**VALERO ENERGY CORPORATION AND SUBSIDIARIES
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

1. BASIS OF PRESENTATION, PRINCIPLES OF CONSOLIDATION AND SIGNIFICANT ACCOUNTING POLICIES

As used in this report, the terms Valero, we, us, or our may refer to Valero Energy Corporation, one or more of our consolidated subsidiaries, or all of them taken as a whole.

These unaudited consolidated financial statements include the accounts of Valero and subsidiaries in which Valero has a controlling interest. Intercompany balances and transactions have been eliminated in consolidation. Investments in significant non-controlled entities are accounted for using the equity method of accounting.

These unaudited consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities Exchange Act of 1934. Accordingly, they do not include all of the information and notes required by GAAP for complete consolidated financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. All such adjustments are of a normal recurring nature unless disclosed otherwise. Financial information for the three months ended March 31, 2007 and 2006 included in these Condensed Notes to Consolidated Financial Statements is derived from our unaudited consolidated financial statements. Operating results for the three months ended March 31, 2007 are not necessarily indicative of the results that may be expected for the year ending December 31, 2007.

The consolidated balance sheet as of December 31, 2006 has been derived from the audited financial statements as of that date. For further information, refer to the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2006.

On December 22, 2006, we sold our remaining ownership interest in NuStar GP Holdings, LLC (formerly Valero GP Holdings, LLC), which indirectly owns the general partner interest, the incentive distribution rights, and a 21.4% limited partner interest in NuStar Energy L.P. (formerly Valero L.P.). As a result, the statement of income reflects no equity in earnings of NuStar Energy L.P. subsequent to December 21, 2006.

Reclassifications

Certain previously reported amounts have been reclassified to conform to the 2007 presentation, including reflecting in our consolidated statement of cash flows for 2006 gross borrowings and repayments under our uncommitted bank credit facilities and presenting those amounts, along with borrowings and repayments under our committed bank credit facilities, separate from borrowings and repayments related to our long-term notes. The reclassifications also affected amounts previously reported in our consolidated statement of income in 2006 for operating revenues, cost of sales, and retail selling expenses. Commencing January 1, 2007, third-party processing costs associated with certain credit card transactions processed on behalf of our distributors and dealers are being netted against fees received from distributors and dealers to better reflect the nature of the credit card transactions. These reclassified income statement amounts were as follows (in millions):

2. ACCOUNTING PRONOUNCEMENTS***FASB Statement No. 155***

In February 2006, the Financial Accounting Standards Board (FASB) issued Statement No. 155, Accounting for Certain Hybrid Financial Instruments, which amends Statement No. 133, Accounting for Derivative Instruments and Hedging Activities, and Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. This statement improves the financial reporting of certain hybrid financial instruments and simplifies the accounting for these instruments. In particular, Statement No. 155 (i) permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, (ii) clarifies which interest-only and principal-only strips are not subject to the requirements of Statement No. 133, (iii) establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation, (iv) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives, and (v) amends Statement No. 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. The adoption of Statement No. 155 on January 1, 2007 has not affected our financial position or results of operations.

FASB Statement No. 156

In March 2006, the FASB issued Statement No. 156, Accounting for Servicing of Financial Assets, which amends Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. Statement No. 156 requires the initial recognition at fair value of a servicing asset or servicing liability when an obligation to service a financial asset is undertaken by entering into a servicing contract. The adoption of Statement No. 156 on January 1, 2007 has not affected our financial position or results of operations.

FASB Interpretation No. 48

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes, by prescribing a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. If a tax position is more likely than not to be sustained upon examination, then an enterprise is required to recognize in its financial statements the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement. The adoption of FIN 48 on January 1, 2007 did not materially affect our financial position or results of operations.

We have elected to classify any interest expense related to the underpayment of income taxes in income tax expense in our consolidated statement of income. Any penalties related to the underpayment of

Table of Contents

VALERO ENERGY CORPORATION AND SUBSIDIARIES
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

income taxes are recorded in the corresponding expense category in our consolidated statement of income.

EITF Issue No. 06-3

In June 2006, the FASB ratified its consensus on EITF Issue No. 06-3, How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement (That Is, Gross versus Net Presentation) (EITF No. 06-3). The scope of EITF No. 06-3 includes any tax assessed by a governmental authority that is imposed concurrent with or subsequent to a revenue-producing transaction between a seller and a customer. For taxes within the scope of this issue that are significant in amount, the consensus requires the following disclosures: (i) the accounting policy elected for these taxes and (ii) the amount of the taxes reflected gross in the income statement on an interim and annual basis for all periods presented. The disclosure of those taxes can be done on an aggregate basis. We adopted the consensus on January 1, 2007. We present excise taxes on sales by our U.S. retail system on a gross basis with supplemental information regarding the amount of such taxes included in revenues provided in a footnote on the face of the income statement. All other excise taxes are presented on a net basis in the income statement.

FASB Statement No. 157

In September 2006, the FASB issued Statement No. 157, Fair Value Measurements. Statement No. 157 defines fair value, establishes a framework for measuring fair value under GAAP, and expands disclosures about fair value measures. Statement No. 157 is effective for fiscal years beginning after November 15, 2007, with early adoption encouraged. The provisions of Statement No. 157 are to be applied on a prospective basis, with the exception of certain financial instruments for which retrospective application is required. The adoption of Statement No. 157 is not expected to materially affect our financial position or results of operations.

FASB Statement No. 159

In February 2007, the FASB issued Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. Statement No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. Statement No. 159 is effective for fiscal years beginning after November 15, 2007, with early adoption permitted provided the entity also elects to apply the provisions of Statement No. 157. We do not expect the adoption of Statement No. 159 to have any impact on our financial position or results of operations.

3. DISPOSITION OF LIMA REFINERY

On May 2, 2007, we entered into an agreement to sell our refinery in Lima, Ohio to Husky Refining Company, a wholly owned subsidiary of Husky Energy Inc. The sales price is \$1.9 billion, plus an amount equal to net working capital as of the closing date of the sale, which is expected to occur by the end of the second quarter of 2007. Net proceeds from the sale exceed the carrying amount of the net assets being sold. The sale is subject to the receipt of required regulatory approvals.

Table of Contents

VALERO ENERGY CORPORATION AND SUBSIDIARIES
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

4. INVENTORIES

Inventories consisted of the following (in millions):

	March 31, 2007	December 31, 2006
Refinery feedstocks	\$2,466	\$ 1,981
Refined products and blendstocks	2,115	2,197
Convenience store merchandise	83	85
Materials and supplies	171	167
 Inventories	 \$4,835	 \$ 4,430

As of March 31, 2007 and December 31, 2006, the replacement cost (market value) of LIFO inventories exceeded their LIFO carrying amounts by approximately \$4.4 billion and \$2.9 billion, respectively.

5. INVESTMENT IN AND TRANSACTIONS WITH NUSTAR ENERGY L.P.

Our ownership interest in NuStar Energy L.P. as of March 31, 2006 was 23.4%, which was composed of a 2% general partner interest, incentive distribution rights, and a 21.4% limited partner interest represented by 627,339 common units and 9,599,322 subordinated units. NuStar GP Holdings, LLC completed public offerings in July and December 2006 through which we sold all of our ownership interest in NuStar GP Holdings, LLC. As a result, we no longer owned any interest in NuStar Energy L.P. as of December 31, 2006. Financial information reported by NuStar Energy L.P. for the three months ended March 31, 2006 is summarized below (in millions):

	Three Months Ended March 31, 2006
Revenues	\$ 274
Operating income	56
Net income	39

Related-Party Transactions

Through December 31, 2006, we provided NuStar Energy L.P. with certain corporate functions for an annual fee as prescribed by a services agreement. Effective January 1, 2007, the services agreement was amended to provide for limited services. The amended services agreement provides for a termination date of December 31, 2010, unless we terminate the agreement earlier, in which case we are required to pay a termination fee of \$13 million. In April, we notified NuStar Energy L.P. of our decision to terminate the services agreement. Accordingly, the \$13 million termination fee is expected to be paid during the second quarter of 2007.

The following table summarizes the results of transactions with NuStar Energy L.P. for the three months ended March 31, 2006 (in millions):

Fees and expenses charged by us to NuStar Energy L.P.	\$ 26
Fees and expenses charged to us by NuStar Energy L.P.	61

Table of Contents

**VALERO ENERGY CORPORATION AND SUBSIDIARIES
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

6. DEBT

On February 1, 2007, we redeemed our 9.25% senior notes for \$183 million, or 104.625% of stated value. These notes had a carrying amount of \$187 million on the date of redemption, resulting in a gain of \$4 million that was included in other income, net in the consolidated statement of income.

During the three months ended March 31, 2007, we had no borrowings under our revolving credit facilities or our short-term uncommitted bank credit facilities.

In April 2007, we made a scheduled debt repayment of \$230 million related to our 6.125% notes. Also in April 2007, to fund the accelerated share repurchase program discussed in Note 7, we borrowed \$3 billion under a 364-day term credit agreement with a financial institution. The term loan bears interest at LIBOR plus a margin, or an alternate base rate as defined under the agreement. The interest rate is subject to adjustment based upon the credit ratings assigned to our long-term debt. The amount borrowed can be prepaid at any time, and proceeds from any long-term financing during the term of this agreement, with certain exceptions, must be used to reduce the amount borrowed under the 364-day term credit agreement.

7. STOCKHOLDERS' EQUITY

Treasury Stock

During the three months ended March 31, 2007 and 2006, we purchased 15.6 million and 10.7 million shares of our common stock at a cost of \$904 million and \$590 million, respectively, in connection with the administration of our employee benefit plans and the \$2 billion common stock purchase program authorized by our board of directors. During the three months ended March 31, 2007, we issued 3.8 million shares from treasury at an average cost of \$58.63 per share, and for the three months ended March 31, 2006, we issued 7.0 million shares from treasury at an average cost of \$52.24 per share, for our employee benefit plans.

During April 2007, we purchased an additional 4.2 million shares at a cost of approximately \$275 million, excluding the effect of the accelerated share repurchase program discussed below.

Accelerated Share Repurchase Program

On April 25, 2007, our board of directors approved an amendment to our \$2 billion common stock purchase program to increase the authorized purchases under the program to \$6 billion. In conjunction with the increase in our common stock purchase program, we entered into an agreement with a financial institution to purchase \$3 billion of our shares under an accelerated share repurchase program, and in late April, approximately 42 million shares were purchased under this agreement. The purchase of these shares was funded with a short-term bridge loan, which we expect to replace with longer-term financing. At the expiration of the accelerated share repurchase program, which is expected to occur in the third quarter of 2007, the cost of the shares purchased under this accelerated share repurchase program will be adjusted, with the final purchase cost based on a discount to the average trading price of our common stock, weighted by the daily volume of shares traded, during the program period. Any adjustment to the cost can be paid in cash or stock, at our option.

Common Stock Dividends

On April 26, 2007, our board of directors declared a regular quarterly cash dividend of \$0.12 per common share payable on June 13, 2007 to holders of record at the close of business on May 16, 2007.

8. EARNINGS PER COMMON SHARE

Earnings per common share amounts were computed as follows (dollars and shares in millions, except per share amounts):

	Three Months Ended March	
	31,	
	2007	2006
Earnings per Common Share:		
Net income	\$ 1,144	\$ 849
Preferred stock dividends	-	1
Net income applicable to common stock	\$ 1,144	\$ 848
Weighted-average common shares outstanding	599	619
Earnings per common share	\$ 1.91	\$ 1.37
Earnings per Common Share - Assuming Dilution:		
Net income applicable to common equivalent shares	\$ 1,144	\$ 849
Weighted-average common shares outstanding	599	619
Effect of dilutive securities:		
Stock options	15	19
Performance awards and other benefit plans	1	1
Mandatory convertible preferred stock	-	5
Weighted-average common equivalent shares outstanding	615	644
Earnings per common share - assuming dilution	\$ 1.86	\$ 1.32

Table of Contents

VALERO ENERGY CORPORATION AND SUBSIDIARIES
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

9. STATEMENTS OF CASH FLOWS

In order to determine net cash provided by operating activities, net income is adjusted by, among other things, changes in current assets and current liabilities as follows (in millions):

	Three Months Ended March 31,	
	2007	2006
Decrease (increase) in current assets:		
Receivables, net	\$ 221	\$ 450
Inventories	(402)	(342)
Income taxes receivable	32	62
Prepaid expenses and other	32	(11)
Increase (decrease) in current liabilities:		
Accounts payable	115	606
Accrued expenses	(75)	(140)
Taxes other than income taxes	(7)	(104)
Income taxes payable	422	16
Changes in current assets and current liabilities	\$ 338	\$ 537

The above changes in current assets and current liabilities differ from changes between amounts reflected in the applicable consolidated balance sheets for the respective periods for the following reasons:

the amounts shown above exclude changes in cash and temporary cash investments, deferred income taxes, and current portion of long-term debt and capital lease obligations, as well as the effect of certain noncash investing and financing activities discussed below;

previously accrued capital expenditures, deferred turnaround and catalyst costs, and contingent earn-out payments are reflected in investing activities in the consolidated statements of cash flows; and

certain differences between consolidated balance sheet changes and consolidated statement of cash flow changes reflected above result from translating foreign currency denominated amounts at different exchange rates.

Noncash financing activities for the three months ended March 31, 2007 included the accrual of \$137 million of common stock purchases in the open market for which settlement and payment occurred in April 2007. There were no significant noncash investing activities for the three months ended March 31, 2007.

Noncash financing activities for the three months ended March 31, 2006 included the conversion of 713,035 shares of preferred stock into 1,413,233 shares of our common stock. There were no significant noncash investing activities for the three months ended March 31, 2006.

Table of Contents

VALERO ENERGY CORPORATION AND SUBSIDIARIES
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash flows related to interest and income taxes were as follows (in millions):

	Three Months Ended March 31,	
	2007	2006
Interest paid (net of amount capitalized)	\$ 13	\$ 15
Income taxes paid (net of tax refunds received)	5	151

10. PRICE RISK MANAGEMENT ACTIVITIES

The net gain (loss) recognized in income representing the amount of hedge ineffectiveness was as follows (in millions):

	Three Months Ended March 31,	
	2007	2006
Fair value hedges	\$ (1)	\$ (3)
Cash flow hedges	1	-

The above amounts were included in cost of sales in the consolidated statements of income. No component of the derivative instruments gains or losses was excluded from the assessment of hedge effectiveness. No amounts were recognized in income for hedged firm commitments that no longer qualify as fair value hedges.

For cash flow hedges, gains and losses reported in accumulated other comprehensive income in the consolidated balance sheets are reclassified into cost of sales when the forecasted transactions affect income. During the three months ended March 31, 2007, we recognized in accumulated other comprehensive income unrealized after-tax losses of \$42 million on certain cash flow hedges, primarily related to forward sales of distillates and associated forward purchases of crude oil, with \$7 million of cumulative after-tax losses on cash flow hedges remaining in accumulated other comprehensive income as of March 31, 2007. We expect that the deferred losses as of March 31, 2007 will be reclassified into cost of sales over the next nine months as a result of hedged transactions that are forecasted to occur. The amount ultimately realized in income, however, will differ as commodity prices change. For the three months ended March 31, 2007 and 2006, there were no amounts reclassified from accumulated other comprehensive income into income as a result of the discontinuance of cash flow hedge accounting.

11. INCOME TAXES

As discussed in Note 2, on January 1, 2007, we adopted the provisions of FIN 48. We did not recognize any change in our liability for uncertain tax positions as a result of our implementation of FIN 48; however, certain amounts previously reported in deferred income taxes were reclassified to other long-term liabilities in the consolidated balance sheet as of January 1, 2007. In accordance with the provisions of FIN 48, prior period amounts were not reclassified. The total amount of unrecognized tax benefits as of January 1, 2007 was \$152 million of which \$133 million, if recognized, would affect our effective tax rate. Accrued liabilities for interest and penalties related to unrecognized tax benefits were \$29 million as of January 1, 2007. Based on the number of tax years currently under audit by the relevant federal, state, and foreign tax authorities, we anticipate that several of these audits may be finalized in the foreseeable future. However, based on the status of these examinations, and the protocol of finalizing

Table of Contents

VALERO ENERGY CORPORATION AND SUBSIDIARIES
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

audits by the relevant tax authorities, it is not possible to estimate the impact of changes that may result from such audits, if any, on previously recorded uncertain tax positions. There have been no significant changes in the status of these examinations during the quarter ended March 31, 2007. As of January 1, 2007, certain tax years from 1999 through 2006 remained subject to examination by federal or state tax jurisdictions.

12. SEGMENT INFORMATION

Segment information for our two reportable segments, refining and retail, was as follows (in millions):

	Refining	Retail	Corporate	Total
Three months ended March 31, 2007:				
Operating revenues from external customers	\$ 17,792	\$ 1,906	\$ -	\$ 19,698
Intersegment revenues	1,309	-	-	1,309
Operating income (loss)	1,868	53	(156)	1,765
Three months ended March 31, 2006:				
Operating revenues from external customers	19,036	1,891	-	20,927
Intersegment revenues	1,311	-	-	1,311
Operating income (loss)	1,472	21	(160)	1,333
Total assets by reportable segment were as follows (in millions):				

	March 31, 2007	December 31, 2006
Refining	\$ 34,535	\$ 34,275
Retail	1,843	1,826
Corporate	1,809	1,652
 Total consolidated assets	 \$ 38,187	 \$ 37,753

The entire balance of goodwill as of March 31, 2007 and December 31, 2006 has been included in the total assets of the refining reportable segment.

VALERO ENERGY CORPORATION AND SUBSIDIARIES
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

13. EMPLOYEE BENEFIT PLANS

The components of net periodic benefit cost related to our defined benefit plans were as follows for the three months ended March 31, 2007 and 2006 (in millions):

	Pension Plans		Other Postretirement Benefit Plans	
	2007	2006	2007	2006
Components of net periodic benefit cost:				
Service cost	\$ 24	\$ 25	\$ 3	\$ 3
Interest cost	18	16	7	6
Expected return on plan assets	(21)	(14)	-	-
Amortization of:				
Prior service cost (credit)	1	1	(3)	(2)
Net loss	2	3	2	2
Net periodic benefit cost	\$ 24	\$ 31	\$ 9	\$ 9

Our anticipated contributions to our pension plans during 2007 have not changed from amounts previously disclosed in our consolidated financial statements for the year ended December 31, 2006. We have no expected minimum required contribution to our qualified pension plans during 2007 under the Employee Retirement Income Security Act. There were no contributions made during the three months ended March 31, 2007. For the three months ended March 31, 2006, we contributed \$15 million to our qualified pension plans.

14. COMMITMENTS AND CONTINGENCIES***Accounts Receivable Sales Facility***

As of March 31, 2007, we had an accounts receivable sales facility with a group of third-party financial institutions to sell on a revolving basis up to \$1 billion of eligible trade receivables, which matures in August 2008. As of March 31, 2007 and December 31, 2006, the amount of eligible receivables sold to the third-party financial institutions was \$1 billion.

Contingent Earn-Out Agreements

In both January 2007 and January 2006, we made previously accrued earn-out payments of \$50 million related to the acquisition of the St. Charles Refinery.

The following table summarizes the aggregate payments we have made through March 31, 2007 and payment limitations related to the following acquisitions (in millions):

	Aggregate Payments Made Through March 31, 2007	Annual Maximum Limit	Aggregate Limit
St. Charles Refinery	\$ 150	\$ 50	\$ 175
Delaware City Refinery	25	25	50

CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Tax Matters

We are subject to extensive tax liabilities, including federal, state, and foreign income taxes and transactional taxes such as excise, sales/use, payroll, franchise, withholding, and ad valorem taxes. New tax laws and regulations and changes in existing tax laws and regulations are continuously being enacted or proposed that could result in increased expenditures for tax liabilities in the future.

Effective January 1, 2007, the Government of Aruba (GOA) enacted a turnover tax on revenues from the sale of goods produced and services rendered in Aruba. The turnover tax, which is 3% for on-island sales and services and 1% on export sales, is being assessed by the GOA on sales by our Aruba Refinery. However, due to a previous tax holiday that was granted to our Aruba Refinery by the GOA through December 31, 2010, we believe that sales by our Aruba Refinery should not be subject to this turnover tax. As a result, no amounts have been accrued with respect to this turnover tax. We have filed a request for arbitration with the Netherlands Arbitration Institute pursuant to which we will seek to enforce our rights under the tax holiday.

McKee Refinery Fire Insurance Recoveries

On February 16, 2007, our McKee Refinery experienced a fire originating in its propane deasphalting unit. We are in the process of filing a claim with our insurance carriers. At this time we cannot determine the amount, if any, that may be collected under our insurance policies. Accordingly, no amounts have been recorded related to this claim.

Cameron Highway Oil Pipeline Joint Venture

We have agreed to make an estimated \$190 million cash capital contribution to Cameron Highway Oil Pipeline Company, representing our 50% portion of the amount required for the Cameron Highway Oil Pipeline joint venture to redeem its fixed-rate notes. Our capital contribution, along with an equal capital contribution from the other 50% joint venture partner, will be made, and the joint venture's debt will be redeemed, by the end of May 2007.

Litigation

MTBE Litigation

As of May 1, 2007, we were named as a defendant in 80 active cases alleging liability related to MTBE contamination in groundwater. The plaintiffs are generally water providers, governmental authorities, and private water companies alleging that refiners and marketers of MTBE and gasoline containing MTBE are liable for manufacturing or distributing a defective product. We have been named in these lawsuits together with many other refining industry companies. We are being sued primarily as a refiner and marketer of MTBE and gasoline containing MTBE. We do not own or operate gasoline station facilities in most of the geographic locations in which damage is alleged to have occurred. The lawsuits generally seek individual, unquantified compensatory and punitive damages, injunctive relief, and attorneys' fees. All of the cases are, or will be, pending in federal court and consolidated for pre-trial proceedings in the U.S. District Court for the Southern District of New York (Multi-District Litigation Docket No. 1358, *In re: Methyl-Tertiary Butyl Ether Products Liability Litigation*). Four of the cases Valero is involved in have been selected by the court as "focus cases" for discovery and pre-trial motions. The *Suffolk County Water Authority* case is scheduled for trial in January 2008. The *United Water New York* case may also be tried in 2008. Activity in the "non-focus" cases is generally stayed. We believe that we have strong defenses to these claims and are vigorously defending the cases. We have recorded a loss contingency liability with respect to this matter in accordance with FASB Statement No. 5. However, due to the inherent uncertainty of litigation, we believe that it is reasonably possible (as defined

Table of Contents

VALERO ENERGY CORPORATION AND SUBSIDIARIES
CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

in FASB Statement No. 5) that we may suffer a loss with respect to one or more of the lawsuits in excess of the amount accrued. We believe that such an outcome in any one of these lawsuits would not have a material adverse effect on our results of operations or financial position. However, we believe that an adverse result in all or a substantial number of these cases could have a material effect on our results of operations and financial position. An estimate of the possible loss or range of loss from an adverse result in all or substantially all of these cases cannot reasonably be made.

Retail Fuel Temperature Litigation

Along with several other defendants in the retail petroleum marketing business, we have been named in 15 consumer class action lawsuits relating to fuel temperature. The complaints, filed in federal courts in Alabama, Arizona, California, Kansas, Mississippi, Missouri, New Mexico, Oklahoma, and Tennessee, and in state court in Nevada, allege that because fuel volume increases with fuel temperature, the defendants have violated state consumer protection laws by failing to adjust the volume of fuel when the fuel temperature exceeded 60 degrees Fahrenheit. The complaints seek to certify classes of retail consumers who purchased fuel in Alabama, Arkansas, Arizona, California, Florida, Georgia, Kansas, Louisiana, Mississippi, Missouri, Nevada, New Jersey, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and Washington, D.C. The complaints seek an order compelling the installation of temperature correction devices as well as associated monetary relief. We anticipate that the federal lawsuits together with similar suits not involving Valero will be consolidated in a multidistrict litigation case and that the state court case will be removed and consolidated. We believe that we have several strong defenses to these lawsuits and intend to contest them. We have not recorded a loss contingency liability with respect to this matter, but we believe that it is reasonably possible (as defined in FASB Statement No. 5) that we may suffer a loss with respect to one or more of the lawsuits. An estimate of the possible loss or range of loss from an adverse result in all or substantially all of these cases cannot reasonably be made.

Other Litigation

We are also a party to additional claims and legal proceedings arising in the ordinary course of business. We believe that there is only a remote likelihood that future costs related to known contingent liabilities related to these legal proceedings would have a material adverse impact on our consolidated results of operations or financial position.

15. CONDENSED CONSOLIDATING FINANCIAL INFORMATION

In conjunction with the acquisition of Premcor Inc. (Premcor) on September 1, 2005, Valero Energy Corporation has fully and unconditionally guaranteed the following debt of The Premcor Refining Group Inc. (PRG), a wholly owned subsidiary of Valero Energy Corporation, that was outstanding as of March 31, 2007:

6.75% senior notes due February 2011,

6.125% senior notes due May 2011,

9.5% senior notes due February 2013,

6.75% senior notes due May 2014, and

7.5% senior notes due June 2015.

In addition, PRG has fully and unconditionally guaranteed all of the outstanding debt issued by Valero Energy Corporation.

The following condensed consolidating financial information is provided for Valero and PRG as an alternative to providing separate financial statements for PRG. The accounts for all companies reflected herein are presented using the equity method of accounting for investments in subsidiaries.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

FORWARD-LOOKING STATEMENTS

This Form 10-Q, including without limitation our discussion below under the heading *Results of Operations Outlook*, includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. You can identify our forward-looking statements by the words anticipate, believe, expect, plan, intend, estimate, project, projection, predict, budget, forecast, will, could, should, may, and similar expressions.

These forward-looking statements include, among other things, statements regarding:

future refining margins, including gasoline and distillate margins;

future retail margins, including gasoline, diesel, home heating oil, and convenience store merchandise margins;

expectations regarding feedstock costs, including crude oil differentials, and operating expenses;

anticipated levels of crude oil and refined product inventories;

our anticipated level of capital investments, including deferred refinery turnaround and catalyst costs and capital expenditures for environmental and other purposes, and the effect of those capital investments on our results of operations;

anticipated trends in the supply of and demand for crude oil and other feedstocks and refined products in the United States, Canada, and elsewhere;

expectations regarding environmental, tax, and other regulatory initiatives; and

the effect of general economic and other conditions on refining and retail industry fundamentals.

We based our forward-looking statements on our current expectations, estimates, and projections about ourselves and our industry. We caution that these statements are not guarantees of future performance and involve risks, uncertainties, and assumptions that we cannot predict. In addition, we based many of these forward-looking statements on assumptions about future events that may prove to be inaccurate. Accordingly, our actual results may differ materially from the future performance that we have expressed or forecast in the forward-looking statements. Differences between actual results and any future performance suggested in these forward-looking statements could result from a variety of factors, including the following:

acts of terrorism aimed at either our facilities or other facilities that could impair our ability to produce or transport refined products or receive feedstocks;

political and economic conditions in nations that consume refined products, including the United States, and in crude oil producing regions, including the Middle East and South America;

the domestic and foreign supplies of refined products such as gasoline, diesel fuel, jet fuel, home heating oil, and petrochemicals;

the domestic and foreign supplies of crude oil and other feedstocks;

the ability of the members of the Organization of Petroleum Exporting Countries (OPEC) to agree on and to maintain crude oil price and production controls;

the level of consumer demand, including seasonal fluctuations;

refinery overcapacity or undercapacity;

the actions taken by competitors, including both pricing and the expansion and retirement of refining capacity in response to market conditions;

environmental, tax, and other regulations at the municipal, state, and federal levels and in foreign countries;

Table of Contents

the level of foreign imports of refined products;

accidents or other unscheduled shutdowns affecting our refineries, machinery, pipelines, or equipment, or those of our suppliers or customers;

changes in the cost or availability of transportation for feedstocks and refined products;

the price, availability, and acceptance of alternative fuels and alternative-fuel vehicles;

delay of, cancellation of, or failure to implement planned capital projects and realize the various assumptions and benefits projected for such projects or cost overruns in constructing such planned capital projects;

earthquakes, hurricanes, tornadoes, and irregular weather, which can unforeseeably affect the price or availability of natural gas, crude oil and other feedstocks, and refined products;

rulings, judgments, or settlements in litigation or other legal or regulatory matters, including unexpected environmental remediation costs, in excess of any reserves or insurance coverage;

legislative or regulatory action, including the introduction or enactment of federal, state, municipal, or foreign legislation or rulemakings, which may adversely affect our business or operations;

changes in the credit ratings assigned to our debt securities and trade credit;

changes in currency exchange rates, including the value of the Canadian dollar relative to the U.S. dollar; and

overall economic conditions.

Any one of these factors, or a combination of these factors, could materially affect our future results of operations and whether any forward-looking statements ultimately prove to be accurate. Our forward-looking statements are not guarantees of future performance, and actual results and future performance may differ materially from those suggested in any forward-looking statements. We do not intend to update these statements unless we are required by the securities laws to do so.

All subsequent written and oral forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the foregoing. We undertake no obligation to publicly release the results of any revisions to any such forward-looking statements that may be made to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events.

Table of Contents

OVERVIEW

In this overview, we set out some of the primary factors that we believe affected our operations in the first quarter of 2007. Our profitability is substantially determined by the spread between the price of refined products and the price of crude oil, referred to as the refined product margin. The strong industry fundamentals for refined products that we experienced throughout 2006 continued during the first quarter of 2007. Gasoline and distillate demand was strong throughout the first quarter of 2007. In addition, other factors such as low imports, industry-wide turnaround activity and unscheduled refinery outages, and the implementation of more restrictive sulfur regulations on gasoline and diesel resulted in tight supplies of refined products and, combined with the strong demand, resulted in very favorable refined product margins during the first quarter of 2007.

Since approximately 60% of our total crude oil throughput represents sour crude oil and acidic sweet crude oil feedstocks that are purchased at prices less than sweet crude oil, our profitability is also significantly affected by the spread between sweet crude oil and sour crude oil prices, referred to as the sour crude oil differential. Although first quarter 2007 sour crude oil differentials relative to West Texas Intermediate (WTI) crude oil declined compared to the strong 2006 first quarter differentials, these sour crude oil differentials to WTI remained wide. In addition, the sour crude oil differentials relative to light, sweet crude oils other than WTI in the first quarter of 2007 were comparable to those experienced in the first quarter of 2006.

On February 16, 2007, our McKee Refinery was shut down due to a fire originating in its propane deasphalting unit, resulting in reduced operating income of approximately \$110 million in the first quarter of 2007. The refinery recommenced operations on April 15 at a reduced throughput rate, with run rates at the end of April at about 50% of the refinery's capacity.

The favorable gasoline and distillate margins and continuing wide sour crude oil differentials discussed above contributed to strong operating results in the first quarter of 2007. We reported net income of \$1.1 billion, or \$1.86 per share, for the first quarter of 2007, compared to \$849 million, or \$1.32 per share, for the first quarter of 2006. In regard to our financial position, during the first quarter of 2007, we purchased over \$900 million of our common stock under our board-authorized programs and repaid \$183 million of callable debt that was due in 2010. Despite these cash payments and \$680 million of capital investments in the first quarter, our cash balance increased during the quarter to \$1.7 billion at the end of March 2007.

Table of Contents

General

Operating revenues decreased 6% for the first quarter of 2007 compared to the first quarter of 2006 primarily as a result of lower sales volumes between the two periods. Operating income of \$1.8 billion and net income of \$1.1 billion for the three months ended March 31, 2007 increased more than 30% from the corresponding amounts in the first quarter of 2006 primarily due to a \$396 million increase in refining segment operating income and a \$32 million increase in retail segment operating income.

Refining

Operating income for our refining segment increased from \$1.5 billion for the first quarter of 2006 to \$1.9 billion for the first quarter of 2007, resulting mainly from a 19% increase in throughput margin per barrel, partially offset by a \$123 million increase in refining operating expenses (including depreciation and amortization expense).

Refining throughput margins for the first quarter of 2007 compared to the first quarter of 2006 were impacted by the following factors:

Gasoline and distillate margins increased significantly in all of our refining regions in the first quarter of 2007 compared to the margins in the first quarter of 2006. The improvement in refined product margins for the first quarter of 2007 was primarily due to an increase in demand combined with a decline in refined product inventory levels resulting from lower imports, more stringent product specifications and regulations, heavy industry turnaround activity, and unplanned outages.

Sour crude oil feedstock differentials to WTI crude oil during the first quarter of 2007 were lower than the strong differentials in the first quarter of 2006 as a result of a temporary oversupply of WTI crude oil, due in part to the market impact resulting from our McKee Refinery shutdown. However, other light, sweet crude oils priced at a premium to WTI in the first quarter of 2007; thus, sour crude oil feedstock differentials relative to those other light, sweet crude oils in the first quarter of 2007 were comparable to the wide differentials experienced in the first quarter of 2006. These wide differentials are attributable to continued ample supplies of sour crude oils and heavy sour residual fuel oils on the world market. Differentials on sour crude oil feedstocks also continued to benefit from increased demand for sweet crude oil resulting from lower sulfur specifications for gasoline and diesel and a global increase in refined product demand, particularly in Asia, which has resulted in higher utilization rates by refineries that require sweet crude oil as feedstock.

Margins on other refined products such as propylene, petroleum coke, and sulfur improved from the first quarter of 2006 to the first quarter of 2007 due to a decrease in the price of crude oil between the periods.

Refining operating expenses, excluding depreciation and amortization expense, were 5% higher for the quarter ended March 31, 2007 compared to the quarter ended March 31, 2006 due primarily to increases in employee compensation and related benefits, maintenance expense, and catalysts and chemicals, partially offset by decreases in energy costs. Refining depreciation and amortization expense increased 32% from the first quarter of 2006 to the first quarter of 2007 primarily due to the implementation of new capital projects, increased turnaround and catalyst amortization, and the write-off of costs related to the McKee Refinery as a result of the fire it experienced in February 2007.

Retail

Retail operating income of \$53 million for the quarter ended March 31, 2007 was approximately 150% higher than the \$21 million reported for the quarter ended March 31, 2006. This increase in operating

Table of Contents

income was mainly attributable to a \$0.02 per gallon increase in average fuel margins in both our U.S. and Canadian retail operations.

Corporate Expenses and Other

General and administrative expenses, including corporate depreciation and amortization expense, were essentially unchanged from the first quarter of 2006 to the first quarter of 2007. Expenses incurred in the first quarter of 2006 attributable to Premcor headquarters personnel were not incurred in the first quarter of 2007, but such decrease was offset by executive retirement expenses incurred in the first quarter of 2007.

Equity in earnings of NuStar Energy L.P. is not reflected in the first quarter of 2007 due to the sale of our remaining ownership interest in NuStar GP Holdings, LLC in December 2006.

Income tax expense increased \$130 million from the first quarter of 2006 to the first quarter of 2007 mainly as a result of higher operating income.

OUTLOOK

Since the end of the 2007 first quarter, refining industry fundamentals have remained positive. U.S. light product inventories, particularly gasoline, have declined relative to prior years due to prolonged turnarounds, unscheduled refinery outages, lower imports, tighter product specifications, and strong demand. The low inventories going into the driving season will likely result in favorable refinery margins through at least the second quarter. In addition, sour crude oil differentials remained wide relative to alternate sweet crude oils during the month of April 2007 and are expected to remain favorable through the summer due to ample supplies of sour crude oil and continued strong demand for sweet crude oil.

On February 16, 2007, our McKee Refinery experienced a fire originating in its propane deasphalting unit. The refinery recommenced operations on April 15, 2007 at approximately 50% of capacity. We expect throughput rates at the McKee Refinery to increase to 150,000 barrels per day by mid-year and to reach full capacity by the end of 2007 or early 2008. In regard to other operations, we have minimal turnaround activity scheduled for the second quarter of 2007. We expect to benefit during the remainder of 2007 from the completion of significant turnaround and capital improvement projects, including our crude unit expansion project at our Port Arthur Refinery that was completed in January.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flows for the Three Months Ended March 31, 2007 and 2006

Net cash provided by operating activities for the three months ended March 31, 2007 was \$1.9 billion compared to \$1.7 billion for the three months ended March 31, 2006. The increase in cash generated from operating activities was due primarily to the increase in net income discussed above under Results of Operations, partially offset by a \$199 million decrease from an unfavorable change in working capital between the years. Changes in cash provided by working capital during the first three months of 2007 and 2006 are shown in Note 9 of Condensed Notes to Consolidated Financial Statements. Working capital in the first quarter of 2007 was primarily impacted by a large increase in income taxes payable attributable mainly to operating income generated in the first quarter of 2007.

The net cash generated from operating activities during the first three months of 2007, combined with a \$63 million benefit from tax deductions in excess of recognized stock-based compensation cost and \$37 million of proceeds from the issuance of common stock related to our employee benefit plans, were used mainly to:

Table of Contents

fund \$680 million of capital expenditures and deferred turnaround and catalyst costs;

purchase 15.6 million shares of treasury stock at a cost of \$904 million;

redeem our 9.25% senior notes for \$183 million;

fund \$50 million of contingent earn-out payments in connection with the acquisition of the St. Charles Refinery;

pay common stock dividends of \$73 million; and

increase available cash on hand by \$106 million.

The net cash generated from operating activities during the first three months of 2006, combined with \$32 million of proceeds from the issuance of common stock related to our employee benefit plans and an \$89 million benefit from tax deductions in excess of recognized stock-based compensation cost, were used mainly to:

fund \$974 million of capital expenditures and deferred turnaround and catalyst costs;

make scheduled debt repayments of \$220 million;

purchase 10.7 million shares of treasury stock at a cost of \$590 million;

fund a contingent earn-out payment in connection with the acquisition of the St. Charles Refinery of \$50 million; and

pay common and preferred stock dividends of \$38 million.

Capital Investments

During the three months ended March 31, 2007, we expended \$551 million for capital expenditures and \$129 million for deferred turnaround and catalyst costs. Capital expenditures for the three months ended March 31, 2007 included \$160 million of costs related to environmental projects.

In connection with our acquisition of the St. Charles Refinery in 2003, the seller is entitled to receive payments in any of the seven years following this acquisition if certain average refining margins during any of those years exceed a specified level. In connection with the Premcor Acquisition in 2005, we assumed Premcor's obligation under a contingent earn-out agreement related to Premcor's acquisition of the Delaware City Refinery from Motiva Enterprises LLC. Any payments due under these earn-out arrangements are limited based on annual and aggregate limits. In January 2007, we made an earn-out payment of \$50 million related to the St. Charles Refinery. Based on margin levels through April 2007, an earn-out payment of \$25 million (the maximum remaining payment based on the aggregate limitation under the agreement) related to the acquisition of the Delaware City Refinery will be due in the second quarter of 2007.

For 2007, we expect to incur approximately \$3.5 billion for capital investments, including approximately \$3.1 billion for capital expenditures (approximately \$800 million of which is for environmental projects) and approximately \$400 million for deferred turnaround and catalyst costs. The capital expenditure estimate excludes anticipated expenditures related to the earn-out contingency agreements discussed above and strategic acquisitions. We continuously evaluate our capital budget and make changes as economic conditions warrant.

We have agreed to make an estimated \$190 million cash capital contribution to Cameron Highway Oil Pipeline Company, representing our 50% portion of the amount required for the Cameron Highway Oil Pipeline joint venture to redeem its fixed-rate notes. Our capital contribution, along with an equal capital contribution from the other 50% joint venture partner, will be made, and the joint venture's debt will be redeemed, by the end of May 2007.

Table of Contents***Lima Refinery Disposition***

On May 2, 2007, we entered into an agreement to sell our refinery in Lima, Ohio to Husky Refining Company, a wholly owned subsidiary of Husky Energy Inc. The sales price is \$1.9 billion, plus an amount equal to net working capital as of the closing date of the sale, which is expected to occur by the end of the second quarter of 2007. Net proceeds from the sale exceed the carrying amount of the net assets being sold. The sale is subject to the receipt of required regulatory approvals.

Contractual Obligations

As of March 31, 2007, our contractual obligations included long-term debt, capital lease obligations, operating leases, purchase obligations, and other long-term liabilities. Except as discussed below, there were no significant changes to our contractual obligations during the three months ended March 31, 2007.

On February 1, 2007, we redeemed our 9.25% senior notes for \$183 million, or 104.625% of stated value. In addition, in April 2007, we made a scheduled debt repayment of \$230 million related to our 6.125% notes.

In April 2007, to fund the accelerated share repurchase program discussed in Note 7 of Condensed Notes to Consolidated Financial Statements, we borrowed \$3 billion under a 364-day term credit agreement with a financial institution. The term loan bears interest at LIBOR plus a margin, or an alternate base rate as defined under the agreement. The interest rate is subject to adjustment based upon the credit ratings assigned to our long-term debt. The amount borrowed can be prepaid at any time, and proceeds from any long-term financing during the term of this agreement, with certain exceptions, must be used to reduce the amount borrowed under the 364-day term credit agreement.

As of March 31, 2007, our short-term and long-term purchase obligations increased by approximately \$2 billion from the amount reported as of December 31, 2006, resulting from, among other items, new refined product purchase contracts entered into in the first quarter of 2007.

Our agreements do not have rating agency triggers that would automatically require us to post additional collateral. However, in the event of certain downgrades of our senior unsecured debt to below investment grade ratings by Moody's Investors Service and Standard & Poor's Ratings Services, the cost of borrowings under some of our bank credit facilities and other arrangements would increase. As of March 31, 2007, all of our ratings on our senior unsecured debt are at or above investment grade level as follows:

Rating Agency	Rating
Standard & Poor's Ratings Services	BBB (stable outlook)
Moody's Investors Service	Baa3 (stable outlook)
Fitch Ratings	BBB (stable outlook)

Upon our announcement of both the increase in our common stock purchase program to \$6 billion and the \$3 billion accelerated share repurchase program, each of the rating agencies affirmed our ratings, with Moody's Investors Service changing its outlook from stable to positive.

Other Commercial Commitments

As of March 31, 2007, our committed lines of credit included:

	Borrowing Capacity	Expiration
Revolving credit facility	\$2.5 billion	August 2011
Canadian revolving credit facility	Cdn. \$115 million	December 2010

Table of Contents

As of March 31, 2007, we had \$451 million of letters of credit outstanding under our uncommitted short-term bank credit facilities and \$208 million of letters of credit outstanding under our committed revolving credit facility. Under our Canadian committed revolving credit facility, we had Cdn. \$7 million of letters of credit outstanding as of March 31, 2007. These letters of credit expire during 2007, 2008, and 2009.

Stock Purchase Programs

During the first quarter of 2007, we had two stock purchase programs that had been previously approved by our board of directors, which authorized our purchase of treasury stock in open market transactions to satisfy employee benefit plan requirements as well as a \$2 billion common stock purchase program. Stock purchases under the \$2 billion program during the first quarter of 2007 were made from time to time at prevailing prices as permitted by securities laws and other legal requirements, subject to market conditions and other factors. The program does not have a scheduled expiration date.

During the first quarter of 2007, we purchased 15.6 million shares of our common stock at a cost of \$904 million in connection with the administration of our employee benefit plans and the \$2 billion common stock purchase program authorized by our board of directors. During April 2007, we purchased an additional 4.2 million shares at a cost of approximately \$275 million, excluding the effect of the accelerated share repurchase program discussed below.

On April 25, 2007, our board of directors approved an amendment to our \$2 billion common stock purchase program to increase the authorized purchases under the program to \$6 billion. In conjunction with the increase in our common stock purchase program, we entered into an agreement with a financial institution to purchase \$3 billion of our shares under an accelerated share repurchase program, and in late April, approximately 42 million shares were purchased under this agreement. The purchase of these shares was funded with a short-term bridge loan, which we expect to replace with longer-term financing. At the expiration of the accelerated share repurchase program, which is expected to occur in the third quarter of 2007, the cost of the shares purchased under this accelerated share repurchase program will be adjusted, with the final purchase cost based on a discount to the average trading price of our common stock, weighted by the daily volume of shares traded, during the program period. Any adjustment to the cost can be paid in cash or stock, at our option.

McKee Refinery Fire Insurance Recoveries

On February 16, 2007, our McKee Refinery experienced a fire originating in its propane deasphalting unit. We are in the process of filing a claim with our insurance carriers. At this time we cannot determine the amount, if any, that may be collected under our insurance policies. Accordingly, no amounts have been recorded related to this claim.

Tax Matters

We are subject to extensive tax liabilities, including federal, state, and foreign income taxes and transactional taxes such as excise, sales/use, payroll, franchise, withholding, and ad valorem taxes. New tax laws and regulations and changes in existing tax laws and regulations are continuously being enacted or proposed that could result in increased expenditures for tax liabilities in the future.

Effective January 1, 2007, the Government of Aruba (GOA) enacted a turnover tax on revenues from the sale of goods produced and services rendered in Aruba. The turnover tax, which is 3% for on-island sales and services and 1% on export sales, is being assessed by the GOA on sales by our Aruba Refinery. However, due to a previous tax holiday that was granted to our Aruba Refinery by the GOA through December 31, 2010, we believe that sales by our Aruba Refinery should not be subject to this turnover tax. As a result, no amounts have been accrued with respect to this turnover tax. We have filed a request for arbitration with the Netherlands Arbitration Institute pursuant to which we will seek to enforce our rights under the tax holiday.

Table of Contents

Other

Although we have no expected minimum required contribution to our qualified pension plans during 2007 under the Employee Retirement Income Security Act, we expect to contribute \$100 million to our qualified pension plans during 2007.

We are subject to extensive federal, state, and local environmental laws and regulations, including those relating to the discharge of materials into the environment, waste management, pollution prevention measures, greenhouse gas emissions, and characteristics and composition of gasolines and distillates. Because environmental laws and regulations are becoming more complex and stringent and new environmental laws and regulations are continuously being enacted or proposed, the level of future expenditures required for environmental matters could increase in the future. In addition, any major upgrades in any of our refineries could require material additional expenditures to comply with environmental laws and regulations.

We believe that we have sufficient funds from operations and, to the extent necessary, from the public and private capital markets and bank markets, to fund our ongoing operating requirements. We expect that, to the extent necessary, we can raise additional funds from time to time through equity or debt financings. However, there can be no assurances regarding the availability of any future financings or whether such financings can be made available on terms that are acceptable to us.

OFF-BALANCE SHEET ARRANGEMENTS

Accounts Receivable Sales Facility

As of March 31, 2007, we had an accounts receivable sales facility with a group of third-party financial institutions to sell on a revolving basis up to \$1 billion of eligible trade receivables, which matures in August 2008. As of March 31, 2007 and December 31, 2006, the amount of eligible receivables sold to the third-party financial institutions was \$1 billion.

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in accordance with United States generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. Our critical accounting policies are disclosed in our Annual Report on Form 10-K for the year ended December 31, 2006.

As discussed in Note 2 of Condensed Notes to Consolidated Financial Statements, certain new financial accounting pronouncements have been issued which either have already been reflected in the accompanying consolidated financial statements, or will become effective for our financial statements at various dates in the future.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

COMMODITY PRICE RISK

The following tables provide information about our derivative commodity instruments as of March 31, 2007 and December 31, 2006 (dollars in millions, except for the weighted-average pay and receive prices as described below), including:

fair value hedges which are used to hedge our recognized refining inventories (which had a carrying amount of \$4.6 billion and \$4.2 billion as of March 31, 2007 and December 31, 2006, respectively, and a fair value of \$9.0 billion and \$7.1 billion as of March 31, 2007 and December 31, 2006, respectively) and unrecognized firm commitments (i.e., binding agreements to purchase inventories in the future);

cash flow hedges which are used to hedge our forecasted feedstock and product purchases, refined product sales, and natural gas purchases;

economic hedges (hedges not designated as fair value or cash flow hedges) which are used to:

- manage price volatility in refinery feedstock and refined product inventories, and
- manage price volatility in forecasted feedstock and product purchases, refined product sales, and natural gas purchases; and

derivative commodity instruments held or issued for trading purposes.

The gain or loss on a derivative instrument designated and qualifying as a fair value hedge and the offsetting loss or gain on the hedged item are recognized currently in income in the same period. The effective portion of the gain or loss on a derivative instrument designated and qualifying as a cash flow hedge is initially reported as a component of other comprehensive income and is then recorded in income in the period or periods during which the hedged forecasted transaction affects income. The ineffective portion of the gain or loss on the cash flow derivative instrument, if any, is recognized in income as incurred. For our economic hedges and for derivative instruments entered into by us for trading purposes, the derivative instrument is recorded at fair value and changes in the fair value of the derivative instrument are recognized currently in income.

The following tables include only open positions at the end of the reporting period, and therefore do not include amounts related to closed cash flow hedges for which the gain or loss remains in accumulated other comprehensive income pending consummation of the forecasted transactions.

Contract volumes are presented in thousands of barrels (for crude oil and refined products) or in billions of British thermal units (for natural gas). The weighted-average pay and receive prices represent amounts per barrel (for crude oil and refined products) or amounts per million British thermal units (for natural gas). Volumes shown for swaps represent notional volumes, which are used to calculate amounts due under the agreements. For futures, the contract value represents the contract price of either the long or short position multiplied by the derivative contract volume, while the market value amount represents the period-end market price of the commodity being hedged multiplied by the derivative contract volume. The pre-tax fair value for futures, swaps, and options represents the fair value of the derivative contract. The pre-tax fair value for swaps represents the excess of the receive price over the pay price multiplied by the notional contract volumes. For futures and options, the pre-tax fair value represents (i) the excess of the market value amount over the contract amount for long positions, or (ii) the excess of the contract amount over the market value amount for short positions. Additionally, for futures and options, the weighted-average pay price represents the contract price for long positions and the weighted-average receive price represents the contract price for short positions. The weighted-average pay price and weighted-average receive price for options represents their strike price.

Table of Contents***INTEREST RATE RISK***

The following table provides information about our long-term debt instruments (dollars in millions), all of which are sensitive to changes in interest rates. Principal cash flows and related weighted-average interest rates by expected maturity dates are presented. We had no interest rate derivative instruments outstanding as of March 31, 2007 and December 31, 2006.

	March 31, 2007							
	Expected Maturity Dates							
	2007	2008	2009	2010	2011	There- after	Total	Fair Value
Long-term Debt:								
Fixed rate	\$287	\$ 6	\$209	\$ 33	\$418	\$3,946	\$4,899	\$5,158
Average interest rate	6.1%	6.0%	3.6%	6.8%	6.4%	7.1%	6.8%	

	December 31, 2006							
	Expected Maturity Dates

Long-term Debt:								
Fixed rate	\$462	\$ 6	\$209	\$ 33	\$418	\$3,946	\$5,074	\$5,361
Average interest rate	7.3%	6.0%	3.6%	6.8%	6.4%	7.1%	6.9%	

FOREIGN CURRENCY RISK

As of March 31, 2007, we had commitments to purchase \$286 million of U.S. dollars. Our market risk was minimal on these contracts, as they matured on or before April 23, 2007, resulting in a \$3 million loss in the second quarter of 2007.

Table of Contents

Item 4. Controls and Procedures.

(a) Evaluation of disclosure controls and procedures.

Our management has evaluated, with the participation of our principal executive officer and principal financial officer, the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report, and has concluded that our disclosure controls and procedures were operating effectively as of March 31, 2007.

(b) Changes in internal control over financial reporting.

There has been no change in our internal control over financial reporting that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

The information below describes new proceedings or material developments in proceedings that we previously reported in our annual report on Form 10-K for the year ended December 31, 2006.

Environmental Enforcement Matters

While it is not possible to predict the outcome of the following environmental proceedings, if any one or more of them were decided against Valero, we believe that there would be no material effect on our consolidated financial position or results of operations. We are reporting these proceedings to comply with SEC regulations, which require us to disclose proceedings arising under federal, state, or local provisions regulating the discharge of materials into the environment or protecting the environment if we reasonably believe that such proceedings will result in monetary sanctions of \$100,000 or more.

New Jersey Department of Environmental Protection (NJDEP) (Paulsboro Refinery). In March 2007, the NJDEP issued an Administrative Order and Notice of Civil Administrative Penalty Assessments (Notice) to our Paulsboro Refinery alleging unauthorized air emissions and late reporting regarding a release and flaring event that occurred in February 2007. The Notice contained a proposed penalty of \$112,500. We have appealed this Notice.

Table of Contents**Item 1A. Risk Factors.**

There have been no material changes from the risk factors disclosed in the Risk Factors section of our annual report on Form 10-K for the year ended December 31, 2006.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(a) *Unregistered Sales of Equity Securities.* Not applicable.

(b) *Use of Proceeds.* Not applicable.

(c) *Issuer Purchases of Equity Securities.* The following table discloses purchases of shares of Valero's common stock made by us or on our behalf for the periods shown below.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Not Purchased as Part of Publicly Announced Plans or Programs (1)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs (2)
January 2007	192,587	\$50.95	192,587	0	\$2.0 billion
February 2007	5,902,619	\$56.82	1,226,427	4,676,192	\$1.73 billion
March 2007	9,469,214	\$58.99	91,502	9,377,712	\$1.18 billion
Total	15,564,420	\$58.07	1,510,516	14,053,904	\$1.18 billion

(1) The shares reported in this column represent purchases settled in the first quarter of 2007 relating to (a) our purchases of shares in open-market transactions to meet our obligations under employee benefit plans, and (b) our purchases of shares from our employees and non-employee directors in connection with the exercise of stock options, the vesting of restricted stock, and other stock compensation transactions in accordance with the terms of our incentive compensation plans.

(2) During the first quarter of 2007, we purchased shares under the \$2 billion common stock purchase program approved by our board of directors in October 2006. On April 26, 2007, we publicly announced an increase in our common stock purchase program from \$2 billion to \$6 billion, including a \$3 billion accelerated share repurchase program, as authorized by our board of directors on April 25, 2007. The \$6 billion common stock purchase program has no expiration date. The \$6 billion common stock purchase program is more fully described above in Note 7 of Condensed Notes to Consolidated Financial Statements, and we hereby incorporate by reference into this Item our disclosures made in Note 7.
