments in a timely manner.

- F1 Highest credit quality. Indicates the strongest capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.
- F2 Good credit quality. A satisfactory capacity for timely payment of financial commitments, but the margin of safety is not as great as in the case of the higher ratings.
- F3 Fair credit quality. The capacity for timely payment of financial commitments is adequate; however, near-term adverse changes could result in a reduction to non-investment grade.
- B Speculative. Minimal capacity for timely payment of financial commitments, plus vulnerability to near-term adverse changes in financial and economic conditions.

A-8

- C High default risk. Default is a real possibility. Capacity for meeting

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

financial commitments is solely reliant upon a sustained, favorable business and economic environment.

D Default. Denotes actual or imminent payment default.

Notes:

"+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' long-term rating category, to categories below 'CCC', or to short-term ratings other than 'F1'.

'NR' indicates that Fitch does not rate the issuer or issue in question.

'Withdrawn': A rating is withdrawn when Fitch deems the amount of information available to be inadequate for rating purposes, or when an obligation matures, is called, or refinanced.

Rating Watch: Ratings are placed on Rating Watch to notify investors that there is a reasonable probability of a rating change and the likely direction of such change. These are designated as "Positive", indicating a potential upgrade, "Negative", for a potential downgrade, or "Evolving", if ratings may be raised, lowered or maintained. Rating Watch is typically resolved over a relatively short period.

A Rating Outlook indicates the direction a rating is likely to move over a one to two year period. Outlooks may be positive, stable, or negative. A positive or negative Rating Outlook does not imply a rating change is inevitable. Similarly, companies whose outlooks are 'stable' could be downgraded before an outlook moves to positive or negative if circumstances warrant such an action. Occasionally, Fitch may be unable to identify the fundamental trend. In these cases, the Rating Outlook may be described as evolving.

A-9

APPENDIX B

TAXABLE EQUIVALENT YIELD TABLES

The taxable equivalent yield is the current yield you would need to earn on a taxable investment in order to equal a stated tax-free yield on a municipal investment. To assist you to more easily compare municipal investments like the Fund with taxable alternative investments, the table below presents the taxable equivalent yields for a range of hypothetical tax-free yields assuming the stated marginal Federal tax rates for 2002 listed below:

Taxable Equivalent of Tax-Free Yields

Tax Free Yields

Tax Rate	4.00%	4.50%	5.00%	5.50%	6.00%	6.50%
10.00%	4.44%	5.00%	5.56%	6.11%	6.67%	7.22%
15.00%	4.71%	5.29%	5.88%	6.47%	7.06%	7.65%
27.00%	5.48%	6.16%	6.85%	7.53%	8.22%	8.90%
30.00%	5.71%	6.43%	7.14%	7.86%	8.57%	9.29%
35.00%	6.15%	6.92%	7.69%	8.46%	9.23%	10.00%
38.60%	6.51%	7.33%	8.14%	8.96%	9.77%	10.59%

B-1

GEORGIA

The following tables show the approximate taxable yields for individuals that are equivalent to tax-free yields under combined Federal and Georgia state tax rates, using published 2002 marginal Federal tax rates and marginal Georgia tax rates currently available and scheduled to be in effect.

Single Return Bracket	Joint Return Bracket	Federal Tax Rate	State Tax Rate*	Combined Tax Rate*
-----	-----	-----	-----	-----
\$ 0-6,000		10.00%	5.00%	14.5%
	\$ 0-12,000	10.00%	6.00%	15.4%
6,000-27,950	12,000-46,700	15.00%	6.00%	20.1%
27,950-67,700	46,700-112,850	27.00%	6.00%	31.4%
67,700-141,250	112,850-171,950	30.00%	6.00%	34.2%
141,250-307,050	171,950-307,050	35.00%	6.00%	38.9%
Over 307,050	Over 307,050	38.60%	6.00%	42.3%

4.00%	4.50%	5.00%	5.50%	6.00%	6.50%
-----	-----	-----	-----	-----	-----
4.68%	5.26%	5.85%	6.43%	7.02%	7.60%
4.73%	5.32%	5.91%	6.50%	7.09%	7.68%
5.01%	5.63%	6.26%	6.88%	7.51%	8.14%
5.83%	6.56%	7.29%	8.02%	8.75%	9.48%
6.08%	6.84%	7.60%	8.36%	9.12%	9.88%
6.55%	7.36%	8.18%	9.00%	9.82%	10.64%
6.93%	7.80%	8.67%	9.53%	10.40%	11.27%

- * The combined tax rates shown reflect the fact that state tax payments are currently deductible for Federal tax purposes. Please note that the table does not reflect (i) any Federal or state limitations on the amounts of allowable itemized deductions, phase-outs of personal or dependent exemption credits or other allowable credits, (ii) any local taxes imposed, (iii) any alternative minimum taxes or any taxes other than personal income taxes, or (iv) the deductibility of Georgia state income taxes in computing Georgia income subject to tax. The table assumes that federal taxable income is equal to state income subject to tax, and in cases where more than one state rate falls within a federal bracket, the highest state rate corresponding to the highest income within that federal bracket is used. The numbers in the Combined Tax Rate column are rounded to the nearest one-tenth of one percent.

B-2

APPENDIX C

HEDGING STRATEGIES AND RISKS

Set forth below is additional information regarding the various defensive hedging techniques.

Futures and Index Transactions

Financial Futures

A financial future is an agreement between two parties to buy and sell a security for a set price on a future date. They have been designed by boards of trade which have been designated "contracts markets" by the Commodity Futures Trading Commission ("CFTC").

The purchase of financial futures is for the purpose of hedging the Fund's existing or anticipated holdings of long-term debt securities. When the Fund purchases a financial future, it deposits in cash or securities an "initial margin" of between 1% and 5% of the contract amount. Thereafter, the Fund's account is either credited or debited on a daily basis in correlation with the fluctuation in price of the underlying future or other requirements imposed by the exchange in order to maintain an orderly market. The Fund must make additional payments to cover debits to its account and has the right to withdraw credits in excess of the liquidity, the Fund may close out its position at any time prior to expiration of the financial future by taking an opposite position. At closing a final determination of debits and credits is made, additional cash is paid by or to the Fund to settle the final determination and the Fund realizes a loss or gain depending on whether on a net basis it made or received such payments.

The sale of financial futures is for the purpose of hedging the Fund's existing or anticipated holdings of long-term debt securities. For example, if the Fund owns long-term bonds and interest rates were expected to increase, it might sell financial futures. If interest rates did increase, the value of long-term bonds in the Fund's portfolio would decline, but the value of the Fund's financial futures would be expected to increase at approximately the same rate thereby keeping the net asset value of the Fund from declining as much as it otherwise would have.

Among the risks associated with the use of financial futures by the Fund as a hedging device, perhaps the most significant is the imperfect correlation between movements in the price of the financial futures and movements in the price of the debt securities which are the subject of the hedge.

Thus, if the price of the financial future moves less or more than the price of the securities which are the subject of the hedge, the hedge will not be fully effective. To compensate for this imperfect correlation, the Fund may enter into financial futures in a greater dollar amount than the dollar amount of the securities being hedged if the historical volatility of the prices of such securities has been greater than the historical volatility of the financial futures. Conversely, the Fund may enter into fewer financial futures if the historical volatility of the price of the securities being hedged is less than the historical volatility of the financial futures.

C-1

The market prices of financial futures may also be affected by factors other than interest rates. One of these factors is the possibility that rapid changes in the volume of closing transactions, whether due to volatile markets or movements by speculators, would temporarily distort the normal relationship between the markets in the financial future and the chosen debt securities. In these circumstances as well as in periods of rapid and large price movements. The Fund might find it difficult or impossible to close out a particular transaction.

Options on Financial Futures

The Fund may also purchase put or call options on financial futures which are traded on a U.S. Exchange or board of trade and enter into closing transactions with respect to such options to terminate an existing position. Currently, options can be purchased with respect to financial futures on U.S. Treasury Bonds on The Chicago Board of Trade. The purchase of put options on financial futures is analogous to the purchase of put options by the Fund on its portfolio securities to hedge against the risk of rising interest rates. As with options on debt securities, the holder of an option may terminate his position by selling an option of the Fund. There is no guarantee that such closing transactions can be effected.

Index Contracts

Index Futures

A tax-exempt bond index which assigns relative values to the tax-exempt bonds included in the index is traded on the Chicago Board of Trade. The index fluctuates with changes in the market values of all tax-exempt bonds included rather than a single bond. An index future is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash-rather than any security-equal to a specified dollar amount times the difference between the index value at the close of the last trading day of the contract and the price at which the index future was originally written. Thus, an index future is similar to traditional financial futures except that settlement is made in cash.

Index Options

The Fund may also purchase put or call options on U.S. Government or tax-exempt bond index futures and enter into closing transactions with respect to such options to terminate an existing position. Options on index futures are similar to options on debt instruments except that an option on an index future gives the purchaser the right, in return for the premium paid, to assume a position in an index contract rather than an underlying security at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by delivery of the accumulated balance of the writer's futures margin account which represents the amount by which the market price of the index futures contract, at exercise, is less than the exercise price of the option on the index future.

Bond index futures and options transactions would be subject to risks similar to transactions in financial futures and options thereon as described above. No series will enter into transactions in index or financial futures or related options unless and until, in the Adviser's opinion, the market for such instruments has developed sufficiently.

APPENDIX D

Factors Pertaining to Georgia

An investment containing Georgia municipal obligations is susceptible to political, economic or regulatory factors affecting issuers of such obligations. These include the possible adverse effects of certain Georgia constitutional amendments, legislative measures, voter initiatives and other matters that are described. The information provided is only a brief summary of the complex factors affecting the financial situation in Georgia and is derived from sources that are generally available to investors and are believed to be accurate. No independent verification has been made of the accuracy or completeness of any of the following information. It is based in part on information obtained from various State and local agencies in Georgia.

The Georgia economy slid into recession in the third quarter of 2001 and likely continued through the second quarter of 2002, but a gradual recovery is expected in the second half of 2002. Underlying the recession are the excesses in business investment, staffing levels, and bubbles in the equities markets along with the collapse of consumers' and businesses' confidence. The 2002 forecast anticipates that Georgia's real gross state product ("GSP"), will decrease 0.9% in 2002 after growing 1.6% in 2001. The 2002 percentage gain is down dramatically from the peak growth of 6.4% in 1998, 5.7% in 1999, and 4.7% in 2000. This decrease in the growth of the GSP is attributed to slowdowns in the national economy as a whole, and also to the effects of the State's recent growth, such as traffic congestion and deteriorating air quality.

In 2002, the State's nonagricultural employment will decrease by almost 33,000 jobs, or a drop of 0.9%. The percentage loss is only slightly smaller than the 1.2 percent decrease predicted for the nation. Job losses and growth in the number of people in the labor force will create an uncomfortable degree of slack in the State's formerly taut labor market.

The service sector is projected to see the fastest growth at 1.3% by adding 14,500 jobs. Retailers will be thwarted by the 0.1% decline in wholesale and retail employment brought about by a drop in sales of new cars, big-ticket consumer durables, and discretionary goods. Employment in government will expand by 0.1%, or 900 jobs, all of which will be in local and federal government but state government employment is expected to decline due to intense budgetary pressures. Manufacturers will see a sector employment drop of 2.8% or a loss of 15,900 jobs. Employment in finance, insurance and real estate is also expected to decline as is the transportation, communications, and public utilities sector which is expected to lose 8,500 jobs. Due to regulation, technical advances and restructuring, relatively few jobs will be created in the public utilities sector.

Until 2001, Georgia's average annual unemployment rate had decreased every year since 1992. Beginning in early 2001, the seasonally adjusted unemployment rate has slowly risen from approximately 3.6% to over 4.5%. As of June 2002, the seasonally adjusted unemployment rate for Georgia was 4.7%

Based on preliminary estimates for 2001, Georgia's personal income grew

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

2.3% to \$238,420,000 in 2001, bringing the per capita income for the State to \$28,438. Nationwide, personal income grew 2.7% to \$8,621,023,000, with per capita income at \$30,271 for the same year. According to the U.S. Department of Commerce Bureau's latest statistics, the 2.7% increase was the smallest growth rate since the 1990-91 recession.

The State's annual rate of population growth, after dipping slightly over the past couple of years--from 2.1% in 1996, to 2% in 1997, to 1.9% in 1998 to 1.8% in 2000--rose 2.4% in 2001. According to the U.S. Census Bureau's latest statistics, Georgia's population has reached approximately 8.38 million. The population is expected to grow to 9.2 million by 2010.

For Fiscal Year 2001, Georgia had revenues totaling \$23,350,071,847 with a majority of revenue derived from various taxes, and expenditures totaling \$22,572,870,542.

The Georgia constitution permits the issuance by the State of general obligation debt and of certain guaranteed revenue debt. The State may incur guaranteed revenue debt by guaranteeing the payment of certain revenue obligations issued by an instrumentality of the State. The Georgia Constitution prohibits the incurring of any general obligation debt or guaranteed revenue debt if the highest aggregate annual debt service requirement for the then current year or any subsequent fiscal year for outstanding general obligation debt and guaranteed revenue debt, including the proposed debt, exceeds 10% of the total revenue receipts, less refunds, of the State treasury in the fiscal year immediately preceding the year in which any such debt is to be incurred.

The Georgia Constitution also permits the State to incur public debt to supply a temporary deficit in the State treasury in any fiscal year created by a delay in collecting the taxes of that year. Such debt must not exceed, in the aggregate, 5% of the total revenue receipts, less refunds, of the State treasury in the fiscal year immediately preceding the year in which such debt is incurred. The debt incurred must be repaid on or before the last day of the fiscal year in which it is to be incurred out of the taxes levied for that fiscal year. No such debt may be incurred in any fiscal year if there is then outstanding unpaid debt from any previous fiscal year which was incurred to supply a temporary deficit in the State treasury.

D-1

As of June 30, 2001, outstanding general obligation debt issues of the State of Georgia totaled \$5,311,335,000. Outstanding revenue bonds of certain blended and discretely presented component units totaled \$1,160,254,518, of which \$149,555,255 are guaranteed by the State. During fiscal year 2001, general obligation bonds in the amount of \$395,515,000 were retired. General obligation debt issued during fiscal year 2001 totaled \$567,280,000.

Virtually all of the issues of long-term debt obligations issued by or on behalf of the State of Georgia and counties, municipalities and other political subdivisions and public authorities thereof are required by law to be validated and confirmed in a judicial proceeding prior to issuance. The legal effect of an

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

approved validation in Georgia is to render incontestable the validity of the pertinent bond issue and the security therefor.

Georgia is involved in certain legal proceedings that, if decided against the State, may require the State to make significant future expenditures or may substantially impair revenues. An adverse final decision could materially affect the State's governmental operations and, consequently, its ability to pay debt service on its obligations.

State of Georgia general obligation bonds are currently rated as follows: Standard & Poor's, AAA (upgraded from AA+ on July 29, 1997); Moody's, Aaa; and Fitch, AAA. There can be no assurance that such ratings will be maintained in the future. It should be noted that the creditworthiness of obligations issued by local Georgia issuers may be unrelated to the creditworthiness of obligations issued by the State of Georgia, and that there is no obligation on the part of the State to make payment on such local obligations in the event of default.

Georgia Tax Matters

The following is based upon the advice of Chapman and Cutler, special Georgia counsel to the Fund. The following is a general, abbreviated summary of certain provisions of the applicable Georgia tax law as presently in effect as it directly governs the taxation of Georgia resident individual and corporate Common Shareholders of the Fund. This summary does not address the taxation of other shareholders nor does it discuss any local taxes that may be applicable. These provisions are subject to change by legislative or administrative action, and any such change may be retroactive with respect to transactions of the Fund.

Assuming the Fund qualifies as a "regulated investment company" for federal income tax purposes under Subchapter M of the Internal Revenue Code, exempt-interest dividends from the Fund that are excluded from gross income for federal income tax purposes and that are attributable to interest on (i) obligations of the State of Georgia or its political subdivisions and (ii) obligations of possessions of the United States, will be exempt from the income tax imposed by the State of Georgia on individuals and corporations under Chapter 7 of Title 48 of the Georgia Statutes. Other dividends from the Fund may be subject to the Georgia income tax.

Interest on indebtedness incurred or continued to purchase or carry shares of the Fund, if the Fund distributes dividends exempt from the Georgia income tax during a year, is not deductible for purposes of the Georgia income tax. Ownership of shares in the Fund may result in other Georgia tax consequences to certain taxpayers, and prospective investors should consult their tax advisors.

D-2

APPENDIX E

PERFORMANCE RELATED AND COMPARATIVE INFORMATION

The Fund may be a suitable investment for a shareholder that is thinking of adding bond investments to his portfolio to balance the appreciated stocks that the shareholder is holding. Municipal bonds can provide double, tax-free income (exempt from regular federal and state income taxes) for residents of that state. Because the Fund expects that a substantial portion of its investments will pay interest that is taxable under the federal alternative minimum tax, the

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

Fund may not be a suitable investment for shareholders that are subject to the federal alternative minimum tax.

The Fund may quote certain performance-related information and may compare certain aspects of its portfolio and structure to other substantially similar closed-end funds as categorized by Lipper, Inc. ("Lipper"), Morningstar or other independent services. Comparison of the Fund to an alternative investment should be made with consideration of differences in features and expected performance. The Fund may obtain data from sources or reporting services, such as Bloomberg Financial ("Bloomberg") and Lipper, that the Fund believes to be generally accurate. According to Thomson Wealth Management, Nuveen is the leading sponsor of municipal closed-end exchange-traded bond funds measured by the number of funds (87) and fund assets under management (\$33 billion) as of July 31, 2002.

E-1

Past performance is not indicative of future results. At the time Common Shareholders sell their shares, they may be worth more or less than their original investment.

Features of Nuveen Municipal Closed-End ETFs

- Monthly Dividends*
- Enhanced income potential through leverage*
- Automatic dividend reinvestment*
- Exchange listing
- Widespread price visibility
- Convenient intra-day trading*
- Professional management
- Low minimum investment

*As outlined elsewhere in this SAI, share prices will fluctuate. Systematic reinvestment does not ensure a profit, nor does it protect you against a loss in a declining market.

Municipal Bond/Equity Portfolios May Provide Attractive Returns and Reduced Risk

Nuveen research shows that, over the past 20 years, a portfolio of 20% municipal bonds and 80% equities produced 99% of the annual after-tax return of an all-equity portfolio with measurably less risk.

These conclusions are based on research done by Nuveen Investments using the following portfolio assumptions: Municipal bonds are represented by the Lehman Brothers Long Municipal Index. Treasury Bonds are represented by Lehman Brothers Long Treasury Index. Equities are the S&P 500 stocks as tracked by the Ibbotson Associates Large Company Stock Index. It is not possible to invest directly in any of these indexes. Hypothetical portfolios using varying percentages of municipal bonds or Treasury bonds and equities, in each case totaling 100%, were constructed, and the investment results and volatility determined, for every year from 1982 through 2001.

All investment income generated by the portfolio was considered to be reinvested annually, along with the after-tax proceeds of an arbitrarily assumed 20% annualized turnover rate. The allocation between the two assets was allowed to fluctuate within a 5% band around its target before rebalancing. No provision was made for investment fees or commissions. Investment income was taxed at the historically appropriate rate for an individual with \$100,000 in taxable income in year dollars. Net capital gains taxes, if any, were deducted at the rate appropriate for the period. At the end of 2001, the portfolios were fully liquidated to recognize the existing tax liability.

This study was based on historical data gathered from sources Nuveen Investments considers to be reliable and consistent. The results produced by this study in no way should be considered representative of the past performance of any actual investment product or predictive of future investment expectations and performance for the municipal market or any actual investment products.

In particular, municipal bond rates during the early portion of the 20-year period covered by this research were higher than current municipal rates, and returns for municipal bonds going forward will likely be less than those shown on the chart.

Market price is affected by many factors, including market interest rates, income tax rates, the common shares' net asset value and dividend stability, the portfolio's duration, call protection and credit quality, analyst recommendations, and other market factors. Any of these factors individually or collectively may, at any given time, be as or more important to market price than annualized dividend rates. A positive correlation does not necessarily mean that higher dividends cause or result in higher market prices, and you should not assume that any particular level of dividends will result in any particular market price. In addition, the positive correlation between dividends and market price of this group of funds does not necessarily mean that every fund in the group exhibits a positive correlation between dividend and market price, and it is possible that the Fund may not exhibit such a correlation. There can be no assurance that the correlation suggested by the above data will continue in the future.

This chart shows the week-by-week difference between the average premium or discount for all Nuveen municipal closed-end funds and all non-Nuveen municipal closed-end funds as reported by Lipper for the five-year period from July 25, 1997 through July 26, 2002. The weekly averages include all Nuveen and non-Nuveen funds in existence during that week over the course of this measurement period. As of July 26, 2002, there were 87 Nuveen funds and 144 non-Nuveen funds included in the Lipper database. Past trading history is no guarantee of future results, and is no guarantee of how these new Funds may trade.

Item 25: Marketing Arrangements

See Sections 2, 3 and 5(n) of the Underwriting Agreement to be filed as Exhibit h.1 to this Registration Statement.

See the Introductory Paragraph and Sections 2 and 3(d) of the Form of Master Selected Dealer Agreement filed as Exhibit h.2 to this Registration Statement.

See Introductory Paragraph and Sections 1.2, 3.1, 3.2, 3.4-3.8, 4.1, 4.2, 5.1-5.4, 6.1, 10.9 and 10.10 of the Form of Master Agreement Among Underwriters filed as Exhibit h.3 to this Registration Statement.

See Paragraph e of the Form of Dealer Letter Agreement between Nuveen and the Underwriters to be filed as Exhibit h.4 to this Registration Statement.

Item 26: Other Expenses of Issuance and Distribution

Securities and Exchange Commission fees	\$ 1,380
National Association of Securities Dealers, Inc. fees	2,000
Printing and engraving expenses	*

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-2/A

Legal Fees	*
American Stock Exchange listing fees	*
Accounting expenses	*
Blue Sky filing fees and expenses	*
Transfer agent fees	*
Miscellaneous expenses	*

Total	\$ *
	=====

C-2

*To be completed by amendment. Nuveen Advisory has contractually agreed to reimburse the Fund for fees and expenses in the amount of .32% of average daily Managed Assets for the first 5 full years of the Fund's operations, .24% of average daily Managed Assets in year 6, .16% in year 7 and .08% in year 8. Without the reimbursement, "Total Net Annual Expenses" would be estimated to be 1.38% of average daily net assets attributable to Common Shares. Nuveen has agreed to pay (i) all organizational expenses and (ii) offering costs (other than sales load) that exceed \$0.03 per Common Share (.20% of offering price).

Item 27: Persons Controlled by or under Common Control with Registrant

Not applicable.

Item 28: Number of Holders of Securities

At August 22, 2002

Title of Class -----	Number of Record Holders -----
Common Shares, \$0.01 par value	0

Item 29: Indemnification

Section 4 of Article XII of the Registrant's Declaration of Trust provides as follows:

Subject to the exceptions and limitations contained in this Section 4, every person who is, or has been, a Trustee, officer, employee or agent of the Trust, including persons who serve at the request of the Trust as directors, trustees, officers, employees or agents of another organization in which the

Trust has an interest as a shareholder, creditor or otherwise (hereinafter referred to as a "Covered Person"), shall be indemnified by the Trust to the fullest extent permitted by law against liability and against all expenses reasonably incurred or paid by him in connection with any claim, action, suit or proceeding in which he becomes involved as a party or otherwise by virtue of his being or having been such a Trustee, director, officer, employee or agent and against amounts paid or incurred by him in settlement thereof.

No indemnification shall be provided hereunder to a Covered Person:

- (a) against any liability to the Trust or its Shareholders by reason of a final adjudication by the court or other body before which the proceeding was brought that he engaged in willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office;
- (b) with respect to any matter as to which he shall have been finally adjudicated not to have acted in good faith in the reasonable belief that his action was in the best interests of the Trust; or

C-3

- (c) in the event of a settlement or other disposition not involving a final adjudication (as provided in paragraph (a) or (b)) and resulting in a payment by a Covered Person, unless there has been either a determination that such Covered Person did not engage in willful misfeasance, bad faith, gross negligence or reckless disregard of the duties involved in the conduct of his office by the court or other body approving the settlement or other disposition or a reasonable determination, based on a review of readily available facts (as opposed to a full trial-type inquiry), that he did not engage in such conduct:

- (i) by a vote of a majority of the Disinterested Trustees acting on the matter (provided that a majority of the Disinterested Trustees then in office act on the matter); or

- (ii) by written opinion of independent legal counsel.

The rights of indemnification herein provided may be insured against by policies maintained by the Trust, shall be severable, shall not affect any other rights to which any Covered Person may now or hereafter be entitled, shall continue as to a person who has ceased to be such a Covered Person and shall inure to the benefit of the heirs, executors and administrators of such a person. Nothing contained herein shall affect any rights to indemnification to which Trust personnel other than Covered Persons may be entitled by contract or otherwise under law.

Expenses of preparation and presentation of a defense to any claim, action, suit or proceeding subject to a claim for indemnification under this Section 4 shall be advanced by the Trust prior to final disposition thereof upon receipt of an undertaking by or on behalf of the recipient to repay such amount if it is ultimately determined that he is not entitled to indemnification under this Section 4, provided that either:

- (a) such undertaking is secured by a surety bond or some other appropriate security or the Trust shall be insured against losses arising out of any such advances; or
- (b) a majority of the Disinterested Trustees acting on the matter (provided that a majority of the Disinterested Trustees then in office act on the matter) or independent legal counsel in a written opinion shall

determine, based upon a review of the readily available facts (as opposed to a full trial-type inquiry), that there is reason to believe that the recipient ultimately will be found entitled to indemnification.

As used in this Section 4, a "Disinterested Trustee" is one (x) who is not an Interested Person of the Trust (including anyone, as such Disinterested Trustee, who has been exempted from being an Interested Person by any rule, regulation or order of the Commission), and (y) against whom none of such actions, suits or other proceedings or another action, suit or other proceeding on the same or similar grounds is then or has been pending.

C-4

As used in this Section 4, the words "claim," "action," "suit" or "proceeding" shall apply to all claims, actions, suits, proceedings (civil, criminal, administrative or other, including appeals), actual or threatened; and the words "liability" and "expenses" shall include without limitation, attorneys' fees, costs, judgments, amounts paid in settlement, fines, penalties and other liabilities.

The trustees and officers of the Registrant are covered by Investment Trust Directors and Officers and Errors and Omission policies in the aggregate amount of \$50,000,000 against liability and expenses of claims of wrongful acts arising out of their position with the Registrant, except for matters which involve willful acts, bad faith, gross negligence and willful disregard of duty (i.e., where the insured did not act in good faith for a purpose he or she reasonably believed to be in the best interest of Registrant or where he or she had reasonable cause to believe this conduct was unlawful). The policy has a \$500,000 deductible, which does not apply to individual trustees or officers.

Section 8 of the Underwriting Agreement to be filed as Exhibit h.1 to this Registration Statement provides for each of the parties thereto, including the Registrant and the Underwriters, to indemnify the others, their trustees, directors, certain of their officers, trustees, directors and persons who control them against certain liabilities in connection with the offering described herein, including liabilities under the federal securities laws.

Insofar as indemnification for liability arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the Registrant pursuant to the foregoing provisions, or otherwise, the Registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act of 1933 and will be governed by the final adjudication of such issue.

Item 30: Business and Other Connections of Investment Adviser

Nuveen Advisory Corp. serves as investment adviser to the following open-end management type investment companies: Nuveen Multistate Trust I, Nuveen Multistate Trust II, Nuveen Multistate Trust III, Nuveen Multistate Trust IV

Item 32: Management Services

Not applicable.

Item 33: Undertakings

1. Registrant undertakes to suspend the offering of its shares until it amends its prospectus if (1) subsequent to the effective date of its Registration Statement, the net asset value declines more than 10 percent from its net asset value as of the effective date of the Registration Statement, or (2) the net asset value increases to an amount greater than its net proceeds as stated in the prospectus.

2. Not applicable.

3. Not applicable.

4. Not applicable.

5. The Registrant undertakes that:

a. For purposes of determining any liability under the Securities Act of 1933, the information omitted from the form of prospectus filed as part of a registration statement in reliance upon Rule 430A and contained in the form of prospectus filed by the Registrant under Rule 497(h) under the Securities Act of 1933 shall be deemed to be part of the Registration Statement as of the time it was declared effective.

b. For the purpose of determining any liability under the Securities Act of 1933, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of the securities at that time shall be deemed to be the initial bona fide offering thereof.

6. The Registrant undertakes to send by first class mail or other means designed to ensure equally prompt delivery, within two business days of receipt of a written or oral request, any Statement of Additional Information.
