Press Release

#### **Table of Contents**

#### Item 2.02. Results of Operations and Financial Condition.

On April 17, 2006, Digi International Inc. (the Company ) reported its financial results for the second quarter of fiscal 2006. See the Company s press release dated April 17, 2006, which is furnished as Exhibit 99 and incorporated by reference in this Current Report on Form 8-K.

#### NON-GAAP FINANCIAL MEASURES

The press release furnished as Exhibit 99 and certain information the Company intends to disclose on the conference call scheduled for 5:00 p.m. eastern time on April 17, 2006 include certain non-GAAP financial measures. These measures include (i) earnings per diluted share excluding the impact of stock-based compensation expense, (ii) earnings per diluted share excluding the impact of the favorable tax settlement, (iii) earnings before taxes, depreciation and amortization and (iv) guidance disclosed by the Company related to earnings per diluted share excluding the impact of stock-based compensation expense. The reconciliations of these measures to the most directly comparable GAAP financial measures are included in the earnings release and/or are included below.

With respect to the measures that exclude the favorable tax settlement, management believes that excluding this one-time non-recurring item provides useful information to investors regarding the Company's results of operations and financial condition and permits a more meaningful comparison and understanding of the Company's operating performance. Management believes that earnings before taxes, depreciation and amortization helps investors compare operating results and corporate performance exclusive of the impact of the Company's capital structure and the method by which assets were acquired. Management believes that providing earnings per diluted share exclusive of the impact of stock-based compensation expense, both on a historical basis and with respect to the Company's guidance, allows investors to compare results and expected results with results for prior periods that did not include stock-based compensation expense. Management uses these various non-GAAP measures to monitor and evaluate ongoing operating results and trends and to gain an understanding of the comparative operating performance of the Company.
